

Ernst Jenni & Claus Westermann

# Theological Lexicon of the Old Testament

Translated by Mark E. Biddle

## PREFACE TO THE GERMAN EDITION

I am deeply indebted to my honored colleague Prof. Dr. C. Westermann, Heidelberg, who has also given impetus to the project and has established contact with the publisher, for the enlistment of a great portion of the approximately forty contributors to this first volume of the *THAT*. That the assembly of the contributors has resulted in two geographical centers, one in Heidelberg and the other in Switzerland, should be understood in terms of personal relationships, yet contributions to the first volume originate from about ten different countries.

I have translated the manuscripts of non-German-speaking authors and have subjected all articles to revision with a view to formalities and to the creation of a degree of uniformity. Frequent use has been made of a stipulated right to alter content as well (in the more significant cases, following discussions with the author), less in deletions than in additions. A number of revisions, if sufficiently distinctive thematically or the result of the needs of the structure of the lexicon as a whole (e.g., the placement of semantically related words) and consequently not to be taken as criticism of an author's contribution, are indicated by means of an asterisk (\*) as the addition of the editor (\* beside section numbers or letters indicates the entire section in question; \* after a paragraph indicates only the paragraph in question). The most substantive interventions were necessary in the first two major sections; for the verification of statistical details, I alone bear responsibility. Only the long articles have been submitted to the authors for proofreading; hence I must bear more than usual responsibility for oversights and typographical errors.

Particular thanks are due Prof. Dr. Theol. Thomas Willi (Eichberg, St. Gallen), Prof. Dr. Theol. Gerhard Wehmeier (Dharwar, St. Mysore, India), and Matthias Suter, who, as the editor's assistants from the end of 1968 on, have undertaken the troublesome task of checking references and citations, as well as finally of proofreading.

Basel, April 1971, Ernst Jenni

## PREFACE TO THE ENGLISH EDITION

### A. History of the Volumes

The *Theologisches Handwörterbuch zum Alten Testament*, edited by Ernst Jenni with assistance from Claus Westermann (Munich: Chr. Kaiser; Zurich: Theologischer Verlag) has displayed the longevity of an incomparable reference work. It was originally published as two volumes in the 1970s (volume 1, *ʔalep-mem*, in 1971; volume 2, *nun-taw*, in 1976) and was reissued in 1984. A Spanish translation by J. Antonio Mugica appeared in 1978 (*Diccionario teológico manual del Antiguo Testamento*, Madrid: Ediciones Cristiandad). This present three-volume translation makes accessible for the first time in English a wealth of theological insight that, as the introduction to the German edition promises, “intends to offer a reliable aid for the academic study of the Old Testament but also for the church’s teaching and preaching.”

### B. Features of the Translation

The publisher has sought to make this an easily accessible and valuable resource for students of any level. Toward this end, the entries have been comprehensively updated to reflect new editions and English translations of the bibliographic references. Furthermore, all Hebrew and Aramaic words have been fully transliterated into English forms. For ready reference, a new feature has been added: a resource list has been included with each new entry. This list keys the terms in the main entries (and all cross-referenced words) to the corresponding page locations in *The Brown-Driver-Briggs Hebrew and English Lexicon* (BDB), the *Theological Dictionary of the Old Testament* (TDOT), and the English edition of Koehler and Baumgartner’s *Hebrew and Aramaic Lexicon of the Old Testament* (HALOT), and to the word numbers in *Strong’s Exhaustive Concordance of the Bible* (S), the *Theological Wordbook of the Old Testament* (TWOT), and the *New International Dictionary of Old Testament Theology and Exegesis* (NIDOTTE). The English translations of TDOT and HALOT were not complete upon publication: in these cases, where the English resources ended, we have cited the original German volumes (*ThWAT* and *HAL*, respectively). Some of these lexical aids will be useful to the scholar, some to the student and pastor, and some to the layperson.

This English edition has modified the German *Einleitung* in four

places. (1) Section D, “Explanation of the Hebrew Transliteration,” represents the conventions we have adopted here, which are those generally used among English-speaking scholars. (2) Section E, “Concordance of Divergent Versification,” compares references in the Hebrew text tradition (MT) and in standard English translations (e.g., NRSV). (3) Section F, which contained Jenni’s concluding remarks at the publication of the first volume, has been removed from the introduction and retitled “Preface to the German Edition.” (4) Because the English edition comprises three volumes, we have relocated the original *Vorwort* to the second volume to immediately following the foreword to the German edition (p. xii).

The content of these volumes has been altered very little from the German original. In general, the updating of the bibliographic entries extends only to revised editions and English translations. Some exceptions occur. For example, Ugaritic texts are cited according to *Die keilalphabetischen Texte aus Ugarit (KTU)*, which appeared too late to be used by the authors of the original edition. In rare cases, the translator has explained nuances and semantic ranges using English analogues rather than strict translations of the original German examples. Direct quotations have also been translated, even when no English-language edition exists. References to Qumran literature have occasionally been modified to indicate that the author worked only with material that was available at the original publication, and some concordance additions have been added to supplement K. G. Kuhn’s *Konkordanz zu den Qumrantexten*. We have differed from the German in not setting transliterated proper names with an initial uppercase character.

The translator and the publisher of the English edition have not updated the text to reflect recent discussion. This approach was intentional, since the individual entries are, in effect, lexical essays. They represent clear methodological approaches and interact with the bibliography cited. To update the discussion, which the bibliography reflects, would be to misrepresent the efforts and viewpoints of the contributing scholars. The reader should pursue further inquiry with the tools cited in the resource key, some of which contain subsequent scholarly discussion.

The statistical tables and indexes in the final volume closely reproduce the German originals. The reader should note the following changes. (1) The English edition includes a Scripture index. (2) The English word index is based on the definitions used in the main headings. (3) In the place of separate Hebrew and Aramaic indexes, we have provided one index that alphabetizes the main entries and includes an alphabetical list of the derivatives discussed under each main entry, and a second index that fully alphabetizes all significant words discussed and keys these words to Strong’s numbers.

The publisher is confident that the individual studies in the *Theological Lexicon of the Old Testament* remain fundamental to biblical scholars, theologians, pastors, and laypersons. Their careful attention to the history and context of the biblical text has not been superseded, and their theological insights will remain significant to anyone interested in either historical or constructive theology. The rigor of their search for meaning within the historical and linguistic contexts of particular passages stands as an example to another generation of scholars and students.

## FOREWORD TO THE GERMAN EDITION

### A. Volume 1

This is the first volume of a lexicon that intends to offer a reliable aid for the academic study of the OT but also for the church's teaching and preaching. The contributor's concern has been to set the treatment of the meaning and usage of individual vocabulary entries on the broadest possible methodological basis. In recent decades the consensus in OT research has become to avoid all methodological limitations in questions concerning the meaning of a word (particularly concerning the theological meaning); only the determined application of as many different approaches as possible can lead to a convincing result. These limitations include attempts to explain a word on the basis of grammatical-philological viewpoints alone, to derive the full richness of a word from a postulated basic meaning in every case, and to reconstruct a linear history of a concept that leaves no room for the parallel existence of differentiated categories of usage. Finally, a mechanical differentiation between profane and religious usages, wherein *eo ipso* the profane usage is frequently seen as the older, should also be regarded as restrictive.

In contrast to all such linear explanations, this lexicon strives to attribute absolute authority to no individual method of linguistic research. Rather, in accordance with the current status of OT studies and of general linguistics, it seeks to establish and maintain as broad an approach as possible.

In contrast to previous OT lexicons, the results of a plethora of form-critical and tradition-critical investigations in particular are incorporated here. In many cases a substantial correction in the objective groupings as well as in the temporal stratification of word usages is required. On the one hand, it is now possible to assess with certainty the context against which a given verb or noun should be exegeted by means of firm and unequivocal categorization of a particular usage of a verb or a noun, perhaps to a particular legal form, to a prophetic speech form, to a psalm genre, or to a particular narrative or report tradition. On the other hand, one is much less likely to speak of "early" and "late" usages of a particular word; and, confronted with a strongly divergent word usage, one is as likely to think of parallel as of subsequent developments.

An essential result of recent linguistics merits particular attention: that the basic unit of speech communication is not the word but the sentence. This result corresponds with those of form criticism and tradition criticism. In contrast to literary-critical methods of research for which the usage of an isolated word can be decisive for the determination of the temporal

stratification, it has become ever more apparent in recent research that only the sentence, or a construct of several sentences, characterizes a tradition. This observation has one essential consequence for the treatment of the content of a word: the categorization of the occurrences of a word must result from the sentences in which they occur and from their function in the larger context.

The work of the lexicon is affected by a further important correction offered by so-called semantic-field research, whose usefulness for the determination of the meanings of words that seem very closely related or synonymous, as well as for the translation into other languages where the semantic fields are often structured otherwise, can only be alluded to here.

In conclusion attention must be called to the fact that the powerful expansion of the corpus of texts in Semitic languages, advances in research in Hebrew grammar and syntax, the differentiation and refinement of philological methods, and the many new efforts in general linguistics have truly not made the preparation of an OT lexicon easier, even if they have made possible many advances. One must admit that in many cases uncertainties remain with regard to the determination of the general as well as the theological usage of a Hebrew word. The main emphasis of this lexicon lies in an awareness of continuing difficulties with regard to the careful evaluation of the function of a Hebrew word in a given context. At this point the work of the lexicon spills over into the work of the exegesis that the lexicon seeks to serve.

Basel and Heidelberg, April 1971, E. Jenni and C. Westermann

## B. Volume 2

Four years after the appearance of the first volume, work on *THAT* can now be concluded. The preparation of the second volume followed the same principles elucidated in the first volume. The number of contributors has risen to a total of fifty. I thank them all, from those who submitted early contributions to those who stepped into the breach at the end, for their efforts and patience, and especially Prof. Dr. C. Westermann, who once again willingly assisted through word and deed. The Rev. Mr. Matthias Suter (Lauterbrunnen, Canton Bern) and the Rev. Mr. Thomas Hartmann (Basel) deserve thanks for their assistance with the task of proofreading and editing. Furthermore, Mr. Hartmann produced the index of German words.

Because typesetting required more than two years, all articles were not able to take account of the most recent literature. This delay did permit me, however, to expand the statistical appendix to its current scope. We were more concerned with the practical usefulness of the indices of

Hebrew and German words than with concordancelike thoroughness. For the same reason, we chose, after careful consideration, to forego additional word, topic, and passage indices, which would have necessarily been capricious in choice of material to be indexed or useful only for specialists. In contrast, the index of authors, which includes all but the most common reference works, will be helpful for bibliographical work.

Basel, November 1975, Ernst Jenni

# INTRODUCTION

## A. Goal of the Lexicon

Relatively good OT lexicons have been available to the Hebraist for some time: GB, BDB, KBL, Zorrel, and more recently *HAL* and *HALOT* merit mention as those used most often. Nevertheless, these lexicons, with their conventional arrangement as lists of possible German and English translations of a Hebrew word (some with thorough etymological introductions, which are, however, useful only to the specialist) without explication and discussion of the problems in complete sentences, undeniably cannot provide information concerning the use and life of OT words corresponding to the state of current knowledge, if only for reasons of space. In addition, alongside traditional philological inquiry, semantics and form- and tradition-critical methods have gained significance in recent years; their results and approaches are rarely dealt with adequately in the normal scope of a lexicon. It is increasingly difficult, particularly with respect to theologically significant words, to take into account the work undertaken by international OT studies in the area of linguistic research. Consequently, the attempt to create a specialized lexicon certainly reflects a need, as formulated in the guidelines for contributors to *TLOT* as a result of project planning in the course of the year 1966, to “present, as a supplement to extant Hebrew lexicons and on a strict linguistic basis with particular attention to semantics and form- and tradition-critical methodology, the theologically relevant words of the OT with a view to their usage, their history, and their significance for OT theology in the most concise and complete manner and with reference to the extant literature.”

That the result corresponds in every respect to the envisioned ideal should certainly not be maintained. But it will serve the necessary clarity when it will have been said from the outset what has not been the aim of *TLOT*:

1. Although the index in the third volume indicates that a significant portion of OT vocabulary has been treated, *TLOT* cannot replace the extant lexicons, if only because of the selection of the words to be treated. Rather it supplements these lexicons. Even with respect to the roots and words treated, the rich lexical, grammatical, text-critical, and bibliographical citations of, for example, *HAL* have been far from exhaustively treated.

2. With a complete openness for new developments in linguistics (cf. e.g., the inclusive treatment in the *Encyclopedie de la Pléiade: Le langage*, ed. A. Martinet [1968], or the more specialized introduction of O. Reichmann, *Deutsche Wortforschung* [1969]) and in exegesis (cf. among others K. Koch, *The Growth of the Biblical Tradition: The Form-Critical*

*Method* [1969]), the task of such a community effort cannot be the uniform application of a particular theory and method in order to create something revolutionarily new. Most OT scholars are not linguists, nor is there to this point a unified linguistic and exegetical method upon which one could establish contributors from various backgrounds. The specialist will likely also be able implicitly to translate into precise terminology many careless expressions found here and there (“basic meaning,” “semantic field,” etc.). To one person form criticism or some other viewpoint may seem overemphasized; to another it may seem underemphasized. Here also the editors could not, and would not, reduce everything to a common denominator.

3. Although theological usages stand at the center of interest, *TLOT* cannot be concerned with a presentation of OT theology arranged according to lexical entries. Without considering that the contributors to this lexicon may in no way be assigned to a particular theological school or movement, and that the editors also have intruded least with respect to theological issues, it is not possible on the basis of word study alone to construct a theology (cf. J. Barr, *Semantics of Biblical Language* [1961]). *TLOT* starts with words and their usage, which certainly can also lead to explicitly theological concepts, but not with theological ideas and concepts as such (“omnipotence,” “sin,” “monotheism,” etc.), which serve as the building blocks of a system. Although the difference between word meaning and intended referent is frequently effaced, especially with respect to abstract concepts (cf. here also the remarks of H. H. Schmid, *Gerechtigkeit als Weltordnung* [1968], 4ff., concerning the Hebrew language and the Israelite understanding of reality), and semantics can also be rightly supplemented by the onomasiological approach, *TLOT* remains, true to its intention, a lexicon. It does not replace a theological encyclopedia, which would treat “sin in the OT,” “OT anthropology,” “Israelite covenant ideas,” etc., and certainly not a complete representation of OT theology, for which it constitutes only an aid.

4. The envisioned readers and users of this specialized lexicon are primarily theologians and pastors with a minimal knowledge of Hebrew and OT studies. Nevertheless, the lexicon has still been made as accessible as possible to non-Hebraists by means of regular translation of Hebrew words and texts, by means of the transliteration of the Hebrew script, and by means of the index. Indeed, *TLOT* has striven thereby to assemble an overview of the knowledge offered by specialists in widely scattered publications, and to make it more readily available to a larger audience, and it is to be hoped that this work will bear fruit for understanding the OT and for preaching it. At the same time one must recognize definite limits of the lexicon: It ought not to relieve the pastor from the exegesis of the text, nor, for that matter, its translation into today’s language. Instead, it remains

here, too, simply an aid to exegesis.

## B. Arrangement of the Lexicon

With respect to the selection of the “theologically relevant words,” one may not entirely avoid subjective criteria. One cannot precisely distinguish “theological usage” from a “general” or “profane usage.” On the whole, the widest possible conception of “theological usage” seemed to be appropriate: an evaluation not only of texts with verbs having God as subject or object, or with nouns that refer to God; instead, if possible, of every case in which something of the interchange between God and his people or between God and humans comes to expression. It is precisely then, however, that it is impossible to avoid situations in which in one person’s view all sorts of things have been overlooked while to another the scope seems rather to be too widely conceived.

On the one hand, in order to document the distinction from Bible dictionaries or handbooks, individual articles have also dealt with other parts of speech in addition to the mass of nouns and verbs, such as pronouns (→ <sup>ʾ</sup>*nî* “I,” → *kōl* “all”), adverbs (→ <sup>ʾ</sup>*ūlay* “perhaps,” → <sup>ʾ</sup>*ayyēh* “where?” → *mātay* “when?”), prepositions (→ *ʿim* “with”), and even interjections (→ <sup>ʾ</sup>*hāh* “ah,” → *hōy* “woe,” → *hinnēh* “behold”).

On the other hand, a series of words that one would perhaps expect here have not been treated in individual articles. The same is also true of a few frequently occurring substantives (*har* “mountain,” *mayim* “water”) or verbs (*yšb* “to sit, dwell,” *ktb* “to write”), as well as many institutions, in particular many cultic institutions, concerning which one can refer to Bible dictionaries. *TLOT* has consciously not been planned as a reference work for comparative religion or archaeology, because the latter would shift the major emphasis (similar to that of a theological dictionary) too heavily from the semantic function of words to the description of the referent and its history. Thus those who seek archaeological or religio-historical information concerning the sanctuary, sacrifice, or the priesthood will not find this information here in the guise of a word study of <sup>ʾ</sup>*rôn* “ark,” *zbl* “to slaughter, offer,” or *kōhēn* “priest.” Such words have been excluded here, as have been words such as <sup>ʾ</sup>*zōb* “hyssop,” <sup>ʾ</sup>*pōd* “ephod,” <sup>ʾ</sup>*īʿēl* “sacrificial altar hearth,” *bāmā* “high place,” etc., with a few exceptions, because otherwise the scope of a concise theological lexicon would have been too greatly expanded.

The same is true also for personal names, which, with the exception of the designations of God, Yahweh, and Shaddai, and the names Zion and Israel, which had become religious honorifics, have not been treated in

their own articles. It is certainly true that Abraham and the Abraham tradition, David and the David tradition, Jerusalem, and indeed also Canaan and Babel are theologically relevant concepts; but they may not be incorporated in the scope of a semantically oriented lexicon.

One should note that numerous words not treated individually are discussed in the context of other words, as synonyms, antonyms, or as words that belong in some other manner to the semantic field of the word under scrutiny. Thus, for example, *har* “mountain” in theological contexts may be treated under *šyyôn* “Zion,” *mayim* “water” and *yām* “sea” in their mythical meanings under *t<sup>h</sup>ôm* “deep,” *yšb* “to sit, dwell” under *škn* “to dwell.” In the case of a few frequently occurring words, a reference to the corresponding article in which the word is treated has been set in the alphabetical sequence of main entries; in many other cases the index at the end of the second volume facilitates location.

One could conceive of various possibilities for the arrangement of the words treated. First, it would have seemed appealing to proceed according to a content-oriented ordering principle. Both theoretical and, above all, practical grounds have influenced us to hold to a formal alphabetical ordering principle and to treat the necessary content relationships in the presentation itself and by means of cross references. Thus, as seems appropriate for a Semitic language, words of the same root are treated together in a single article, which naturally does not mean that the semantic autonomy of the words must be sacrificed to a “root fallacy” (cf. Barr, *op. cit.* 100ff.) or that their meaning must be subjugated to etymology. Such distortions are admittedly not automatically excluded even from strictly alphabetical arrangements of individual words; but the varied treatments of nominal forms and the verb stems of the same root in the extant lexicons, in which *šedeq* and *s<sup>c</sup>dāqâ* are considered distinct lemmata but *šiddēq* and *hišdîq* are not, are also not above criticism. Here again practical considerations of presentation have been determinative over against purely theoretical principles. Hence one must permit some freedom and elasticity in the arrangement of the individual articles (cf. e.g., → *ʔbh*, where *ʔebyôn* would have been treated as an independent word, and → *ʔmn*, where the most significant derivatives receive separate treatment in subarticles in the major sections 3–4).

Finally, the scope that one allows the individual articles presents an additional subjective format issue. As one might expect, the original division into short, normal, long, and extralong articles has been disturbed in the practical execution. Many terms could certainly have been treated more concisely and others more extensively. Still, differences in diction do not likely surpass that which can be expected in such a community effort. For the most part, thanks to the discipline of the contributors, the danger known

to every editor that the contributions may evolve into self-contained studies has been successfully avoided.

### C. Arrangement of the Articles

In distinction from normal lexicons, every article here is a summary of the results of word studies and hence should offer, as much as possible, statements in complete sentences, in concise and short lexicon style. Instead of subheadings and a footnote apparatus, the enumeration of sections and the division into normal and small print stand as the most significant arrangement techniques; parentheses are used rather frequently for secondary issues, citations, bibliographical references, and so forth.

The article heading offers a single Hebrew entry, most often a (verbal) root or a primary substantive, in special cases even the most significant representative of the word group in question (e.g., → *tôrá*), in addition to the primary meaning in English translation. Because the heading functions at the same time as a column title, it must be kept short. It serves only the practical goal of identifying the article and cannot foreshadow its content. For the roots → *ʔhr* and → *ʔmn*, which have no representative qal usage and which have numerous equally plausible though semantically divergent derivations, brief approximations of the roots' meanings have been chosen ("after," "firm, certain"). The article itself normally exhibits five set sections, of which the third and the fourth are the most expansive. The enumeration of the major sections occurs by means of arabic numbers, and in some longer articles by means of roman numerals. The hierarchy of the section symbols is as follows: I.II. . . . 1.2. . . . (a) (b) . . . (1) (2) . . . ; confusion concerning the arabic numbers that mark both subsections of the five major sections (which are, as well, indicated by roman numerals) and, normally, the five major sections of an article certainly need not be feared.

With respect to the standard major sections one should note the following:

1. Root and Derivation. The first major section is intended to communicate essential information concerning the root. In addition, it lists the derivatives that the article in question treats, often with information concerning the type of derivation (function of the verb stem, noun-formation class, etc.), if conclusions concerning the meaning can be drawn from this information (cf. D. Michel, *Archiv für Begriffsgeschichte* 12 [1968]: 32ff.). This function of the first major section as a table of contents presenting the

word groups to be treated—not as an overevaluation of etymology for the determination of the contemporary meaning of the words in the OT—motivates the placement at the beginning of the article (not at the end, as modern lexicography often emphatically recommends) of materials concerning occurrences of the root in other Semitic languages, considerations of the common “basic meaning” (*Grundbedeutung*) of the word groups, and any other information concerning etymology. Many cases call attention, then, to the limitations of the etymological methods in vogue especially among theologians and issue a warning against speculation. Besides, OT specialists are indeed interested in the distribution of a word group in the other Semitic languages, perhaps also their representation by other roots in particular spheres. Understandably, one can give little weight to the completeness of the information, in distinction from an etymological lexicon. For the most part only the Semitic languages that, in relation to the OT, are older or contemporary—Akkadian, Ugaritic, Phoenician-Punic, and older Aramaic—could receive particular attention.

2. Statistics. A second, likewise relatively short, section gives statistical details concerning the occurrences of a word in the OT and in its individual portions, in some cases in the form of a table. In addition to the pure inventory, particulars of the distribution can be emphasized here. In recent linguistics, statistical analyses are also beginning slowly to achieve their place; if—as is the case with all statistics—all sorts of misuse can also be made of them, it seems nevertheless proper to prepare a reliable basis for the statistical study of OT vocabulary, because, in contrast to the situation in NT studies (R. Morgenthaler, *Statistik des neutestamentlichen Wortschatzes* [1958]), little of substance is yet available.

As is the case with all statistics, the first commandment here, too, is the careful description of the corpus to be counted. The figures in *TLOT* are based on the Masoretic text of *Biblia Hebraica 3* (without emendation) and count every occurrence of a given word in its different grammatical forms as a unit. For example, according to this principle, the infinitive absolute with a finite verb counts as (a bipartite) two occurrences. The different thought units or verses that contain the word (in each case in multiples) are not counted, therefore, but each individual occurrence of the word. Although small errors or approximations are practically meaningless for the value of the conclusions that one may draw from the numbers, attention has been paid to the greatest possible exactness in these figures. Consequently, the two independent and differently arranged concordances of Mandelkern (including the appendices by S. Herner) and Lisowsky were individually tabulated according to biblical books and the results, when different, evaluated by collation. Whenever the choice was to be made between different grammatical interpretations and parsings, the choice, as far as necessary, has been briefly noted, because a statistic is verifiable

only for a precisely defined corpus. The corrections for Lisowsky's concordance that have resulted as by-products have arisen in this manner and are certainly not intended as criticism of the great contribution that this work represents. Wherever the literature offers divergent statistical citations, the reason often lies in a different method of counting that can be in itself as justified as the one used here, presuming that it is recognizable and consistently carried out.

The value of the statistics would naturally be significantly greater for the history of language if they could have been ordered not mechanically according to biblical books but according to the time of the composition of individual literary complexes. But because the literary analysis and dating of many texts is disputed or impossible, this avenue for word statistics could not be traveled except in a few cases. Even the regular special treatment, say, of Deutero-Isaiah (and Trito-Isaiah?), could already have greatly complicated the undertaking. For the individual case such refinements may be acquired, indeed at any time, without too great difficulty.

In order to be able to measure the relative frequency of a word in a particular biblical book, whether statistically significant or not, a comparison table of the total inventory of the individual biblical books is required. The following table of the scope of the books of the OT in (approximated) parts-per-thousand serves as a preliminary aid (based on the statistical material in vol. 3):

Gen 68	Isa 55	Psa 64	
Exod 55	Jer 71	Job 27	
Lev 39	Ezek 61	Prov 23	
Num 54	Hos 8	Ruth 4	
Deut 47	Joel 3	Song Sol 4	
Pentateuch	263	Amos 7	Eccl 10
	Obad 1	Lam 5	
Josh 33	Jonah 2	Esth 10	
Judg 32	Mic 5	Dan 20	
1 Sam 43	Nah 2	Ezra 12	
2 Sam 36	Hab 2	Neh 17	
1 Kgs 43	Zeph 3	1 Chron 35	
2 Kgs 40	Hag 2	2 Chron 44	
Josh–2 Kgs	227	Zech 10	Writings 275
	Mal 3		
Gen–2 Kgs	490	Prophets 235	OT 1000

(Aram. 16: Dan 12 of 20, Ezra 4 of 12).

3. Meaning and History of Meaning. In the third major section the presentation follows the general usage of the word or word group in the OT. The scope is limited to the books of the Hebrew canon; the portions of the book of Sirach extant in Hebrew are also included occasionally, although not regularly. Postbiblical Hebrew and the intertestamental literature extant only in Greek translation have not been taken into account; the concluding portion of the article may touch on the more significant points.

Great freedom has been allowed the authors in presentation. The arrangement can be undertaken according to semasiological (main meaning, expansions, metaphorical usages, etc.), grammatical-syntactical (sg./pl., various constructions of the verbs, etc.), or historical criteria. As a rule, details—omitted for the most part from lexicons to conserve space—concerning series, word fields, antonyms, distinctions with respect to near-synonyms, reasons for changes in meaning, and meanings that do not occur in the OT are also taken into account here. In contrast, sociological or exegetical excursions that transcend word studies are avoided as much as possible. If necessary, references to the literature (handbooks, commentaries, monographs) suffice on these issues.

Because a regular bibliographical section seems to offer no necessary advantage, references have been introduced at the appropriate juncture, in some cases also in the form of a short overview of the history of research. With respect to controversial theses, the contrary position should be at least briefly mentioned; even though streamlined, the articles should provide objective orientation concerning the current state of discussion.

4. Theological Usage. With the background of the more universal third section, the more specific theological usage can then be presented. A strict distinction between “profane” and “theological” is possible with respect to the meaning of the word only in a few cases. But on the basis of form-critical and tradition-critical investigation one can often clarify some gradation in the use of various words—of unequal significance—in theologically more-or-less relevant contexts. The appearance that sharp boundaries may always be drawn everywhere is not intended: as a rule the third section offers general overviews (with the exclusion of particular theological usages). Special problems of a theological nature are treated in the fourth section. Sections three and four may also be combined (e.g., → *tm*<sup>3</sup>); a few articles simply treat two different words or word groups in separate sections (→ *ʔbh*, → *ʔhr*).

The arrangement of the fourth section has also been loosely regulated. One finds here semasiological, historical, and theological criteria according to the free discretion of the author.

Of the extrabiblical comparative material, application is naturally

made almost exclusively only of the texts, older or contemporary to the OT, in Akkadian, Northwest Semitic, and sometimes Egyptian; regular sections dealing with the usage of equivalent words from Mesopotamia to Egypt or religio-historical excurses have been omitted in order not to violate the scope of the lexicon, but also considering the given possibilities.

5. Postbiblical Usage. The conclusion concisely treats whether and where the history of the theological usage continues into early Judaism and into the NT or early Christianity. Concise references to the literature must usually suffice here. Citations of the most important Greek equivalents of the Hebrew words in the Septuagint and the NT are generally correlated by means of references to the corresponding articles in *Theological Dictionary of the New Testament (TDNT)*. On the whole, as is the case with other marginal areas, exhaustive statements are not possible here either. No all-encompassing biblical-theological summa is offered here; instead, only a concise reference to the necessary point of connection to the neighboring discipline is given for theologians.

#### D. Explanation of the Hebrew Transliteration

Except for article headings and in the few places where Masoretic details are described, this lexicon does not use the Hebrew characters—to the discomfort of many Hebraists, who miss the familiar script and who are not accustomed to transliteration. A glance at contemporary academic publications indicates that the use of transliteration is becoming increasingly popular; although it fails to be sufficient in more precise application for every justified requirement, it is better than the technical compromise of using only the unvocalized Hebrew characters.

Consonants		Vowels	
א	(ʾalep) ʾ	ַ	(pataḥ) a
ב	(bet) b	ֿ	(furtive pataḥ) a
ג	(gimel) g	ָ	(qāmeṣ) ā
ד	(dalet) d	ֹ	(final qāmeṣhe) â
ה	(he) h	ֶ	(segōl) e
ו	(waw) w	ֶ̄	(šērê) ē
ז	(zayin) z	ֵ	(šērêyod) ê
ח	(ḥet) ḥ	ִ	(short ḥîreq) i
ט	(ṭet) ṭ	ִ̄	(long ḥîreq) î
י	(yod) y	ִ̄	(ḥîreqyod) î
כ, ך	(kap) k	ֹ	(qāmeṣ ḥāṭûp) o
ל	(lamed) l	ֹ̄	(ḥōlem) ô
מ, ך	(mem) m	ֹ̄	(full ḥōlem) ô
נ, ך	(nun) n	ֹ̄	(short qibbûṣ) u

ס	(samek)	s	וּ	(long qibbûš)	ū
ע	(‘ayin)	‘	וּ	(šûreq)	û
פ, פּ	(pe) p	פּ	וּ	(ḥātēp pataḥ) <sup>a</sup>	
צ, צ׳	(šade)š	שׁ	וּ	(ḥātēp qāmeš)	o
ק	(qop) q	ק	וּ	(ḥātēp s <sup>e</sup> gōl) e	
ר	(reš) r	ר	וּ	(vocal š <sup>e</sup> wâ)	e
שׁ	(šîn) š	שׁ			
שׂ	(šîn) š	שׂ			
ת	(taw) t	ת			

The system of transliteration used here should be understood as a practical aid for the realization of Masoretic Hebrew according to the common tradition of pronunciation in modern universities. It is not meant to reproduce an exact transliteration of all the details of Tiberian orthography; it serves neither purely phonemic goals nor the attempt to reach behind the common grammatical traditions to linguistically more adequate forms. The following explanation of details is primarily for the nonspecialist; the necessary practical decisions encountered in the publication of the lexicon, including printing possibilities, claim no absolute normativity.

Concerning the pronunciation of the consonants (for the details, cf. the grammars, e.g., Meyer 1:41ff.) it should be noted that ׀ and ׀ are conventionally pronounced as firm pre-vocalics (as in the English theatre), z as a vocalized sibilant (like French z ), ḥ like German ch (as in ach ), š like English ts, ś like s, š like English sh. Transliteration does not reflect the difference in the pronunciation of the so-called begadkephat letters, b, g, d, k, p, and t, pronounced after vowels not as stops but as fricatives. The widely practiced pronunciation of the b after vowels as v, of the k after vowels as (German) ch, and of the p after vowels as f need not be represented in transliteration.

The consonants he, waw, and yod, used to indicate long vowels (vowel letters, *matres lectionis* ), are transliterated as a circumflex over the vowel (i.e., â, ê, î, ô, û ); they are also taken into account when a transliteration reproduces an unpointed text (extrabiblical inscriptions, Qumran texts, Kethib, etc.) and for the purposes of alphabetization. It should be noted that here the present edition has followed standard English academic usage and so differs from the original German, which indicated both full and defective spellings by a macron over the vowel (i.e., ā, ē, î, ō, ū ). The German system offered greater consistency, providing a single form for words that exhibit variations or historical changes in spelling (e.g., ʔōtôt and ʔōtôt, ʔôbâ and ʔôbâ ); but the present system provides a more exact correspondence with the Hebrew of the MT, which the reader can easily

reconstruct from the transliteration.

A final *h* represents (1) a consonantal *he* in a nominal form, (2) a weak third radical (III *w/y*) in the standard dictionary form (3d masc. sg. pf.) of a verb, or (3) the fem. sg. poss. ending (*malkāh*, “her king”; compare the fem. ending *-â* in *malkâ*, “queen”).

Verb transliterations in article headings in this lexicon represent only unvocalized root consonants (e.g., *ʔbd*, *ʔbh*, *ʔbl*, to be pronounced *ʔābad*, *ʔābāh*, *ʔābal*, with the accent on the second syllable; in other cases with a long *ē* instead of *a* in the second syllable [e.g., *hps* = *hāpēs*; see also *thr*, *yr*, *kbd*, *lbš*]). An exception is that verbs with a long middle vowel are vocalized (inf. cs. *bô*, *bîn*, *gûr*). The only case in these volumes in which *h* as a weak third radical might be confused with *h* as a real root consonant is *gbh* (= *gābah*). The text itself, however, calls attention to the proper pronunciation.

The present edition always transliterates quiescent *ʔalep* (using *ʔ*; e.g., *lō*, “not,” *hû*, “he,” *rōš*, “head,” Aram. *malkā*, “the king”).

In Hebrew, stress falls regularly on the final syllable, but readers should note that the present edition generally does not indicate accents, even for exceptions to this rule, such as segholate nouns. However, if stress is relevant to a particular linguistic point, the discussion may retain the accent.

Proper names are not transliterated with capital letters.

For the transliteration of related Semitic languages, one should consult the pertinent grammars and dictionaries; for example, the transliteration of Akkadian follows von Soden (in *GAG* and *AHw*) or *CAD*, and that of Ugaritic follows Gordon (in *UT*; it should be noted here that *a*, *i*, and *u* indicate not vowels but the variously vocalized consonantal *ʔ*). Egyptian transliteration follows A. Gardiner (*Egyptian Grammar*, 3d ed. [London: Oxford University Press, 1957], p. 18).

Greek transliterations are according to the following table:

α	=	a	ξ	=	x
β	=	b	ο	=	o
γ	=	g	π	=	p
γ	=	n (before γ, κ, ξ, χ)	ρ	=	r
δ	=	d	ρ̣	=	rh
ε	=	e	σ, ζ	=	s
ζ	=	z	τ	=	t
η	=	ē	υ	=	y
θ	=	th	υ	=	u (in diphthongs: au, eu, ou, ui)
ι	=	i	φ	=	ph

κ	=	k	χ	=	ch
λ	=	l	ψ	=	ps
μ	=	m	ω	=	ō
ν	=	n	ῥ	=	h (with vowel or diphthong)

## E. Concordance of Divergent Versification

*TLOT* follows the chapter and verse enumeration of the Hebrew Bible, which does not always agree with that of the Septuagint, Vulgate, and other translations. In order to facilitate the location of passages for users of the popular New Revised Standard Version (1989), the differences are compiled here in a table. (Other popular English translations, such as the Catholic NAB and the Jewish JPSV, follow the versification of the Hebrew Bible.)

#### D. Qumran Texts

Qumran citations are according to J. A. Fitzmyer, S. J., *The Dead Sea Scrolls: Major Publications and Tools for Study* (rev. ed. 1990). The following list of abbreviations is selective.

1QapGen Genesis Apocryphon from Cave 1  
1QH Hodayot (Thanksgiving Hymns) from Cave 1  
1QM Milhamah (War Scroll) from Cave 1  
1QpHab Peshar on Habakkuk from Cave 1  
1QS Serek Hayyahad (Rule of the Community, Manual of Discipline) from Cave 1  
1QSaAppendix A (Rule of the Congregation) to 1QS from Cave 1  
1QSBAppendix B (Blessings) to 1QS from Cave 1  
4QFlor Florilegium (or Eschatological Mid-rashim) from Cave 4  
CD Cairo Geniza text of the Damascus Document  
p peshar  
Q Number preceding Q indicates cave

#### E. Ugaritic Texts

Citations of Qumran texts follow M. Dietrich, O. Loretz, and J. Sanmartin, *Die keilalphabetischen Texte aus Ugarit* (AOAT 24, 1976). Abbreviation = *KTU*.

#### F. Symbols

→ = see (referring to another entry)  
\* (before an isolated lexical form) = conjectural, not a documented form  
\* (before or after a paragraph) = written by the editor (see above p. vii)  
> = develops into  
< = formed from

## אָב *ʾāb* father

S 1; BDB 3a; *HALOT* 1:1b; *TDOT* 1:1–19; *TWOT* 4; *NIDOTTE* 3

I. The biradical \**ʾab-* “father” is common Sem. (*GVG* 1:331; BL 450, 524), like the other significant kinship terms (→ *ʾēm* “mother,” → *bēn* “son,” → *ʾāḥ* “brother”). Like *ʾēm* “mother” and pars. in numerous languages, it derives from infant babbling (L. Köhler, *ZAW* 55 [1937]: 169–72; id., *JSS* 1 [1956]: 12f.); derivation from a verbal root (e.g., → *ʾbh* “to wish”) is therefore unsuccessful.

Derivatives from the root form (abstract and adj. forms, diminutives, esp. vocatives) are lacking in OT Hebr.; in contrast, cf. Akk. *abbūtu* “fatherhood” (*AHW* 6a; *CAD* A/1:50f.), mostly in a fig. sense (“fatherly attitude”; *abbūta epēšu/šabātu/aḥāzu* “to intercede”), which also occurs in family law documents, e.g., at Nuzi, of the transfer of the family leadership to the wife following the death of the adopter (P. Koschaker, *OLZ* 35 [1932]: 400).

The abstract form is also attested in Phoen.: Karatepe inscription I.12f. (*KAI* no. 26), “Indeed, every king chose me for fatherhood (*bʾbt pʿln*), my justice and my wisdom and the goodness of my heart” (Friedrich 91, 130; *KAI* 2:40; *DISO* 3; cf. *ANET* 654a); contra, although uncertain, M. Dahood, *Bib* 44 [1963]: 70, 291; *HAL* 2a: *ʾābôt* as a pl. excellentiae is also to be understood as a sg. in Isa 14:21 and Psa 109:14.

In Syr. (C. Brockelmann, *ZA* 17 [1903]: 251f.; *LS* 1a) *ʾhd ʾbwtʾ* appears borrowed from Akk. *abbūta aḥāzu* “to intercede” (*CAD* A/1:178), and as a “celque” from Aram. in the Hebr. of Qumran: 1QS 2:9: *ʾôḥ<sup>a</sup>zê ʾābôt* “intercessor” (P. Wernberg-Møller, *VT* 3 [1953]: 196f.; id., *Manual of Discipline* [1957], 53f.; E. Y. Kutscher, *Tarbiz* 33 [1963/64]: 125f.).

II. With over 1,200 occurrences *ʾāb* stands after *dābār* and before *ʾur* in eleventh place among the substs. ordered according to frequency.

The following statistics do not include *ʾābî* as an interjection (1 Sam 24:12; 2 Kgs 5:13; Job 34:6) and the addition of Bombergiana in 2 Chron 10:14; *ʾābî(w)* in conjunction with the PN *ḥûrām* (2 Chron 2:12; 4:16) is included; Lis. overlooks Gen 46:34.

III. 1. The correlation to son/daughter/child or their pls. is already established in the basic meaning “(natural) father (of his children)”; the word is never used in the OT, then, without this implicit or explicit juxtaposition except in some fig. usages (honorifics, “founder,” etc.). A devaluation to a simple correlative term, as occurs to a degree with Arab. *kunja* (e.g., “father of the desert” = ostrich), does not occur in the OT (for <sup>ʔ</sup>*bîʕad* Isa 9:5, see 3).

As a term of interfamilial relationship, the sg. is used in the vast majority of cases (14/15) with a gen. or poss. suf.; consequently it stands only 3x with a (definite) art.

Denoting the male parent, “father” stands in a complementary relationship to “mother,” a relationship that constitutes a second, less pronounced semantic dichotomy. Consequently, the two terms will often be

bound together in nom. series; the sequence father-mother is determined by the primary position of the father in the patriarchal family (G. Quell, *TDNT* 5:961ff.).

“Father” and “mother” stand in parallelism (parallelismus membrorum) in Psa 109:14; Job 17:14; 31:18; Prov 1:8; 4:3; 6:20; 19:26; 23:22; 30:11, 17; Mic 7:6; cf. further, without strict formal congruity and with rearrangement of the elements determined partly by content, Jer 16:3; 20:14f.; Ezek 16:3, 45.

Of 52 nom. series (lists in B. Hartmann, *Die nominalen Aufreihungen im AT* [1953], 7, with them add Lev 20:9b; Judg 14:6; 1 Kgs 22:53; 2 Kgs 3:13; delete Jer 6:21), three exhibit the sequence mother-father (Lev 19:3; 20:19; 21:2; for the reasons, see Elliger, HAT 4, 256n.5).

In some of these texts one could paraphrase “father and mother” accurately with “parents” (Gen 2:24; 28:7; Deut 21:13; Judg 14:2ff.; 1 Sam 22:3; 2 Sam 19:38; Zech 13:3[bis] with *yōl<sup>c</sup>dāyw* “who begot him”; Ruth 2:11; Esth 2:7[bis]; cf. LXX and GNB for Esth 2:7). The usage of the pl. *ʾābôt* for “parents” first occurs postbibl.; cf. also Akk. *abbū* (*AHW* 7b, infrequent), Syr. *ʾabāhē*, and Arab. dual *ʾabawāni*.

In its basic meaning, *ʾāb* has no synonyms.

Alongside the more common *ab*, Ug. also has *ad*, *adn*, and *ḥtk* as designations for father. In this regard, *ad* (in *KTU* 1.23.32ff. *ad ad* par. *um um*; and *mt mt* respectively) appears to be a term of endearment (cf. *CML* 1 123a, 135a; *CML* 2 125, 141: “dad[dy]”; *UT* no. 71; *WUS* no. 73; see further Huffmon 130, 156), which represents the normal vocative expression within the family unit. In contrast, *adn* “lord, master” replaces the designation “father” in polite address (*KTU* 1.16.I.44, 57, 60; 1.24.33; A. van Selms, *Marriage and Family Life in Ug. Literature* [1954], 62, 113). The simple equation of → *ʾādôn* with “father” does not follow, however (contra M. Dahood, *CBQ* 23 [1961]: 463f. on Jer 22:18; 34:5; Prov 27:18; cf. e.g., Gen 31:35, “then she said to her father: ‘My lord’”). With respect to *ḥtk* (ptcp. or action noun) the basic verbal meaning (*UT* no. 911; *WUS* no. 985; Arab. *ḥataka* “to cut off”) is no longer clearly discernible (cf. E. Ullendorff, *JSS* 7 [1962]: 341: “circumciser”; Gray, *Legacy* 71n.2). The root is probably not represented in Psa 52:7 (A. F. Scharf, *VD* 38 [1960]: 213–22; *UHP* 58: pi. privative “to unfather”).

In contrast to *ʾēm* (Exod 22:29, a mother animal of cattle and sheep; Deut 22:6, mother bird), *ʾāb* is not applied to animals.

2. Extended usage of the word is common Sem. and is apparent (a) on the one hand, in the extension of the concept to the ancestors, and (b) on the other, in the inclusion of nonbiological paternity through adoption or other means.

(a) As in Indo-Germanic, Hebr. has no individual word for “grandfather,” which may be connected with sociological circumstances: in the extended family the patriarch rules not only over the sons but also over

the grandchildren and great-grandchildren (E. Risch, *Museum Helveticum* 1 [1944]: 115–22).

For the paternal grandfather, a simple  $\text{ʔāb}$  suffices in the OT (Gen 28:13, Jacob-Abraham; 2 Sam 9:7 and 16:3, Meribaal-Saul); the maternal grandfather is called  $\text{ʔimm}^{\text{c}}\text{kā}$  “father of your mother” (Gen 28:2, Jacob-Bethuel).

In Akk. *abi-abi* or with sandhi *ababi* also occurs (CAD A/1:70; AHW 7b), as a (substitute) PN (Stamm, AN 302; id., HEN 422); cf. in addition the PN *ababouis* at Dura (F. Rosenthal, *Die aramaistische Forschung* [1939], 99n.1) and Syr.  $\text{ʔbbwy}$  (J. B. Segal, BSOAS 16 [1954]: 23).

The LXX uses *pappos* “grandfather” (Sir Prol 7) and *propappos* “(great-)grandfather” once each (Exod 10:6, where, however, according to the context,  $\text{ʔbôt}$   $\text{ʔbōteykā}$  signifies “your ancestors”).

Modern Hebr. makes use of  $\text{ʔāb zāqēn}$  “old father” (cf. Gen 43:27 and 44:20, “aged father”).

The extension of the concept to the ancestors takes place first in the pl.  $\text{ʔābôt}$ , which includes the father proper, the grandfather (Gen 48:15f., Isaac and Abraham as the “fathers” of Jacob), and the great-grandfather (2 Kgs 12:19, Jehoshaphat, Joram, and Ahaziah as “fathers” of Joash), or an undetermined number of generations.

In this extended meaning “ancestors” (cf.  $\text{ʔbôtām hāri}^{\text{ʔ}}\text{šōnîm}$ , Jer 11:10), the word also acquires synonyms:  $\text{ri}^{\text{ʔ}}\text{šōnîm}$  (Lev 26:45; Deut 19:14, LXX *pateres*, LXXa *proteroi*; Isa 61:4; Psa 79:8) and *haqqadmōnî* (1 Sam 24:14, collectively, provided that one does not read the suf. *-nîm*), also  $\text{ʕammîm}$  in the expression  $\text{ʔsp ni. ʔel-ʕammeykā/ʕammāyw}$  “to be gathered to your/his people” (Gen 25:8, 17; 35:29; 49:29 txt em, 33; Num 20:24; 27:13; 31:2; Deut 32:50; → *ʕam*).

The pl. of the basic meaning (“fathers of various families”) also occurs in the OT (Judg 21:22, the fathers or brothers of the stolen daughters of Shiloh; Jer 16:3, “your fathers who begot you”; in addition to perhaps two dozen other texts with a general juxtaposition of the older and the younger generations), but is significantly rarer than the meaning “ancestors,” which is the only possible meaning of the word with a sg. suf. (“my fathers”) on biological grounds.

Whether the fem. pl. form with *-ôt* results from the fact that  $\text{ʔāb}$  is essentially a sg. tantum (L. Köhler, ZAW 55 [1937]: 172) is uncertain. Nöldeke (BS 69) postulated a formation analogous to the polar concept  $\text{ʔimmôt}$  “mothers” (so also GVG 1:449; BL 515, 615; Meyer 2:45; G. Rinaldi, BeO 10 [1968]: 24).

DISO 1 and CAD A/1:72 give references for the pl. “ancestors” in NWSem.

inscriptions and in Akk. (alongside *abbū* in regions of WSem. influence, also *abbūtu*).

The potent expression, “neither your fathers nor your fathers’ fathers” (Exod 10:6 of Pharaoh; Dan 11:24 of Antiochus IV), in a negative clause, signifies nothing less than the total series of ancestors.

The sg. can also assume the meaning “ancestor” (80x), but in these cases it always indicates ancestors par excellence (cf. Isa 43:27 *ʾābīkā hāri-šôn*), namely the patriarchs of a clan (Rechabites, Jer 35:6–18), a tribe (Dan, Josh 19:47 and Judg 18:29; Levi, Num 18:2), an occupational group (Gen 4:21f. txt em; Aaronites, 1 Chron 24:19), a dynasty (David, 1 Kgs 15:3b, 11, 24, etc., 14x), or a people (Israel: Abraham, Josh 24:3 and Isa 51:2; Jacob, Deut 26:5 and Isa 58:14; all three patriarchs, 1 Chron 29:18). Although the eponymous hero can still be called “father” in accordance with this function (Ham-Canaan, Gen 9:18, 22; Kemuel-Aram, Gen 22:21; Hamor-Shechem, Gen 33:19; 34:6; Josh 24:32; Judg 9:28; Arba-Anak, Josh 15:13; 21:11; Machir-Gilead, Josh 17:1; 1 Chron 2:21, 23; 7:14; cf. also the metaphor of the personified Jerusalem, Ezek 16:3, 45), it would be better to translate references to peoples with “ancestor” (the sons of Heber, Gen 10:21; Moabites and Ammonites, Gen 19:37f.; Edomites, Gen 36:9, 43).

In 1 Chron 2:24, 42–55; 4:3–21; 7:31; 8:29; 9:35 (31x) the formula “X, father of Y” (M. Noth, *ZDPV* 55 [1932]: 100; Rudolph, *HAT* 21, 13f.) contains not only the name of a family but a place-name.

In Gen 17:4f., *ʾab(-)h<sup>a</sup>môn gôyîm* “father of many nations,” the unusual cs. form is influenced by the play on words with Abraham.

(b) The expansion of meaning in the direction of adoptive paternity is facilitated by the fact that the relationship between child and father is by nature less direct than that between child and mother. Bab. law does not distinguish between the legitimation of a father’s own child born to a slave mother and outright adoption (Driver-Miles 1:351, 384). Nevertheless, except for the purely fig. usage, *ʾāb* is seldom used with respect to nonbiological paternity, due in part to the fact that adoption in the precise sense, i.e., outside the family, is scarcely attested in the OT (de Vaux 1:51f.; H. Donner, “Adoption oder Legitimation?” *OrAnt* 8 [1969]: 87–119). With respect to Yahweh as “father” of the Davidic kings, see IV/3b.

Akk. distinguishes between *abum murabbīšu* “stepfather” and *abum wālidum* “biological father” (*CAD* A/1:68b).

In Israel, as in Babylonia (Driver-Miles 1:392–94), apprentices and

journeymen could also stand in a sort of adoptive relationship to their masters; yet the usage of the terms of relationship “sons” and “father” for the membership and leadership of a guild is determined primarily by the fact that sons normally assumed the occupation of the father.  $\text{ʔāb}$  as founder or leader of a guild may be attested in 1 Chron 4:14 (cf. 4:12, 23; I. Mendelsohn, *BASOR* 80 [1940]: 19).

The leader of a prophetic guild, who was at the same time the “spiritual” father, may have also been called  $\text{ʔāb}$  (L. Dürr, “Heilige Vaterschaft im antiken Orient,” *FS Herwegen* 9ff.; J. Lindblom, *Prophecy in Ancient Israel* [1962], 69f.; J. G. Williams, “Prophetic ‘Father,’” *JBL* 85 [1966]: 344–48); at the least one finds the address  $\text{ʔābî}$  “my father” for Elijah and Elisha (2 Kgs 2:12; 13:14; also used by those outside the  $\text{bēn hann}^{\text{bî}}\text{ʔîm}$ : 2 Kgs 6:21; cf. 8:9 “your son”). Yet the transition to  $\text{ʔāb}$  as an honorific (see 3) is underway here (Lande 21f.; K. Galling, *ZTK* 53 [1956]: 130f.; A. Phillips, *FS Thomas* 183–94).

Occurrences in 1 Sam 24:12 and 2 Kgs 5:13 should probably be regarded as interjections (*GVG* 2:644; Joüon §§105f.; contra *TDNT* 5:971n.141; otherwise one must assume an honorific or address form directed to the father-in-law in 1 Sam 24:12 and a fixed address formula with a sg. suf. on the lips of a group in 2 Kgs 5:13; cf. L. Köhler, *ZAW* 40 [1922]: 39).

Corresponding to the address of a youth as  $\text{bēnî}$  “my son,” esp. in wisdom literature ( $\rightarrow \text{bēn}$ ), one would expect that  $\text{ʔāb}$  would also be applied to the wisdom teacher as the spiritual father (cf. for Eg.: Dürr, op. cit. 6ff.; H. Brunner, *Altäg. Erziehung* [1957], 10; for Mesopotamia: *BWL*, 95, 102, 106). No clear distinction from the normal usage is possible in the OT, however (but cf. Prov 4:1; 13:1).

3. The fig. usage of the word (simile and metaphor) accentuates one aspect of the image in particular. In addition to being held in respect, the father is seen esp. as the protective care giver (also in the related languages).

For the Akk. cf. *CAD* A/1:51f., 68a, 71–73, 76; *AHW* 8a; Phoen.: Kilamuwa inscription (*KAI* no. 24) l.10: “I, however, to some I was a father. To some I was a mother. To some I was a brother” (*ANET* 654b); Karatepe inscription (*KAI* no. 26) l.3: “Ba’l made me a father and a mother to the Danunites” (*ANET* 653b; cf. l.12; see l above); J. Zobel, *Der bildliche Gebrauch der Verwandtschaftsnamen im Hebr. mit Berücksichtigung der übrigen sem. Sprachen* [1932], 7ff. (also deals with rabbinic materials).

Apart from the usage in reference to God (see IV/3), the occasional fig. usages in the OT occur only in Job (originator of rain, Job 38:28; care for the poor, Job 29:16; 31:18; cf. *BrSynt* §97a; close affiliation, Job 17:14,

with the child's formula "you are my father"; cf. Fohrer, KAT 16, 295).

Honorifics for priests and political officeholders attested in the various arenas and times develop into fixed usages: Judg 17:10 and 18:19, "father and priest" (cf. Quell, *TDNT* 5:961–63; following Bertholet 256); Isa 22:21, "father of the inhabitants of Jerusalem and of the house of Judah" (of the governor of the palace; cf. de Vaux 1:129–31); probably also the throne name of the Messiah in Isa 9:5, "eternal father" (cf. H. Wildberger, *TZ* 16 [1960]: 317f.); outside Israel, Aḥ. 55, "father of all Asher" (Cowley 213, 221); Esth LXX 3:13f. *deuteros patēr*; 8:12; 1 Macc 11:32.

One may assume Gen 45:8 "as a father to Pharaoh" is a borrowing of the Eg. title *yt-ntr* in order to mitigate the offensiveness of the divine designation for the king (J. Vergote, *Josèphe en Égypte* [1959], 114f.). For the history of the Eg. titles for vizier and priest, probably originally used for the attendant of the crown prince, cf. A. H. Gardiner, *Ancient Eg. Onomastica* (1947), 1:47\*-53\*; H. Brunner, *ZÄS* 86 (1961): 90–100; Kees, *ibid.* 115–25.

According to Rudolph (HAT 21, 200, 208), *ʾābî* or *ʾābîw* (in 2 Chron 2:12 and 4:16) should not be understood as an element in a name, but should be translated as a title, "my/your master" (so also Stamm, *HEN* 422; cf. also *CAD* A/1:73a).

The address *ʾābî* for Elijah and Elisha has already been mentioned (see 2b). Akk. *abu* as honorific address is attested in letters (cf. *CAD* A/1:71).

4. As a nomen rectum, *ʾāb* relates closely to *bayit* "house." *bêt-ʾāb* "paternal house, family" signified "originally the larger family living together in a common house, headed by the patriarch. It comprised, beside the wife or the wives of the patriarch, the sons, whether they are unmarried or have already themselves founded a family, the daughters, so long as they are unmarried or widowed or have left the houses of their husbands, and the wives and children of the married sons" (L. Rost, *Die Vorstufen von Kirche und Synagoge im AT* [1938, 19672], 44).

In pre-exilic times the "paternal house" has relevance only for family and inheritance law, but after the catastrophe of 587, which brought with it the collapse of the tribal organization, it replaces the *mišpāḥâ* (→ *ʿam*) as the basic unit in the structure of society. In (the secondary portions of) P and in Chr, the *ʿēdâ* (→ *ʿēd*) "community" (or → *qāhāl*) is divisible into *maṭṭôt* "tribes" and *bêt-ʾābôt* "paternal houses," headed by a *nāsîʾ* "prince" or a *rōš* "chief" (Rost, *op. cit.* 56–76, 84).

Of 83 texts with the sg. (for the most part pre-exilic: Gen 18x; Judg 12x; 1 Sam 13x), eleven exhibit the post-exilic technical usage (texts in Rost, *op. cit.* 56).

The pl. *bêt-ʾābôt* (68x, of which 30x are in Num 1–4, 10x in 1 Chron 4–7; texts in

Rost, op. cit. 56, to which add 1 Chron 7:40; the oldest text is probably Exod 12:3) is formed by means of the peculiar pluralization of the second element (GKC §124p; Joüon §136n), which suggests a tightly bound word pair (*TDNT* 5:961 is unclear). The abbreviated *rāʾšē ʾābôt* also occurs (e.g., Exod 6:25) without *b̄t* (43x; texts in Rost, op. cit. 56; Ezra 8:1 should be included; see also *nʿšīʾēhāʾābôt* 1 Kgs 8:1; 2 Chron 5:2; *šārē(-)hāʾābôt* Ezra 8:29; 1 Chron 29:6) in the place of doubled cs. relationships such as *rāʾšē bēt-ʾābōtām* (e.g., Exod 6:14), primarily when followed not only by the 3d pl. suf. but also by other qualifiers (this distinction persists in P; in Chr *rāʾšē hāʾābôt* can occur without qualifier and even *ʾābôt* alone [Neh 11:13; 1 Chron 24:31]). Constructions with *ʾāhuzzā* “property” (Lev 25:41), *naḥʾalā* “inheritance” (Num 36:3, 8), and *maṭṭeh* “tribe” (Num 33:54; 36:3, 8) may simply be translated “fathers” (contra Rost, op. cit. 56f.).

A total of 201 texts with *ʾāb* in the meaning “paternal house” result, of which 129 have the later terminological sense.

##### 5. PNs formed with *ʾāb* occur throughout ancient Sem. nomenclature.

Bibliog.: Akk.: Stamm, *AN*; Mari and ECan.: Huffmon; Ug.: Gröndahl; Phoen.: Harris; SArab.: G. Ryckmans, *Les noms propres sud-sémitiques* (1934); Hebr.: *IP*; an older summary of the material by M. Noth, “Gemeinsemitische Erscheinungen in der isr. Namengebung,” *ZDMG* 81 (1927): 1–45, with a statistical overview, 14–17; with regard to Aram., see A. Caquot, “Sur l’onomastique religieuse de Palmyre,” *Syria* 39 (1962): 236, 240f.

Approximately 40 name-forms in the OT have *ʾāb* as an element, primarily in first position, almost always as subj., and never as cs. Before one can evaluate this material in terms of religiohistorical significance, one should attempt to distinguish between theophoric and profane usages of this term of relationship. Although the older investigations of W. W. Baudissin (*Kyrios als Gottesname im Judentum* [1929], 3:309–79) and M. Noth (see above) reckon almost exclusively with theophoric usages of the terms of relationship as descriptions of the tribal god, Stamm (*HEN* 413–24) considers it likely that more than one-fourth of the forms are profane usages, so-called substitutionary names, i.e., “names that indicate the supplementary reincarnation of a deceased family member in the newborn” (Stamm, *RGG* 4:1301).

Examples of sentence names are *ʾyôb* “Job” (a lament formed with the interrogative particle, “where is the father?”), *ʾābīšay* “Abishai” (“the father exists again,” according to H. Bauer, *ZAW* 48 [1930]: 77); a descriptive name is *ʾaḥʾāb* “Ahab” (“father’s brother”). In cases such as *ʾābīʾē*, *ʾābīʾāb*, *ʾābīʾā*, *yôʾāb*, or *ʾābīmelek* (cf. *ʾābīmelek*), *ʾābīdān* (cf. *dānīyēʾl*), among others, the theophoric significance of the element *ʾāb* is still certain.

A religiohistorical assessment must remember, on the one hand, that

such names continue to be preserved even when the contemporary situation with respect to name formation has long since evolved (cf. *IP* 141, concerning confessional names such as Joab: originally an equation of the old tribal god with the new covenant god, but still widely used in post-exilic times); and on the other hand, that grammatical-syntactical and metaphorical reinterpretations could take place (H. Bauer, *OLZ* 33 [1930]: 593ff.). Particularly with respect to etymologies of names that trace back to a divinity considered to be a blood relation of the clan, it is “certain that in Israel’s historical era the significance of indigenous names was altered by the equation of the divinity identified as father, brother, or uncle with Yahweh” (Stamm, *HEN* 418). According to W. Marchel (*Abba, Père* [1963], 13, 27ff.), the claim to relationship with the deity made in PNs is to be understood as purely fig. from the outset.

IV. 1. Starting from divine designations in the patriarchal and Moses narratives that contain a PN (“the God of Abraham,” etc.) as the second element of a gen. construction, and in comparison to Nabatean analogies, A. Alt (“God of the Fathers,” *EOTHR* 1–77) has argued for the existence of a “god of the fathers” religion in the early period of Israel’s history (so also W. F. Albright, *From the Stone Age to Christianity* [1957], 248f.; von Rad, *Theol.* 1:6–8; J. Bright, *History of Israel* [1981], 96–103; V. Maag, *SThU* 28 [1958]: 2–28; H. Ringgren, *Israelite Religion* [1963], 17f.; contra J. Hoftijzer, *Die Verheissungen an die drei Erzväter* [1956], 85ff.; cf. M. Noth, *VT* 7 [1957]: 430–33). The individual X, after whom the divinity “god of X” is named, functions then as the recipient of revelation and founder of the cult: in the tribe of X the divinity continues to be worshiped as the “patriarchal god” (*theos patrōos*). The association of these divinities not with a place but with a group of people and their changing fortunes influences its movement toward social and historical functions and its abandonment of naturalism (W. Eichrodt, *Religionsgeschichte Israels* [1969], 7–11). With a view to the interfusion of the various gods of the fathers with each other and with Yahweh, a process that took place in the early history of Israel, Alt remarks (*EOTHR* 62): “The gods of the Fathers were the  $\pi\alpha\iota\delta\alpha\gamma\omega\gamma\omicron\iota$  leading to the greater God, who later replaced them completely.”

In the pertinent J and E texts in Gen,  $\bar{a}b$  in the sg. (26:24; 28:13; 31:5, 29, 42, 53[bis]; 32:10[bis]; 43:23; 46:1, 3; 49:25; 50:17, each with per. suf.) reflects the presumed genealogical interrelationships of the patriarchs and refers to Abraham as Isaac’s father (26:24), to Isaac as Jacob’s (e.g., 46:1), or to Abraham and Isaac (32:10; also a double formula with only a single occurrence of  $\bar{a}b$  in 28:13; 31:42; cf. 48:15), to Jacob as the father of the sons of Jacob (50:17), even if, as in the last text, the PN is not stated. With respect to the sg. texts in Exod (Exod 3:6; alongside “the God of Abraham, Isaac, and Jacob,” the Sam. text assimilates to the pl.; 15:2

par. to “my God”; 18:4), one may ask whether the expression “the God of my/your father” intends the God of the patriarchs specifically or (in a virtually synonymous sense) more generally the God already worshiped by the family of Moses (concerning 3:6 cf. *EOTHR* 15n.33; contra P. Hyatt, *VT* 5 [1955]: 130–36); the later texts, which refer to the God of the ancestor, David (2 Kgs 20:5 = Isa 38:5; 1 Chron 28:9; 2 Chron 17:4; 21:12; 34:3), simply describe the continuity of the worship of God within the family or dynasty. “The God of our father, Israel” in 1 Chron 29:10 (cf. 29:18, 20) is unique.

The pl. formulation “the God of your fathers” occurs in the equation of Yahweh with the God of Abraham, Isaac, and Jacob in Exod 3:13, 15f.; 4:5 (*EOTHR* 10–14). The remaining texts with the “God of the fathers” (Deut 1:11, 21; 4:1; 6:3; 12:1; 26:7; 27:3; 29:24; Josh 18:3; Judg 2:12; 2 Kgs 21:22, and a further 30x in Dan, Ezra, and Chron) depend upon the Dtn usage of the expression “fathers” (see 2b). Dan 11:37 concerns the gods (pl.) of the fathers of the heathen princes (cf. also Ezek 20:24 *gillûlê ʾābôtām* “the idols of your fathers”).

2. The pl. *ʾābôt* “fathers” occurs in a series of more-or-less fixed usages of differing theological weights.

(a) First, euphemisms for “to die,” such as “to be laid with his fathers,” which B. Alfrink (*OTS* 2 [1943]: 106–18; 5 (1948): 118–31) has investigated, are theologically neutral (cf. also O. Schilling, *Der Jenseitsgedanke im AT* [1951], 11–15; M. D. Goldman, *ABR* 1 [1951]: 64f.; 3 [1953]: 51; G. R. Driver, *FS Neuman* 128–43).

Verbs used are: (1) *škb* “to lie down,” Gen 47:30; Deut 31:16; 2 Sam 7:12; 26x in 1 and 2 Kgs; 11x in 2 Chron; total 40x; in 2 Sam 7:12 with the prep. *ʔet-*, otherwise always with *ʕim-*. The expression refers to death, not to burial; as Alfrink has shown, it is used only of peaceful death (for 9 of 18 kings of Israel and 13 of 19 kings of Judah; concerning the problem with respect to Ahab [2 Kgs 22:40], see C. F. Whitley, *VT* 2 [1952]: 148f.); (2) *qbr* “to bury,” Gen 49:29 (with *ʔel-*); 1 Kgs 14:31 and a further 13x in Kgs and 2 Chron (with *ʕim-*); (3) *ʔsp* “to gather,” Judg 2:10 (with *ʔel-*); 2 Kgs 22:20 = 2 Chron 34:28 (with *ʕal-*); the formula in Judg 2:10 appears to be a confusion of the expression *ʔsp ni. ʔel-ʔammāyw* “to be gathered to his people” (Gen 25:8 and a further 9x in the Pentateuch; cf. Alfrink, *OTS* 5 [1948]: 118f.) with formula (1); (4) *bôʔ* “to enter,” Gen 15:15 (with *ʔel-*); Psa 49:20 (with *ʕad-*); (5) *hlk* “to go,” 1 Chron 17:11 (with *ʕim-*; cf. Rudolph, *HAT* 21, 131).

Subst. constructions with *ʾābôt* in reference to grave and burial occur in 1 Kgs 13:22; Jer 34:5; Neh 2:3, 5; 2 Chron 21:19; burial in the grave of the father (sg.) is mentioned in Judg 8:32; 16:31; 2 Sam 2:32; 17:23; 21:14. No religious significance in terms of an ancestor cult can be attributed here to the “fathers” (contra G. Hölscher, *Geschichte der isr. und jüd. Religion* [1922], 30f.).

(b) From ca. the 7th cent. onward, the pl. “the fathers” becomes significant theologically; it communicates the salvation-historical dimension in expressions concerning the people Israel as an organic unity of fathers and sons, whether viewed collectively or individually.

In connection with the patriarchal traditions, the promises to the fathers play a particularly significant role in Dtn theology. Then, language dependent upon Deut repeatedly names the fathers as recipients of various salvation gifts (on Deut see O. Bächli, *Israel und die Völker* [1962], 119–21).

“Fathers” already occurs once in Hos, although not in the patriarchal tradition but in a poetical depiction of the discovery in the desert (9:10 “your fathers” par. to “Israel”). The dominant formula in Dtn allusions to the patriarchal promises is “the land that Yahweh swore to give the fathers” or the like. Texts with *šb<sup>c</sup> ni*. “to swear” in Dtn/Dtr literature include Exod 13:5, 11; Num 11:12; 14:23; Deut 1:8, 35; 4:31; 6:10, 18, 23; 7:8, 12f.; 8:1, 18; 9:5; 10:11; 11:9, 21; 13:18; 19:8; 26:3, 15; 28:11; 29:12; 30:20; 31:7, 20f. (secondarily); Josh 1:6; 5:6; 21:43f.; Judg 2:1; Jer 11:5; 32:22; Mic 7:20; with *db<sup>r</sup> pi*. “to promise,” Deut 19:8; cf. *ʔmr* Neh 9:23. On Yahweh’s oath to the patriarchs, cf. von Rad, *Gottesvolk* 5; N. Lohfink, *Das Hauptgebot* [1963], 86–89 with tables on 307f. In addition to the promise of the land, other subjs. are mentioned as gifts to the fathers, e.g., the multiplication of descendants and, derivative of the fathers tradition, election, grace, and covenant (cf. also Deut 4:37; 5:3 with a parenetic application of the covenant to the current generation; 10:15; 30:5, 9). The discussion of the “God of the fathers” in Dtn theology and later is to be understood in the context of these formulas as well (see IV/1). Often Abraham, Isaac, and Jacob are listed by name as patriarchs (Deut 1:8; 6:10; 9:5; 29:12; 30:20; also 1 Chron 29:18); Deut 10:22 speaks of the fathers as 70 souls who descended into Egypt.

Of the multitude of post-Dtn texts that treat the fathers as recipients of salvation gifts, the first to be mentioned are those with the formulaic expression “land that Yahweh gave the fathers,” which has affinities with the Dtn oath formula (verb *ntn*): 1 Kgs 8:34, 40, 48 (= 2 Chron 6:25, 31, 38); 14:15; 2 Kgs 21:8 (= 2 Chron 33:8 txt em); Jer 7:7, 14; 16:15; 23:39; 24:10 (authentic Jer?); 25:5; 30:3; 35:15; Ezek 20:42; 36:28; 47:14; Neh 9:36; with *nhl hi*. Jer 3:18.

Furthermore, mention should be made of the Dtr overviews of history in Josh 24 (the fathers of the Exodus generation, vv 6 and 17, are distinguished from the heathen fathers beyond the river, vv 2, 14f.); Judg 2:17, 19f., 22; 3:4; 1 Sam 12:6–8; 1 Kgs 8:21, 53, 57f.; 9:9; 2 Kgs 17:13, 15; 21:15; other Dtr texts, e.g., Jer 7:22, 25; 11:4, 7, 10; 17:22; 34:13; 44:10; and Psa 78:12, as well as a few scattered texts: Isa 64:10; Ezek

37:25; Mal 2:10; Psa 22:5; 39:13; 1 Chron 29:15. Negative statements (e.g., Deut 9:15), references to particular ancestors (e.g., Num 20:15; 1 Kgs 21:3f.), and other theologically unproductive references to the fathers (e.g., Dan 9:6, 8) will not be treated.

Texts such as Josh 4:21; Judg 6:13; Psa 44:2; 78:3, 5 (cf. without *ʾāb* Exod 10:1f.; 12:26f.; Deut 6:20ff.) depict the transmission of salvation history from the fathers to the sons; as a Bab. par. cf. the epilogue of Enuma Elish (VII:147).

The fathers are not only the recipients of the promise and the blessing; their sin also encumbers later generations' relationship with God, a problem addressed in various expression of the solidarity of the sons with the fathers; on this issue see J. Scharbert, *Solidarität in Segen und Fluch im AT und in seiner Umwelt*, I: *Väterfluch und Väterseggen* (1958).

Jer is the first to speak of the fall of the fathers (the distinction between authentic and secondary texts is not always clear), in whose wake the later generations also sin (Jer 2:5; 3:25; 7:26; 9:13; 11:10; 14:20; 16:11f.; 23:27; 31:32; 34:14; 44:9, 17, 21; 50:7).

The following post-Jer texts deserve treatment: Lev 26:39f.; 2 Kgs 17:14, 41; 22:13 (= 2 Chron 34:21); Isa 65:7; Ezek 2:3; 20:4, 18, 24, 27, 30, 36; Amos 2:4; Zech 1:2, 4–6; 8:14; Mal 3:7; Psa 78:8, 57 (cf. 79:8 *ʿawōnōt riʾšōnîm* “the sins of the ancestors”); 95:9; 106:6f.; Lam 5:7; Dan 9:16; Ezra 5:12; 9:7; Neh 9:2, 16; 2 Chron 29:6, 9; 30:7f. J. Scharbert (“Unsere Sünden und die Sünden unserer Väter,” *BZ* 2 [1958]: 14–26) outlines the history of the genre of the confession of individual sin and that of the fathers from Jer (Jer 3:25; 14:20) on into the postbibl. era (Tob 3:3, 5; Jdt 7:28; Bar 1:15–3:8; 1QS 1:25f.; CD 20:29; 1QH 4:34).

The principal statements concerning the communal responsibility of children and fathers or concerning the removal of this responsibility use the pl. “fathers,” not in the sense “ancestors of Israel” treated to this point, but as a more general contrast of fathers-sons. On the old confessional formula “Yahweh . . . , who visits the guilt of the fathers on the children and grandchildren to the third and fourth generation” (Exod 20:5; 34:7; Num 14:18; Deut 5:9; Jer 32:18), cf. J. Scharbert, “Formgeschichte und Exegese von Exod 34, 6f. und seiner Parallelen,” *Bib* 38 (1957): 130–50; L. Rost, “Die Schuld der Väter,” *FS Hermann* 229–33; R. Knierim, *Die Hauptbegriffe für Sünde im AT* (1965), 204–7. With respect to the prohibition of community punishment in Deut 24:16; 2 Kgs 14:6; 2 Chron 25:4 cf. Scharbert, *Solidarität*, 114f., 124f., 251; and von Rad, *Deut*, OTL, 152. Regarding proverbs concerning the fathers who have eaten sour grapes and the sons whose teeth are thereby set on edge (Jer 31:29; Ezek 18:2), cf. comms. and Scharbert, *Solidarität*, 218–26.

3. Although “invocation of deity under the name of father is one of the

basic phenomena of religious history” (G. Schrenk, *TDNT* 5:951; see G. Mensching, *RGG* 6:1232f.), the OT is very restrained in the application of the father designation for Yahweh (Quell, *TDNT* 5:965–74; H.-J. Kraus, *RGG* 6:1233f.). This restraint is true to the greatest degree (a) of expressions concerning God’s physical paternity that are completely absent from the OT, but also (b) of the adoption idea, and (c) of the metaphorical usage of the word as well.

(a) Mythical concepts of deities as begetters and creators of the gods and people are easily traced in the surroundings of the OT in the Ug. texts (on Eg. and Bab. → *yld*), where the high god of the pantheon is given the epithet “father” in a series of stereotypical formulae.

El appears as *ab bn il* “father of the gods” in an atonement liturgy (*KTU* 1.40.[16], 25, 33; O. Eissfeldt, *El im ug. Pantheon* [1951], 62–66). The disputed *mlk ab šnm* (*KTU* 1.1.III.24; 1.2.III.5 [reconstructed]; 1.3.V.8 [reconstructed]; 1.4.IV.24; 1.6.36; 1.17.VI.49) appears to have a similar meaning, if one does not translate *ab šnm* with Driver (*CML* 1 109) and others (*CML* 2 75) as “father of years” or with Eissfeldt (op. cit. 30f.) as “father of the mortals,” but with M. H. Pope (*El in the Ug. Texts* [1955], 32f.) as “Father of Exalted Ones” (= the gods) (so also Gray, *Legacy* 114, 155f.; W. Schmidt, *Königtum Gottes in Ugarit und Israel* [19662], 59n.3). Also occurring are *il abh* “El, his/her father” (e.g., *KTU* 1.13.20f. of Anat) and *il abn* “El, our father” (1.12.I.9, in a fragmentary context; cf. Eissfeldt, op. cit. 34). The formula *tr il aby/abk/abh* “Bull, El, my/your/his father” is the most frequent (*KTU* 1.2.III.16f., 19, 21; 1.3.[IV.54], V.10, 35 supplemented in 1.1.III.26 and V.22; 1.4.IV.47; 1.6.IV.10, VI.26f.; 1.17.I.23), or in an alternate sequence *tr abk/abh il* “Bull, your/his father, El” (1.2.II.16, 33, 36; 1.14.II.6, 23f., IV.6; 1.92.15; in 1.14.I.41 *tr abh* omits *il* because of the preceding *šlm il*); the per. suf. refers in each case to the gods or goddesses who appear or have been named (also to Krt). Finally one also finds *ab adm* “father of humanity” in the Krt epic (*KTU* 1.14.I.37, 43, III.32, 47, VI.13, 32).

The observation that the formula *tr il abh* “Bull El his (i.e., Baal’s) father” is accompanied in a few texts by a par. element, *il mlk dyknnh* “El, the king, who established him (*kûn* po.),” is significant to some degree for the interpretation of Deut 32:6b, “Is he not your father who created you (i.e., the people), is it not he who made and established you (*kûn* po.)” Seen in conjunction with Deut 32:18, a trace of Can. mythology may be detected in v 6b, at least in the poetical language strongly avoided elsewhere in the prophetic critique of the vegetation and fertility cult: Jer 2:27, they will become ashamed “who say then to the tree: ‘You are my father,’ and to the stone: ‘You bore me’” (cf. Quell, *TDNT* 5:968; P. Humbert, “Yahvé Dieu Géniteur?” *Asiatische Studien* 18/19 [1965]: 247–51).

On Isa 1:2 LXX *engennēsa*, cf. J. Hempel, *Gott und Mensch im AT* (19362), 170n.6; Wildberger, *Isa 1–12*, CC, 9.

(b) Statements concerning the father-son relationship between Yahweh and the Davidic king involve adoption concepts (2 Sam 7:14, “I will be his father and he will be my son”; Psa 89:27; 1 Chron 17:13; 22:10; 28:6; cf. also the adoption formula in Psa 2:7, “You are my son, today have I begotten you”). The influence of Eg. royal ideology on the Jerusalemite enthronement ceremony is apparent (S. Morenz, *Äg. Religion* [1960], 35–43, 154f.; id., *RGG* 6:118), as is the distinction in the notion of divine sonship that is understood in Egypt as directly physical, but in the OT as adoptive, the result of a prophetic promise of election (Hempel, op. cit. 173ff.; Alt, *EOTHR* 235; id., *KS* [19643], 2:218; von Rad, *PHOE* 226f.; K.-H. Bernhardt, *Das Problem der altorientalischen Königsideologie im AT* [1961], 74–76, 84–86).

The son concept already appears in reference to the relationship between Yahweh and his people in Exod 4:22 (Noth, *Exod*, OTL, 34f., 47: a secondary accretion to J or JE); Hos 11:1 (here in the sense of adoption with an emphasis on the love and rearing ideas; cf. Wolff, *Hos*, Herm, 197–99); Isa 1:2 (protective paternal goodwill for the sons [pl.], perhaps to be understood against the background of spiritual sonship in the sphere of wisdom [see III/2b]; cf. Wildberger, *Isa 1–12*, CC, 12–14) and 30:9 (→ *bēn*; on Deut cf. D. J. McCarthy, *CBQ* 27 [1965]: 144–47). The word *ʾāb*, however, first surfaces in Jer clearly in reference to adoption and in the sense of loving attention: Jer 3:4 (to be seen with Duhm and others as a gloss derived from v 19; cf. Rudolph, HAT 12, 22); 3:19 “my father!” as an address that acknowledges inclusion among the sons (cf. also S. H. Blank, *HUCA* 32 [1961]: 79–82); 31:9 “for I have become Israel’s father.”

Psa 27:10 features the adoption motif in reference to an individual, without, however, indicating Yahweh directly as father.

(c) Only a few texts remain in which Yahweh is either compared to a father or metaphorically called “father.” If they do not deal with a simple comparison to family life (Psa 103:13; Prov 3:12) or common ancient Near Eastern ideals (Psa 68:6), these (post-exilic) statements stand for the most part in the wake of descriptions of Yahweh as the creator of the people in Deutero-Isa (Isa 43:6f., 15, 21; 44:2, 21, 24; 45:10f.).

On the one hand, seen from the son’s perspective, the emphasis of the metaphorical depiction lies on the authority of the pater familias and on the obedience due him. In this manner, Yahweh appears, albeit only indirectly, as father in Isa 45:10 (cf. v 11) par. to the picture of the sovereign potter, an image also taken up in Isa 64:7 together with the direct address “you are our father” (twice also in 63:16 in a formulaic manner). In Mal 1:6a “a son honors his father” parallels “a servant fears his master”; in v 6b the demand for respect derives from the concept of God as father,

which is also presupposed in 2:10 on the basis of God's status as creator, but in 2:10 the notion of brotherhood among the sons of one father (= God; cf. comms. and Quell, *TDNT* 5:973; contra Horst, HAT 14, 269, who prefers Jacob) is decisive (→  $\text{אָב}$  4c). The father concept does not evolve into a universalistic notion because the statements concerning creation within this tradition relate to the people (contra R. Gyllenberg, "Gott der Vater im AT und in der Predigt Jesu," *StOr* 1 [1925]: 53f.).

On the other hand, if the viewpoint is that of the father toward the child, solidarity and concern receive the greater emphasis. Thus the appeal in Isa 63:16 (cf. v 15 "look down") is directed to the father and redeemer of old ( $g\bar{o}'\text{a}l\bar{e}n\hat{u}$ , →  $g^{\lambda}$ ) who is far superior to earthly fathers. Finally, loving attention forms the tertium comparationis similarly in the relatively few comparisons of Yahweh with a father (comparable to the copious Bab. material; see *CAD* A/1:69b): Psa 103:13, "As a father shows mercy to his children, so the Lord shows mercy to those who fear him" (cf. Deut 1:31 without  $\text{אָב}$ ) and Prov 3:12, "For whomever Yahweh loves he punishes, as a father the son in whom he delights" (so MT; according to the LXX, however,  $\hat{u}k^e\text{אָב}$  should be emended to  $w^c\text{yak}^{\lambda}ib$ ; regarding content, cf. Deut 8:5 without  $\text{אָב}$ ).

The motif of the "father of the fatherless" in Psa 68:6 is widely attested, although less pointedly, in the OT and in its environment (cf. Deut 10:18; Psa 10:14, 18; 82:3f.; 146:9; also Job 29:16; 31:18; Sir 4:10; and the ancient Near Eastern materials in Wildberger, *Isa 1–12*, CC, 50f.). It is hardly necessary to posit a specifically Eg. origin (so Quell, *TDNT* 5:966n.118).

The OT does not yet describe God as the father of the individual believer (for the first time in Sir 50:10 [Hebr.] in allusion to Psa 89:27); with respect to intertestamental Jewish literature see Bousset-Gressmann 377 and esp. J. Jeremias, *Prayers of Jesus* (1967), 15–29.

V. NT studies concerning *abba* and *patēr* usually treat the backgrounds of the concepts in the OT, as well as in Palestinian and Hellenistic Judaism. See e.g., G. Kittel, "ἄββᾶ," *TDNT* 1:5–6; G. Schrenk, "πατήρ," *TDNT* 5:974–1022; D. Marin, "Abba, Pater," FS Herrmann 503–8; W. Marchel, *Abba, Père! La prière du Christ et des Chrétiens* (1963); J. Jeremias, "Vatername Gottes, III," *RGG* 6:1234f.; id., *Prayers of Jesus* (1967), 11–65, 108–12.

E. Jenni

**אָבד  $\text{בד}$  to perish**

S 6; BDB 1a; HALOT 1:2a; TDOT 1:19–23; TWOT 2; NIDOTTE 6

1. *ʔbd* is common Sem. (Berg., *Intro.* 220–21), in the meaning “to lose, be lost, perish,” but is active only in NWSem.

Akk. *abātu* (with a dissimilation of *d > t*; cf. GAG 8\*\* §51d; otherwise GVG 1:512; Berg., *HG* 1:109) is trans., “to destroy”; Old Assyrian, however, also has intrans., “to run away” (J. Lewy, *Or* 29 [1960]: 22–47; *CAD* A/1:45).

Besides qal, pi. “to destroy,” and hi. “to cause to be destroyed” (Aram. pe., ha., and ho.), only the verbal nouns *ʔabēdā* “a lost thing” and *ʔabaddôn* “destruction” are formed on the root in the OT (in addition to *ʔabdān* and *ʔobdān* “destruction” as Aram. loanwords; see Wagner no. 1).

*ʔdē ʔōbēd* “forever” in Num 24:20, 24 may be derived from a second root *ʔbd* “to last” (D. Künstlinger, *OLZ* 34 [1931]: 609–11), which occurs in Arab. and is also suspected in Ug. (J. Gray, *ZAW* 64 [1952]: 51, 55; *UT* no. 17; *WUS* no. 15; contra M. Dietrich and O. Loretz, *WO* 3 [1966]: 221); suggestions regarding Prov 11:7 remain conjectural (J. Reider, *VT* 2 [1952]: 124) and Job 30:2 (G. Rinaldi, *BeO* 5 [1963]: 142).

2. Statistics: qal 117x (Psa 21x, Jer 16x, Deut 13x, Job 13x), Aram. pe. 1x; pi. 41x (Esth 10x); hi. 26x, Aram. ha. 5x, ho. 1x; the verb occurs in Hebr. a total of 184x, in Aram. 7x; *ʔabēdā* 4x, *ʔabaddôn* 6x, *ʔabdān* 1x, *ʔobdān* 1x. The root is absent from Gen and Chron-Ezra-Neh (cf. 2 Kgs 11:1; 21:3 with 2 Chron 22:10; 33:3; and 2 Kgs 9:8 with 2 Chron 22:7).

Harmonization with the LXX may be assumed in 1 Sam 12:15; Isa 46:12; and Prov 17:5 (cf. *BHS*).

3. Depending upon the subj. (individual things, collective entities, living things) and the usage of preps. (*be*, *min*), Eng. has various translation options for the relatively unified basic meaning of the qal “to be destroyed” (“to be lost, die, be snatched away,” etc.; cf. *HAL* 2b). The meanings of the root in the related Sem. languages (cf. Akk., Arab., and Eth.) may suggest that the original meaning lies in the more specific meanings “to be lost, to wander about, run away” (Deut 26:5; 1 Sam 9:3, 20; Jer 50:6; Ezek 34:4, 16; Psa 2:12; 119:176; cf. Th. Nöldeke, *ZDMG* 40 [1886]: 726).

Because of its unspecific, negative meaning, the verb has no regular antonym; possible opposites are → *ʔmd* “to remain” (Psa 102:27; cf. 112:9f.), → *hyh* “to be” (Jonah 4:10), and *ʔrk* hi. *yāmîm* “to live long” (Deut 4:26; 30:18).

The meaning of *ʔbd* coincides quite precisely with Akk. *ḫalāqu* (AHw 310f. “to disappear, be destroyed, flee”; also Ug. and Eth.); cf. EA 288:52 (from Jerusalem): “all of the lands of the king are lost (*ḫal-qa-at*)” with a Can. gloss *a-ba-da-at*. This root *ḫlq* III is also suspected in Psa 17:14; 73:18; Job 21:17; Lam 4:16 (M. Dahood, *Bib* 44 [1963]: 548; 45 [1964]: 408; 47 [1966]: 405; on Isa 57:6 see W. H. Irwin, *CBQ* 29 [1967]: 31–40); on account of its nearness in meaning to *ḫlq* I (*ḫ<sup>a</sup>lāqôṭ*, Psa 73:18 “slippery places”) and II (pi. “to destroy,” Gen 49:7 and Psa 17:14; cf. G. R. Driver, *JTS* 15 [1964]: 342), however, it has not been identified with certainty.

In the pi. and hi. “to destroy,” *ʔbd* competes primarily with → *krt* and → *šmd*.

On the difference in meaning between pi. “to destroy, eliminate” and hi. “to destroy” (the latter used mostly of persons and with respect to the future), see E. Jenni, “Faktitiv und Kausativ von *ʔbd* ‘zugrunde gehen,’” *FS Baumgartner* 143–57.

On *ʔbaddôn* “destruction, ruin” → *š<sup>e</sup>ôl*.

4. In over two-thirds of the texts with *qal* and *hi*. (pi. 1/3) Yahweh is the direct or indirect agent of destruction. *ʔbd* here is hardly neutral (cf. Psa 102:27; 146:4); instead it signifies the destruction meted out by God to his enemy. No formulaic usage may be identified, probably because of the very common meaning of the word; it has not stabilized as a theological term.

*ʔbd* appears only once, in the extirpation formula in Lev 23:30, in the place of the usual and more concrete *krt* (Elliger, *HAT* 4, 310, 319n.24). The cry of terror (Num 17:27; cf. Num 21:29 par. Jer 48:46, and Matt 8:25 par. Luke 8:24) is also unconnected with *ʔbd* (cf. Isa 6:5; Jer 4:13; G. Wanke, *ZAW* 78 [1966]: 216f.).

*ʔbd* is pertinent in the following spheres:

(a) Statements concerning the deed-consequence relationship (cf. H. Gese, *Lehre und Wirklichkeit in der alten Weisheit* [1958], 42ff.) in wisdom literature (Psa 1:6; 37:20; 49:11; 73:27; 112:10; Job 4:7, 9; 8:13; 11:20; 18:17; 20:7; Prov 10:28; 11:7[bis], 10; 19:9; 21:28; 28:28); here Yahweh always implicitly or explicitly sees to the destruction of the fool, the fool’s name, the fool’s hope, etc.

(b) Conditional curse-threats in the blessing/curse formulae that conclude H and the Dtn code (Lev 26:38; Deut 28:20, 22; on cultic-sacral origins, see Elliger, *HAT* 4, 372) and in the Dtr sermon (Deut 4:26; 8:19, 20; 11:17; 30:18; Josh 23:13, 16; cf. also 1Q22 1:10); they bear some resemblance to curse formulae in NWSem. inscriptions and ancient Near Eastern treaty texts (bibliog. in D. R. Hillers, *Treaty-Curses and the OT Prophets* [1964]). Cf. a 9th-cent. Phoen. burial inscription from Cyprus:

“and may thi[s curse(?)] bring [those m]en to destruction (*wy<sup>ʔ</sup>bd yi.*)“ (*KAI* no. 30.3; cf. Friedrich 127, contra *DISO* 1f.); in 7th-cent. Aram. burial inscriptions from Nerab near Aleppo: “and may his posterity perish (*t<sup>ʔ</sup>bd pe.*)“ (*ANET* 661b; *KAI* no. 226.10); “may ŠHR, Šamaš, Nikkal, and Nusku . . . annihilate (*yh<sup>ʔ</sup>bdw ha.*) your name” (*KAI* no. 225.9–11); on *ḫalāqu* (see 3) in Akk. curse formulae, see F. C. Fensham, *ZAW* 74 (1962): 5f.; 75 (1963): 159.

(c) *ʔbd* occurs relatively infrequently in 8th-cent. prophetic threats of judgment related to (b) (qal in Isa 29:14; Amos 1:8; 2:14; 3:15); pi. and hi. with Yahweh as subj. are used sporadically beginning with the time of Jer (oldest text Mic 5:9, if authentic; pi.: Isa 26:14; Jer 12:17; 15:7; 51:55; Ezek 6:3; 28:16; Zeph 2:13; hi.: Jer 1:10; 18:7; 25:10; 31:28; 49:38; Ezek 25:7, 16; 30:13; 32:13; Obad 8; Mic 5:9; Zeph 2:5).

5. *ʔbd* and *ʔbaddôn* are not yet used in the OT (or in the available texts from Qumran) for an otherworldly, eternal destruction, even when accompanied by expressions for “eternal” (*lāneṣaḥ* Job 4:20; 20:7; cf. also the Mesha inscription *wyśr<sup>ʔ</sup>l<sup>ʔ</sup>bd<sup>ʔ</sup>bd<sup>ʔ</sup>Im* “while Israel hath perished for ever,” *ANET* 320b; *KAI* no. 181.7).

On the NT cf. A. Oepke, “ἀπόλλυμι,” *TDNT* 1:394–97; J. Jeremias, “Ἀβραδδών,” *TDNT* 1:4.

E. Jenni

## הבה *ʔbh* to want

S 14; BDB 2b; *HALOT* 1:3b; *TDOT* 1:24–26; *TWOT* 3; *NIDOTTE* 14

## אֶבְיוֹן *ʔebyôn* poor

S 34; BDB 2b; *HALOT* 1:5a; *TDOT* 1:27–41; *TWOT* 3a; *NIDOTTE* 36

1. *ʔbh* (*ʔby*) occurs outside Hebr. chiefly in SSem.; there, however, it has a distinctive semantic development (Class. Arab., Eth. “not to want”; Dial. Arab. “to want”).

Some relationship to Eg. *ʔby* “to wish” is possible (cf., however, Calice no. 462).

Regarding supposed Akk. pars., see *HAL* 3a.

The root is uncommon in Aram., if one excludes the targumic Hebraism  $\text{ʔb}^{\text{h}}$  (*BS* 66n.7). *htnʔbw* in the Old Aram. Barrakib inscription, *KAI* no. 216.14, is disputed (hittanaphal of  $\text{ʔbh}$  or  $y^{\text{b}}$ , *KAI* 2:233f.; cf. G. Garbini, “L’aramaico antico,” *AANLR* 8/7 [1956]: 274; cf., however, id., “Note semitiche,” *Ricerche Linguistiche* 5 (1962): 181n.28).

Aram. has the verb  $y^{\text{b}}$  “to yearn, desire” (*DISO* 103; *LS* 293a), which may be related to  $\text{ʔbh}$  ( $\text{ʔby}$ ) and which also occurs once in Hebr. as an Aramaism (*Psa* 119:131; Wagner no. 119; Garbini, *Ricerche Linguistiche* 180).

A further Hebr. by-form  $t^{\text{b}}$  “to require” (*Psa* 119:40, 174) may be explained not as an Aramaism but as a secondary back-formation from  $ta^{\text{b}}\hat{a}$  “requirement” (*Psa* 119:20), a nom. form of  $\text{ʔbh}$  with *t*-preformative (A. M. Honeyman, *JAOS* 64 [1944]: 81; Garbini, *Ricerche Linguistiche*, 180f.).

Contrary semantic development in Arab. (Eth.) may be regarded as an internal Ssem. phenomenon, wherein several different basic meanings, both positive and negative, may be posited, e.g., “to be decided” (F. Delitzsch, *Prolegomena eines neuen hebr.-aram. Wörterbuchs zum AT* [1886], 111), “to be stubborn” (W. M. Müller, following GB 3a), “psychological movement of the will” (C. Landberg, *Glossaire Datinois* [1920], 1:21ff.), “se flecti sivit” (Zorell 3a), “to be in need” (Honeyman, op. cit. 81f.). Arab. and Eth. should not be adduced (contra *BS* 66: particle of negation simply as a strengthening of the original negative meaning; followed by L. Köhler, *ZS* 4 [1926]: 196f.; contra *GVG* 2:186; *BrSynt* 53, 158; Honeyman, op. cit. 81) in order to explain the fact that  $\text{ʔbh}$  regularly occurs negated in Hebr. (see 3a).\*

The adj.  $\text{ʔeby}^{\text{h}}$  “needy, poor” is also usually derived from the root  $\text{ʔbh}$  (in the accepted meaning “to want to have, be in need” (e.g., GB 4a; BL 500: actually “begging[?]”; A. Kuschke, *ZAW* 57 [1959]: 53; Honeyman, op. cit. 82; P. Humbert, *RHPR* 32 [1952]: 1ff. = *Opuscules d’un kibraHsant* [1958], 187ff.; *HAL* 5a); the degree to which this etymological origin remains determinative for the meaning of  $\text{ʔeby}^{\text{h}}$  is uncertain (E. Bammel, *TDNT* 6:888–89). Cf. also W. von Soden, “Zur Herkunft von hebr.  $\text{ʔebj}^{\text{h}}$  ‘arm,’” *MIO* 15 (1969): 322–26 (from  $*\text{ʔb}^{\text{h}}$  “to be poor, needy,” which derives from an “old Amor.” adj. and which appears as a loanword in Ug., Hebr., and in the Akk. of Mari [*abiyānum* “poor, troubled, destitute”]). Consequently,  $\text{ʔbh}$  and  $\text{ʔeby}^{\text{h}}$  will receive special treatment below in 3 and 4–5.

Copt. *EBIHN* may be a loanword from Sem. (cf. W. A. Ward, *JNES* 20 [1961]: 31f.; contra T. O. Lambdin, “Eg. Loan Words in the OT,” *JAOS* 73 [1953]: 145f.).

The Ug. *abynm* (*KTU* 4.70.6) and *abynt* (1.17.I.16) are not fruitful (cf. *WUS* nos. 18, 20; *UT* nos. 23f.).

The derivation of  $\text{בֹּי}^{\text{א}}$  “woe” (Prov 23:29) from  $\text{בָּח}$  is questionable (cf. HAL 4a with bibliog.), as is that of  $\text{בִּי}^{\text{א}}$  “O that” (Job 34:36; cf. 1 Sam 24:12; 2 Kgs 5:13; →  $\text{בָּב}$  III/2b; cf. Honeyman, op. cit. 82; HAL 4a).

2. The verb  $\text{בָּח}$  is attested 54x in qal forms, with the majority in narrative literature (2 Sam 10x, Deut 7x, Isa 5x, and 4x each in Judg, 1 Sam, 1 Chron, and Prov).

$\text{בְּיָוֶן}$  (61x) is found primarily in cultic texts (Psa 23x, in addition to 1 Sam 2:8; Isa 25:4; Jer 20:13), but is also represented in the prophetic, legal, and wisdom literatures (Deut 7x, Job 6x, 5x each in Isa and Amos).

3. (a) Remarkably, the verb  $\text{בָּח}$  is almost always negated and means “to refuse, decline, not want”; it falls therefore within the semantic field of the expression  $\text{מָנַן}$  pi. “to refuse” (46x; once in Num 22:13 with Yahweh as subj., although no theological usage is recognizable; par. to  $\text{בָּח}$  in Deut 25:7; 2 Sam 2:21, 23; Isa 1:19f.; Prov 1:24f.),  $\text{מָנַן}^{\text{C}}$  “to withhold, refuse,” →  $\text{מָנַס}$  “to reject,” etc. The only two sentences in which  $\text{בָּח}$  has a grammatically positive usage are not entirely positive in terms of meaning (Isa 1:19, in a conditional sentence, par. to →  $\text{שָׁמַע}^{\text{C}}$  “to obey”; Job 39:9, in a rhetorical question, practically equal to a negation).

The explanation for this meaning should not proceed from etymological or linguistic-historical inferences, but from considerations of the contemporary word field (cf. E. Jenni, “‘Wollen’ und ‘Nichtwollen’ im Hebr.,” FS Dupont-Sommer 201–7). The positive “to be willing, want” is expressed in Hebr. by means of the verb  $\text{יָחַל}$  hi. “to decide, touch, begin” (18x), which is never negated. On the one hand, as a so-called inner-causative, inwardly trans., or internal hi. (“to cause oneself to take something, begin something,” etc.), this verb, which always expresses an intentional process, can never be negated (cf. HP 95ff., 250ff., 256); on the other hand, it is precisely the inner-causative hi. that is more conducive to the expression of the intentional activity of the subj. than a neutral  $\text{בָּח}$  in the meaning “to be (de facto, perchance) willing.” Thus a positive  $\text{יָחַל}$  hi. and a negated or conditional  $\text{בָּח}$  qal complement each other (cf. Judg 19:6–10, where the two verbs coincide).\*

(b) The verb exhibits full verbal force (“to want, be willing,” etc.) in only a few cases: Prov 1:30, “They would have none of my counsel”; 1:25, “You would have none of my reproof”; Deut 13:9, “You would not yield to him.” These cases refer to a specific act of the will in contrast to an expectation or a demand exerted from without, a—thoroughly neutral—unwillingness. Nom. objs. are introduced then either with  $\text{לֵךְ}$  (Deut 13:9; Prov 1:30; cf. Psa 81:12) or stand in the acc. (Prov 1:25).  $\text{בָּח}$  occurs formulaically in the bipolar expression “not to hear and to be unwilling” (Deut 13:9; 1 Kgs 20:8; Psa 81:12; cf. Isa 1:19; 42:24). In reality, however, any apparently abs. usage of the word is an elliptical idiom. Cf. e.g., Judg 11:17 (LXX); 1 Sam 31:4 = 1 Chron 10:4; 2 Sam 12:17; 1 Kgs 22:50; Isa

30:15; cf. also Prov 1:10; 6:35.

(c) In the majority of cases an action verb accompanies *ʔbh* that forces it into an auxiliary role (e.g., Gen 24:5, 8, “If you do not want to accompany”). Perhaps as an extension of the formula mentioned above, the expression “not to want to hear” established itself in common usage (Lev 26:21; Deut 23:6; Josh 24:10; Judg 19:25; 20:13; 2 Sam 13:14, 16; Isa 28:12; 30:9; Ezek 3:7[bis]; 20:8).

All sorts of other activities could also be unwanted, avoided, refused (Deut 1:26; Judg 19:10; 1 Sam 22:17; 26:23; 2 Sam 2:21; 6:10; 13:25; 14:29[bis]; 23:16f. = 1 Chron 11:18f.; 2 Kgs 8:19 = 2 Chron 21:7; 2 Kgs 24:4; 1 Chron 19:19); the main verb stands for the most part in the inf. with *le* (exceptions, Deut 2:30; 10:10; 25:7; 29:19; 1 Sam 15:9; 2 Kgs 13:23; Isa 28:12; 30:9; 42:24; Job 39:9).

(d) Texts in which the lack of desire results from an inner hardening or stubbornness may indicate traces of a technical theological usage of *ʔbh* (Exod 10:27, “Yahweh hardened Pharaoh’s heart, therefore he did not want to let them go”; cf. Deut 2:30), which may have led to a formulaic usage in the prophetic judgment or indictment language: “You were not willing!” (Isa 30:15; cf. Matt 23:37 with the verb *thelein*, which translates *ʔbh* in the LXX in approximately half the cases; see G. Schrenk, “βούλομαι,” *TDNT* 1:629–37; id., “θέλω,” *TDNT* 3:44–62). The hardening can also be viewed in an entirely inward, almost clinical, manner (2 Sam 13:2, 14, 16; see K. L. and M. A. Schmidt, “παχύνω,” *TDNT* 5:1022ff.; F. Hesse, *RGG* 6:1383).

4. (a) *ʔebyôn* belongs to a series of OT words describing the socially weak (*dal*, *miskēn*, *ʕānî*, *rāš*, etc.; → *ʕnh* II; cf. A. Kuschke, “Arm und reich im AT,” *ZAW* 57 [1939]: 31–57; J. van der Ploeg, “Les pauvres d’Israël et leur piété,” *OTS* 7 [1950]: 236–70; P. Humbert, “Le mot biblique *ʔebyôn*,” *RHPR* 32 [1952]: 1–6 = *Opuscules d’un hébraïsant* [1958], 187–92; F. Hauck, “πέννης,” *TDNT* 6:37–40; F. Hauck and E. Bammel, “πτωχός,” *TDNT* 6:885–915, with bibliog.). The specific meaning of the word, “to have want” (Kuschke, op. cit. 53), “the poor who beg” (Humbert, op. cit. 188), is no longer clearly discernible (Bammel, *TDNT* 6:889n.24). In legal and prophetic texts the *ʔebyôn* is the exploited (Exod 23:6, 11; Deut 15:1–11; 24:14; Amos 2:6; 4:1; 5:12; 8:4, 6; Jer 2:34; 5:28; 22:16; Ezek 16:49; 18:12; 22:29). Wisdom passages often simply have material suffering in mind in contrast to wealth (Psa 49:3; 112:9; Prov 31:20; cf. *rāš* “poor,” → *ʕnh* II).

(b) Everywhere in the ancient Near East the socially weak have a particular relationship to the divinity.

Cf. *BWL* 18n.1 (“the poor of this world, rich in faith,” to whom the gods pay

particular attention, so that even Nabopolassar recognizes himself as belonging to their number), with a listing of the expressions for “poor” in Akk. (textual citations in *AHW*; see *akû*, *dunnamû*, *enšu*, *katû*, *lapnu*, *muškēnu*, etc.). Cf. W. Schwer, *RAC* 1:689ff.; G. Mensching, E. Kutsch, and E. L. Dietrich, *RGG* 1:616ff.; also the hymns to Shamash (*BWL* 121ff.) and Psa 82:3 as a reflection of ancient Near Eastern concepts.

Against this background it is understandable that *ʿebyôn* acquires a religious nuance in the OT. In genres rooted in the cult (above all in laments and thanksgivings), the worshiper appears before Yahweh as poor and needy. One must admit one’s inferiority to the mighty and just God; cf. Job 42:2ff. With such an admission, however, the poor simultaneously lay a particular claim to justice: the duties of the powerful, and therefore of God (the covenant idea need not even contribute in this respect), include pity for the suffering (cf. Deut 14:28f.; Isa 58:7; Ezek 18:7; Psa 72:2, 4, 12f.; 82:3; 112:9; Prov 3:27f.; 31:20). Wealth is always a loaned gift. A person is normally poor and unprotected (cf. Gen 3:21; Ezek 16:4ff.; Hos 2:10; Psa 104:14f., 27ff.; etc.); the OT reflects the awareness that Yahweh esp. desires the good of the sufferer. The belief that Yahweh allots privilege and poverty and elevates the poor, reversing the human order, found classical expression in 1 Sam 2:1ff.

(c) The manner in which cultic texts, in particular, use *ʿebyôn* confirms this general impression. The nuances of the various expressions for “poor, needy” are entirely lost; their social significance has faded.

The following count as symptoms of “being poor before God”: unfortunate circumstances (Psa 40:13), contempt (69:9, 11ff.), persecution (35:1ff.; 109:2ff.), sickness (109:22ff.), near death (88:4ff.), etc. (cf. S. Mowinckel, *Psalms in Israel’s Worship* [1962], 2:91f.). The enemies of the poor are less profiled; there are many accomplices and executors of anti-Yahweh schemes (cf. Mowinckel, *op. cit.* 5ff.).

The formulaic usage “I am destitute and poor” (Psa 40:18; 70:6; 86:1; 109:22; cf. also Psa 25:16; 69:30; 88:16; 1 Sam 18:23) describes the situation of the worshiper; it is a confession (of guilt), at once a recognition of the towering might of Yahweh and a foundation for prayer. Yahweh is, however, one who “delivers the weak from the one who is too strong and the weak and needy from the one who despoils” (Psa 35:10; cf. similar hymnic predications in Job 5:15; 1 Sam 2:8; Psa 113:7; etc.). The regular use of two or more synonyms for “poor” (mostly *ʿānî wʿebyôn* “destitute and poor,” Psa 35:10; 37:14; 40:18; 70:6; 74:21; 86:1; 109:16, 22; cf. Deut 24:14; Jer 22:16; Ezek 16:49; 18:12; 22:29; Job 24:14; Prov 31:9) may indicate firm roots in a diction shaped by parallelism. Hymns of thanksgiving (cf. Psa 107:41) and prophetic or priestly promises of salvation (cf. Isa 14:30; 29:19; 41:17; Psa 132:15) attest to the accomplished or guaranteed salvation of the poor.

5. In many intertestamental religious texts, the poor achieve an even greater significance, likely as a result of a more extensive stratification of society. The Qumran community was particularly suspicious of private property and considered poverty and humility preconditions for the spiritual life. This positive conception of poverty continues in the NT (Sermon on the Mount, Luke, Paul), and the Ebionites were neither the only nor the last Christians to give humility before God programmatic significance. Cf. E. Bammel, “πτωχός,” *TDNT* 6:894ff.; *RGG* s.v. “Armenpflege,” “Armut,” “Ebioniten”; L. E. Keck, “The Poor Among the Saints in Jewish Christianity and Qumran,” *ZNW* 57 (1964): 54–78; A. Gelin, *The Poor of Yahweh* (1964).

E. Gerstenberger

אֲבִיּוֹן *ʿabyôn* **poor** → אָבָה *ʿbh*

אֲבִיר *ʿabbîr* **strong**

S 47; BDB 7b; *HALOT* 1:6a; *TDOT* 1:42–44; *TWOT* 13c; *NIDOTTE* 52

1. It is clear that *ʿabbîr* “strong, powerful” and *ʿābîr* (with basically the same meaning; see 4) are related; it is unclear whether *ʿēber* and *ʿebrâ* “pinion, wing” (→ *kānāp*) as well as the related denominative verb *ʿbr* hi. “to soar” (Job 39:26) belong to the same root (so GB 4f., 7; contra *HAL* 6a, 9; cf. *AHw* 7a).

Occurrences of the root in other Sem. languages are similarly opaque in many respects.

*ʿēber* “wing” is related to Akk. *abru* “wing,” Ug. *ʿbr* “to fly(?)” (*WUS* no. 33; contra *UT* no. 39), Syr. *ʿebrā* “feather”; this word family lies too far afield with respect to meaning and will not be taken into account here.

*ʿabbîr* is related to Ug. *ibr* “bull” (*WUS* no. 34; *UT* no. 39; on *i* or *e* in the first syllable as mutated vowels, see W. Vycichl, *AfO* 17 [1954/56]: 357a; on Ug. PNs formed with *ibr*, see Gröndahl 88, 133), and as a Can. loanword, see Eg. *ybr* “stallion” (Burchardt 2:2; W. F. Albright, *BASOR* 62 [1936]: 30).

Of the postulated Akk. words in *AHw* 4b, 7a, *abru* “strong, mighty(?),” *abāru* “embrace, might,” and *abāru* “to span,” *CAD* A/1:38, 63 recognizes only *abāru*

“strength” as valid.

NWSem. forms yet to be mentioned are: a Pun. PN *ʔbrbʔ* (CIS 1:1886; W. W. Baudissin, *Kyrios* [1929], 3:85, “Baal is strong”; Harris 73: an error for *ʔdrbʔ*?) and Old Aram. *ʔbrw* “greatness, mightiness” (DISO 3; KAI no. 214.15, 21; cf. 2:219).

According to E. Y. Kutscher (FS Baumgartner 165) the Middle Hebr. *ʔbr* pi. “to make strong” should be viewed as a secondary formation.

Associations of the root with Gothic *abrs* “strong” and other Old Nordic, Cheremis, and perhaps Celtic pars., as well as with Sum. *ʔb* “cow,” which are thought to point back to a common prehistorical cultural situation (see H. Wagner, *Zeitschrift für vergl. Sprachforschung* 75 [1958]: 62–75) are quite unlikely.

2. *ʔabbîr* occurs 17x, distributed across the entire OT from the Song of Deborah to the discourse of Elihu in the poetry of the book of Job. *ʔābîr* is attested 6x, without exception as part of a divine name, once each in the promise to Joseph in the blessing of Jacob, in Isa, in Deutero-Isa, in Trito-Isa, and twice in Psa 132.

3. *ʔabbîr* is used consistently as a subst. and has meanings in the realm of “strong, powerful” (cf. *ischyros* and *dynatos*, the LXX translations in Judg 5:22; Lam 1:15; and Job 24:22). It indicates:

(a) with reference to humans—“those in power, tyrants, heroes, leaders” (1 Sam 21:8; Isa 10:13 K; Job 24:22; 34:20; Lam 1:15; likely also Jer 46:15: Pharaoh, contra LXX Apis), in the construction *ʔabbîrê* → *lēb*, the “brave” (Psa 76:6 par. “heroes of war”; cf. Isa 46:12);

(b) with reference to animals—“horse” (Judg 5:22; Jer 8:16 par. *sûs* “horse,” LXX *hippos*; Jer 47:3 alongside *rekeb* “chariot”; 50:11 and 8:16 alongside *ʔhl* “to neigh”) and “bull” (Isa 34:7; Psa 22:13; 50:13 par. *ʔattûd* “ram”; LXX in each case *tauros*); Psa 68:31 plays upon the double meaning “strong” and “bull”;

(c) Psa 78:25 is on the way to a theological meaning with the expression *leḥem ʔabbîrîm* “bread of angels” (manna; LXX *arton angelôn*; par. *dʕgan-šāmayim* “the grain of heaven” in v 24; cf. Psa 105:40; Wis 16:20; John 6:31).

The thesis of K. Budde (ZAW 39 [1921]: 38f.) that *ʔēpôd* may frequently be a late replacement for *ʔabbîr* “bull image” is unconvincing. H. Torczyner’s rebuttal (ZAW 39 [1921]: 296–300) overreaches the mark, however, by entirely denying the root any application to “horse” or to “bull” (cf. also W. Caspari, “Hebr. *abîr* als dynamistischer Ausdruck,” ZS 6 [1928]: 71–75).

The LXX translations of *ʔabbîr* in Job 24:22 and 34:20 with *adynatos* “powerless” (in Job an additional 4x for the orthographically similar *ʔebyôn* “poor”), as well as in Psa

76:6 with *asynetos* “without understanding” (cf. Isa 46:12), in each case in the context of divine intervention, are noteworthy. Does the LXX attempt a theological correction which argues that before God even the mighty are weak?

4. The divine name  $\text{ʔ}b\hat{r} ya^c q\bar{o}b$  (Gen 49:24; Isa 49:26; 60:16; Psa 132:2, 5) or  $\text{ʔ}b\hat{r} y\acute{i}sr\bar{a} \text{ʔ}el$  (Isa 1:24; cf. Wildberger, *Isa 1–12*, CC, 68) “the strength of Jacob/Israel,” which used to be commonly translated “bull of Jacob/Israel,” was recognized by A. Alt (“God of the Fathers,” *EOTHR* 1–77, esp. 25ff.) as an epithet for the God of the fathers. In Gen 49:24 it parallels “shepherd of Israel” and “God of your father” (cf. V. Maag, “Der Hirte Israels,” *SThU* 28 [1958]: 2–28, with a thorough presentation of the God-of-the-fathers concepts; an altogether different approach, J. Hoftijzer, *Die Verheissungen an die drei Erzväter* [1956], esp. 95f.). It is generally supposed that the differentiation in the nom. paradigm ( $\text{ʔ}ab\hat{r}$  in contrast to  $\text{ʔ}abb\hat{r}$ ) may have transpired secondarily. But according to Meyer 2:30, the distinction could simply be a grammatical phenomenon (*qattīl* occasionally evolves into *qātīl* in the cs. st.; 1 Sam 21:8 txt?; cf. LXX and *BH* 3). The unusual distribution of occurrences has not yet been thoroughly explained.

5. The psalm inserted at Sir 51:12 (Hebr.) mentions the “strength of Jacob” once more (cf. A. A. Di Lella, *Hebrew Text of Sirach* [1966], 101f.); corresponding formulations do not occur in the texts available from Qumran and in the NT.

H. H. Schmid

## אבל $\text{ʔ}bl$ to mourn

S 56; BDB 5a; *HALOT* 1:6b; *TDOT* 1:44–48; *TWOT* 6; *NIDOTTE* 61

1. The root  $\text{ʔ}bl$  occurs in NWSem. and in Akk., although only NWSem. has the meaning “to mourn”; Akk. does not apply the physical aspect (*abālu* “to wither”) to the psychological one, as Hebr. seems to do.

Since G. R. Driver (FS Gaster 73–82), the meaning “wither” is also increasingly recognized for the Hebr. (*HAL* 7a lists eight texts in contrast to three in KBL 6b); a division of the root into  $\text{ʔ}bl$  I “to mourn” and  $\text{ʔ}bl$  II “to wither” is certainly unnecessary (J. Scharbert, *Der Schmerz im AT* [1955], 47–58; E. Kutsch, *ThStud* 78 [1965]: 35f.); see 3a.

A relationship to Arab. *ʔabbana* (so according to Th. Nöldeke, *ZDMG* 40 [1886]: 724; the lexicons) is hardly likely; this word has a rather different sphere of meaning (cf.

Scharbert, op. cit. 48n.95; Wehr 2a: “to celebrate, praise, eulogize [a deceased person]”).

Another root *ʔbl* (a by-form of *ybl*) occurs in some place-names formed with *ʔābēl* “watercourse” (*HAL* 7; explained in a folk etymology in Gen 50:11 by means of *ʔbl* “to mourn”). It is uncertain to which root *qrt ablm*, the city of the moon god, belongs (*KTU* 1.18.I.30, IV.8; 1.19.IV.1, 3).

It is unnecessary to assume a further root *ʔbl* “to shut” (GB 5b: a denominative from the Akk. *abullu* > Aram. *ʔabûlāʔ* “gate”; *HAL* 7a) for Ezek 31:15 (see 3a).

In addition to the (intrans.) verb, derivatives include the verbal adj. *ʔābēl* “sad” and the subst. *ʔēbel* “mourning,” as well as *tēbēl* “terra firma,” which is to be understood against the basic meaning “wither” (perhaps a loanword from Akk. *tābalu* “[dry] land,” *GAG* §56k; cf. Zimmer 43; Driver, op. cit. 73).

2. Statistics: qal 18x (apart from Job 14:22 only in prophetic texts), hitp. 19x (primarily in narrative texts), hi. 2x; *ʔābēl* 8x, *ʔēbel* 24x, *tēbēl* 36x (only in poetical texts, often par. to → *ʔereš* “land”).

3. (a) The meaning of *ʔbl* in the qal cannot be reduced to a single Eng. equivalent but ranges from “to be dry” and “to be ruined, lie disconsolate,” etc., to “to mourn” (Kutsch, op. cit. 36, construed “to be diminished” as the governing concept).

Subjs. include earth/land, field, meadowland, vineyard, Judah (Isa 24:4; 33:9; Jer 4:28; 12:4, 11; 14:2; 23:10; Hos 4:3; Joel 1:10; Amos 1:2), wine (Isa 24:7; here and in the preceding texts, the translation “to dry, dry up, lay waste” seems appropriate, if one does not take them as metaphors), gates (Isa 3:26), souls (Job 14:22), and persons (Isa 19:8; Hos 10:5; Joel 1:9; Amos 8:8; 9:5; in these passages it should likely be translated “to mourn”).

Par. terms are: *ʔumlal* (pulal of *ʔml*) “to wilt, dry up, wither away” (Isa 19:8; 24:4, 7; 33:9; Jer 14:2; Hos 4:3; Joel 1:10), *yābēš* “to dry up” (Jer 12:4; 23:10; Joel 1:10; Amos 1:2), *nābēl* “to wither, fall apart” (Isa 24:4), *šāmam* “to devastate” (Jer 12:11; cf. Lam 1:4), *qdr* “to become dark, gloomy; to mourn” (Jer 4:28; 14:2), *ʔnh* “to lament” (Isa 3:26; 19:8), *ʔnh* “to sigh, moan” (Isa 24:7). *ʔbl* with verbs describing dryness need not be limited to nature, nor with verbs of moaning is it limited to people (cf. Isa 19:8 with *ʔbl*, *ʔnh*, and *ʔumlal* with per. subjs.).

On Job 14:22 cf. Scharbert, op. cit. 56–58; Horst, BK 16, 214.

The two hi. usages (Ezek 31:15; Lam 2:8) should be translated “cause to mourn” (on Ezek 31:15, see Zimmerli, *Ezek*, Herm, 2:145, 152).

For verbs of complaint, groaning, moaning, sighing → *šʿq* “to cry”; for antonyms → *nḥm* “to console,” → *šmḥ* “to be happy.”

The same lack of distinction between physical and psychological conditions may also be observed with respect to *ʾumlal* “to wilt, disappear” (*HAL* 61a) and *šmm* “to be devastated, ruined, frightened, troubled” (N. Lohfink, *VT* 12 [1962]: 267–75).

(b) The semantic content of the hitp. can be rather fully conveyed with “to mourn.” In contrast to the purely circumstantial qal, it denotes “to behave [consciously; in 2 Sam 14:2, fictitiously] as *ʾābēl*.”

*ʾbl* can refer to mourning for the dead (Gen 37:34; 1 Sam 6:19; 2 Sam 13:37; 14:2[bis]; 19:2; 1 Chron 7:22; 2 Chron 35:24), for a serious mishap or for the sins of those closely associated (1 Sam 15:35; 16:1; Ezra 10:6; Neh 1:4). *ʾbl* hitp. can also refer to oneself (Ezek 7:12, the context suggests the meaning “to be angry”) or to one’s own improper conduct (Exod 33:4; Num 14:39; Neh 8:9, which approaches the meaning “to regret”). Dan 10:2 refers to asceticism in preparation for the reception of revelation (Montgomery, *Dan*, ICC, 406f.; cf. the development of Syr. *ʾabilā* “sorrowful” and “ascetic, monk” as a loanword also in Mand. [MG xxix] and in Arab. [Fraenkel 270]). Ezekiel announces a time of mourning in a verdict (Ezek 7:27); an apocalyptically colored view of the world describes the present with *ʾbl* hitp. (Isa 66:10; the antonym is eschatological joy, *šš*).

*ʾābēl* “sorrowful” exhibits similar usages (death: Gen 37:35; Psa 35:14; Job 29:25; misfortune: Esth 4:3; 9:22; the sorrow of the end time: Isa 57:18; 61:2f.); in Lam 1:4 the predicate adj. corresponds to the qal.

Similarly, *ʾēbel* “mourning” applies, for the most part, to mourning for the dead (Gen 47:21; 50:10f.; Deut 34:8; 2 Sam 11:27; 14:2; 19:3; Jer 6:26; 16:7; Ezek 24:17; Amos 5:16; 8:10; Eccl 7:2, 4; Lam 5:15; in general: Mic 1:8; Job 30:31; Esth 4:3; 9:22; a transformation of eschatological sorrow into happiness: Isa 60:20; 61:3; Jer 31:13).

In the hitp. *ʾbl* expresses sorrow primarily in definite behaviors (crying, mourning clothes, laments, abstention, etc.; cf. Gen 37:34; Exod 33:4; 2 Sam 14:2; 19:2; Dan 10:2; Ezra 10:6; Neh 1:4; 8:9; 2 Chron 35:24; cf. *BHH* 3:2021ff. with bibliog.; E. Kutsch, “‘Trauerbräuche’ und ‘Selbstminderungsriten’ im AT,” *ThStud* 78 [1965]: 25–42), without, however, requiring that one define the basic meaning of *ʾbl* in terms of external mourning customs (so KBL 6a and V. Maag, *Text, Wortschatz und Begriffswelt des Buches Amos* [1951], 115–17; G. Rinaldi, *Bib* 40 [1959]: 267f.).

On the distinction among *qdr* “to be dark, dirty, sorrowful” (somewhat more narrowly L. Delekat, *VT* 14 [1964]: 55f.), *ʾgm/ʿgm* “to be sorrowful” (Isa 19:10; Job

30:25), and *spd* “to lament” (originally “to smite the breast in lament”; see Kutsch, op. cit. 38f.), see Scharbert, op. cit. 58–62.

4. The lament for the dead has no religious significance in Israel because any form of the cult of the dead is excluded from Israelite worship (cf. von Rad, *Theol.* 1:276ff.; V. Maag, *SThU* 34 [1964]: 17ff.); accordingly *ʔbl* hitp. has no religious significance, except in relation to self-abasement before God (Exod 33:4; Num 14:39; Dan 10:2; Ezra 10:6; Neh 1:4; 8:9; cf. Kutsch, op. cit. 28f., 36; → *ʕnh* II). In contrast, the qal usage and the related semantic field belong to a motif common in prophecy that is primarily at home in the announcement of judgment (Isa 3:26; 19:8; Hos 4:3; Amos 8:8). In Jer the generally recognized formal transition from announcement of judgment to description of catastrophe is clear (Jer 4:28; 12:4, 11; 14:2; 23:10). Finally, in apocalypticism the motif characterizes eschatological terror (Joel 1:9f.; Isa 24:4, 7; 33:9). Amos 1:2 may give the origin of the motif (see M. Weiss, *TZ* 23 [1967]: 1–25). Judgment, with its effects on nature and people, is a consequence of Yahweh’s theophany (allusions to the theophany also in Amos 9:5; Isa 33:9).

As a par. to Amos 1:2, Weiss (op. cit., 19) cites the words of the dog in a Mid. Assy. fox fable (*BWL* 192f., 334): “I am mighty in strength, . . . a voracious lion . . . before my horrible voice mountains and rivers dry up (*abālu* Gtn).”

5. OT mourning customs are presupposed in the NT, but Jesus negates their significance for humanity (Matt 8:21f.). The apocalyptic concept that the end time is characterized by “mourning” is significant (Matt 24:30, etc.). The beatitude in Matt 5:4 alludes to Isa 61:2. Cf. G. Stählin, “κοπετός,” *TDNT* 3:830–60; R. Bultmann, “πένθος,” *TDNT* 6:40–43.

אֶבֶן } *eben* **stone** → שׁוּר *šûr*

אֲדֹנָי *ʔādôn* **lord**

S 113; BDB 10b; *HALOT* 1:12b; *TDOT* 1:59–72; *TWOT* 27b; *NIDOTTE* 123

מָרַע *mārēʔ* (Aram.) **lord**

S 4756; BDB 1101b; HAL 5:1740a; TWOT 2839; NIDOTTE 10437

I. The word *ʾādôn* “lord,” of undetermined origin, is limited to the Can. language family. The other Sem. languages have various designations for “lord”: Akk. *bēlu*, Aram. *mārē*, Arab. *rabb*, Eth. *ʾegzi*.

HAL 12b catalogs various still uncertain attempts at etymology (even more extensive suggestions in F. Zimmermann, VT 12 [1962]: 194). According to BL 16, 253 *ʾādōnay* may be a non-Sem. loanword with a secondarily derived sg. *ʾādôn*. Derivation from Ug. *ad* “father” (→ *ʾāb* III/1) is also purely hypothetical; a basic meaning “father” for *ʾādôn* (KBL 10b, speculatively) is unattested, even though a father may be addressed respectfully as “lord” (KTU 1.24.33; Gen 31:35; see III/3); according to KTU 2.14.18f., Ug. *adn* could as easily signify “brother.”

Ug. also attests a fem. *adt* “lady” (WUS no. 86). PNs from Amarna, Mari, Ugarit, etc., which are significant for the vocalization and derivation of the forms, are cataloged and discussed (inconclusively) in Huffmon 156, 159 and Gröndahl 88–90.

Phoen.-Pun. *ʾdn* “lord” is frequent (DISO 5; PNs: Harris 74); the fem. *ʾdt* “lady” exists here too (once also in a Palm. inscription, likely as a Canaanitism; cf. M. Noth, OLZ 40 [1937]: 345f.). On the basis of this evidence O. Eissfeldt (OLZ 41 [1938]: 489) suspects a miswritten fem. par. to *ʾādôn* in Jer 22:18 behind *hōdō* (contra Rudolph, HAT 12, 142; M. Dahood, CBQ 23 [1961]: 462–64).

In extrabibl. Hebr. *ʾdny* “my lord” is common in the Lachish Letters (KAI nos. 192–97 passim; ANET 322); cf. also *ʾdny hśr* “my lord, the governor” in the Yavneh-Yam ostrakon (KAI no. 200.1).

The form *ʾādōnāy*, reserved as a designation for Yahweh, is usually understood as a fixed vocative form of the majestic pl. with a per. suf. in (affect-stressed) pause, “my lords = my lord = the lord” (extensive treatment in W. W. Baudissin, *Kyrios* [1929], 2:27ff.), although the grammatical analysis of the ending *-āy* is disputed.

II. The various forms of *ʾādôn* (incl. *ʾādōnay* “my lords” Gen 19:2) and the divine designation *ʾādōnāy* (incl. Gen 19:18) are listed separately in the statistics. Mandl. overlooks 2 Sam 7:22, reflecting the Bombergiana ed.; Lis. omits Ezek 14:20.

Concentrations of  $\text{ʔādôn}$  (Gen, Sam, Kgs) are topically influenced; concentrations of  $\text{ʔādōnāy}$  (Ezek, Amos) are redactionally determined.

Bibl. Aram.  $\text{mārē}$  “lord” is attested in Dan 4x.

III. 1. As a term of social order,  $\text{ʔādôn}$  in its basic meaning “lord,

master (over subject persons)“ is defined in opposition to terms such as *ʿebed* “servant” (cf. esp. Gen 24:9, 65; Exod 21:4–8; Deut 23:16; Judg 3:25; 1 Sam 25:10; Isa 24:2; Mal 1:6; Psa 123:2; Job 3:19; Prov. 30:10; with *naʿar* “servant,” Judg 19:11; 1 Sam 20:38, etc.; with *ʾāmâ* or *šiphâ* “maid,” 1 Sam 25:25, 27f., 41, etc.), which almost always occur or are implied in context; correspondingly, the word occurs almost exclusively with a succeeding gen. or pron. suf. (a circumlocution for the relationship by means of *le* in Gen 45:8, 9; 1 Kgs 22:17 = 1 Chron 18:16; Psa 12:5; 105:21; by means of special verbal expressions in Isa 19:4; 26:13; an abs. *ʾādôn* occurs only in the formulaic laments for the dead in Jer 22:18; 34:5, as well as perhaps 10x as a description of Yahweh; see IV/2, 4). *ʾādôn* distinguishes itself in this manner very clearly from → *baʿal* “lord, owner (of a thing)“ (the wife also counts as property with reference to *baʿal* in the meaning “husband”).

F. Baethgen’s statement (in *Beiträge zur sem. Religionsgeschichte* [1888], 41, cited in *TDNT* 3:1053), “The master in relation to the slave is בעל as the owner of the slave and אדון as the one who can dispose of this possession as he wills”), is therefore not entirely accurate, because the OT does not use *baʿal* in reference to an *ʿebed*.

Ug. contrasts *adn* and *bʿl* less distinctly; cf. *bʿly* “my Lord” in the address to the king in epistolary style (*WUS* no. 544, 3\*) corresponding to the Akk. formula; cf. also the poetical parallelism *bʿlkm/adnkm* in *KTU* 1.2.I.17, 33f., and 1.6.6.57f. “Nqmd, king of Ugarit, *adn* of *Yrgbbʿl* of *Trmn*. “

*gʿbîr* “lord, master” occurs infrequently as a synonym for *ʾādôn* (Gen 27:29, 37 in contrast to *ʾabādîm* “servants” in v 37); the fem. *gʿbîrâ* “lady, mistress” (in contrast to *šiphâ* “maidservant,” Gen 16:4, 8f.; Isa 24:2; Psa 123:2; Prov 30:23; alongside *naʿarâ* “maiden,” 2 Kgs 5:3; → *gbr* 3e) is more common.

2. *ʾādôn* appears only once in the sense of authority over impersonal spheres: 1 Kgs 16:24 *ʾādônê hāhār* “(Shemer,) the (former) owner of the mountain (Samaria).” Reference to the placement of a lord over the house of Pharaoh (Gen 45:8) or over the land of Egypt (Gen 42:30, 33; 45:9; Isa 19:4; Psa 105:21) indicates nothing other than elevation over the constituents of the house or country in question.

Of the Ug. texts, those cited above (III/1) with *adn Yrgb* should be mentioned; in the Phoen. oath from Arslan Tash (7th cent.) the reading in l. 15 suggested by W. F. Albright (*BASOR* 76 [1939]: 8), which has been taken up in *KAI* (no. 27), *bʿlpn ʿs* “lord

of the surface of the earth,” is preferable over the reading [ *ʔdn ʔrʂ* “lord of the earth” (T. H. Gaster, *Or* 11 [1942]: 44, 61; *HAL* 12b; cf. *ANET* 658b).

3. As in numerous languages (e.g., Med. Lat. “senior” followed by Ger. “Herr,” originally a comparative form of “hehr” = “old, honorable”; cf. Kluge 305a; Fr. “monsieur” with a fixed usage of the pron.; Eng. “sir” < “sire”; “mister” < “master”), the word is used in address and declaration not only to reflect an actual lord-servant relationship (very frequently, e.g., in the courtly *ʔādōnîhammelek* “my lord, the king”), but also as a polite form for other persons whom one wishes to honor with this designation (L. Köhler, *ZAW* 36 [1916]: 27; 40 [1922]: 39ff.; Lande 28ff., 81); the subordinating self-designation *ʕebed* “slave” corresponds to this usage. Thus the following may be addressed as *ʔādōn*: the father (Gen 31:35, Rachel’s address to Laban), the brother (Gen 32:5f., 19; 33:8ff., Jacob-Esau; Exod 32:22; Num 12:11, Aaron-Moses), the uncle (2 Sam 13:32f., Jonabad-David), the spouse (Gen 18:12, Sarah-Abraham; Judg 19:26f., concubine-Levite; Amos 4:1, the “cows of Bashan”; Psa 45:12, the royal bridegroom), as well as total strangers (e.g., on the lips of women: Gen 24:18, Rebekah-servant of Isaac; Judg 4:18, Jael-Sisera; Ruth 2:13, Ruth-Boaz), or those who are actually of equal or lower social status (1 Kgs 18:7, 13, Obadiah-Elijah; 20:4, 9, Ahab-Benhadad; 2 Kgs 8:12, Hazael-Elisha). The transition from “you/your” to “my lord” (e.g., Num 32:25, 27) occurs just as easily as the role change from “I/my” to “your servant” (e.g., 1 Sam 22:15). *ʔādōnî* “my lord” (cf. Fr. “monsieur”) is often used in a fixed form instead of “our lord” by a group of people (Gen 23:6; 42:10; 43:20; Num 32:25, 27; 36:2; 2 Sam 4:8; 15:15; 2 Kgs 2:19).

On the formula *bî ʔādōnî* or *bî ʔādōnāy* “with your permission, lord” (7x and 5x, resp.), see L. Köhler, *ZAW* 36 (1916): 26f.; Lande 16–19; *HAL* 117.

IV. 1. (a) The usage of *ʔādōn* and *ʔādōnāy* in reference to Yahweh (W. W. Baudissin, *Kyrios* [1929], vols. 1–4; Quell, *TDNT* 3:1058ff.; Eichrodt 1:203f.; O. Eissfeldt, *RGG* 1:97) is closely tied to profane practice, because it was used by Israel or individuals or groups in Israel to address Yahweh as the superior, as lord, or to speak of him as the lord in analogy to earthly (actual or fictional) servant-lord relationships, just as it was used by neighboring religious communities to address their prominent divinities; so too was Israel, terminologically at least since Deutero-Isa, described as the servant of Yahweh (W. Zimmerli, *TDNT* 5:662; → *ʕbd*). (b) This usage is relatively rare and atypical. By contrast, frequent and formulaic is (c) the vocative and (d) the formulaic usage as a divine epithet, which develops, in accordance with the uniqueness of this lord, into (e) an absolutely suitable ontological description (lord par excellence, lord of all), and finally even

replaces the divine name.

2.  $\text{ʾādôn}$  occurs in a statement with the per. suf. (“his lord”) only in the prophetic verdict against Ephraim in Hos 12:15, “Therefore, his Lord will leave his bloodguilt upon him,” where the full force of the word probably underscores the paradox of disobedience; Neh 3:5 is similar: “Their leaders, nevertheless, did not bend the necks to the service of their Lord.” Cf. further Isa 51:22 “your Lord” in a positive use of the full sense, par. to “who pleads the cause of his people.”

In contrast, statements with “our Lord” (Psa 135:5; 147:5; Neh 8:10; 10:30) should probably be regarded as late variations of the formulaic usage of  $\text{ʾādôn}$  as a divine epithet or as a replacement for the divine name. Mal 1:6 “Am I Lord? Where is the fear of me?” does not represent an actual divine designation, but a comparison with an earthly (father or) lord, in which the meaning of the word has become thematic. In Mal 3:1 “the Lord, whom you seek,” the use of  $\text{hāʾādôn}$  is determined through juxtaposition with the messenger who precedes this Lord, although, as in 1:6, the abs. usage for Yahweh that was known at the time may be reflected.

3.  $\text{ʾādōnāy}$  “my Lord” is already attested early in address. In contrast to e.g., *melek* “king,” the word does not serve as a description of the being of God as the sovereign Lord or as the mighty master, but as a simple honorific used by the subordinate in conversation with any superior (Eichrodt 1:203; contra Köhler, *Theol.* 30, who evaluates the meaning of  $\text{ʾādôn}$  in the text that is paradigmatic for him, Psa 105:21, with too great an emphasis on the par. but not synonymous *mōšēl* “master”; cf. also Baudissin, op. cit. 2:246). This usage also occurs in texts that will not be listed individually here (concentrated e.g., in the prayer of David, 2 Sam 7:18–22, 28f., 7x  $\text{ʾādōnāy yhw̄h}$ , otherwise absent in Sam), certainly incl. the old and textually unquestionable formulae  $\text{bī ʾādōnāy}$  “with permission, Lord” (Exod 4:10, 13; Josh 7:8; Judg 6:15; 13:8; cf. Judg 6:13  $\text{bī ʾādōnî}$ ) and  $\text{ʾhāh ʾādōnāy yhw̄h}$  “Ah! My Lord Yahweh” (Josh 7:7; Judg 6:22; also 8x in Jer and Ezek; →  $\text{ʾhāh}$ ; cf. also the usage of  $\text{ʾādōnî}$  with respect to angels in Josh 5:14; Zech 1:9; 4:4f., 13; 6:4; Dan 10:16, 17[bis], 19; 12:8).

The group address “Yahweh, our Lord” is limited to Psa 8:2, 10 and seems to approximate the predication of Yahweh treated in the next section.

4. The abs. usage of  $\text{ʾādôn}$  also appears very early as a formulaic divine epithet. The meaning of the word here too does not at first exceed what has been treated so far, as e.g., in the ceremonious title  $\text{hāʾādôn yhw̄h}$  ( $\text{ʾēlōhē yisrāʾēl}$ ) “the Lord Yahweh (the God of Israel)” in the pilgrimage legislation (Exod 23:17 and 34:23) and also in the formula  $\text{hāʾādôn yhw̄h}$

$\text{š}^{\text{e}}\text{bā}^{\text{a}}\text{ōt}$  used several times by Isa, which probably stems from Jerusalem tradition (Isa 1:24; 3:1; 10:16, 33; 19:4; cf. Wildberger, *Isa 1–12*, CC, 66–68).

In Phoen.-Pun. inscriptions the epithet  $\text{dn}$  “lord” is attested for numerous divinities and occurs frequently (Baudissin, op. cit. 3:52ff.; *DISO* 5, with a list of the pertinent divinities). The transition from title to PN can be recognized in PNs (cf.  $\text{š}^{\text{m}}\text{mn}^{\text{a}}\text{dn}/\text{dn}^{\text{a}}\text{š}^{\text{m}}\text{mn}$  “Eshmun is Lord” with  $\text{dn}^{\text{a}}\text{p}^{\text{l}}\text{t}$  “Adn has saved”) and esp. with respect to the dying and rising vegetation divinity Adonis from Byblos (W. W. Baudissin, *Adonis und Esmun* [1911]; Eissfeldt, *RGG* 1:97f.; G. von Lücken, “Kult und Abkunft des Adonis,” *FF* 36 [1962]: 240–45).

In view of the wide distribution of such epithets in the ancient Near East (Eg. *nb*, Sum. EN, Akk. *bēlu*, Aram. *mr*<sup>?</sup>, Hitt. *išha-*), the title  $\text{ādōn}$  for Yahweh requires no special derivation; nevertheless one can speculate that the Jerusalem cult tradition, to which the specified formulas apparently belong, has been influenced by Can. idiom (cf. also PNs formed with  $\text{ādōn}$ , e.g.,  $\text{ādōn}^{\text{a}}\text{īyāhū}$ ,  $\text{ādōn}^{\text{a}}\text{īšedeq}$ ,  $\text{ādōn}^{\text{a}}\text{īqām}$ ,  $\text{ādōn}^{\text{a}}\text{īrām}$ , with their Ug. and Phoen. counterparts; see I; *IP* 114ff.).

The age of the expression  $\text{ādōnāy yhwh}$ , other than in address, e.g., “the Lord Yahweh” with a nom. usage of the fixed vocative, is disputed. Contrary to the viewpoint represented by Baudissin (*Kyrios* 1:558ff.; 2:81ff.), that  $\text{ādōnāy}$  has been secondarily added to or substituted for *yhwh* in each instance, the nom. usage may be quite old according to Eissfeldt (*RGG* 1:97); according to F. Baumgärtel (“Zu den Gottesnamen in den Büchern Jer und Ezek,” *FS Rudolph* 1–29) formulae such as *kōh āmar*  $\text{ādōnāy yhwh}$  and *n<sup>e</sup>um*  $\text{ādōnāy yhwh}$  are original in Jer and Ezek (with J. Herrmann, *FS Kittel* 70ff., contra Baudissin); cf. also the extensive treatment in Zimmerli, *Ezek*, Herm, 2:556–62.

Many texts, incl. the oldest, remain textually disputed (on Amos cf. V. Maag, *Text, Wortschatz und Begriffswelt des Buches Amos* [1951], 118f.; and Wolff, *Amos*, Herm, 101, 130; on 1 Kgs 2:26, cf. comms.).

In particular, it is not always clear why some authors (or redactors) prefer the expression  $\text{ādōnāy yhwh}$ . Baumgärtel (op. cit. 27ff.) assumes that Ezek (217x) avoids the divine designation *yhwh š<sup>e</sup>bā<sup>a</sup>ōt* (associated with the ark in the temple on Mt. Zion and still common in Jer) in the exilic situation and replaces it with  $\text{ādōnāy yhwh}$  in connection with an old cult name.

5. The association of  $\text{ādōn}$  with an accompanying gen. describing the universal sphere of sovereignty mediates the transition from a divine epithet to an essential designation that is also absolutely applicable:  $\text{ādōnāy}$  in the sense of “Lord par excellence” or “Lord of all.” Such escalating

hyperbolic usages are also known in the Bab. repertoire of titles for gods (e.g., *bēl bēlē* “the Lord of lords”; cf. Tallqvist 40–57) and even for kings (in addition to *bēl bēlē*, e.g., also *bēl šarrāni* “the lord of kings,” *bēl gimri* and *bēl kiššati* “the Lord of all”; cf. Seux 55–57, 90f.), and are therefore not per se witness to a purely monotheistic belief in God. The Hebr. OT uses the expressions “God of gods and Lord of lords” (Deut 10:17; Psa 136:2f.) and *ʾādôn kol-hāʾāreṣ* “Lord of the whole earth” (Josh 3:11, 13; Mic 4:13; Zech 4:14; 6:5; Psa 97:5; 114:7 txt em, see Kraus, *Psa*, CC, 2:371, 375; a segment of this text may still be pre-exilic; cf. Noth, *HAT* 7, 25; H.-M. Lutz, *Jahwe, Jerusalem und die Völker* [1968], 94, 96; following Kraus, *Psa*, CC, 1:83, the expression apparently “derived from the cultic tradition of the old Jebusite city”).

*mārēʿ*, the Bibl. Aram. equivalent of *ʾādôn*, occurs 2x in the vocative *mārî* “my Lord” addressed to the king (Dan 4:16, 21) and 2x with an accompanying gen. in reference to God: Dan 2:47, *mārēʿ malkîn* “Lord of kings” and 5:23, *mārēʿ-šʿmayyāʿ* “Lord of heaven.” For pars. in Aram. inscriptions (a title for kings and gods) cf. Baudissin, *Kyrios* 3:57–61; *DISO* 166f. (on Phoen. *ʾdn mlkm* and Aram. *mrʿ mlkn* “the lord of kings” cf. K. Gallig, “Eschmunazar und der Herr der Könige,” *ZDPV* 79 [1963]: 140–51). 1QapGen has noticeably multiplied the number of these expressions (with the spelling *mrh*); see Fitzmyer, *Gen.Ap.* 77, 83f., 99, 130, 242.

The originality of the texts with freestanding *ʾādōnāy* “the Lord” not addressed to a second party is in doubt (about 70x, principally in Isa, Psa, and Lam: 1 Kgs 3:10, 15; 22:6; 2 Kgs 7:6; 19:23; Isa 3:17f.; 4:4; 6:1, 8; 7:14, 20, etc.; Ezek 18:25, 29; 21:14; 33:17, 20; Amos 5:16; 7:7f.; 9:1; Mic 1:2; Zech 9:4; Mal 1:12, 14; Psa 2:4; 22:31; 37:13; 54:6, etc.; Job 28:28; Lam 1:14f.; 2:1, etc.; Dan 1:2; 9:3, 9; Ezra 10:3, where, however, one should read *ʾādōnî* and regard it as a reference to Ezra; Neh 4:8). Nevertheless, the MT presumes the exclusive meaning “the Lord *katʿ exochēn*.” *ʾādōnāy* completely loses its original vocative character, becoming clearly paraphrastic, in a trend toward the avoidance of the name Yahweh beginning in the 3rd cent. BCE (Bousset-Gressmann 307ff.), which may also be observed in the Qumran texts (M. Delcor, *Les Hymnes de Qumran* [1962], 195; cf. in the context of an address, 1QH 2:20, etc., with Isa 12:1; Psa 86:12; 1QH 7:28 with Exod 15:11; outside of an address, 1QM 12:8 with Psa 99:9; 1QSb 3:1 with Num 6:26), and which finally leads to the Qere perpetuum *ʾādōnāy* for the tetragrammaton (→ *yhwh*).

V. On the usage of *ʾādôn* or *kyrios* in early Judaism and in the NT, cf. W. Foerster, “κύριος,” *TDNT* 3:1081–98; K. H. Rengstorf, “δεσπότης,” *TDNT* 2:44–49; K. G. Kuhn, “μαρναθά,” *TDNT* 4:466–72; as well as bibliogs. in NT theologies and in treatments of the dominical

titles.

## אֲדַר *ʾaddîr* **powerful**

S 117; BDB 12a; *HALOT* 1:13b; *TDOT* 1:73–74; *TWOT* 28b; *NIDOTTE* 129

1. The root *ʾdr* “to be powerful, mighty, majestic” is limited to Can. (Ug.: *UT* no. 92; *WUS* no. 95; Gröndahl no. 90; Phoen.-Pun.: *DISO* 5f.; Harris 74f.).

The qal, “to be mighty,” and the pi., “to make mighty, magnify,” are attested only in Phoen. (*DISO* 5); the ni. ptcp. “majestic” (Exod 15:6, 11) and the hi. “to show oneself majestic” (Isa 42:21) occur only in Hebr.

The adj. *ʾaddîr* “mighty, powerful, majestic, leading” is the most important derivative. It occurs relatively frequently in Ug. and Phoen.-Pun., even in everyday speech (e.g., Ug. *attadrt* in the list *KTU* 4.102.4, 7, 9, 16, 18, according to *UT* no. 92 “upper-class wife”; cf. A. van Selms, *Marriage and Family Life in Ug. Literature* [1954], 19f., 58f.; Pun. *KAI* no. 65.2 = no. 81.5: “from the largest to the smallest of them [the buildings]”; the root *gdl* “to be large” is lacking in Phoen.-Pun.); in Hebr. it seems rather to be an archaic or archaizing word, judging from nom. formation and usage (Gulkowitsch 95).

The fem. form *ʾadderet* (< \**ʾaddirt* -, BL 479) is either an abstract “glory” (Ezek 17:8; Zech 11:3) or in the concrete meaning “coat” (cf. H. W. Hönig, *Die Bekleidung des Hebräers* [1957], 66ff.). A basic meaning “be broad” (GB 12a), to which “glory” and “coat” may be traced, is not demonstrable; rather, if *ʾadderet* “coat” belongs to the root *ʾdr*, the constant attribute may be used representatively for the thing (“the glorious” < “the glorious [article of clothing]).”

The subst. *ʾeder* “splendor(?)” (Zech 11:13; Mic 2:8 txt em *ʾadderet* “coat?”) is exegetically and textually quite disputed; cf. comms. and G. W. Ahlström, *VT* 17 (1967): 1–7.

The PN *ʾadrammek* (2 Kgs 19:37 = Isa 37:38) has a counterpart in Phoen. (*ʾdrmlk* = “*Mlk* is mighty”; Harris 75). In 2 Kgs 17:31 the homophonous divine name, however, has developed from Akk. *adadmilki* (“Adad [is] king”) (Eissfeldt, *KS* [1966], 3:335–39; K. Deller, *Or* 34 [1965]: 382f.).

2. Aside from *ʿadderet* in the meaning “coat” (10x), the distribution of the word family is almost entirely limited to poetical texts: ni. 2x, hi. 1x (for the texts, see above); *ʿaddîr* 27x, besides Exod 15:10 (Song of the Sea) and Judg 5:13, 25 (Song of Deborah), 13x in metrical prophetic texts, and 7x in the Psalter; in prose only 1 Sam 4:8 (on the lips of the Philistines) and Neh 3:5; 10:30; 2 Chron 23:20 (in the meaning “nobles”); *ʿadderet* “splendor” 2x (prophetic texts, see above). Incl. *ʿeder* (2x) the root is attested 44x.

Cf. further Sir 36:7 (hi.); 43:11 and 49:13 (ni.); 40:13; 46:17; 50:16 (*ʿaddîr*); on the Qumran texts cf. Kuhn, *Konk.* 2f.; also GCDS 5, 117.

3. Power, might, and splendor are attributed (as in Ug. and Phoen.) both to impersonal things (bodies of water: Exod 15:10; Psa 93:4a; cf. Ug. *gšm adr* “heavy rain” in *KTU* 2.38.14; trees: Isa 10:34 txt? [cf. M. Dahood, *Bib* 38 (1957): 65f.]; Ezek 17:8, 23; Zech 11:2; ship: Isa 33:21b; cf. Phoen. *ʿršt dgn hʿdrt* “the splendid cornfields,” *KAI* no. 14.19; cf. *ANET* 662b, “the mighty lands of Dagon”) and to persons (kings: Psa 136:18; cf. Phoen., *KAI* no. 24.5f. = *ANET* 654b, among others; rulers: Jer 30:21; lords of the flocks = shepherds: Jer 25:34–36; leaders: Judg 5:13, 25; Jer 14:3; Nah 2:6; 3:18; Psa 16:3; Neh 3:5; 10:30; 2 Chron 23:20; Ezek 32:18 txt?; Ug. *WUS* no. 92:2\*b; Neo-Pun. *KAI* no. 119.4 and no. 126.7: “the mighty of Leptis and the entire people of Leptis,” corresponding to Lat. *ordo et populus*).

The Neh texts cited and the inscriptions exhibit the concept as a socially undifferentiated personal designation, perhaps in the sense “magnates” (E. Meyer, *Die Entstehung des Judentums* [1896], 132f.). Consequently, it serves in 2 Chron 23:20 as a general replacement for the specific and misunderstood *kārî* “Carites” of 2 Kgs 11:19.

Semantically related terms that occur in the context of *ʿdr* include: *gādôl* “great” (Psa 136:18; cf. Isa 42:21), *mōšēl* “ruler” (Jer 30:21; 2 Chron 23:20), *gibbôr* “hero” (Judg 5:13); cf. also Psa 76:5. The antonym *šāʿîr* “small, insignificant, young” (Jer 14:3 “servant”; cf. S. E. Loewenstamm, *Tarbiz* 36 [1966–67]: 110–15), which also occurs in the Pun. inscriptions mentioned above (1), is informative as well.

4. Like *gādôl* “great” (→ *gd*) and other adjs. that express an attitude of awe toward the powerful, *ʿaddîr* without complement also refers to God and the divine (W. W. Baudissin, *Kyrios* [1929], 3:85f., 120).

In Ug. (*KTU* 1.92.7 *adrt* apparently of Astarte) and esp. in Phoen.-Pun., *ʿdr* and the fem. *ʿdr t* are fixed epithets for various divinities: Phoen. *bʿl ʿdr*, *KAI* no. 9B.5 (Byblos ca. 500 BCE); *ʿskn ʿdr*, *KAI* no. 58 (Piraeus, 3d cent. BCE); Isis/Astarte, *KAI* no. 48.2 (Memphis 2d–1st cent. BCE); Pun. (and Neo-Pun.) Astarte, *tnt* and *bʿl ʿdr*

(DISO 5f.; KAI 2:11, 89; J.-G. Février, *Semit* 2 [1949]: 21–28; A. Berthier and R. Charlier, *Le sanctuaire punique d'El Hofra Constantine* [1955], 14, 237).

Because the text and interpretation of Isa 10:34 (see 3) and 33:21a are very questionable, the only texts that remain with a theological usage of *ʿaddîr* or *ʿdr* ni./hi. are Exod 15:6, “Your laws Yahweh, majestic in might”; v 11, “Who is like you, glorious in holiness?”; 1 Sam 4:8, “Who will save us from the hand of this mighty God?”; Isa 42:21, “It pleased God for the sake of his faithfulness, to magnify his law and make it glorious”; Psa 8:2, 10, “Yahweh, our Lord, how mighty is your name in the whole earth”; 76:5, “Frightful are you, glorious”; and 93:4, “Mightier than the thunders of many waters, mightier than the waves of the sea, the Lord on high is mighty.”

Statements concerning Yahweh’s laws, name, instruction, or being do not exhibit formulaic usage. Noteworthy are the comparative-superlative usages in Exod 15:11 and Psa 93:4. A special theological nuance of the word (the Eng. tr. “mighty” or “majestic” is preferable in these cases) is not evident, nor, in view of the degrees of comparison, to be assumed.

Given the Can. background of the word, it is surely no accident that, in reference to Yahweh, it is particularly at home in the older, Can.-influenced Jerusalem tradition (1 Sam 4:8 in the ark narrative; Psa 76:5 in a pre-exilic Zion hymn [cf. H.-M. Lutz, *Jahwe, Jerusalem und die Völker* (1968), 167f.]; 93:4 in a similarly ancient enthronement psalm [cf. Kraus, *Psa*, CC, 2:233ff.]; cf. also the tripartite verses in Exod 15:11 and Psa 93:4 with the climactic parallelism also known from Ug.).

5. Of the numerous options for *ʿaddîr* in the LXX, *thaumastos* (6x in Psa) and *megas* (→ *gdl*) should be esp. emphasized.

The Near Eastern-Hellenistic divine predication *megas* “great” (W. Grundmann, “μέγας,” *TDNT* 4:529–44), which appears in the acclamation formula for Artemis of the Ephesians (Acts 19:27f., 34f.) and which is also echoed in Titus 2:13, “of our great God and of (the) Savior Jesus Christ,” does not correspond to Sem. *gādôl* but reflects Phoen. *ʿdr*, in addition to Aram. *rab* (Akk. *rabû*, Phoen. has only *rbt* “lady” as a title).

E. Jenni

אָדָם *ʿādām* **person**

S 120; BDB 9a; HALOT 1:14a; TDOT 1:75–87; TWOT 25; NIDOTTE 132

אָנוֹשׁ *ʿnôš* **person**

S 582; BDB 60b; HALOT 1:70b; TDOT 1:345–48; TWOT 113a; NIDOTTE 632

1. (a)  $\text{ʔādām}$  “person, people” occurs only in Can. (Hebr. and postbibl. literature, Phoen.-Pun., and Ug.) and occasionally in SSem. (HAL 14a).

Ug. *adm* “people” occurs once par. to *lim* (= Hebr.  $\text{לְעָוֹם}$  “people”) in the Baal cycle (KTU 1.3.II.7f.) and in the expression *ab adm* “the father of humanity” in the Krt epic (→  $\text{ʔāb}$  IV/3a).

The Phoen.-Pun. pl.  $\text{ʔdmm}$  is formed on  $\text{ʔdm}$ , as well (DISO 4).

Old SArab.  $\text{ʔdm}$  has the meaning “servant” (Conti Rossini 100b).

On the Mid. Hebr. form  $\text{ʔādān}$  cf. E. Y. Kutscher, FS Baumgartner 160.

The etymology of the word has not yet been conclusively determined (cf. lexicons, and comms. on Gen 2:7; esp. also Th. C. Vriezen, *Onderzoek naar de Paradijsvoorstelling bij de oude semietische Volken* [1937], 63f., 129–32, 239).

Vriezen (op. cit.) summarizes the attempts to derive the word from the Sum. or Bab.-Assyr., as well as the attempts to explain the figure of Adam on the basis of divine names or mythical figures (as bringer of culture in analogy to Adapa, following de Liagre Böhl), and finds them inconclusive. Because these attempts (cf. also GB 10a; KBL 12f.) do not enjoy wide acceptance or are entirely rejected, they will not be recounted here.

Vriezen asks, then, concerning the relation of  $\text{ʔādām}$  to  $\text{ʔādāmā}$  (cf. Gen 2:7 with a typical Hebr. play on words) whether this is merely a folk etymology or, indeed, an original linguistic relationship. The answers given to date on this question differ; although the linguistic derivation of  $\text{ʔādām}$  from  $\text{ʔādāmā}$  appears to Köhler and others to be certain (*Theol.* 243n.60; 246n.102), Th. Nöldeke (*ARW* 8 [1905]: 161) and others reckon that the two words have nothing to do with each other linguistically. Vriezen concludes that the word is to be explained either from the Hebr. alone (in which case the verb  $\text{ʔdm}$  “to be red” would be pertinent) or from various Arab. options. To him H. Bauer’s (*ZDMG* 71 [1917]: 413; *ZA* 37 [1927]: 310f.) derivation from Arab.  $\text{ʔadam(at)}$  “skin, surface,” is the most likely, which may have assumed the meaning “man” in SArab. and Hebr. as a pars pro toto, while in Arab. the old meaning is preserved. Then a connection between  $\text{ʔādām}$  and  $\text{ʔādāmā}$  “surface of the earth” is possible, but in a different way than the author of Gen 2–3 presupposes. Cf. also →  $\text{ʔādāmā}$  1.

The Arab. meaning “skin, leather,” which has been mentioned, is also accepted by G. R. Driver (*JTS* 39 [1938]: 161; HAL 14b; cf. *CPT* 154) for Hos 11:4 (par. to  $\text{ʔahʔbā}$ , for which the meaning “leather” is also postulated, →  $\text{ʔhb}$  I), but cannot be considered certain (cf. Wolff, *Hos*, Herm, 199f.; Rudolf, *KAT* 13/1, 210).

(b) In addition to  $\text{ʔādām}$ , the word  $\text{ʔnōš}$ , which goes back to a common Sem. root, occurs rather rarely in Hebr.; in Bibl. Aram.  $\text{ʔnāš}$  is the normal word for “person(s)” (< \* $\text{ʔunāš}$ ; cf. Wagner nos. 19f.; P. Fronzaroli, *AANLR* 8/19 [1964]: 244, 262, 275; →  $\text{ʔš}$  I).

2. (a) The word occurs 554x in the OT (incl. Hos 6:7; 11:4; 13:2; excl., however, the PN Adam in Gen 4:25; 5:1[bis], 3–5; 1 Chron 1:1). The distribution is noteworthy. It occurs in Ezek 132x (93 in God’s address to the prophet: *ben-ʔādām*). The next highest concentration may be found in two places: 49x in Eccl and 46x in Gen 1–11 (by contrast, it does not occur at all in Gen 12–50, apart from Gen 16:12 *pereʔ ʔādām*). A second lesser concentration is noticeable only in Prov (45x) and Psa (62x); otherwise, the distribution is entirely coincidental (Jer 30x, Isa and Job 27x, Num 24x, Lev 15x, Exod 14x, and the other books under 10x; absent in Obad, Nah, Ruth, Song Sol, Esth, and Ezra).

(b)  $\text{ʔnōš}$  occurs 42x but only in poetical texts (Job 18x, Psa 13x, Isa 8x; also Deut 32:26; Jer 20:10; 2 Chron 14:10, a prayer, is no exception). In addition,  $\text{ʔnōš}$  occurs as a PN in Gen 4:26; 5:6–11; 1 Chron 1:1.

Aram.  $\text{ʔnāš}$  appears 25x (Dan 23x, Ezra 2x; the form  $\text{ʔnāšā}$  should be read instead of the Hebr. pl.  $\text{ʔnāšīm}$  in Dan 4:14), either collectively/generally or individualized in the usage *bar ʔnāš* (Dan 7:13; cf. C. Colpe, *TDNT* 8:402ff. with bibliog.) or in the pl. *bēnē ʔnāšā* (Dan 2:38; 5:21), in both poetry and prose.

3. (a)  $\text{ʔādām}$  signifies collectively “the person (generically), humanity, people” and is used (in contrast to →  $\text{ʔš}$  “man”) only in the sg. and in the abs. st., never with sufs. The “individual man” is indicated by *ben-ʔādām*, the pl. “individual men” by *bēnē/bēnôt (hā)ʔādām* (cf. L. Köhler, *TZ* 1 [1945]: 77f.; id., *Theol.* 129f.; → *bēn*). The meaning of the word is consistent throughout the OT. It can be used in combinations such as “human blood” (Gen 9:6; according to KBL 12b perhaps 40 such phrases), as a gen. replacing an adj. “in human fashion” (2 Sam 7:14; Hos 11:4), and in commonplace usages where it can be translated “someone” (Lev 1:2, etc.), “all” (Psa 64:10), negated “no one” (1 Kgs 8:46; Neh 2:12; see also 4j).

Only *mēʔādām (wē)ʔad-bēhēmâ* “the people and the cattle” (Gen 6:7; 7:23; Exod 9:25; 12:12; Num 3:13; Jer 50:3; 51:62; Psa 135:8) occurs as a fixed usage. Other sequences with *bēhēmâ* “cattle, animals” are Exod 8:13f.; 9:9f., 19, 22, 25; 13:2, 15; Lev 7:21; 27:28; Num 8:17; 18:15(bis); 31:11, 26, 30, 47; Jer 7:20; 21:6; 27:5; 31:27; 32:43; 33:10, 12; 36:29; Ezek 14:13, 17, 19, 21; 25:13; 29:8; 36:11; Jonah 3:7f.; Zeph 1:3; Hag 1:11; Zech 2:8; Psa 36:7; cf. Eccl 3:19.

The most common par. is →  $\text{ʔš}$  (III/4c) (2 Kgs 7:10; Isa 2:9; 5:15; 52:14; Psa

49:3; 62:10; with <sup>א</sup>*nāšîm* Isa 2:11, 17, etc.).

(b) <sup>ע</sup>*nôš* never takes the art. and occurs only in the sg. It is a collective term in a stricter sense than <sup>א</sup>*ādām* and therefore signifies “the people” or “people” exclusively; once it is individualized: *ben-<sup>ע</sup>nôš* (Psa 144:3). L. Köhler’s characterization of it as “falling into disuse” (KBL 68a) may be putting it too strongly, because it still occurs 18x in the late book of Job. One may well say, however, that it is strongly limited in usage: only in poetical texts, only without the art., and only in a very narrow semantic field. In this respect, one may presuppose the same limitations of usage that characterize the term <sup>א</sup>*ādām* (see 4a): the word <sup>ע</sup>*nôš* also never occurs in historical texts or in historical or salvation-historical contexts.

The sense of the human being as mortal, frail, and limited predominate in Job and Psa: Psa 103:15, “the days of man are like the grass”; similarly, 73:5; 90:3; 8:5 = 144:3; Job 7:1; 14:19; 25:6; 28:13. A human being cannot be just (pure) before God: Job 4:17; 9:2; 15:14; 25:4; 33:26. Humans in contrast to God are <sup>ע</sup>*nôš*: Job 7:17; 10:4f.; 13:9; 32:8; 33:12; 36:25. A few texts also describe enemies in the same way: Psa 9:20f.; 10:18; 56:2; 66:12; cf. 55:14. Psa 9:21 demonstrates this connection: “the pagans should recognize that they are men.” Beyond Psa and Job, Isa uses the same meaning 6x (Isa 13:7, 12; 24:6; 33:8; 51:7, 12; in addition, 2 Chron 14:10). Thus 33 of 42 texts constitute a cohesive semantic group (see also 4e-h).

Deut 32:26; Isa 8:1; 56:2; Jer 20:10; Psa 55:14; 104:15(bis); Job 5:17; and 28:4 differ from the usage treated to this point. These few exceptions involve fixed idioms or tight word combinations: <sup>א</sup>*šrê* <sup>ע</sup>*nôš* “blessed is the man” (Isa 56:2; Job 5:17); *l<sup>ב</sup>bab* <sup>ע</sup>*nôš* “the heart of man” (Isa 13:7; Psa 104:15[bis]); *ḥeret* <sup>ע</sup>*nôš* “a man’s (= in common use among men) stylus” (Isa 8:1; cf., however, Wildberger, *Isa 1–12*, CC, 330–32); <sup>ע</sup>*nôš* <sup>ש</sup>*lômî* “my confidant” (Jer 20:10; cf. Psa 55:14 <sup>ע</sup>*nôš* *k<sup>ע</sup>erkî* “a man like me”). If <sup>ע</sup>*nôš* retains the neutral meaning in these combinations, it seems to point to an older stage of the language in which <sup>ע</sup>*nôš* still had a broader, more general usage. Except for these combinations, the neutral meaning occurs only in Deut 32:26 and Job 28:4; *mē<sup>ע</sup>nôš* “(from) among the people” may be a fixed usage here.

Texts in which <sup>ע</sup>*nôš* is a PN are to be attributed to this common, neutral sense (Gen 4:26; 5:6f., 9–11; 1 Chron 1:1; cf. Westermann, *Gen*, CC, 1:339, on Gen 4:26; see 4j).

4. (a) The OT does not use <sup>א</sup>*ādām* for the creature Homo sapiens without differentiation, but primarily for this creature in relation to its creatureliness or to a particular aspect of its creatureliness. <sup>א</sup>*ādām* is not

the human being in any family, political, everyday, or communal situation; instead *ʾādām* refers to the human being aside from all of these relationships, as simply human. Above all else, however, God's special salvific activity, God's history with his people, does not concern the *ʾādām*. Not only the two literary complexes in which *ʾādām* occurs most frequently (Gen 1–11 and Eccl), but also the topically cohesive groups of usages concern the human being as creature or an aspect of human creatureliness; no fixed literary or thematic complexes or speech forms in historical or prophetic books feature *ʾādām*.

(b) The word *ʾādām* has its proper place in the primeval history, indeed, in those portions of Gen 1–11 that concern humanity in the primeval events: the creation of humanity (1:26–30 and 2:4b–24), the expulsion from paradise (ch. 3), the flood (chs. 6–9), and the dispersal of humanity (11:1–10). Beyond these narratives the word occurs only in 4:1 (*hāʾādām*), 25, and 5:1(bis); here, however, *ʾādām* has become (or is on the way to becoming) a PN. The concentration of occurrences in the primeval history and their limitation to these texts indicates that in the OT *ʾādām* signifies humanity (in a collective sense) *before* and *beyond* any specification that begins in the names of the genealogies, and before any division of humanity into peoples, which begins in Gen 11 (the table of nations). Narratives that treat humanity in this sense divide into two basic motifs: they treat (c) the creation of humanity and (d) the finitude of human existence in the narratives of guilt and punishment. They result in the two basic statements that the OT makes concerning humanity: a human being is God's creation and has a limited existence in contrast to God.

(c) The narratives of the creation of humanity (cf. E. Lussier, "Adam in Gen 1:1–4:24," *CBQ* 18 [1956]: 137–39) are found in Gen 1:26–30 and 2:4b–24.

The religiohistorical background of the creation narratives indicates that the creation of the world and the creation of humanity originally represented individual streams of tradition. It has been demonstrated, for example, that in primitive cultures creation almost always occurs as the creation of humanity only, and that, to the contrary, in Egypt creation is predominantly the creation of the world, i.e., cosmogony. The cosmogony that predominates in high cultures has, then, assimilated the creation of humanity; thus the two are bound together in *Enuma Elish* and Gen 1. By contrast, Gen 2 belongs in the tradition of the creation of humanity. It is therefore incorrect to speak of two creation narratives, an older (chs. 2–3) and a younger (ch. 1); rather, one can consider 1:26–30 as a par. only to ch. 2, not to 1:1–2:4a. Tradition-historical exegesis of ch. 1 demonstrates the original independence of 1:26–30 even more clearly (Westermann, *Gen*, CC, 1:143ff.).

Gen 2–3 is a literarily unified narrative inserted by J, behind which, however, two originally independent narratives may still be unmistakably recognized: a narrative of

the creation of humanity in 2:4b–24 and a narrative of the expulsion from the garden in 2:9, 16f., 25; 3:1–24. The first belongs to the motif of the creation of humanity, the second explains human finitude. By joining them, J expressed the interrelationship of these two basic motifs.

The two depictions of the creation of humanity in Gen 1:26–30 and 2:4b–24 agree that: (1) a human being has existence from God, (2) a human being should be understood from the outset as a communal being, (3) the provision of humanity with nourishment is tied to its creation, and (4) humanity is charged with dominion over the animals and the other creatures. In addition to these, P has the unique statements that (5) God has blessed humanity and (6) has created them after his likeness (→ *šelem*).

(1) Neither of these depictions actually means that God created the first people. The creation of humanity is, rather, a statement concerning primeval history; it lies beyond history that can be experienced and documented. The contention is that humanity (meaning every individual) owes its existence to God—no more and no less. The man created by God first becomes Adam (PN) when the series of families begins (4:1, 25; 5:1); the man fashioned in the creation narratives is not one in a definite series. Thus the narrative of the creation of humanity maintains that humanity is nothing other than God’s creation; it is not possible to separate humanity as such from its creatureliness. Humanity is what it is, as God’s creation.

(2) The creation of humanity for community is concisely stated in Gen 1:26–30: “as man and woman created he them.” This characteristic is the point of the narrative in 2:4b–24: the man formed by God from the earth (2:7) is not yet the creation that God actually intended (“it is not good . . .” 2:18); only with the creation of the woman is the creation of humanity actually successful. J therefore has esp. emphasized this aspect of the creation of humanity, namely that one receives one’s individuality only in community (cf. *ILC* 1–2:61f.).

(3) According to both portrayals, humanity is first provided with vegetable nourishment (1:29; 2:8f., 15); animal nourishment is added only in the context of alienation from God. All the texts, particularly in the Psa, that say that God provides his creatures with nourishment belong to this motif.

(4) In contrast, particularly to the Sum.-Bab. portrayal of the creation of humanity, J and P do not describe humanity as created for the service of the gods, i.e., for the cult, but for dominion over the animals (Gen 1:26b, 28b; 2:19f.) and the remaining creatures (1:28), and for tilling the soil (2:15; cf. 2:5b). Agricultural activity, activity on the earth, is grounded therefore in, or together with, the creation of humanity itself. This cultural task is not separable from human existence.

(5) P expressly reports the blessing of humanity in the context of its creation (1:28). What P describes, J narrates: the power of fertility intended in the blessing manifests itself in the sequence of generations, in the begetting and birth of descendants (4:1f., 25). The human created by God is created as a being that reproduces itself in successive generations.

(6) Scholars have offered a multitude of explanations concerning the statement that God created in his image; cf. Westermann, *Gen*, CC, 1:142ff. On the basis of religiohistorical backgrounds, Westermann interprets this statement as follows: God created humanity as his partner so that creature and creator may interrelate, so that the creature may hear its creator and respond. This more precise definition has an explicative character; it does not expand the notion of the creation of humanity but instead emphasizes the meaning of the creatureliness of humanity (so also e.g., K. Barth, *Church Dogmatics* [1958], III/1:184f.). Even though J does not state this specifically, J expresses the intention through the combination of the creation narrative itself, 2:4b–24, with the narrative of the transgression of the commandment and the expulsion from the garden: God made humanity in order to relate to it.

(d) The narratives of guilt and punishment form a second group. Narratives of the creation of humanity or statements concerning its creatureliness are regularly accompanied by narratives and statements concerning the limitations of humanity. The two are bound together in contrast: Why is a human being, who is indeed a creation of God, so very limited in existence? Answers to this question may vary; in the OT—as elsewhere—the explanation is seen in a crime of humanity.

The narrative of the expulsion from the garden in Gen 3 focuses on the bare events: God places the people he created in an orchard and grants them the fruits of all the trees for nourishment; he forbids them to eat from the fruit of only one tree; but the people eat the fruit of this tree and are therefore banished from the garden. Thus they are alienated from God, and this alienation from God signifies an existence limited in many ways. This central element is woven together with and enriched by a series of other motifs, which belong to other once-independent narratives from the same narrative complex; such is, above all, the tree of life motif, which is also known elsewhere (e.g., the Gilgamesh Epic and the Adapa Myth), and the individual punishments that explicate the limitations on existence, and perhaps also the temptation scene with the serpent. J's intention in this narrative concerning people can be summarized as follows: (1) Not only the creatureliness but also the limitations on human existence are grounded in a primal event between God and humanity. (2) The transgression of God's commandment and the punishment for this transgression are primal events allowed to stand as enigmas, as inexplicable. Guilt and punishment define humanity; all human existence participates in these realities. (3) God affirms the humanity that has sinned against him. Even when he excludes these humans from his presence, and so ordains an existence limited by toil, pain, and death, he allows them to live and provides for the continuation of life.

Only these three statements together represent the narrative's intentions. An exegesis that describes an elysian state of innocence transformed through the fall into a degenerate state does not reflect the text and the sense of the narrative. In the narrative, commandment, transgression, and punishment alike are primal events and may not be equated with historical periods. The designation "fall," which introduces this slightly different nuance (with far-reaching consequences, however) into the exegesis of the narrative, stems from early Judaism (4 Ezra).

The possibility of human failure inherent in the primal event gains an added dimension in the flood narrative in Gen 6–9. While ch. 3 (and 4) treats the transgression of an individual human, chs. 6–9 deal with a human phenomenon that can destroy or ruin a group, an entire human community. The possibility that the creator may again destroy his creation first arises here. This possibility is already implicit in the fact that the world or humanity has a creator: as such, the creator has the power to destroy his work again. For this reason, narratives of the flood (or of the cataclysm) are as equally distributed in the world as creation narratives. The paradigm beginning time–end time is established here: the potential for the destruction of the human race corresponds to the possibility of its ruin. Consequently, the concern in apocalypticism, as in cosmogony, is humanity.

Gen 6–9 contribute the following to an understanding of humanity: (1) Self-propagating humanity faces the possibility of ruin en masse. (2) The creator has the option of destroying the humanity that he has created. (3) The flood and the salvation of the individual from the flood add to human life the dimension of life as a result of salvation or protection from great catastrophes. (4) The promise that the cataclysm would not be repeated "as long as the earth stands" is the basis of human history, which includes the possibilities of the (partial) ruin of an entire group and (partial) catastrophes. This promise means that salvation and protection are also human phenomena.

The narrative of the construction of the tower (11:1–9) depicts a transgression that is particularly dangerous for humanity—human self-elevation in the realms of politics (city and tower) and of technical progress (which as such is affirmed). This gracious punishment, dispersal, and alienation once again permit life.

(e) A series of texts refer to the creation of humanity or allude to creation motifs, e.g., Deut 4:32, "from that day onward, when God created men in the earth"; or Exod 4:11; Isa 17:7; 45:12; Jer 27:5; Zech 12:1; Psa 8:5ff.; 139:13ff.; Job 15:7; 20:4; Prov 8:31 (wisdom at the creation: "and delighting in the sons of men"); also Psa 115:16 (God gave the earth to humanity); Deut 32:8 (an allusion to the division of the nations).

Statements that value humans as creatures who must be preserved or protected also relate closely to the creatureliness of humanity. Human life is protected because humans are God's creatures (Gen 9:5f.). This view is taken up in the law: "Whoever slays a man . . ." (Lev 24:17, 21).

To the extent that the rationale for this respect in Gen 9:6 is humanity's creation in God's image, the inception of the modern concept of

human dignity may be said to manifest itself; such respect rests in human creatureliness and is evident in that the life of humans as God's creatures is protected. A concept of human dignity also stands behind statements such as Hab 1:14, "if he (the conqueror) treats men like the fish in the sea." The notion is evident in the fact that "man does not live by bread alone" (Deut 8:9), or in the lament, "I, however, am a worm and no man" (Psa 22:7), and is particularly prominent in the Servant Song, Isa 52:14, "his appearance was marred beyond human semblance." 2 Sam 7:14 and Hos 11:4 also speak similarly of humanity.

This value is not inherent in humanity; it lies in God's care for humanity: "What is man (<sup>e</sup>*nôš*), that you consider him, and the son of man (*ben-ʾādām*) that you care for him?" (Psa 8:5). A number of texts speak in this manner of God's preservation of humanity: he is the "guardian of men" (Job 7:20); in such protection and preservation he works "his wonders for the children of men" (Psa 107:8, 15, 21, 31; in addition, Psa 36:7f.; 80:18; etc).

(f) The OT sees humanity's true nature particularly in its existence in relation to God, in its distance from him, and in its dependence upon him. This group of usages of *ʾādām* (perhaps 60 texts) has a specific emphasis. The OT's understanding of humanity does not begin with an independent humanity grounded in its own existence that then enters into relationship with God; rather, *ʾādām* signifies a human being in relationship to God. Humanity, as such, cannot be understood unless its existence is seen in juxtaposition to God.

The juxtaposition of God and humanity, which this group of texts sees primarily as a contrast, corresponds consistently to human creatureliness as presented in the primeval history. The limitation inherent in this contrast is definitive of human existence, and its neglect or disregard presents a particular danger to human existence: "No one remains alive who sees me" (Exod 33:20).

This notion receives an esp. pregnant and unique treatment in Isa in a word against political alliance with Egypt: "Even Egypt is a man and not God" (Isa 31:3). Isa 31:8 uses the word again in a similar sense: "Asshur will fall by the sword, not of man; the sword, not of man, will consume it." The statement in Isa 31:3 is taken up by Ezekiel in the address to the prince of Tyre (Ezek 28:2, 9). It is noteworthy that both texts in Isa expand the schema of the prophetic word beyond the extant speech forms as a means for the prophet to express something unique to his message. The actual foundation of the warning against the alliance with Egypt in Isa 31:1–3 is the announcement of the destruction of the "guardian" in v 3b. Isa expands this foundation through the reference to the finitude of all human power, a given of human existence. The same notion stands behind Isa 31:8: Asshur will be destroyed but not by a human sword (e.g., Egypt's); only the nonhuman, the creator, who is also the Lord of history, is at work here. The statement "Egypt is man and not God" is therefore a statement grounded in the

createdness of humanity; it is independent of God's special history with Israel.

The refrain in Isa 2:9, 11, 17; 5:15 belongs in the same context: "So man is humbled and men are brought low" (or something to that effect). Wildberger (*Isa 1–12*, CC, 110f.) correctly points out that this statement of the demise of the mighty is not actually a prophetic saying: "Without a doubt, Isaiah is quoting a wisdom saying, which he puts in the form of an impf. cons. in v. 9, but he also uses it in its original form in 2:17." He refers to the same parallelism of *יֵשׁ* and *אָדָם* in Prov 12:14; 19:22; 24:30; 30:2; Psa 49:3: "In such sayings, bowing down and being brought low are seen as the consequences of prideful arrogance" (cf. also Jer 10:14; 51:17). When Isa announces "the day" that comes upon all the proud and haughty and in which Yahweh alone will be mighty (Isa 2:12–17), and when he includes a wisdom saying that juxtaposes humanity and God, he indicates an important contact between prophetic and wisdom speech: the extension of the announcement of judgment, which is properly valid in Israel only for "man and men," is defined by the contrast God-human, which prevents any overstepping of the boundary.

The same contrast occurs elsewhere as well: "God is not man (*יֵשׁ*) that he should lie; he is not a son of man (*ben - אָדָם*) that he should repent" (Num 23:19; cf. 1 Sam 15:29). Such statements guard against subsuming God into the human sphere; similarly Mal 3:8 "can a man ever deceive God?" Such statements also indicate that the preservation of the boundary between God and humanity does not result in an ontic determination. Abstract statements are not made concerning the being of God or that of humanity. The distinction remains a contrast in phenomena and is never a contrast of existence. For this reason statements that express a different mode of being for God and humanity are entirely absent. The contrast is decisively significant when a person confronts the decision concerning whom to trust and when trust in God is contrasted in great detail with trust in a human being: Jer 17:5; Mic 5:8; Psa 36:8; 118:8; 146:3; "for the help of man is nothing" (Psa 60:13; 108:13); an individual would much rather fall into the hands of God than into the hands of a human being (2 Sam 24:14 = 1 Chron 21:13); if one trusts in God, one need not fear people (Isa 51:12).

The contrast is also evident in that the manufacture of idols is stringently combated: idols are works of human hands (2 Kgs 19:18 = Isa 37:19; Psa 115:4; 135:15; Jer 16:20 "how can a man make gods for himself"; cf. Isa 44:11, 13).

The over 90 occurrences of God's address to the prophet Ezekiel, "you, son of man," belong in the same context. Cf. Zimmerli, *Ezek*, Herm, 1:131: "The emphasis, however, does not lie on the note of individuality, but on the אָדָם, to which the unexpressed counterpart is אֱל (Is 31:3; Ezek 28:2)." Thus this address implies the same juxtaposition of God and humanity as in Isa 31:3 and 2:11, 17, with the exception that here the prophet himself, in his bare, finite

creatureliness, is contrasted with God.

(g) The creation of humanity establishes that human and animal alike are living creatures. In J the creation of the animals stands in closest relationship to that of people (Gen 2:7, 18–24); in P animals and people receive the blessing of the creator (1:22, 28). Similarly, animals and people appear together in the flood (6:3; 7:23). Human-animal solidarity is expressed in the only apparently firm idiom formed with *ʾādām: mēʾādām ʿad b<sup>h</sup>ēmâ* “the people as well as the cattle” (see 3).

Many other contexts mention people and animals together without the formula: in reference to the redemption of the firstborn of humans and cattle (Exod 12:12; 13:2, 13, 15; Num 3:13; 8:17; 18:15), in reference to war booty (Num 31:11, 26, 35, 40, 46; Josh 11:14), and in reference to the cultic offering of war booty (Num 31:28, 30, 47). As in creation, so in destruction, people and animals are often mentioned together, as in the Egyptian plagues (Exod 8:13f.; 9:9f., 19, 22, 25; 12:12; Psa 135:8); people and animals are destroyed in the fall of Babylon (Jer 50:3). Complete destruction often includes people and animals (Jer 36:29, “and devastate this land and destroy man and animal in it”; also Jer 7:20; 21:6; 27:5f.; 50:3; 51:62; Ezek 14:13, 17, 19, 21; 25:13; 29:8; 38:20; Zeph 1:3; Hag 1:11; people alone, Zech 11:6). People and animals are affected in the confession in the context of the announcement of destruction in Jonah 3:7f.; they also appear together in Habakkuk’s accusation against the conquerors (Hab 2:8, 17). It is noteworthy that announcements of the destruction of people and animals first occur in the Egyptian plagues and then for the first time again in the prophets from Jer onward. Animals and people are also often mentioned together in the context of the promise for the time after judgment: Ezek 36:11, “I will make men and cattle numerous for you”; so also Jer 31:27; Zech 2:8; 8:10 (people alone: Jer 51:14; Ezek 36:10, 12, 37f.; Mic 2:12).

(h) People share transience with animals; Qohelet says so once expressly: “For the fate of the children of man is the same as the fate of the animal” (Eccl 3:19; cf. Psa 49:13). This transience, too, is grounded in the primal event (Gen 3:19, 24), as is human imperfection or wickedness (in the narratives of guilt and punishment), often associated with human frailty.

Statements such as Num 16:29 simply declare this frailty: “If these die as all men die, if they encounter what all men encounter” (similarly Ezek 31:14; Psa 73:5; 82:7; cf. also Judg 16:7, 11, 17). Discussion of the transience of humanity has its particular place in the lament of transience, a developed “I- (we-) lament” (Psa 39:6, 12, “man is only a breath”; 49:13, 21; 62:10; 89:48; 90:3; 144:4; Job 14:1, 10; 25:6; 34:15; Isa 2:22). This lament of transience is particularly well developed in Job, above all in 14:1–12. Here too one may not claim that the word “human” is characteristic of the lament per se; rather, *ʾādām* occurs only in expanded forms that extrapolate the particular lament of the sufferer so that the sufferer views the self in his/ her particular suffering as one who participates in the transience

of all humanity.

This insignificance or frailty stands in close relationship to human imperfection or wickedness in Gen 1–11, in Job 14:1–12 (v 4, “How can a clean thing come from an unclean? Impossible!”), and correspondingly in Psa 90:7–9 (cf. Num 5:6, “Sin as men commit it”). This situation accounts for the remarkable fact that the individual lament psalms in general (and at other points) speak of the enemies, the fools, only as “men” (Psa 140:2, “Save me, Yahweh, from the evil men”; similarly often: Psa 12:2, 9; 57:5; 116:11; 119:134; 124:2; Job 20:29; 27:13; 33:17; 34:30; often in proverbs; cf. Prov 6:12; 11:7; 12:3; 15:20; 17:18; 19:3; 21:20; 23:28; 24:30; 28:17; proverbs discussing the wise or cunning person mention *ʾādām* much less often; cf. Prov 12:23, 27; 16:9; 19:11, 22; 28:2; cf. Job 35:8).

(i) The book of Eccl radicalizes discussion of the transience or frailty of humanity in that it is not simply stated or lamented; rather, discussion results from reflection concerned, in an attitude of fundamental curiosity (Eccl 1:13), with human existence (2:3). Qohelet also proceeds from the primary event; human frailty stands in tension with human createdness, and at this point guilt enters the discussion: 7:29, “This I have discovered, that God created people upright; they, however, seek many devices”; cf. 9:3. Through such an understanding of humans as creatures, Qohelet preserves a connection with theology despite his skepticism (cf. 3:11; 7:29; 8:17).

The main points of his concept of humanity are: (1) the radical recognition of the nothingness of humanity, its existence-until-death. In its frailty humanity resembles the animals (3:18f., 21). One sees human essence more clearly in the house of mourning than in the banquet hall (7:2). Existence-until-death is sharpened because death has the character of a surprise attack (8:8; 9:12). (2) What then is the meaning of this existence that rushes toward death? Whatever one accomplishes in one’s life of work or study one must abandon again (1:3, “What does man profit from all his effort at which he toils under the sun?”; 2:12, 18, 21f.; 6:1f., 10–12; 7:14; 10:14; 12:5). Esp. in view of the effort, emptiness, and frailty of existence, the moment, the present, affirmation of that which simply is, acquires meaning (2:24, “There is nothing better for man than that he eat and drink and enjoy his work”; 3:13, 22; 5:18, “to accept his portion and to be happy”; 7:14; 8:15; 11:8). This affirmation of life’s joy and pleasures is repeatedly emphasized as an affirmation of God’s creation (2:24; 3:13; 5:18; 7:14; 8:15). Precisely in such affirmation of the moment, in the enjoyment of the good gifts of life, can one affirm one’s creator in the recognition of the limitation of one’s existence. (3) Qohelet’s understanding of humanity is demonstrated most clearly in 8:17, “Then I recognized that it is impossible for man to fathom the whole work of God, everything which

happens under the sun; for however man strives to understand, he does not fathom it.” Qohelet discovered that a complete knowledge of God is impossible for humanity, as is a knowledge of the totality of events. One must come to grips with this limitation: the finitude of human existence determines an understanding of existence and the knowledge of God. Only within these limits can human existence have meaning; only within these limits can reference to God be meaningful.

(j) In all of the usages treated to this point, a relationship to creatureliness and to that which it signifies has been recognizable, but the OT also knows a neutral usage that does not involve such a relationship; here the word is used as broadly and imprecisely as in our modern languages.

A group of declarative statements in Prov discusses the being and activity of humanity very generally; these sayings offer observations on humanity, e.g., Prov 20:27, “the human breath is a lamp of Yahweh” (similarly 27:19f.), or observations and experiences from social life that deal mostly with human behavior, e.g., 18:16, “gifts make room for a person”; see also 16:1; 19:22; 20:24f.; 24:9; 29:23, 25; cf. Isa 29:21; Psa 58:2; Job 5:7.

Very general, neutral statements concerning humanity also occur elsewhere, e.g., Psa 17:4, “the wages that one receives”; 1 Sam 16:7; 2 Sam 23:3; Isa 44:15; 58:5; Jer 47:2; Psa 104:23; Eccl 8:1; Lam 3:36, 39. Such generalized language may also then treat various aspects of God’s involvement with humanity: Job 34:11, “he requites them according to their work”; Ezek 20:11, 13, 21 “statutes and ordinances that a person should observe in order to remain alive” (cf. Neh 9:29); Amos 4:13, “who declares to a person what his thought is.” This small group is quite distinct from the other usages; it seems to prepare the way for something like a universal ethic that emerges from liturgical and salvation-historical structures.

*ʾādām* is a mere category of species in these usage groups that abstract the concept that a human is a creature, and as such is determined in many ways by creatureliness; e.g., clearly in Deut 20:19, “are then the trees of the field people?” (cf. also Ezek 19:3, 6; 36:13f.).

The group of texts in Ezek that compares what the prophet sees to a person involve the usage as a mere designation of species (Ezek 1:5, “they appeared like human figures”; also 1:8, 10, 26; 10:8, 14, 21; 41:19; cf. Isa 44:13; Dan 10:16, 18). Combinations such as “human hand” (Deut 4:28; etc.), “human voice” (Dan 8:16), “human excrement” (Ezek 4:12, 15), “human limbs” (1 Kgs 13:2; 2 Kgs 23:14, 20; Ezek 39:15), “human corpse” (Num 9:6f.; 19:11, 13f., 16; Jer 9:21; 33:5; Ezek 44:25), and “human body” (Exod 30:32) also fit here.

The many texts in which *ʾādām* stands for “someone” (negated “no one, nobody”), “many people,” “everyone,” or “with respect to, among, in the presence of people,” in enumerations (Mic 5:4; Jonah 4:11; 1 Chron

5:21), or in usages such as “blessed (*ʾašrê*) . . . the one who . . .” (Isa 56:2; Psa 32:2; 84:6, 13; Prov 3:13[bis]; 8:34; 28:14) are then also to be understood in terms of this usage as a mere designation of species. In each of these instances, *ʾādām* is used synonymously with → *ʾiś* (see 3).

(k) In conclusion, Hebr. *ʾādām* corresponds only partially to the word “man” or “human” in modern languages. *ʾādām* denotes neither “man” as exemplar nor primarily the individual; rather, it denotes the category, humanity as a whole, to which the individual belongs. Humanity is defined by its origin, its creatureliness (4b-e). Most usages deal directly or indirectly with creatureliness; one exists in contrast to God (4f), as a living being (4g), in the finitude inherent in creatureliness (4h-i). In addition, “people” can be discussed quite generally, as in modern languages (4j).

5. On the NT usage and understanding of humanity, cf., among others, J. Jeremias, “ἄνθρωπος,” *TDNT* 1:364–67; N. A. Dahl, “Mensch III,” *RGG* 4:863–67 (with bibliog.); W. Schmithals, “Mensch,” *BHH* 2:1189–91 (with bibliog.). Although the figure of Adam is given a distinct salvation-historical significance in the NT (esp. in Paul), this sense does not conform to the common usage of the word in the OT (cf. J. Jeremias, “Ἀδάμ,” *TDNT* 1:141–43; J. de Fraine, *Adam und seine Nachkommen* [1962], 129–41).

C. Westermann

## אָדָמָה *ʾādāmâ* ground

S 127; BDB 9b; *HALOT* 1:15a; *TDOT* 1:88–98; *TWOT* 25b; *NIDOTTE* 141

1. *ʾādāmâ* very likely belongs to the common Sem. root *ʾdm* “to be red” (in Aram. replaced by *šmq*) and also appears in the meaning “(red) field, earth, land” outside Hebr. in Neo-Pun. (the Maktar inscription, *KAI* no. 145.3, “for your people who dwell in the land”; *DISO* 5) and Aram. (Jew. Aram. and Syr. *ʾadamtā*?, perhaps already Old Aram. in *KAI* no. 222A.10, *ʾdm[h]* “farmland”; cf. *KAI* 2:239, 246; otherwise, Fitzmyer, *Sef.* 36).

On the etymology cf. Dalman, *AuS* 1:333; 2:26f.; Rost, *KC* 77; Galling, *BRL* 151; R. Gradwohl, *Die Farben im AT* (1963), 5f.; *HAL* 14f. Hertzberg’s position (*BHH* 1:464) that *ʾādōm* “earth tone” may derive from *ʾādāmâ* is somewhat less likely than the opposite development. BL 466 considers the possibility of a derivation of the color term

ʿādōm “flesh tone” from \*ʿadam “skin” (Arab. ʿadamat ), assuming “surface” to be the primary meaning of ʿādāmâ (cf. also → ʿādām I).

Acceptance of the meaning “earth” for some texts with ʿādām also merits consideration (M. Dahood, *CBQ* 25 [1963]: 123f.; *PNSP* 57f.; followed also partially by *HAL* 14b) but must nevertheless probably be rejected (in Gen 16:12, “wild ass of the steppe” instead of “wild horse of a man”; “steppe” stands in contrast to “farmland”; for Isa 29:19 and Jer 32:20 the translation is unnecessarily banal; in Prov 30:14 the parallelism to ʿereṣ is overvalued; additional hypotheses are necessary for the exegetically difficult texts Job 11:12; 36:28; Zech 9:1; 13:5).\*

2. The 225 occurrences, only once (Psa 49:12 “lands”) in the pl., are distributed over the entire OT, yet with a significant concentration in Gen (43x; 27x in the primeval history and 12x in Gen 47), Deut (37x), Ezek (28x), and Jer (18x).

Other occurrences are: Isa 16x, Amos 10x, Exod 9x, 1 Kgs 8x, Psa and 2 Chron 6x each, Num and 2 Sam 5x each, 2 Kgs and Neh 4x each, 1 Sam, Zech, and Dan 3x each, Lev, Josh, Joel, Zeph, Job, and Prov 2x each, Hos, Jonah, Hag, Mal, and 1 Chron 1x each.

This list includes ʿādāmâ in 1 Kgs 7:46 = 2 Chron 4:17 as an appellative, “earth,” not as a place-name (following Noth, BK 9, 164; cf. ʿādāmâ Josh 19:36; ʿādām Josh 3:16; ʿadmâ Gen 10:19; 14:2, 8; Deut 29:22; Hos 11:8; cf. *HAL* 14b, 15b), as well as Deut 32:43 (*HAL* 15b, following Tur-Sinai: “red blood”).

3. On the usage of the word in the OT, cf. L. Rost, “Die Bezeichnungen für Land und Volk im AT,” *FS Procksch* 125–48 = *KC* 76–101; A. Schwarzenbach, *Die geographische Terminologie im Hebr. des AT* (1954), 133–36, 174, 187, 200.

(a) In its basic meaning ʿādāmâ describes arable farmland, red (see 1) farmland (cf. von Rad, *Theol.* 1:25, 159), in contrast to the steppe and desert (*midbār*, ʿarābâ, yʿšimôn, šʿmāmâ; cf. B. Baentsch, *Die Wüste in den atl. Schriften* (1883); A. Haldar, *The Notion of the Desert in Sumero-Accadian and West Semitic Religions* (1950); Schwarzenbach, op. cit. 93–112; W. L. Reed, *IDB* 1:828f.)

Cain becomes a nomad when he is expelled from the ʿādāmâ (Gen 4:11, 14). It can be cultivated (→ ʿbd. Gen 2:5; 3:23; 4:12; 2 Sam 9:10; Isa 30:24; Jer 27:11; Prov 12:11; 28:19; cf. 1 Chron 27:26). The farmer is ʿōbēd hāʿādāmâ (Gen 4:2; Zech 13:5; cf. ʿš hāʿādāmâ Gen 9:20). Consequently, verbs of sowing (*zrʿ*: Gen 47:23; Isa 30:23) and of germination (*šmḥ*: Gen 2:9; Job 5:6; cf. Gen 19:25) belong in the domain of ʿādāmâ.

Only when the ʿādāmâ is irrigated is life possible (Gen 2:6); work on it must cease if rain ceases (Jer 14:4 txt?). Dew and rain fall on the ʿādāmâ (2

Sam 17:12; 1 Kgs 17:14; 18:1). Dung (Jer 8:2; 16:4; 25:33; Psa 83:11), fruit (Gen 4:3; Deut 7:13; 28:4, 11, 18, 42, 51; 30:9; Jer 7:20; Psa 105:35; Mal 3:11), firstfruits (Exod 23:19; 34:26; Deut 26:2, 10; Neh 10:36), harvest (Deut 11:17; Isa 30:23; cf. 1:7), and tithe (Neh 10:38) are mentioned in connection with it.

(b) In the material sense, <sup>ʾ</sup>*dāmâ* describes the “farmland”; the most common synonym is → <sup>ʿ</sup>*āpār* (cf. Schwarzenbach, op. cit. 123–33).

One can smear <sup>ʾ</sup>*dāmâ* on one’s head (1 Sam 4:12; 2 Sam 1:2; 15:32; Neh 9:1), take along a “load” of it (2 Kgs 5:17), cast implements in it (1 Kgs 7:46 = 2 Chron 4:17, see 2). From it vessels are formed (Isa 45:9) and an altar can be built (Exod 20:24); from it the animals of the field and the birds are made (Gen 2:19). Cf. the slightly different mode of expression in reference to humanity: the <sup>ʾ</sup>*dām* is taken from the <sup>ʾ</sup>*dāmâ* (Gen 3:19, 23) or formed from the dust of the <sup>ʾ</sup>*dāmâ* (2:7).

(c) In an expanded application, <sup>ʾ</sup>*dāmâ* generally represents the land on which one stands (Exod 3:5; 8:17) and which can open up (Num 16:30f.); cf. the creeping things of the <sup>ʾ</sup>*dāmâ* (Gen 1:25; 6:20; 7:8; 9:2; Lev 20:25; Ezek 38:20; Hos 2:20).

(d) Even more generally, <sup>ʾ</sup>*dāmâ* signifies simply “earth,” mostly in the sense of “inhabited earth” (cf. “families of the earth” in Gen 12:3; 28:14; Amos 3:2), from which one can be eradicated, etc. (<sup>š</sup>*md* hi.: Deut 6:15; 1 Kgs 13:34; Amos 9:8).

Constructions used here are still reminiscent of the meaning mentioned under (c) “ground” or “earth’s surface”: <sup>ʿ</sup>*al-hāʾdāmâ* “on the earth” (1 Sam 20:31; Isa 24:21; etc.); <sup>p</sup>*nē hāʾdāmâ* “earth’s surface” (Gen 8:13); <sup>ʿ</sup>*al-p<sup>ʿ</sup>nē hāʾdāmâ* “on the earth” (Gen 6:1, 7; 7:4, 23; 8:8; Exod 32:12; 33:16; Num 12:3; Deut 6:15; 7:6; 14:2; 1 Sam 20:15; 2 Sam 14:7; 1 Kgs 13:34; Isa 23:17; Jer 25:26; 28:16; Ezek 38:20; Amos 9:8; Zeph 1:2f.).

4. With respect to the theological usage of the word, attention should be directed to some unique formulations such as <sup>ʾ</sup>*admat (haq)qōdeš* “holy land” (Exod 3:5; Zech 2:16), <sup>ʾ</sup>*admat yhw̄h* “land of Yahweh” (Isa 14:2), the divine cursing of the <sup>ʾ</sup>*dāmâ* (Gen 3:17; cf. 5:29; 8:21), which establishes the toil of agriculture (Gen 3:17ff.; 5:29), and esp. to the primarily Dtn-Dtr formula concerning the <sup>ʾ</sup>*dāmâ* that Yahweh has promised the fathers and that he will give or has given to Israel (Exod 20:12; Num 11:12; 32:11; Deut 4:10, 40; 5:16; 7:13; 11:9, 21; 12:1, 19; 21:1; 25:15; 26:15; 28:11; 30:20; 31:20; [cf. 30:18; 31:13; 32:47]; 1 Kgs 8:34, 40 = 2 Chron 6:25, 31; 1 Kgs 9:7; 14:15; 2 Kgs 21:8; 2 Chron 7:20; 33:8). The curse formula of eradication from the <sup>ʾ</sup>*dāmâ* corresponds to it (Deut 28:21, 63; Josh 23:13, 15; 1 Kgs 9:7; 13:34; etc). Israel and Judah will depart the <sup>ʾ</sup>*dāmâ* into exile (2 Kgs 17:23; 25:21 = Jer 52:27) and will return again to it (Isa 14:1f.; Jer

16:15; 23:8; Ezek 28:25; cf. Amos 9:15; etc.).

No difference in content between this usage of  $\text{דָּמָא}^a$  and the corresponding usage of  $\rightarrow \text{עֵרֶשׁ}$  (4c) may be determined.

J. G. Plöger (*Literarkritische, formgeschichtliche und stilkritische Untersuchungen zum Deuteronomium* [1967], 121–29) has shown that G. Minette de Tillesse's observation (VT 12 [1962]: 53n.1) that the Deuteronomist and the 2d-pl. sections of Deut generally prefer  $\text{עֵרֶשׁ}$  in the sense of "promised land," while the 2d-sg. sections prefer  $\text{דָּמָא}^a$  in a much more general meaning, does not stand up to closer scrutiny (a glance at the evidence in the Dtr history points in the same direction), rather that—at least in Deut—the diction relates to fixed constructions.  $\text{דָּמָא}^a$  occurs in Deut in the constructions  $\text{פְּרִי הָאָרֶץ}^a \text{דָּמָא}^a$  "the fruit of the land,"  $\text{חַיִּימִים}^a \text{עַל-הָאָרֶץ}^a \text{דָּמָא}^a$  "living in the land," and  $\text{יָמִימִים}^a \text{עַל-הָאָרֶץ}^a \text{דָּמָא}^a$  "to live long in the land" (fixed constructions involving  $\text{עֵרֶשׁ}$  in Plöger, op. cit.). This differentiation is also obscured in post-Dtr usage.

Although the usage of  $\text{עֵרֶשׁ}$  in these contexts refers to land primarily as a geographical, or occasionally as a political, entity, traces of traditionhistorically older expressions are present in the usage of  $\text{דָּמָא}^a$ . The nomads are not originally promised a geographically or politically defined "land," but possession of "farmland" per se. The indiscriminate association of the two concepts throughout the OT indicates that, at least since the time of the Yahwist, the general promise of permanent settlement has simply been identified with the specific promise of the possession of the land of Canaan. The designation  $\text{אֲדָמַת יִשְׂרָאֵל}^a$ , which occurs only in Ezek (although as many as 17x) and which characterizes Israel not politically but theologically (cf. Rost, KC 78f.; Zimmerli, Ezek, Herm, 1:185, 203), also belongs in the same realm of ideas; cf., however,  $\text{אֲדָמַת יְהוּדָא}^a$  in Isa 19:17 as well.

Similarly ancient is the expression in which  $\text{דָּמָא}^a$  is determined by the poss. pron. ("my/your/his land") and which approaches the meaning "homeland" (Gen 28:15; Amos 7:11, 17; Jonah 4:2; Dan 11:9; cf. Psa 137:4 "foreign land").

5. The few occurrences of the word at Qumran are consistent with OT idioms. NT Gk. distinguishes only slightly between  $\text{דָּמָא}^a$  and  $\text{עֵרֶשׁ}$ , a circumstance that also holds true for the LXX. Both use  $g\bar{e}$ . Cf. H. Sasse, "γῆ," TDNT 1:677–81, who overlooks significant aspects, however.

H. H. Schmid

**אהב  $\text{חב}$  to love**

S 157; BDB 12b; HALOT 1:17b; TDOT 1:99–118; TWOT 29; NIDOTTE 170

I. The root  $\text{ḥb}$  “to love” is distributed only in Can. (Akk. uses  $\text{rāmum}$  [ $\text{r}^{\lambda}\text{m}$ ] for the most part, Aram.  $\text{ḥbb}$  and  $\text{rḥm}$ , Arab.  $\text{ḥbb}$  and  $\text{wdd}$ ).

The Ug. verb  $\text{yuhb}$  (UT no. 105; WUS no. 103; A. van Selms, *Marriage and Family Life in Ugaritic Literature* [1954], 47, 67) occurs in KTU 1.5.V.18 euphemistically with the subj. Baal and the obj.  $\text{ḡlt}$  “heifer”; the subst.  $\text{ḥbt}$  “love” occurs in 1.3.III.7 and 1.4.IV.39 par. to  $\text{yd}$  “love” (root  $\text{ydd}$ ).  $\text{lihbt}$  in UT 1002.46 (= MF V.46) is uncertain.

In a Neo-Pun. grave inscription from Cherchel (Algeria) (NP no. 130 = NE 438d = Cooke no. 56), J. G. Février (RHR 141 [1952]: 19ff.) suspects a pu. fem. ptcp.  $\text{mhbt}$  “beloved,” although, according to J. T. Milik (Bib 38 [1957]: 254n.2) this form is better derived from  $\text{ḥbb}$  ( $\text{ḥ} > \text{h}$ ).

Aram.  $\text{ḥbth}$  in CIS 2:150 (= Cowley no. 75.3, a papyrus frg. from Elephantine) is entirely uncertain (cf. DISO 6).

D. W. Thomas (“The Root  $\text{ḥb}$  ‘love’ in Hebr.,” ZAW 57 [1939]: 57–64; following Schultens, Wünsche, Schwally), assuming a biradical (onomatopoeic) root  $\text{hb}$  “to blow, breathe heavily, demand” (cf. Arab.  $\text{habba}$ ) augmented by  $\text{ḥ}$ , associates the verb with similar roots ( $\text{ṣ}^{\lambda}\text{p}$ ,  $\text{nḥm}$ ,  $\text{nšm}$ , etc.) that combine the concepts of breathing and emotions (so also Wolff, Hos, Herm, 35). But one should not draw exegetical consequences from this etymology (Thomas, op. cit. 64).

An etymological relationship to the conjectural  $\text{ḥ}^{\text{a}}\text{b}^{\text{a}}$  II “leather” (cf. CML 1 133n.2; HAL 18a), suggested in Song Sol 3:10 (less likely also in Hos 11:4), should not be assumed (contra H. H. Hirschberg, VT 11 [1961]: 373f.).

Of the derivatives,  $\text{ḥḥēb}$  (ptcp. and subst. “friend”) and  $\text{ḥ}^{\text{a}}\text{b}^{\text{a}}$  (inf. and verbal noun “love”) are common; by contrast, the action nouns or abstract formations  $\text{ḥ}^{\text{a}}\text{ḥ}^{\text{b}}\text{ḥ}^{\text{m}}$  “love affairs” (Hos 8:9; cf. Rudolph, KAT 13/1, 159), “loveliness” (Prov 5:19), and  $\text{ḥ}^{\text{a}}\text{ḥ}^{\text{b}}\text{ḥ}^{\text{m}}$  “love’s pleasures” (Prov 7:18) are infrequent.

The root is not attested in the OT in PNs (in contrast to  $\text{ydd}$ ,  $\text{ḥps}$ , or even  $\text{ḥnn}$ ); but extrabiblically it occurs at Elephantine in  $\text{n}^{\text{h}}\text{bt}/\text{nhbt}$  (ni. fem. ptcp. “beloved,” Cowley nos. 1.4; 22.91, 96, 107) and on a Hebr. seal (Levy 46 = Diringer 217); cf. IP nos. 924, 937; J. J. Stamm, “Hebr. Frauennamen,” FS Baumgartner 325.

II. Statistics: Of the 251 occurrences of the root in the OT, 231 are

allotted to the qal (incl. 63x  $\text{ʔ}h\bar{e}b$  and 53x  $\text{ʔ}ah^ab\hat{a}$ ), 1 to the ni., 16 to the pi., 2 as  $\text{ʔ}ah\bar{a}b\hat{a}m$ , and 1 as  $\text{ʔ}oh\bar{a}b\hat{a}m$ . The highest concentrations of the verb are in Psa (41x), Prov (32x), Deut (23x), Hos (19x), Song Sol (18x), and Gen (15x). The pi. examples are concentrated in Jer, Ezek, and Hos, those of  $\text{ʔ}h\bar{e}b$  in Psa and Prov (17x each), those of  $\text{ʔ}ah^ab\hat{a}$  in Song Sol (11x, incl. 3:10) and Deut (9x).

According to Gerleman (BK 18, 75), 7 of the roughly 30 passages with the verb  $\text{ʔ}hb$  as an expression of erotic love fall to Song Sol and 11 to J and the approximately contemporary narratives of David's accession and of the succession.

The absence of  $\text{ʔ}hb$  in Job (only Job 19:19) is noteworthy;  $\rightarrow r\bar{e}a^c$ .

III. 1. With respect to the breadth of meaning and the related extensive dominance of the word field,  $\text{ʔ}hb$  is rather similar to Eng. "to love" (cf. in contrast the coexistence of the Gk. *stergein*, *eran*, *philein*, and *agapan*).  $\text{ʔ}hb$ , together with other verbs of emotion ( $\rightarrow hps$  "to like,"  $\rightarrow yr^c$  "to fear," and  $\rightarrow sn^c$  "to hate"), belongs to the few stative verbs with a trans. usage (Berg., *HG* 2:76). A categorization of usages according to the objs. is helpful (III/2 love of man and woman, III/3 of other personal relationships, III/4 of things); general statements involving substantivized  $\text{ʔ}ah^ab\hat{a}$  without obj. will also be treated. The personal relationship (comprising *eros*, *philia*, and *agapē* equally) may be semasiologically primary in comparison to the relationship with things, so that one should consider love for things or activities a derived metaphorical usage (Quell, *TDNT* 1:23).

$\text{ʔ}hb$  is often further refined with respect to content by means of par. concepts:  $\rightarrow dbq$  "to cling to" (Gen 34:3 with further par. formulations; 1 Kgs 11:2; Prov 18:24; cf. Eichrodt 1:250; 2:297f.);  $\rightarrow hps$  "to like, take pleasure in" (1 Sam 18:22; Psa 109:17);  $h\check{s}q$  "to be attached to" ( $\rightarrow dbq$ ), and  $\rightarrow bhr$  "to choose" (Deut 10:15; cf. Eichrodt, op. cit.; O. Bächli, *Israel und die Völker* [1962], 134ff.).  $r\bar{e}a^c$  "companion, friend" parallels  $\text{ʔ}h\bar{e}b$  (Psa 38:12; also  $q\bar{a}r\hat{o}b$  "neighbor"; 88:19 associated with  $m^e yudd\bar{a}^c$  "confidant"; cf. *BHS* and Kraus, *Psa*, CC, 2:192). One finds  $yr^c$  "to fear,"  $bd$  "to serve," and  $laket b^e kol-d^e r\bar{a}k\bar{a}yw$  "to walk in all his ways" (Deut 10:12; cf. Eichrodt side by side with 2:297f.; Quell, *TDNT* 1:28n.39)  $\text{ʔ}ah^ab\hat{a}$ , although only in theological usage with respect to the individual's love for God; with respect to the love of God for his people  $\rightarrow hesed$  "grace" (Jer 2:2; 31:2; cf. Psa 37:28) and  $heml\hat{a}$  ( $\rightarrow r\check{h}m$ ) "mercy" (Isa 63:9).

The following occur in the OT as infrequent synonyms for  $\text{ʔ}hb$ :  $hbb$  "to love," the counterpart of  $\text{ʔ}hb$  in Aram. and Arab. (Wagner no. 82a), in Deut 33:3 in a difficult text

with God as subj.; also *ḡb* “to desire (sensually)” (Jer 4:30; Ezek 23:5, 7, 9, 12, 16, 20; Ezek 16:37 txt em; cf. Zimmerli, *Ezek*, Herm, 1:330, 484) with a specialized meaning.

The root *ydd*, widely distributed in Sem. (KBL 363b), is extant only in noms. (*yādīd* “lovely” Psa 84:2; “darling, friend,” Isa 5:1[bis]; Jer 11:15 txt em; for further texts see IV/2; *y<sup>c</sup>dīdūt* “darling” Jer 12:7; *šīry<sup>c</sup>dīdōt* “love song” Psa 45:1) and in PNs (*IP* nos. 571, 576, 577, 843).

*rḥm* pi. “to take pity” lies farther afield with respect to meaning; the unique Aram.-sounding *rḥm* qal “to love” in Psa 18:2 (obj. Yahweh) is usually set aside by emendation (to *ṣrōmimkā* “I will raise you”).

*dōd* (61x) should be mentioned as a subst. with widely varied meanings corresponding to its suspected origins as a “babble word” (J. J. Stamm, *SVT* 7 [1960]: 174ff.):

(a) “Darling, beloved” (Isa 5:1 and 33x in Song Sol alongside the fem. *ra<sup>c</sup>yā* “beloved,” → *rēa<sup>c</sup>*; Akk. *dādū*; cf. *AHW* 149a; *CAD* D:20);

(b) In the pl. “love, desire” (9x; Ezek 16:8; 23:17; Prov 7:18; Song Sol 1:2, 4; 4:10[bis]; 5:1; 7:13; Akk. *dādū* pl. “lovemaking”; *CAD* D:20a; Ug. *dd* *KTU* 1.3.III.5, 7; 1.4.VI.12; 1.24.23);

(c) “Uncle” (18x; → *āḥ* 3a), a special meaning that Hebr. shares with Arab. and Aram. (Stamm, op. cit. 175ff.).

A regular antonym for *ḥb* is → *śn<sup>ʔ</sup>* “to hate.” The two verbs occur together in more than 30 texts (Gen 29:31f.; 37:4; Exod 20:5f.; Lev 19:17f.; Deut 5:9f.; 21:15f.; Judg 14:16; 2 Sam 13:15, a transformation of love into hate; 19:7; Isa 61:8; Ezek 16:37; Hos 9:15; Amos 5:15; Mic 3:2; Zech 8:17; Mal 1:2f.; Psa 11:5; 45:8; 97:10; 109:3–5; 119:113, 127f., 163; Prov 1:22; 8:36; 9:8; 12:1; 13:24; 14:20; 15:17; Eccl 3:8; 9:6; 2 Chron 19:2). Occasional contrasts, e.g., with *śtn* “to be at enmity” in Psa 109:4, are insignificant by comparison. Remarkably, the assonance of the antonyms *ḥēb* “friend” and *ḥyēb* “enemy” is almost never fully used stylistically; cf. Judg 5:31 and esp. Lam 1:2.

The derived stems of the verb occur only in ptcp. forms. Ni. *hann<sup>c</sup>hābīm* “the lovely” appears only once in a gerundive meaning as an epithet for Saul and Jonathan in David’s lament (2 Sam 1:23 par. *hann<sup>c</sup>īmīm* “the darlings”); see I on PNs. The pi. occurs in the pl. ptcp. *m<sup>c</sup>ah<sup>a</sup>bīm* with the pejorative meaning “lover, paramour” (Jer 22:20, 22; 30:14; Ezek 16:33, 36f.; 23:5, 9, 22; Hos 2:7, 9, 12, 14f.; Zech 13:6; Lam 1:19); the qal ptcp. is used for the normal meaning “friend, lover.” The pi. ptcp. “paramour” is to be understood not as an intensive but as a resultative, summarizing successive incidents, “to love (severally, in

succession)“ (cf. *HP* 158).

A hi. “to make beloved” is extant in Sir 4:7 and Mid. Hebr. The pealal *ʔhbhb* “to flirt,” suggested for Hos 4:18 (*HAL* 17b), is uncertain.

2. The primary human love relationship is that between man and woman (in 2 Sam 1:26 termed *ʔah<sup>a</sup>bat nāšîm* “the love of women,” in comparison to the love of friends): Isaac-Rebekah (Gen 24:67), Jacob-Rachel (29:18, 20, 30, 32), Shechem-Dinah (34:3), Samson-the Philistine woman (Judg 14:16), Samson-Delilah (16:4, 15), Elkanah-Hannah (1 Sam 1:5), David-Michal (18:20, 28; cf. Gerleman, BK 18, 73: the only text outside Song Sol with a woman as subj.), Amnon-Tamar (2 Sam 13:1, 4, 15), Solomon-many foreign women (stressed as a disqualification; see Quell, *TDNT* 1:24n.20) in addition to Pharaoh’s daughter (1 Kgs 11:1f.), Rehoboam-Maachah (2 Chron 11:21; on “harem management” see Rudolph, HAT 21, 233), Ahasuerus-Esther (Esth 2:17). On the special case of Hosea (Hos 3:1) cf. Wolff, *Hos*, Herm, 60, and Rudolph, KAT 13/1, 89. In these cases love is obviously sexually determined.

That love is only partially constitutive of the legal institution of marriage is demonstrated e.g., by comparative statements: Gen 29:30 (with *min*); 1 Sam 1:5 (*ʔhb* “to prefer”); 2 Chron 11:21 and Esth 2:17 (superlatives). In fact, the law of inheritance in Deut 21:15–17 reckons with the coexistence of a mistress (*ʔhūbâ*) and an estranged (→ *šn*) wife.

The statement of Hebr. lyrical (and wisdom) literature concerning love (cf. esp. Gerleman, BK 18, 72–75) follows here. The verbal expression describes the attractiveness of the beloved (Song Sol 1:3f.), who in Song Sol is usually called *dôdî* “my beloved,” but also in a poetically varied paraphrase “the one whom my soul loves” (1:7; 3:1–4). In 7:7 *ʔhūbâ* “beloved” should also apparently be read instead of *ʔah<sup>a</sup>bâ* (abstract for concrete; cf., however, Gerleman, BK 18, 201). The noun *ʔah<sup>a</sup>bâ* “love” occurs in 2:4 uniquely objectified as a sign over the wine house and is set in quotation marks by some translators (Rudolph, KAT 17/2, 130f.; Gerleman 117f.); in 2:5 and 5:8 the maiden is “lovesick” (on lovesickness cf. 2 Sam 13:2 and Rudolph 131n.4; Gerleman 119); according to 2:7 (= 3:5) and 8:4 love should not be prematurely awakened or disturbed. The remaining texts with *ʔah<sup>a</sup>bâ* offer general statements, without, however, hypostatizing love: it is strong like death (8:6), much water cannot extinguish it (8:7), it is unquantifiable (8:7).

*dôdîm* is used in the comparison “better than wine” (Song Sol 1:2, 4; 4:10) and elsewhere specifically for (intoxicating) sexual indulgence (Song Sol 5:1; 7:13; Prov

5:19b txt em; 7:18); in both Prov passages, however, it parallels *ʿah<sup>a</sup>bâ* or *ʿhābîm*.

The root *ʿhb* also occurs in wisdom literature in the erotic sense as a description of the beloved in Prov 5:19a (*ʿayyelet ʿah<sup>a</sup>bâ* “lovely hind”), also Eccl 9:9 (*ʿiššâ ʿšer ʿāhabtā*) of the wife (Hertzberg, KAT 17/4, 172).

On Song Sol 3:10, see I concerning *ʿah<sup>a</sup>bâ* II “leather(?)”.

The nonchalant, natural presentation of love and sexuality does not seek to sublimate love intellectually or spiritually, or to judge it moralistically and thereby to repress it psychologically; in this way it is stripped of its numinous character and distanced from the sexual-mythical phenomenon of Israel’s religious environment. Song Sol plays a major role in the struggle against the erotic-orgiastic Baal religion (cf. von Rad, *Theol.* 1:27: “Israel did not share in the ‘divinisation’ of sex”).

3. Among other personal relationships, love between parents and children should be mentioned foremost, although narrative literature discusses it only in special cases (uniqueness of the son, biased preference, e.g., for the youngest): Abraham-Isaac (Gen 22:2), Isaac-Esau and Rebekah-Jacob (25:28), Israel-Joseph (37:3f., comparatively in the sense of preference), Jacob-Benjamin (44:20). The foreigner Ruth loves her mother-in-law Naomi (Ruth 4:15). The normal situation is presupposed paradoxically in Prov 13:24 (“whoever loves his son punishes him”); for other situations cf. the more appropriate → *rḥm*.

Lord and servant can also be bound to one another in love, as in the Covenant Code (Exod 21:15, incl. wife and children) and in the Dtn Code (Deut 15:16); also in narrative literature concerning Saul and David (1 Sam 16:21); David’s popularity with the people (18:16, 22) belongs here as well.

A special usage of *ʿhb* concerns the friendship of Jonathan and David. Jonathan’s soul is bound (*qšr*) to David’s soul (1 Sam 18:1); he loves David *k<sup>c</sup>napšô* “like his life” (18:1, 3; 20:17; against the interpretation of this as homosexuality, see M. A. Cohen, *HUCA* 36 [1965]: 83f.) and makes David swear “by his love” (20:17), while David confesses in his lament: “your love to me was more wonderful than the love of women” (2 Sam 1:26; cf. v 23; tr. of Hertzberg, *Sam*, OTL, 236).

Although this love of friends leads to a covenant agreement (cf. Quell, *TDNT* 2:112; → *b<sup>c</sup>rît*), the emotional basis is not abandoned. Cases such as this one illustrate how the term “to love” could gain entrance also in politicojuridical contract language as an expression for upright loyalty; W. L. Moran (*CBQ* 25 [1963]: 82n.33) and Th. C. Vriezen (*TZ* 22 [1966]: 4–7) call attention to pars. from the vassal treaties of Esarhaddon: “(You swear) that you will love Ashurbanipal . . . as (you do) yourselves (*kī napšātkunu*),” with the verb *rāmu* “to love” (D. J. Wiseman, *Vassal-Treaties of Esarhaddon* [= *Iraq* 20/1] [1958], 49, col. 4.266–68). See IV/3.

*ḥb* clearly refers to international political relationships in 1 Kgs 5:15, where King Hiram of Tyre appears as *ḥhēb*, David's friendly covenant partner (Moran, op. cit. 78–81, with analogous usages from EA; Noth, BK 9, 89). According to Moran, *ḥhēb* also has the political nuance of a subject's loyalty to the king in 1 Sam 18:16 and particularly in 2 Sam 19:7. The word stands in a religiopolitical context in the prophet's accusation in 2 Chron 19:2 that Jehoshaphat has "cultivated friendship with those who hate Yahweh" (Ahab and the northern kingdom are intended). The expression "all your/his friends" in the sense of "partisans" has a derogatory tone in reference to negatively portrayed persons such as Pashhur (Jer 20:4, 6) and Haman (Esth 5:10, 14; 6:13).

Yet to be treated is the usage of *ḥb* as a description of community relationships in more general statements in Psa and wisdom literature. The psalmist complains about the disruption of the norm: friends turn away (Psa 38:13; similarly Job 19:19), Yahweh has caused them to be alienated (88:19), love is requited only with hostility and hatred (109:4f.). In Prov "friend" and "love" are presumed as known quantities and positive factors in the arrangement of values. In addition to individual observations (Prov 14:20, the rich have many friends; 9:8, the wise loves the one who reproves, similarly 27:5f.; 16:13, the king loves the one who speaks rightly), statements of principle also appear: the (true) friend loves at all times (17:17); some friends are more devoted (→ *dbq*) than a brother (18:24). Gnostic statements concerning love occur in 10:12 (love covers all offenses; similarly 17:9) and in the comparison in 15:17 ("better a meal of herbs with love, than a fatted ox with hate"). Abstractions in the meristic statements in Eccl are the most advanced: there is a time to love and to hate (Eccl 3:8), people recognize neither love nor hate (9:1), love and hate have long since perished (9:6).

Concerning love for neighbor, stranger, and love of self, see IV/1.

4. Secondary to the personal usage, reference to things, circumstances, and activities accentuate the concept's characteristic of the goal-oriented, unilaterally selective affection and ignore the element of reciprocity; personification of the obj. does not occur in this usage (on the love of wisdom and its love in return, see IV/3). Stronger than → *hps* and → *rsh* "to like, be pleased with," *ḥb* retains a passionate tone. In addition to neutral (e.g., 2 Chron 26:10, Uzziah loved agriculture) or positive entities (e.g., Zech 8:19, truth and peace), despicable things and activities frequently appear as objs. in accusations (e.g., Isa 1:23, bribery; Hos 12:8, oppression).

Other passages with nontheological usages are: Gen 27:4, 9, 14 (savory

cuisine); Isa 56:10 (sleep); 57:8 (nuptials); Jer 5:31; 14:10; Amos 4:5 (*kēn* “so”); Hos 3:1 (raisin cake); 4:18 (disgrace); 9:1 (harlot’s hire); 10:1 (threshing); Amos 5:15 (the good); Mic 3:2 (the evil); 6:8 (→ *ḥesed*); Zech 8:17 (false oath); Psa 4:3 (vanity); 11:5 (foolishness); 34:13 (good days); 45:8 (righteousness); 52:5 (the evil more than the good); 52:6 (pernicious speech); 109:17 (curse); Prov 1:22 (simplicity); 12:1 (discipline, perception); 15:12 (reproof); 17:19 (bickering, foolishness); 18:21 (the tongue); 19:8 (one’s life); 20:13 (sleep); 20:17 (lustfulness); 21:17 (wine); Eccl 5:9 (gold, riches).

IV. Theologically relevant statements with *ḥb* will be treated in the following three sections: (1) love of neighbor (love of others, love of self), (2) God’s love for people, (3) people’s love for God.

1. Lev 19:18, which the NT cites frequently (Matt 5:43; 19:19; 22:39; Mark 12:31; Luke 10:27; Rom 13:9; Gal 5:14; Jas 2:8), “You shall love your neighbor as yourself” (J. Fichtner, *WD* 4 [1955]: 23–52 = *Gottes Weisheit* [1965], 88–114, esp. 102ff.), is unique in the OT. H advances this love requirement and eclipses external legislative regulations by reshaping, in a universalizing and interiorizing manner, an older series of negative injunctions concerning Israelite behavior in juridical life into positive commandments (cf. Lev 19:17, “You shall not hate your brother in your heart”). In contrast to the NT, the commandment remains limited to the “compatriot” (→ *rēaʿ*) and does not yet comprehend the whole ethic of communal behavior as a governing principle, as is already the case in the first part of the double commandment of love (Deut 6:5) in relation to behavior toward God.

An appendix in Lev 19:34, “the sojourner (*gēr*, → *gûr*), who lives among you, shall be to you as a native from your midst, and you shall love him as yourself,” includes the sojourner in the commandment (Elliger, *HAT* 4, 259), but also implicitly excludes the foreigner (*nokrî*, → *nkr*), for whom other criteria are valid. Positive love for the stranger is also required in Deut 10:19, “and you shall love the stranger,” here in relation to the ancient Israelite demand (cf. the negative formulations in Exod 22:20ff.) for mercy toward the weak (v 18, orphans, widows, strangers; → *rḥm*). In each passage the commandment of love for the neighbor or foreigner does not merely express clan morality (*ILC* 1–2:309; contra Th. C. Vriezen, “Bubers Auslegung des Liebesgebots,” *TZ* 22 [1966]: 8f.), but is theologically motivated by Yahweh’s love for the people or the foreigner, and depends, as do Yahweh’s other commandments, on the covenant relationship (Lev 19:18b follows “I am Yahweh,” → *ʾānî*, Exod 22:20b; Lev 19:34b; and Deut 10:19b recall Israel’s own sojourn in Egypt). Pars. from ancient Near Eastern politicojuridical language further confirm this interpretation (see III/3), and show at the same time that self-love (Lev 19:18, 34 *kāmôkâ* “as yourself”; cf. also 1 Sam 18:1, 3; 20:17 “as his own life”; Deut 13:7 “as your life”) is simply presupposed as the norm (H. van Oyen, *Ethik des AT*

[1967], 101f.) and is not viewed e.g., as a dangerous temptation one must combat through self-denial (so F. Maass, “Die Selbstliebe nach Lev 19:18,” FS Baumgärtel 109–13).

OT passages such as Exod 23:4f. and Prov 25:21, which are claimed for the concept of love for the stranger, do not use *ʾhb*.

2. Yahweh’s love will be addressed below only insofar as *ʾhb* is used (on the wider topic of God’s love, see e.g., Eichrodt 1:250–58; Jacob 108–13; J. De-k, *Die Gottesliebe in den alten semitischen Religionen* [1914]; J. Ziegler, *Die Liebe Gottes bei den Propheten* [1930]; → *ḥesed*, → *qnʿ*, → *rḥm* ).

The claim that Yahweh loves his people, Israel, is relatively new. It first occurs in the tradition in which Hos, Deut, and Jer stand (von Rad, *Gottesvolk* 78–83; Alt, *KS* [19643], 2:272), and, in fact, at the point in the theological development of the election doctrine at which questions arise concerning the basis of Israel’s divine election (H. Breit, *Die Predigt des Deuteronomisten* [1933], 113ff.; H. Wildberger, *Jahwes Eigentumsvolk* [1960], 110ff.; O. Bächli, *Israel und die Völker* [1962], 134ff.). The basis lies in the love of God as his sovereign act of the will.

Hosea uses the metaphors of fatherly love (11:1, “when Israel was young, I loved him”; v 4, “with bands of love”) and marital love (3:1, “love a wife who loves another and who is an adulteress, just as Yahweh loves the Israelites”; see F. Buck, *Die Liebe Gottes beim Propheten Osee* [1953]), but also uses *ʾhb* more generally (9:15, “I will henceforth love them no more”; 14:5, “in free grace [*n<sup>c</sup>dābâ*] I will love them”).

In addition to *ʾhb*, the verb *ḥšq* “to cling (to someone)” appears in Deut; both terms occur in close proximity to → *bḥr* “to choose” (4:37, “because he loved your fathers and chose their descendants”; 7:7f., “not because you were more numerous than all peoples did Yahweh turn [*ḥšq*] his heart to you and choose you . . . , but because Yahweh loved you”; 7:13; 10:15, “indeed, Yahweh turned [*ḥšq*] his heart only to your fathers, in that he loved them, and chose you, their descendants”; 23:6). In Jer 31:3 (“I have loved you with eternal love; therefore have I drawn you to me out of goodness”), the term → *ḥesed* parallels *ʾah<sup>a</sup>bâ*, “an indication that the two traditions of election and covenant begin to converge for Jeremiah” (Wildberger, op. cit. 112).

Later developments of these traditions that should be mentioned are 1 Kgs 10:9 (= 2 Chron 2:10 = 9:8); Isa 43:4; 63:9; Zeph 3:17; and Mal 1:2.

*ʾhb* used of God’s love for his people occurs in a relatively limited

setting and, properly, only in relation to individuals. Aside from Psa 47:5 (“the pride of Jacob, whom he loves”), where neither the subj. nor the obj. is unequivocal, and statements concerning whole categories of people (foreigners, Deut 10:18; see IV/1; Psa 97:10 txt em, “who hate evil”; 146:8, the righteous; Prov 3:12, “whomever Yahweh loves he reproves”; 15:9, “who seeks after righteousness”; 22:11, “who is pure of heart”), only two royal figures are named as the obj. of Yahweh’s loving attention: Solomon (2 Sam 12:24, apparently in relation to the name *y<sup>e</sup>dīd<sup>e</sup>yāh*, “beloved of Yahweh” in v 25; cf. *IP* 149; Neh 13:26, “in that he was a darling [*ʾāhûb*] of his God”) and Cyrus (Isa 48:14, “he whom Yahweh loves”). One may assume the language of ancient Near Eastern royal ideology here (Quell, *TDNT* 1:30); cf. Akk. *narāmu/rīmu* “darling” as a royal epithet (Seux 189ff., 251) and in PNs (e.g., Naram-Sin, Rim-Sin); Eg.: H. Ranke, *Die Äg. Personennamen* (1952), 2:226.

Idioms in which *ʾhb* refer to things and situations (cf. III/4) are also common in the ancient Near East: Yahweh loves justice and righteousness (Isa 61:8; Psa 11:7; 33:5; 37:28; 99:4; *mīšpāt* → *špt*, *š<sup>e</sup>dāqâ* → *sdq*, cf. the pars. in the Akk. royal inscriptions found in Seux 236f.). Statements of Yahweh’s love for his sanctuary on Zion (Mal 2:11; Psa 78:68, par. to *bḥr*, cf. 132:12; also 87:2, “more than all the dwellings of Jacob,” which is comparative and which contains the election idea) are colored by Dtr election theology.

Worthy of mention in this context are additional statements with *yādīd* (Deut 33:12, “Benjamin is the darling of Yahweh”; Psa 60:7 = 108:7, “who are dear to you”; 127:2, “his darling”); on *ḥbb* see III/1.

3. The OT addresses love for Yahweh even later than the love of Yahweh; statements of this idea are concentrated once again in Dtn theology (bibliog.: G. Winter, “Die Liebe zu Gott im AT,” *ZAW* 9 [1889]: 211–46; H. Breit, op. cit. 156–65; C. Wiéner, *Recherches sur l’amour pour Dieu dans l’AT* [1957]; Eichrodt 2:290–301; J. Coppens, *La doctrine biblique sur l’amour de Dieu et du prochain*, ALBO 4/16 [1964]).

Indicative and impv. usages of the word should be differentiated. The stated substantival usage of *ʾōhēb* (mostly pl.) in the meaning “partisan” (see III/3) in contrast to “hater” (→ *śn<sup>ʾ</sup>*) and “enemy” (→ *ʾōyēb*) may derive from a cultic-liturgical formulation (N. Lohfink, *Das Hauptgebot* [1963], 78). At issue is the formula “of them who love me” in Exod 20:6 and Deut 5:10, additions to the Decalogue that are not datable with certainty and that may be Dtn (similarly Deut 7:9 and later, without antonym, Dan 9:4 and Neh 1:5; on the whole formula cf. J. Scharbert, *Bib* 38 [1957]: 130–50), the conclusion of the Song of Deborah, Judg 5:31, whose antiquity is disputed

(cf. A. Weiser, *ZAW* 71 [1959]: 94), and Psa 145:20. In Isa 41:8, *ʾōh<sup>abī</sup>* “who loved me” refers to Abraham (dependent upon this are 2 Chron 20:7; Jas 2:23; and Koran 4:125 [124], “God took Abraham as friend [*ḥalīl*]”). The oldest text that we can date with certainty is Jer 2:2, “the love (*ʾah<sup>abā</sup>*) of your bridal period,” which is based on Hoseanic thought (Rudolph, *HAT* 12, 14f.).

The requirement of love for God begins in Dtn parenthesis and directs itself to the entire people (Deut 6:5; 10:12; 11:1, 13, 22; 13:4; 19:9; 30:6, 16, 20; texts dependent on this concept include Josh 22:5; 23:11; 1 Kgs 3:3, where the requirement is fulfilled by Solomon). *ʾhb* is governed now neither by the marriage metaphor nor by the father-son relationship and is not, therefore, influenced by Hos. Love is commanded (elsewhere only in the didactic warning of the thanksgiving psalm, Psa 31:24); it stands in a series with *→ yr<sup>ʾ</sup>* “to fear” (R. Sander, *Furcht und Liebe im palästinischen Judentum* [1935]), *→ ʿbd* “to serve,” and similar verbs of relationship to Yahweh (Lohfink, op. cit. 73ff., tables on 303f.; cf. also *→ dbq* “to cling to” in Deut 11:22; 13:5; 30:20; Josh 22:5; 23:12); it is made concrete as responsive love in answer to the love of Yahweh, in faithfulness and obedience within the Yahweh covenant. According to W. L. Moran (“Ancient Near Eastern Background of the Love of God in Deuteronomy,” *CBQ* 25 [1963]: 77–87), all of these characteristics point to the backgrounds of Dtn diction in the diplomatic terminology of the ancient Near East (see III/3; examples particularly from EA). *ʾhb* means, therefore, something like “to exercise upright loyalty toward the covenant partner”; and, although the OT uses it in a religious sense, it belongs to the language of the covenant idea. The addition “with your whole heart, your whole soul, and all your might” in Deut 6:5 (a similar formula is found, however, also in 10:12; 11:13 with *ʿbd* “to serve”) and reference to circumcision of the heart by Yahweh (30:6) demonstrate the tendency (but also the necessity) of intensifying and interiorizing the easily hackneyed term.

Love for God as a subjective religious feeling rarely appears in the OT, which is not surprising in view of the absence of mystical religiosity. Textually uncertain are Psa 18:2, “I love you, Yahweh, my strength,” with *rḥm* qal (Kraus, *Psa*, CC, 1:254; see III/1) and 116:1, “I love, for Yahweh has heard,” with *ʾhb* (Kraus, *Psa*, CC, 2:385). Psa 73:25, “if I have you, then I want nothing on earth” with *→ ḥps*, but not in direct reference to Yahweh, should probably also be considered.

In keeping with this reluctance to use Yahweh as the obj. of *ʾhb*, the piety of the Psa preferred objective circumlocutions (see III/4). The following objs. occur: the name of Yahweh (*→ šēm*) in Psa 5:12; 69:37; 119:132; also Isa 56:6; his salvation, Psa 40:17 = 70:5; his sanctuary, 26:8; cf. 122:6 and Isa 66:10, Jerusalem; also his law, commandments, etc., Psa 119:47f., 97, 113, 119, 127, 140, 159, 163, 167.

Statements concerning the love of and for wisdom constitute a separate realm of ideas. They may be included here because hypostatized wisdom is nearly identified with Yahweh. In contrast to e.g., Dtn usages, the formulae are all reciprocal: Prov 4:6, “hold it dear, so will it guard you”; 8:17, “I love those who love me”; 8:21, “I give those who love me wealth”; cf. 8:36, “all who hate me love death” (wisdom is not personified in 29:3, “whoever loves wisdom gladdens one’s father”; the text should be included in the cases listed in III/4). The Eg. pars., which deal with the love of and for Maat and with the world order given by the god, make it likely that OT statements concerning hypostatized *ḥokmâ* were given impetus from Egypt (Ch. Kayatz, *Studien zu Proverbien 1–9* [1966], 98–102; contrast G. Boström, *Proverbienstudien* [1935], 156ff.; cf. further Prov 7:4, “say to wisdom: you are my sister [→ *ʾāḥ* 3c], and call insight your confidant, that she may preserve you”).

Even when *ʾḥb* occurs in reference to foreign divinities, it remains within the framework of the usages treated so far: Jer 2:25, “for I love the strangers” (under the influence of Hos; cf. Jer 2:33), and 8:2, “before the sun and the moon and the whole multitude of the heaven, which she loved and served” (with Dtr diction).

*ʾḥūbat rēaʿ* “who is loved by others” in Hos 3:1 (Rudolph, KAT 13/1, 84) and the pl. ptcp. of *ʾḥb* pi. “lover, paramour” (see III/1) in Hos 2:7, 9, 12, 14f. in reference to the Baalim, and in Jer 22:20, 22; 30:14; Ezek 16:33, 36f.; 23:5, 9, 22; Lam 1:19 (cf. 1:2) in reference to alleged political allies (Zech 13:6 without metaphorical language) maintain their actual meaning “lover” even in metaphorical language and are not to be understood as technical cultic expressions because of their association with the Can. syncretistic religious figures depicted (contra A. D. Tushingham, *JNES* 12 [1953]: 150ff.).

V. The NT is already closely bound to the OT by means of the use of the key texts Lev 19:18 and Deut 6:4f. and of the subst. *agapē*, which is rarely attested in pre-Christian usage except in the LXX. Preliminary overviews and bibliogs. concerning the rich NT material may be found in the following articles, each of which offers an introductory section on the OT: G. Quell and E. Stauffer, “ἀγαπᾶω,” *TDNT* 1:21–55; W. Zimmerli and N. A. Dahl, *RGG* 4:363–67. See also E. M. Good, “Love in the OT,” *IDB* 3:164–68; G. Johnston, “Love in the NT,” *IDB* 3:168–78. Of the larger monographs only C. Spicq, *Agapè dans le NT*, 1–3 (1958–60), deserves mention.

E. Jenni

אָהַּ } <sup>a</sup>*hāh* **ah!**

S 162; BDB 13b; HALOT 1:18b; TWOT 30; NIDOTTE 177

1. For pure exclamations such as <sup>a</sup>*hāh* “ah!” and → *hōy* “woe!” derivation from roots is unjustified (otherwise for e.g., *hālîlâ* “far be it!” → *hll*). Accent pattern and orthography often have some range of variation, so that one must arrange individual forms of the same or similar function into groups. Thus *hāh* (Ezek 30:2) and <sup>a</sup>*ānnā*/<sup>a</sup>*ānnâ*, apparently a composite of <sup>a</sup>*āh* plus *nā* “indeed” (<sup>a</sup>*ānnâ*, BL 652) will also be treated here alongside <sup>a</sup>*hāh*.

2. <sup>a</sup>*hāh* occurs 15x, with concentrations in the Elisha narratives, Jer, and Ezek. <sup>a</sup>*ānnâ* is attested 13x.

3. One finds the spontaneous exclamation to ward off fear <sup>a</sup>*hāh* “ah!” only in legends that use folksy, fairy-tale motifs (cf. P. Grebe, *Duden Grammatik der deutschen Gegenwartssprache* [1959], 324): Judg 11:35 (Jephthah’s vow); 2 Kgs 3:10; 6:5, 15 (Elisha tales). The following <sup>a</sup>*dōnî* “my lord” in 2 Kgs 6:5, 15 refers to the person addressed (Elisha; cf. Judg 11:35 *bittî* “my daughter”), not to God.

<sup>a</sup>*ānnâ* “ah” as a sign of complaint introducing a request to a superior occurs only in Gen 50:17 in a nontheological usage.

4. The remaining passages with <sup>a</sup>*hāh* belong almost exclusively to the language of prayer. The formula <sup>a</sup>*hāh* <sup>a</sup>*dōnāy yhw̄h* “ah, Lord, Yahweh” primarily introduces strongly emotional laments and petitionary prayers, in which the supplicant protests against God’s actual or presumed will: Josh 7:7; Judg 6:22; Jer 1:6; 4:10; 14:13; 32:17; Ezek 4:14; 9:8; 11:13; 21:5. F. Baumgärtel (FS Rudolph 2, 9f., 18f., 27) has shown that <sup>a</sup>*hāh* <sup>a</sup>*dōnāy yhw̄h* is an old fixed formula in cultic petitions.

Wolff (*Joel*, Herm, 22f.) identifies another fixed formula, the cry of terror announcing the day of Yahweh, introduced with *hēlîlû* “wail!”: in Ezek 30:2 *hāh layyôm* and Joel 1:15 <sup>a</sup>*hāh layyôm* “alas for the day” (cf. also Isa 13:6; Zeph 1:11, 14ff.).

<sup>a</sup>*ānnâ* (Exod 32:31; Psa 118:25[bis]; Dan 9:4; Nah 1:5, 11) and <sup>a</sup>*ānnâ* (2 Kgs 20:3 = Isa 38:3; Jonah 1:14; 4:2; Psa 116:4, 16) serve 6x each as an introduction or a transition in a petitionary prayer. Except for Exod 32:31, the divine address always follows (*yhw̄h*, except in Dan 9:4 <sup>a</sup>*dōnāy*). In accord with to its composition from an interjection of pain and the petitionary particle *nā*, the cry suggests complaint and request simultaneously.

5. The NT does not use interjections in association with appeals to God (the LXX renders <sup>ʿ</sup>*hāh* with *ō, a a, oimmoi, mēdamōs, or deomai*).

E. Jenni

אָהַל <sup>ʿ</sup>*ohel* **tent** → בַּיִת *bayit*

אוּה <sup>ʿ</sup>*wh* pi. **to desire**

S 183; BDB 16a; HALOT 1:20a; TDOT 1:134–37; TWOT 40; NIDOTTE 203

1. <sup>ʿ</sup>*wh* pi. “to desire, want” has no direct non-Hebr. counterparts.

Arab. (<sup>ʿ</sup>*awā* “to betake oneself”; see NB 190) and Syr. (<sup>ʿ</sup>*ewā* “to agree”) have verbs with the consonants <sup>ʿ</sup>*wh*(<sup>ʿ</sup>*wy*). J. L. Palache (SNHL 2–5) would like to extrapolate the common Sem. basic meaning “to fit, agree” (pi. estimative “consider fitting/pretty” > “to desire”); semantically, however, a relationship to *hwh* III (Hebr. *hawwā* “caprice, lust”; Arab. *hawiya* “to love,” *hawan* “craving, caprice”) is much more likely.

Pi. and hitp. forms of the verbs are common (the postulated ni. forms “to be pretty, lovely; be seemly” in Isa 52:7; Psa 93:5; Song Sol 1:10 may belong, despite BL 422 and HAL 20a, to *nʿh*). Three nom. formations may be added: with the preformatives *ma* - (*ma*<sup>ʿ</sup>*wayyîm* “desire,” only Psa 140:9 “do not grant the wishes of the godless”) or *ta*- (*ta*<sup>ʿ</sup>*wâ* “wish, craving”) and the derivative of the reduplicated stem (<sup>ʿ</sup>*awwâ* “desire”).

2. With a total of 27 occurrences (pi. 11x, hitp. 16x; see, however, BHS on Num 34:10) the verb is distributed among almost all the literary genres of the OT; by contrast, the noun *ta*<sup>ʿ</sup>*wâ* (21x, plus 5x in the place-name *qibrôt hatta*<sup>ʿ</sup>*wâ*, Num 11:34f.; 33:16f.; Deut 9:22) exhibits a distinct concentration in Psa and Prov (16x, of which Prov 18:1 and 19:22 are textually uncertain). <sup>ʿ</sup>*awwâ* (7x) is certainly attested in Deut 12:15, 20f.; 18:6; 1 Sam 23:20; Jer 2:24 (on Hos 10:10 see comms.).

3. <sup>ʿ</sup>*wh* pi. and hitp. offers a highly nuanced spectrum of meaning within a limited word field: the two verbal stems describe the wishing, longing, or wanting of people, which varies highly in intensity and object. Elementary and even impulsive needs awaken the desire for specific things: David wants to drink water (2 Sam 23:15); the Israelites want to eat

meat (Deut 12:20); the delicacies of the table excite the invited guest (Prov 23:3, 6); one longs for happy days, for the good in general (Isa 26:9; Amos 5:18; Mic 7:1); the bridegroom desires the bride (Psa 45:12). This multifaceted desire is viewed as healthy, normal, and good; the wise one is aware that a fulfilled wish (*ta<sup>ʾ</sup>wâ bā<sup>ʾ</sup>â* or *nihyâ*, Prov 13:12, 19) does one good.

Desire can nevertheless exceed the proper limits; it can aim for perverted objects (Prov 21:19, “the godless is desirous of evil”); it can injure the other or ruin one’s own prospects (Prov 13:4). Consequently, misdirected, inappropriate desire—covetousness—is condemned (Prov 23:3, 6; 24:1; Deut 5:21).

The word field of *ʾwh* has close contact, then, with that of  $\rightarrow$  *hmd*. W. L. Moran (“Conclusion of the Decalogue [Exod 20:17 = Deut 5:21],” *CBQ* 29 [1967]: 543ff.) distinguishes between *hmd* as desire aroused by the sight of the attractive (only in Dan 10:3 in association with food), and *ʾwh* as craving arising from an inner need (hunger, thirst, etc.; only in Gen 3:6 mediated by the eyes).

One may further compare  $\rightarrow$  *šʾl* “to ask (for)” (Deut 14:26),  $\rightarrow$  *qwh* pi. “to await” (Isa 26:8), *šhr* pi. “to seek” (Isa 26:9), *ʾûš* “to press for” (Jer 17:16), and  $\rightarrow$  *bhr* “to choose” (Psa 132:13) as pars. to *ʾwh*; cf. also *ksp* qal/ni. “to yearn,” *ʿrg* “to long for,” Bibl. Aram. *šbh* “to desire, want,” and the subst. *ʾrešet* “request” (Psa 21:3), *môrāš* “wish” (Job 17:11), *haqqāšâ* “desire” (Ezra 7:6 and 7x in Esth), *hawwâ* “lust” (Mic 7:3; Prov 10:3; 11:6), *mišʾālâ* “desire” (Psa 20:6; 37:4).

Like the verb, although in varying degrees, the noun *ta<sup>ʾ</sup>wâ* describes the more or less forceful wish (of the upright: Prov 10:24; 11:23; of the king: Psa 21:3; of the wicked: Psa 10:3; 112:10; of the lazy: Prov 21:25) and—objectified, as is also possible with Eng. “wish”—that which is desirable, the object worth striving after: *ʿeš ta<sup>ʾ</sup>wâ* “a desirable tree” (Gen 3:6), *ma<sup>ʾ</sup>kal ta<sup>ʾ</sup>wâ* “desirable food” (Job 33:20).

For an explanation of the place-name *qibrôt hatta<sup>ʾ</sup>wâ* “graves of craving” in Num 11:34, see Noth, *Num*, OTL, 84f.

Modifications in the meaning of the two verbal stems pi. and hitp. per se are difficult to discern, although some syntactical peculiarities also have semasiological consequences. The pi. almost always has *nepeš* “soul” as subj., i.e., wanting is seen as a typical expression of the vital force, the self. The noun *ʾawwâ* (a nonaugmented reduplicated stem) occurs in the fixed combination *kol-ʾawwat nepeš* “according to the desires of the heart” (*kol* is lacking only in Jer 2:24, which refers to the heat of the camel; generalizing usages with *ʾwh* pi.: Deut 14:26; 1 Sam 2:16; 3:21; 1 Kgs 11:37; hitp.: Eccl 6:2). The hitp. sometimes takes an obj. (as a rule the per. subj. is expressly named; cf. Deut 5:21; Jer 17:16; Amos 5:18; Psa 45:12; Prov 23:3, 6;

24:1), but it apparently tends toward an abs. usage (e.g., “to lust, be covetous, lascivious”), as in 2 Sam 23:15 (= 1 Chron 11:17) and with an inner obj. (internal acc.): *hit<sup>ʔ</sup>awwâ ta<sup>ʔ</sup>wâ* in Prov 21:26; Num 11:14; Psa 106:14.

4. The last two texts exhibit significant theological language: insatiable desire in itself is directed against Yahweh (wilderness tradition); cf. Psa 78:29f. Otherwise no specific theological meaning may be determined either for the verb or the nouns, not even for Isa 26:8f. (the supplicant longs for Yahweh); Psa 132:13 (Yahweh had the desire to establish himself in Zion); Job 23:13 (God accomplishes what he desires).

5. From OT roots (cf. esp. Num 11:4, 34; Psa 106:14; 78:29f.), Judaism and Christianity develop statements concerning the sinfulness of desire and impulses (cf. 1QS 9:25; 10:19; 1QS 4:9ff.; and 5:5 for the Qumran sect; rabbinical sources in StrB 3:234ff.; on the NT material, cf. F. Büchsel, “ἐπιθυμία,” *TDNT* 3:167–72; *RGG* 6:482ff.; P. Wilpert, “Begierde,” *RAC* 2:62ff.

E. Gerstenberger

לְאִילִם } <sup>e</sup>wîl **fool**

S 191; BDB 171; *HALOT* 1:21a; *TDOT* 1:137–40; *TWOT* 44; *NIDOTTE* 211

1. The noms. <sup>e</sup>wîl “fool, idiot” (subst. of the form \**qitîl*; cf. *GVG* 1:356; BL 471), <sup>e</sup>wîlî “foolish” (adj. with the poss. suf. -î, if Zech 11:15 is not a scribal error; cf. Delitzsch §53a), and *ywwelet* “foolishness” (fem. abstract form; cf. BL 477; Nyberg 215), which occur only in Hebr. (the Neo-SArab. vocabulary in Leslau 10 lies too far afield), are generally derived from a root <sup>ʔ</sup>wl, which is often introduced in etymological discussions (cf. GB 16a and König 7b, with Zorell 21a and *HAL* 21a, which are more cautious) and which is not attested as a verb.

*HAL* 21a speculates concerning the Arab. etymology: <sup>ʔ</sup>wl “coagulate, become thick” > “to become stupid.” One should compare the closely related verb *yʔl* “to be/act foolish,” attested 4x in the ni. (see KBL 358a).

In some cases <sup>e</sup>wîl is understood as an adj., thus 7x by GB, only 3x by Lis. and *HAL* (Jer 4:22; Hos 9:7; Prov 29:9); indeed, only Prov 29:9 is unequivocal, where <sup>e</sup>wîl is an attribute of אִישׁ “man”; cf. Barth §29a.

2. If the etymology remains uncertain, the semantics of the words are rather unambiguous. The distribution of the terms is already illuminative in this respect, because the words prove to be primarily wisdom terms of early date.

Apart from <sup>c</sup>wîlî, which is attested only in Zech 11:15 (the word should not be read in v 17; cf. B. Otzen, *Deuterosacharja* [1964], 260), the words occur mostly in Prov: <sup>c</sup>wîl appears here 19x of 26x (70%), while <sup>i</sup>wwelet occurs here 23x of 25x (92%). The terms are used primarily in the recognizably older collections (see Gemser, HAT 16, 4f., 55ff., 93ff.; U. Skladny, *Die ältesten Spruchsammlungen in Israel* [1962], 6ff.; as well as H. H. Schmid, *Wesen und Geschichte der Weisheit* [1966] 145ff.); in the second collection (10:1–22:16) <sup>c</sup>wîl occurs 13x and <sup>i</sup>wwelet 16x, in the fifth collection (chs. 25–29) <sup>c</sup>wîl is attested 3x and <sup>i</sup>wwelet 4x—together, then, 36x (of a total of 42x in Prov).

The word family (in total 52x) is not represented in Eccl; <sup>c</sup>wîl occurs in Job only 2x (5:2f.).

3. The chief meaning of the personally specific <sup>c</sup>wîl is “fool” or “foolish,” that of the abstract <sup>i</sup>wwelet, “foolishness.” The synonyms and antonyms are esp. significant because of the profile of their range of meaning (see T. Donald, “Semantic Field of ‘Folly’ in Proverbs, Job, Psalms and Ecclesiastes,” *VT* 13 [1963]: 285–92).

In the older portions of Prov <sup>c</sup>wîl is primarily an important contrast to (<sup>i</sup>š) <sup>h</sup>ākām, the “wise” (10:8, 10, 14; 12:15; 14:3; 17:28; 29:9), to <sup>n</sup>ābôn, the “insightful” (17:28), and to <sup>ʿ</sup>ārûm, the “cunning” (12:16; cf. 15:5). In contrast to the <sup>h</sup>akam-lēb (10:8; 11:29), the fool is <sup>h</sup>asar-lēb “one lacking understanding” (10:21), although the synonymous expression does not parallel <sup>c</sup>wîl (neither do other synonyms; see, however, <sup>p</sup>ōteh “simple” in Job 5:2 and <sup>b</sup>ānîm <sup>s</sup>kālîm “simple children” in Jer 4:22). Other close synonyms include → <sup>k</sup>sîl (the most important synonym, occurring 70x; on the distinction in meaning from <sup>c</sup>wîl see e.g., Skladny, op. cit. 52n.30), → <sup>n</sup>ābāl, and <sup>p</sup>etî (→ <sup>p</sup>th); farther removed is <sup>m</sup>šuggā<sup>c</sup> “crazy” (Hos 9:7).

<sup>i</sup>wwelet is frequently associated with <sup>k</sup>sîl (so 3x in the description of the fool, Prov 26:1–12; also 12:23; 13:6; 14:8, 24; 15:2, 14; 17:12), otherwise with <sup>c</sup>wîl (16:22; 27:22), <sup>p</sup>tāyîm “simple” (14:18; → <sup>p</sup>th), <sup>h</sup>asar-lēb “without understanding” (15:21; cf. 10:21), or <sup>q</sup>šar-<sup>ʿ</sup>appayîm/<sup>r</sup>ûah “hot-tempered” (14:17, 29). <sup>i</sup>wwelet parallels <sup>k</sup>elîmā “shame” (18:13); the most important antonym is <sup>d</sup>at “knowledge, recognition” (12:23; 13:16; 14:18; 15:2, 14); others are <sup>t</sup>bûnâ “insight” (14:29), <sup>s</sup>ēkel “understanding” (16:22), as well as <sup>h</sup>akmôt (sic)/<sup>h</sup>okmâ “wisdom” (14:1, 8).

As a stereotypical character, the <sup>c</sup>wîl is consistently portrayed negatively; the fool is the “opposite of the wise” in every respect (Skladny, op. cit. 12). Indeed, the fool’s lack of understanding is first of all “stupidity”:

the fool must be silent in the gate, wisdom is “too high” (24:7); a fool’s folly is frequently associated with mouth/lips, i.e., with (insignificant, meaningless) intellectual expression (17:28; also 10:8, 10, 14; 14:3; as well as 12:23; 15:2, 14Q; 18:13). Moral and social aspects, however, also contribute to a fool’s foolishness: the fool is hot-tempered (12:16; 27:3; 29:9; cf. 14:17, 29 and Job 5:2) and quarrelsome, lacking *kābôd* “honor” (20:3; 29:9); unlike the wise, the fool thinks he is self-sufficient and does not heed *‘ešâ* “counsel” (12:15), disregarding *mûsār* “discipline” even more (→ *ysr*; 15:5; as well as 1:7; 5:23; 7:22 without emendation; 14:3; 16:22; see 4). Although *ʔiwwelet* may be removed from the young by means of “the rod of discipline” (22:15), the *ʔwîl* is otherwise inseparably bound to folly (27:22).

4. Because of the inseparability of “fool” and “folly,” the fateful conjunction of deed and consequence is inherent in foolishness (K. Koch, *ZTK* 52 [1955]: 2ff.; G. von Rad, *KerD* 2 [1956]: 68f.). Thus the fool’s folly becomes the fool’s “discipline” (contrasted with wisdom as a “source of life” 16:22; cf. 14:3). Even more: the fool’s mouth is an “impending ruin” (10:14; cf. 10:8, 10); fools die because of ignorance (10:21; cf. 19:3; Job 5:2). Folly results in disaster and leads to death; it is disqualifying in a religious sense and becomes equivalent to “godlessness/sacrilege”; thus it is also associated with the death of the “impious” (→ *īšʿ*) in 5:23 and in the later portion of Prov, and the *ʔwîl* is related negatively to “the fear of Yahweh” in 1:7; but already in the older portion (chs. 10ff.) the “righteous” (→ *šdq*; 10:21; cf. 14:9) can be the opposite of the fool, as the contrast “wise-fool” generally corresponds here to the contrast “righteous-impious” (see Skladny, op. cit. 7ff.; Gemser, *HAT* 16, and Ringgren, *ATD* 16, on chs. 10ff.). In the expressly theological sense, *ʔwîl* can also occasionally be applied to Israel in a prophetic reprimand (Jer 4:22); but the word in Hos 9:7 is an ironic citation to be understood as traditionally gnomic in character (cf. further Isa 19:11; otherwise 35:8).

*ʔiwwelet* can also be used in the lament’s confession of sin (Psa 38:6; 69:6; cf. *ʔwîlîm* in the thanksgiving psalm, Psa 107:17, where the text is admittedly uncertain).

5. *ʔwîl* occurs 1x and *ʔiwwelet* 5x in the available Qumran corpus (according to Kuhn, *Konk.* 4b). The LXX translates *ʔwîl* by 8 different words, primarily *aphrōn* (13x); *ʔiwwelet* likewise by 8 words, primarily *aphrosynē* (8x) and *aphrōn* (3x) (concerning the LXX and NT concept of foolishness, cf. G. Bertram, “μωρός,” *TDNT* 4:832–47; W. Caspari, “Über den bibl. Begriff der Torheit,” *NKZ* 39 [1928]: 668–95; U. Wilckens, *Weisheit und Torheit* [1959]).

M. Sæbø

## אולי *ʾûlay* perhaps

S 194; BDB 19b; HALOT 1:21b; TWOT 46; NIDOTTE 218

1. The modal adv. *ʾûlay* “perhaps” is usually understood (GB 16a; HAL 21a) as a composite of the particle *ʾô* “or” and (dissimilated) *lōʾ* “not” (or *lû* “if only”), although the etymology is no longer determinative for usage. More transparent is the fixed usage *mî yôdēaʿ* “who knows?” for “perhaps.”

The related Sem. dialects use various formations unique to each (Mid. Hebr. *semmâ*; Syr. *dalmā, kʿbar*, and *ṭāk* < Gk. *tacha*; on Akk. *piqat, minde* [< *mîn îde* “what do I know?” AHW 655a], *assurri, issurre*, cf. W. von Soden, “‘Vielleicht’ im Akkadischen,” *Or* 18 [1949]: 385–91).

2. *ʾûlay* occurs 45x in the OT, primarily in narrative texts (Gen to 2 Kgs and Job 1:5, 30x, prophetic literature and Lam 3:29, 15x, lacking in Psa and the other Ketubim). In Num 22:33 *ʾûlay* should be emended to *lûlê* “if not.”

*mî yôdēaʿ* means “perhaps” 4x (2 Sam 12:22; Joel 2:14; Jonah 3:9; Esth 4:14).

W. F. Albright (*JAOS* 67 [1947]: 155n.23) suspects an extrabibl. attestation of *ʾûlay* (*ʾûlê*) in l. 2 of the Ahiram inscription (cf., however, *DISO* 13).

3. In addition to *ʾûlay* in a preterite or present context (Job 1:5, “perhaps my sons have sinned” with pf.; Gen 43:12; Josh 9:7; 1 Kgs 18:27 in nom. clauses; Gen 18:24 and Lam 3:29 with *yēš*, Gen 18:28–32 with impf.), “perhaps” is found primarily with a view to the future (Josh 14:12 in a nom. clause, 32x with impf.). In the negated clauses in Gen 24:5, 39 and in 27:12, it expresses a fear (LXX *mēpote*, also for Gen 43:12; 1 Kgs 18:27; Job 1:5; *mē* Josh 9:7; otherwise *ei/ean* [*pōs*], *hina, hopōs, isōs*). Hos 8:7 can be subordinated concessively with “even if.” All other texts contain a more or less hesitant or cautious hope (ironically in Isa 47:12[bis]; Jer 51:8; similarly already in 1 Kgs 18:27, “perhaps he sleeps”).

4. In perhaps a dozen texts, the factor of uncertainty expressed by *ʾûlay* is attributed to the will of God (Num 23:3, “whether Yahweh will perhaps encounter me”; 23:27, “perhaps it pleases God”; Josh 14:12,

“perhaps Yahweh is with me”; 1 Sam 6:5, “perhaps he will then take his heavy hand from you”; 14:6, “perhaps Yahweh will do something for us”; 2 Sam 16:12, “perhaps Yahweh will look upon my distress”; 2 Kgs 19:4 = Isa 37:4, “perhaps Yahweh will hear”; Jer 21:2, “perhaps Yahweh will do a miracle for us, as he has before”; Amos 5:15 [see below]; Jonah 1:6, “perhaps he will take notice of us”; Zeph 2:3 [see below]), just as in three texts with *mîyôdēa*<sup>c</sup> (2 Sam 12:22, “Who knows? Perhaps Yahweh will be gracious to me”; Joel 2:14, “Who knows? Perhaps he will yet repent”; Jonah 3:9, “Who knows? Perhaps God will yet repent”; the fourth text, Esth 4:14, “and who knows whether you have not come to the kingdom for such an opportunity?” refers to an irrational dispensation of fate). Nevertheless, the statement concerning Yahweh is not thereby an expression of one’s uncertainty with respect to a moody despot, but a consciously humble attitude of one who takes into account the sovereign freedom of God. This humility is also particularly true of two very reserved prophetic salvation sayings: Amos 5:15, “perhaps Yahweh will then . . . be gracious to the rest of Joseph”; and Zeph 2:3, “perhaps you will be hidden on the day of Yahweh’s wrath” (cf. R. Fey, *Amos und Jesaja* [1963], 53). Wolff (*Joel*, Herm, 50) writes concerning Joel 2:14: “The ‘perhaps’ of hope is appropriate to the humility of one who prays [2 Sam 12:22; Lam 3:29b]; in the proclamation of the messenger it underscores the fact that the one called to return stands, for the time being, under the message of judgment [Amos 5:15; Zeph 2:3; Jonah 3:9] and has to face up to it. That the faithful and merciful God is also free in relation to his own anger (‘slow to anger’ אֲרֵךְ אַפַּיִם) is the foundation of the hope expressed in the ‘perhaps.’ “

5. Of NT texts with *isōs* (Luke 20:13) and *tacha* (Rom 5:7; Phlm 15), only Phlm 15 is distantly reminiscent of the thought in Esth 4:14.

E. Jenni

## אָוֵן *ʾāwen* harm

S 205; BDB 19b; *HALOT* 1:22a; *TDOT* 1:140–47; *TWOT* 48a; *NIDOTTE* 224

1. The Hebr. noun *ʾāwen* “harm, disaster” usually derived from a root \**ʾwn* “to be strong, powerful” (*HAL* 21b), seems to have cognates only in NWSem.

The word, which occurs only as a noun, may be formed as a segholate with a negative meaning in intentional contrast to the positive *ʾōn* “manly vigor, vigor, wealth”

(HAL 22a). The derivative  $t^{\circ}unim$  (Ezek 24:12) is textually very uncertain (cf. Zimmerli, *Ezek*, Herm, 1:495–96). The PNs  $\gamma on$  (Num 16:1 txt?),  $\gamma onam$ , and  $\gamma onan$  (cf. *IP* 225) probably belong to the same root, but the subst.  $\gamma on$  “sorrow” does not (Gen 35:18; Deut 26:14; Hos 9:4; root  $\gamma ny$ ; cf. C. Rabin, *Scripta Hierosolymitana* 8 [1961]: 386f.).

The etymology and meaning of Ug. *an* and *un*, suggested as cognates (*WUS* nos. 292, 295; *UT* nos. 238, 240), are difficult; reference should probably be made to *anm* (pl. “power”; 1.6.1.50). The relationship to Aram.  $\gamma wyn$ , which accompanies *mwt* “death” in *KAI* 222B.30, also remains unclear (cf. *KAI* 2:256; Fitzmyer, *Sef.* 69).  $\gamma wn$  in Aḥ. 160 (*DISO* 6) is also uncertain.

2.  $\bar{\gamma}awen$  is not a word of narrative/report language. The 80 OT examples (incl. Ezek 30:17, which should be vocalized, however, as the place-name  $\gamma on$ ) are found with only one exception in poetical texts, whether cultic, wisdom, prophetic, or literary (Job).

Two-thirds of the examples occur in Psa (29x), Job (15x), and Prov (10x). It occurs 24x in various prophetic books (Isa 12x), as well as in Num 23:21 and 1 Sam 15:23.

The oldest examples are 1 Sam 15:23 and Num 23:21. The texts Amos 5:5; Hos 6:8; 10:8; 12:12; Isa 1:13; 10:1; 31:2; Mic 2:1; Hab 1:3(?); 3:7; Psa 7:15; 28:3; 41:7; 59:3, 6; 101:8 are also probably pre-exilic. Some of the others are surely, and some probably, exilic or post-exilic.

The subst.  $\gamma on$  “power, wealth” occurs 10x (Gen 49:3; Deut 21:17; Isa 40:26, 29; Hos 12:4, 9; Psa 78:51; 105:36; Job 20:10; 40:16).

3. The chief meaning of the term largely reflects its etymology: destructive power (S. Mowinckel, *Psalmenstudien* [1921], 1:30ff.). Its usage presupposes a dynamistic understanding of existence (a concept of domains of action): disaster is a mighty process, and might, when it assumes a negative form, is disaster.

(a)  $\bar{\gamma}awen$  is connected with various types of unhealthy activities: mental processes (Isa 32:6; Psa 55:4, 11; 66:18) or intentional thoughts ( $\bar{\gamma}awen$  is associated with  $\rightarrow hsb$  “to scheme” and derivatives in Isa 55:7; 59:7; Jer 4:14; Ezek 11:2; Mic 2:1; Psa 36:5; Prov 6:18); the utterance of words (Isa 58:9; Psa 10:7; 36:4; Job 22:15; 34:36; Prov 17:4; 19:28); deeds of every sort, e.g., cultic (Isa 1:13; Zech 10:2), political (Isa 31:2), legal (Isa 10:1; 29:20), military (Psa 56:8), etc. With respect to this sphere, cf. the characteristic association of  $\bar{\gamma}awen$  with  $\rightarrow p\bar{q}$  “to do” (23x  $p\bar{o}^{cl}\bar{e}$  [ptcp.]  $\bar{\gamma}awen$  “evildoer”: Isa 31:2; Hos 6:8; Psa 5:6; 6:9; 14:4; 28:3; 36:13; 53:5; 59:3; 64:3; 92:8, 10; 94:4, 16; 101:8; 125:5; 141:4, 9; Job 31:3; 34:8, 22; Prov 10:29; 21:15; 1x pf.: Prov 30:20). The general applicability of the term to all types of unhealthy activity is frequently attested; cf. Isa 59:4–7; Psa

5:6; 7:15; 55:4, 11; 92:8, 10; Job 5:6; Prov 12:21; esp. Prov 6:12–14; Job 31:3ff.

(b) *ʾāwen* describes not just unhealthy activities, however, but also their consequences; cf. Num 23:21; Jer 4:15; Amos 5:5; Hab 1:3; 3:7; Psa 90:10; Job 21:19; Prov 22:8; etc. These examples and texts in which the scope of the word encompasses both deed and consequence (Psa 55:4; 56:8; Job 15:35; 18:7, 12; Isa 59:4, 6b, 7; cf. also Job 4:8; Prov 22:8) indicate that the word, in accord with its dynamistic background, essentially always envisions the totality of a catastrophic process.

(c) The observations put forward under (a) and (b) indicate that *ʾāwen* is not a material concept that refers descriptively to a specific activity or to the realm of a historical process.

As a consequence, an original meaning “magic” or “sorcery” for *ʾāwen* (Mowinckel, op. cit.) is neither to be expected from its etymology nor recognized in the usage of the term in the OT. This circumstance does not preclude the possibility that the concept could refer to magical activities or their unhealthy consequences (cf. the relationship between Num 23:21 and 23; cf. 1 Sam 15:23; Zech 10:2; Psa 59:3, 8?; 64:3, 6f.?). This reference is present to the extent that magic was the most applicable—but not the only—means for the manipulation of the realm of phenomena. The aforesaid is true also for the *ʾāwen*-doer in Psa (see 3a). The nature of their deeds can be inferred only from the context in which the term is used, not from the term itself (cf. G. W. Anderson, “Enemies and Evildoers in the Book of Psalms,” *BJRL* 48 [1965]: 18–30). Moreover, they are not only doers of iniquity but workers of calamity, as the occasional dimension of the completed effect in *pʿl* “to do” indicates. Finally, *ʾāwen* is neither “a means to the end” (Mowinckel, op. cit. 8, 12, 15, 29, etc.) nor the end of a deed. The description of deeds, consequences, and circumstances as *ʾāwen* indicates another function of the word.

(d) *ʾāwen* characterizes an event negatively as a dangerous power for disaster. The word is always used as a condemnation of another’s act, never as a description of one’s own act. The adulteress in Prov 30:20 does not dispute the adultery, but the accusation that her adultery is a disaster-bringing act. An investigation of the semantic field confirms this analysis: Of roughly 45 close synonyms, the most prominent by far are *raʿ* “bad, evil” (17x), *rāšāʿ* “guilty” (17x), and *ʿāmāl* “hardship” (11x). Antonyms such as *mišpāṭ* “justice,” *tôm* “purity,” *šedeq* “righteousness,” and *ʿmûnâ* “faithfulness” confirm the analysis.

(e) The basic meaning “power of disaster” occasionally encounters difficulty in translation because of its foreignness to modern ontology. One no longer calls a deed a “disaster” but a “misdeed,” “wrong,” “crime” (cf. *HAL* 21f.). Because such a phenomenon connotes invalidity, translation as “deception” or “nothing” (Isa 41:29) may occasionally be justified. Although the term can refer to an “idol cult,” it may hardly be so translated (1 Sam

15:23; Zech 10:2; Hos 10:8; cf., however, Isa 66:3 → *ʔēl* 4). Cf. V. Maag, *Text, Wortschatz und Begriffswelt des Buches Amos* (1951), 120.

4. The fact that in the OT *ʔāwen* negatively designates a disastrous phenomenon and that it is never used for an act of God (in contrast to *rāʕ* “calamity,” e.g., Isa 31:2, “indeed he too is wise and brings calamity”; cf. Jer 4:6; 6:19; 11:11, 17, 23; Mic 2:3, etc.) signifies that every type of *ʔāwen*- act or *ʔāwen*- sphere is implicitly or explicitly ungodly and thereby always appears theologically disqualified. Although the life setting in which an act is disqualified (wisdom, seer or prophetic speech, prayer in the temple, etc.) and correspondingly the form of the disqualification (a wisdom saying, a prophetic judgment speech) reflect the situation, the criterion for the disqualification is the notion that that which is called *ʔāwen* is a perversion of the salvation-effecting spheres of power and thereby of the salvation-effecting divine presence.

Thus *ʔāwen* occurs: in oracular usage as an alternative to obedience to Yahweh (1 Sam 15:23; Zech 10:2); in the perversion of the meaning of the sanctuaries (Amos 5:5; Hos 10:8; Isa 1:13); in every act that stands in contrast to the salvific effects of law, justice, and righteousness (Hos 6:8; 12:12; Mic 2:1; Psa 14:4; Prov 12:21; 21:15). The *ʔāwen*-doer is finally revealed as a denier of God (Isa 32:6; Jer 4:14–18; Psa 10:7; 14:4; 53:5; 92:8, 10; Job 22:15; 34:8, 22, 36; Prov 19:28). According to Isa, the *pōʕlê ʔāwen* are people “who do not look to the holy one of Israel and do not consult Yahweh” (31:1f.) Therefore Yahweh is against them (Psa 5:6; 36:4f., 13; Prov 10:29) and commands them to quit *ʔāwen* (Job 36:10, 21). According to Job 5:6f., humanity causes *ʔāwen*: “For disaster does not arise from the dust, trouble does not sprout from the earth; rather, a human begets trouble.” Cf. Job 11:11, 14 (quite to the contrary, cf. Psa 90:7–10).

The reason that the acts of evildoers are called *ʔāwen* in Psa seems to consist in the fact that either the calamity that they wish to bring upon the assailed is unjustified, or that they wish to afflict the assailed with calamity on account of the trouble which has befallen them, even though they have trusted in Yahweh’s (oracle of) protection. In both cases they act against Yahweh. Thus their characterization as *pōʕlê ʔāwen* implies a specifically theological judgment.

5. The LXX renders *ʔāwen* irregularly with *anomia*, *kopos*, *mataios*, *ponēria*, *adikia*, etc. The implications of the Hebr. have been lost here. In contrast, they live on in Qumran; cf. the texts in GCDS 9.

R. Knierim

אור *ʔōr* light

S 216; BDB 21b; HALOT 1:24b; TDOT 1:147–67; TWOT 52a; NIDOTTE 240

1. Terms related to  $\text{ʕōr}$  “light” are attested almost exclusively in Akk. and Can. (Akk. *ūru/urru* “light,” mostly “day”; Ug. *ar*, WUS no. 368; cf. nos. 370, 372; UT no. 114; Phoen.  $\text{ʕ}$ - in PNs; cf. Harris 73; also Huffmon 169f. and Gröndahl 103), while elsewhere other roots are used for “light” (Akk. *nūru* and Arab. *nūr*; Aram. *nhr*, as in Bibl. Aram. *n<sup>h</sup>ôr* Dan 2:22 Q; cf. KBL 1098b; on Jew. Aram.  $\text{ʕûrtā}$ , see WTM 1:46a; also DISO 23).

The Hebr. root yields the verb  $\text{ʕōr}$ , which occurs in the qal “to be light,” perhaps also in the ni. (uncertain), esp., however, in the hi. (causative “to cause to be light, illuminate” and inner-causative “to light”), as well as the substs.  $\text{ʕōr}$  (masc., although fem. in Jer 13:16 txt? and Job 36:32 txt?) and  $\text{ʕôrâ}$  “light,”  $\text{ʕûr}$  “light,” and *māʕōr* “light = body of light, lamp.”

Various lexicons also explain the nom. *m<sup>o</sup>ʕôrâ* in Isa 11:8 as a derivative of this root (e.g., GB 393a, BDB 22b, Zorell 404b), yet KBL 489b (with reference to Perles, *Journal of the Society of Oriental Research* 9 [1925]: 126f.; so also Fohrer, *Jesaja*, ZBK, 1:151; cf. Kaiser, *Isa 1–12*, OTL [19832], 253n.12) renders it “the young one,” following Akk. *mūru* “young animal.”  $\text{ʕûr}$  II (in the expression *ʕûrîm w<sup>t</sup>tummîm*) and III (*ʕûr kâsdîm*) are distinct from this root. But it can hardly be justified to explain  $\text{ʕōr}$  in Isa 18:4 and Job 37:11 in the sense of “rain” or “dew” after Arab. *ʕary* and to reckon in this case with a homonymous  $\text{ʕōr}$  (contra I. Eitan, *HUCA* 12/13 [1938]: 65f.).

2. Exact statistics for the noun  $\text{ʕōr}$  are complicated by the fact that the form may be understood in some cases also as a qal inf. (cf. HAL 24a, no. 3; Zorell 23b). According to Lis., the verb occurs 41x, 5x in the qal (Mandl. adds Gen 44:3 and 1 Sam 29:10 as well, although he takes 2 Sam 2:32 as a ni.), 2x in the ni. (Psa 76:5 and Job 33:10, both textually uncertain), and 34x in the hi. (15x in Psa). Its distribution is less characteristic than that of the noun  $\text{ʕōr}$ , which is attested 124x (pl. only in Psa 136:7) and seems to be associated primarily with wisdom.

$\text{ʕōr}$  is attested 32x in Job, 4x in Prov, and 3x in Eccl. Of 19 occurrences in Psa (in addition to Lam 3:2), several appear in wisdom psalms or in texts influenced by wisdom (36:10; 37:6; 49:20; 89:16; 97:11; 104:2; 112:4; 119:105; 139:11).

Moreover, it is noteworthy that of 47 prophetic occurrences, 27 are in Isa, which is frequently shaped by wisdom (13x in Proto-Isa, primarily later texts; 6x in Deutero-Isa, to which, in the light of 1QIsaab, 53:11 must be added; and 8x in Trito-Isa, where 60:1, 3, 19f. are esp. noteworthy); in Jer 5x and in Ezek only 2x (32:7f.). In the Minor

Prophets, 13 occurrences are distributed in books close in time to Isa (e.g., Amos 5:18, 20; 8:8 [txt?], 9 [cf. H. W. Wolff, *Amos the Prophet* (1973), 84]; Mic 2:1; 7:8f.), in the so-called disciples of Isa (Hab 3:4, 11; Zeph 3:5), and in the late texts Zech 14:6 (txt?), 7, although the word occurs only 1x in Hos (Hos 6:5 txt?).

In narrative literature,  $\text{ʔōr}$  occurs almost exclusively in the formulaic temporal designation *ʕad-ʔōr habbōqer* “until daybreak” (Judg 16:2; 1 Sam 14:36; 25:[22], 34, 36; 2 Sam 17:22; 2 Kgs 7:9; abbreviated Judg 19:26; cf. Gen 44:3; 1 Sam 29:10; Neh 8:3); otherwise also in Exod 10:23; 2 Sam 23:4; and 6x in Gen 1:3–5, 18 P (on the impact of wisdom on Gen 1, see S. Herrmann, *TLZ* 86 [1961]: 413–24).

The unique pl. form  $\text{ʔōrîm}$  in Psa 136:7 “(great) lights” probably best corresponds to the  $m^{\text{e}}\text{ʔōrōt}$  “lights, luminaries” of Gen 1.  $mā\text{ʔōr}$  occurs 19x (9x in Exod–Num in a cultic context, 5x in Gen 1 of the stars);  $\text{ʔûr}$  is attested 6x, 5x in the later portions of Isa. The latest form may be the fem.  $\text{ʔôrâ}$  (Psa 139:12; Esth 8:16).

The foregoing statistics do not include  $\text{ʔōr}$  in 1 Sam 25:22 (cf. *BHS*), although Isa 18:4 (in Mandl. under  $\text{ʔōr}$  II) and Amos 8:8 (in Lis. under  $y^{\text{e}}\text{ʔōr}$ ) are included.

3. The basic meaning of the primary noun  $\text{ʔōr}$  is “light”; its proximity to “fire” (most pronounced in  $\text{ʔûr}$ , Isa 31:9; 44:16; 47:14; 50:11; Ezek 5:2; perhaps also Job 38:24; cf. G. R. Driver, *SVT* 3 [1955]: 91f.; *CPT* 260f.) is occasionally apparent (cf. Isa 10:17; Psa 78:14);  $nēr$  “lamp” also appears frequently as a par. term (Psa 119:105; Job 18:6; 29:3; Prov 6:23; 13:9; cf. Jer 25:10). “Light” in this context refers, first of all, to daylight (cf. the formulaic usage in the narrative literature [see 2], as well as in Mic 2:1; Prov 4:18). Nevertheless,  $\text{ʔōr}$  is not identical with sunlight, for it can also be associated with the light of the moon and stars (Isa 13:10; 30:26; Ezek 32:7), as well as with *šahar* “first daylight” (Isa 58:8; Job 3:9; 41:10; Dalman, *AuS* 1:601; contra L. Köhler, *ZAW* 44 [1926]: 56–59; and KBL 962: “dawn”); association with the verbs  $zrh$  and  $yš^{\text{v}}$  in the meaning “to rise” is not in itself “an indication that the rising of the sun is implied” (S. Aalen, *Die Begriffe “Licht” und “Finsternis” im AT, im Spätjudentum und im Rabbinismus* [1951], 39, emphasizes the Israelites’ “presolar” worldview and the alternation of day and night as a basic element of the same, op. cit. 10ff.; id., *RGG* 4:357–59; id., *BHH* 2:1082; contrast W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* [1964], 95–100).

The alternation of day and night itself contributed greatly to a metaphorical and symbolical usage of the word. On the one hand, the dawning morning light (often only *bōqer* “morning”) became a symbol of divine deliverance in the sense of military victory (cf. Exod 14:24; 2 Kgs 19:35 = Isa 37:26; Isa 17:14; Psa 46:6), of the pronouncement of judgment in the juristic sense (Zeph 3:5; Psa 37:6; also Hos 6:5; cf. Isa 59:9), and of medical healing and assistance (Psa 56:14; cf. Isa 58:8; in Job 33:28, 30

*šahat* “grave” is an antonym; “to see light” = “to live” in Psa 49:20; Job 3:16, cf. v 20; so J. Hempel, “Die Lichtsymbolik im AT,” *Studium Generale* 13 [1960]: 352–68; also Aalen, op. cit.; J. Ziegler, “Die Hilfe Gottes ‘am Morgen,’” FS Nötscher 281–88).

*ʾôr* frequently attracts par. expressions in which some word for “darkness” provides the contrary notion, esp. in wisdom texts.

The most important opposite in this respect is *ḥōšek* “darkness” (Gen 1:3–5:18; Isa 5:20, 30; 9:1; 58:10; 59:9; Amos 5:18, 20; Mic 7:8; Psa 112:4; 139:11; Job 12:22, 25; 18:18; 29:3; 38:19; Eccl 2:13; Lam 3:2; the word occurs a total of 80x, 23x in Job and 14x in Isa). *ʾôr* is associated with the verb *ḥšk* qal “to be dark” (11x), hi. “to darken” (6x) in Job 18:6; Eccl. 12:2; cf. Isa 13:10; Amos 5:8; 8:9; Job 3:9. *ḥʾšēkâ* “darkness” (6x) occurs in Psa 139:12 alongside *ʾôrâ, maḥšāk* “dark place” (7x) in Isa 42:16 alongside *ʾôr* (cf. also Bibl. Aram. *ḥʾšōk* in Dan 2:22 alongside *nʿhôr*).

Other antonyms are *ʾōpel* “darkness” (9x, 6x in Job) in Job 30:26, *ʾāpēl* “dark” (1x) in Amos 5:20; *ʾpēlâ* “darkness” (10x) in Isa 58:10; 59:9; *ʿrāpel* “cloudiness” (15x) in Jer 13:16; *šalmāwet* “darkness” (18x, 10x in Job) in Isa 9:1; Jer 13:16; Job 12:22 (on the etymology see D. W. Thomas, *JSS* 7 [1962]: 191–200; on wisdom usage, J. L. Crenshaw, *ZAW* 79 [1967]: 50).

Other terms in the semantic field are *ʿlātâ* “darkness” (Gen 15:17; Exod 12:6f., 12), *ʿpâ* “darkness” (Amos 4:13; Job 10:22), *mûʿāp* “darkness” (Isa 8:22 [txt em], 23), *qadrūt* “darkening” (Isa 50:3), *qdr* qal “to darken” (Jer 4:28, etc.; hitp. 1 Kgs 18:45; hi. Ezek 32:7f.), *šll* qal “to become dark” (Neh 13:19; on *šēl* “shadow” → *ʿūz*), as well as *nešep* “dawn/dusk” (12x, e.g., “darkness” in Isa 59:10). On the whole word group, see Aalen, op. cit.; H. Conzelmann, “σκότος,” *TDNT* 7:423–45.

Synonyms of and pars. for *ʾôr* are more ambiguous than its antonyms. In addition to *nēr* “lamp” (see above), *nōgah* “brilliance” (19x, in addition to Aram. *negah* in Dan 6:20) in Isa 60:3; Amos 5:20; Hab 3:4, 11; Prov 4:18, and *nʿgōhâ* in Isa 59:9 may be mentioned; *ngh* qal “to light” (3x) is associated with *ʾôr* in Isa 9:1; Job 22:28, hi. “to light up” (3x) in Isa 13:10.

Cf. further → *šemeš* “sun” in Eccl 11:7, → *kʾbōdyhwh* in Isa 60:1 (cf. v 2b with *zrh* “to rise” of Yahweh) and other pars. such as joy, righteousness, salvation, which involve the metaphorical and theological usage of *ʾôr* (e.g., Isa 42:6; Jer 25:10; Mic 7:9; Psa 27:1; 36:10; 97:11).

Additional semantically related terms are the verbs *ʾhl* hi. “to shine” (Job 25:5), *hll* hi. “(to cause) to shine” (Isa 13:10; Job 29:3; 31:26; 41:10), *zhr* hi. “to shine” (Dan 12:3), *zrh* “to rise, radiate” (18x, → *šemeš*), *zrq* qal “to be light” (Hos 7:9), *šhl* hi. “to cause to shine” (Psa 104:15), the substs. *zōhar* “brightness” (Ezek 8:2; Dan 12:3), *yipʿâ*

“brilliance” (Ezek 28:7, 17), *nēṣaḥ* “brightness” (Lam 3:18; 1 Chron 29:11), and the adjs. *bāhîr* “brilliant(?)” (Job 37:21; cf. Wagner no. 35), *ṣaḥ* and *ṣāḥîaḥ* “brilliant” (Isa 32:4; Song Sol 5:10 and Ezek 24:7f.; 26:4, 14, resp.; cf. also J. A. Soggin, *ZAW* 77 [1965]: 83–86); → *yp*<sup>c</sup> hi.

*nhr* qal “to shine” (Isa 60:5; Jer 31:12; Psa 34:6) and *n<sup>o</sup>hārâ* “(day)light” (Job 3:4) are Aramaisms (Wagner nos. 184f.). The Bibl. Aram. word for “brilliance” is *zîw* (Dan 2:31; 4:33).

4. The usual distinction between literal and metaphorical usage of the word *ṣôr* is hardly sufficient to reveal its theological profile, which encompasses both of these. A classification of usages in (a) wisdom cosmological thought and (b) cultic salvation thought may be more appropriate; in addition, usages in (c) eschatological proclamation and (d) statements that relate specifically to God may be investigated separately.

(a) In wisdom concepts of order, the light of God is the first “good” work of creation (Gen 1:3f.). Gen 1 makes no such statement of darkness; it remains theologically ambivalent, for, despite its positive role as night in God’s creation, resulting from God’s division and naming (Gen 1:4f.; cf. Westermann, *Gen*, CC, 1:113–15) or separation between light and darkness (Job 26:10; cf. 38:19), darkness is the time of crime (Job 24:13ff.), it symbolizes distress and judgment, and it will be eliminated in the eschaton (see c). Light stands in tension, then, with darkness (cf. Aalen, op. cit. 16f.), which can be maintained only by the “pancausality” and might of God (cf. Isa 45:7, “I form light and create darkness”; see d).

As light and darkness are related to one another, so (1) for the individual, are life and death (cf. Job 3:4, 9, 16, 20f. and, in the Elihu speech, 33:28, 30; also Eccl 12:2ff.); (2) for society, are the “righteous” and the “evildoer” (Job 12:25; 18:5f., 18; 22:28; 38:15; Prov 4:18; 13:9; also Psa 97:11; 112:4), concerning which “righteousness as world order” is the issue (cf. H. H. Schmid, *Gerechtigkeit als Weltordnung* [1968]) and the theodicy question arises (cf. Job 24); (3) for cognition (but not without a religio-ethical character), are wisdom and folly (Eccl 2:13; → *ṣ<sup>o</sup>wîl*). When the established order is disturbed, Isaiah raises his cry of woe (Isa 5:20).

(b) This pair of opposites also refers to the salvation and judgment of God. In cultic salvation thought, the light of God(’s countenance) expresses his gracious attention, as apparent in the priestly blessing in Num 6:25 (*ṣôr* hi.) with older material (in a later framework; cf. Noth, *Num*, OTL, 58; C. Westermann, *Blessing in the Bible and the Life of the Church* [1978], 42–45), often later in Psa (cf. Psa 36:10; otherwise in expressions of confidence, 4:7; 27:1; in the thanksgiving hymn in 56:14 and in the lament 43:3, as well as in the wisdom exhortation in 37:6; cf. 89:16; A. M. Gierlich, *Der Lichtgedanke in den Psalmen* [1940]), and also as echoed in the

prophetic literature (Isa 2:5).

Important for salvation history are Psa 78:14, where  $\gamma\hat{o}r$  is associated with the desert wandering (cf. Exod 13:21f.; Psa 105:39), and Psa 44:4, where it is associated with the conquest.  $\gamma\hat{o}r$  is also associated with the king who brings salvation (2 Sam 23:4; Prov 16:15).

(c) On the one hand, the prophetic proclamation of imminent judgment transforms the light of salvation into the darkness of approaching catastrophe (Amos 5:18, 20; Isa 13:10; on the day of Yahweh see F. C. Fensham, *ZAW* 75 [1963]: 170f.; elsewhere Amos 8:9; Isa 5:30; Jer 4:23; 25:10; Ezek 32:7f.; Jer 13:16 in the context of prophetic warnings); Lam 3:2 exemplifies a lament in the aftermath of a catastrophe.

On the other hand, the prophetic salvation-eschatology transforms the darkness of distress into the light of dawning salvation (Isa 8:23–9:1; 10:17; 42:16; 58:8, 10; Mic 7:8f.). Salvation will be valid not only for Israel but also for the nations (Isa 51:4); it will be appropriated to them through a special mediator of salvation (Isa 42:6; 49:6).

Later eschatology uniquely presents the coming salvation experience in relationship to an earlier order (cf. Jer 31:35, where the certainty of salvation is emphasized by the certainty of the order of creation, embodying a new cooperation of cosmological thought and salvation thought, also a characteristic of Deutero-Isa; see von Rad, "Theological Problem of the OT Doctrine of Creation," *PHOE* 131–43), in supersession of the extant order (cf. Isa 30:26; as well as 10:17), or in suspension of the created order (Isa 60:19f.; Zech 14:6f.; cf. also Hab 3:11; more texts in Aalen, op. cit. 20ff.; cf. H.-J. Kraus, *ZAW* 78 [1966]: 317–32). In Zech 14:6f., too, the interest of the post-exilic community has shifted, though not so much to a direct suspension of the created order as to the person of God and his majestic final theophany (cf. M. Sæbø, *Sacharja, 9–14* [1969], 298–300).

(d) Because light—as well as the "luminosities" ( $m^e\gamma\hat{o}r\hat{o}t$  Gen 1:14ff.; Psa 136:7–9)—is God's creation, it is completely subordinate to him. Light is an aspect not of his being but of his manner of appearance, e.g., in theophany (cf. Isa 60:1ff.; Hab 3:4, 11; also Psa 44:4; cf. Aalen, op. cit. 73ff.; J. Jeremias, *Theophanie* [1965], 24ff., etc.; also F. Schnutenhaus, *ZAW* 76 [1964]: 1–22). God surrounds himself with light not only in his coming but also in his heavenly abode (Psa 104:2; one should not conceive of God in solar categories either here or in Ezek 1 or 43; so Aalen, op. cit. 82ff., contra J. Morgenstern, et al.). Just as light "clothes" ( $\rightarrow Ib\check{s}$ ) him, so also is it an attribute of his revealed word and law (Psa 119:105; Prov 6:23). He is the exalted ruler over his creation (Psa 139:11f.; Job 12:22; 28:11); consequently, he alone knows his origins (Job 38:19f.). "All shining stars" praise him (Psa 148:2).

Theophoric PNs formed with words for “light,” such as *ʕûrîʕêl*, *ʕûrîyâ(hû)*, *ʕâbînêr*, *ʕabnêr*, *nêrîyâ(hû)*, and probably also the majority of extrabibl. names of this type (Akk.: Stamm, *AN* index s.v. *nûru*, *namâru*, etc.; Huffmon 169f., 237, 243; Palm.: A. Caquot, *Syria* 39 [1962]: 243 with bibliog.), should be understood metaphorically (light = fortune, salvation; *IP* 167–69), not as witnesses to astral religion.

Thus *ʕôr* “light” is a very important theological concept that signifies first a work of creation and a mode of God’s appearance. From this dual conceptual center, it develops in several directions, particularly with respect to God’s salvation—first for Israel and then also for the nations.

5. The LXX renders *ʕôr* in various ways, most of which occur only once; *phōs* clearly dominates (cf. Gierlich, op. cit. 3, etc.). On early Jewish and rabbinic material, cf. Aalen, op. cit. 96ff., 237ff. In the Qumran documents the usage of *ʕôr* (according to Kuhn, *Konk.* 4f., the subst. occurs 42x, the verb 17x; cf. *GCDS* 9, 10) agrees largely with the OT (cf. F. Nötscher, *Zur theol. Terminologie der Qumran-Texte* [1956], 76ff.; H. W. Huppenbauer, *Der Mensch zwischen zwei Welten* [1959], 26ff., 71, 80ff.); although the contrast between “light” and “darkness” (socially as well) is more accentuated.

In distinction from the OT and the Qumran corpus, in the NT light refers to the being of God, esp. in Johannine theology (cf. 1 John 1:5; also John 1:1–18; R. Bultmann, *John* [1971], 40ff.; P. Humbert, “Le thème vétérotestamentaire de la lumière,” *RTP* 99 [1966]: 1–6).

M. Sæbø

## תִּיב ʕôt sign

S 226; BDB 16b; *HALOT* 1:26a; *TDOT* 1:167–88; *TWOT* 41b; *NIDOTTE* 253

1. *ʕôt* occurs in NWSem. (in OT times only in Hebr. and Bibl. Aram. *ʕāt*) and in Arab.; apparently Akk. *ittu*, whose range of meaning resembles that of the NWSem.-Arab. word, is also related to *ʕôt* (*AHW* 406; *CAD* I:304–10). The origin is unknown; one may postulate a root *ʕwy*.

The semantic range of the word in these languages is very broad and encompasses the profane and the religious spheres (on the Arab. see Lane 1:135; on the Syr. see Payne-Smith 412f.). In a Neo-Pun. inscription, *ʕ* apparently means “memorial” (*KAI* no. 141.4).

2.  $\text{ʔ}ôt$  occurs in Hebr. 79x, 44x sg. and 35x pl. (Pentateuch 39x, in all narrative strands; with the exception of Job 21:29, the term does not appear in wisdom literature; occurrences are equally distributed in narrative, prophecy, and psalmody; cf. the chronological and topical statistics in C. A. Keller, *Das Wort OTH als "Offenbarungszeichen Gottes"* [1946], 7f.), in addition to 3x in Aram. (Dan 3:32f.; 6:28).

$\text{ʔ}ôt$  should also be read in Num 15:39 and 1 Sam 10:1 (LXX); Joel 2:23 should perhaps be emended (W. Rudolph, FS Baumgartner 249).

$\text{ʔ}ôt$  occurs outside the Bible shortly before the exile in Lachish Letter IV (*KAI* no. 194.10ff.). The text reads (*ANET* 322b): "And let (my lord) know that we are watching for the signals (*mśʔt*, a technical term; cf. Judg 20:38, 40; Jer 6:1) of Lachish, according to all the indications (*ʔtt*) which my lord hath given; for we cannot see Azekah (or, no sign [*ʔt*] from Azekah is visible)." The translation of the last line is admittedly disputed (for bibliog. see *DISO* 29). *ʔtt* here apparently means "military signals." Similarly, the Arab. equivalent, *ʔāyat*, can have this meaning, otherwise unattested in Hebr. (Lane 1:135).

3. The OT usage of the term  $\text{ʔ}ôt$  may not be limited a priori to specific areas of life (contra Keller, op. cit., 66ff.; cf. B. O. Long, *Problem of Etiological Narrative in the OT* [1968], 65–86). The basic meaning is "sign" in the senses of "identification" and "indication."

In a very primitive usage of the word, the "sign of Cain" in Gen 4:15 describes a tribal sign tattooed on the forehead that identifies one belonging to the Kenites and to their tribal obligations (sevenfold blood retaliation!). At the hands of the Yahwist, the sign undergoes a theological interpretation in the total context of the primeval history.

The term *tôtāpōt* "mark" (3x par. to  $\text{ʔ}ôt$ ) also apparently had a similar original meaning. The Dtr expression "an  $\text{ʔ}ôt$  on the hand and *tôtāpōt* between the eyes" (Exod 13:16; Deut 6:8; 11:18; in Exod 13:9 with *zikkārôn* "memorial" instead of *tôtāpōt*, → *zkr*) is surely meant as a spiritualization, but one may trace it back to the concept of a tattoo (cf. further Noth, *Exod*, OTL, 101, "jewelled ornaments. . . prophylactic amulets").

In the broader development of the term,  $\text{ʔ}ôt$  also signifies "field signal" in profane contexts (Num 2:2, taken up by the War Scroll from Qumran; apparently also in Psa 74:4; cf. Kraus, *Psa*, CC, 2:95, 98).

*degel* "field signal, banner > tribal division" (Num 1:52; 2:2–34; 10:14–25; 13x) is associated with the  $\text{ʔ}ôt$  of Num 2:2; Song Sol 2:4 still seems to offer the basic meaning "sign, flag" or something similar (cf. Rudolph, *KAT* 17/2, 130f.; Gerleman, *BK* 18, 117f.); the Elephantine papyri (*DISO* 55; *BMAP* 41f.) and the War Scroll from Qumran (Yadin 38–64) attest only the meaning "military division."

Semantically related terms in military contexts include: *nēs* “standard, signal” (21x, in prophetic literature except for Exod 17:15; Num 21:8f.; 26:10; Psa 60:6; cf. *BRL* 160f.), which acquires the general meaning “warning signal” in Num 26:10 in reference to Korah’s deceased band, and *tōren* “mast, signal pole” (Isa 30:17; 33:23; Ezek 27:5, in each case par. to *nēs*).

Job 21:29 and Ezek 14:8 (par. to *māšāl* “proverb”) suggest the meaning “memorable occurrence” in the broadest sense; Josh 2:12, “security” (a late gloss according to Noth, *HAT* 7, 24f.); and Jer 10:2 and Isa 44:25, “astrological portent.”

4. (a) The Yahwist already uses *ʔōt* as a religious term too; probably following the tradition, he applies it to the Egypt narrative (Exod 8:19; 10:1f.). The sign consists of a mighty deed through which Yahweh legitimizes the mission of Moses. Occurrences in Exod 3:12 and 4:17, 30 belong to E. The last two texts (as well as the occurrences of *ʔōt* in Exod 4:8f., 28; Num 14:11, which belong to the final redaction) conform to Yahwistic usage; Exod 3:12 has a somewhat different sense: Moses himself is assured of his divine commission (the actual content of the *ʔōt* has been lost; cf. Noth, *Exod*, OTL, 42f.). The text has close affinity with Judg 6:17ff., where the commission of the charismatic Gideon is authenticated to him. *ʔōt* confirms the commission of the designated charismatic.

Similarly, *ʔōt* can mean (even) the (noncultic) oracular sign (1 Sam 14:10; here the content of the *ʔōt* is the enemies’ behavior). Cultic oracles—surely one of the duties of the cult prophet—may be echoed in Psa 74:9; 86:17.

*nḥš* (also Aram. and Arab.; W. von Soden, *WZKM* 53 [1956]: 157; O. Eissfeldt, *JBL* 82 [1963]: 195–200), pi. “to seek an omen, give an oracle; take as a sign” (Gen 44:5, 15; 1 Kgs 20:33; “to learn through a sign” Gen 30:27; contra J. Sperber, *OLZ* 16 [1913]: 389; H. Torczyner, *OLZ* 20 [1917]: 10ff.; subst. *naḥaš* “omen,” Num 23:23; 24:1) and more generally “to foretell” (prohibited in Israel: Lev 19:26; Deut 18:10; 2 Kgs 17:17; 21:6; 2 Chron 33:6), occurs as specialized vocabulary for dealing with (good or evil) omens.\*

A somewhat altered usage appears in an early prophetic context. The *ʔōt* legitimizes the prophetic word; it arrives, however, only in the future and is predicted by the prophet (formulated generally in Deut 13:2f., with the characteristic verb → *bōʔ* “to arrive,” which also appears in 1 Sam 2:34; 10:[1], 7, 9; cf. further 2 Kgs 19:29; 20:8f. = Isa 37:20; 38:7, 22; Jer 44:29; somewhat more subtly in Isa 7:11, 14). The content of the *ʔōt* in these cases bears no direct relationship to the prophetic message. To some extent the sign is the prophet’s technical device for gaining recognition and

belief from his hearers (→ *yd<sup>c</sup>* together with *ʔôt*, Exod 10:2; Deut 4:35; 11:2f., etc.; cf. Keller, op. cit. 58f.; → *ʔmn* hi. Exod 4:30; Num 14:11; cf. Isa 7:9ff.).

*ʔôt* can also signify a “marker” or “memorial” pointing to a past saving act of God (Josh 4:6; similarly a few texts in P; see below) or which envisions a future, eschatological phase of divine history (in texts approaching apocalyptic thought forms, Isa 19:20; 55:13; 66:19).

(b) The term *ʔôt* acquires an essentially theological meaning in classical prophecy, in Dtr theology, and in the P document.

In classical prophecy *ʔôt* or *môpēt* can refer to “symbolic acts” (both terms in Isa 8:18 and 20:3; *ʔôt* alone in Ezek 4:3; *môpēt* in Ezek 12:6, 11; 24:24, 27; Zech 3:8). In fact, the other symbolic acts reported in the OT also belong here (cf. G. Fohrer, *ZAW* 64 [1952]: 101–20; id., *Die prophetischen Zeichenhandlungen* [1953]). In contrast to the prophetic signs of confirmation, the content of the *ʔôt* here relates materially to the message of the prophet. It enacts a future event, which is actualized and realized through the symbolic act itself. The “sign” functions, then, in analogy to the prophetic word (cf. Fohrer, *Zeichenhandlungen* 85ff.; von Rad, *Theol.* 2:91–94).

The Deuteronomist summarizes the entire Egyptian experience in a formula incl. the expression *ʔôtôtûmôp<sup>c</sup>tîm* (together with “leading out with a strong hand and an outstretched arm,” Deut 4:34; 6:22; 7:19; 11:2f.; 26:8; 29:2; 34:11; on the whole formula see B. S. Childs, “Deuteronomical Formulae of the Exodus Traditions,” *FS Baumgartner* 30–39). Not only are the “plagues” described as *ʔôt* but so is the whole divine history in Egypt, i.e., the basic datum of Dtr theology; *ʔôt* is, then, the form of Yahweh’s revelation that is to be understood in the present. Therefore the question also arises of Israel’s capability of recognizing and understanding the *ʔôtôt* (Deut 29:2ff.). The other texts that speak of *ʔôtôt* and *môp<sup>c</sup>tîm* in Egypt (Jer 32:20f.; Psa 78:43; 105:27; 135:9; Neh 9:10; also Exod 7:3 P; only *ʔôtôt* in Num 14:22; Josh 24:17; and, with clear reference to Egypt, Psa 65:9) are dependent upon the Deuteronomist.

The term *ʔôt* is used Deuteronomically in other contexts (on Deut 13:2f., see 4a). According to Exod 13:9, 16, the Passover haggadah is *ʔôt* and *zikkārôn* or *ʔôtāpôt* (see 3) for Israel; according to Deut 6:8, it is the confession of faith (*š<sup>c</sup>ma<sup>9</sup>*); according to 11:18, it is the entire Dtn proclamation. The *ʔôt* here too, then, actualizes past salvation history. According to Deut 28:46, promised blessing and threatened curse are “signs” for Israel; the future may also be deduced through the *ʔôt* of the present.

The P document applies *ʔôt* in great breadth: for the “signs and

wonders” in Egypt (Exod 7:3), for some memorials of Israel’s cultic history (Num 15:39 txt em “mark”; 17:3 “warning sign”; 17:25 “reminder”); the blood of the Passover in Exod 12:13 is a “protective sign”; the Sabbath is a sign of the relationship between Yahweh and Israel (Exod 31:13, 17; cf. indeed Ezek 20:12). The terminology of covenant making also appropriates the term: the Abrahamic and Noachic covenants have their signs (Gen 9:12f., 17, rainbow; 17:11, circumcision). Finally, the stars too are *ʾōtōt* (Gen 1:14, alongside *mô<sup>c</sup>dîm* “seasons”; → *y<sup>c</sup>d*).

Here *ʾôt* signifies the appearance of a comprehensive divine order encompassing nature and time, taking shape in Israel’s history, and finally reaching completion in the cult.

The term *môpēt* (36x) may not be explained etymologically (Keller, op. cit. 60f., 115; a suspected occurrence in a Phoen. inscription from Cyprus is ambiguous; cf. *KAI* no. 30.1). It first occurs in Isa 8:18 and 20:3, already par. to *ʾôt* as in Dtr usage and a few dependent texts (Exod 7:3 P; Deut 4:34; 6:22; 7:19; 13:2f.; 26:8; 28:46; 29:2; 34:11; Jer 32:20f.; Psa 78:43; 105:27; 135:9; Neh 9:10; a total of 18x, in addition to the Aram.: Dan 3:32f.; 6:28 *ʾātîn w<sup>c</sup>timhîn* “signs and wonders”). The usage of *môpēt* corresponds essentially to that of *ʾôt*, later perhaps more strongly emphasizing the miraculous (par. to *nīplāʾôt* Psa 105:5 = 1 Chron 16:12, → *pl<sup>ʾ</sup>*): mighty deeds in Egypt (Exod 4:21 redactional; 7:3, 9 and 11:9f. P; Deut 4:34; 6:22; 7:19; 26:8; 29:2; 34:11; Jer 32:20f.; Psa 78:43; 105:27; 135:9; Neh 9:10), divine terrors or wonders in general (Deut 28:46; Joel 3:3; Psa 71:7 = 1 Chron 16:12), prophetic signs of confirmation (Deut 13:2f.; 1 Kgs 13:3[bis], 5; 2 Chron 32:24, 31), prophetic symbolic acts (Isa 8:18; 20:3; Ezek 4:3; 12:6, 11; 24:24, 27; Zech 3:8).\*

5. Early Judaism largely continues OT usage (Qumran: see 3; rabbinic literature employs new meanings to a degree and replaces *ʾôt* with *sîmān*, probably < Gk. *sēmeion* ). On the NT, cf. K. H. Rengstorf, “σημείον,” *TDNT* 7:200–69 (209–19 also treat *ʾôt* in the OT extensively).

F. Stolz

𐤀𐤏𐤍 *ʾōzen* ear

S 241; BDB 23b; *HALOT* 1:27b; *TWOT* 57a; *NIDOTTE* 265

1. The subst. *ʾōzen* “ear” is common Sem. (\**ʾudn-*; *HAL* 27a), as well as Eg. *ydn* (Erman-Grapow 1:154; replaced by *mśdr* “place upon which one sleeps”; cf. W. Helck, *ZÄS* 80 [1955]: 144f.; W. C. Till, “Zum Sprachtabu im Ägyptischen,” *Ägyptolog. Studien*, ed. O. Firchow [1955], 327, 335). The verb *ʾzn* hi. “to act with the ears, hear” is a denominative

from the fem. subst. anatomical term (GKC §53g).

The name <sup>ʔ</sup>*zanyâ* (Neh 10:10) is based on the qal, *yaʔzanyāhû* (2 Kgs 25:23; Jer 40:8; Ezek 8:11; *yaʔzanyâ* Jer 35:3; Ezek 11:1; abbreviated *y<sup>c</sup>zanyâ[hû]* Jer 40:8; 42:1) is based on the hi., the only form of the verb that occurs otherwise (*IP* 36, 198; the name *yʔznyhw* occurs extrabibl. on a seal [W. F. Badè, *ZAW* 51 (1933): 150–56; *EEA* 70], and in Lachish letter 1:2f. [*TGI* 1 no. 34]; also *yʔznyh* and *yznʔl* occur on seals [Diringer nos. 21, 28]; on the name forms from Elephantine, cf. *IP* 198; L. Delekat, *VT* 8 [1958]: 251f.).

2. The OT contains the subst. 187x, the verb 41x (Psa 15x) in a normal distribution. The subst. occurs largely in the dual (108x, 80x with *be* ), the verb frequently in the impv. (30x).

3. <sup>ʔ</sup>*ōzen* rarely describes the human body part without reference to hearing.

The following customs should be mentioned: the wearing of earrings (Gen 35:4; Exod 32:2f.; Ezek 16:12; *BRL* 398–402); the piercing of the ear as a mark of slaves (Exod 21:6; Deut 15:17; J. Horst, *TDNT* 5:546; contra de Vaux 1:84); rituals for the consecration of priests and the cleansing of the leper (*t<sup>c</sup>nûk* <sup>ʔ</sup>*ōzen* “earlobe” in Exod 29:20[bis]; Lev 8:23f.; 14:14, 17, 25, 28 P; Elliger, *HAT* 4, 119); amputation of the ears as a form of punishment by mutilation (Ezek 23:25; Zimmerli, *Ezek*, Herm, 1:489). Amos 3:12 (*b<sup>e</sup>dal* <sup>ʔ</sup>*ōzen* “earlobe” of an animal of the flock) and Prov 26:7 (a dog) mention the ears of animals.

Otherwise the ear is always the organ of hearing: it hears (→ *šm<sup>c</sup>*, Ezek 24:26; Psa 92:12; Job 13:1; etc.); it pays attention (→ *qšb* hi., Psa 10:17; Neh 1:6, 11; etc.). With verbs of speaking, esp. with *dbr* pi. (e.g., Gen 20:8) and *qr<sup>ʔ</sup>* (e.g., Exod 24:7) the hearers are often introduced with *b<sup>e</sup>ʔōzen*. Thus the hearers are frequently characterized as witnesses (Gen 23:10, 13, 16). *b<sup>e</sup>ʔōzen* (instrumental *be* ) also has this function following *šm<sup>c</sup>* (Jer 26:11; 2 Sam 7:22; Psa 44:2). In contrast, *š<sup>c</sup>ma<sup>c</sup>ʔōzen* means “hearsay” (Psa 18:45; Job 42:5). The communication of important matters (frequently of life-and-death significance) is described by the usage → *glh* <sup>ʔ</sup>*oznô* “to uncover his ear” (1 Sam 20:2, 12f.; 22:8[bis], 17; the author of the story of David’s rise to power preferred this expression; also Ruth 4:4; with Yahweh as subj., see 4; → *ʔayin* ). The wisdom teacher can summon to hear with the expression *n<sup>th</sup>* hi. <sup>ʔ</sup>*ōzen* “to bow the ear” (Psa 78:1; Prov 4:20; 5:1, 13; 22:17; similarly Isa 55:3; Psa 45:11; 49:5; see also 4).

Series of various body parts emphasize their appropriate functions: mostly eyes-ears (2 Kgs 19:16 = Isa 37:17; Isa 11:3; 30:20f.; 35:5; 43:8; Jer 5:21; Ezek 8:18; 12:2; Psa 34:16; 92:12; 94:9; Job 13:1; 29:11; 42:5; Prov 20:12; Eccl 1:8; Dan 9:18; Neh 1:6; 2 Chron 6:40; 7:15), hands-eyes-ears (Isa 33:14), heart-ears (Jer 11:8; Ezek 3:10; Prov

2:2; 18:15; 22:17; 23:12), heart-eyes-ears (Deut 29:3; Isa 6:10; 32:3; Ezek 40:4; 44:5), ear-palate (Job 12:11; 34:3), ear-tongue (Isa 50:4f.), hands-neck-nose-ears-head (Ezek 16:11f.), mouth-eyes-ears-nose-hands-feet-throat (Psa 115:5ff.; cf. 135:16ff.). The talion formula (Exod 21:23ff.; Lev 24:19f.) omits the ear.

Terms for the inability and unwillingness to hear include the following: → *ḥrš* qal “to be deaf” (Mic 7:16; Psa 28:1; 35:22; 39:13; 50:3; 83:2; 109:1), *ḥērēš* “deaf” (Exod 4:11; Lev 19:14; Psa 38:14; 58:5; metaphorically, Isa 29:18; 35:5; 42:18f.; 43:8); *ʔtm* “to stop up” (Isa 33:15; Psa 58:5; Prov 21:13), *kbd* hi. “to make dull” (Isa 6:10; Zech 7:11), *ʕm* hi. “to conceal” (Lam 3:56).\*

The verb *ʔzn* hi. occurs in the impv. as a call to hear, introducing songs (Deut 32:1; Judg 5:3; Gen 4:23), wisdom sayings (Isa 28:23; Psa 49:2; 78:1), legal teachings (Job 33:1; 34:2, 16; 37:14), and prophetic words (Isa 1:2, 10; 32:9; 51:4; Jer 13:15; Hos 5:1; Joel 1:2; cf. Num 23:18). Most often *šm<sup>c</sup>* or *qšb* hi. stands in parallelismus membrorum (Wolff, *Hos*, Herm, 97, “a summons to receive instruction,” contra L. Köhler, *Deuterojesaja stilkritisch untersucht* [1923], 112, “a summons of two witnesses”; I. von Loewenclau, *EvT* 26 [1966]: 296ff.).

*d<sup>c</sup>bārîm* are usually the content of the audition (words or events, Gen 20:8; 44:18). On the preps. following *ʔzn* hi., see *HAL* 27a.

In addition to hearing, *ʔōzen* is the organ of recognition and understanding, particularly in wisdom (Job 12:11; 13:1; 34:3; Prov 2:2; 5:1, 13; 18:15; 22:17; 23:12; Isa 32:3). It competes here with the heart (cf. Ch. Kayatz, *Studien zu Proverbien 1–9* [1966], 43–47).

On the Akk. *uznu* “ear > discernment” and *ḥasîsu* “ear, hearing < understanding, wisdom” (*AHW* 330b; *CAD* ≤:126f.; on *ḥasāsu* “to recollect”), cf. *HAL* 27b as well as Dhorme 89f.

4. Yahweh’s ears are mentioned unabashedly (Num 11:1, 18; 14:28; 1 Sam 8:21, etc.; the ears of the angels, 1QM 10:11; on anthropomorphisms see Köhler, *Theol.* 22–25). The request to be heard, with the formula “to bend your ear to me,” is typical of individual laments (*nth* hi.: Psa 17:6; 31:3; 71:2; 86:1; 88:3; 102:3; 2 Kgs 19:16 = Isa 37:17; cf. Dan 9:18; in praise, Psa 116:2), just as is the impv. of *ʔzn* hi. together with *šm<sup>c</sup>* and *qšb* hi. (Psa 5:2; 17:1; 39:13; 54:4; 55:2; 86:6; 140:7; 141:1; 143:1; in a communal lament, 80:2; in a petition, 84:9). Yahweh hears people (Psa 94:9; Isa 59:1; but Job 9:16) and their insolence also rises to his ears (2 Kgs 19:28 = Isa 37:29). The idols do not hear (Psa 115:6; 135:17; cf. Kraus, *Psa*, CC, 2:380; Zimmerli, *Ezek*, Herm, 1:269f.; contra Weiser, *ATD* 20, 54).

Yahweh hollows out, plants, and creates the human ear (Psa 40:7; 94:9; Prov 20:12; Deut 29:3; cf. Gen 2:7). He “uncovers the ear” of a person (1 Sam 9:15; 2 Sam 7:27 = 1 Chron 17:25; Job 33:16; 36:10, 15;

1QH 1:21, etc.; cf. Isa 22:14), he awakens (*ʿûr* hi.) and opens (*pṯh*) the ear of the prophet (Isa 50:4f.; cf. Ezek 9:1; Isa 5:9; Job 4:12). In his commission the prophet is commanded to speak “in the ears” (Exod 11:2; Jer 2:2; 26:15; Deut 31:11; Judg 7:3). The saying about “ringing in the ears” (*šll* in 1 Sam 3:11; 2 Kgs 21:12; Jer 19:3) bears a Dtr stamp. Israel hears Yahweh’s word and commandments (Exod 24:7; 15:26; 2 Kgs 23:2; Isa 1:10, etc.) Dtn parentheses does not use the stem *ʔzn* (→ *šm<sup>c</sup>*). Israel closes itself to Yahweh’s word; see the formula in the Jer C layer: “They did not hear and they did not bow their ear (and they strayed)” (Jer 7:24, 26; 11:8; 17:23; 25:4; 34:14; 35:15; 44:5; cf. the Chr’s negated *ʔzn* hi. in Neh 9:30; 2 Chron 24:19). Although the people have ears, they do not hear (Jer 5:21; Isa 43:8; Ezek 12:2); their ear has a foreskin (Jer 6:10; cf. H.-J. Hermisson, *Sprache und Ritus im altisr. Kult* [1965], 71); Yahweh himself deafens it (Isa 6:9f.; Deut 29:3; cf. von Rad, *Theol.* 2:147ff.). But in the end time the ears of the deaf will be opened (*pqh* ni. in Isa 35:5; O. Procksch, *Jesaja*, KAT, 1:435; → *ʿayin*).

5. Qumran follows the theological usage of the OT. On Philo, Josephus, the rabbis, and the NT, see G. Kittel, “ἀκούω,” *TDNT* 1:216–25; J. Horst, “οὐς,” *TDNT* 5:543–59.

Cf. the *apertio aurium* of the early church’s baptismal liturgy (*RGG* 6:651f.); on Augustine see U. Duchrow, *Sprachverständnis und biblisches Hören bei Augustin* (1965), with bibliog.

G. Liedke

### אָח *ʔāḥ* **brother**

S 251; BDB 26a; *HALOT* 1:29a; *TDOT* 1:188–93; *TWOT* 62a; *NIDOTTE* 278

### אָחֹת *ʔāḥôt* **sister**

S 269; BDB 27b; *HALOT* 1:31b; *TDOT* 1:188–93; *TWOT* 62c; *NIDOTTE* 295

1. \**ʔāḥ* - “brother” and \**ʔāḥat* - “sister” are (like → *ʔāb* “father”) common Sem. (Berg., *Intro.* 210) and commonly occur in all language branches in an expanded meaning (see 3b).

The following derive from  $\aleph$  in the OT: the abstract  $\aleph^awâ$  “brotherhood” (between Judah and Israel, Zech 11:14), a diminutive  $\alephyān$  “little brother” (only as a PN, 1 Chron 7:19; Stamm, *HEN* 422), and perhaps a denominative verb  $\alephh$  ni. “to fraternize” ( $nāhâ < ne^ehâ$  in Isa 7:2; cf. *HAL* 30a; contra Eissfeldt, *KS* [1966], 3:124–27; L. Delekat, *VT* 8 [1958]: 237–40; H. Donner, *SVT* 11 [1964]: 8); cf. Akk.  $ahû$  Gt “to fraternize with one another” ( $athû$  “companion, associate”), Št “to pair up, come together” ( $šutāhû$  “standing together in pairs”), N “to fraternize” (*AHw* 22b).

2.  $\aleph$  “brother” occurs 629x (296x sg. and 333x pl., in addition to 1x Aram. pl. in Ezra 7:18), most frequently in the family narratives of Gen (178x, 100x sg.); 1 Chron (99x, 79x pl., often in lists such as 1 Chron 25:10–31) and Deut (48x), where the term is strongly accentuated (see 4c), follow.

$\alephôt$  “sister” occurs 114x (9x pl.), concentrated in Gen (24x), 2 Sam 13, and Ezek 16 and 23.

3. (a) The starting point is the description of a biological relationship (with respect to full- or stepbrothers, e.g., 2 Sam 13:4; cf. 2 Sam 3:2f.; *ILC* 1–2:58ff.), which is often further specified in order to distinguish it from a broader term: Gen 37:27, “our brothers and our flesh”; 42:13, 32, “brothers, sons of one man/our father”; Deut 13:7, “your brother, the son of your mother”; similarly, Judg 8:19 and in parallelismus membrorum Gen 27:29; Psa 50:20; 69:9; Song Sol 8:1 (already so in Ug.: *KTU* 1.14.I.8f., “seven brothers” par. to “eight sons of one mother”; 1.6.VI.10f., 14f.).

A more limited meaning occurs both in the restriction of meaning through related concepts in the word field (e.g., in the listing of the closest blood relatives in Lev 21:2f.; 25:48f.; Num 6:7; Ezek 44:25) and in composite descriptions of relationship:

(1) “father’s brother” (Lev 18:14, juristically paraphrasing [W. Kornfeld, *Studien zum Heiligkeitsgesetz* (1952), 103]  $dôd$ , the conventional word for “uncle” in Lev 10:4; 20:20; 25:49[bis]; Num 36:11; 1 Sam 10:14–16; 14:50; 2 Kgs 24:17; Jer 32:7–9, 12; Amos 6:10; 1 Chron 27:32; Esth 2:7, 15; cf. *HAL* 206b with bibliog. and Fitzmyer, *Gen.Ap.* 135; on  $\rightarrow$   $\alepham$  in the meaning “uncle,” replaced in Hebr. by  $dôd$ , cf. L. Rost, *FS Procksch* 143f. (= *KC* 90f.); J. J. Stamm, *ArOr* 17 [1949]: 379–82; id., *SVT* 7 [1960]: 165–83; id., *HEN* 418f., 422; Huffmon 196f.);

(2) “father’s sister” (Lev 18:12; 20:19; cf.  $dôdâ$  “father’s sister” in Exod 6:20, but in Lev 18:14 and 20:20 “wife of father’s brother”);

(3) “mother’s brother” (Gen 28:2; 29:10; the specific Akk./Aram./Arab. word for “mother’s brother,”  $\alephâl$ , is lacking in Hebr.; Huffmon 194);

(4) “mother’s sister” (Lev 18:13; 20:19);

(5) “brother’s wife” (Lev 18:16, instead of *y<sup>c</sup>bāmâ* “sister-in-law” in Deut 25:7, 9; Ruth 1:15; → *ʾalmānâ*);

(6) “brother’s son” (Gen 12:5).

Cf. also G. Ryckmans, “Les noms de parenté en safaitique,” *RB* 58 (1951): 377–92.

(b) As in many languages, incl. non-Sem. languages, transitions to the expanded meanings “near relative, member of the same tribe, compatriot” or “colleague, friend” all the way to the largely empty meaning “the other” in reciprocal relationships (“one another”) occur easily in Hebr. (about 45% of the texts with *ʾāḥ* in the OT), by which, on the family model, members of other close communities can also be described as “brothers” or “sisters.” In accord with the situation, the element of solidarity, affection, or similarity, or equality of rights can be emphasized as the point of comparison in the metaphorical usage; cf. J. Zobel, *Der bildliche Gebrauch der Verwandtschaftsnamen im Hebräischen* (1932), 35–42.

One may not always sharply distinguish the narrower and the broader senses (Gen 49:5, “Simeon and Levi are brothers,” pregnantly contains the term in both meanings); cf. the overview of the Levi texts in Elliger, *HAT* 4, 137n.12, 259n.37, and of the Deut texts in C. Steuernagel, *Das Deuteronomium*, *HKAT* (19232), 42; also Fitzmyer, *Sef.* 112 on *Sef.* (= *KAI* no. 224) 3.9. Verifiable texts with *ʾāḥ* for the uncle-nephew or cousin-cousin relationship are Gen 13:8; 14:16 (nephew in 1QapGen 22:11 emended to *br ʾḥwhy*, Fitzmyer, *Gen.Ap.* 171); 29:12, 15; Lev 10:4 (sons of the cousins); 1 Chron 23:22; “sister” for stepsister in Gen 20:12.

The meaning “relatives” (in the pl.) is unmistakable in Gen 16:12; 25:18; 31:23, 25, 32, 37, 46, 54; Exod 2:11; 4:18; Judg 9:26, 31, 46; etc. (cf. Ezek 11:15, “all of your brothers, your kindred”; Zimmerli, *Ezek*, *Herm*, 1:229, 261; → *gʾl*), but cannot always be sharply distinguished from the meaning “fellow tribesman, compatriot” (e.g., Num 36:2; Judg 9:18; 2 Sam 19:13; on Amos 1:9 cf. J. Priest, “Covenant of Brothers,” *JBL* 84 [1965]: 400–406; in Num 25:18 “[female] compatriot”), and this meaning, in turn, may not always be distinguished from “colleague” (e.g., 2 Kgs 9:2 among soldiers; Isa 41:6 among artisans; Num 8:26; Ezra 3:8; Neh 5:14 and often in the Chr’s history of the Levites). The inscriptions from Zinjirli (*KAI* no. 214.27–31; no. 215.3, 12, 17; no. 216.14 = *ANET* 655a; *DISO* 8) suggest a similar situation.

The synonyms of the expanded meaning are treated with → *rēa*ˆ.

(c) As a metaphorical usage, “my brother/sister” is also characteristically addressed to unrelated persons: Gen 19:7; 29:4; Judg 19:23; 1 Sam 30:23; 2 Sam 20:9; 1 Chron 28:2 (cf. Lande 20, 23f., concerning the connotations that readily accompany courtly modes of speech). The usage of *ʾāḥ* among persons of equal rank in messenger

speech (Num 20:14; 1 Sam 25:6 txt em), in courtly correspondence style, and in diplomatic communication (1 Kgs 9:13, Hiram-Solomon; 20:32f., Ahab-Benhadad) conforms to this usage.

Extrabibl. attestations for this letter style are numerous: Akk.: *CAD* A/1:200–202; Ug.: *KTU* 2.4.19; 2.14.3, 10, 15, 18; (between father and son); 2.21.3 (queen as sister); 5.9.8, 10 (par. *r<sup>c</sup>* “friend”); 2.38.2f., 26 (kings of Tyre and Ugarit); 2.41.18, 20, 22; 2.67.4; 2.44.2; cf. A. van Selms, *Marriage and Family Life in Ugaritic Literature* (1954), 113; Phoen. and Aram.: cf. *DISO* 8 and Fitzmyer, *Gen.Ap.* 86.

The formulaic address in the lament for the dead should also be understood similarly (1 Kgs 13:30, “Alas, my brother!”; Jer 22:18, “Alas my brother, alas my sister!”; 2 Sam 1:26 is probably influenced by this usage: “I am sorrowful for you, my brother Jonathan”; cf. Jahnou 61ff.; Lande 25f.).

“My sister (bride)” occurs as a tender metaphor for the beloved (in Song Sol otherwise named *ra<sup>c</sup>yâ* “friend”; → *rēa<sup>c</sup>*) in Song Sol 4:9f., 12; 5:1f., as in Eg. love poetry (Grapow 32; A. Hermann, *Altäg. Liebesdichtung* [1959], 75–78; Rudolph, *KAT* 17, 150) and in Ug. (*KTU* 1.18.I.24, Anat to Aqhat: “You are my brother, I am your sister”; cf. van Selms, op. cit. 70, 120, 122; M. Dahood, *Bib* 42 [1961]: 236). Cf. further Prov 7:4, “Say to wisdom: you are my sister,” of personified wisdom (Ch. Kayatz, *Studien zu Proverbien 1–9* [1966], 98).

Solidarity and similarity are described by *ʾāḥ* in Job 30:29, “I have become a brother of the jackals”; Prov 18:9, “brother of the destroyer,” cf. 28:24, “companion of the villain” with *ḥābēr*; with *ʾāḥôt*. Job 17:14, “I say to the worm ‘My mother!’ and ‘My sister!’ “

In Akk. see e.g., *CAD* A/1:172a: “the two eyes are sisters”; in Ug. *KTU* 1.16.VI.35, 51: “sickness has become like a sister to you,” in the event that *aḥt* is not to be read verbally with Driver (*CML* 1 47, 133, etc.; also Gibson, *CML* 2 101f., 141), “you are a brother.”

(d) Pron. usage in expressions with *ʾiš ʾāḥîw* (“one . . . the other”) refers to persons (Gen 9:5; 13:11; 26:31; 37:19; 42:21, 28; Exod 10:23; 16:15; Lev 7:10; 25:14, 46; 26:37; Num 14:4; Deut 1:16; 25:11; 2 Kgs 7:6; Isa 3:6; 19:2; 41:6; Jer 13:14; 23:35; 25:26; 31:34; 34:17; Ezek 4:17; 24:23; 33:30; 38:21; 47:14; Joel 2:8; Mic 7:2; Hag 2:22; Zech 7:9f.; Mal 2:10; Neh 4:13; 5:7, partially retaining the specific meaning “brother”), but also to things (Exod 25:20 and 37:9, golden cherubim; Job 41:9, crocodile scales); fem. *ʾiššâ—ʾāḥôt* likewise of things (curtains, Exod 26:3, 5f., 17; wings, Ezek 1:9; 3:13).

Pars. in Akk. (*aḥu aḥa, aḥu ana aḥi*, etc.) likewise refer to persons or things (*CAD* A/1:203f.), just as does Hebr. *tō<sup>m</sup>mîm/t<sup>e</sup>ʾômîm* (R. Köbert, *Bib* 35 [1954]: 139–41)

“twins” (Gen 25:24, Jacob and Esau; 38:27, Perez and Serah; Song Sol 4:5 = 7:4, gazelles; but Exod 26:24 and 36:29, boards).

4. (a) Theologically relevant usages of the word do not relate to the more narrow meaning “biological brother” with its family law implications, but to the more general meaning “member (of a community)” or to the metaphorical usage.

Family law: On the prohibition of sexual relations between siblings (Lev 18:9, 11; 20:17; Deut 27:22), cf. W. Kornfeld, *Studien zum Heiligkeitsgesetz* (1952), 110ff.; on the institution of levirate marriage, cf. F. Horst, *RGG* 4:338f.; Rudolph, *KAT* 17, 60–65 (bibliog.); → *gʾ*; C. H. Gordon (*JBL* 54 [1935]: 223–31) suspects traces of fratriarchy, which can be demonstrated particularly in the Hurrian realm (P. Koschaker, “Fratriarchat, Hausgemeinschaft und Mutterrecht in Keilschrifttexten,” *ZA* 41 [1933]: 1–89) but also in the OT: fratronymy (Gen 4:22; 36:22; 1 Chron 2:32, 42; 24:25; also Ug. *KTU* 4.103.5 *ršpab aḥ ubn*) and a few fratriarchal motifs in the patriarchal narratives (e.g., Gen 24, Laban-Rebekah); cf., however, de Vaux 1:19. On Gen 12:13, “say that you are my sister” as a formula of conditional divorce, see L. Rost, *FS Hertzberg* 186–92.

(b) Ethical reflections concerning proper brotherhood in daily life, both within the Bible and without, accentuate brotherly affection, dependability, willingness to help, etc. In similes “brother” can par. “father,” e.g., Akk. in a Mari text: “I am like a father and a brother to you; you, however, are like an opponent and an enemy to me” (G. Dossin, *Syria* 33 [1956]: 65); Phoen.: Kilamuwa 1.10 (→ *ʾāb* III/3). OT examples from wisdom literature juxtapose the brother with the “friend” (→ *rēa*<sup>c</sup>) and the “neighbor,” a comparison that can also work to the disadvantage of the brother (Prov 17:17, “A friend loves at all times, and a brother is born for distress”; but 18:24, “A friend sticks closer than a brother”; and 27:10, “Better a close neighbor than a distant brother”). Other wisdom texts on the topic of brotherliness include Psa 133:1, “See how fine and lovely it is when brothers dwell together in unity,” and Aram. Aḥ. 49, “There I cared for you, as one treats his brother” (Cowley 221; *ANET* 428a; *AOT* 456). Cf. also the description of the friends Gilgamesh and Enkidu as “brothers” (Gilg. VI:156 = *ANET* 85a; Schott 58).

(c) The term “brother” receives a theological coloring at the earliest in Dtn usage and in the command to love one’s neighbor in H (Lev 19:17, → *rēa*<sup>c</sup>; 25:35f., 39, 46–48, → *gʾ*). No new usage of the word is involved in the Dtn description of the member of the people or the community. The religious undertone in the context of the inculcation of the commandment results only through the emphatic usage of the word with a suf., mostly *ʾāḥikā* “your brother” (in all texts in the Dtn code, Deut 12–26, unless, as in 13:7 and 25:5–9, specific family law regulations are involved: 15:2f., 7, 9,

11f.; 17:15, 20; 18:15, 18; 19:18f.; 20:8; 22:1–4; 23:20f.; 24:7, 14; 25:3,[11]; Levites, 18:2, 7; Edomites, 23:8; cf. O. Bächli, *Israel und die Völker* [1962], 121–23). Jer 34:9, 14, 17 directly reflect the Dtn usage; the Chr history uses “brother” in the metaphorical sense almost exclusively in the pl.; cf. further H. C. M. Vogt, *Studie zur nachexilischen Gemeinde in Esra-Nehemia* (1966), 113–15, esp. on Neh 5.

The suf. form already plays a particular role in Gen 4:9 (“Where is your brother Abel?”) in the exemplary presentation of the relationship between God, individual, and neighbor (W. Vischer, *Witness of the OT to Christ* [1949], 72: “Responsibility before God is responsibility for one’s brother”).

The Dtn usage develops within the Dtn concept of the people of God (von Rad, *Gottesvolk* 13, 50; H. Breit, *Die Predigt des Deuteronomisten* [1933], 179, 185; O. Procksch, *Theol. des AT* [1950], 239). “The people is the family writ large, which forms a unity. The use of ‘brother’ as a constitutive element of the people concept also equalizes: brothers stand on the same level, they have the same rights and duties and are responsible to one another” (Bächli, op. cit. 123).

The notion of the brotherhood of the Israelites under one father (→ *ʾāb* IV/3c) is admittedly present in Mal 2:10, but it is not terminologically fixed (“Why do we treat each other faithlessly?” cf. 3d).

(d) That which is true of → *ʾāb* “father” is valid *mutatis mutandis* for the description of the divinity as “brother” in theophoric PNs in ancient Sem. nomenclature (III/5 with bibliog.).

Alongside theophoric names (*ʾāhîyāhû/ʾāhîyâ*, *yôʾāh* “Yahweh is [my] brother”; *ʾāhîmelek*, *hîʾēl* < \**ʾāhîʾēl*, *hîrām* < Phoen. *ʾhrm*; cf. Friedrich §94), a series of substitute names also occurs here, e.g., *ʾāhîqām* “my brother is risen (again),” *ʾāhʾāb* “father’s brother,” *ʾāhūmay* “brother of my mother” (according to BS 95), cf. Stamm, *HEN* 417f., 422; on *dôdô* “his uncle” and *dāwîd* “uncle” see Stamm, *SVT* 7 (1960): 165–83; on *ʿammôn* “little uncle,” id., *ArOr* 17 (1949): 379–82.

5. The further development of the OT usage in Judaism and in the NT is closely bound to the concept of the “neighbor” (→ *rēaʿ*); cf. H. von Soden, “ἄδελφός,” *TDNT* 1:144–46; H. Greeven and J. Fichtner, “πλησίον,” *TDNT* 6:311–18; *RAC* 2:631–46; W. Günther, U. Falkenroth, and D. A. Carson, “Brother,” *DNTT* 1:254–60; J. Fichtner, “Der Begriff des ‘Nächsten’ im AT mit einem Ausblick auf Spätjudentum und NT,” *WD* 4 (1955): 23–52 (= *Gottes Weisheit* [1965], 88–114).

## בַּד *bad* **solitariness**

S 905; BDB 94b; *HALOT* 1:108b; *TDOT* 1:473–79; *TWOT* 201a; *NIDOTTE* 963

1. (a) The numeral “one” is common Sem. in its basic triradical form *ḥd* (*GVG* 1:484; Berg., *Intro.* 222; Ug.: *UT* no. 126; *WUS* no. 131; NWSem. inscriptions: *DISO* 9; on Aram. *ḥad* with discarded *ʿ*; cf. *GVG* 1:243, 257; *BLA* 54, 248f.).

The Akk. root has the form (*w*)*ēdum* (later *ēdu*) in the meaning “sole, alone” (*GAG* §71c; *AHw* 184, 186–88; *CAD* E:27f., 33, 36–39, with further derivatives); the word *istēnum*, also known in Hebr. (*ʿaštē ʿāsār* “eleven,” always in conjunction with *ʿāsār* “ten,” according to Zimmern 65 and e.g., Meyer 2:87, an Akk. loanword, although it also occurs in Ug.), is available for “one” (*GAG* §69b; *AHw* 400f.; *CAD* I/J:275–79).

In addition to the original form *ʿaḥad* (Gen 48:22; 2 Sam 17:22; Isa 27:12; Ezek 33:30; Zech 11:7; cf. BL 622; Meyer 2:85), *ʿeḥād* occurs regularly with a virtual or secondary reduplication of the middle radical (*GVG* 1:68; BL 219), and the dissimilation of the *qameṣ* before the *ḥ* to *e* (Berg., *HG* 1:152; BL 216).

(b) Hebr. (and Ug.; cf. *UT* §7.8, and no. 126) also uses the pl. *ʿaḥādîm* (Gen 11:1, “one sort of words”; 27:44; 29:20; Dan 11:20, “some days”; Ezek 37:17, “so that they become one”; according to Gordon, *UT* no. 126: “a set, pair”; cf. also BrSynt 74f.).

(c) The root rarely occurs verbally: Hebr. *ḥd* hitp. “to unite” only in Ezek 21:21 (a disputed text); Ug. *ḥd* D “to unite” (*WUS* no. 131) is likewise highly uncertain.

(d) The PN *ʿeḥūd* (1 Chron 8:6, a member of the tribe of Benjamin) should probably be emended to *ʿehūd* (*IP* no. 76; Rudolph, *HAT* 21, 76; *HAL* 30a).

(e) In addition to *ḥd*, the related root *wḥd* (NWSem. *yḥd*) occurs in all subfamilies of the Sem. languages: Akk. *wēdum* “sole, alone” (see 1a); Ug. *yḥd* “lonely” (*WUS* no. 1153; *UT* no. 1087); Old Aram. *yḥd* ha. “to

unify” (*DISO* 106); for other (post-OT) forms see KBL 376b. The Hebr. verb occurs rarely: *yḥd* qal “to unite” Gen 48:6 (contra M. Dahood, *Bib* 40 [1959]: 169); Isa 14:20; uncertain pi. in Psa 86:11. More common are the subst. *yaḥad* “unification” (common in the Qumran texts; Deut 33:5; 1 Chron 12:18; cf. S. Talmon, *VT* 3 [1953]: 133–40), the advs. *yaḥad* (44x, incl. Jer 48:7 K) and *yaḥdāyw* (94x, excl. Jer 48:7 Q; *-āyw* may be an old, adapted locative ending; cf. *GVG* 1:460, 465; BL 529f.; J. C. de Moor, *VT* 7 [1957]: 350–55; cf. also *yaḥudunni* “together with me” as a Can. loanword in an Amarna letter, *CAD* I/J:321), both in the meaning “together” (for further modal, local, and temporal nuances, see de Moor, *op. cit.* 354f.; not, however, “alone,” as J. Mauchline, *TGUOS* 13 [1951]: 51–53, and M. D. Goldman, *ABR* 1 [1951]: 61–63, assume for some texts), and *yāḥîd* “sole, alone, lonely” (12x; often of the “only son”; in Psa 22:21 and 35:17, “my only = my life”).\*

2. The numeral, used 970x (in addition to the scribal errors in Ezek 18:10 *ʾāḥ* and 33:30 *ḥad*; cf. Zimmerli, *Ezek*, Herm, 1:371; 2:196; masc. 703x, fem. 267x, with 2 Sam 17:12 Q; 1 Kgs 19:4 Q; Isa 66:17 Q; Song Sol 4:9 K), occurs in almost all books of the OT (lacking in Joel, Mic, Nah, Hab), concentrated esp., of course, in books containing lists, legal sections, descriptions, etc. (Num 180x, 89x in Num 7 alone; Ezek 106x; Exod 99x; 1 Kgs 63x; Josh 60x); Aram. *ḥad* occurs 14x.

3. GB 22f. and *HAL* 29f. detail the usage of the word more thoroughly. The chief meaning is the cardinal “one,” which may refer to God (Deut 6:4; cf. Gen 3:22), people, animals, or things. The abs. usage “the one” (1 Sam 13:17f., etc.; occasionally with the art.; cf. *GVG* 2:69) and the distributive usage “each one” (e.g., Deut 1:23) also derive from the chief meaning. The numeral can describe a nondetermined entity in the sense of “anyone,” e.g., 1 Sam 26:15, *ʾaḥad hāʿām* “one of the people” (on the use of *min* in this connection, cf. *GVG* 2:84); negated (*lōʾ* or *ʾēn*) it means “none, no one.” Occasionally *ʾeḥād* can represent the ordinal, e.g., Gen 1:5, “day one = the first day”; so also dates. Otherwise, *riʾšôn* “the first” is used in these cases. *ʾaḥat* occurs in the sense “once,” e.g., in Lev 16:34 and 2 Kgs 6:10.

4. (a) The numeral achieves great relevance in theological usage. The intolerance and—relatedly—the intransigence of OT Yahwism categorically excluded any deification of humanity (Gen 3:22) and any worship of gods or powers beside Yahweh. Thus the *one* God assumed a dominant position, as the Decalogue, which juxtaposes the “other gods” (Exod 20:3; Deut 5:7; → *ʾḥr*) with the divine “I” (Exod 20:2; Deut 5:6), already demands. Although other gods have many names, Yahweh has only *one* (Exod 3:14f.; cf. von Rad, *Theol.* 1:185).

The Josianic (Eichrodt 1:226) statement *šema' yiśrā'el yhw h'elōhū yhw h'eḥād*, “Hear, O Israel, Yahweh, our God, is *one* Yahweh” (Deut 6:4; another possible translation is: “Yahweh is our God, Yahweh is one [alone]”) gives classic expression to the concept. Regardless of precisely how its syntactic structure should be interpreted (on this cf., among others, S. R. Driver, *Deut*, ICC [19023], 89f.; G. Quell, *TDNT* 3:1080f.; von Rad, *Deut*, OTL, 62–64), and how its primary focus (against poly-Yahwism or polytheism) is determined, this statement most clearly expresses Yahweh’s unity and exclusivity (cf. E. König, *Theologie des AT* [1922], 129–32, who refers to the martyr Rabbi Akiba, who died with the words of the Shema on his lips; also H. Breit, *Die Predigt des Deuteronomisten* [1933], 60–65; Vriezen, *Theol.*, 311, 323–28; von Rad, *Theol.* 1:227). It does not appear in isolation but is embedded in the commandment to love this unique Lord just as uniquely (Deut 6:5; cf. N. Lohfink, *Das Hauptgebot* [1963], 163f.; id., *Höre Israel* [1965], 63). The demand for the worship of the *one* God at only *one* place (cf. 2 Chron 32:12) derives logically from this commandment (von Rad, *Theol.* 1:227).

The notion of Yahweh’s uniqueness is certainly not limited to usages of the word *h'eḥād* (e.g., Exod 15:11; 2 Sam 7:22; Isa 44:6; cf. C. J. Labuschagne, *Incomparability of Yahweh in the OT* [1966]). In the late text Zech 14:9, *h'eḥād* occurs once more in a theological usage describing the eschatological fulfillment of the demand of Deut 6:4f. in a universalistic extension: “In that day Yahweh will be one and his name will be one” (cf. G. A. F. Knight, “The Lord Is One,” *ExpT* 79 [1967/68]: 8–10).

In another way, *h'eḥād* serves the ideal of the people’s unity in Mal 2:10, “Do we not all have *one* father? Has not *one* God created us? Why do we then treat one another faithlessly” (cf. also Job 31:15); moreover, the emphatic usage of the word in eschatological contexts, such as Jer 32:39 “*one* heart and *one* way” (Rudolph, HAT 12, 212); Ezek 34:23 and 37:24, “*one* shepherd”; 37:22, “*one* people . . . *one* king”; Hos 2:2, “*one* head”; Zeph 3:9, “serve him with *one* shoulder (= harmoniously)” is noteworthy.\*

(b) In this context one should note forms of the root *bdd* that are somewhat related semantically to particular usages of *h'eḥād*: *bad* “separation,” adv. *lebad*, millebad “alone, apart” (158x); *bōdēd* “alone” (3x); *bādād* “alone” (11x). Yahweh’s uniqueness is often expressed with *lebad*: Deut 4:35, “Yahweh alone is God and no other”; 1 Kgs 8:39 = 2 Chron 6:30, “you alone know the heart of all the children of men”; 2 Kgs 19:15, 19 = Isa 37:16, 20, “you alone are God”; Isa 2:11, 17, “Yahweh alone is exalted in that day”; Isa 44:24 and Job 9:8, “he who spread out the heavens all alone”; also Isa 63:3; Psa 72:18; 83:19; 86:10; 136:4; 148:13; Neh 9:6; with *bādād* Deut 32:12, “Yahweh alone led him, no strange god was with him.” A related concept is the exclusivity of the relationship with Yahweh as expressed by *lebad* in Exod 22:19, “whoever sacrifices to other gods and not to Yahweh only”; 1 Sam 7:3f.; Isa 26:13; Psa 51:6; 71:16; with *l'bādād* Psa 4:9; the consequences for the people are shown in Num 23:9, “Here is a

people living alone, and not reckoning itself among the nations” (NRSV).\*

5. In Judaism “the one” can become an alternate designation for God (StrB 2:28).

This very element of God’s uniqueness, which challenges people to the same uniqueness, has exercised the most lasting influence on the NT and its thought (Mark 12:29f.; Rom 3:30). God alone deserves devotion and service (Matt 4:10; 6:24). The divine unity is mirrored in the *one* son of God, Jesus (1 Cor 8:6; Eph 4:4–6), who through his *egō eimi* excludes all other possibilities of religious thought and argumentation (John 6:48; 8:12; 11:25; 14:6). Cf. E. Stauffer, “εἷς,” *TDNT* 2:434–42; F. Büchsel, “μονογενής,” *TDNT* 4:737–41.

The OT adv. *ʾahat* “once and for all” in Psa 89:36 (H. Gunkel, *Die Psalmen* [1926], 394) most nearly approximates the important NT expression *ephapax* (cf. G. Stählin, “αἰῶνα,” *TDNT* 1:381–84).

G. Sauer

אָהוֹת *ʾāhôt* **sister** → אָה *ʾāh*

חָזַק *ḥz* **to grasp**

S 270; BDB 28a; *HALOT* 1:31b; *TWOT* 64; *NIDOTTE* 290

1. The root \**ḥd* “to grasp” is common Sem. (Berg., *Intro.* 218) and appears, with variations in the 2d and 3d radicals, in Arab. and Old SArab. as *ḥd*, in Akk. and Eth. as *ḥz*, in Hebr. (Moab., ?Pun.) and Old Aram. as *ḥz*, in Ug. and Imperial Aram. onward as *ḥd* (NWSem. examples are found in *WUS* no. 135 and *DISO* 9f.).

*HAL* 31b adds an *ḥz* II “to draw over” (originally identical with *ḥz* I) for the technical usage of *ḥz* qal in 1 Kgs 6:10 (Noth, BK 9, 96, 99 suggests pi. instead of qal), *ḥz* pi. in Job 26:9 and ho. (or pu.) in 2 Chron 9:18 (cf. 1 Kgs 10:9), and, indeed, in a sense borrowed from the Akk. *uḥḥuzu* “to draw over,” which is a denominative from *iḥzu* “enclosure” (cf. *tāpûs* “enclosed” in Hab 2:19, from *tps* “to grasp”).

Another borrowed meaning, in this instance from Aram., is present in Neh 7:3 “to bolt” (cf. Wagner no. 7a); probably related are *ḥîdâ* (Aram. pass. ptc. with discarded ʔ,

Bibl. Aram. <sup>ʾ</sup>*hîdâ* Dan 5:12) in the meaning (“something grasped, enclosed > something closed” >) “riddle” (17x, 8x in Judg 14:12–19) and, a denominative from it, *hûd* qal “to pose a riddle” (Judg 14:12f., 16; Ezek 17:2); cf. Wagner nos. 100f. (somewhat differently, G. Rinaldi, *Bib* 40 [1959]: 274–76; H.-P. Müller, “Der Begriff ‘Rätsel’ im AT,” *VT* 20 [1970]: 465–89).

The verb occurs in the qal and in the ni. (pass. in Gen 22:13; Eccl 9:12; otherwise a denominative from <sup>ʾ</sup>*huzzâ* “property” in the meaning “to be resident”); on the pi. and ho., see above.

In addition, the subst. <sup>ʾ</sup>*huzzâ* “property” derives from the root in a nom. formation common for legal terms. Finally, the OT has a series of PNs that contain the root *h̄z* (see 4).

With regard to the disputed meaning of <sup>ʾ</sup>*hūz* in Song Sol 3:8 (qal ptcp. “containing” or adj. “learned, skilled”) cf. *HAL* 31b with bibliog.

2. The Hebr. OT has the qal of the verb 58x, ni. 7x, pi. and ho. 1x each. Occurrences are distributed over the entire OT; the fact that later writings exhibit a slight increase in occurrences may be accidental. The 66 texts that use the subst. <sup>ʾ</sup>*huzzâ* contrast with this distribution; besides Psa 2:8 it occurs only in late texts, primarily in P and in Ezek 44–48.

3. In the vast majority of cases the verb should be translated “to grasp, lay hold of, seize, hold fast,” etc. (on additional derivative technical meanings in 1 Kgs 6:6 and Ezek 41:6 see *HAL* 30a, 31a).

Synonyms of *h̄z* are *tpś* “to lay hold of, grasp, have to do with” (qal 49x, ni. 15x, pi. 1x, Prov 30:28 txt?), *tmk* “to grasp, hold” (qal 20x, ni. 1x; also Phoen., Akk.), and *qmt* “to lay hold of” (qal Job 16:8; pu. Job 22:16; also Aram. and Arab.); also → *lqh* and → *h̄zq* hi. in some forms.

The obj. is introduced with *be* or the acc. (occurrences in *HAL* 31a). One may hold fast to: the heels (Gen 25:26), the ram’s horns (Gen 22:13 ni.), the snake’s tail (Exod 4:4), the doors of the city gate (Judg 16:3), the ark (2 Sam 6:6 = 1 Chron 13:9), the beard (2 Sam 20:9), the horns of the altar (1 Kgs 1:51), the eyelids (Psa 77:5), the ends of the earth (Job 38:13), a mantle (Ruth 3:15), the beloved (Song Sol 3:4), branches (7:9), clothes (Esth 1:6), spear and shield (2 Chron 25:5; cf. Song Sol 3:8); one may grasp the sling (Job 18:9; Eccl 12:9) and the net (Eccl 12:9 ni.); one may fig. grasp or hold one’s way (Job 17:9), the trail (Job 23:11), foolishness (Eccl 2:3; cf. 7:18).

The verb very often applies to the hostile or otherwise violent grasping, seizure, or capture of someone (Judg 1:6; 12:6; 16:21; 20:6; 2 Sam 2:21; 4:10; Isa 5:29; Psa 56:1; 137:9; Job 16:12; Song Sol 2:15).

Even somewhat more frequent are fig. expressions of the fact that

anxiety, trembling, cramps, weakness, grief, wrath, etc., lay hold of people (Exod 15:14f.; 2 Sam 1:9; Isa 13:8; 21:3; 33:14; Jer 13:21; 49:24; Psa 48:7; 119:53; Job 18:20; 21:6; 30:16).

Finally, the usage in Num 31:30, 47 “one of fifty” (= a chosen one) is very general; similarly 1 Chron 24:6 (cf. Rudolph, HAT 21, 160).

A few ni. texts (Gen 34:10; 47:27; Num 32:30; Josh 22:9, 19) should be translated “to establish oneself (in the land),” “to take possession (of the land).” The subst. <sup>ʾ</sup>huzzâ, which consistently means “possession, property,” mostly in the sense of land or real estate (Gen 23:4, 9, 20: possession of a grave; Lev 25:45f.: possession of slaves) is related. The noun acquires a fig. meaning specifying that the Levites are to have no real estate, because Yahweh is their “real estate” (Ezek 44:28; cf. Zimmerli, *Ezek*, Herm, 2:461f.; von Rad, *Theol.* 1:403f.). Par. terms for <sup>ʾ</sup>huzzâ are *nah<sup>ʾ</sup>lâ* (→ *nhl*), *ḥēleq* (→ *hlq*), → *gôrāl*, *y<sup>c</sup>ruššâ/y<sup>c</sup>rēšâ* (→ *yrš*). On <sup>ʾ</sup>huzzâ (and on the distinction from *nah<sup>ʾ</sup>lâ*), see F. Horst, “Zwei Begriffe für Eigentum (Besitz): *nah<sup>ʾ</sup>lâ* und <sup>ʾ</sup>huzzâ,” FS Rudolph 135–56, esp. 153ff.

4. The word group has no properly theological meaning. Yahweh appears once as the subj. of the verb, however (Psa 73:23, “you hold my right hand”; cf. also the statements concerning Yahweh’s salvific grasp with the verb *tmk* in Isa 41:10; 42:1; Psa 16:5; 41:13; 63:9); twice the hand of Yahweh is the subj.: it grasps even the one who settles in the extremities of the sea (Psa 139:10); it seizes in judgment (Deut 32:41). <sup>ʾ</sup>hz does not, however, acquire a specifically theological emphasis.

The same is true for <sup>ʾ</sup>huzzâ: just as surely as land and property are understood as Yahweh’s gifts (Gen 17:8; 48:4; Lev 14:34; Deut 32:49, etc.), it is also true that this notion is rarely given specific expression with <sup>ʾ</sup>huzzâ, not even when one speaks of an <sup>ʾ</sup>huzzat *ʾôlām*, an “eternal possession” (Gen 17:8; 48:4; Lev 25:34) or once even the <sup>ʾ</sup>huzzat *yhwh* (Josh 22:19; cf. H.-J. Hermisson, *Sprache und Ritus im altisr. Kult* [1965], 108).

In this context, PNs formed with <sup>ʾ</sup>hz require comment, because they are all (originally) theophoric names: *y<sup>c</sup>hōʾāḥāz/yōʾāḥāz* “Yahweh has (protectively) grasped” (cf. *IP* 21, 62, 179), <sup>ʾ</sup>hazyâ(*hû*); furthermore, synonymous by-forms and shortened forms, some of which are also attested on seals and ostraca (*ʾāḥāz*, cuneiform *ya-u-ḥa-zi*; also <sup>ʾ</sup>hzyay, <sup>ʾ</sup>huzzām, <sup>ʾ</sup>huzzat).

5. The word group seems to have played no distinct role in postbibl. Hebr. Occurrences at Qumran move within the boundaries of the OT idiom (1QH 4:33; CD 2:18; on 1QS 2:9 → <sup>ʾ</sup>āb I; subst. <sup>ʾ</sup>hzh CD 16:16 and <sup>ʾ</sup>wḥzh

1QS 11:7). No significant NT equivalent may be noted; the LXX already renders the verb with 27 and the noun with 6 different Gk. words (on *krateō* see W. Michaelis, *TDNT* 3:910–12).

H. H. Schmid

## אָר אַחֲרַי *ʾhr* after

S 310; BDB 29b; *HALOT* 1:35b; *TDOT* 1:201–3; *TWOT* 68b; *NIDOTTE* 339

1. (a) The common Sem. root \**ʾhr* expresses a variety of meanings in numerous parts of speech and forms, all derived from the concept of temporal succession. Local meanings are relatively insignificant and are easily explained as applications of a cognitive process in which the temporally later is seen as the spatially later.

The starting point with respect to *ʾaḥar* is not, therefore, with G. R. Driver (*JTS* 34 [1933]: 377f.; *ZDMG* 91 [1937]: 346), an anatomical designation (dual *ʾaḥ<sup>ʾ</sup>re* “buttocks”), as may be the case for the root \**wark-* (Hebr. *yārēk* “hip, bottom, backside,” 34x; *yarkā* “back, remotest part,” 28x; cf. Dhorme 98–100). The -- in *ʾaḥ<sup>ʾ</sup>re* should not be understood as a dual ending, but as an assimilation to the antonym *lipn* “before” (BL 644f.); the meaning “backside, hind part” for *ʾaḥōr* (2 Kgs 7:25 = 2 Chron 4:4) is abstract.

The local meaning “behind” is represented in Akk. by \*(*w*)*ark-* and occurs for the root *ʾhr* only (under Can. influence? cf. W. von Soden, *Or* 18 [1949]: 391f.) at Mari (*aḥarātum* “back side,” *AHW* 18a; *CAD* A/1:170a) and as a Can. gloss in an Amarna letter from Megiddo (EA 245:10 *arki-šu/aḥ-ru-un* “behind him,” *CAD* A/1:194b).

Ug. has also so far evidenced only temporal, primarily adv., usages of the root *ʾhr* (*UT* no. 138; *WUS* no. 150). In Can. inscriptions the root is seldom attested (*ʾhr ʾby* “after my father” in the Mesha inscription, *KAI* no. 181.3; cf. *DISO* 10).

In Old Aram. (since Sef. III = Fitzmyer, *Sef.* 100f., 119; *KAI* no. 224.24 *ʾhrn* “another”; often in the Elephantine papyri) adv., prep., and nom. usages (also in the meaning “posterity”; cf. *DISO* 10) are frequent, but verbal usages are not attested. Local “behind” should probably be conjectured only in the Ahiqar narrative (Cowley 214.63 [*ʾhryn* “[to send] after us”). *bātar* replaces the root in later Aram. (see KBL 1049a).

(b) The verb occurs primarily in the D stem or pi. (“to delay,” etc.); the G stem or qal is attested very little in Hebr. or in the other Sem. languages.

The Akk. G stem *aḥāru* “to be late” is attested only in EA 59:26 (CAD A/1:170b).

Hebr. *ḥr* qal “to stay, tarry” (Gen 32:5) and hi. “to delay” (2 Sam 20:5 Q, inner-trans. or internal) are hapax legomena. On pi. “to hold back” cf. *HP* 99. *ḥr* hitp. “to stay back, do afterward” also occurs at Qumran (1QS 1:14; CD 11:23).

The nom. formation *ʾāḥôr* “hinder side, west” also lends itself readily to an adv. usage: “afterward; rear(ward)”; the infrequent adv. formation *ʾāḥōrannîṯ* “backward” (BL 633) also occurs. As a verbal adj. (with virtual or secondary intensification of the middle radical in the sg.) *ʾaḥēr* “coming behind, following, different, other” distinguishes itself in meaning as well from the actual adj. formations with affirmatives, *ʾaḥʾrôn* “later, future, last; behind, westerly” and *ʾaḥʾrîṯ* “future, end, posterity.”

The abstract *ʾaḥʾrîṯ* is probably a substantivized fem. of an adj. form with *-î* (cf. GKC §95t; G. W. Buchanan, *JNES* 20 [1961]: 188; contra BL 505; Meyer 2:77). Related formations are Akk. *aḥrû* (*AHW* 21a) and Ug. *uḥryt* (*KTU* 1.17.VI.35), according to J. Aistleitner (*Untersuchungen zur Grammatik des Ug.* [1954], 21) and *WUS* no. 150: “belonging to a later time = future, later time”; cf. *ANET* 151b: “further life”; *CML* 1 134a; *CML* 2 143; Gray, *Legacy* 113; *UT* no. 138: “latter end.”

*ʾaḥar* (with a virtual reduplication of the *ḥ*, not a segholate) and *ʾaḥʾrê* “after, following, behind” are used only as advs. and preps.

In 2 Sam 2:23, *ʾāḥōrê haḥʾnîṯ* “back end of the spear” may be read; in Gen 16:13 and Exod 33:8 the prep. “(to glance) back” may be retained (*HAL* 34b: “back side”).

In addition to the temporal meaning “after” and the related local meaning “after” with acts of movement, the purely static meaning “behind” (in answer to the question *where* or *whither*) is relatively rare: *ʾaḥar* “behind” in Exod 11:5; Song Sol 2:9; “to the back” Exod 3:1; Gen 22:13 should read *ʾeḥād* (*BHS*), 2 Kgs 11:6 *ʾaḥēr* (cf. W. Rudolph, *FS Bertholet* 474f.); *ʾaḥʾrê* “behind” in Gen 18:10; Num 3:23; Deut 11:30; Judg 18:12 (“to the west”); 1 Sam 21:10; Ezek 41:15 should read *ʾāḥōreyhā* (*BHS*); “(to throw/look) behind oneself,” Gen 19:17; 1 Kgs 14:9; Isa 38:17; Ezek 23:35; Neh 9:26; *mēʾaḥʾrê* “behind,” Gen 19:26 (txt?); Exod 14:19[bis]; Josh 8:2, 4, 14; 2 Sam 2:23; 1 Kgs 10:19; Jer 9:21; *mēʾaḥʾrêlʿ* “behind,” Neh 4:7.

Secondary meanings proposed for *ʾaḥar/ʾaḥʾrê*, such as “at, near, with” (R. B. Y. Scott, *JTS* 50 [1949]: 178f.) or even “correspondingly, on account of, despite” (W. J. P. Boyd, *JTS NS* 12 [1961]: 54–56), concern only the niceties of rendition into Eng. as a result of differences of idiom (Exod 11:5, “behind the hand mill” = “at the hand mill”; “walk behind someone” = “to walk with someone,” etc.). These observations may not lead to the conclusion that the Hebr. (or Ug.) prep. could also have the meaning “with” (so M. Dahood, *Bib* 43 [1962]: 363f.; 44 [1963]: 292f.; Ug. *KTU* 1.24.32 *ḥr nkl yrḥ ytrḥ*

should not be translated par. to *ʕmn nkl ḥtny* “with Nkl . . .” with “with Nikkal will the moon enter into wedlock,” but with W. Herrmann, *Yariḥ und Nikkal*, [1968], 19, adv. “thereafter he/she bought for himself/herself . . .”). Eccl 12:2, “before . . . the clouds (always) return after the rain” (Zimmerli, ATD 16/1, 242, 246) is not a “meteorological absurdity” (Scott, *Eccl*, ABC, 255); rather it makes a conscious point in the image of old age in Prov 12:1ff. (H. W. Hertzberg, *ZDPV* 73 [1957]: 115).

*māḥār* “morning” and *moḥ<sup>o</sup>rāt* “next day” should also probably be attributed to the root *ḥr* (*GVG* 1:241).

A PN *ḥēr* (1 Chron 7:12) would have been understood as a nickname (*HAL* 34b), but should be emended according to Rudolph, *HAT* 21, 66.

(c) Beyond the usages treated in 1b, the general usage of this word group will not be investigated. Only *ḥēr* “other” and *ḥ<sup>a</sup>rīt* “end” occur in somewhat theologically significant contexts; these two words, widely divergent in meaning, will be treated in sections 3 (*ḥēr*) and 4 (*ḥ<sup>a</sup>rīt*).

2. The root is attested 1140x in the Hebr. OT; *ḥ<sup>a</sup>rē* 617x (Gen 69x, 2 Sam 58x) and *ḥar* 96x (Gen 16x, Num 10x); *ḥēr* 166x (not counting 1 Chron 7:12; Lis. overlooks 1 Kgs 3:22), most frequently in Deut (25x), Jer (25x), Gen (15x), 2 Chron (10x), and 1/2 Kgs (9x each). In addition, the following occur (in order of frequency): *ḥ<sup>a</sup>rīt* 61x, *māḥār* 52x, *ḥ<sup>a</sup>rôn* 51x, *ḥôr* 41x, *moḥ<sup>o</sup>rāt* 32x, the verb *ḥr* 17x (pi. 15x, qal and hi. 1x each), *ḥōrannît* 7x.

The Aram. portions of the OT contain *ḥ<sup>o</sup>rān* (fem. *ḥ<sup>o</sup>rī*) “other” 11x, *ḥ<sup>a</sup>rē* “after” 3x, *ḥ<sup>a</sup>rī* “end” 1x, *ʕad ḥryn* (with disputed pointing; cf. *KBL* 1049a) “last” 1x (Dan 4:5); all 16 texts are from Dan.

3. The expressions *ʕēl ḥēr* “another god” (only Exod 34:14) and *ʕlōḥîm ḥērîm* “other gods” (63x) first receive theological significance in the context of the first commandment (cf. R. Knierim, “Das erste Gebot,” *ZAW* 77 [1965]: 20–39), where *ḥēr* forms the logical contrast to the one permissible God and, within the negatively formulated passages, becomes a fixed term sooner than, say, → *ehād*, which presupposes a positive statement. Without entering further into the question of the relative and absolute ages of the various formulations of the prohibition against other gods (cf. e.g., von Rad, *Theol.* 1:203f.; Knierim, op. cit. 27ff.), they may be treated together here: Exod 20:3 = Deut 5:7, “you shall have no other gods (the translation with the sg., which A. Jepsen, *ZAW* 79 [1967]: 287, supports, does not substantially alter the negative phrase) beside me” (or “in defiance of me” or “instead of me”; cf. J. J. Stamm, *TRu* 27 [1961]: 237f.; Knierim, op. cit. 24f.); Exod 22:19, “whoever sacrifices to other gods

shall be banned” (txt em; cf. *BHS*; somewhat differently Alt, *EOTHR* 112n.73); 23:13, “you shall not call on the names of other gods”; 34:14, “you shall not bow down before another god.”

Meanings such as “strange, unknown” can be appropriate in place of *ʔahēr* in traditionally related texts, e.g., Hos 13:4, “you know (→ *yd<sup>c</sup>*) no God except me” (cf. Deut 11:28; 13:3, 7, 14, etc.); Psa 81:10 *ʔēl* → *zār* and *ʔēl* → *nēkār* “a strange god.”

The prophet Hosea, who demonstrates an acquaintance with the Decalogue in other ways, too, adopts the phrase “other gods” in 3:1, “to turn to other gods” (cf. Wolff, *Hos*, Herm, 60f.). Jer’s use of the formula (at least Jer 1:16 may be genuine; cf. Rudolph, HAT 12, 10f.) and that in the Dtn-Dtr theology (cf. O. Bächli, *Israel und die Völker* [1962], 44–47) stand in this tradition.

The concentration of the word in Deut, Jer, and 1/2 Kgs (see 2) depends upon this formulaic usage of the expression “other gods” (Deut, in addition to 5:7, also 6:14; 7:4; 8:19; 11:16, 28; 13:3, 7, 14; 17:3; 18:20; 28:14, 36, 64; 29:25; 30:17; 31:18, 20; Josh 23:16; Judg 2:12, 17, 19; 10:13; 1 Sam 8:8; 1 Kgs 9:6, 9 = 2 Chron 7:19, 22; 1 Kgs 11:4, 10; 14:9; 2 Kgs 17:7, 35, 37f.; 22:17 = 2 Chron 34:25; Jer in addition to Jer 1:16, also 7:6, 9, 18; 11:10; 13:10; 16:11, 13; 19:4, 13; 22:9; 25:6; 32:29; 35:15; 44:3, 5, 8, 15; 2 Chron 28:25).

Josh 24:2, 16 are pre-Dtn (Noth, HAT 7, 139) and reflect the old tradition concerning the assembly at Shechem and its renunciation of strange gods (Alt, *KS* [1963], 1:79–88; H.-J. Kraus, *Worship in Israel* [1966], 136–41), a tradition very closely related to the first commandment; according to Knierim (op. cit. 35ff.), the very first formulation of the prohibition of strange gods should be located here.

The verbs associated with *ʔlōhîm ʔahērîm* are quite varied. → *ʕbd* “to serve” (Deut 7:4; 11:16; 13:7, 14; 17:3; 28:36, 64; 29:25; Josh 23:16; Judg 10:13; 1 Sam 8:8; 1 Kgs 9:6 = 2 Chron 7:19; Jer 44:3; cf. Josh 24:2, 16; 1 Sam 26:19), → *hlk ʔah<sup>a</sup>rē* “to follow” (Deut 6:14; 8:19; 11:28; 13:3; 28:14; Judg 2:12, 19; 1 Kgs 11:10; Jer 7:6, 9; 11:10; 13:10; 16:11; 25:6; 35:15), and *qtr* “to burn incense” (2 Kgs 22:17 = 2 Chron 34:25; Jer 19:4; 44:5, 8, 15; 2 Chron 28:25; cf. Jer 1:16) have a stereotypical effect.

Although most texts with *ʔlōhîm ʔahērîm* relate to the first commandment, “strange gods” are discussed twice more in another context involving the assumption that Yahweh may be worshiped only in his own land (1 Sam 26:19; 2 Kgs 5:17).

*ʔahēr* “another” (without *ʔlōhîm*) functions in a monotheistic hymnic statement in Deutero-Isa (Isa 42:8, “I will give my glory to no other, nor my praise to the idols”; similarly 48:11); cf. also Bibl. Aram. *ʔoh<sup>o</sup>rān* in Dan

3:29, “for there is no other god who is able so to save.”

The expression “from another place” in Esth 4:14 serves as a euphemism for the name of God according to many exegetes (e.g., Ringgren, ATD 16/2, 116, 131; more cautiously Bardtke, KAT 17/5, 332f.).

4. (a) In the Gk. renderings in the LXX, approximately two-thirds are *eschatos* “last,” 5 are *enkataleimma* “remainder” or *kataloipos* “remaining” (Psa 37:37f. and Ezek 23:25[bis]; Amos 9:1, resp.), 6 with *teleutaios* “last,” or *teleutē* or *synteleia* “end” (Prov 14:12f.; 16:25; 20:21 [= 9b LXX]; and 24:14 and Deut 11:12, resp.). These are less significant for understanding the word  $\lambda\eta^{\alpha}r\hat{i}t$  (on the etymology see 1b) than some analogies in related Sem. languages, such as Ug. *uhryt* (see 1b), and the meaning “posterity” alongside “future” in Akk. (*ahrātu/ahrûtu*, cf. *AHW* 21a; *CAD* A/1:194b, 195a) and in Aram. (*ḥrth* “his posterity” in a 7th-cent. BCE inscription from Nerab, *ANET* 661b; *KAI* no. 226.10; Nab. *ḥr* “posterity”; cf. *DISO* 10). If one also remembers that Hebr. does not differentiate formally between the comparative and the superlative of the adj. and that, as in most languages, it does not offer a distinct abstract time concept of “temporal essence,” then the usage of  $\lambda\eta^{\alpha}r\hat{i}t$  in the basic meaning “that which comes afterward” may be easily explained in all OT texts.

The meaning “last, remainder” (e.g., *KBL* 33b; cf. LXX)—which complements the notion of coming later with the element of being present, remaining—should be discarded in favor of “that which comes afterward” = “posterity” (cf. *GB* 27a; *HAL* 36b) in Jer 31:17 (par. “children”); Ezek 23:25(bis) (par. “sons and daughters”; the distinction in Zimmerli, *Ezek*, Herm, 1:475f., is unconvincing); Amos 4:2 and 9:1 (in an unclear context); Psa 37:37f. (or “future”); 109:13 (par. “another generation”); Dan 11:4.

Depending upon whether the time period envisioned by the speaker is limitless or limited,  $\lambda\eta^{\alpha}r\hat{i}t$  may acquire a more comparative (“later time = future”) or superlative (“last time = close, end”) connotation, although an end point in the sense of a simple termination (for which  $\rightarrow q\bar{e}s$ , from *qss* “to cut off”) is never intended.

$\lambda\eta^{\alpha}r\hat{i}t$  clearly has a nonfinal meaning in Jer 29:11, “future and hope”; Prov 23:18 = 24:14 “future” (par. “hope”); 24:20, “the evil one has no future” (cf. W. Zimmerli, “Concerning the Structure of OT Wisdom,” *Studies in Ancient Israelite Wisdom* [1976], 205n.35).  $\lambda\eta^{\alpha}r\hat{i}t$  clearly has a final sense in Deut 11:12, “from the beginning of the year to the end of the year”; Jer 5:31, “when there is an end to it”; Dan 12:8, “what is the end of these things?” as well as in the meaning “last time” (Dan 8:19, 23). Process and end are contained in the meanings “outcome, end (of a thing)” (Isa 41:22; 46:10; 47:7; Amos 8:10; Prov 14:12 = 16:25; 14:13 txt em; 20:21; 25:8; Eccl 7:8,

alongside *rēšît* “beginning”; 10:13 alongside *t<sup>e</sup>hillâ* “beginning”; Lam 1:9; cf. Rudolph, KAT 17, 213) and “end of someone’s life” (Num 23:10 par. “death”; 24:20; Deut 32:20, 29; Jer 17:11 alongside “midst of his days”; Psa 73:17; Job 8:7 alongside “beginning”; Prov 29:21; Jer 12:4 should probably read *ʾorḥôtēnû* “our paths”). An unequivocal choice between the two options is often impossible for texts best rendered in Eng. by adv. expressions (Deut 8:16, “finally”; Job 42:12 and Prov 23:32, “afterward”; Prov 5:4, 11, “lastly”; the emendation *b<sup>e</sup>ʾorḥōteykā* “in your ways” has been proposed for Prov 19:20, where the choice between “in the future” and “at your end” is difficult).

In connection with an expression of movement (superlative), *ʾaḥ<sup>a</sup>rît* “that which comes last” acquires a local meaning in Psa 139:9, “if I were to take the wings of dawn and settle at the extremes of the sea” (cf. on the contrary the purely static *qîšôn* “outermost” in Exod 26:4, 10; 36:11, 17, “the outermost curtain”).

A qualitative meaning “last = worst,” widely accepted for Jer 50:12 based on an appeal to *rēšît* “first, best” (cf. Num 24:20 and Amos 6:1, “first of the nations”; B. Duhm, *Jer*, KHC, 362; Weiser, ATD 21, 427; KBL 33b, among others), should be rejected with P. Volz (*Jer*, KAT [19282], 242f.) and W. Rudolph (*ZAW* 48 [1930]: 285) on exegetical grounds (Rudolph, HAT 12, 300: “see, [that is] the end of the heathens”; cf. Jer 17:11).

(b) The much-discussed expression *b<sup>e</sup>ʾaḥ<sup>a</sup>rît hayyāmîm* (13x: Gen 49:1; Num 24:14; Deut 4:30; 31:29; Isa 2:2 = Mic 4:1; Jer 23:20 = 30:24; 48:47; 49:39; Ezek 38:16; Hos 3:5; Dan 10:14; and Aram. *b<sup>e</sup>ʾaḥ<sup>a</sup>rît yômayyā* in Dan 2:28), which has so far been treated together with *b<sup>e</sup>ʾaḥ<sup>a</sup>rît haššānîm* (Ezek 38:8), should be understood against the background of the discussion to this point. The interpretation of the expression was determined for too long by the later usage of the term *eschatos* in apocalypticism, but since the 1960s scholars have offered a more adequate evaluation of the formula in the framework of the givens of the Hebr. language and of the history of OT religion (cf. e.g., G. W. Buchanan, “Eschatology and the ‘End of Days,’” *JNES* 20 [1961]: 188–93; A. Kapelrud, *VT* 11 [1961]: 395f.; H. Kosmala, “At the End of the Days,” *ASTI* 2 [1963]: 27–37; Wildberger, *Isa 1–12*, CC, 81f.; Zimmerli, *Ezek*, Herm, 2:306f.).

On the older positions cf. Kosmala, op. cit. 27f.: if one translated the expression with W. Staerk (*ZAW* 11 [1891]: 247–53) as “at the end of days” or “in the last days” and understood it as eschatological in the stricter sense, one came necessarily either to an early dating of eschatology (e.g., H. Gressmann, *Der Messias* [1929], 74ff., 82ff.) or to a comprehensive late dating of the texts in question (e.g., S. Mowinckel, *He That Cometh* [1956], 131).

Because the expression *hayyāmîm* “the days” (or *haššānîm* “the years”) does not refer to time per se (→ *yôm*; on the lack of the abstract, “empty” concept of time, cf. von Rad, *Theol.* 2:99ff.), nor to a limited period of time (era, present epoch), but to “the time currently transpiring” (with a light demonstrative force of the art.; cf. Kosmala, op. cit. 29), one should not assume the final meaning “end” for *ʾaḥʾrît*, but, as in Akk. *ina/ana aḥrât ūmî* “in the future,” etc. (*AHw* 21a; *CAD* A/1:194), the nonfinal meaning “later time, continuation, sequel, future.” From the outset, therefore, no esp. eschatological meaning characterizes the expression *b<sup>ʿ</sup>ʾaḥʾrît hayyāmîm* “in the sequence of time, in future days”; it signifies practically nothing more than the preceding *ʾaḥar* “after this” in Hos 3:5 and the subsequent *ʾaḥʾrê d<sup>e</sup>nâ* “thereafter” in Dan 2:29 (cf. v 45; Buchanan, op. cit. 190; Kosmala, op. cit. 29).

On the age of individual texts, see Wildberger, *Isa 1–12*, CC, 88: in addition to Gen 49:1 (introduction to the prophecies of Jacob’s blessing) and Num 24:14 (“what this people will do to your people at a later time”), Isa 2:2 (“it will occur in the days to come”), and Jer 23:20 (Rudolph, HAT 12, 152f.: “it will become clear and meaningful to you afterward”) may also be pre-exilic, against which Jer 30:24 (= 23:20); 48:47; and 49:39 (“but afterward I will restore Moab/Edom”) should be regarded as post-exilic, as well as Hos 3:5 (closing formula of a promise) and Mic 4:1 (= Isa 2:2).

The secondary Dtn texts Deut 4:30 and 31:29 envision the calamitous present from the standpoint of the author, but an unspecified future from the standpoint of the fictive speaker, Moses, (4:30, “when all of this comes upon you in your distress in the time to come”; 31:29, “after my death . . . then calamity will come upon you in the time to come”; cf. in 4:32, “the earlier days = the past” as a contrast to the future of v 30); a special treatment of these two texts on account of their supposed eschatological content (H. H. Schmid, “Das Verständnis der Geschichte im Dtn.,” *ZTK* 64 [1967]: 12n.71) seems unjustified.

Although the late texts Ezek 38:8, 16 and Dan 2:28; 10:14 stand in general contexts that are thoroughly eschatological in the stricter sense, they too are only prophecies concerning the distant future. If one translates “last time” (cf. *ʾaḥʾrît* in Dan 8:19, 23; 12:8), then the expression, in itself elastic, is colored by the context. Terminologically, the word → *qēṣ*, not quite synonymous with *ʾaḥʾrît* (Kosmala, op. cit. 30f.), occurs in Dan for the “end” in the actual sense.

Unlike prophetic introductory formulas not far removed from *b<sup>ʿ</sup>ʾaḥʾrît hayyāmîm* in terms of meaning (e.g., *bayyôm hahûʾ* “in that day,” *bayyāmîm hāhēm* “in those days,” *bāʿēt hahîʾ* “at that time,” *hinnēh yāmîm bāʾîm* “behold, days are coming”), no formulaic usage of the expression may be

identified (contra Gressmann, op. cit. 84). Only Isa 2:2, “and it will happen in the course of days,” may involve such a formulaic usage, but it is a unique introductory formula; otherwise, in terms of distribution and placement within a phrase, the expression is a rather ordinary temporal designation (its frequent placement at the end of the phrase [cf. Gen 49:1; Jer 48:47; 49:39; Hos 3:5] is due to its meaning).

5. On the continuation of the usage treated in 4b in the intertestamental and NT writings, cf. Kosmala, op. cit. 32ff.; G. Kittel, “ἔσχατος,” *TDNT* 2:697f. On the exclusion of any other god (see 3) in the NT, cf. H. W. Beyer, “ἕτερος,” *TDNT* 2:702–4.

E. Jenni

## יָבֵב *ʾōyēb* enemy

S 341; BDB 33a; *HALOT* 1:38b; *TDOT* 1:212–18; *TWOT* 78; *NIDOTTE* 367

1. The root *yb* “to be hostile to” is extant only in Akk. and Can. In the OT, *yb* qal occurs with only one exception in the ptcp., which is only rarely verbal (1 Sam 18:29; cf. Psa 69:5; Lam 3:52); as a rule it is a substantive. The abstract noun *ēbâ* “enmity” is included as a derivative.

Akk. *ayyābu* (and derivatives; cf. *AHw* 23f.; *CAD* A/1:221–24) and Ug. *ib* (*WUS* no. 7; *UT* no. 144; cf. also Can. *ibi* in EA 129:96 and 252:28, according to W. F. Albright, *BASOR* 89 [1943]: 32n.26) are attested only nominally, each in different nom. formations. In *KTU* 1.4.VII.35f., *ib* is par. to *šnu* “hater”; on the par. to Psa 92:10 in *KTU* 1.2.IV.8f., cf. H. Donner, *ZAW* 79 [1967]: 344–46.

Aram. uses primarily the ptcp. of → *śnʾ* “to hate” for “enemy” (e.g., in the Sef. inscriptions, *KAI* nos. 222B.26; 223B.14; 224.10–12; Fitzmyer, *Sef.* 16f., 82f., 89, 98f.; *Bibl. Aram.* in Dan 4:16 par. *ʿār*, → *šrr*) and later, e.g., Syr., *b<sup>c</sup>eld<sup>e</sup>bābā* (< Akk. *bēl dabābi*).

The PN *ʾyôb* (Job) may derive from another source; cf. Stamm, *HEN* 416; → *ʾāb* III/5 and → *ʾayyēh* 1.

2. *ʾōyēb* occurs 282x (incl. 1 Sam 18:29 and fem. *ʾōyebet* in Mic 7:8, 10), 80x in the sg. and 202x in the pl. (2 Sam 19:10 pl. contrary to Mandl. 41c). The term is most frequent in Psa (74x), followed by Deut 25x, 1 Sam 20x, Jer 19x, 2 Sam 16x, Lam 15x, Lev 13x (only in Lev 26:7–44), Josh 11x; concentrations are in the psalms of lament and in the historical books;

the word becomes much less frequent in the wisdom literature (and in Isa).

*ʔyb* qal occurs 1x as a finite verb (Exod 23:22 with a figura etymologica, par. → *srr*), *ʔēbā* 5x (Gen 3:15; Num 35:21f.; Ezek 25:15; 35:5).

3. (a) The sg. *ʔōyēb* describes the individual, particular enemy only rarely (in legal disputes: Exod 23:4; Num 35:23; Samson: Judg 16:23f.; Saul and David: 1 Sam 18:29; 19:17; 24:5; 26:8; 2 Sam 4:8; Elijah against Ahab: 1 Kgs 21:20; Nebuchadnezzar: Jer 44:30b; Job against God: Job 13:24; 33:10; Haman: Esth 7:6; on Yahweh as enemy, see 4). “The enemy” usually occurs in the general sense of the pl. “the enemies” (cf. e.g., 1 Kgs 8:37, 44 with 2 Chron 6:28, 34 and the alternation of sg. and pl. in Lam).

In most cases politico-military enemies of the people Israel are meant, as in various types of historiography (Num 10:9; 14:42; 32:21; Deut 1:42; 6:19; 12:10; 25:19; 11x in Josh 7:8–23:1; Judg 2:14[bis], 18; 3:28; 8:34; 11:36; 1 Sam 4:3; 12:10f.; 14:30; 29:8; 2 Sam 3:18; 19:10; 2 Kgs 17:39; 21:14[bis]; Esth 8:13; 9:1, 5, 16, 22; Ezra 8:22, 31; 5x in Neh; 2 Chron 20:27, 29; 25:8; 26:13), in community laments (Psa 44:17; 74:3, 10, 18; 80:7), in hymns (Psa 78:53; 81:15; 106:10, 42; cf. Deut 32:27, 31, 42; 33:27), and also in the Dtn war regulations (Deut 20:1, 3f., 14; 21:10; 23:10, 15) and in Solomon’s prayer at the temple dedication (6x in 1 Kgs 8:33–48 par. 2 Chron 6:24–36). Concentrations of the word in blessings, cursings, and similar contexts are noteworthy (Gen 22:17; 49:8; Exod 23:22, 27; 13x in Lev 26:7–44; Num 10:35; 23:11; 24:10, 18 txt em; 8x in Deut 28:7–68; 30:7; 33:29; 1 Sam 25:26, 29; 2 Sam 18:32; 1 Kgs 3:11), to which occurrences in prophetic salvation and judgment sayings are topically related (in Isa only Isa 9:10; 62:8; otherwise in all texts the “enemy” is a personified foreign nation, with the exception of Jer 30:14; Nah 1:2, 8 [see 4]; Mic 7:6 [see below]; Mic 7:8, 10).

Outside the Psa (see b), an individual’s enemies receive infrequent mention (1 Sam 2:1; 14:24, 47; 18:25; 20:15f.; 24:5; 29:8; 2 Sam 5:20 = 1 Chron 14:11; 2 Sam 7:1, 9, 11 = 1 Chron 17:8, 10; 2 Sam 18:19; Mic 7:6; Psa 127:5 [a wisdom psalm]; Job 27:7; Prov 16:7; 24:17; 1 Chron 21:12; 22:9); the enemies of the kings should for the most part be equated with those of the people (2 Sam 22 = Psa 18:1, 4, 18, 38, 41, 49; Psa 21:9; 45:6; 72:9; 89:23, 43; 110:1f.; 132:18).

On the euphemistic insertion of *ʔōyʔbē* in 1 Sam 20:16; 25:22; 2 Sam 12:14, cf. HAL 37b (with bibliog.) and comms.

The most frequent par. expressions are the qal/pi. ptcps. of → *śnʔ* “hater” (qal: Exod 23:4; Lev 26:17; Deut 30:7; 2 Sam 22:18 = Psa 18:18; Psa 21:9; 35:19; 38:20; 69:5; 106:10; Esth 9:1, 5, 16; pi.: Num 10:35; 2

Sam 22:41 = Psa 18:41; Psa 55:13; 68:2; 83:3) and *šār* “oppressor” (→ *šrr*; Num 10:9; Deut 32:27; Isa 1:24; 9:10 txt?; Mic 5:8; Nah 1:2; Psa 13:5; 27:2; 74:10; 81:15; 89:43; Lam 1:5; 2:4, 17; 4:12; Esth 7:6; cf. *šōrēr* Exod 23:22; Num 10:9; Psa 8:3; 143:12).

Other quasi-synonyms that appear with *ʾōyēb* include *m<sup>a</sup>baqqēš rā<sup>ʿ</sup>ā* or *nepēš* “one who seeks evil” or “who seeks one’s life” (→ *bqš*; Num 35:23; 1 Sam 25:26 or Jer 19:7, 9; 21:7; 34:20f.; 44:30[bis]; 49:37, resp.), *qām* “adversary” (→ *qūm*; Exod 15:6; 2 Sam 22:49 = Psa 18:49; Nah 1:8 txt em; cf. 2 Sam 18:32; *mitqômēm* Psa 59:2; Job 27:7), *mitnaqqēm* “vengeful one” (→ *nqm*; Psa 8:3; 44:17). The synonym *šōrēr* “enemy” occurs in general proximity to *ʾōyēb* in Psa 5:9; 27:11; 54:7; 56:3; 59:11. Cf. also → *štn* and the lists in Gunkel-Begrich 196f.

On the antonym *ʾōhēb* “friend” → *ʾhb* III/1.

(b) The question of who the individual’s enemies in lament and thanksgiving psalms may be has already been much discussed (G. Marschall, *Die “Gottlosen” des ersten Psalmenbuches* [1929]; H. Birkeland, *Die Feinde des Individuums in der isr. Psalmenliteratur* [1933]; id., *Evildoers in the Book of Psalms* [1955]; N. H. Ridderbos, *De “werkers der ongerechtigheid” in de individueele Psalmen* [1939]; A. F. Puukko, “Der Feind in den atl. Psalmen,” *OTS* 8 [1950]: 47–65; Westermann, *PLP* 165–213; summaries in J. J. Stamm, *TRu* 23 [1955]: 50–55; Kraus, *Psa*, CC, 1:95–99).

The material is cataloged in Gunkel-Begrich 196f., among others; texts with *ʾōyēb*, all contained in the genres of the individual hymns of lament and thanksgiving (incl. songs of confidence), are, with the sg.: Psa 7:6; 9:7; 13:3, 5; 31:9; 41:12; 42:10; 43:2; 55:4, 13; 61:4; 64:2; 143:3; with the pl.: Psa 3:8; 6:11; 9:4; 17:9; 25:2, 19; 27:2, 6; 30:2; 31:16; 35:19; 38:20; 41:3, 6; 54:9; 56:10; 59:2; 69:5, 19; 71:10; 102:9; 138:7; 139:22; 143:9, 12; cf. 119:98.

For the most part, interpretations involving party conflict (older Psa exegesis), magicians (S. Mowinckel, *Psalmenstudien* 1 [1921]), and enemies from abroad (Birkeland, op. cit.) should be rejected. Statements concerning the individual’s enemies (their threatening schemes, their mocking speech, their corruption; cf. *PLP* 188–93) distinguish themselves markedly from those concerning the enemies in community laments. Although the enemies have already smitten Israel in the latter, in the former they threaten only the sick or the one fallen into legal difficulties. They do not cause the conditions of distress; rather, they attack the supplicant because he/she has fallen into misfortune (cf. Psa 71:11). The fact of the break within the existing social relationship greatly magnifies the difficulty (cf. Psa 41:7; 55:22).

The book of Job provides the best background for explanation and

illustration. Because Job has fallen into difficulty, his friends consider him guilty and suspect him of secret sin. In 2 Sam 16, David too becomes the object of contempt and even actual attack following his displacement by Absalom. Sudden fall into suffering in the world of the time is still occasion for isolation, reproach, contempt, and animosity. Private conflicts and religious differences sharpen the isolation of the one who is already halfway in the realm of the dead (C. Barth, *Die Errettung vom Tode in den individuellen Klage- und Dankliedern des AT* [1947], 104–7).

4. (a) Texts that treat Yahweh's intervention against the people's or the individual's enemies (e.g., Exod 23:22, "If you . . . do all that I command, then I will be the enemy of your enemies and the oppressor of your oppressors") need not be listed. That Yahweh also hands his people over to the enemies is a possibility exhibited by the prophetic judgment preaching (Hos 8:3; Amos 9:4) and by the blessing-curse chaps. Lev 26 and Deut 28, and is expressed above all in Jer (Jer 6:25; 12:7; 15:9, 14; 17:4; 18:17; 19:7, 9; 20:4f.; 21:7; 34:20f.; 44:30; *ʔōyēb* occurs otherwise in Jer only in Jer 15:11 txt?; 30:14 [see b]; 31:16 in a promise of restoration; and 49:37 in an oracle against the nations), in the laments (all texts), and in the Dtr history (Judg 2:14; 1 Kgs 8:33, 37, 46, 48 par.; 2 Kgs 21:14; cf. Neh 9:28).

(b) That Yahweh succeeds against his own enemies is already the theme of the oldest songs, which extol Yahweh as warrior (Exod 15:6, "your right hand, Yahweh, smashes the enemy"; cf. v 9; Num 10:35, in the ark saying, "stand up, Yahweh, so that your enemy may be dispersed"; Judg 5:31, "may all your enemies, Yahweh, perish so"). Similar statements occur in Psa, esp. in hymns with a somewhat archaic tone (Psa 8:3; 66:3; 68:2, 22, 24; 89:11, 52; 92:10[bis]). In the prophets, Isa 42:13; 59:18; 66:6, 14; and Nah 1:2, 8 continue the practice.

Texts such as 1 Sam 30:26 ("a gift from the plunder of Yahweh's enemies" with a propagandistic nuance, if *ʔōyēbē* is not a secondary insertion; cf. W. Caspari, *Sam*, KAT, 387); Isa 1:24 (Yahweh's enemies within Israel); Psa 37:20 (a wisdom comparison of the godless with the enemies of Yahweh); 83:3 (in a communal lament in a so-called motif of divine intervention, the enemies of the people are presented to Yahweh as "your enemies") are isolated.

(c) Yahweh himself is called Israel's enemy directly only in Isa 63:10 ("therefore, he changed into their enemy"). Jer 30:14 and Lam 2:4f. compare Yahweh's activity with that of an enemy ("like an enemy"). Each states a paradox.

5. In the LXX, *ʔōyēb* is rendered almost exclusively by *echthros*. In the Qumran texts, *ʔōyēb* is frequent in 1QM (Kuhn, *Konk.* 4; also GCD S 8, 118). On the NT and its environment, cf. W. Foerster, "ἐχθρός," *TDNT*

2:811–15.

The concept of “love of the enemy” is absent from the OT; although some cite Exod 23:4f., only the fair treatment of the legal opponent with respect to aid in everyday situations is required here (Prov 25:21 uses → *śnʿ*).

E. Jenni

## דַּיָּד *ḡēd* **distress**

S 343; BDB 15b; *HALOT* 1:39a; *TWOT* 38c; *NIDOTTE* 369

1. The root of the noun *ḡēd* “distress” cannot be clearly determined. An unattested verb \**ḡûd* is usually assumed as the stem, for which Arab. words such as *ḡāda* (*ū*) (e.g., Zorell 40; contra P. Humbert, *TZ* 5 [1949]: 88; cf. L. Kopf, *VT* 6 [1956]: 289) are adduced. *HAL* 38a traces the word to \**ḡaid* or \**ḡayid*.

A verb *ḡûd* would indeed be attested, if one understood (*lʿ*)*ḡēd* in Prov 17:5 as a ptcp., as recommended by G. R. Driver (*Bib* 32 [1951]: 182), who emends, however, to (*lā*)*ḡēd* (“as it ought to be written!”), and as understood by M. Dahood (*PNSP* 38f.) in reference to Ug., without emendation, as “a stative ptcp.”; cf. further Gemser, *HAT* 16, 72f.; *CPT* 266, 321 (on Job 31:23 and 2 Sam 13:16).

Indeed, it may be better to proceed from Akk. *edû(m)* II “(threatening) flood, flood surge” (*AHw* 187b), which refers to “a rare and catastrophic event” (*CAD* E:36a), and assume it to be a Sum.-Akk. loanword (cf. E. A. Speiser, *BASOR* 140 [1955]: 9–11; M. Sæbø, “Die hebr. Nomina *ḡed* und *ḡēd*,” *ST* 24 [1970]: 130–141).

2. *ḡēd* occurs 24x: in Job and Prov, 6x each; Jer, 5x, Obad 13, 3x; elsewhere Deut 32:35; Ezek 35:5; 2 Sam 22:19 = Psa 18:19. The texts of Ezek 35:5, as well as Prov 17:5; 27:10; and Job 31:23, have often been disputed. Except for Ezek 35:5, *ḡēd* occurs only in poetry. It never carries the art., although it is further specified 2x by PNs and 17x by sufs.

3. The word represents a relatively fixed term for “distress”; it is difficult to trace its semantic history. Nevertheless, two usages distinguish themselves from each other so clearly that their basic meaning should be differentiated semantically: (a) in a political or military sense in reference to a *people* (2 Sam 22:19 = Psa 18:19 too); (b) of the fate of an *individual* or a smaller group of individuals; the latter category involves the 12 wisdom occurrences in Job and Prov.

In both categories, *ʿēd* is often associated with “day” (Deut 32:35; 2 Sam 22:19 = Psa 18:19; Jer 18:17; 46:21; Obad 13 [3x]; Job 21:30; Prov 27:10) or “time” (*ʿēt*, Ezek 35:5; cf. Jer 46:21; 49:8); with the prep. *be*, it is a significant temporal and circumstantial determination. It can be said with equal validity of both groups that *ʿēd* comes “suddenly,” surely in the sense of humanly “unfathomable” (Deut 32:35; Jer 48:16; Prov 6:15; 24:22; cf. 1:27). The predicate often has *bôʿ*, either in the qal “to come” (Jer 46:21; Prov 6:15; Job 21:17; cf. Jer 48:16 and *ʿātâ* “to come” Prov 1:27) or causatively in the hi. “to bring” (Jer 49:8, 32); in this regard, moreover, it is associated 3x with *ʿal* (Jer 46:21; 49:8; Job 21:17; cf. 30:12; Prov 1:27). Otherwise, in (a) *ʿēd* “is near” (*qārôb*; Deut 32:35; Jer 48:16) or in (b) it “arises” (*qûm*; Prov 24:22) or “stands ready (*nākôn*) for (the evildoer’s) fall” (Job 18:12).

The word has several synonyms in both categories, but almost no antonym (cf., however, *nēr* “lamp” in Job 21:17; cf. also 18:5 and Horst, BK 16, 270); but the synonyms too are distributed among (a) and (b).

In (a) one encounters the frequent *rāʿâ* “evil, distress” (Jer 48:16; Obad 13; cf. also e.g., Isa 7:5; Jer 1:14) and expressions that sound the theme, favored by the prophets, of divine punishment (Jer 46:21; 49:8); cf. further Ezek 35:5, “at the time of their final punishment,” and Obad 12, 14, “in the day of his misfortune/their fall/distress.” By contrast, in (b) one encounters two uncommon words for “distress”: *pîd* (Prov 24:22; otherwise only Job 12:5; 30:24; 31:29; cf. KBL 759a and Fohrer, KAT 16, 232, 237: “fall”) and *nēker* (Job 31:3; cf. Obad 12; “something strange” = “something disastrous”); then the more frequent *paḥad* “terror” (Prov 1:26f.; cf. Job 31:23, etc.), *yôm ʿbārôt* “day of wrath” (Job 21:30), and *ḥ<sup>a</sup>bālîm* “pain” (Job 21:17), whereby *ʿēd* is associated with illness; so also in Job 30, where it is coupled with *ʿorḥôt* “ways” (HAL 84a: “dams”); Prov 1:27 compares *ʿēd* to a storm wind (cf. further Jer 18:17).

Over against the prophetic usage of *ʿēd* in (a), which seems to be traditional, the wisdom usage in (b) is more manifold and rich. The word may have had its own life in the wisdom sphere, but was then adopted by (later) prophetic speech.

4. The abstract nom. is, indeed, theologically neutral only in Prov 27:10; otherwise occurrences in Job and Prov express a theologically based (experiential) wisdom. *ʿēd* refers positively to God; even though it is also personified (esp. Job 18:12; cf. Fohrer, KAT 16, 303), it is still never subordinated to a “fate,” but to God who brings it about (cf. Job 31:23; Prov 24:22). It is negatively associated with the disastrous destiny of the godless (*ʿawwāl, raʿ, r<sup>e</sup>šāʿîm*); it is “the final ruin which leads to death” (Fohrer, op. cit.). It belongs in the wisdom scheme of “deed and consequence” (cf. K. Koch, ZTK 52 [1955]: 2ff.); it can also appear, then, in the theodicy and lament of the embattled pious (Job 21:17, 30); in the final analysis one may trace it to God’s righteousness. Indeed, prophetic occurrences, several of

which center upon the national and religious crisis of the year 587 (Obad 13; Ezek 35:5; cf. Jer 49:8, 32) also point in the same direction;  $\text{ʔ}ēd$  expresses God's judicial activity (cf. Jer 18:17; 46:21; 48:16; also Deut 32:35). In the (perhaps late) thanksgiving hymn, Psa 18 and par.,  $\text{ʔ}ēd$  is the polar opposite of divine help and salvation.

5. The word has no equivalent in the LXX; instead it is rendered by no fewer than twelve Gk. words, of which *apōleia* (9x) and *katastrophē* (2x) may be mentioned. Finally, the word is not attested in the available texts from Qumran and appears to have had no significance in the NT.

M. Sæbø

## 𐤀𐤓𐤁 $\text{ʔ}ayyēh$ where?

S 346; BDB 32b; HALOT 1:39a; TWOT 75a; NIDOTTE 372

1. The element \* $\text{ʔ}ay-$ , extant in all Sem. languages, occurs in various interrogative advs. and interrogative prons. (Barth, *Pronominalbildung* 144–49; GVG 1:327f.; Moscati, *Intro.* 114f., 120f.), incl. the Hebr. interrogative particles to be treated here:  $\text{ʔ}ē$ ,  $\text{ʔ}ēpōh$ , and  $\text{ʔ}ayyēh$  “where?” (cf. Ug. *iy*, WUS no. 161; UT no. 143); also  $\text{ʔ}ēmizzeh$  and *mēʔayin* “whither?”  $\text{ʔ}ān/\text{ʔ}ānā$  “(where), whither?” and  $\text{ʔ}ī-$  “where is?” in PNs (HAL 37b; Stamm, HEN 416). The negated statement “there is not” develops from the rhetorical question “where is?” ( $\rightarrow$   $\text{ʔ}ayin$ ; cf. GVG 1:500; 2:114; BL 633f.; I. Guidi, “Particelle interrogative e negative nelle lingue semitiche,” FS Browne 175–78; A. Goetze, “Ugaritic Negations,” FS Pedersen 115–23; cf. Akk. *yānu* “is/are not” < *ayyānum* “where?” GAG §111b; CAD I/J:323f.)

$\text{ʔ}ēkâ$  (Song Sol 1:7[bis]) and  $\text{ʔ}ēkōh$  (2 Kgs 6:13) in the meaning “where?” are Aramaisms (Wagner no. 10).

G. R. Driver's (WO 1 [1947]: 31) suggestion that  $\text{ʔ}al$  in 1 Sam 27:10 (usually emended to  $\text{ʔ}el-mî$  or  $\text{ʔ}ān$ ) may be associated with Akk. *ali* “where?” is unlikely.

2. The roughly 90 OT texts with the question “where?” (in addition to 27x “whence?” and 20x “whither?”) use an entire series of interrogatives that are all formed with \* $\text{ʔ}ay-$ ; the most frequent, and the most important theologically, is  $\text{ʔ}ayyēh$ .

The following occur in the meaning “where?”: (1)  $\text{ʔ}ē$  4x (Gen 4:9; Deut 32:37; 1 Sam 26:16; Prov 31:4 Q txt?; cf. Gemser, HAT 16, 108; contra N. M. Sarna, JNES 15

[1956]: 118f.; *UT* §6.31 and no. 52: “any liquor”);

(2) *ʿē zeh/ʿē-zeh* 17x, sometimes in a pron. usage “which?” (1 Sam 9:18; 1 Kgs 13:12; 22:24 = 2 Chron 18:23 plus *hadderek*; 2 Kgs 3:8; Isa 50:1; 66:1[bis]; Jer 6:16; Job 28:12, 20; 38:19[bis], 24; Eccl 2:3; 11:6; Esth 7:5; cf. further *ʿē mizzeh* “whence?” 9x and *mēʿayin* “whence?” 17x, incl. 2 Kgs 5:25 Q; and *ʿē lāzōʿt* “on what account?” once in Jer 5:7);

(3) *ʿēpōh* (*ʿyph*) 10x (Gen 37:16; Judg 8:18; 1 Sam 19:22; 2 Sam 9:4; Isa 49:21; Jer 3:2; 36:19; Job 4:7; 38:4; Ruth 2:19; not to be confused with the *ʿēpōʿ* “for, therefore,” written *ʿpwʿ* or *ʿpw*, which can accompany interrogatives such as *ʿayyēh* to intensify them);

(4) *ʿēkā* 2x (Song Sol 1:7[bis]; otherwise 15x in the meaning “how?” alongside 60x *ʿēk*, 4x *ʿēkākā*, and 2x *hík* [Aramaism; cf. Wagner no. 73 and *Bibl. Aram. hēʿ-kʿdī* “how” in Dan 2:43 < *hēk dī*, KBL 1068a]);

(5) *ʿēkōh* 1x (2 Kgs 6:13);

(6) *ʿānā* 1x (Ruth 2:19; otherwise 19x “whither?” and 3x *ʿāneh wʿānā* “hither and thither,” as well as 13x “[until] when?” → *māṭay*); cf. *ʿān* in *mēʿān* “whence?” 2 Kgs 5:25 K, “whither?” 1 Sam 10:14; “(until) when?” Job 8:2;

(7) *ʿayyēh* 45x (Isa 10x, Jer 6x, Psa and Job 5x each, Gen 4x; in Judg 9:38 and Job 17:15 strengthened by *ʿēpōh* “then,” in Psa 115:2 by *nāʿ* “then”);

(8) with a pron. suf. with *ʿē* or *ʿayyēh* 8x (Gen 3:9; Exod 2:20; 2 Kgs 19:13; Isa 19:12 with *ʿēpōʿ* “who, then, are . . . ?”; Mic 7:10; Nah 3:17; Job 14:10; 20:7).

Aram. *ʿān* (*DISO* 18) is not attested in *Bibl. Aram.*

3. Perhaps only half of the *where* questions in the OT are genuine questions. In the majority of the cases *ʿayyēh* (exceptions are Gen 18:9; 19:5; 22:7; 38:21; Exod 2:20; 2 Sam 16:3; 17:20; Jer 2:6, 8; Job 35:10; Lam 2:12; in Nah 3:17 and Job 15:23 the text should be emended), and to a lesser degree *ʿē(-zeh)* and *ʿēpōh* (only Deut 32:37; Isa 50:1 or Jer 3:2; Job 4:7; 38:4, resp.), introduce rhetorical questions that, for various stylistic reasons (hyperbole, irony and derision, expression of lament, perplexity, etc.), expect the answer “nowhere.” Examples from profane speech are Judg 9:38, “where is your mouth, now, you who said . . .”; Nah 2:12, “where, now, is the lion’s lair . . .”; Job 17:15, “where, then, is there still hope for me?”

Questions with “whence?” and “whither?” are generally genuine questions (even Psa 121:1, “whence comes my help?”), which could sometimes become somewhat formulaic usages to open conversation (e.g., Judg 19:17, “whither are you going and

whence are you coming?"; cf. Lande 40f.). Rhetorical questions also express the perplexity of the questioner or the impossibility of exit (with *mēʿayin*: Num 11:13; 2 Kgs 6:27; Nah 3:7; with *ʿānā*: Gen 37:30; 2 Sam 13:13; Isa 10:3).

4. Psalmic, prophetic, and wisdom diction use the rhetorical question "where, then, is *x*" (= *x* is nowhere) in numerous forms (cf. F. Asensio, "Teología e historia del pacto en torno a una interrogación bíblica," *Gregorianum* 47 [1966]: 665–84).

Distinct from this usage are cases in which the questioner already knows the answer ("here," etc.) but poses the question nevertheless, in order to appeal urgently to someone's responsibility: Gen 3:9, "Adam, where are you?"; 4:9, "where is your brother, Abel?"; 1 Sam 26:16, "where is the king's spear?"; also 2 Kgs 2:14, "where, now, is Yahweh, the God of Elijah?" as an appeal to Yahweh to manifest himself in a wondrous act.

The rhetorical question "where" in reference to God (in contrast to the authentic concern for God, which is, however, lacking in those mentioned in Jer 2:6, 8; Job 35:10) should be understood in most cases as a malicious denial of the existence and activity of God, less often (in the question concerning God's mighty deeds) as a lament of the embattled and as an appeal to the hidden God to demonstrate his (former) might (Judg 6:13; Isa 63:11[bis], 15; Mal 2:17; Psa 89:50, "where are your former demonstrations of grace?"). Community laments cite the enemies' mocking question: "Where now is their God?" (Joel 2:17; Psa 79:10; 115:2; cf. Mic 7:10; hence also in the individual lament, Psa 42:4, 11, "Where now is your God?"; similarly in the lament-prayer of Jer 17:15, "Where then is the word of Yahweh?"). The Rabshakeh's speech with the question, "Where are the gods of Hamath?" (2 Kgs 18:34 = Isa 36:19; cf. 2 Kgs 19:13 = Isa 37:13), also applies implicitly to the God of Israel. But Yahweh can also scoff at the impotence of the idols (Deut 32:37, "Where are their gods?"; Jer 2:28, "Where are your gods that you have made?").

In the spirited language of the prophetic and wisdom disputation, the rhetorical "where" is also used in the most varied contexts; cf. Isa 19:12; 33:18 (3x); 50:1; 51:13; Jer 3:2; 13:20; 37:19; Ezek 13:12; Hos 13:10, 14(bis) (reading *ʿayyēh* for MT *ʿhî*); Zech 1:5; Mal 1:6(bis); Job 4:7; 14:10; 20:7; 21:28(bis); 38:4; unanswerable questions as evidence for the finitude of knowledge: Job 28:12, 20; 38:19(bis), 24.

In view of the broad distribution of the stylistic technique (J. Konopsek, "Les 'questions rhétoriques' dans le NT," *RHPR* 12 [1932]: 47–66, 141–61; BDF §496), rhetorical questions with *pou* "where?" in the NT (Luke 8:25; Rom 3:27; 1 Cor 1:20 quoting Isa 19:11f.; 12:17; 15:55 following Hos 13:14; Gal 4:15; 1 Pet 4:18 quoting Prov 11:31 LXX; 2 Pet 3:4) may derive from OT tradition only in the event of thematic dependence.

E. Jenni

## אֵינְ אֵינְ *ʾayin* nothing

S 369; BDB 34a; *HALOT* 1:41b; *TWOT* 81; *NIDOTTE* 401

1. Hebr. *ʾayin* “nothing, is not” has cognates in Akk. *yānu* (*GAG* §§111b, 190b, Middle and Late Bab.), Ug. *in* (*WUS* no. 294; *UT* nos. 149, 252), Moab. *ʾn* (*KAI* no. 181.24); cf. Pun. *yunny* (*Poen.* 1006; Sznycer 142).

The basis of the word, treated in Hebr. as a segholate, appears to be the same as that of the interrogative → *ʾayyēh* “where.” Therefore, *ʾayin* “nothing, is not” is usually derived from this interrogative particle: the rhetorical question “where is X ?” could develop into a declaration “X is not here” (BL 633; cf. *HAL* 40b). The similar development in Akk. (→ *ʾayyēh* 1) supports this explanation.

Extrabibl. Hebr. occurrences are found in the second Silwan inscription (*KAI* no. 191B.1) and in Lachish letter IV (*KAI* no. 194.5, 7).

2. The word occurs in the OT 789x (*ʾayin* 42x, incl. Isa 41:24; Jer 30:7; *ʾēn* 747x, 103x with suf.).

The contrary, *yēš* “to exist,” occurs 140x (incl. *ʾš* in 2 Sam 14:19 and Mic 6:10; cf. Wagner no. 28a, b; Gen 21x, Eccl 16x, Prov 13x, Job 12x).

Bibl. Aram. equivalents are *ʾitay* (8x) and, negated, *lā ʾitay* (9x).

3. The basic meaning is “nothing, nonexistent” (par. to *b<sup>e</sup>lî, biltî, ʾepes, tōhû*) as a negation of *yēš* “being, existent” (cf. Isa 44:8). On the usage of the word, see GKC §152i-p, u.

4. Among the various statements concerning God that use *ʾayin*, those which have a particular formulaic character stand out. Major occurrences are in Deutero-Isa; they are also encountered in a few Dtr texts and in Hos.

First, the formula *ʾēn k<sup>e</sup>. . .* “there is none like . . .,” expresses a person’s incomparability (cf. C. J. Labuschagne, *Incomparability of Yahweh in the OT* [1966]). Behind this comparison one must imagine the question “who is like you?” (1 Sam 26:15); the answer is “none is like you.” This statement of incomparability does not occur in the OT in reference to a human (in the 3d per.: 1 Sam 10:24; Job 1:8; 2:3; cf. Lande 103); it occurs

frequently, however, in prayers addressed to Yahweh (1 Sam 2:2; 2 Sam 7:22 = 1 Chron 17:20; 1 Kgs 8:23 = 2 Chron 6:14; Jer 10:6f.; Psa 86:8). It is also encountered in the 3d per. in the recognition formula in Exod 8:6, in descriptive praise in Deut 33:26, and as Yahweh's statement about himself in Exod 9:14.

In addition to statements concerning incomparability are those concerning uniqueness or exclusivity. The two speech forms in 1 Sam 2:2, "no one is holy like Yahweh, for beside you there is no other," and 2 Sam 7:22 = 1 Chron 17:20, "therefore you are great, O Lord, my God, for none is like you and there is no god except you," stand in this series. The Dtr influenced recognition formula emphasizes exclusivity with *ʾên ʿôd*. "you/all nations should recognize, that Yahweh is God and no other" (Deut 4:35, 39; 1 Kgs 8:60; cf. Deut 32:39). The statement of uniqueness is associated with the self-presentation formula (W. Zimmerli, "I Am Yahweh," *I Am Yahweh* [1982], 1–28) in Hos (Hos 13:4; cf. 5:14). In view of his emphasis upon the exclusive activity of the *one* God, Yahweh, in creation, direction of history, and salvation, it is no wonder that this combination appears often in Deutero-Isa. His preference for this form is probably also influenced by the hymnic self-glorification or self-praise of a divinity in his Bab. surroundings (cf. Westermann, *Isa 40–66*, OTL, 155f.). The simple form appears in the Cyrus oracle, Isa 45:5f., "I am Yahweh and no other," and in the judgment speech, 45:18, 22; supplemented with "and beside me there is no helper" in 43:11, with "and no one seizes out of my hand" in 43:13 (judgment speech), with "there is no true, saving god beside me" in 45:21, and with "I am God and nothing is like me" in 46:9 (disputation speech).

That these usages should not to be understood as "monotheistic formulae" (so B. Hartmann, *ZDMG* 110 [1961]: 229–35) may most clearly be seen from the genre in which they occur: Yahweh finds himself in a judicial process against the other gods. The phrase "and beside me there is no god" (44:6 cf. v 8) is not a declaration, but a claim (Westermann, *Isa 40–66*, OTL, 140f.; cf. 82ff.). Yahweh demands from the gods of the nations evidence of their divinity in the continuing historical process, evidence that they cannot produce. The opposition can only keep silent (41:26, "no one speaks, no one is heard, no one hears a sound from you") and quit the scene (41:28, "yet there is no one, no one knows their counsel"). The disputation speech in 40:12–31, which uses the phrase 6x, already indicates the significance of the word *ʾayin* for Deutero-Isa: twice to declare that the world's riches and powers are "nothing" before Yahweh (v 17; cf. 41:11f.); Yahweh makes them "nought" (v 23; cf. Ezek 26:21; 27:36; 28:19); Lebanon's wood and forests are insufficient for the presentation of sacrifice (v 16); Yahweh's understanding is unfathomable (v 28), he aids the faint (v 29); cf. further 50:2 and 63:3.

The denial of God  $\text{ʔ}én \text{ʔ}ōhîm$  “there is no God” in Psa 10:4; 14:1 = 53:2 should not be understood theoretically but practically, as “God is not present/he does not intervene,” the probable sense of 3:3, “he has no aid from God” (→  $\text{ʔ}ōhîm$  IV/5; cf. Kraus, *Psa*, CC, 1:127f., 221, citing Köhler, *Theol.* 19f.). Cf. also positive statements with  $\text{y}ēš$  “is present” in Gen 28:16; Exod 17:7; Judg 6:13; 1 Sam 17:46; Isa 44:8 ( $\text{y}ēš$  elsewhere in theological contexts: 2 Kgs 3:12; Jer 14:22; 37:17; Psa 73:11; 2 Chron 25:8).

5. In addition to negated phrases, the LXX also often has compounds with  $\alpha$  privative for  $\text{ʔ}ayin/\text{ʔ}én$ . The formulae of incomparability and uniqueness recede in the NT, together with the struggle with strange gods; cf., however, 1 Cor 8:4.

S. Schwertner

## ישׁן } $\text{ʔ}îš$ man

S 376; BDB 35b; *HALOT* 1:43a; *TDOT* 1:222–35; *TWOT* 83; *NIDOTTE* 408

I. Designations for “man” (in contrast to those for “woman” →  $\text{ʔ}îššâ$ ) diverged in the Sem. languages through various innovations. Therefore,  $\text{ʔ}îš$  occurs only in Hebr., Phoen.-Pun., and older Aram. (*DISO* 26), as well as in Old SArab. (W. W. Müller, *ZAW* 75 [1963]: 306); other designations dominate in Akk. (*awîlu*, *eṭlu*, *mutu*), Ug. (*bnš*, *mt*), Aram. (→ *gbr*), and Arab. (*marʔ*).

The etymology is wholly uncertain, even e.g., K. Elliger’s attempt (*Studien zum Habakuk-Kommentar vom Toten Meer* [1953], 78f., 189; id., FS Alt 100f.) to derive the word from a root  $\text{ʔ}šš$  (KBL 93b: “to be solid, compact”; HAL 91b: Arab.  $\text{ʔ}atta$  “to shoot up”) on the basis of  $\text{ʔ}yšym$  “men(?)” in 1QpHab 6:11 (thereafter posited also in Isa 16:7; cf. HAL 91b).

The pl. is formed regularly in Phoen.-Pun.; elsewhere, as in Hebr.  $\text{ʔ}ānāšîm$ , a form of the root  $\text{ʔ}nš$  (P. Fronzaroli, *AANLR* 8/19 [1964]: 244, 262, 275) replaces it (cf. Hebr.  $\text{ʔ}nôš$  “person”; →  $\text{ʔ}îššâ$  “woman” < \* $\text{ʔ}ant-at$ - is not based on this root). The rarely attested pl.  $\text{ʔ}îšîm$  may be a more recent formation analogous to the sg. (Isa 53:3; Psa 141:4; Prov 8:4; BL 616).

The diminutive  $\text{ʔ}îšôn$  “little man (in the eye) = pupil” (Deut 32:10; Psa 17:8; Prov

7:2; for pars. in other languages, see *HAL* 42a) should be mentioned; the verb יִשָּׁח hitpo. “to take courage” in Isa 46:8 is textually and grammatically disputed (cf. *HAL* 96b; *Bib* 41 [1960]: 173\* no. 2620).

On the PNs יִשְׁבַּעַל (1 Chron 8:33; 9:39; tendentiously altered in 2 Sam 2–4 into יִשָּׁח -bōšet “man of shame”) and יִשְׁחֹד (1 Chron 7:18) cf. *IP* 138, 225, although one must take into account the possibility of folk-etymological reinterpretations of forms that were originally quite different (cf. *HAL* 89b; even for יִשְׁשָׁאֲרַי, which according to Gen 30:18 is often understood as יִשְׁשָׁאֲרַי “hireling”). On יִשְׁ-תֹּב (2 Sam 10:6, 8), cf. A. Jirku, *ZAW* 62 (1950): 319; *HAL* 43a.

II. The total of 2,183 occurrences (incl. 2 Sam 16:23 Q; 23:21 Q; excl. Prov 18:24) of the sixth most frequent subst. are distributed normally across the entire OT, somewhat more densely in narrative (Gen, Judg, Sam) and legal books (incl. Prov):

total	1,657,523	+3	2,183*	

III. 1. The word's basic meaning is "man" (the mature male in contrast to the woman). This meaning establishes a natural semantic field in which man and woman stand in contrast.

Nom. series such as "man and woman," "men and women" (sg. alongside pl. in Judg 9:49, 51 and 16:27[bis]) are common; in the patriarchally structured society of Israel (→ *ʾāb* III/1), the male always occupies first position. The usage "man and/or woman" occurs regularly in legal texts in the meaning "anyone, whoever" (Exod 21:28f.; 35:29; 36:6; Lev 13:29, 38; 20:27; Num 5:6; 6:2; Deut 17:2, 5; 29:17; Esth 4:11; cf. 2 Chron 15:13). "Man and woman" or "men and women" can also describe the totality (Josh 6:21; 8:25; 1 Sam 15:3; 22:19; 27:9, 11; 2 Sam 6:19 = 1 Chron 16:3; Jer 6:11; 51:22; Neh 8:2f., some also in longer series). Tripartite series "men-women-children" also occur (Deut 31:12; Jer 40:7; Ezra 10:1; cf. Jer 44:7; with *m<sup>c</sup>ūm* Deut 2:34; 3:6; with *g<sup>c</sup>bārīm* Jer 41:16). The term *bēn* "son" occurs within the word field only in the general sense (e.g., Gen 42:11, 13; Deut 1:31; Ezek 16:45[bis]; Mal 3:17).

The man seeks sexual union with the woman (Gen 2:24) or, conversely, the woman with him (cf. Jer 29:6).

"To be married" from the woman's perspective is *hāy<sup>c</sup>tā l<sup>c</sup>ʾiṣ* (Lev 21:3; Ezek 44:25). Conversely a maiden who has known no man can be defined as such (*lō<sup>c</sup>-yād<sup>c</sup>ʾā* *ʾiṣ* Judg 11:39; 21:12; cf. Gen 19:8; 24:16). A whole series of issues concerning extramarital sexual relations between man and woman (slave, maiden, fiancée) are legally regulated (Lev 19:20; Deut 22:22–29), as is sexual involvement with a menstruating woman (Lev 15:24, 33), levirate marriage (Deut 25:7), the emission of semen (Lev 15:16ff.), etc.

In its basic meaning *geber* is a synonym, though it is used much less frequently (→ *gbr*; Deut 22:5 in contrast to *ʾiṣṣā*, often used like *ʾiṣ*. Num

24:3, 15). *m<sup>c</sup>tîm* “men, people,” which occurs only in the pl., is also infrequent (22x, 6x each in Deut and Job; Akk. *mutu*, Ug. *mt*, Eth. *met* “man, husband”; cf. also the PNs *m<sup>c</sup>tûšāʿēl* Gen 4:18 and *m<sup>c</sup>tûšēlah*, Gen 5:21–27; 1 Chron 1:3).

*zākār* “male, man” occurs esp. to indicate gender (82x, 18x each in Lev and Num, 14x in Gen, 12x in Ezra 8; in addition to the old collective *z<sup>c</sup>kûr* “that which is male” in the pilgrimage law, Exod 23:17 = 34:23 = Deut 16:16, and in the holy war commandment, Deut 20:13; the root \**dakar-* “male” is common Sem.); its regular antonym is *n<sup>c</sup>qēbâ* “feminine” (22x, except for the difficult text Jer 31:22 [cf. Rudolph, HAT 12, 198f.] only in the Pentateuch).

יֵשׁ in the basic meaning applies to animals only in Gen 7:2(bis) (otherwise *zākār*, Gen 6:19; 7:3, etc.).

2. The basic meaning is commonly limited in a more specialized sense:

(a) Often יֵשׁ should simply be translated “husband” (Gen 3:6, 16, etc.). Legal texts dealing with issues of marital law belong particularly in this category (Num 5:12ff., suspected adultery; 30:8ff., vows before marriage; Deut 22:13ff., divorce; 24:1–4, remarriage after divorce; cf. Jer 3:1; Deut 24:5, exemption from military service).

On the description of Yahweh as “husband” see IV/3.

For the meaning “husband,” the term → *baʿal* “husband” is a synonym (2 Sam 11:26 par. to יֵשׁ); cf. also → *ʿādôn* (Gen 18:12; Judg 19:26f.; Amos 4:1; Psa 45:12).

(b) In a few texts יֵשׁ specifically characterizes typical masc. properties such as strength, influence, courage (1 Sam 4:9; 26:15; 1 Kgs 2:2; cf. Gen 44:15; Judg 8:21, etc.). *geber* is a synonym, although it is seldom used in this sense (Job 38:3; 40:7).

(c) יֵשׁ seems to be limited in meaning to “father” or “son” only in a few texts where יֵשׁ “one, someone” contrasts with sons or parents in a general sense in place of the more exact term of relationship (father-child, Gen 42:11, 13; Deut 1:31; 8:5; Mal 3:17; son-parents, Gen 2:24; 1 Sam 1:11; Amos 2:7; Isa 66:13; cf. also Gen 4:1).

(d) In accordance with the context, the pl. can also replace more specific designations. Thus the “men” in Gen 12:20 are Pharaoh’s escort for Abraham, in Josh 9:14 mediators, in Josh 10:18 watchmen, in 2 Sam 18:28 rebels, etc. “Men” are very often scouts (Num 13f.; Deut 1; Josh 2; 6f.) or escorts, primarily in Sam and Kgs (frequently in the suf. form *nāšāyw* “his men”). As followers of David (about 30x), Saul, Abner, or Joab perform military functions as a rule (contrast e.g., Gen 24:54, 59; 2 Kgs 5:24).

3. The term lends itself readily to a collective usage, at times in association with numerals (e.g., 2 Kgs 4:43; 10:6, 14). This usage is at home in narrative books; cf. also the fixed expression *יִשׁ* → *yisrāʿēl*.

4. *יִשׁ* is quite often used in the generalized meaning “person”: (a) The tendency toward generalization may be identified particularly in legal texts (e.g., Exod 21:12 “whoever strikes a man”; the same penalty is applicable to those who strike a woman), in wisdom texts (e.g., Prov 12:25; Psa 37:7), and in curses or blessings (Deut 27:15, “cursed is one who”; Psa 1:1; 112:1, 5, etc.).

(b) The general meaning “person” occurs wherever *יִשׁ* contrasts with an animal (Exod 11:7; 19:13; Psa 22:7), as well as wherever a person is distinguished from God: markedly in Num 23:19; Judg 9:9, 13; 1 Sam 2:26, etc.; cf. *b<sup>e</sup>šēbet ʿnāšîm* “with a human rod” (2 Sam 7:14); *mišwat ʿnāšîm* “human commandment” (Isa 29:13; see IV/5b).

(c) Generalization appears primarily in word combinations: *ʿanšē habbayit* “domestics” (Gen 39:11, 14, incl. both male and female), *b<sup>e</sup>ʿammat-ʿiš* “according to the customary measure” (Deut 3:11), etc.

In this general meaning → *ʿādām*, a synonymous term occasionally par. to *יִשׁ* (Isa 2:9, 11, 17; 5:15; Psa 62:10, etc.), is comparable; cf. also the term *ʿnōš*, used in the later period mostly in the sense of “weak, mortal” (→ *ʿādām*).

(d) The frequent use of *יִשׁ* as a pron. in the sense of “any, everyone, anyone,” negated “none,” may only be mentioned.

5. *יִשׁ* occurs in a whole series of phrases, only the most important of which are listed:

(a) In addition to the common *yōšēb* “inhabitant” to describe the inhabitants of a city or a country (inhabitant of a city: either through the phrase *ʿanšē hāʿir*, e.g., Gen 24:13 or *ʿanšē hammāqôm*, e.g., Gen 26:7, or in conjunction with a place-name, e.g., Josh 7:4f.; citizens of a country: either in the pl. cs. *ʿanšē yisrāʿēl*, e.g., 1 Sam 7:11, or collective *יִשׁ yisrāʿēl*, *יִשׁ y<sup>e</sup>hūdā*, etc.). An individual inhabitant of a city or country is described as *יִשׁ šōrî* “man from Tyre” (1 Kgs 7:14), *יִשׁ mišrî* “Egyptian” (Gen 39:1), etc.

(b) Five texts mention *ʿanšē habbayit*. Gen 17:23, 27 (circumcised male household slaves); 39:11, 14 (Potiphar’s domestics); Mic 7:6 (residents of the same house).

(c) *יִשׁ* appears in many phrases indicating vocations. *יִשׁ milḥāmâ* (or pl.) is the “warrior” (Exod 15:3; see IV/1; Josh 17:1; 1 Sam 18:5, etc.; but also “enemy,” 2 Sam 8:10 = 1 Chron 18:10; Isa 41:12). In Solomon’s time a specific vocational group seems to have been indicated in this manner (1 Kgs 9:22); the term is attested most frequently in the late royal period (as synonyms cf. *m<sup>e</sup>tîm* in Deut 33:6; Isa 3:25; and *baḥûrîm* Isa 9:16). *יִשׁ ḥayil* is closely related. It refers to “able men” in the giving of the law (Exod 18:21, 25), suitable overseers for Pharaoh’s cattle (Gen 47:6), useful doormen (1 Chron

26:8), etc. Since the period of the judges, the *ʿanšē hayil* are “able warriors” (Judg 3:29; 2 Sam 11:16, etc.); cf. *gibbôr hayil*, → *gbr*). Further vocational designations are *ʾiṣ nābî* “prophet” (Judg 6:8), *ʾiṣ hāʾdāmâ* “farmer” (Gen 9:20), *ʾiṣ yōdēaʿ sayid* “hunter” (25:27), etc. *ʾiṣ habbēnayim* “champion” (1 Sam 17:4, 23), *ʾiṣ raglî* “foot soldiers” (2 Sam 8:4 = 1 Chron 18:4; 1 Chron 19:18), etc., should also be mentioned as descriptions of the activity or being of a man.

(d) *ʾiṣ* serves as a circumlocution for an adj. in e.g., *ʾiṣ sāʿîr* “hairy” and *ʾiṣ ḥālāq* (Gen 27:11).

(e) The expression *b<sup>e</sup>ʿnē ʾiṣ* occurs occasionally (Psa 4:3; Lam 3:33; par. to *b<sup>e</sup>ʿnē ʾādām* in Psa 49:3 and 62:10). This combination is first attested in the exilic period and may best be translated “people”; the translation “aristocrat” may be considered only for Psa 49:3 (cf. HAL 42a; Kraus, Psa, CC, 1:148, 481).

(f) The expression *k<sup>e</sup>ʾiṣ ʿḥād* “as one man” describes the unity and cohesiveness of a group, e.g., when the community assembles “as one man” (Judg 20:1; Ezra 3:1; Neh 8:1) or when it moves out to battle “as one man” (1 Sam 11:7, etc.). One can also kill a large number of people “as one man” (Num 14:15, etc.); cf. the concept of the ban in holy war (→ *ḥrm*).

(g) Finally, mention should also be made of expressions that generalize the meaning of *ʾiṣ* to a great degree (see III/4d). In association with → *rēaʿ* and → *ʾāḥ*, the basic meaning fades to “one to another, one another” (e.g., Exod 18:7 and Gen 42:21). Gen 15:10, where the personal reference itself is lost, lies farthest from the original meaning: “Abraham laid each portion (of the dissected animals) over against the other.”

IV. 1. Although the OT represents Yahweh as a male, it describes him as *ʾiṣ* only infrequently and metaphorically.

The descriptive ascription of praise in Exod 15:3 calls Yahweh an *ʾiṣ milḥāmâ* “warrior.” This statement summarizes a discovery Israel made in military conflicts with its neighbors. Deutero-Isa (42:13) takes up this speech form, as well as the term *ʾiṣ milḥāmôt* “warrior”; nevertheless, Yahweh’s activity is compared here only with that of a warrior (*k<sup>e</sup>ʾiṣ milḥāmôt*).

2. (a) The old promise narrative in Gen 18 discusses Yahweh and the three men in a strange alternation. Because Yahweh is explicitly named as subj. in v 13 (v 1 is later), he may also be meant as subj. in the other verses that require a sg. subj. (3, 10, 14b, 15b). Gen 18 represents Yahweh as one who appears in the form of “three men,” although it never explicitly identifies Yahweh with these three men. Cf. the two men in Gen 19 and the “man” in Gen 32:23ff. In connection with pre-Israelite saga materials, Israel’s most ancient period apparently had no misgivings about representing Yahweh as a man, who looks like other men, wanders the earth, eats, or fights (a similar concept may also be found in Josh 5:13–15

and Ezek 8:2).

(b) A few post-exilic instances in connection with the prophetic view of the future describe the heavenly being sent to people (the prophets) as  $\text{יֵשׁ}$ ; although these beings are not, in fact, identical with God, they are also not always sharply distinguished from him:

Ezek 9:2ff. (“six men with an implement of destruction,” “man with linen clothing”; cf. Exod 12:12 P; 12:23 J, where Yahweh himself, in the form of the angel of death, moves through Egypt); Ezek 40:3–5; 43:6; 47:3 (“man with the measuring device”); Zech 1:8, 10 (“man between the myrtle trees”); Zech 2:5 (“man with the measuring line”); Dan 10:5; 12:6f. (“man in linen clothing”).

3. Hos 2:4, 9, 18 describe Yahweh as Israel’s husband. In Israel’s early days this description would have been impossible, for it adapts a concept from Can. Baalism with its *hieros gamos* and cultic prostitution. Hosea was the first who could dare to use such a picture; however, the adapted picture allows him to criticize precisely those who felt themselves attracted to this Can. sex cult (cf. Wolff, *Hos*, Herm, 49f., and Rudolph, KAT 13/1, 78f.).

Ezek takes up this fig. language again (Ezek 16, clearly in vv 23, 45; cf., however, also vv 8, 20). In terms of content, Jer 3:6ff. and Ezek 23 could be named here too, but the term  $\text{יֵשׁ}$  is absent.

Other texts also compare Yahweh or his activity directly with that of a person: Exod 33:11 (as a man speaks with his friend, so God with Moses); Deut 1:31; 8:5; Mal 3:17 (as a man carries/disciplines/has mercy on his children).

4. The “man of God” stands unequivocally on the side of the people; he is the commissioned ambassador of God. The term  $\text{יֵשׁ הָאֱלֹהִים}$  occurs 76x in the OT, 55x in Kgs alone.

The following are described as men of God: Elisha (29x in 2 Kgs 4:7–13:19); Elijah (7x in 1 Kgs 17:18, 24; 2 Kgs 1:9–13); Moses (6x in Deut 33:1; Josh 14:6; Psa 90:1; Ezra 3:2; 1 Chron 23:14; 2 Chron 30:16); Samuel (4x in 1 Sam 9:6–10); David (3x in Neh 12:24, 36; 2 Chron 8:14); Shemaiah (1 Kgs 12:22; 2 Chron 11:2); Hanan (Jer 35:4); anonymous men of God (24x in Judg 13:6, 8; 1 Sam 2:27; 1 Kgs 13:1–29; 20:28; 2 Kgs 23:16f.; 2 Chron 25:7, 9[bis]); →  $\text{יֵשׁ הָאֱלֹהִים}$  III/6.

Besides  $\text{רֹעֵה}$  “seer” (→  $\text{רֹח}$ ) and →  $\text{נָבִי}$  “prophet,”  $\text{יֵשׁ הָאֱלֹהִים}$  is one of the most significant terms for Israel’s earliest prophets. Despite a few shades of meaning (Elijah and Elisha are “men of God,” their students are called “disciples”; in 1 Kgs 13 a “man of God” and a “prophet” stand in direct opposition), the early man of God exercised prophetic functions.

The “word-reception” formula (1 Kgs 12:22; 17:2, 8), the messenger commission

(1 Kgs 12:23; 2 Kgs 1:3, 15), and the messenger formula (1 Sam 2:27; 1 Kgs 12:24; 13:2; 17:14; 20:28, etc.) occur in the word field. Like prophets, the men of God of the early prophetic narratives also announce salvation or judgment. “Man of God” and “prophet” are frequently used synonymously (1 Sam 9:8f.; 1 Kgs 13:18, etc.); cf. C. Kuhl, *Israels Propheten* [1956], 14f.; von Rad, *Theol.* 2:6f.

The term never describes the so-called writing prophets of the 8th–6th cents. In the late period it fades to a simple title for great men (Moses, David).

In addition, reports are made concerning men whom Yahweh has entrusted with a special task: “the staff of the man whom I choose” (Num 17:20; cf. 2 Chron 6:5); “man of my plan” (= Cyrus, Isa 46:11); “man who prophesies in the name of Yahweh” (Jer 26:20); “man of your right hand” (Psa 80:18), etc.

5. The occurrences named above that describe God directly as *ʾĕl* or that compare his activity with that of an *ʾĕl* (IV/3) are rare in comparison to those which present the *ʾĕl* as God’s creation and thus in clear distinction from God.

(a) The term is rare in Gen 2–3 (2:23f.; 3:6, 16; the leading term is → *ʾādām*).

(b) A few texts emphasize the difference between God and human very precisely: in contrast to God the human is mortal (Psa 39:7; 62:10); unlike the human God does not lie (Num 23:19) and he stands by his word (Hos 11:9). Wisdom literature in particular refers to this contrast: Prov 21:2; 14:12, etc. Cf. also texts such as Gen 32:29; Josh 10:14; Judg 9:9, 13; 2 Sam 7:14; 2 Kgs 5:7; Isa 40:6ff. (→ *bāšār*).

6. As far as the person per se is concerned, human activity, particularly sexual behavior, is regulated by a series of divine commandments, transgression of which summons the wrath and punishment of Yahweh. A few relationships may be noted:

(a) All must assemble for the reading of the law: men, women, children, foreigners (Deut 31:12; cf. Josh 8:35). Reports concerning the assemblies of the people conducted by Ezra and Nehemiah refer to such lists also (Ezra 10:1; Neh 8:2f.).

(b) The holy war commandment effects men, women, and children (cattle, sheep, and asses; Josh 6:21; 8:25; 1 Sam 15:3, etc.). Prophecy adopts similar lists, except that the enemies of Yahweh who will be totally destroyed are now the Israelites themselves (Jer 6:11; 44:7; cf. 51:22).

(c) The marriage of an Israelite to a foreign woman was permitted at times, but with the passing of time was ever more sharply condemned theologically in Israel, for pagan wives meant the introduction of pagan cults (Gen 34:14; above all in post-exilic times: Num 25:6; Ezra 10:17; Neh 13:25).

(d) Israel protected itself with particular vigor against the introduction and acceptance of pagan cults since the time of Deut. For this reason, idolatrous men are also severely punished (Deut 17:2, 5; 29:19; Ezek 8:11, 16; 11:1; 14:3, 8).

(e) Whoever transgresses against these commandments will be punished, for Yahweh “requites man according to his doing” (Job 34:11; cf., among others, 1 Sam 26:23; 1 Kgs 8:39 = 2 Chron 6:30; Jer 31:30; 32:19; Ezek 7:16; Psa 62:13; Prov 24:29; 2 Chron 25:4).

V. The NT makes a distinction between *anēr* “man, person” (A. Oepke, “άνήρ,” *TDNT* 1:360–63) and *anthrōpos* “person” (J. Jeremias, “άνθρωπος,” *TDNT* 1:364–67). Individual lines of tradition from the OT are continued here. A clear division is maintained between God and human (Matt 21:25; Acts 5:29 with *anthrōpos*; John 1:13 with *anēr*), while the connection between God and human is seen in Jesus of Nazareth (Mark 14:71; 15:39; John 19:5 with *anthrōpos*; John 1:30; Acts 2:22; 17:31 with *anēr*).

J. Kühlewein

## אכל *kāl* to eat

S 398; BDB 371; *HALOT* 1:46a; *TDOT* 1:236–41; *TWOT* 85; *NIDOTTE* 430

1. The root *kāl* is common Sem. (Eth. only as a subst.). It appears in the Hebr. OT in the qal, ni., pu., and hi., in Aram. only in the pe. (see 3a). The relatively numerous nom. derivatives (only Hebr.) with the general meaning “food,” the segholate formations *ōkel* and fem. *oklâ*, the Aramaizing form *ʾkîlâ*, the nouns with preformative *ma-*: *maʾkāl* and *maʾkōlet* (1 Kgs 5:25 *makkōlet*, see GKC §23f), are differentiated in 3b. *maʾkelet* “knife” appears as an instrumental noun.

Somewhat synonymous is *lḥm* “to dine” (6x, also Ug. alongside *kāl*, on Phoen. Kilamuwa 1.6, cf. *DISO* 137 and *KAI* 2:32; Akk. *laʾāmum*, *laḥāmu*, *lēmu* “to partake, eat,” *AHw* 527b, 543b), with the subst. *leḥem* “bread, nourishment” (299x, incl. Isa 47:14 and Job 30:4 and 1x Aram. in Dan 5:1 “meal”; also Pun., Aram.; on Arab. *laḥm* “flesh” see L. Köhler, *JSS* 1 [1956]: 10; on Eth. see E. Ullendorff, *VT* 6 [1956]: 192), which occurs in theological contexts in statements concerning Yahweh’s creative might (Psa 136:25; 146:7; 147:9; on Deut 8:3 cf. von Rad, *Deut*, OTL, 71f.; H. Brunner, *VT* 8 [1958]: 428f.).

*ʔm* “to taste” is semantically related (11x, fig. “to feel, experience” in Psa 34:9; Prov 31:18) with the subst. *ʔam* “taste,” fig. “understanding” (12x, in addition to Jonah 3:7 “command,” a meaning borrowed from Aram. or Akk.; cf. Wagner no. 117); Bibl. Aram. *ʔm* pa. “to give to eat,” subst. *ʔam* and *ʔem* “understanding; command, report.”

Other terms for eating, sometimes with more specific meanings, include *brh* “to eat an invalid diet” (*biryâ* and *bârût* “invalid, mourning diet”), *gZR* “to devour” (Isa 9:19), *zûn* “to nourish” (Job 36:31 txt em; *mâzôn* “nourishment”; Aram. hitpe. “to nourish oneself” and *mâzôn*), *syd* hitp. “to supply oneself” (*sayid* and *šedâ* “travel provisions”), as well as *ʔrûhâ* “food allowance (for the trail)” (cf. HAL 84b) and *mispôʔ* “feed” (Ug. *spʔ* “to eat”); cf. further the roots beginning, significantly, with the liquid *l*: *lhʔ* “to consume,” *lhk* “to lick up, eat up,” *lʔ* “to swallow,” *lâšād* “pastries” (Num 11:8; Arab. *lsd* “to suck”); on *lʔ* “to slurp” and *lqq* “to lap up” → *šth* “to drink.”\*

2. According to Mandl. and Lis. (cf. 3b), the verb occurs 809x in Hebr. and 7x in Aram. in the OT (qal 739x plus 7x Aram. pe., ni. 45x, pu. 5x, hi. 20x), *ʔkel* 44x, *ʔklâ* 18x (only Ezek and P with the exception of Jer 12:9, always with the prep. *lʔ*), *ʔkîlâ* 1x, *maʔkâl* 30x, *maʔkōlet* 2x, *makkōlet* 1x, *maʔkelet* 4x (except for the last, the nouns occur only in the sg.).

3. (a) In the vast majority of texts, the verb has the lit. sense “to eat, devour” as a description of a basic function of human and animal life. In association with seeing, hearing, and eating, *ʔkl* can serve as evidence of vitality (Deut 4:28). Nevertheless, numerous nouns other than people and animals can appear as the subj. of *ʔkl* in fig. meanings (“to consume,” etc.): fire (about 70x), sword (12x), land (Lev 26:38; Num 13:32; Ezek 36:13f.), forest (2 Sam 18:8), heat and cold (Gen 31:40), curse (Isa 24:6), rage (Exod 15:7), hunger and pestilence (Ezek 7:15), illness (Job 18:13). Accordingly, the objs. of the verbs are not limited to the description of various foods: land (Jer 8:16; 2 Chron 7:13), farmland (Gen 3:17; Isa 1:7), ruins (Isa 5:17), inheritance (Deut 18:1; hi. Isa 58:14), property (Gen 31:15; Isa 61:6; Eccl 5:10, 18; 6:2), sin (Hos 4:8), etc. These combinations result in various expansions of meaning: “to make an end,” but also “to enjoy, enjoy the use of, bear the consequences” (esp. with the obj. “fruit,” Isa 3:10; Prov 1:31, etc.). A dramatic pictorial idiom with a per. obj., e.g., people, nations, the poor, beloved, also occurs (Psa 14:4 = 53:5; Deut 7:16; Jer 10:25, a play on words with *klh* pi. “to destroy”; 30:16, etc.; Hab 3:14; Prov 30:14).

A similar growth of meaning also occurs for Akk. *akālu*, which can appear with the subsj. fire, gods, diseases, pain, distress, etc. As in Hebr., the Akk. verb can have the more general meaning “to use up” or “to enjoy the use of” depending upon the obj. (field, property, money, etc.).

The verb without obj. also occasionally has an expanded meaning, “to exploit” (2 Sam 19:43) or “to feast” (Eccl 10:16). An expansion of meaning with pars. in Akk. occurs in Ezek 42:5, where *kl* should not be emended, but means “to lay claim to space, area” (cf. *AHw* 27a).

The expression *kl qaršîn* “to slander” (lit. “to eat pinched-off portions”), known from Akk. (*CAD* A/1:255f.; M. Held, *JCS* 15 [1961]: 12) and Aram. (KBL 1121), occurs in Dan 3:8 and 6:25.

On the expression “to eat his flesh” (Eccl 4:5; hi. Isa 49:26), cf. the idiom in the Kilamuwa inscription 1.6–8 concerning the consumption of one’s own beard and hand as a symbol of extreme despair (*KAI* 2:31f.; M. Dahood, *CBQ* 22 [1960]: 404f.; cf. *ANET* 654b).

Assyr. pars. to the (reported or threatened in curses) consumption of the flesh of one’s own children or relatives in a famine are noteworthy (*CAD* A/1:250b; D. R. Hillers, *Treaty-Curses and the OT Prophets* [1964], 62f.; cf. 2 Kgs 6:28f.; Lev 26:29; Deut 28:53–57; Isa 9:19; Jer 19:9; Ezek 5:10; Zech 11:9; cf. Lam 4:10).

Not eating, even when unrelated to cultic fasting, signifies sadness (1 Sam 1:7; cf. v 18; 20:34; 1 Kgs 21:4f.; cf. v 7; Ezra 10:6). Conversely, eating is frequently associated with joy (1 Sam 30:16; Job 21:25; Eccl 9:7; Isa 22:13; cf. Gilg. X:iii.6ff. = *ANET* 90; Schott 77f.).

(b) L. Köhler (*JSS* 1 [1956]: 20–22) has referred to the problem of the coexistence of 5 or 6 nom. forms for “nourishment, food.” Observation of the context permits the following differentiations:

(1) *ōkel* is a collective term for the concrete, quantitative entity “nourishment” (often = “grain”; cf. Akk. *ak(a)lu* “bread,” Eth. *ekel* “grain”; Ug. *akl* also “grain”; see *UHP* 50). Exod 12:4; 16:16, 18, 21 “according to his appetite,” and Job 20:21 “for his gluttony,” should be considered qal inf. (therefore qal 744x, *ōkel* 39x). Ruth 2:14 *ēt hā’ōkel* “mealtime” does not argue unequivocally for a verbal abstract.

(2) *oklâ* (except for Jer 12:9, only Ezek and P, always with *le* ) should be understood as a fem. inf. (preferred in the later period according to Berg., *HG* 2:84) and thus an action noun.

(3) *akîlâ* (1 Kgs 19:8 “wandered on the strength of this food for 40 days”) corresponds to a pass. ptcp. and describes the “eaten food.”

(4) According to Nyberg 205ff., *makâl* corresponds to a substantivized relative clause (“that which one eats”) and indicates food in relation to its consumability and qualitative variety (cf. *makâl* alongside *oklâ* in Gen 6:21).

(5) *makōlet* (Isa 9:4, 18, “food [for the fire]”) probably also corresponds to a pass. ptcp. (otherwise *makkōlet* “provision” 1 Kgs 5:25).\*

4. In contrast to Assyr.-Bab. or Ug. divinities (cf. G. E. Wright, *OT Against Its Environment* [1950], 102ff.; W. Herrmann, “Götterspeise und Göttertrank in Ugarit und Israel,” *ZAW* 72 [1960]: 205–16), Yahweh is the subj. of *ʔkl* only very rarely and then only negated or in comparisons: Deut 4:24 and 9:3, Yahweh as “consuming fire” (on this and on “fire of God” → *ʔēš* 4; → *kābôd*); Hos 13:8, “and I will consume them immediately like a lion” (however, the text should be emended with the comms.: “there the dogs will eat them up”); Psa 50:13 is a polemic against the notion of Yahweh eating: “Shall I eat the flesh of bulls and drink the blood of rams?” (cf. Deut 32:37f., “where are their gods . . . who ate the fat of their sacrifice?”; Eichrodt 1:141–44; de Vaux 2:449–50).

In contrast, Yahweh appears 13x as the subj. of the hi. “to give to eat,” whether as the granter of good gifts (Exod 16:32 and Deut 8:3, 16, manna; further Isa 58:14; Ezek 16:19; Hos 11:4 txt?; Psa 81:17; in Ezek 3:2 a divine scroll at the commissioning) or in the execution of judgment (Isa 49:26; Jer 9:14; 19:9; 23:15; Psa 80:6).

Eating appears primarily as a religious act in the sacrifice regulations (L. Rost, *BHH* 2:1345–50) and food laws (Lev 11; Deut 14; W. Bunte, *BHH* 3:1828), as well as in the ordinances and narratives concerning not eating (and not drinking) as ritual fasting (→ *šûm*). In Lev alone *ʔkl* qal appears 82x, in addition to 22x ni. Like profane eating, the cultic meal also has a joyful premise (Deut 14:26, etc.; cf. B. Reicke, *Diakonie, Festfreude und Zelos* [1951], 167ff.).

On the meal as an element of the covenant-making ritual (Gen 26:30; 31:46, 54; Exod 24:11; Josh 9:14f.) → *b<sup>c</sup>rit*. W. Beyerlin (*Origin and History of the Oldest Sinaitic Traditions* [1965], 33–35) suspects that “to eat and to drink” is a technical term for covenant making.

The rites of mourning include eating a special mourning food, Deut 26:14; Jer 16:7 (txt em); Ezek 24:17, 22 (txt em); Hos 9:4 *leḥem ʔônîm*; cf. H. Cazelles, *RB* 55 (1948): 54–71; T. Worden, *VT* 3 (1953): 290f.; J. Scharbert, *Der Schmerz im AT* (1955), 123f.

5. The expanded usage of the verb may also be identified at Qumran; in addition to profane or cultic eating, it can describe an activity of fire or the sword. In the LXX more than 20 terms occur as translations of *ʔkl* expressing the expansion of meaning of the Hebr. (use up, burn up, harvest, etc.). On the NT, cf. J. Behm, “ἐσθίω,” *TDNT* 2:689–95; L. Goppelt, “τρώγω,” *TDNT* 8:236f.

G. Gerleman

## 𐤀𐤍 }ēl **God**

S 410; BDB 42a; HALOT 1:48b; TDOT 1:242–61; TWOT 93a; NIDOTTE 446

I. \**yil* is an early common (with the exception of Eth.) Sem. word for “god,” which is particularly widespread in Akk. (CAD I/J:91–103) and NWSem. (DISO 13). Its etymology remains disputed despite numerous suggestions.

It has been primarily associated with *yûl* “forward, first” or “to be strong,” or with *yih* “to be strong,” but also—less probably—with the prep. *y* “to, in the direction of” or *y/y/h* “to strive after, reach,” *yil* “to bind,” Arab. *yill* “relationship,” etc. (cf. F. Zimmermann, VT 12 [1962]: 190–95; P. Fronzaroli, AANLR 8/20 [1965]: 248, 262, 267, and the literature in lexicons).

Clear points of reference may not be established for any etymology. Even the idiom *yeš-<sup>l</sup>ēl yādî* “it is in my power” (Gen 31:29; similarly Deut 28:32; Mic 2:1; Prov 3:27; Neh 5:5) does not facilitate a solution, because it too may not be unequivocally explained etymologically (cf. HAL 47a with bibliog.). Perhaps the word *ēl* resists derivation because of its antiquity; nevertheless, one may conjecture that its basic meaning expressed power (like similar designations for deity: → *baʿal*, → *ādôn* “lord,” or → *melek* “king”).

II. The word *ēl* occurs in the OT (238x) in very early as well as in later times; they are evenly distributed and are concentrated in Psa (77x), Job (55x), Isa (24x, Deutero-Isa 15x), Gen (18x), and Deut (13x). Accordingly, *ēl* occurs regularly in metrical texts (cf. also the Balaam sayings, Num 23–24, 8x) and in archaizing language. Whether individual books (Sam, Kgs, Jer, Chron, etc.) wish to avoid the word—for unknown reasons—is therefore questionable. The pl. *ēlîm* is rare in the OT (see III/3 and Psa 58:2 txt em); the fem. sg., familiar in the other Sem. languages, is totally absent from Hebr.

III. *ēl* is both a PN for a particular deity as well as a pure appellative for “god” (pl. *ēlîm*). The manifold usage of the word may be divided crudely into various categories, which may be understood only with great reservation as phases in a historical sequence: from the more marked religiohistorically determined occurrences (III/1, El in the OT environment; III/2, El deities in Gen; III/3, later occurrences; III/4, superlative use), through the description of God’s being with adjs. (IV/1) to usages in Deutero-Isa (IV/2), in Job (IV/3), in the contrast of God and human (IV/4), and in address to God (IV/5).

1. The (mythological) texts from Ras Shamra-Ugarit, in particular,

exhibit El as a god of special rank. As “king” he stands at the head of the pantheon. He is “father” of the gods, “creator of the creatures” (a cosmology is nevertheless not yet attested), “wise,” “friendly,” perhaps also “holy,” but he is also called “bull, El.” He bears signs of age and lives in mythical seclusion (cf. O. Eissfeldt, *El im ugaritischen Pantheon* [1951]; M. H. Pope, *El in the Ugaritic Texts* [1955]; M. J. Mulder, *Kanaänitische Goden in het Oude Testament* [1965], 13ff.).

WSem. inscriptions also know the god El, but no longer name him in deity lists in the first position (cf. W. Röllig, “El als Gottesbezeichnung im Phönizischen,” *FS Friedrich* 403–16; R. Rendtorff, “El, Ba’al und Jahwe,” *ZAW* 78 [1966]: 277–92). Although El is still mentioned in later times (e.g., in Philo of Byblos), he apparently recedes (up until Palmyra) behind Baal (cf. further U. Oldenburg, *Conflict Between El and Baal in Canaanite Religion* [1970]).

2.  $\text{ʔ}l$  first occurs in the OT (from Gen 14:18ff. onward) in various phrases for deities, which appear at particular locales.

In contrast to the address “you are  $\text{ʔ}l r\text{ʔ}$ ” “god who sees me(?)” (Gen 16:13 J), the probably more ancient name  $b^{\text{c}}\text{ʔ}r laḥay r\text{ʔ}$  “well of the living one who sees me(?)” does not contain the element  $\text{ʔ}l$ , so that the numen was perhaps not even originally considered an El deity.

The name attested at Beersheba  $\text{ʔ}l ʕlām$  (Gen 21:33 J) is corroborated to a degree by the “sun god of eternity” known from Ugarit ( $\text{špš } ʕm$ , *KTU* 2.42.7) and Karatepe ( $\text{šmš } ʕm$ , *KAI* no. 26.AIII.19; *ANET* 654b “Eternal-Sun”), and by the Ulomos mentioned in the cosmogony of Mochos (Damascius, *De principiis* 125; *FGH* 784).

In Gen 35:7 (E)  $\text{ʔ}l bêt-ʔl$  “the God (of) Bethel” contains the name of a place, although  $bêt-ʔl$  is also attested in the surroundings as a name for a locality (and a stone) as well as a divine name (Eissfeldt, *KS* [1962], 1:206–33; H. Donner, “Zu Gen 28<P7>22<P255>,” *ZAW* 74 [1962]: 68–70). That the saying “I am the God (of) Bethel” (31:13 E; cf. 28:10ff.) hardly goes back to ancient tradition is indicated by the use of the art. with the name (cf. 35:1, 3  $\text{ʔ}l$  with art.), its no longer appearing in its original local connection, and the probably secondary transferral of the self-presentation formula to the divinity. In addition, the text is uncertain in both 35:7 and 31:13 (see LXX).

Following O. Eissfeldt (*KS* [1966], 3:364n.4, 396n.1; cf. M. Weippert, *ZDMG* 111 [1961]: 42–62; R. Bailey, *JBL* 87 [1968]: 434–38),  $\text{ʔ}l šadday$  (Gen 17:1; 28:3; 35:11; 48:3; Exod 6:3 P) has also been considered a unique local form of the god El, perhaps at Hebron; but the OT does not know such a fixed local association. Only the element  $\rightarrow$   $\text{šadday}$  —whose meaning is disputed—is attested from ancient times (Num 24:4, 16); Gen 43:14 J/E (secondary assimilation to P) and 49:25 (correction of MT in 3 mss and translations in order to harmonize with the usual names?) are questionable. Only since the 6th cent., then, are trustworthy occurrences of the dual name extant (Ezek 10:5 and P), so that it may represent a later combination, which would explain its peculiarity (place boundedness). Through it P summarizes the various designations of the gods of

the fathers and El deities and thus emphasizes the uniqueness of the patriarchal period (Gen 17:1–Exod 6:3).

None of the divine names is attested in present form outside the OT, only some of the individual elements. It remains uncertain, then, how far back their association goes in antiquity. Perhaps the OT mirrors the religiohistorical circumstances in pre-Israelite Palestine only very imperfectly because it has transformed the tradition more thoroughly than is usually assumed. In fact, every divine designation could be related to deities other than Yahweh only in contradiction to their meaning in their present context. Beyond this situation, one may only conjecture how local deities named in Gen relate to the place-bound El mentioned in WSem. texts (local appearances of the high god?). In any case one should not infer from the various by-names that Yahweh was originally an El deity.

Although the formulations appear to go back to early tradition, they endure in Canaan (cf. also place-names such as *p<sup>e</sup>nûʿēl*). It is difficult to ascertain whether the nomads already knew an El religion. Only the characteristic theophoric PN formations (verbs in the impf. with a divine name), e.g., “Israel,” “Ishmael,” or abbreviated “Jacob” and “Isaac,” provide evidence for this conjecture. Other bases remain unknown.

The age of the expression “ʿēl (is the?) God of Israel” (the name of an altar in Gen 33:20 E?) is disputed. Is the combination original or secondary? Is the “God of Israel” a so-called god of the fathers (cf. R. Smend, *Die Bundesformel* [1963], 15, 35f.; H. Seebass, *Der Erzvater Israel* [1966])? In any case, the dual expression is structured differently from other divine names formed with ʿēl and is therefore without comparison.

The divine self-presentation to Jacob “I am ʿēl (with art.), the God of your father” (Gen 46:3 E), Jacob’s blessing, which uniquely promises Joseph aid from the “ʿēl of your father” (Gen 49:25), and the explanation of the PN Eliezer as “the God of my father is my help” probably secondarily associate elements of El religion with the faith in the patriarchal God.

If the nomads already addressed their deities as ʿēl, then they first became acquainted with more precisely defined divine names that shape the narratives of Gen, such as ʿēl ʿôlām, at sanctuaries in the cultivated land.

3. Some later occurrences of ʿēl are recognizable as foreign influences, some as reinterpretations.

According to Judg 9:46 an ʿēl b<sup>e</sup>rît was worshiped at Shechem; yet the name of the god is not uniformly transmitted. It is also given as baʿal b<sup>e</sup>rît (Judg 8:33; 9:4), although El and Baal are different deities. Furthermore, no covenant (→ b<sup>e</sup>rît) between

God and a social group among Israel's neighbors has been discovered to this point, so the significance of the name remains unclear.

Whether the title  $\text{ʔēl } \text{ʕlyōn}$  "the highest God (or El the Highest), Creator ( $\rightarrow qnh$ ) of heaven and earth" (Gen 14:19, 22), which mirrors Jerusalemite tradition, is an original predication of the god El or unifies two originally independent elements is debatable (following G. Levi della Vida and R. Dussaud, see Rendtorff, op. cit.). Texts from Karatepe, Leptis Magna, Palmyra, and perhaps Boghazköy attest  $qn \text{ ʔs}$  "Creator of the earth" as an epithet of El, yet there is to this point no counterpart for "Creator of heaven." It is also uncertain whether  $\text{ʕlyōn}$  was originally a distinct deity or an epithet of the god El. At the least, the two gods must have already been associated with each other very early: they stand side by side in an inscription from Sefire (*KAI* no. 222.A11; cf. Fitzmyer, *Sef.* 37f.) and can be equated in the OT in parallelism (Num 24:16; Deut 32:8 txt em; Psa 73:11; 77:10f.; 78:17f.; 107:11; above all, 78:35; cf. 82:1, 6; Isa 14:13f.).

Ancient Near Eastern, esp. Can., concepts resound when, e.g., Psa 82:1 speaks of an "assembly of El" ( $\text{ʕdat-ʔēl}$ ), Psa 19:2 of the "glory of El" ( $\text{kʕbôd } \text{ʔēl}$ ; cf. 29:2), or Num 23:22 in a simile of God's wild bull horns (cf. W. H. Schmidt, *Königtum Gottes in Ugarit und Israel* [1966], 25ff., 40ff., 83). The divine name "Yahweh" is also characteristically avoided in the boasts of the king of Babel, "I will elevate my throne above the stars of El" (Isa 14:13), and of the prince of Tyre, "I am El, I sit in the seat of gods" (Ezek 28:2; cf. also Deut 32:18; Psa 104:21; Job 38:41?). In the strict sense, however, the OT does not retain  $\text{ʔēl}$  as the name of a particular deity; rather it consistently uses  $\text{ʔēl}$  as an appellative, even if the PN character still shines through repeatedly. Interpretations that infer El's superiority over Yahweh from some OT statements (cf. Eissfeldt, *KS* [1966], 3:389ff.) are therefore actually contrary to the meaning of the text.

The OT's modification of the term  $\text{ʔēl}$ , e.g., perhaps in archaizing language by the adj.  $\text{ḥay}$  "living" (Josh 3:10; Hos 2:1; Psa 84:3; in the oath, Job 27:2; cf. Psa 42:3, 9), may have its model not only in the Ug. PN  $\text{ḥyil}$  (*WUS* no. 917) but also in the mythical expression of the "life" of El (*KTU* 1.4.IV.42, etc.), although El is not a dying and rising god.

Just as the  $\text{bʕnē } \text{ʔēlīm}$  "sons of gods" (Psa 29:1; 89:7; cf. Deut 32:8 txt em) originally signified the gods subordinate to the high god (cf. Psa 82:1, 6), but in the OT signified only lowlier divine beings (cf. W. Herrmann, "Die Göttersöhne," *ZRGG* 12 [1960]: 242–51; G. Cooke, *ZAW* 76 [1964]: 22–47), so the question with polytheistic origins, "who is like you among the gods?" (Exod 15:11), comes to refer to the heavenly council. Similar comparative questions or statements of incomparability of various kinds,

which still provide some insight into religiohistorical backgrounds, contain the word  $\text{ʔēl}$  in the sg. (Deut 3:24; 33:26; 2 Sam 22:32; Isa 40:18; Mic 7:18; Psa 77:14; cf. 89:7f.).

Nonetheless, with the addition  $qannāʔ$  “jealous,” Israel has interpreted the ancient Near Eastern divine designation completely in terms of its own understanding of God; a “jealous God,” who demands—instead of just preeminence—exclusivity of relationship and who punishes transgression against it, is unknown to Israel’s neighbors. To be sure, Israel only later deduced a divine attribute from the exclusivity of its relationship to God, for the reference to Yahweh’s “jealousy” occurs first in later additions to the Decalogue in Deut, etc. (Exod 20:5; 34:14; Deut 4:24; 5:9; 6:15; cf. Josh 24:19; Nah 1:2; →  $qnʔ$ ), which support the first commandment.

Finally, the peculiar character of Yahwism resulted in a reshaping of the  $\text{ʔēl}$  concept, characterizing it with appositives such as “strange, other” (→  $\text{ʔhr}$ , →  $\text{zār}$ , →  $\text{nēkār}$ , Exod 34:14; Psa 44:21; 81:10; cf. Deut 32:12; Mal 2:11). This exclusion can, indeed, grow to negation: apostasy involves the “un-god” ( $\text{Iō}ʔ\text{-ʔēl}$  Deut 32:21). In each case, relationship to God is thus verbally, or at least thematically, conditioned upon the first commandment.

4. Like →  $\text{ʔlōhîm}$  (III/3),  $\text{ʔēl}$  can also be used in an attenuated sense for intensification: “mountains of God” (Psa 36:7; 50:10 txt em) and “cedars of God” (Psa 80:11) are characterized by unusual size (perhaps also Isa 14:13 “stars of God”; Job 41:17 “mighty, heroes” derives from  $\text{ʔayîl}$ , cf. Ezek 32:21).

$\text{yhwh ʔēl}$  (Psa 10:12; cf.  $\text{hāʔēlyhwh}$  Psa 85:9; Isa 42:5) resembles the remarkable usage  $\text{yhwh ʔlōhîm}$  (→  $\text{ʔlōhîm}$  IV/5). The repeated designations for God in Psa 50:1 and Josh 22:22 are ceremoniously elevated usages, similar to the gen. construction, a circumlocution for the superlative,  $\text{ʔēl ʔlōhîm}$ , “God of gods,” i.e., “the highest God” ( $\text{ʔēl ʔēlîm}$  Dan 11:36).

IV. 1. Although the OT attributes relatively few predicates to God himself, the use of  $\text{ʔēl}$  in connection with adjs. becomes more frequent in later times, from about Deut onward; the word can assume a wide variety of modifiers on account of its generality. The “jealous God” (see III/3) watches over Israel, who trusts in strange gods; the “holy God” ( $\text{hāʔēl haqqādōš}$  Isa 5:16, secondary) proves himself to be holy in judgment. Yet the “great God” ( $\text{ʔēl gādōl}$  Psa 95:3) can intercede for Israel (Deut 7:21; 10:17) and forgive sin just as easily (Jer 32:18; cf. Neh 1:5; 9:32; Dan 9:4). In a manner unusual for the OT, the confession formulae  $\text{ʔēl raḥûm wʔḥannûn}$  “merciful and gracious God,” etc. (Exod 34:6; cf. Deut 4:31; Jonah 4:2; Psa 86:15; Neh 9:31), also attested only late, do not appeal to a historical event; they have origins in wisdom, which makes a basic, universally valid

statement concerning God's being, so that one can find here the origins of a doctrine of God's attributes (cf. R. C. Dentan, *VT* 13 [1963]: 34–51).

Descriptions such as “a righteous = true God” (Isa 45:21; cf. 45:15, “a God who hides himself”), “a hidden God” (Psa 99:8), or “the faithful God” (Deut 7:9) are comparable. Construct relations are synonymous: “God of faithfulness” (Deut 32:4 or Psa 31:6; cf. 68:21). “The God of vengeance” (Psa 94:1; cf. Jer 51:56) can be called upon as judge. On other usages, occasionally with  $\text{ʔēl}$  as *nomen rectum* (e.g., Psa 78:7 “deeds of God”; cf. Job 37:14), see *HAL* 48b.

2. In Deutero-Isaiah's proclamation of Yahweh's uniqueness (“I am God and there is no other”) the appellative  $\text{ʔēl}$  (only in Isa 40–46) plays a weighty role (esp. 40:18; 43:12; 45:22; cf. 43:10). Yet this usage does not continue to identify Yahweh with the deity El.  $\text{ʔēl}$  is no longer a PN; rather it is—sometimes par. to (45:14f.; 46:9) or alternating with  $\text{ʔēlohîm}$  (45:5, 18, etc.; cf. Exod 28:2, 9)—exclusively a generic term for “god,” to which Yahweh lays sole claim.  $\text{ʔēl}$  also occurs in disputations with foreign deities (Isa 45:20; in secondary sections “to form, to make, a god”: 44:10, 15, 17; 46:6).

3. In Job, particularly in the Elihu speeches,  $\text{ʔēl}$  (with and without art.) becomes the most frequent designation for God (followed by  $\text{ʔēlohîm}$  and  $\text{šadday}$ , which is often par. to  $\text{ʔēl}$ );  $\text{ʔēlohîm}$  disappears almost entirely (cf. Fohrer, *KAT* 16, 117f.). On the whole, then, the usage is hardly dependent upon the tradition associated with  $\text{ʔēl}$ , but upon the theme of the book of Job (cf. perhaps Job 8:3, 20; 13:3; 31:14; 34:5, 12).

This circumstance dictates that  $\text{ʔēl}$  appears in Job neither with *suf.*—thus the difference between God and human stands out more markedly than in the Psalter—nor with an appositional *adj.*, even when the “majesty” of God is emphasized (36:5, 22, 26).

Conceptualizations such as those found in the themes of many Psalms are comparable. Thus, according to Psa 73:11, the godless explicitly dispute that the transcendent God is cognizant of the activity of people of earth (cf. Job 22:13).

The later period favored using  $\text{ʔēl}$  because it no longer needed to distinguish its God as God of the world (cf.  $\text{ʔēl}$  “in heaven”: Deut 3:24; Psa 136:26; Lam 3:41) from the other gods.

4. The OT repeatedly juxtaposes  $\text{ʔēl}$  “God” and humans. “God is not a human, that he should lie” (Num 23:19) paraphrases God's trustworthy faithfulness to his word. The prophet Hosea (11:9) supports his interpretation of holiness as forgiving love instead of punishing wrath with the antithesis, “I am God and not a human.” Isaiah's word, “Egypt is a human and not God” (31:3), distinguishes between might and weakness.

Ezekiel replies to the arrogant prince of Tyre: “You are a human and not God” (28:2, 9). Finally, the difference between God and human becomes a contrast between right and wrong in Job (except for Job 32:13): “How can a human be right before God?” (9:2; 25:4; cf. 4:17, etc.). The essences of God and people are so different that discourse and interchange between the two, i.e., a legal proceeding, is impossible (cf. 9:32).

5. Otherwise, *ʔēl* lends itself to the expression of close relationship to God (cf. “God of my life” Psa 42:9, etc.); in this usage, as in the address in prayer, one hears an idiom common among Israel’s neighbors (on Bab. prayers, see e.g., J. Begrich, *ZAW* 46 [1928]: 236, 242, 244f.). The individual cries, “My God” (2d per., 3d per., and 1st per. pl. sufs. do not occur), both in laments and in songs of thanksgiving: “My God, my God, why have you forsaken me?” (Psa 22:2; also 18:3; 63:2; 102:25; Exod 15:2; by the king, Psa 89:27; cf. 68:25) and the confession “you are my God” expresses confidence (Psa 22:11; 118:28; 140:7; to the idol, Isa 44:17; cf. Eissfeldt, *KS* [1966], 3:35–47). Yet the individual (Psa 16:1; 17:6; cf. 10:12; 31:6) and the community (Psa 83:2; 90:2; Num 16:22; cf. *ʿimmānū ʔēl* Isa 7:14; 8:8, 10 → *ʿim*) can use *ʔēl* without suf. in the vocative.

V. → *ʔlōhîm*.

W. H. Schmidt

## 𐤀𐤋𐤁 *ʔālâ* **curse**

S 423; BDB 46b; *HALOT* 1:51b; *TDOT* 1:261–66; *TWOT* 94b; *NIDOTTE* 460

1. The root *ʔlh* (*ʔlw*) “to curse” seems to be used only in Hebr., Phoen., and Arab.

Phoen. *ʔlt* on an amulet from Arslan Tash (*KAI* no. 27) means “covenant” (line 9) and “curse” (lines 13–15) (see *KAI* 2:45, following T. H. Gaster, *Or* 11 [1942]: 65f.; for other interpretations, see *DISO* 14; cf. *ANET* 658b). The Yaudi evidence *ʔlh* “conspiracy(?)” cited in *DISO* 14 from *KAI* no. 215.2 should be disregarded according to *KAI* 2:223, 225.

Arab. *ʔalā* (*ʔlw* IV) means “to swear”; cf. J. Pedersen, *Der Eid bei den Semiten* (1914), 12f.

Akk. *iʔlu* “contract” (*AHW* 373b) belongs to *eʔlu* “to bind (contractually)” (*AHW* 189a) and is not related to the root of Hebr. *ʔālâ*. Akk. *māmîtu* corresponds most closely to the usage of *ʔālâ*; cf. Pedersen, op. cit. 82; H. C. Brichto, *The Problem of “Curse” in*

*the Hebrew Bible* (1963), 16f., 71–76; *AHw* 599f.

The verb  $\text{ʔlh}$  occurs in qal and hi.; the substs.  $\text{ʔālā}$  and  $\text{ta}^{\text{ʔālā}}$  “(realized) curse” (so J. Scharbert, *Bib* 39 [1958]: 5) are derivatives (cf., however, Brichto, op. cit., 69).

2. The Hebr. OT attests derivatives of the root 43x: qal and hi. 3x each (in 1 Sam 14:24 one should presumably read *wayyaʔal*),  $\text{ʔālā}$  36x,  $\text{ta}^{\text{ʔālā}}$  1x (Lam 3:65).

The relatively infrequent usage in the old narratives (Gen 24:41[bis]; 26:28; Judg 17:2; 1 Sam 14:24) and the more frequent occurrence in the Prophets (13x) should be emphasized.

3. (a)  $\text{ʔālā}$  is essentially a judicial term. In contrast to  $\rightarrow \text{ʔr}$  “to curse, place under the ban,”  $\rightarrow \text{qll}$  pi. “to insult, wish someone ill,” and other expressions for damaging speech (cf. J. Scharbert, “Fluchen’ und ‘Segnen’ im AT,” *Bib* 39 [1958]: 1–26; Brichto, op. cit.), according to F. Horst (*RGG* 5:1651),  $\text{ʔālā}$  indicates the curse “as a legal aid for securing an oath (Gen 24:41; Hos 4:2; Neh 10:30), contract (Gen 26:28; Ezek 17:19), or covenant (Deut 29:19f.; 2 Chron 34:24), as an ordeal curse (Num 5:21), and as legal vengeance against unknown thieves, perjurers, and accomplices (Judg 17:2f.; Lev 5:1; Zech 5:3; Prov 29:24).”

In each case the term concerns a conditional curse that the speaker either accepts or places on another. Consequently, arenas of usage are, on the one hand, (b) oath-taking rituals ( $\rightarrow \text{šb}^{\text{c}}$ ), accompanied by a curse sanction, associated with the finalization of a contract or covenant ( $\rightarrow \text{b}^{\text{c}}\text{rît}$ ), and, on the other hand, (c) the subjection of other known or unknown persons to a curse (Brichto, op. cit. 41: “adjuration”), in order to ensure the execution of a command or to bring a criminal to punishment. In both cases metonymic word usage must be taken into account from time to time.

(b) In about half the texts,  $\text{ʔālā}$  stands in a topical relation to oath ( $\rightarrow \text{šb}^{\text{c}}$  ni./hi.,  $\text{š}^{\text{c}}\text{bû}^{\text{c}}\text{â}$ ) and covenant ( $\rightarrow \text{b}^{\text{c}}\text{rît}$ , also  $\rightarrow \text{tôrâ}$  as a written, binding law). In view are first, the sanction inherent in any oath taking through a conditional self-curse, the curse released by a violation of oath, and then, metonymically (as part for the whole), also the obligation or the contract itself.

The translation “curse (sanction)” is appropriate for Deut 29:19 (with *rbš* “to lie in wait”), 20 ( $\text{ʔālôt habb}^{\text{c}}\text{rît}$  “covenant curses”); 30:7; Isa 24:6 (with  $\text{ʔl}$  “to consume”; cf. v 5  $\text{b}^{\text{c}}\text{rît}$ , similarly Jer 23:10 txt? without  $\text{b}^{\text{c}}\text{rît}$ ); Dan 9:11 (par.  $\text{š}^{\text{c}}\text{bû}^{\text{c}}\text{â}$ , written in the *tôrâ* of Moses); 2 Chron 34:24 (written in the book). It should be translated “oath” in Gen 24:41(bis) (with  $\rightarrow \text{nqh min}$  “to be free from”; cf. v 8  $\text{š}^{\text{c}}\text{bû}^{\text{c}}\text{â}$ , vv 3, 9, 37  $\text{šb}^{\text{c}}$ ); Ezek 16:59 and 17:16, 18f. (with *bzh* “to despise,” par. *pr* hi.  $\text{b}^{\text{c}}\text{rît}$  “to violate covenant”); Hos 10:4

(*ʾlh* inf. *šāw*) “to swear false oaths,” alongside *bʿrīt*); Neh 10:30 (*ʾālā* and *šʿbūʿā* as a hendiadys). Gen 26:28; Deut 29:11, 13, 18; Ezek 17:13 (in each case par. to *bʿrīt*) refer to the sworn contract.

Jer 29:18; 42:18; 44:12 describe the apostate Judeans as “(an example) for cursing”; this expansion of meaning only occurs here, characteristically, in a series of synonyms with “terror, hissing, or execration (*qʿlālā*), reproach.”

(c) Conditional curses placed on other persons occur in very different circumstances but commonly employ *ʾālā* as a (in proper usage) legal mechanism, namely in public proclamations to insure compliance and in divine judgment procedures; whoever fails to follow the demand, i.e., the guilty, should be affected by the curse.

Saul places his army under an execration (*ʾlh* hi.; not “to cause to swear”; cf. Brichto, op. cit. 45–48) in the event that someone transgresses against the published fast order (1 Sam 14:24); Lev 5:1 discusses the witness who fails to respond to the public call to report to the court, accompanied by a threat of curse in the event of disobedience (*qôl ʾālā*) (Elliger, HAT 4, 73; cf. Noth, *Lev*, OTL, 44); Prov 29:24 discusses the receiver of stolen goods who will be affected by the public cursing of a thief, against whom one conceivably cannot bring charges; Judg 17:2 treats the confessed thief for whom the curse (*ʾlh* qal) issued earlier is now repealed by a blessing (→ *brk* only here and in Deut 29:18 alongside *ʾālā*). Zech 5:3 presents the *ʾālā*, embodied in the scroll seen in a vision, as a curse issued by Yahweh on thieves and perjurers.

In the context of a curse-ordeal (cf. R. Press, *ZAW* 51 [1933]: 122ff.) involving a woman suspected of adultery, Num 5:11–31 does not treat the self-adjudication required of the woman, but a conditional curse by the priest (v 21aα with *šʿbūʿā*, v 23 pl.) that takes effect in the event of guilt (Brichto, op. cit. 48–52); the woman then becomes an “(example of a) curse” (vv 21aβ, 27; metonymic use of *ʾālā*, cf. Scharbert, op. cit. 5, 11f.). *ʾālā* also appears in 1 Kgs 8:31 (*ʾlh* hi. and twice *ʾālā* [read *ûbāʾā* in v 31b]; par. 2 Chron 6:22) and Job 31:30 (so Brichto, op. cit. 52–56; contra Noth, BK 9, 186: purification oath of the accused) as a legal (but dangerous) technique against an enemy.

Because such a conditional curse always contains an accusation, *ʾālā* can also acquire the broader meaning “accusation” (Hos 4:2 and Psa 59:13 together with → *khš*; Psa 10:7 in an illegal use; Brichto, op. cit. 56–59).

4. (a) Insofar as the conditional self-adjudication in the context of interpersonal agreements and the conditional curse upon a third party are legal techniques bound to God’s guarantee of the judicial process (Yahweh hears the *ʾālā*, 1 Kgs 8:31f. = 2 Chron 6:22f., and acts accordingly, Num 5:21; Ezek 17:15–19; he himself proceeds against the misuse of the *ʾālā*, Hos 4:2 and 10:4, or sets it in motion, Zech 5:3; cf., however, the

cancellation of the *ʔālā* by a blessing in Judg 17:2), their value and significance vary according to whether God is taken seriously. In crass cases the *ʔālā* may be abused unscrupulously in contempt of God and thus in disdain of fellow human beings (cf. Hos 4:2; 10:4; Psa 10:7; 59:13; Job 31:30 for private law; Ezek 17:13, 16, 18f. for international law). Examples of *ʔālā* pronounced legitimately occur in Gen 24:41; 26:28; Judg 17:2; 1 Sam 14:24; Prov 29:24; naturally general references to the institution also belong in this category (Lev 5:1; Num 5:21–27; 1 Kgs 8:31 = 2 Chron 6:22; cf. Zech 5:3).

(b) The *ʔālā* has a properly theological aspect only as a sanction in the context of a covenant between Yahweh and Israel (15 texts from the time of Jer and Deut). The manifestation of the curse is implied in the moment of the covenant's finalization (Deut 29:11–20; Neh 10:30), but must be acknowledged in the judgment for apostasy (Isa 24:6; Jer 23:10; 29:18; 42:18; 44:12; Ezek 16:59; Dan 9:11; 2 Chron 34:24); if the people repent, the curses will affect not Israel but its enemies (Deut 30:7).

5. In the literature from Qumran, the expression *ʔālôt habb<sup>c</sup>rit* “covenant curses,” derived from Deut 29:20, is particularly popular (1QS 2:16; 5:12; CD 15:2f.; cf. 1:17; also *š<sup>e</sup>bû<sup>c</sup>at hāʔālā* in CD 9:12).

The LXX primarily translates with *ara* and derivatives, less frequently (6x) with *horkos* and its derivatives.

In the NT the concepts associated with *ʔālā* become markedly less common because of the altered legal circumstances and the rejection of the oath. Cf. L. Brun, *Segen und Fluch im Urchristentum* [1932]; F. Büchsel, “ἄρα,” *TDNT* 1:448–51; J. Schneider, “ὄρκος,” *TDNT* 5:457–67.

C. A. Keller

## אלהים *ʔlōhîm* God

S 430; BDB 43a; *HALOT* 1:53a; *TDOT* 1:267–84; *TWOT* 93c; *NIDOTTE* 466

I. The etymology of *ʔlōhîm*—like that of → *ʔēl*—is contested.

1. With few exceptions the sg. *ʔlōah* occurs in the OT only in post-exilic literature (see II); hence one may assume that the sg. presupposes the pl. The Hebr. alone suggests the conclusion that *ʔlōhîm* (along with *ʔēlîm*) is a pl. form of *ʔēl*, from which a sg. was formed secondarily.

In support one can—with caution given the uncertain textual situation—call

attention to the Ug. pl. of *ilt* “goddess,” which seems to be *ilht*, and and to *ilhm*, which may also be found alongside the masc. pl. *ilm* (*WUS* no. 182; *UT* no. 163 and §8.8).

Nevertheless, the sg. \**ʔilāh* occurs already in Old Aram. (*DISO* 14) and in Arab. (but not in Akk.); thus the derivation of *ʔlōhîm* from *ʔilāh* seems more probable.

In any case one must not assume an etymology for \**ʔilāh* distinct from \**ʔil*, but a relationship of the two words, probably in the sense that the older root \**ʔil* underwent expansion. Derivation from the Arab. *ʔaliha* “to be timid” (e.g., König, *Syntax* §263a) is just as improbable as a direct relationship to *ʔēlâ/ʔēlôn* “tree” (F. Zimmermann, *VT* 12 [1962]: 190–95). *ʔlōhîm* never appears in place-names and PNs; thus the association of the two divine designations may have still been known to Israel.

2. *ʔlōhîm* is usually considered an abstract, intensifying, majestic, or dominical pl. (König, *Syntax* §163; GKC §124g). Yet the fact that from the outset the word also apparently indicates the numerical pl. “gods” (see III/1) may be explained only with difficulty in this manner. If one wishes to trace this double usage to a unified origin, one may theorize that an originally genuine pl. was subsequently or simultaneously understood as an abstract pl. Whether the expression should then be interpreted as a summation of the “divine powers” as a unity must remain at least questionable. In any case, the sg. sense of the pl. form is so uncontested for the OT that it used the word throughout without limitation (suspicion of polytheism).

The pl. *ilānî-ya* addressed to the pharaoh in the Amarna correspondence and Phoen. *ʔlm* as a divine epithet represent some pars. (cf. esp. J. Hehn, *Die biblische und die babylonische Gottesidee* [1913], 168ff.; W. Röllig, *FS Friedrich* 403–16; and O. Eissfeldt, *El im ugaritischen Pantheon* [1951], 27f.). The degree to which these expressions (pl. form with sg. meaning) reveal monotheistic tendencies must remain undecided. Otherwise, the assumption that Israel adopted *ʔlōhîm* from the Canaanites with pl. as well as sg. meanings has not yet been demonstrated.

II. 1.\* With 2,600 occurrences *ʔlōhîm* is the second most frequent subst. in the OT following *bēn* “son.”

Gen 219	Nah 1
Exod 139	Hab 2
Lev 53	Zeph 5
Num 27	Hag 3
Deut 374	Zech 11

Mic	11		

Pentateuch	812
Josh–2 Kgs	507
Prophets	382
Ketubim	899
Hebr. OT total	2,600

2 Kgs 17:31 K is attributed above to *ʔlôah*. Lis. lists 1 Kgs 1:47 (K/Q) twice, Mandl. lists Gen 21:4; Psa 108:6, 8 twice. The variants in 2 Sam 7:22a and 1 Chron 15:2b, omitted in Cod. Leningradensis, are not counted.

In addition, *ʔlôah* occurs 58x: 41x in Job 3–40; other scattered occurrences: 4x in Psa and Dan, 2x in Deut and Hab, 1x in 2 Kgs, Isa, Prov, Neh, and 2 Chron.

The Aram. portions of the OT contain *ʔlāh* 95x (17x pl., 4x sg. in meaning): Jer 10:11 1x, Dan 51x, Ezra 43x.

2. A peculiarity in the distribution of *ʔlôhîm* need only be noted: The prophets, excl. the Jonah narrative, avoid unmodified *ʔlôhîm* as the subj. of the sentence (cf. Lis. 97c), probably because the divine designation is too unspecific for them, while the word is found frequently in this position in the Pentateuch and in the Deuteronomistic and Chronicler's histories.

In Job, not counting the framework narrative, *ʔl* (see IV/3) and *ʔlôah* (cf. Fohrer, KAT 16, 117f.) replace *ʔlôhîm* almost entirely. In the remainder of the OT, the sg. *ʔlôah* occurs relatively infrequently, and, moreover, almost exclusively in poetical texts (Deut 32:15, 17; Isa 44:8; Hab 3:3; Psa 18:32; 50:22; 139:19; Prov 30:5; Dan 11:37–39). The word never carries the art. (once a suf., Hab 1:11; also in combinations, Psa 114:7; Neh 9:17), a condition that may be determined by a specific feature of elevated, poetical language. As a rule the sg. already presupposes the transition of

the generic designation “god” to the PN (cf., however, Dan 11:37ff.).

III. In distinction from *ʾēl*, *ʾēlōhîm* is originally only a descriptive term, not a divine name; in the course of history, however, it acquires the character of a PN, so that *ʾēlōhîm* can appear without the art. (Gen 1:1; GKC §125f) or can serve in the vocative as an address to “God” (Psa 5:11; 51:3, etc.). Nonetheless, the word does not mean solely “(the) God” but also “(the) gods” (III/1). In the following sections the more grammatical-semasiological and religiohistorical aspects of usage will be treated in III/1–7, the more theological in IV/1–6 (in view of the multitude of occurrences, citations are generally only exemplary).

1. *ʾēlōhîm* is used of strange gods with the gen. of the circle of worshipers: “gods of Egypt” (Exod 12:12; Jer 43:12f.; cf. Judg 10:6; 2 Kgs 17:31 Q; 18:34f.; 2 Chron 28:23). Other usages express the exclusivity and aniconic nature of the worship of Israel’s own God: “gods of the foreigners” (Gen 35:2, 4; Judg 10:16; 1 Sam 7:3; cf. Deut 31:16; Jer 5:19), “gods of the nations” (Deut 6:14; Judg 2:12; Psa 96:5; cf. 2 Kgs 19:12, etc.), “gods of the lands” (2 Kgs 18:35; the Assyrians speaking of Yahweh: 17:26f.), “gods of the earth” (Zeph 2:11), “other gods” (Hos 3:1; frequent in Deut, Dtr, Jer—occasionally to be understood as a sg.; cf. III/2?), “all gods” (Exod 18:11; Psa 95:3; 96:4; 97:7, 9; 2 Chron 2:4), and “gods of silver and gold” (Exod 20:23; cf. 34:17; Lev 19:4).

The pl. form is also used for individual foreign deities (Judg 11:24; 2 Kgs 1:2; 19:37; cf. Amos 5:26 “your astral god”; 8:14; Num 25:2; sg.: Dan 11:37ff.; Deut 32:17), and even for the fem. deity Astarte (1 Kgs 11:5, 33; cf. 1 Chron 10:10 with 1 Sam 31:10), because Hebr. has no term for “goddess.”

2. As a designation for Israel’s God, *ʾēlōhîm* is grammatically construed to be sg. generally (Gen 1:1; Psa 7:10; 2 Kgs 19:4), but can also be accompanied by a pl. attribute or predicate with no recognizable difference in meaning. Often both possibilities are found in the same body of literature: *ʾēlōhîm ḥayyîm* “living God” (Deut 5:26; 1 Sam 17:26, 36; Jer 10:10; 23:36) and *ʾēlōhîm ḥay* (2 Kgs 19:4, 16; cf. 2 Sam 2:27), *ʾēlōhîm q̄dōšîm* “holy God” (Josh 24:19) and *hāʾēlōhîm haqqādōš* (1 Sam 6:20); cf. also Deut 4:7; 1 Sam 4:8; 28:13; Psa 58:12 (GKC §132h; König, *Syntax* §263c). Occurrences with a pl. verb (excl. 1 Kgs 19:2; 20:10, where, as in 1 Sam 4:8, non-Israelites speak) are mostly ambiguous: Gen 20:13 E (see H. Strack, *Die Genesis* [19052], 77); 35:7 E (cf. Gunkel, *Gen* 224); cf. 31:53 J; Exod 22:8; 1 Sam 2:25. The confessional formula in 1 Kgs 12:28 and Exod 32:4, 8 is consciously ambiguous in order to brand the worship of the bull as idolatry. Later the pl. construction is avoided “from fear of misconception” (GKC §145i; cf. Neh 9:18 with Exod 32:4, 8; 1 Chron 17:21 with 2 Sam 7:23). These linguistic peculiarities do not support

religiohistorical conclusions concerning an original Israelite polytheism, which would have been retained primarily in E.

3. The semantic range of *ʿlōhîm* reaches farther than “god”: from patron deities and ghosts all the way to the fig. usage, incl. even the attenuated superlative sense.

According to Exod 21:6 (abbreviated in Deut 15:17) a slave who wishes to remain with his lord is led “before God” or “to the door” to receive a mark. *ʿlōhîm* here are likely the household gods that protect the family (cf. Gen 31:30; also Judg 18:24). The regulations in Exod 22:7f. should be understood similarly: In unresolvable private law situations one turned in ancient times to the household gods (*ʿlōhîm* does not have the meaning “judge” in Exod 18:19; 22:27; 1 Sam 2:25; Psa 82:1; 138:1; cf. A. E. Draffkorn, *JBL* 76 [1957]: 216–24; H. W. Jüngling, *Der Tod der Götter* [1969], 24ff.; W. Beyerlin, *Die Rettung der Bedrängten in den Feindpsalmen der Einzelnen auf institutionelle Zusammenhänge untersucht* [1970], 56f.).

Spirits of the dead can be called *ʿlōhîm* (1 Sam 28:13; Isa 8:19; cf. Mic 3:7?), although they may not intervene in human affairs on their own, they speak only (at night) per inquiry, and (despite 1 Sam 28:14) they have no cult (cf. L. Wächter, *Der Tod im AT* [1967], 192).

In some phrases such as “man of God” or “spirit of God” (see III/6), *ʿlōhîm* may have only the weakened sense of “divine” or even “demonic.”

The king is addressed in the controversial text Psa 45:7 as *ʿlōhîm*. Zech 12:8 promises for “that day”: even the weakest Jerusalemite will be strengthened “like David, and the house of David like *ʿlōhîm*,” which an addition mitigates to “angel of Yahweh” (conversely, Judg 13:22 describes the “angel of Yahweh” as *ʿlōhîm*).

A metaphorical or fig. meaning of *ʿlōhîm* occurs in the description of the relationship between Moses and Aaron as one between principle and prophetic spokesman: “He will be your mouth and you will become God for him” (Exod 4:16; cf. 7:1).

Like *ʿēl* (III/4), *ʿlōhîm* may also exercise an intensifying function: “mountain of God” (Psa 68:16; cf. 36:7), “a city large for God” (= beyond measure) (Jonah 3:3), “wisdom of God” (1 Kgs 3:28), “panic of God” (1 Sam 14:15; cf. Gen 35:5; 2 Chron 20:29). Nevertheless, *ʿlōhîm* does not completely lose its meaning in this usage; for the intensification results from the fact that the thing (or person) affected is related to God, e.g., “frightful (= sent by God?) thunder” (Exod 9:28; cf. 9:23) or “God’s camp” (Gen 32:3; 1 Chron 12:23); cf. also “prince of God” (Gen 23:6), “God’s fight” (Gen 30:8), “God’s fire” (2 Kgs 1:12; Job 1:16), perhaps “God’s breath” (Gen 1:2), “God’s grace” (see III/7); see D. W. Thomas, *VT* 3 (1953): 209–24; 18 (1968): 120–24; F. Dexinger, *Sturz der Göttersöhne oder Engel vor der Sintflut?* [1966], 41ff. The sense of the word *ʿlōhîm*, then, cannot be established with certainty in most cases; various nuances may be heard. Moreover, the phrases should be explained variously on the basis of their origins; some have religiohistorical bases, some are later formations (cf. also III/5).

4. The oldest traditions in which <sup>e</sup>*lōhîm* is firmly rooted are the names of the “gods of the fathers” and of the “mountain of God.” But the “Yahweh war” tradition seems not to have known the word originally; <sup>e</sup>*lōhîm* has replaced the Yahweh name or the divine “I” in the expression “people of God” in the summons to arms (Judg 20:2 in contrast to 5:11, 13 “people of Yahweh”; cf. 2 Sam 14:13) and in the cry “God has given the enemies into your hand” (Judg 7:14; 8:3; 18:10; cf. 1 Sam 23:14; cf. G. von Rad, *Holy War in Ancient Israel* [1991], 42ff.).

In the patriarchal tradition (→ <sup>ab</sup> IV/1), <sup>e</sup>*lōhîm* occurs in two different expressions: “God of my/your father” (Gen 31:5, 29 txt em; 46:3; cf. Exod 15:2; 18:4, etc.) and “God of Abraham” (Gen 31:42); “God of my father Abraham” (32:10; cf. 26:24, etc.) represents a hybrid form. In the oath that Jacob and Laban take following a border treaty, both partners summon their God as guardian of the agreement: “The God of Abraham and the God of Nahor shall judge between us” (Gen 31:53). One may still perceive here that the two deities were once distinguished; an addition seems to fuse both into the “God of their father.” Formulations such as “God of your father, God of Abraham, God of Isaac, God of Jacob” (Exod 3:6) or “God of your fathers” (3:13, 15f.; cf. 4:5), which combine the individual gods of the fathers and equate them with Yahweh, are even more secondary. The OT recognizes only Israel’s God under the various designations, so that one must reconstruct an earlier form contrary to the sense of the text, and it is difficult to decide, regarding the particulars, the degree to which the tradition persists in its early form (on the god of the fathers, see Alt, “God of the Fathers,” *EOTHR* 1–77; bibliog. in K. T. Andersen, *ST* 16 [1962]: 170–88; M. Haran, *ASTI* 4 [1965]: 30–55; F. M. Cross, *Canaanite Myth and Hebrew Epic* [1973], 3–43).

Later, in the framing sermons of Deut and particularly in the Chronicler, designations such as “God of your/his/our fathers,” etc., which express the fusion of tradition and one’s own faith, become very popular. But the expression “God of Jacob,” whose antiquity (like that of “God of Isaac”; Gen 28:13) is uncertain, also receives greater significance, esp. in worship (2 Sam 23:1; Isa 2:3; Psa 20:2; 46:8, 12; 84:9, etc.; G. Wanke, *Die Zionstheologie der Korachiten in ihrem traditionsgeschichtlichen Zusammenhang* [1966], 54ff.); cf. “God of Abraham” in Psa 47:10 (1 Kgs 18:36). “God of your father, David” (2 Kgs 20:5 = Isa 38:5; 2 Chron 21:12), “God of Elijah” (2 Kgs 2:14), and also “God of Shem” (Gen 9:26) are formed analogously.

If the God of the fathers is associated with people, in accordance with his name, so the “mountain of God” tradition (Exod 3:1; 4:27; 18:5; 24:13, E in part) associates a god with a place that one must seek in order to

experience the divine presence. Because reports of “Sinai” and “mountain of God” are distinct (except for Exod 24:13), it is not entirely clear whether the two traditions refer to the same place. Should they have a common origin, the extent of their subsequent divergence is remarkable. The “mountain of God” tradition takes place in the region of the Midianites (cf. the cultic community, Exod 18:12), about whom the Sinai narrative is silent, and offers no theophany corresponding to Exod 19:16ff. (cf. at best Exod 3).

5. Some ancient Near Eastern mythical concepts, indicated by the expressions “city of God” (Psa 46:5; 48:2, 9; 87:3), “stream of God” (Psa 65:10), “mountain of God” (Ezek 28:14, 16; cf. 28:2; Psa 68:16; 1 Kgs 19:8), “garden of God” (Ezek 28:13; 31:8f; cf. Isa 51:3), survive primarily in the Jerusalem tradition; cf. also from the Moses tradition “rod of God” (Exod 4:20; 17:9), “finger of God” (Exod 8:15; 31:18; Deut 9:10), and “writing of God” (Exod 32:16). Like *b<sup>e</sup>nê ʿēlîm*—an expression also attested outside the OT and therefore perhaps an ancient expression—*b<sup>e</sup>nê ʿēlōhîm* (Gen 6:2, 4; Job 1:6; 2:1; 38:7; cf. Dan 3:25) are also “sons of gods,” i.e., divine beings, subordinate to Yahweh.

The mythical narrative Gen 6:1–4 assigns them even greater self-sufficiency than the framing report of the book of Job, where they still constitute only a subservient heavenly council. Nevertheless, the preexistent concept, according to which the giants originate in the admixture of gods and people, is also annulled in the story of the “angel marriages”; the myth is reshaped by the historical self-understanding of Israel in order to reveal the responsibility and guilt of humanity.

Israel has subordinated strange powers to Yahweh elsewhere as well. Thus in the mythical judgment scene in Psa 82, sentence of death is pronounced upon the “gods” (vv 1, 6 *ʿēlōhîm*), because they are unable to create justice for the needy (Psa 58:2ff.).

6. Significantly, the mythically colored usages mentioned and the superlative form (see III/3; cf. also IV/5) are only rarely formed with the Yahweh name and always with the appellative “god.” *ʿēlōhîm* occurs with remarkable frequency in fixed phrases, sometimes in ancient preformed material (on III/6–7 cf. F. Baumgärtel, *Elohim ausserhalb des Pentateuch* [1914]). Just as the OT has no “sons of Yahweh” formulation analogous to “sons of God” (perhaps in avoidance of the obvious notion of paternity), it also does not occur with Yahweh in a way corresponding to *ʾîš (hā)ʿēlōhîm* “man of God.” Other phrases are more or less reserved for *ʿēlōhîm* or gain a particular emphasis through the generic name.

The title “man of God” (no pl. is attested) is concentrated in the Elijah and particularly the Elisha narratives, which depict the prophets as wonder-workers (from 1 Kgs 17:18 on); it also describes Samuel, among others (1

Sam 9:6ff.), and is applied to Moses (Deut 33:1; Josh 14:6; Psa 90:1; 1 Chron 23:14; 2 Chron 30:16; Ezra 3:2) and in the Chronicler to David (2 Chron 8:14; Neh 12:24, 36; see R. Rendtorff, *TDNT* 6:809). Cf. similar expressions such as “God’s devotee” (Judg 13:5, 7; 16:17) or “prince of God” (Gen 23:6).

The general description “ark of God” (1 Sam 3:3; 4:11ff.) may be older than the specifically Israelite name “ark of Yahweh (God Sabaoth)” (1 Sam 4:6; 2 Sam 6:2). Among other names are “ark of the covenant of God” (Judg 20:27) and “ark of the God of Israel” (1 Sam 5:7ff.; cf. J. Maier, *Das altisraelitische Ladeheiligtum* [1965], 82ff.).

“House of God” (Gen 28:17, 22; Judg 9:27; 17:5; 18:31; cf. Jer 43:12f., etc.) becomes a frequent term for the temple in the Chronicler’s history (Ezra 1:4; 4:24ff., etc.), although the alternation with “house of Yahweh” (e.g., 2 Chron 28:24) seems to be inconsistent. The title “chief (*nāgîd*) of the house of God” (Neh 11:11; 1 Chron 9:11; 2 Chron 31:13; 35:8) is firmly established, however.

The expression “food of God” (Lev 21:6, 8, 17, 21f.; 22:25) preserves an ancient sacrificial concept, explicated to a degree in the pertinent laws by the neutral expression *ʾiššê yhw* “Yahweh’s (burnt) offering”; cf. similar designations in Lev 21:12; 23:14; Num 6:7; perhaps Psa 51:19.

Ezek (Ezek 1:1; 8:3; 40:2; cf. 11:24; 43:3) has “visions of God” as a fixed phrase for the prophetic reception of revelation.

The “spirit of God” (→ *rûah*) comes upon the prophets (Num 24:4; 1 Sam 10:10; 11:6; 19:20, 23; Ezek 11:24; 2 Chron 15:1; 24:20), gives wisdom (Gen 41:38; Exod 31:3; 35:31), and facilitates dream interpretation (cf. Dan 4:6, “spirit of the holy gods,” with 2:28, 47), but also represents the human life force (Job 27:3). 1 Sam 16:14–16 (cf. 16:23; 18:10) distinguishes an evil spirit sent by Yahweh, a “spirit of God,” from the “spirit of Yahweh.” Perhaps *ʾlōhîm* here has the attenuated sense of the divine-demonic.

Other expressions also seem to be fixed idioms, although they are not limited to formation with *ʾlōhîm*: “fearful of God” (Gen 22:12; Exod 18:21; Job 1:1; Eccl 7:18; etc.), “to fear God” (Exod 1:17, 21; Job 1:9; etc.), “to curse God” (or, euphemistically, “to bless God”) (1 Sam 3:13 txt em; Job 1:5; 2:9; cf. Deut 21:23 “curse of God”), “to ask God” (Judg 18:5; 20:18; 1 Sam 14:36f.), “word of God” (Judg 3:20; 1 Sam 9:27; 2 Sam 16:23; cf. 1 Kgs 12:22; Mic 3:7), or “knowledge of God” (Hos 4:1; 6:6; Prov 2:5). Such phrases sometimes refer intentionally to the “deity” (cf. also the denial of God, IV/5).

7. *ʾlōhîm* occurs moreover in other less firmly established figures of speech, e.g., “May God do this or that to me” (1 Sam 3:17, etc.; pl. for non-Israelites: 1 Kgs 19:2; 20:10; subj. Yahweh, 1 Sam 20:13; Ruth 1:17), “to

curse God and the kings” (or, euphemistically, “bless”) (1 Kgs 21:10, 13; cf. Isa 8:21; Exod 22:27; subj. Yahweh, Prov 24:21), perhaps “to show someone the kindness of God” (= loving service) (2 Sam 9:3; cf. 2:5; subj. Yahweh, 1 Sam 20:14), etc. Some of these idioms may also have been common among Israel’s neighbors.

The formula “as <sup>ʿ</sup>*lōhîm* (pl.?) destroyed Sodom and Gomorrah” may be of pre-exilic origin, if it originally referred to another deity (or deities) as the agent of the fall of the two places (Isa 13:19; Jer 50:40; Amos 4:11; cf. Deut 29:22; Isa 1:7 txt em; Jer 49:18); the saga in Gen 18f. already ascribes the deed to Yahweh.

The designation “angel of God” for God’s messenger (Gen 21:17; 28:12 pl.; Judg 6:20, etc.) is less common than “angel of Yahweh” (→ *malʾāk*), but often appears in a proverbial manner in similes (Judg 13:6; 1 Sam 29:9; 2 Sam 14:17, 20; 19:28; “angel of Yahweh,” Zech 12:8).

The disaster coming upon someone can be considered to have been sent from “God’s hand” (1 Sam 5:11; Job 19:21), while in post-exilic times the expression “God’s (good) hand over me” or variants describe God’s gracious control (Ezra 7:6, 9, 28; 8:18, 22, 31; Neh 2:8, 18). In each case the organ is understood in terms of its function.

The expression “gods and men” (Judg 9:9, 13) or “to strive with <sup>ʿ</sup>*lōhîm* and men” (Gen 32:29; cf. Hos 12:4) also deserves mention. The divine name Yahweh is specifically avoided in the latter usage; as a consequence, the meaning of <sup>ʿ</sup>*lōhîm* remains ambiguous because of the tangled tradition history of the Peniel narrative.

IV. 1. In some phrases or with a suf., <sup>ʿ</sup>*lōhîm* expresses the relationship between God and people. “God of Israel” is, then, nothing short of a standard expression (all occurrences in C. Steuernagel, FS Wellhausen 329ff.). The earliest trustworthy witness for it is the Song of Deborah from early in the period of the judges (Judg 5:3, 5).

The antiquity of occurrences in Gen 33:20; Josh 8:30; 24:2, 23, from which one could infer the cultic names of a deity worshiped in Shechem (cf. e.g., M. Noth, *Das System der zwölf Stämme Israels* [1930], 93f.), remains unknown because the structure of the formula in Gen 33:20 differs from the other divine names formed with <sup>ʿ</sup>*l* (→ <sup>ʿ</sup>*l* III/2), and the time of composition of Josh 8 and 24 is disputed. The formula seems even more secondary in the Sinai tradition (Exod 24:10; cf. 5:1; 34:23). Since approximately the time of the exile, the usage became a favorite (introductions to speeches in Jer, Chronicler, etc.). It occurs in very different contexts: in doxology and prayer (1 Kgs 8:15, 23; 2 Kgs 19:15), in the oath (1 Kgs 17:1), etc. The prophet Ezekiel knows the singular “glory of the God of Israel” (8:4; 9:3; 10:19; 43:2) in addition to the usual formulation “glory (→ *kbd*) of Yahweh” (1:28, etc.).

“God of the Hebrews” (Exod 3:18, etc.) or “God of Jacob” (see III/4) are similar phrases.

2. God's relationship with the people is more frequently expressed through <sup>e</sup>*lōhîm* with a suf.: "your/our God," etc. (e.g., Josh 24:17f., 27; Exod 32:4, 8; Judg 11:24; Mic 4:5; of strange gods: 1 Sam 5:7; Jer 48:35), as is his relationship with an individual (also through "my God").

The meaning of such forms expanded by pronouns (cf. Ruth 1:16) can only be illustrated by some examples here. Thus the alternation of "our/your God" (Exod 8:21ff.; 10:16f., 25f.) often reflects the contrast of Moses and Pharaoh. In the second encounter with Ahaz (Isa 7:10–17), Isaiah offers the king: "Ask a sign of Yahweh *your* God!" When Ahaz hesitates, the prophet asks threateningly: "Is it too little for you to weary men, so that you also weary *my* God?" The refusal of the offer is a rejection of the promise inherent in the phrase "your God." In a time in which the community between God and people appears to be broken according to the message of judgment of his prophetic predecessors, Deutero-Isaiah begins his proclamation with the cry "Comfort, comfort my people, says *your* God!" (Isa 40:1; cf. 40:8 "the word of *our* God"). He may alter the traditional proclamation, "Yahweh has become king," into "*your* God has become king" (52:7) and he allows a messenger to report already: "Behold, *your* God!" (40:9; cf. 35:4). The people's address "my God" in Hosea's promise (2:25) already embraces everything that the era of salvation will bring (similarly Zech 13:9; Isa 25:9 "our God"). Such suf. forms occur with particular frequency in Hos; Deuteronomic-Deuteronomistic literature impresses Israel even more with the fact that Yahweh is "your God."

The cry "my God" in Hos 2:25, conceived as a collective term (cf. Isa 40:27, etc.), is frequently the address of the individual in distress that opens the lament to God, expresses trust, hope, and thanks (Psa 3:8; 5:3; 7:2, 4; 22:3; 25:2; 38:22; 91:2; 1 Kgs 17:20f.; Dan 9:18f., etc.; cf. O. Eissfeldt, "Mein Gott' im AT," ZAW 61 [1945–48]: 3–16 = KS [1966], 3:35–47). The confessional formula "you are my/our God" represents an expansion (Psa 31:15; 86:2; 143:10; Isa 25:1 or 2 Chron 14:10; of the idol: Isa 44:17; cf. Gen 31:30; Judg 18:24).

3. Finally, suf. forms of <sup>e</sup>*lōhîm* are constitutive for the so-called self-presentation formula, "I am Yahweh, your God," and the so-called covenant formula, "I will be their God, and they will be my people."

The self-presentation formula, well-known in the ancient Near East, "I am . . .," refers to Yahweh in Israelite usage and is expanded (to the so-called grace formula) by the promise "your God"; it appears in various contexts in the OT with varied meanings (sometimes the translation "I, Yahweh, am your God" is also justified). It frequently points to history, particularly to the experiences in Egypt (Hos 12:10; 13:4; Psa 81:11), and in the Decalogue the ceremonious 1st-per. speech of God forms the preamble from which the individual commandments follow (Exod 20:2; cf. Judg 6:10). The chief occurrence of this idiom belongs once again to the exile; for it is concentrated in P, esp. in H (Lev 18:2, etc.), and in Ezek (Ezek 20:5, etc.). In conjunction with "to recognize that" (Exod 6:7 P; Ezek 20:20, etc; → *yd<sup>c</sup>*), the divine "I" becomes the goal of human knowledge; cf. W. Zimmerli, *I Am Yahweh* [1982], 1ff., 29ff., 104; K. Elliger, *Kleine*

*Schriften zum AT* (1966), 211–31.

The covenant formula is found (since around the end of the pre-exilic era) in various forms, on the one hand, in the later Moses tradition (Deut 26:17f.; 29:12; Exod 6:7 P, etc.), and, on the other, in prophetic promises (Jer 31:33; Ezek 11:20, etc.). It announces the existent or—critically—the future identity of Yahweh with his people; cf. R. Smend, *Die Bundesformel* (1963).

4. <sup>ע</sup>*lōhîm* is often more closely defined, more frequently through cs. combinations such as “God of heaven,” “God of my help” than through adjs.: “the righteous God,” “the living God,” etc. In every case, God’s nature or the means of encountering him are announced.

Except for Gen 24:7 (v 3, “God of heaven and earth”), “God of heaven” occurs from the post-exilic period onward in apposition to or even instead of the name Yahweh, sometimes in conversation with or speeches before foreigners (Jonah 1:9; Ezra 1:2 = 2 Chron 36:23; Neh 1:4f., etc.; Aram.: Dan 2:18f., etc.; cf. Psa 136:26). The designation may have arisen under Persian influence; in any case it serves the dialog with the Persian government (cf. Ezra’s title, “Scribe of the law of the God of heaven,” Ezra 7:12). The concept that God dwells in heaven (→ *šāmayim*) is already common early in Israel, however, and Mic 6:6 calls Yahweh “God of the heights.” Because this expression is unique, it must be left open as to how far it represents a common Jerusalemite designation for God (cf. Psa 92:9; Josh 2:11, etc.).

Other phrases similarly emphasize God’s universality or his sphere of activity in various ways, e.g., “God of eternity” (Isa 40:28; cf. Gen 31:33; Deut 33:27; → *’ōlām*) or “God of all flesh” (Jer 32:27; cf. Num 16:22; 27:16). The common name “Yahweh (God) Sabaoth” (2 Sam 5:10, etc.; → *šābā’*?, cf. 1 Sam 17:45 “God of the armies of Israel”) is surely an accentuation of Yahweh’s might, although the particulars of its meaning are disputed.

The expression of trust, “God of my salvation” or the like (Psa 18:47; 24:5; 27:9; 65:6; 79:9; 85:5; Isa 17:10; Mic 7:7, etc.), already sounds formulaic, shaped by either experience or expectation; cf. “God of my help” (Psa 51:16; “Yahweh God of my help,” 88:2), “God of faithfulness” (Isa 65:16), etc. Even the name “God of righteousness” (Isa 30:18) can express God’s “grace” or “mercy” (contrast Mal 2:17).

Although adj. modifiers do occur (see III/2), cs. combinations often replace them (e.g., Psa 59:11, 18 “God of my grace” = “my gracious God”). Thus the “living God” reveals himself through his saving intervention (1 Sam 17:26, 36; 2 Kgs 19:4, 16; cf. Dan 6:21, 27) as the “true” God (Jer 10:10; cf. 2 Chron 15:3); he is also able to reverse the misfortune of the individual (Psa 42:3).

5. With the aid of the expression <sup>ע</sup>*lōhîm*, a few texts treat the themes

of God's deity or of his relationship to humanity in a special way. The confession *yhwh hû hā<sup>ʿ</sup>lōhîm* "Yahweh is (the true, only) God" (Deut 4:35, 39; 1 Kgs 8:60; 18:39; cf. Deut 7:9; 10:17; Josh 2:11; Psa 100:3, etc.; as address: 2 Sam 7:28 = 1 Chron 17:26; 2 Kgs 19:15, 19; Neh 9:7) reflects Yahweh's controversy with other gods, even though his exclusive claim to worship has triumphed. As in the statement of incomparability (2 Sam 7:22 = 1 Chron 17:20; Isa 44:6, 8; 45:5, 14, 21; 64:3; cf. 2 Kgs 5:15; Deut 32:39, etc.; cf. C. J. Labuschagne, *Incomparability of Yahweh in the OT* [1966]), the truth of God's deity is bolstered against any doubt; the one circumlocution for the superlative expression "God of gods" (Deut 10:17; Psa 136:2; cf. Dan 2:47) has a similar significance.

The remarkable combination *yhwh ʿlōhîm* also occurs frequently outside Gen 2:4b–3:23 (only *ʿlōhîm*: 3:1b, 3, 5; see Exod 9:30; 2 Sam 7:25; Jonah 4:6; Psa 72:18; 84:12; 1 Chron 17:16f.; cf. 22:1, etc.). If the double name in the J creation and paradise narrative depends on the influence of *ʿlōhîm* in the P creation story, then the other occurrences remain basically inexplicable (more likely to be read as "Yahweh the true God" than as "Yahweh of the gods"); cf. O. H. Steck, *Die Paradieserzählung* (1970), 28n.35.

Like *ʿēl* (see IV/4), if not as poignantly, *ʿlōhîm* can also express the difference between God and human (e.g., Gen 30:2; 45:8; 50:19; 2 Kgs 5:7; Psa 82:6; cf. Job 4:17; Mal 3:8) or God and "not God" (Deut 32:17; 2 Chron 13:9, etc.). Effectiveness is the criterion: The strange gods are "good for nothing" (Jer 2:11 *lō<sup>ʿ</sup>ʿlōhîm*; cf. 5:7; 16:20), a "human product" (2 Kgs 19:18 = Isa 37:19; 2 Chron 32:19; cf. Hos 8:6 and the formulation "to make gods" in Exod 20:23; 32:1; Jer 16:20, etc.). Correspondingly, the denial of God ("there is no God," Psa 10:4; 14:1 = 53:2; cf. 10:13; 36:2) disputes not the existence but the effectiveness of God on earth, just as the question "where is your God?" (Psa 42:4, 11; cf. 79:10; 115:2; Joel 2:17) refers to the appearance of his helping power.

Although the serpent in the paradise narrative promises the couple that they may "be like God" (Gen 3:5; the designation remains ambiguous because of the history of the tradition, which goes back to ancient Near Eastern mythical concepts; cf. Ezek 28:2, 9, 13), God confirms this promise only in the weakened form "be like us" (3:22). Equality with God is recognized only as equality with the heavenly beings. Only the LXX (cf. also at Psa 97:7; 138:1) devalues the "image of God" in this way (W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* [1967], 141). The OT itself does not limit the statement that the human is created "as God's image" (i.e., as God's representation, representative, viceroy) in any perceptible manner (Gen 1:26f.; 5:1; 9:6 P; → *selem*). Yet, in a similar context, Psa 8 compares people with "God" (v 6) and not with "Yahweh" (v

2), and so seems to make use of the difference between the proper name and the generic term in order to protect the peculiarity of Yahweh. Perhaps the previously stated expression, which like other fixed expressions with <sup>e</sup>lōhîm (III/6–7) has the relationship of humans to “God” and not to “Yahweh” in mind, brings about this usage. In any case, this distinction does not apply to the Priestly primeval history because it uses the divine designation <sup>e</sup>lōhîm consistently.

6. Various portions of the OT do not predominantly use the Yahweh name as a divine designation, but <sup>e</sup>lōhîm (with and without art.): in two sources of the Pentateuch, E and P, in the so-called Elohistic Psalter, in Eccl, and, to a degree, in Chronicles (on Job, see II). Thus Israel’s distinctiveness diminishes at times, negatively put, through the use of the general term for “God” and the avoidance of the proper name, but, positively, one may not easily determine a common tendency of the various works of literature, because particular points of reference for the foundation of the usage are lacking. Is God’s universality expressed in this way? Because the individual documents stem from such varied times, there must have also been various occasions and reasons for the usage.

The Elohist apparently did not use the word <sup>e</sup>lōhîm (Gen 20:3, 6, etc.) exclusively, but only predominantly, and occasionally employs the name Yahweh, esp. after the revelation to Moses in Exod 3:14 (cf. H. Seebass, *Der Erzvater Israel* [1966], 56n.4). The attempt has even been made to distinguish two Elohistic layers with this characteristic as a criterion; this alternation is, however, more likely due to the influence of the common mode of expression or, perhaps, to secondary influence of the other documentary sources. One may not interpret the use of <sup>e</sup>lōhîm as a remnant of an old Israelite polytheism (cf. W. Eichrodt, *Die Quellen der Genesis* [1916], 106ff.; E. König, *Die Genesis* [19253], 62ff.). Because the general designation is still preserved, at least as a rule, after Exod 3:14, E has also not sought to differentiate, like P, between individual epochs of revelation. Perhaps E wished to emphasize God’s transcendence (cf. God’s appearances in the dream and through the “angel of God”; see III/7), but in the final analysis, the explanation continues to be based on uncertain suppositions.

In contrast, one may infer that P seeks to acknowledge Israel’s God as the God of humanity, because it uses the appellative <sup>e</sup>lōhîm exclusively (and thereafter in alternation) in the creation and primeval narratives up until the revelation to Abraham in Gen 17:1 (→ <sup>e</sup>l III/1).

In the Elohistic Psalter (Psa 42–83) the phenomenon stands out sharply insofar as the original Yahweh name was replaced secondarily by the general term <sup>e</sup>lōhîm (cf. Psa 53 with Psa 14). Chronicles proceeded similarly, although with far less consequence, in the adoption of texts from the Deuteronomistic history (cf. e.g., “house of God” in 2 Chron 4:11 with 1 Kgs 7:40; see III/6 and M. Rehm, *Textkritische Untersuchungen zu den Parallelstellen der Samuel-Königsbücher und der Chronik* [1937], 108f.; on the frequent names “God of Israel” and “God of the fathers,” see III/4; IV/1). One may presuppose for this late period that the Yahweh name may have

receded because the distinction between proper name and generic term had faded through the confession of Israel's God as the only true Lord of the world. The emergent reluctance to pronounce the name of Yahweh may have contributed to this accentuation of God's transcendence and therewith the distinction between God and people (cf. also the book of Job); nevertheless, 1/2 Chron do not yet avoid it on principle. Finally, it may have been decisive for Qohelet's choice of the divine designation that he was able to emphasize God's omnipotence in view of the vanity of humanity by means of the general term <sup>e</sup>*lōhîm* (usually with art.).

V. On the whole, then, the generic name <sup>e</sup>*lōhîm* aided the Israelites to understand and to proclaim the God of their own history as the God of the world. On the aftereffects of the OT usage in postbibl. Judaism and in the NT, cf. H. Kleinknecht, G. Quell, E. Stauffer, and K. G. Kuhn, "θεός," *TDNT* 3:65–123.

W. H. Schmidt

## לֵיל } <sup>e</sup>*lîl* nothingness

S 457; BDB 47a; *HALOT* 1:55b; *TDOT* 1:285–87; *TWOT* 99a; *NIDOTTE* 496

1. The word <sup>e</sup>*lîl* "nothingness" is attested only in the OT and in literature dependent upon it; it finds its clearest pars. in Akk., Aram., and Arab. adj. formations of the root <sup>e</sup>*lîl* in the meaning "weak," etc. (cf. *HAL* 54a). Wildberger reviews the numerous but unproductive attempts at etymology (*Isa* 1–12, CC, 109; cf. also J. A. Montgomery, *JAOS* 56 [1936]: 442). On the (Aramaizing?) nom. form of the word, cf. Wagner 122.

A noun \**ill* "annihilation" has not been demonstrated in Ug. (*WUS* no. 216; *UT* no. 184; contra *CML* 1 136a; *CML* 2 142; Gray, *Legacy* 60; *KTU* reads *ilm* in 1.5.V.16).

2. <sup>e</sup>*lîl* occurs 20x in the OT, 10x alone in *Isa* (*Isa* 2:8, 18, 20[bis]; 10:10f.; 19:1, 3; 31:7[bis]), 2x in *Lev* (*Lev* 19:4; 26:1) and *Psa* (*Psa* 96:5 = 1 *Chron* 16:26; *Psa* 97:7), 1x each in *Jer* 14:14 Q; *Ezek* 30:13; *Hab* 2:18; *Zech* 11:17; *Job* 13:4. Cf. also *Sir* 11:3; 1QM 14:1 (cf. *Isa* 19:1); 1Q22 1:8.

Textual emendations are suggested for *Isa* 10:10; *Ezek* 30:13; *Zech* 11:17 (cf. commentaries).

3. <sup>e</sup>*lîl* is used uniquely in three texts as the governing noun of a cs. relationship and can be rendered "for nought, insignificant" (*Jer* 14:14 txt

em, “empty divination”; Zech 11:17, “good-for-nothing shepherds”; Job 13:4 “no-account speech”; cf. further Sir 11:3 “the bee is entirely insignificant among flying creatures”).

In the other texts (except for Isa 10:10 txt?), the noun appears in the pl. and is a derogatory designation for foreign gods. Psa 96:5 = 1 Chron 16:26 “all gods are nothing” (cf. also Psa 97:7) shows how this pl. usage developed from the sg. abstract. At any rate, the parody of  $\text{ʔ}^{\text{el}}/\text{ʔ}^{\text{elohim}}$  “God” may play a part in the prophetic literature and in H, which is dependent upon it (Lev 19:4; 26:1).

4. The following is said of the  $\text{ʔ}^{\text{ilim}}$ : They are the product of human hands (Isa 2:8, 20; 31:7; Lev 26:1), and one can therefore discard them (Isa 31:7); they are dumb (Hab 2:18); they quiver before Yahweh (Isa 19:1) and vanish before him (2:18). The expression  $\text{ʔ}^{\text{ilim}}$  recalls, then, the impotence and the insignificance of the strange gods. The force of the term is probably most clearly seen in Psa 96:5: “for all gods of the peoples are nothing, but Yahweh made the heavens.” Wildberger (*Isa 1–12*, CC, 109) has commented on this passage: “The use of this designation in the two God-king-psalms shows that it has its roots in the Jerusalem cult tradition, which is how Isaiah would have come to know it. It is not just by chance that this designation is used elsewhere only in the Holiness Code (Lev. 19:4; 26:1) and Habakkuk (2:18).”

$\text{ʔ}^{\text{ilim}}$  parallels *pesel/pāsîl* “sculpted image” (Isa 10:10; Lev 26:1; Hab 2:18; Psa 97:7), *ʕšabbîm* “carved image” (Isa 10:11), *gillûlîm* “idols” (Ezek 30:13), and *massēkâ* “molten image” (Lev 19:4; Hab 2:18). Eissfeldt (KS [1962], 1:271f.) summarizes the OT designations for “idol” in five groups with Scripture references: (1) derogatory terms: *bōšet* “shame” (→ *bōš*), *šiqquš* “horrible thing,” *tôʕebâ* “abomination” (→ *tʕ*), *ḥaṭṭāʔ* “sin” (→ *ḥṭʔ*), *ʔemâ* “horror”; (2) terms that deny the existence of the gods represented by the idols: → *hebel* “vapor,” *šeqer* “lie” (→ *šqr*), → *šāwʔ* “vanity,”  $\text{ʔ}^{\text{il}}$  “nothing,”  $\text{lō}^{\text{ʔ}}\text{-}^{\text{el}}$  and  $\text{lō}^{\text{ʔ}}\text{-}^{\text{elohim}}$  “not-god” (→  $\text{ʔ}^{\text{el}}$  III/3; →  $\text{ʔ}^{\text{elohim}}$  IV/5); (3) terms that deny idols divine dignity and relegate them to the sphere of the lower, evil spirits: *šʕrîm* “satyrs,” *šēdîm* “demons,” → *ʔāwen* “evil power”; (4) designations that declare them to be foreign and so more or less explicitly describe them as useless: phrases with → *ʔaḥēr* “other”, → *zār* “foreign”, → *nēkār* “strange,” → *ḥādāš* “new”; (5) designations that identify them with their images and so declare them to be lifeless matter: *massēkâ* and *nesek* “molten image,” *pesel* and *pāsîl* “sculpted image,” *ʕšeb* and *ʕšāb* “carved image,” → *šelem* and *semel* “carved image,” *gillûlîm* “(hewn) blocks of stone,” *šîr* “image,” *maškîṭ* “showpiece,” and *nʕšûʔâ* “processional image.”

5. The LXX renders  $\text{ʔ}^{\text{ilim}}$  variously, most frequently with *cheiropoiēta*

“human product” (6x) and *eidōla* “idols” (4x). The NT adopts *eidōlon* as a designation for the pagan gods in the meaning shaped by the LXX and Judaism (cf. F. Büchsel, “εἶδωλον,” *TDNT* 2:375–80).

S. Schwertner

## אלמנָה *ʾalmānā* **widow**

S 490; BDB 48a; *HALOT* 1:58a; *TDOT* 1:287–91; *TWOT* 105; *NIDOTTE* 530

1. *ʾalmānā* “widow” is common Sem. (cf. *GVG* 1:220, 227), with variation of the liquid in Aram. and Arab. (*ʾarmaltā* and *ʾarmalat*, resp., in contrast to Akk. *almattu* < \**almantu*, Ug. *almnt*, Phoen. *ʾlmt*).

The etymology is uncertain; cf. the suggested derivations cataloged in *HAL* 56b.

The abstract formations *ʾalmānūt* “widowhood” (*bidgē ʾalm<sup>c</sup>nūtāh* “her widow’s clothing,” Gen 38:14, 19; on 2 Sam 20:3 and Isa 54:4 see 3b) and *ʾalmōn* “widowhood” (Isa 47:9 par. *š<sup>c</sup>kōl* “childlessness”; see 3b) derive from *ʾalmānā*; cf. Akk. *almānūtu* (*CAD* A/1:362a) and Ug. *ḥt ulmn* “scepter of widowhood” par. *ḥt tkl* “scepter of childlessness” in the hand of the god Mot (*KTU* 1.23.8–9; Gray, *Legacy* 95f.).

2. The 55 occurrences of *ʾalmānā* are distributed as follows: Gen 1x, Exod 2x, Lev 2x, Num 1x, Deut 11x, 2 Sam 1x, 1 Kgs 5x, Isa 5x, Jer 5x, Ezek 6x, (on Ezek 19:7 see Zimmerli, *Ezek*, Herm, 1:389), Zech 1x, Mal 1x, Psa 5x, Job 6x, Lam 2x, Prov 1x. *ʾalmānūt* occurs 4x, *ʾalmōn* and *ʾalmān* 1x each. One-third of the root’s occurrences are in legal texts.

Not included here is the occurrence Mandl. lists in Isa 13:22, where *ʾalm<sup>c</sup>nôtāyw* “his palaces” should be understood as a by-form of *ʾarmōn* (see also Ezek 19:7).

3. (a) *ʾalmānā* should be translated “widow” in all its occurrences; it describes a woman who loses her social and economic support through the death of her husband (to this degree “widow” is not merely a description of the marital status “formerly the wife of the deceased”; cf. L. Köhler, *ZAW* 40 [1922]: 34; van der Leeuw 1:246f.; *CAD* A/1:364). The widow’s lot, in any case, is sorrowful, whether she is childless and returns to her paternal home (Gen 38:11, with the possibility of levirate marriage), or she has children (*ʾiššā ʾalmānā* in 2 Sam 14:5; 1 Kgs 17:9f.; even 1 Kgs 7:14 [mother of Hiram of Tyre] and 11:26 [mother of Jeroboam]) and the father has died

before the birth of the son (cf. the Phoen. Eshmunazar inscription, l. 3 “son of a widow,” *KAI* 2.19, 21f.; *ANET* 662a). The most famous widow story, the book of Ruth, does not use the word “widow.”

As a rule, widows are mentioned in one breath with those who bear a similarly hard lot: orphans (*yātôm*), outcasts (*g<sup>o</sup>rûšâ*), sojourners (*gēr*, → *gûr*), poor (*dal*), destitute (*‘ānî*, → *‘anh* II), childless (*šakkūlâ*), as well as Levites and slaves.

Thus the following nom. series result: widows/orphans (Exod 22:21, 23; Deut 10:18; Isa 9:16); widows/orphans/sojourners/destitute (Zech 7:10; cf. Deut 27:19; Mal 3:5); widow/outcast (Lev 22:13; Num 30:10; Ezek 44:22; cf. Lev 21:14); Levite/sojourner/orphan/widow (Deut 14:29; 26:12f.; similarly Deut 16:11, 14; 24:17, 19–21; Jer 7:6; Ezek 22:7).

The following appear in parallelismus membrorum: orphan-widow (Isa 1:17, 23; Jer 49:11; Psa 68:6; Job 22:9; 24:3; Lam 5:3); poor/destitute-widows/orphans (Isa 10:2, cited in CD 6:16); widow-childless (Isa 47:8, with *‘almōn* in 47:9; Jer 15:8; 18:21). Other pars. include Psa 94:6; 146:9; Job 24:21; 29:13; 31:16.

As a precisely delineated term for a personal circumstance, well adapted for fixed series, *‘almānâ* has no synonym.

(b) *‘almānût* occurs in 2 Sam 20:3 in a fig. meaning “widowhood during the life (of the man)” (or, with textual emendation, “widows of a living man” or “widows for life”) for the concubines isolated following the rebellion of Sheba. In the Elephantine papyrus, Cowley no. 30.20, “our wives have become like widows,” similarly paraphrases the renunciation of marital relations as a mourning rite.

Moreover, a city can be fig. described as a widow: Lam 1:1, “how she has become a widow,” describes Jerusalem after the catastrophe. In Isa 47:8 (oracle against Babylon) the haughty Babylon says: “I do not sit as a widow . . .”; this text, however, announces childlessness and widowhood (*‘almōn*) for this very city. Isa 54:4 uses *‘almānût* for Israel’s widowhood.

4. (a) Within the community in which they live, widows are unprotected, poor, and lonely. Since antiquity, therefore, they stand under the legal protection of Yahweh: in the old curse series of the Shechemite Dodecalogue (Deut 27:19, “cursed be whoever perverts the justice of the sojourner, the orphan, and the widow”), in the Covenant Code (Exod 22:21, “you shall not oppress widows and orphans,” where the legal parenthesis following in v 23 further strengthens the old law through a talion threat: “your wives will become widows”); in the Dtn Code, cf. Deut 24:17.

The following verbs appear in the word field: (1) *nṯh* hi. with obj. *mišpāṭ* “to pervert justice” (Deut 27:19); (2) *‘nh* pi. “to oppress” (Exod 22:23); (3) *ḥbl* “to take as a pledge” (Deut 24:17, clothing; cf. Job 24:3, cow); (4) *šq* “to oppress” (Jer 7:6; Zech

7:10; Mal 3:5); (5) *ynh* hi. “to harass” (Jer 22:3; Ezek 22:7).

Ug. texts also sometimes concern the “justice” due the widow (*dn almnt KTU* 1.16.VI.33, 46; 1.17.V.8; cf. A. van Selms, *Marriage and Family Life in Ugaritic Literature* [1954], 142f.).

A second group of legal texts in Deut regulates the rights of the poor and dispossessed, granting widows (and Levites/sojourners/orphans) particular privileges: they may glean during harvest (Deut 24:19–21); they should also celebrate the Feasts of Weeks and Booths (Deut 16:11, 14); and when the tithe is paid, the widows may eat their fill (Deut 14:29; 26:12f.). Compared with other feast regulations (Exod 23:14ff.; 34:18ff.; Lev 23), this group represents a parenetic legal exegesis peculiar to the Dtn Code.

Three isolated laws shed even more light on the legal status of the widow: a high priest may not marry a widow (Lev 21:14; in contrast to a priest, Lev 21:7). If a priest’s daughter returns childless to her paternal home, she may once again eat of the sacrificial offering (Lev 22:13); cf. further Num 30:10 (concerning a widow’s vow).

To summarize, one could say with Deut 10:18: Yahweh is the God “who creates justice [*‘ōśch mišpāṭ*] for the orphan and the widow”; cf. below on Psa 68:6; 146:9. F. C. Fensham (“Widow, Orphan, and the Poor in Ancient Near Eastern Legal and Wisdom Literature,” *JNES* 21 [1962]: 129–39) and Wildberger (*Isa 1–12*, CC, 50) cite pars. from Israel’s environment.

(b) The principles codified in the various regulations were taken up again in prophecy, in the language of prayer, and in the book of Job.

In prophecy, Isa, Jer, and Ezek in particular return to the old laws for the protection of the widow (surprisingly Amos and Mic use neither this term nor the terms “orphan” and “sojourner”). Prophetic accusations address those who are not concerned for the rights (*→ rīb*) of the widow (Isa 1:23), who oppress orphans and widows (Isa 10:2; Ezek 22:7; Mal 3:5), or who make women widows (Ezek 22:25). Yahweh’s retrospective lament (Jer 15:8) and Jeremiah’s lament (18:21) are just as likely to use the term as is the announcement of judgment (Isa 9:16: Yahweh will not have mercy on the widows). Conversely, the announcement to Babylon in the oracle against the nations in Isa 47:8f. that she will become a widow means salvation for Israel (on Jer 49:11 and Jer 51:5 see Rudolph, *HAT* 12, 288, 306f.; a description of the fate of the tyrant occurs in Job 27:15 too); cf. the limited announcement of salvation in Jer 7:6 (“if you . . . do not oppress the widow”). The old laws are most clearly taken up in the prophetic Torah: Isa 1:17; Jer 22:3; Zech 7:10. Ezekiel (44:22) modifies Lev 21:14 from his perspective.

The language of prayer can praise Yahweh as the judge (*dayyān*) of widows (Psa 68:6; cf. 146:9); meanwhile, the lament about the enemy complains of those who slaughter widows and sojourners (Psa 94:6 with *hrg*), and enunciates the wish that the wives of such evildoers may become widows (109:9; cf. Jer 18:21). Lam laments that even Jerusalem (Lam 1:1) and its mothers (5:3) have become widows.

The book of Job reiterates the language of Psa, e.g., in the lament concerning criminals who oppress widows (Job 24:3, 21; their catastrophe is described in 27:15). The accusation of Job's friends is typical, i.e., that Job may have sent widows away empty-handed (Job 22:9), which Job repudiates in retrospect in the closing lament (Job 29:13; 31:16).

If the legal protection under which widows stand is violated, then the indictment, lament, or even the announcement of judgment is issued, declaring the judgment of God upon the transgressor. Prov 15:25 also expresses this judgment: "Yahweh tears down the house of the proud, but the boundary of the widow he establishes."

5. Qumran (CD 6:16) and esp. the NT continue the traditions outlined above: Mark 12:40, among others. Luke 4:25f. cites 1 Kgs 17, Rev 18:7 cites Isa 47:8f. The warning against "young widows" (1 Tim 5:9ff.) is new.

J. Kühlewein

## 𐤀𐤌 *ʾēm* mother

S 517; BDB 51b; HALOT 1:61a; TWOT 115a; NIDOTTE 562

1. *ʾēm* "mother" derives from the common Sem. \**ʾimm-* (Akk., Ug., and Arab. \**ʾumm-*, under the influence of the labial; cf. GVG 1:199 and → *lēb*). Contrary to earlier etymologies (e.g., F. Delitzsch, *Prolegomena eines neuen hebr.-aram. Wörterbuchs zum AT* [1886], 109), the etymology of L. Köhler (ZAW 55 [1937]: 171) is currently preferred: *ʾēm* is "entirely underivable from the stock of Sem. roots known to us"; → *ʾāb* and *ʾēm* are "gibberish" from children's language (cf. "papa," "mama").

2. The total of 220 occurrences are distributed as follows: Gen 26x, Exod 7x, Lev 15x, Num 2x, Deut 13x, Josh 3x, Judg 20x, 1 Sam 4x, 2 Sam 3x, 1 Kgs 16x, 2 Kgs 22x, Isa 5x (Deutero-Isa 3x, Trito-Isa 1x), Jer 9x, Ezek 10x, Hos 4x, Mic 1x, Zech 2x, Psa 12x, Job 3x, Prov 14x, Ruth 2x, Song Sol 7x, Eccl 1x, Lam 3x, Esth 2x, 1 Chron 2x, and 2 Chron 12x. Four foci result: in the historical books (Gen, Judg, Kgs, incl. esp. reference to the name of the queen mother, 19x in Kgs, 9x in Chron), in legal regulations

(35x), in the language of prayer, and in proverbs.

3. (a) In its basic meaning  $\text{ʔem}$  describes the biological mother of her own children (son/daughter). Thus, a first natural word field within the family is delineated. This intrafamilial relationship is, with few exceptions, expressed by a following gen., or, most frequently, by a poss. suf. Significantly,  $\text{ʔem}$  is attested only 3x with the art. (Deut 22:6[bis], 7), and of 220 occurrences, 189 are suf. forms.

A second, less frequent word field is also established naturally:  $\text{ʔem}$  as the maternal parent corresponds to  $\rightarrow \text{ʔab}$  as the paternal parent.  $\text{ʔab}$  occurs around 70x in the word field, mostly in nom. series ( $\rightarrow \text{ʔab III/1}$ ) with “father” generally in first position, as one might expect in a patriarchal society such as Israel (cf. W. Plautz, “Zur Frage des Mutterrechts im AT,” ZAW 74 [1962]: 9–30).

In its basic meaning,  $\text{ʔem}$  has no synonymous subst.; yet verbal forms of *hrh* “to be pregnant” and *yld* “to bear” occasionally par.  $\text{ʔem}$ : the ptcp. of *hrh* in Hos 2:7; Song Sol 3:4; the form *yōledet* “bearer” in Jer 15:8f.; Prov 23:25; Song Sol 6:9; in Prov 17:25 independently par. to “father”; other verbal forms of *yld* par.  $\text{ʔem}$  in Jer 50:12; Song Sol 8:5.

$\text{ʔem}$  describes the mother animal (cattle, sheep, goats: Exod 22:29; 23:19; 34:26; Lev 22:27; Deut 14:21; birds: Deut 22:6f.).

(b) The term appears in an extensive series of close word combinations to describe kindred relationships (on the substitution of “father and mother” for the term “parents,” which is lacking in the OT,  $\rightarrow \text{ʔab III/1}$ ; the pl. ptcp. *hōray* “who conceived me” in Gen 49:26 is textually uncertain). “Son of my/your/his mother” and “daughter of my/your/his mother” may replace “brother” or “sister,” resp.

Thus “son of my mother” (or pl.) parallels  $\text{ʔah}$  “brother” in Gen 43:29; Deut 13:7; Judg 8:19; Psa 50:20; 69:9; Song Sol 1:6; similarly “daughter of my mother” parallels  $\text{ʔahôt}$  “sister” in Gen 20:12; Lev 18:9; 20:17; Deut 27:22; cf. Ezek 23:2 “daughters of one mother.” The expression describes here the *biological* brother or sister, although  $\text{ʔah}$  and  $\text{ʔahôt}$  can also signify the stepbrother and stepsister, resp. In contrast, “the sons of your mother” in Gen 27:29 (par. “brothers”) indicates a broader kinship.

Additional phrases describing maternal kinship are: “father of your mother” = “grandfather” (Gen 28:2); “brother of your mother” = “uncle” (Gen 28:2; cf. 29:10; Judg 9:1, 3); “sister of your mother” = “aunt” (Lev 18:13; 20:19).

(c) The term  $\text{ʔem}$  is occasionally broadened to describe nonbiological maternity. Hebr. has no term for “grandmother” per se (nor for “grandfather”). Hebr. probably resorts here to the simple  $\text{ʔem}$  (on 1 Kgs

15:10 cf., nevertheless, Noth, BK 9, 335f.; on the position of the *g<sup>e</sup>bîrâ* “queen mother” → *gbr* and 4b). As one may infer from the context (35:16ff.), in Gen 37:10 *ʔēm* refers to Joseph’s stepmother.

“Mother-in-law” (mother of the husband) is represented by the common Sem. designation *ḥāmôt* (Mic 7:6; Ruth 1:14–3:17 10x; fem. of *ḥām* “father-in-law” = father of the husband, Gen 38:13, 25; 1 Sam 4:19, 21); the mother of the wife is called *ḥōtenet* (Deut 27:23; fem. of *ḥōtēn* “father-in-law” = father of the wife, from the perspective of the *ḥātān* “bridegroom,” Exod 3:1; 4:18; 18:1–27, 13x; Num 10:29; Judg 1:16; 4:11, in each case, Moses; Judg 19:4, 7, 9); paraphrased “the woman and her mother” in Lev 20:14.\*

The term is broadened even more in Gen 3:20, where Eve (Hebr. *ḥawwâ*) is described in terms of the etymology of her name as “mother of all the living” (“first mother, founding mother”; on Ezek 16:3, 45, see 4c). The expression “mother earth” does not exist in the OT (cf. A. Dietrich, *Mutter Erde* [19253]; L. Franz, *Die Muttergöttin im vorderen Orient* [1937]; Haussig 1:103ff.).

*ʔēm* has no pl. corresponding to the term *ʔābôt* “fathers, forefathers” and its meaning. Psa 109:14 is typical: “May the guilt of his fathers be remembered, and the sin of his mother never be blotted out.”

(d) Figuratively, the term serves to personify a people or a city.

The following are described as “mother”: the people Israel in Hos 2:4, 7 (*ʔēm* in Hos 4:5 refers less to the people than to the mother of the priest mentioned; cf. Wolff, *Hos*, Herm, 78; contra Rudolph, KAT 13/1, 97, 102) and in Isa 50:1(bis) (Ezek 19:2, 10, Judah or the royal house; cf. Zimmerli, *Ezek*, Herm, 1:393f.), and Babylon in Jer 50:12.

“Mother in Israel” occurs as an honorary title both for the individual Deborah (Judg 5:7; it is admittedly unclear from the context which function earned her this title) and for the city Abel of Beth-maacah (2 Sam 20:19, mother in comparison to the “daughter cities” of the environs? cf. *ʔm* “metropolis” on Phoen. coins, *DISO* 15f.); a fixed expression in Hos 10:14 probably refers to normal mothers with their children (similarly in Gen 32:12); cf. Rudolph, KAT 13/1, 206.

In a similar figurative usage, Job calls the vermin of Sheol “my mother and my sister” in his lament (Job 17:14); only here does he find the familial community disrupted for him in earthly life.

(e) *ʔēm* participates in fixed phrases describing “mother’s womb” and “mother’s breast”: *beʔen ʔimmî* with prep. *be* or *min* “already in/from my mother’s womb” or “since my birth” (Judg 16:17; Psa 22:11; 139:13; Job 1:21; 31:18; Eccl 5:14); *m<sup>e</sup>ʕ ʔimmî* (Isa 49:1; Psa 71:6) and *reḥem ʔimmô* (Num 12:12) “my/his mother’s womb”; “mother’s breast” *š<sup>e</sup>dê ʔimmî* (Psa 22:10; Song Sol 8:1), *ḥêq ʔimmôtām* (Lam 2:12). All these terms could also express the same notion without association with *ʔēm*.

The term is farthest most from its basic meaning in the phrase *ʿēm hadderek* (Ezek 21:26) lit. “mother of the road,” i.e., the place at which a new road is born from the mother-road, a fork in the road (cf. Zimmerli, *Ezek*, Herm, 1:444).

*ʿēm* plays no role as a component of Hebr. PNs.

4. (a) The mother (together with the father) enjoys the particular legal protection of Yahweh:

Father and mother should be honored (*kbd* pi.: Exod 20:12; Deut 5:16), feared (*yrt*? Lev 19:3). Whoever disparages father and mother will be cursed (Deut 27:16); whoever smites them or curses them will be killed (Exod 21:15, 17; Lev 20:9; cf. the law concerning the obstinate son in Deut 21:18–21).

The various regulations of the community reflect the divinely sanctioned social order: that no one engage in marital relations with his mother (Lev 18:7), mother-in-law (Lev 20:14), or aunt (Lev 18:13; 20:19); that a prisoner whom one intends to marry should first mourn her parents for one month (Deut 21:13); that one does not leave without first having once more kissed the parents farewell (1 Kgs 19:20); that one buries father and mother after their death (Lev 21:2; Ezek 44:25; contrast Lev 21:11 for the high priest and Num 6:7 for the Nazirite).

The instruction to honor father and mother also certainly had its place from the outset in wisdom’s family doctrine: Prov 23:22; 30:17. Whoever despises father and mother is “foolish” (Prov 10:1; 15:20; cf. 19:26; 20:20; 28:24; 30:11). The instruction of the children is, as a rule, the obligation of the fathers (Deut 6:20ff., etc.; → *ʿāb* IV/2b), but the mother also gives instruction (Prov 1:8; 6:20; 31:1).

The transgression of these commandments properly elicits prophetic indictment (Ezek 22:7; Mic 7:6).

(b) Compared to the “fathers,” *ʿēm* plays no role in the Deuteronomistic view of history. Nevertheless, four occurrences evaluate a king theologically in accordance with whether he walked in the sinful ways of his parents (1 Kgs 22:53; 2 Kgs 3:2) or of his mother (2 Kgs 9:22; 2 Chron 22:3; cf. Psa 51:7; 109:14). In general, the queen mother seems to have had particular influence on the policy and theological stance of the king: cf. the title “mistress” (*g<sup>e</sup>bîrâ*) in 1 Kgs 15:13; 2 Kgs 10:13; Jer 13:18; 29:2; 2 Chron 15:16; in 22:3 as “counselor”; cf. G. Molin, “Die Stellung der Gebira im Staate Juda,” *TZ* 10 (1954): 161–75; H. Donner, “Art und Herkunft des Amtes der Königinmutter im AT,” *FS Friedrich* 105–45. The status of Bathsheba in Solomon’s court (1 Kgs 1f.) or of Athaliah (1 Kgs 11) is indicative of this influence; the fact that the Deuteronomistic framework of the royal history lists the name of the queen mother almost without exception (1 Kgs 11:26, etc.) is no less indicative.

(c) The prophet Hosea is the first to describe Israel as “mother” (2:4,

7). In a “legal process against an unfaithful wife” (Wolff, *Hos*, Herm, 32), the unfaithful mother is charged with marital infidelity by her husband and the children (v 4) and is described as a harlot in substantiation of the accusation (v 7). The image of marriage, which Hosea adapted from Can. mythology, serves to oppose Israel’s inclination to this cult with its prostitution. The image is taken up in Ezek 16, where the term (vv 3, 45) points to the dark past of the city Jerusalem, while the proverb “like mother, like daughter” (v 44) establishes the connection to the present (cf. also Isa 50:1 and Westermann, *Isa 40–66*, OTL, 223f.). On Ezek 19:2, 10, where Judah or the royal house is described as *ʔēm*, cf. Zimmerli, *Ezek*, Herm, 1:393f.

(d) The phrase “mother’s womb” (see 3e) has a particular place in the language of prayer, primarily in statements of confidence such as Psa 22:10f.: “From the womb onward you are my God”; cf. 71:6; 139:13; Job 31:18. It also occurs in the call of the servant in Isa 49:1 (cf. Judg 16:17 and, without *ʔēm*, Jer 1:5). The reverse of this affirmation appears in the prophetic lament: “Woe is me, mother, that you bore me” (Jer 15:10; 20:14, 17). Finally the phrase continues to occur in the later wisdom literature: Job 1:21, as a statement of confidence; Eccl 5:14, with a strong skeptical undertone.

(e) In contrast to *ʔāb* “father” and *ʔiś* “man,” the term *ʔēm* never directly characterizes Yahweh. Yahweh is a male deity according to OT conceptualization. Only once in post-exilic times is this rule violated, when Yahweh’s salvific activity is compared to the activity of a mother: Isa 66:13 (“as one is comforted by his mother, so I will comfort you”); cf. 49:15 (without *ʔēm*).

5. In the NT, the term becomes meaningful primarily because of the special status of Jesus’ mother; cf., however, Jesus’ word concerning his “true relatives” in Mark 3:31ff. (cf. Deut 33:9).

J. Kühlewein

אָמָה *ʔāmā* **maidservant** → עֶבֶד *ʕebed*

אָמֵן *ʔmn* **firm, secure**

S 539; BDB 52b; HALOT 1:63b; TDOT 1:292–323; TWOT 116; NIDOTTE 586

Contents: Sections I (root and derivatives), II (statistics), and V (post-OT) treat the root as a whole. The major sections III and IV (general and theological usage) will be divided into the following subheadings:

- A.  $\text{ʔmn}$  ni. p. 138
- B.  $\text{ʔmn}$  hi. p. 142
- C.  $\text{ʔāmēn}$  p. 146
- D.  $\text{ʔmûnâ}$  p. 147
- E. *emet* p. 151

I. 1. The root  $\text{ʔmn}$  “to be firm, secure, dependable” is not attested in Akk., Ug., Phoen., or Old Aram., but is common, after the admittedly rare occurrences in Imperial or Biblical Aram., in Aram. and the Ssem. language family. Therefore, comparative linguistics, which must essentially be based upon post-OT materials, offers only limited elucidation for the OT; in addition, one must reckon with a borrowing of the specialized meaning  $\text{ʔmn}$  hi. “to believe” from the Hebr. in Syr. (*LS* 175a), Mand. (*MG* 211), and Arab. (J. Horowitz, *Koranische Untersuchungen* [1926], 55f.).

A relationship to the Eg. *mn* “to be firm, to remain” (Erman-Grapow 2:60ff.) is possible (Calice no. 198; M. Cohen, *Essai comparatif sur le vocabulaire Chamito-Sémitique* [1947], 83).

On the presumably Canaanite *imti* “dependability(?)” in EA 71:8, cf. W. F. Albright, *JNES* 5 (1946): 12n.8; *CAD* E:152b (cj. *em- <qu >-ti-ka?*).

The meaning “truly” for Ug. *imt* in *KTU* 1.5.1.18f. (*CML* 1 102f., 136; *CML* 2 68, 142; M. Dahood, *CBQ* 22 [1960]: 406) has not been established (*WUS* no. 274: “grass, hay[?]”).

The only possibility in Phoen. is the PN  $\text{ʔʔmn}$  on a seal (Harris 77f.). On the Pun. *emanethi* (*Poen.* 937), see Sznycer 92–94.

Two passages in 8th-cent. Yaudi inscriptions (*KAI* no. 214.11; 215.21) are totally obscure (cf. *DISO* 17).

The oldest Aram. occurrence may be  $\text{ʔmyn}$  “firm, lasting” in a papyrus from Saqqara (end of 7th cent.; *KAI* no. 266.3, “firm, as long as the heaven stands”). Cf. further *hymnwth* “his dependability” in the proverbs of Ahiqar (Aḥ. 132; Cowley 217, 224; *AOT* 460; cf. *ANET* 429b: “a man’s charm is his truthfulness”) and  $\text{ʔmhymin}$  “a dependable man” in Hermop. IV:9 (Bresciani-Kamil 398f.; J. T. Milik, *Bib* 48 [1967]: 583).

Later Aram. and Ssem. terms are summarized in *HAL* 61b; *SBL* 185f.

2. Of the verbal forms, the ni. “to be lasting, continue, be dependable, be faithful” and the hi. “to stand fast, trust, have faith, believe” are relatively frequent (see A and B). The qal seems to be represented at least by the

ptcps., yet they stand so isolated in meaning alongside the other derivatives of  $\lambda mn$  that the postulation of a root  $\lambda mn$  II is appealing.

The following derive from this root  $\lambda mn$  II (listed in *HAL* 62b in contrast to KBL 60b):  $\lambda omēn$  “attendant” (Num 11:12; Isa 49:23), “guardian” (2 Kgs 10:1, 5; Esth 2:7);  $\lambda omenet$  “wet nurse” (2 Sam 4:4; Ruth 4:16); pl. pass. ptcp.  $\lambda omûnîm$  “carried, protected” (Lam 4:5);  $\lambda omnâ$  “custody” (Esth 2:20);  $\lambda mn$  ni. “to be carried, tended” (a child, Isa 60:4). The relationship to Akk. *ummānu* (*HAL* 62a; see 5) remains highly questionable. Cf. Š. Porbčan, “La radice  $\lambda mn$  nell’ A.T.,” *RivB* 8 (1960): 324–36; 9 (1961): 173–83, 221–34.

On  $ne^{\lambda}mān$  in Num 12:7; 1 Sam 3:20 and  $\lambda omûnâ$  in 1 Chron 9:22, 26, 31; 2 Chron 31:18, where derivation from  $\lambda mn$  II is possible, see below A.III and D.III.

3. The most important of the nom. derivatives are the two fem. substs.  $\lambda omûnâ$  “firmness, dependability, faithfulness, honesty” or “official duty” (see D) and  $\lambda omet$  “durability, duration, dependability, faithfulness, truth” (see E).  $\lambda omet$  may derive from \* $\lambda amint-$  (BL 608). In this case the word is a fem. subst. from the adj.  $\lambda amēn$  and relates to it as  $\lambda omûnâ$  does to  $\lambda emûn$ . The following should also be noted: the “confirmation formula”  $\lambda amēn$  “surely” (see C); the subst.  $\lambda omen$  “dependability” (Isa 25:1 in the adv. asyndetic combination  $\lambda omûnâ \lambda omen$ ); and the derivative advs. with the ending  $-ām$  (BL 529),  $\lambda omnām$  “surely, really, truly” and the synonymous  $\lambda umnām$  (always with *he* interrogative); the related fem.  $\lambda omnâ$  is also used adv. (on these adv. usages see D). The ni. ptcp.  $ne^{\lambda}mān$  “dependable, faithful” functions widely as an adj., in addition to  $\lambda emûn$ , which occurs as an adj. only in the pl. and as a subst. “faithfulness, dependability” once in the sg. and somewhat more frequently in the pl.  $\lambda omûnîm$  (see A). The subst.  $\lambda amānâ$  “understanding, official agreement” (associated in Neh 10:1 with the verb  $\rightarrow krt$ ) and “ordinance” (Neh 11:23 par. *mišwat hammelek* “royal decree”) appears relatively late.

It is uncertain whether  $\lambda om^{\epsilon}nôt$  (pl.) in 2 Kgs 18:16, normally translated “doorposts” but which may mean the (golden) coating (?) of the doorposts, should be derived from  $\lambda mn$  (cf. *HAL* 63a).

4. A series of PNs are related:  $\lambda amôn$  (2 Kgs 21:18ff., etc.; the [short] form  $\lambda amî$  occurs in Neh 7:59 and Ezra 2:57), apparently a hypocoristic of a theophoric name formation (cf. Phoen.  $\lambda mn$ ; see I/1), or, as with  $\lambda amnôn$  (2 Sam 3:2; 13:1ff., etc.; in 2 Sam 13:20  $\lambda amînôn$  is probably a textual error), a description of a spiritual characteristic (*IP* 228: “dependable, faithful”; somewhat differently, J. Lewy, *HUCA* 18 [1944]: 456; cf.,

however, J.-R. Kupper, *Les nomades* [1957], 71, 76).  $\text{m}^{\text{a}}\text{mittay}$  derives from  $\text{m}^{\text{c}}\text{met}$  (2 Kgs 14:25; Jonah 1:1; according to *IP* 162, a short form; cf. *ḥelqay* alongside *ḥilqîyāhû*).

The name of the river  $\text{m}^{\text{a}}\text{mānā}$ , which flows through Damascus (2 Kgs 5:12 Q; K:  $\text{m}^{\text{a}}\text{bānā}$ ) may also belong to the root  $\text{mn}$ ; it would then describe the dependable, never receding river; cf. *naḥal ʿētān* “constant (i.e., always running) brook” (Deut 21:4; Amos 5:24) and the antonym *ʿakzāb* “deceitful” par. *mayim lōʿne mēnū* “water not trustworthy” (Jer 15:18; cf. Ph. Reymond, *L’eau dans l’AT* [1958], 72, 114).

It is still unclear whether  $\text{m}^{\text{a}}\text{mānā}$  as a name for Anti-Lebanon (Song Sol 4:8) derives from  $\text{mn}$  “to be firm.”

The Eg. god  $\text{āmōn}$  (Jer 46:25;  $nōʿ\text{āmōn}$  = Thebes, Nah 3:8) is not related to this root.

5. Contrary to earlier opinions,  $\text{ommān}$  (Song Sol 7:2) and  $\text{āmōn}$  (Jer 52:15; Prov 8:30) “manual laborer” have nothing to do with the root  $\text{mn}$ , but go back via Akk. *ummānu* “manual laborer, artisan” to Sum. *ummea* (cf. Wagner no. 18a). On Prov 8:30 (not “pampered child, darling,” but “artisan”) cf. Ringgren, *ATD* 16, 40; H. H. Schmid, *Wesen und Geschichte der Weisheit* (1966), 150, both with bibliog.

6. The basic meaning of the root  $\text{mn}$  is disputed. The traditional understanding suggests “to be firm, dependable, certain” (GB 48a; *HAL* 61b; H. Wildberger, “Glauben, Erwägungen zu *hʿmyn*,” *FS Baumgartner* 372–86; also E. Pfeiffer, “Der alttestamentliche Hintergrund der liturgischen Formel ‘Amen,’” *KerD* 4 [1958]: 129–41). Zorell 63b proceeds from  $\text{ōm}^{\text{c}}\text{nōt}$  in 2 Kgs 18:16 (see 3) to the basic meaning “to hold fast,” or from the ptcps. mentioned above (2) to “to bear.” Because it is questionable, however, whether these forms belong to  $\text{mn}$  I, one must set them aside for the determination of the basic meaning. A. Weiser (“πιστεύω,” *TDNT* 6:182–91, 197f.) thinks that the usual translation “firm, certain, dependable” does not exhaust the basic meaning; on close examination,  $\text{mn}$  may prove to be a formal term, whose content is determined differently in each case by the particular subj.; the word may refer to the relationship between reality and the essence of the subj. in question (p. 184). Pořbčan (op. cit. 232f.; see 2) concludes similarly that the basic meaning may be expressed by “as . . . as”; it signifies the “conformitas intellectus et rei.” Despite the sometimes highly differentiated semantic development of individual forms and derivatives, the basic meaning suggested above should be maintained as the common denominator (also in view of the cognates in other Sem. languages). One should nevertheless heed justified objections against an overvaluation of etymological relationships (*SBL* 161–205), esp. for the

root  $\lambda mn$  (against the “formal concept” specifically, see *SBL* 179–81).

Numerous detailed observations indicate that the basic meaning was also still known to the authors of the later layers of the OT. The original meaning is still clearly evident in passages such as Job 39:24 (see B.III/2), and in the Qumran documents the subst.  $ne^{\epsilon}m\bar{a}n\hat{u}t$  “security, guarantee” (CD 7:5; 14:2; 19:1), whose meaning stands quite near the basic meaning, even occurs as a new formation.

7. In many respects  $\rightarrow k\hat{u}n$  is surprisingly close to the root  $\lambda mn$  semantically ( $k\hat{u}n$  ni. “to stand fast, be assured, endure,” with the ptc.  $n\bar{a}k\hat{o}n$  “trustworthy, true” corresponding to  $ne^{\epsilon}m\bar{a}n$ , and  $k\hat{u}n$  hi., which can be used intrans. like  $\lambda mn$  hi.: “to stand unmoved”). Semantically, Akk.  $k\hat{a}nu$  stands even nearer to Hebr.  $\lambda mn$ : G “to endure, be faithful, dependable, true,” Gt “to achieve lasting endurance,” adj.  $k\hat{i}nu$  “lasting, dependable, faithful, honest, true,” subst.  $k\hat{i}n\hat{u}tu$  “faithfulness,” and  $kittu$  “constancy, dependability, reality, authenticity, faithfulness, truthfulness” (*AHW* 438–40, 481f., 494f.). This correspondence indicates that one may indeed speak of a Sem. concept of truth in contrast to the Gk. (H. von Soden, “Was ist Wahrheit?” *Urchristentum und Geschichte* [1951], 1:1–24; W. von Soden, *WO* 4 [1967]: 44; cf. further the bibliog. cited in E.III/8).

II. The distribution of the root  $\lambda mn$  in the Hebr. OT (330x without the PNs) is shown in the following table:

	ni.	hi.	$\lambda\bar{a}m\bar{e}n$	$\lambda^{\epsilon}m\hat{u}n\hat{a}$	$\lambda^{\epsilon}met$	other	total

The ni. ptcp. *ne<sup>c</sup>mān* occurs 32x. Isa 60:4 (see l/2 on *λmn* II) is not included. Hos 12:1 is textually uncertain.

The three occurrences of the Aram. ha. (Dan 2:45; 6:5, 24) should be added to the hi. Judg 11:20 should be read *wayy<sup>c</sup>mā<sup>c</sup>ēn*; Isa 30:21 and Job 39:24 are also disputed textually.

*āmēn āmēn* occurs 5x (Num 5:22; Psa 41:14; 72:19; 89:53; Neh 8:6; in each case in the Psalter as a liturgical conclusion of a collection, for which reason the Syr. version supplies the reduplication in Psa 106:48). The reading in Isa 65:16(bis) is uncertain.

*mūnā* appears once in the pl. (Prov 28:20 *š<sup>c</sup>mūnôt*). The text is uncertain in Isa 33:6; Psa 89:9; 119:90; 143:1; 2 Chron 31:18.

*met* is textually uncertain in Isa 42:3; Ezek 18:9; Psa 54:7; 111:7. *mittô* may be read for *mē<sup>c</sup>itt<sup>c</sup>kā* in Psa 22:26, *met* for *mā<sup>c</sup>tay* in 101:2, *mittekā* for *imrātekā* in 138:2b, and *met<sup>c</sup>sām* for *im-tāsīm* in Isa 53:10 (M. Dahood, CBQ 22 [1960]: 406). The pl. does not exist.

The remaining 28 occurrences of the root are: *ōmen* 1x (Isa 25:1); *ōmnām* 9x (2 Kgs 19:17 = Isa 37:18; Ruth 3:12, and 6x in Job); *umnām* 5x (Gen 18:13; Num 22:37; 1 Kgs 8:27; Psa 58:2; 2 Chron 6:18); *ōmnā* 2x (Gen 20:12; Josh 7:20; on Esth 2:20, see l/2); *ēmūn* 1x (Deut 32:20) and *mūnīm* 7x (adj.: 2 Sam 20:19; Psa 12:2; 31:24; subst.: Isa 26:2; Prov 13:17; 14:5; 20:6); *mānā* 2x (Neh 10:1; 11:23); *ōm<sup>c</sup>nā* 1x (2 Kgs 18:16).

A. *ʔmn* ni.

III. 1. The ni. can unequivocally describe duration, permanence (Isa 33:16, water that does not dry up in summer; cf. Jer 15:18; Deut 28:59, lasting, protracted plagues and illnesses; 1 Sam 25:28 “lasting house” of a dynasty, 1 Sam 2:35 of a priest; see IV/4; 1 Chron 17:24, a name). It also expresses the notion of firmness and, above all, in an ethicoreligious perspective, the element of dependability and faithfulness (Isa 22:23, 25, a “firm place” suited for driving a nail; Gen 42:20, “so that your words may prove dependable”; 1 Sam 22:14, a dependable servant; Prov 25:13, a dependable messenger; 11:13, *neʔman-rûaḥ* “the trustworthy spirit” in contrast to the gossip, who blabs secrets; Job 12:20, *neʔmānîm* “well-proved” as an honorific for officials; cf. vv 17–19 with the par. *ʔētānîm*; also Neh 13:13 and 1 Sam 2:35; Isa 8:2 → *ʕēd neʔmān* “dependable witness”; cf. Jer 42:5 and Psa 89:38 txt?, of Yahweh).

2. Does *ʔmn* ni. also mean “to be true, become true, prove true”? Because the subst. *ʔmet* has assumed the meaning “truth,” at least in late texts (see E.IV/5; on *ʔmûnâ* D.III/6; IV/2), one cannot prematurely exclude a broadening of the verb to include the truth concept, although the LXX, e.g., never uses *alēthēs* to translate *ʔmn* ni. The concept of the lie occasionally appears in the word field of *ʔmn* ni. (*kzb*, etc.; Hos 12:1f. alongside *kaḥaš* “lie” and *mirmâ* “deceit”; Psa 78:36f. alongside *pth* pi. “to delude”; on Jer 15:18 see 4) and in the word field of the adj. *ʔmûn* (Psa 101:6f. *rʕmîyâ* “deceit” and *šʕqārîm* “lies”; 12:2f. *šāwʔ* “falsehood” and *šʕpat ḥʔlāqôṭ* “smooth tongues”). Indeed, these antitheses establish the affinity of *ʔmn* ni. for the truth concept: one may translate “true” in many passages (so ZB in Gen 42:20; 1 Kgs 8:26; 1 Chron 17:23f.; 2 Chron 1:9; 6:17). One must clearly recognize, then, that the concept “truth” should be understood in terms of firmness, dependability, and faithfulness (the same is true of *nākôn* in passages like Psa 5:10; Job 42:7ff.).

3. The adj. *ʔmûn* “dependable, faithful” resembles the ni. ptcp. *neʔmān* in its adj. usage. The rare occurrence of this ptcp. does not mean that faithfulness is unimportant to the OT, but is determined by the Hebrews’ preference for expressing such characteristics by means of the abstract gen. Thus, both *šîr neʔmān* (Prov 25:13) and *šîr ʔmûnîm* (Prov 13:17) occur, *ʕēdîm neʔmānîm* (Isa 8:2), *ʕēd ʔmûnîm* (Prov 14:5), and *ʕēd ʔmet wʕneʔmān* (Jer 42:5), substantivized *neʔmān* (Psa 101:6; Job 12:20), and the phrases *ʔš ʔmûnîm* (Prov 20:6) and *ʔš ʔmet* (Neh 7:2). Both *ʔēl neʔmān* (Deut 7:9; cf. Isa 49:7) and *ʔlōhé ʔmet* (2 Chron 15:3) can also be discussed.

Aram. uses the ha. pass. ptcp. *mʕhēman* “dependable” (Dan 2:45; 6:5; cf. Hermop. 4.9; see I/1) as an adj.

4. Pars. to this usage are: *tāmîm* “unobjectionable, upright” (Psa 19:8; cf. 101:6) and *yāšār* “straight, honest” (Psa 19:8f., 111:7f.). Once <sup>c</sup>*mûnîm* parallels *hāsîd* “pious” (Psa 31:24); <sup>c</sup>*mûnâ* and <sup>c</sup>*met* are often associated with → *hesed*. <sup>mn</sup> ni. is even more closely paralleled by → *kûn* ni. (2 Sam 7:16; Psa 89:38; 1 Chron 17:24, cf. 23; cf. also Psa 78:8, 37).

<sup>mn</sup> ni. has no regular antonym; the negation with *lōʾ* is used (Isa 7:9; Jer 15:18; Psa 78:8, 37; cf. *lōʾ nākôn* Exod 8:22). In a broader sense, several terms express notions contrary to <sup>mn</sup> ni.: → *bgd* “to deal faithlessly” (adj. *bāgôd* “faithless”), → *mʿl* “to act undutifully, be faithless,” → *kzb* pi. “to lie,” and → *pšc* “to rebel.”

5. <sup>mn</sup> ni. is employed unusually in Num 12:7: Moses is “entrusted (*ne<sup>c</sup>mān*) with (the care of) my whole house” (see the christological meditation on this text in Heb 3:1–6). According to 1 Sam 3:20, Samuel is “commissioned” (*ne<sup>c</sup>mān*) as a prophet for Yahweh. One may ask whether <sup>mn</sup> ni. should not be understood in these two passages as a denominative from *ʾōmēn* “guardian” (see I/2): “to be commissioned as guardian, caretaker.”

IV. 1. <sup>mn</sup> ni. has been richly employed in theological statements. Thus Yahweh is “the faithful God” (Deut 7:9; cf. Isa 49:7). One might expect that the expression would occur much more frequently; indeed, it seems wonderfully suited to describe Yahweh’s being. But the OT places no value on cataloging God’s characteristics. It is therefore certainly no accident that the OT uses not the proper adj. *ʾēmûn* to describe God’s faithfulness but the ptcp. *ne<sup>c</sup>mān*, which, taken precisely, means “he who proves himself faithful.” Thus, in Deut 7:9 *hāʾēl hanne<sup>c</sup>mān* is similarly interpreted “he who keeps the covenant and who maintains his grace to those who love him,” and in Isa 49:7 “Yahweh, who is faithful” is par. to “the holy one of Israel, who chose you,” which guards against the misunderstanding that “faithful” describes the divine being. Israel cannot speak of the faithfulness of God unless it speaks of *the* faithfulness, which *manifests* itself now and again in the relationship to his people. One entreats God to *prove* his word to be dependable (1 Kgs 8:26 = 2 Chron 6:17). He has proclaimed to the tribes of Israel a message whose dependability will no doubt come to light (Hos 5:9). The dependability of the proclamation of his will is discussed (Psa 19:8 and 93:5 *ʿēdût* “witness”; 111:7 *piqqûdîm* “commandments”; 1 Chron 17:23 and 2 Chron 1:9 *dābār* “word”). In God’s dealings with Israel, Yahweh’s name proves to be dependable and great (1 Chron 17:24).

2. Proper human behavior involves proving oneself to be dependable, upright, faithful. Through faithfulness one finds one’s proper place in the world order, as well as in the social community. Respect for faithfulness brings life and blessing (cf. Prov 11:13; 25:13). The depth of wisdom’s insight into the circumstances of human community is substantiated by the

fact that its faithfulness is no rigid principle: blows from friends may be more a sign of faithfulness than kisses from enemies (Prov 27:6). The cultically pious individual must maintain faithfulness in relationship to God (Psa 78:8), which means, concretely, faithfulness to covenant (78:37; 89:29). Faithfulness to God must not simply be maintained, therefore, in an inner attitude toward God, but must be realized in the orientation of one's life according to the revelation of God's will. The faithful in the land, over whom God is watchful, are those "who travel the upright paths" (Psa 101:6). The faithfulness of God's people must correspond to the dependability of the revelation of the divine will through respect for the regulations established by God.

3. Because  $\text{ʔmn}$  hi. has assumed the special theological meaning "to believe" (see B), the question arises as to whether  $ne\text{ʔmān}$  or  $\text{ʔmûn}$  can also mean "believing" or "devout." One might indeed think so, e.g., of Psa 101:6, the passage just treated. To prevent misunderstanding, however, one should strictly maintain that according to the context, the faith of these faithful ones must be preserved in a relationship to fellow human beings that corresponds to wisdom ideals. In a similar context, Psa 12:2 discusses the  $\text{ʔmûnîm}$ , and according to 31:24 they are the  $ḥ^a\text{ʔîdîm}$ , whom Yahweh loves (cf. also v 25).  $\text{ʔmûn}$  is apparently on the way to becoming an expression for "devout," just as  $\text{ʔmûnâ}$  tends toward the meaning "faith."

The use of  $\text{ʔmûnê yisrāʔel}$  in 2 Sam 20:19 is peculiar: "one may indeed ask in Abel and Dan whether what 'the faithful of Israel' have prescribed is no longer valid" (txt em; see BH 3). Weiser (*TDNT* 6:190) believes that the expression may have had its setting in the sacral Yahweh confederacy. The passage is too isolated, however, to support such an inference.

4. Of great significance for the history of Israel's faith is the so-called prophecy of Nathan in 2 Sam 7 with the promise: "Your house and your kingdom shall always endure before me" (v 16, which belongs to the fundamental form of the tradition; cf. L. Rost, *Die Überlieferung von der Thronnachfolge Davids* [1926], 47–74 [63]; and A. Weiser, *VT* 16 [1966]: 346ff.; contra M. Tsevat, *HUCA* 34 [1963]: 73; and R. Smend, *FS Baumgartner* 288).

The motif of the continued existence of the kingdom itself belongs to ancient Near Eastern royal ideology. Esarhaddon prays: "May my government stand as firm as the heaven and the earth" (R. Borger, *Die Inschriften Assarhaddons* [1956], 26f.; further examples: *VAB* 4:78f.; *SAHG* 281; G. W. Ahlström, *Psa 89* [1959], 53ff.).

The Davidic kingdom is religiously sanctioned by the prophecy of Nathan. This promise has found a rich echo in the OT (cf. also 2 Sam

23:5). The narrator of 1 Sam 25:28 already permits Abigail to say that Yahweh will grant David a “lasting house,” and in 1 Kgs 11:38 Ahijah promises Jeroboam at Shiloh that Yahweh will build him a “lasting house” like the one he has built for David. The promise seems originally to have been unconditional. But the narrator already knows the fate of the dynasty of Jeroboam and has placed the promise under the requirement of obedience (cf. also 2 Sam 7:14f.). The formulation in Isa 7:9 is similar: “If you do not believe, you will not remain.” The prophet undoubtedly alludes to Nathan’s prophecy with the verb *ʾmn* ni. (E. Würthwein, FS Heim 61; Wildberger, *Isa 1–12*, CC, 89f.). But, in view of the faithless behavior of the king, the prophet transforms the tradition’s promise into a warning by placing it under the condition of faith.

Nabopolassar formulates a statement in one of his inscriptions with a similar play on words (verb *kānu*; see I/7): “Whoever is faithful to Bel, his ground stands firm” (*VAB* 4:68f.).

The author of Psa 89 seems to have raised questions about the prophecy of Nathan in view of the actual course of history. But he does not abandon it: “I will maintain my grace for him forever and my covenant with him shall remain firm” (v 29; cf. v 38). Here, then, the psalmist no longer treats the duration of the house of David but grace (*hesed*) and the covenant (cf. also 2 Sam 7:28 and Psa 132:12; A. Caquot, “La prophétie de Nathan et ses échos lyriques,” *SVT* 9 [1963]: 213–24).

Even after the fall of the Davidides, Israel does not abandon the promise. In the (Dtr) dedicatory prayer for the temple, Solomon prays for the actualization of the promise to David (1 Kgs 8:26). The Deuteronomist seems to have hoped for the reestablishment of Davidic dominion (G. von Rad, *Studies in Deut* [1953], 86ff. = *PHOE* 216ff.). For Deutero-Isaiah, the dynasty no longer has a future. Nevertheless, for him the promise to David is still valid, as surely as Yahweh is *neʿmān* (Isa 49:7). So, then, he interprets *neʿmān* in terms of the dependability of divine grace for *Israel* (55:3). With the Chronicler, however, the hope for the Davidides has returned (1 Chron 17:23f.; 2 Chron 1:9; 6:17; cf. von Rad, op. cit. 84–91 = *PHOE* 214–21).

Nathan’s prophecy found an even more radical reinterpretation in 1 Sam 2:35: Now a *kōhēn neʿmān* “a dependable priest” is addressed, who will act according to Yahweh’s intention (on the age of the passage cf. M. Tsevat, *HUCA* 32 [1961]: 195).

In CD 3:19 the expression *bayit neʿmān* is further developed in a manner characteristic for Qumran. “He built them a lasting house in Israel . . . , those who hold fast to it are (destined) for eternal life.” Here, the “lasting house” (like “house of truth” in 1QS 5:6 and “house of the law” in CD 20:10, 13) has become the community’s self-

designation.

The *ne<sup>c</sup>mān* of the Davidic promise has become, then, an axiom of the messianic expectation (von Rad, *Theol.* 1:351); on another plane, however, it expresses the certainty of Israel's election and therefore persists with astonishing tenacity throughout all phases of the history of Israel. Both cases are impressive witnesses of Israel's knowledge of the faithfulness of its God.

5. Neh 9:8 refers to Gen 15:6: "You have found his (Abraham's) heart faithful to you and have made a covenant with him" (cf. Weiser, *TDNT* 6:185f.). Abraham's faith is interpreted here as the faithfulness of his attitude toward God. Thus the sense of the Gen passage (see B.IV/2) has certainly been significantly altered.

6. Finally, one should note Isa 1:21, 26, where the propriety of the honorific *qiryâ ne<sup>c</sup>mānâ* "faithful city" is denied Jerusalem for the present but is promised for the future. Not otherwise applied to Jerusalem, *ne<sup>c</sup>mān* seems here to replace the *nākôn* (ptcp. of → *kûn* ni. "to be firm") offered by the tradition (Psa 48:9; 87:5; cf. also Isa 2:2). Isaiah chose the par. term *ne<sup>c</sup>mān* because he was concerned not with the stability of the city of God in the sense of its invincibility, as in the Zion tradition, but with the faithfulness of its inhabitants. In this respect, the par. expression *ʿîr haṣṣedeq* "city of the righteous" indicates his understanding of faithfulness. In this way, with the aid of *ne<sup>c</sup>mān*, an essential motif of the Zion tradition is actualized (see Wildberger, *Isa 1–12*, CC, 62ff.).

## B. *ʔmn* hi.

III. 1. *ʔmn* hi. has often been investigated on account of its theological relevance in the meaning "to have faith, trust (in), believe":

See L. Bach, "Der Glaube nach der Anschauung des AT," *BFCT* 4 (1900): 1–96 (still definitive); A. Weiser, "Glauben im AT," FS Beer 88–99; J. C. C. van Dorssen, *De derivata van de stam ʔmn in het Hebreeuwsch van het Oude Testament* (1951); Th. C. Vriezen, *Geloven en Vertrouwen* (1957); E. Pfeiffer, "Glaube im AT," *ZAW* 71 (1959): 151–64; A. Weiser, "πιστεύω," *TDNT* 6:182–91; *SBL* 164–206; R. Smend, "Zur Geschichte von *hʔmyn*," FS Baumgartner 284–90; H. Wildberger, "'Glauben': Erwägungen zu *hʔmyn*," *ibid.* 372–86 (bibliog.); *id.*, "'Glauben' im AT," *ZTK* 65 (1968): 129–59 (bibliog.).

2. *ʔmn* hi. is an intrans. or inner-trans. hi. (cf. *HP* 43ff., 250ff.), if it is not a so-called pseudo-hi. (cf. Wildberger, FS Baumgartner 384f.n.2). *ʔmn* hi. is constructed uniquely with the acc. in Judg 11:20 (but see II on the text), so that the declarative-estimative understanding (E. Pfeiffer, *op. cit.* 152) is untenable.

The original, concrete-physical meaning "to stand fast, hold still" (of the war horse) is still present in Job 39:24. The psychological meaning "to

have trust, be dependable” is much more frequent: in the profane arena in Hab 1:5 and Job 29:24 (on the understanding of these passages cf. Wildberger, FS Baumgartner 376f.), but also in the cultic language of the Psalms (27:13 and 116:10). As in these passages, *ʔmn* hi. abs. is also used in Isa 7:9 and 28:16 (in total 7x).

3. The same meaning is present in the construction with *be* (17x with persons, 7x impersonal): in the profane arena in Job 24:22, “he rises up when he no longer trusts in his life” (ZB “when he doubts life”); see also Deut 28:66 and Job 15:31 (cf. Wildberger, FS Baumgartner 379). For *h<sup>e</sup>ʔemîn b<sup>e</sup>* in theological contexts, see Gen 15:6 and Exod 14:31 (see IV/2, 6).

4. Cases of *ʔmn* hi. with *le*, e.g., Gen 45:26, “then his heart remained cold, for he did not believe them,” have different characteristics. One may also not assume an estimative basic meaning for this usage (“to consider some one trustworthy”). The intention is: “to achieve trust with respect to” a person (7x) or thing (7x). The interest of the narrator lies with the subject of the act of trust, not with the personal or impersonal object of trust. Thus Exod 4:9 does not mean: “if you do not believe these two signs,” but “if you do not exercise faith in these two signs” (see ZB). Only in a few passages does *he<sup>e</sup>mîn l<sup>e</sup>* mean “to consider true” (1 Kgs 10:7; Isa 53:1). The same development, i.e., the shift of interest from the subject of belief or of trust to the circumstances to be believed, exists when a phrase is appended with *kî* “that” (Exod 4:5; Job 9:16; Lam 4:12) or an inf. construction follows (Job 15:22; cf. also Psa 27:13).

5. Numerous terms are near or approximate pars. to *ʔmn* hi. in the OT.

The cultic song Psa 27 has → *h̄zq*, → *bṯḥ, lōʔ* → *yrʔ*, → *qwh* pi., and → *ʔmš* pi. *lēb* (cf. also Psa 31:25 and Isa 28:15b, 17b). Instead of saying that he believes, the supplicant can confess that Yahweh is his protection, shield, refuge, rock, and fortress (Psa 27:5). In Isa 7:9 the impvs. “do not be afraid and do not be alarmed” (lit. “do not let your heart become soft”) appear in the context of the admonition to faith (v 4). In Isa 30:15 “believe” is paraphrased with “rest, quietness, trust” (see Wildberger, ZTK 65 [1968]: 151f.).

It is characteristic of the subtlety of the term *ʔmn* hi., however, that an entirely different group of par. and contrasting terms appear in other contexts (in fact, for the most part in passages where the verb is constructed with *le*): → *šm<sup>c</sup>* “to give heed (to someone’s voice)” (Exod 4:1–9; Deut 9:23) and → *mrh* hi. “to be rebellious” (Deut 9:23), “to be stiff-necked” (2 Kgs 17:14). The grounds for unbelief in these contexts is not a lack of trust, human failure, skepticism, or doubt of God and his word, but disobedience, opposition, rebellion.

As important as *ʔmn* hi. is in the OT, one must remember that the

*object* of faith is by no means discussed only in the relatively few passages with  $\lambda mn$  hi. The most important par. term, at least in the religious domain, is  $\rightarrow b\dot{t}h$  “to trust” (57x in a religious meaning, 37x in Psa). Where we would speak of “believing,” the OT can also use the verbs  $\rightarrow yr^{\text{c}}$  “to fear,”  $\rightarrow yd^{\text{c}}$  “to recognize,” and  $\rightarrow dr\check{s}$  “to seek,” or  $\rightarrow yhl$  “to await” and  $hkh$  pi. “to hope” ( $\rightarrow qwh$ ). “The OT . . . addresses what we mean by faith through a multitude of expressions, by whose combined force the thing becomes transparent” (F. Baumgärtel, *RGG* 2:1588; cf. also C. Westermann, *Blessing in the Bible and the Life of the Church* [1978], 11f.).

IV. 1. According to Bach, of 51 passages with  $\lambda mn$  hi., 33 may be classified as “sacred diction” (op. cit. 30f., with tables). The term has become so significant in its theological usage not because of the number but because of the significance of the passages in which it occurs. In addition, the LXX evidently paid it particular attention: it always translates (with the exception of Prov 26:25 *peithomai*) with *pisteuō* and its compounds, and it always reserves *pisteuō* (except Jer 25:8 for  $\check{s}m^{\text{c}}$  “to hear”) for forms of  $\lambda mn$ .

2. The profane meaning of  $\lambda mn$  hi. *le* “to believe (a person or a thing),” which passages such as Gen 45:26 (J) and 1 Kgs 10:7 (cf. also Jer 40:14) suggest was already common very early and was also used in wisdom instruction (Prov 14:15; cf. 26:25), was not sustained in ancient times (on the age of passages such as Exod 4:1, 5, 8f. and 19:9, cf. Smend, op. cit. 289).

In contrast,  $\lambda mn$  hi. already seems to have had its *Sitz im Leben* very early on in the salvation oracle, esp. when directed to army commanders. This genre is common in the ancient Near East: even outside Israel it exhibits concepts semantically related to  $\lambda mn$  hi., e.g., “[do not be afraid Esarha]ddon, [I am Ishtar of Arbe]la . . . have confidence (*tazzazma*; cf. *AHw* 410a). . . . Praise me” (*ANET* 450b = IV:rev. 61, col. vi.1f., 12f.; for further examples see Wildberger, *ZTK* 135f.). Gen 15:1–6 is patterned after such an oracle (for an analysis cf., among others, O. Kaiser, *ZAW* 70 [1958]: 107–26; H. Cazelles, *RB* 69 [1962]: 321–49; Wildberger, *ZTK* 142–47). Admittedly, the call to faith itself has not been transmitted; in its place, however, is the concluding report that Abraham believed in Yahweh on the basis of the promise communicated to him and that God reckoned this belief to him as righteousness. Abraham’s faith is without doubt understood in response to the admonition of v 1 “do not fear,” associated with the promise of great reward, so that  $hc^{\text{e}}m\hat{m}n b^{\text{e}}yhwh$  in this context may intend to convey: “he was full of confidence and trust, well founded in Yahweh.”

An imitation of such an oracle to a king also occurs in Isa 7:4–9.

Isaiah responds to the king's despondency with the cry "do not fear" (v 4), which he repeats at the end of the oracle with the demand to keep faith. In contrast to Gen 15:6, *ʔmn* hi. abs. is used here, certainly by intention. Ahaz's belief in Yahweh is not in question—he was surely no idolater or atheist—nor even his confidence in the prophetic word; rather, the weight of the cry lies solely on the fact that in the threatening situation he should prove himself a man who maintains calm, trust, confidence. Faith is expected of Ahaz because, after all, the promise of continuing existence stands over the house of David (see A.IV/4).

Further examples indicate that *ʔmn* hi. was used in the context of such war oracles, i.e., Exod 4:31 and Deut 1:32 (cf. Wildberger, *ZTK* 134).

It seems that even the salvation oracle, the response in the sanctuary to the individual's lament, includes an admonition to faith. In any case, the supplicant can assert in the lament that he believes, or testify in the song of thanksgiving that even in deep distress he has not abandoned faith (Psa 27:13; 116:10). Pious persons resist external threat and internal opposition with their faith. The salvation oracle in Hab 2:2–4, with the rich conclusion "the righteous will have life on the basis of faith," offers indirect testimony to this usage of *ʔmn* hi. The oracle answers the complaint of 1:12–17; like Isa 7:4ff., it is pronounced in a situation of serious political threat. If *ʔmn* hi. is translated in Isa 7 with "to believe," then *ʔmûnâ* should be rendered with "faith" in this context so similar in terms of situation and genre (so Rom 1:17; cf. van Dorssen, op. cit. 121, 129; Eichrodt 2:284f.).

Both Gen 15:6 and Hab 2:4b, which became so important for the development of the NT concept of faith, relate faith to righteousness. G. von Rad ("Faith Reckoned as Righteousness," *PHOE* 125–30) has called attention to the fact that the cultic term  $\rightarrow$  *ḥšb* "to reckon" describes a sovereign priestly-judicial act in the context of the approval of sacrifices and does not mean the calculation of payment in a commercial context. The pronouncement of *ʔdāqâ* for Abraham recognizes his faith as the behavior appropriate for the human being before God. His faith reveals that his attitude toward God is as it should be. Faith is in no way meritorious; the promise of reward is unconditional and precedes the determination of Abraham's righteousness. The formulation of Hab 2:4b should, however, be understood in terms of the declarative formula encountered in Ezek: "righteous is he, he shall surely live" (18:9; cf. von Rad, op. cit.; and W. Zimmerli, "'Leben' und 'Tod' im Buch des Propheten Ezechiel," *TZ* 13 [1957]: 494–508 = *GO* 178–91). Although according to the Ezek passage the fulfillment of some cultic-ethical requirements characterizes the righteousness that leads to life, according to Habakkuk it is faith on which the promise of life can shine.

3. The occurrences of *ʔmn* hi. examined above belong form critically

to similar contexts in which faith is understood as the maintenance of dependent trust grounded in the knowledge of God and his promise. Isa 28:16 “the one who believes will not waver” (on the translation cf. HAL 288a) fits in here well but also leads further. Isaiah addresses himself to representatives of Jerusalem cultic theology who consider themselves safe in the protection of the temple. He contrasts their complacency with true faith, which has justice as its measuring line and righteousness as its scale. It becomes clear here why the prophets make such little use of the notion of faith. For them, it is suspect because it can so easily become a pious substitute for authentic devotion to Yahweh in the service of righteousness. They protest against the “careless in Zion, the complacent ( $\rightarrow b\dot{t}h$ ) on the mountains of Samaria” (Amos 6:1; cf. Isa 32:9, 11; Jer 7:4). Where they summarize their demands of Yahweh’s people, they do not therefore require trust or faith but obedience: seek Yahweh! (Amos 5:14; Hos 10:12; Isa 9:12; 31:1; Jer 10:21; 30:14; cf. also Psa 24:6).

4. An essentially different aspect of the theological usage of  $\lambda mn$  hi. is present in six passages in Exod 4:1–9, 31a. This difference is already evident formally in that the verb is constructed here with *le*. As in Exod 19:9, the concern is whether Moses will gain the people’s trust. When a par. expression is used,  $\check{s}m^c b^c$  or  $\check{s}m^c b^c q\ddot{o}l$  appears (vv 1, 9; cf.  $\check{s}m^c$  in v 8). This aspect of the faith concept has truly become theologically relevant for the Deuteronomistic historian: Deut 9:23, “There you were rebellious against the commandment of your God and you did not believe him and did not give heed to his voice”; similarly 2 Kgs 17:14, “They did not obey, but were stiff-necked like their fathers, who did not believe Yahweh their God.” The latter passage belongs to Dtr’s basic reflection concerning the fall of Israel. The cause is Israel’s unbelief as rebellion against God—not just a momentary failure, but Israel’s original sin, its murmuring as early as the wilderness wandering period.

5. Neither Isaiah nor Dtr have found much acceptance for their faith concepts in the rest of the OT. Deutero-Isaiah uses  $\lambda mn$  hi. in a fictive legal speech. Israel should witness for Yahweh in order that the peoples “may gain understanding, believe in him, and come to the awareness that it is he,” namely the true God, beside whom there is no helper (Isa 43:10). Surprisingly, entirely different par. terms appear here:  $\rightarrow yd^c$  and  $\rightarrow b\dot{h}n$  hi. Belief includes a particular knowledge, namely that Yahweh and no other God is lord of history. Belief here means: to know and acknowledge a truth of faith as such (cf.  $^xmet$  in v 9).

6. One observes another variation of the faith concept in Psa 78, which already betrays Dtr influence. V 4 reads: “They did not believe in God and did not trust in his help.” V 32 indicates how this statement is to be understood: “In all this, they did not have faith in his wonders.” This phrase apparently alludes to Num 14:11: “How long will you not believe *in me* despite all the signs that I have done in your midst?” Belief in God has become an acknowledgment of his wonders.

One can observe a similar reconceptualization of faith in Psa 106, which already

presupposes the final form of the Pentateuch; see v 12: “Then they believed *in his words* and sang his praise.” The allusion is to Exod 14:31. Although the earlier text discusses faith in Yahweh (“and his servant” may be secondary), the Psa treats faith in his words. Similarly, 2 Chron 20:20 alludes to Isa 7:9 (Wildberger, *ZTK* 131f.). The profane usage of *ʾmn* hi., already encountered in 1 Kgs 10:7, has also become theologically relevant, then, in reflection upon the old texts.

7. A final variation occurs in Psa 119:66 “I believe in your commandments.” “Commandments” here seems simply to replace “words.” But according to the general tenor of the psalm, this verse means: to be of the conviction that the observance of the commandments offers rich blessing.

8. This overview leads to the conclusion that the theological usage of *ʾmn* hi. is in no way uniform, a conclusion grounded in the fact that the verb, although rather infrequent, is nevertheless at home in various traditions and in the fact that its usage undergoes transformation in the course of the history of Israelite religion.

### C. *ʾāmēn*

III. The word *ʾāmēn* occurs in the OT exclusively in theological contexts (cf. A. R. Hulst, “Het woord ‘Amen’ in het O.T.,” *Kerk en Eeredienst* 8 [1953]: 50–58; E. Pfeiffer, “Der atl. Hintergrund der liturgischen Formel ‘Amen,’” *KerD* 4 [1958]: 129–41; S. Talmon, “*Amen* as an Introductory Oath Formula,” *Textus* 7 [1969]: 124–29). Nonetheless, the word also no doubt belonged to everyday language (Lande 112). Sir 7:22 still knows the original meaning “dependable” (of animals; LXX *chrēsimos*).

In the inscription on an ostrakon from Yavneh-yam, a farm worker asserts in a letter of complaint to an official: *ʾmn nqty* “truly, I am innocent,” calling on his comrades as witnesses (*KAI* no. 200.11; the reading is disputed; cf. W. F. Albright, *BASOR* 165 [1962]: 45n.49; *KAI* 2:201; Talmon, *op. cit.* 127).

The LXX translates once each with *alēthōs* (Jer 28[LXX 35]:6) and *alēthinos* (Isa 65:16). Three times it simply transliterates the word, without translating it (Neh 5:13; 8:6; 1 Chron 16:36). In the other passages it translates *genoito* “so be it.” The juss. sense is clearly apparent in passages such as Jer 28:6: “Amen, may Yahweh . . . fulfill your words” (Zorell 64 thinks that “is” should perhaps be supplied). In some cases, *ʾāmēn* does actually mean “it stands firm and is valid” (see H. Schlier, *TDNT* 1:335f.). Aquila’s rendering with *pepistōmenōs* (Psa 89 [LXX 88]:53) indicates this aspect. These various possibilities of usage are based in the dialectic of the term. *ʾāmēn* intends to indicate that something which has been said stands firm, is “true.” But at the same time this truth is recognized as “valid” and therefore also as obligatory for the speaker of the Amen.

IV. 1. *ʾāmēn* is most frequently used in answer to a pronounced curse, e.g., in the series of curses in Deut 27:15–26 (12x). In such contexts one translates “so be it.” This *ʾāmēn* does not simply contain a wish. The Israelite concept of curse (and blessing) is still deeply rooted in magical thought (cf. J. Hempel, *Apoxysmata* [1961], 30–113). Because curses have their own power, as a rule they cover crimes that take place in private and thus beyond the scope of human retribution. Whoever pronounces the Amen to them acknowledges awareness of the sentence for the pertinent activities. Thus the speaker judges his/her own guilt in the event such a crime is committed. At the same time the Amen has an apotropaic character (cf. Hempel, *op. cit.* 103); if spoken by an innocent individual, the curse is diverted to a guilty individual. Whoever does not agree in the Amen against the evildoer is as subject to the curse as the evildoer, because he/she has not denied solidarity with the criminal (cf. *Jub.* 4:5).

Curses are pronounced in oath-taking ceremonies in case someone swears a false oath. Whoever has subjected him- or herself to the ordeal must also say the Amen. This pronouncement also occurs when a covenant is made, because one must swear to a covenant; here, too, the pronouncement of curses in the event of the violation of covenant is an element (Jer 11:1–8; cf. v 5). Regarding the blessings and curses within the covenant tradition (Lev 26; Deut 28), one must therefore think of the *ʾāmēn* of the people as that spoken by the covenant partners. The same is true of Nehemiah’s agreement with the leadership (Neh 5:1–13), where the shaking out of the fold of the garment by the official symbolizes the imprecation, here no longer described as a curse (v 13). In Jer 15:11 (txt em) the Amen of the prophet confirms the woe that he has voiced for his mother and thus for himself. Such woes doubtlessly go back form critically to curses (cf. *BFPS* 194ff.).

2. Basically, the complaint of the farm worker in the ostrakon from Yavneh-yam is no different: The Amen implies an oath with a corresponding self-imprecation. But the passage indicates how formal language can be devalued, in that the man beseeches the official, in the event that he is found guilty, to give precedence to grace over justice. The Amen here has become a simple particle of assertion.

OT passages also give evidence of a general usage. Thus Benaiah affirms David’s word (that Solomon is to be enthroned as his successor) with his Amen in 1 Kgs 1:36. It is clear here that Benaiah also engages himself with his Amen, despite the addition of “may Yahweh do so” (txt em); he commits himself to his role in the execution of the royal decision. Amen is an obligating yes; cf. Neh 8:6.

3. A special usage of the Amen occurs in the (doubtlessly late) doxologies at the conclusion of the divisions of the Psa (Psa 41:14; 72:19; 89:53; 106:48, in each case *ʾāmēn ʾāmēn* ). 1 Chron 16:36 indicates how this Amen should be understood. It is

responsive in character; through it the celebrating community identifies itself with the prayer leader when he has spoken praise. The repetition of the term underscores that one agrees sincerely and joyously. How this new usage came about can still be easily recognized in Neh 8:6. The chapter reports the introduction of the new law. According to the rules of the genre, the people must obligate itself to the law or affirm the curses associated with it through the Amen. But the function of the Amen is new. Tob 8:8 indicates that one can also identify oneself with the word of another in daily life through the Amen.

4. Isa 65:16 requires particular mention: Whoever blesses oneself and, likewise, whoever swears should do so *bēʾlōhē ʾāmēn*. If one accepts the text, then one must interpret, e.g., with Delitzsch, according to 2 Cor 1:20 (cf. also Acts 3:14): “the God of Amen, i.e., the God who turns what He promises into Yea and Amen” (KD, *Isa* 2:487; cf. comms.). *ʾāmēn* may be substantivized here, so that one may translate “God of dependability.” The emendation of *ʾāmēn* into the subst. *ʾōmēn* is, however, more likely; cf. *ʾēl neʾmān* (Deut 7:9; Isa 49:7) and *ʾēl ʾemet* (Psa 31:6).

#### D. *ʾemûnâ* (*ʾēmûn*, *ʾomnām*, etc.)

III. 1. According to *HAL* 60f., the chief meanings of *ʾemûnâ* are: (a) “firmness,” (b) “dependability, faithfulness,” (c) “honesty”; to which may be added the special meaning (d) “permanent official duty.” Individual nuances are difficult to differentiate; this difficulty is indicated by the fact that other lexicographers classify differently, e.g., Zorell 62f.: (a) *firmitas*, *immobilis stabilitas*, (b) *firmitas ethica personae*, i.e., *fidelitas* (of God and humans). Pořbčan (op. cit. 230) believes that the richness and diversity of the meanings of *ʾemûnâ* do not permit its derivation from the basic meaning “firmness”; he considers the primary meaning to be “truth” (op. cit. 221). Yet the root’s basic meaning “firmness” may also be recognized in this substantive, and it is advisable to proceed from this basic meaning for the subst.

2. One of the most ancient occurrences is Exod 17:12 (J or N): “his (Moses’) hands remained firm (*ʾemûnâ*) until the sun went down.” This translation (contra Pořbčan, op. cit. 228f.: “raised in the same position”) is supported by the preceding phrase “they supported his arms.”

The meaning “security,” still close to “firmness,” is present in Isa 33:6 (if the text is retained): “will be the security of your times” (cf. H. Gunkel, *ZAW* 42 [1924]: 178).

3. A special meaning “fixed office” or the like seems to occur in 1 Chron 9:22, 26, 31 and 2 Chron 31:18 (here the text is uncertain; cf. Rudolph, *HAT* 21, 306), although Rudolph (op. cit. 88) translates “dependability” or “durability” (cf. also K. H. Fahlgren, *Sedākā, nahestehende und entgegengesetzte Begriffe im AT* [1932], 145; H. Cazelles, *La Sainte Bible de Jérusalem*, see 2 Chron 31:18). It is not surprising that, on the basis of the fundamental meaning “firm, certain,” *ʾemûnâ* has become a technical term for “fixed position, lasting office.” It is also possible, nevertheless, that *ʾemûnâ* in this meaning

does not even belong to  $\gamma mn$  I but is a derivative of  $\gamma m\bar{e}n$  “guardian” and thus means something like “guardianship” (cf. Num 12:7 and I/2).

4. The meaning “firmness” (in a fig. sense), thus “dependability, faithfulness,” corresponding to the ni. of the verb, is most frequent (cf. e.g., 1 Sam 26:23; Isa 11:5; Psa 119:30; also 1QpHab 8:2; moreover, Prov 28:20  $\gamma\bar{s}$   $\gamma^e m\bar{u}n\hat{o}t$ ). Appropriately,  $\rightarrow \text{hesed}$  often appears as a par. term (as well as  $\text{ṣ}^e d\bar{a}q\hat{a}$  and  $\text{ṣ}e d\bar{e}q$ ,  $\rightarrow \text{ṣ}dq$ ).

5. Quite often  $\text{ṣ}e q\bar{e}r$  “deceit” appears as an antonym of  $\gamma^e m\bar{u}n\hat{a}$ , indicating that  $\gamma^e m\bar{u}n\hat{a}$  must involve the realm we designate as “truthfulness, honesty.” One often wonders, however, whether “faithfulness” would be a better translation.

The notion of honesty appears most clearly in a few Jer passages: Jer 5:1 “one who pursues uprightness” (according to M. Klopfenstein, *Die Lüge nach dem AT* [1964], 32f.: “faithfulness”; cf., however, the par. “who practices justice,” and in v 2 “they swear falsely”; also 5:5; Isa 59:4; on  $\rightarrow \text{ṣ}h$  “to exercise, execute” in such contexts, see R. Bultmann, *ZNW* 27 [1928]: 122f. = *Exegetica* [1967]: 133f.); in Jer 7:28 the prophet complains that  $\gamma^e m\bar{u}n\hat{a}$  has disappeared from the mouth of the people; 9:2 is very clear, “They bend their tongue like a bow; deceit, not truthfulness (cf. *BHS*), controls the land” (LXX *pistis*; Klopfenstein, op. cit. 145: “faithfulness,” with reference to covenant or marital fidelity; since, however, the first half of the verse mentions the bending of the tongue, “dishonesty” must be intended).

6. In his complaints concerning the lack of honesty, Jeremiah uses concepts that are important to wisdom. The parallelism of the concepts in Prov 12:22, “deceitful lips are an outrage to Yahweh; but those who pursue uprightness are well-pleasing to him,” is particularly significant (cf. e.g., the “conversation of the one weary of life with his Ba,” H. H. Schmid, *Wesen und Geschichte der Weisheit* [1966], 214; also called “Dispute over Suicide,” *ANET* 405ff.). Yet some passages in Prov convey even more, e.g., Prov 12:17 “whoever speaks the truth.” Here  $\gamma^e m\bar{u}n\hat{a}$  still has the character of a substantivized adj.: “something on which one can depend, what is true” (cf. also Isa 25:1). One must distinguish therefore between  $\gamma^e m\bar{u}n\hat{a}$  in a personal sense (“dependability, faithfulness, honesty, truthfulness”) and in an objective reference (“something dependable, true”). Passages with this meaning are infrequent, however, and there is hardly any occasion to translate with the abstract “the truth.”

7. The prep. usage  $be \gamma^e m\bar{u}n\hat{a}$  “upright, in good faith” in an adv. function (2 Kgs 12:16; 22:7; 2 Chron 19:9; 31:12, 15; 34:12) frequently expresses the personal, subjective aspect. On the one hand  $\gamma^e m\bar{u}n/\gamma^e m\bar{u}n\hat{a}m$  “dependability, faithfulness” also represents the personal facet (see II); on the other hand  $\gamma\bar{o}m\bar{e}n$  “in truth, really” (acc. adv., Isa 25:1) expresses the

objective, thing-oriented aspect.  $\text{ʔ}omnâ$  “in truth, indeed” (Gen 20:12; Josh 7:20) also occurs in the adv. acc.; the sense is precisely the same as for the proper advs.  $\text{ʔ}omnām$  and  $\text{ʔ}umnām$  “indeed, really, truly,” whether one describes a third-party statement as accurate or underscores the dependability of one’s own statement.

8. The following appear as near or more distant pars. to  $\text{ʔ}mûnâ$ :

(a)  $\text{ʔ}met$  (Psa 40:11f.; Jer 9:2–5); the spheres of meaning of the two substantives overlap to a great extent (see E);

(b)  $\text{ḥesed}$  appears beside  $\text{ʔ}mûnâ$  with noteworthy regularity (Hos 2:21f. alongside  $\text{ṣedeq}$ ,  $\text{mišpāt}$ , and  $\text{raḥ}^amîm$ ; particularly in the language of the Psa: 33:4f.; 36:6; 40:11f.; 88:12; 89:2f., 25, 34, 50; 92:3; 98:3; 100:5; 119:75f.; Lam 3:22f.; cf. Psa 31:24; Prov 20:6); the fact that the two terms stand alongside one another so often in cultic poetry is naturally associated with parallelismus membrorum and the pleriphory of cultic language; the two terms are so closely related that they are largely interchangeable;

(c) terms for right and justice such as  $\text{ṣedeq}$ ,  $\text{ṣ}^edāqâ$ , and  $\text{mišpāt}$  occur frequently in the word field of  $\text{ʔ}mûnâ$  (Deut 32:4; 1 Sam 26:23; Isa 11:5; 33:5f.; 59:4; Jer 5:1; Hos 2:21f.; Hab 2:4; Psa 33:4f.; 36:6f.; 40:11; 88:12f.; 98:2f.; 119:30, 75, 138; 143:1 txt?; Prov 12:17; cf. Isa 26:2 and Prov 13:17); one can explain this relationship between the terms, which is at first surprising, by the fact that  $\text{ṣdq}$  and its derivatives can be used in the sense of “solidarity, community faithfulness” (cf. H. H. Schmid, *Gerechtigkeit als Weltordnung* [1968], 184f.), as well as by the fact that, like  $\text{ṣ}^edāqâ$ ,  $\text{ʔ}mûnâ$  can apparently serve as a circumlocution for orderly behavior (cf. Schmid, op. cit. 68).

IV. 1. The cultic songs of the Psalter favor speaking of Yahweh’s  $\text{ʔ}mûnâ$ . The lament and thanksgiving songs bear testimony to God’s unshakeable, constant faithfulness as the reason for God’s past or future helpful attention to people (e.g., Psa 88:12 or 40:11, where the terms used in the context permit only the translation “faithfulness,” together with  $\text{y}^šûcâ$  “aid” perhaps in a hendiadys “your faithful aid”). It manifests itself in all the afflictions brought before God in the laments and mentioned retrospectively in the thanksgivings (illness or deliverance from death, but also in the affliction of enemies as in Psa 92:3 or 143:1). Similarly, the poet of Lam 3:23 clings to Yahweh’s  $\text{ʔ}mûnâ$ , because of which his demonstrations of grace ( $\text{ḥ}^asādîm$ ) cannot have ended and his great mercy ( $\text{raḥ}^amîm$ ) may be counted on (cf. also Psa 100:5). The enthronement songs also speak of Yahweh’s  $\text{ʔ}mûnâ$ . Just as Yahweh aids his people on the strength of his  $\text{ʔ}mûnâ$  (Psa 98:3), so can he judge the peoples on the strength of the same, realizing his  $\text{ṣedeq}$  in the course of history (96:13, here not with  $\text{raḥ}^amîm$  or  $\text{ḥesed}$  as parallel terms, but with  $\text{ṣedeq}$ , the “righteousness” through which God ensures that things remain in proper order).  $\text{ṣedeq}$  and

*ʿmûnâ* occur together in Psa 119:30 also, although not active in the judgment upon the nations but in the mortification of the pious. Still, this mortification does not exclude hope in *ḥesed* and *raḥ<sup>a</sup>mîm* (cf. Psa 119:138).

Psa 89 speaks of Yahweh's *ʿmûnâ* with intentional frequency (vv 2f., 6, 9, 25, 34, 50); in view of the lamentable situation of the monarchy, the psalm strives for an understanding of the promise of the continuation of the Davidic dynasty. The poet juxtaposes any doubt in the promise with the confession of Yahweh's *ʿmûnâ*. Because God's *ʿmûnâ* cannot be doubted, neither can the *neʿmān* of Nathan's promise be questioned (cf. vv 29, 38, and *ḥesed* and *ʿmet* in v 15). What may be called the metaphysical foundation of faith in Yahweh's faithfulness (vv 3, 6, 9, 15; similar to the confession in Psa 36:6f.; cf. 57:11; 89:38; 108:5) is interesting in this context.

Even though the OT certainly does not speculate at all about God's essential nature, it still ventures the statement that *ʿmûnâ* is an aspect of God's being. Correspondingly, Yahweh is described at least once as *ʿēl ʿmûnâ* (Deut 32:4; cf. the designations *ʿēl ʿmet* and *ʿēl neʿmān*). Nevertheless, the context indicates that the singer of the song wishes to emphasize strongly the elements of uprightness and integrity (in contrast to the perversity of the people). The trait of dependability is not overlooked, however, because the praise of Yahweh as the rock precedes the confession of his faithfulness (v 4a). Isa 65:16 indicates that one may bless oneself or swear by the God of faithfulness (see C.IV/4).

Discussion of God's *ʿmûnâ* is limited to a rather small segment of the OT tradition: hymns, thanksgivings, and complaint songs. Deut 32 is peculiar insofar as the confession of God's faithfulness is not based on the experience of God's aid in the needs of the day, but in salvation history in which Yahweh has himself borne testimony to his people. In view of the infrequency of such passages, one should note that the notion of God's faithfulness is in no way limited to the use of *ʿmûnâ* or related terms.

2. The *ʿmûnâ* of God's commandments can be discussed as easily as the *ʿmûnâ* of God (Psa 119:86). Because the *šeqer* of the impudent is contrasted with it, one may translate it "truth." This translation does not merely mean, however, that they are formally "correct." *šeqer* does not mean "lie," but "deceit"; and, wholly in keeping with this meaning, Yahweh's commandments are "true" because they are dependable. They are the norms of a saving world order; whoever relies on them will not be disappointed, but is assured fullness of life.

3. Psa 89:3 makes clear that one can conceive of *ʿmûnâ*, prior to realization on earth, as a divine, fundamental principle existent in heaven.

According to the royal ideology of the ancient Near East, which also stamped Israel's thinking, the king is administrator of this preestablished harmony praised by the holy ones in heaven (v 6). Every individual can do absolutely nothing better, however, than to incorporate himself/herself consciously into this order, i.e., to become an  $\text{ʔš } \text{ʔ}^{\text{c}}\text{mûnâ}$  (or  $\text{ʔš ne } \text{ʔ}^{\text{c}}\text{mān}/\text{ʔ}^{\text{c}}\text{met}$ ). Such an individual will receive rich blessings (Prov 28:20; cf. the Eg. "Protests of the Eloquent Peasant": "truth, not lies, means wealth, it causes never-ending bloom," F. von Bissing, *Altäg. Lebensweisheit* [1955], 168). The small number of such statements is associated with the strict subordination of this fundamental principle to Yahweh's lordship in Israelite thinking; *he* actualizes the  $\text{ʔ}^{\text{c}}\text{mûnâ}$  (Isa 25:1). This subordination results in the following formulation: "Lying lips are an abomination to *Yahweh*, but those who practice  $\text{ʔ}^{\text{c}}\text{mûnâ}$  are pleasing to him" (Prov 12:22; cf. 12:17). But Psa 119:30 can still say: "I have chosen the path of the (not your)  $\text{ʔ}^{\text{c}}\text{mûnâ}$ ," although it then conforms to the Yahwistic program: "I strive after your ordinances."

4. The substantivized masc.  $\text{ʔ}^{\text{c}}\text{mûn}$  (mostly in the pl.; see II) appears in addition to  $\text{ʔ}^{\text{c}}\text{mûnâ}$ , the substantivized fem. of the adj. A difference in meaning is difficult to ascertain. If God is a God of  $\text{ʔ}^{\text{c}}\text{mûnâ}$  (Deut 32:4), then the Israelites are children who do not know  $\text{ʔ}^{\text{c}}\text{mûn}$  (v 20; cf. also v 5). Psa 12:2 " $\text{ʔ}^{\text{c}}\text{mûnîm}$  (honesty, sincerity) has disappeared among human children" is comparable to the Jer passage mentioned above (III/5). Likewise, according to Isa 25:1 and 26:2, divine  $\text{ʔ}^{\text{c}}\text{mûnâ}$  and human  $\text{ʔ}^{\text{c}}\text{mûnîm}$  ought to correspond to one another (the continuation in 26:3f. mentions reliance upon Yahweh). Just as Hab 2:4 promises life to the righteous because of his/her  $\text{ʔ}^{\text{c}}\text{mûnâ}$  (see B.IV/2), so may the righteous, those who keep  $\text{ʔ}^{\text{c}}\text{mûnîm}$ , hope for peace, according to Isa 26:2f. One may say that these  $\text{šōm'ré } \text{ʔ}^{\text{c}}\text{mûnîm}$  are the "believers." Israel responds to God's faithfulness, shining in his wondrous deeds, by keeping faith.

#### E. $\text{ʔ}^{\text{c}}\text{met}$

III. 1. The LXX already translated almost half the cases of  $\text{ʔ}^{\text{c}}\text{mûnâ}$  with *alētheia*; derivatives of *alēth-* render 100 of 127 occurrences of  $\text{ʔ}^{\text{c}}\text{met}$ , while *pistis* recedes pronouncedly; the relative frequency of *dikaïosynē* (6x) or *dikaïos* (5x) is also noteworthy; cf. *SBL* 187ff. This result indicates that  $\text{ʔ}^{\text{c}}\text{mûnâ}$  and  $\text{ʔ}^{\text{c}}\text{met}$  are not fully synonymous and that, more than any other derivative of  $\text{ʔ}^{\text{c}}\text{mn}$ ,  $\text{ʔ}^{\text{c}}\text{met}$  has acquired the meaning "truth." This situation does not change the fact (contra Pořbčan, op. cit. 183) that the meaning "truth" cannot constitute the starting point for the semantics of  $\text{ʔ}^{\text{c}}\text{met}$ , and (contra D. Michel, "ÄMÄT," *Archiv für Begriffsgeschichte* 12 [1968]: 30–57) that all occurrences of  $\text{ʔ}^{\text{c}}\text{met}$  may not be understood against the concept of correctness or agreement, making a change in meaning for the term

imperceptible.

2. The presumed basic meaning “firmness” is still present here only in a fig. sense. But in contrast to  $\text{ }^{\text{c}}\text{mûnâ}$ ,  $\text{ }^{\text{c}}\text{met}$  has occasionally developed the meaning “permanence, security, duration,” in exact correspondence to the ni. of the verb, e.g., in Isa 16:5, “Thus the throne will be established by grace and it will be permanently occupied.” If *hûkan* “to be established” corresponds to the *nākôn* “firm” of Nathan’s prophecy in 2 Sam 7:16, then *bc* $\text{ }^{\text{c}}\text{met}$ , “constantly,” corresponds to *nc* $\text{ }^{\text{c}}\text{mān}$  “to have permanence” there. In addition to the element of duration, the word apparently encompasses the element of assuredness in such cases. Thus *šeker* $\text{ }^{\text{c}}\text{met}$  in Prov 11:18 may mean “stable, certain reward” (see Klopfenstein, op. cit. 171f.). It is less likely, however, that one may consistently translate the frequent combination *ḥesed we* $\text{ }^{\text{c}}\text{met}$  as a hendiadys, “lasting mercy” (so HAL 66b, 247b, 323a). Admittedly, the dual expression has often become a fixed formula, and the element of constancy, of permanence, certainly belongs to faithfulness (cf. e.g., Josh 2:14; 2 Sam 15:20; Prov 3:3; 14:22; 16:6; 20:28). Passages such as Psa 85:11 “*ḥesed* and  $\text{ }^{\text{c}}\text{met}$  meet” indicate, nevertheless, that the two terms stand entirely on the same level and each can have its own weight. If it still seems appropriate to regard  $\text{ }^{\text{c}}\text{met}$  as a qualifier of *ḥesed* in some cases, it seems best to understand the phrases as “*ḥesed* (mercy, grace, love) on which one can depend”; the element of duration does not occupy the foreground.

3.  $\text{ }^{\text{c}}\text{met}$  does serve unmistakably as the second member of a cs. combination as a qualifier of a higher concept such as *šālôm* “peace” (Jer 14:13, perhaps “peace of duration, lasting peace,” but because of 2 Kgs 20:19 = Isa 39:8 and Jer 33:6 “peace and security,” it is still more likely to be read as “peace that guarantees security”), *’ôt* “sign,” etc. One can best approach all these phrases from the notion of dependability (contra Weiser, TDNT 6:184: “ $\text{ }^{\text{c}}\text{mn}$  is shown to be a formal concept whose content is in each case determined by the specific subj.”; it indicates “the relation of the reality to that which is characteristic of the particular subj.”; contra SBL 179f.).

The following passages should be mentioned here: Gen 24:48 (a dependable and therefore proper path); Exod 18:21 (dependable men who cannot be bribed); Josh 2:12 (a dependable and therefore certain sign); Jer 2:21 (a dependable, i.e., genuine, growth); 14:13 (a dependable, certain peace; see above); 42:5 (a dependable and therefore truthful witness; likewise Prov 14:25 with the antonym “lying witness”); Ezek 18:8 and Zech 7:9 (a legal pronouncement on which one can depend); Prov 22:21 (dependable and therefore true words, par. *qōšē* “truth”); Eccl 12:10 (words on which one can depend); Neh 7:2 (a dependable and God-fearing man); 9:13 (dependable instructions).

4. In relation to persons (and God), the meaning of  $\text{ }^{\text{c}}\text{met}$  shifts from dependability to faithfulness, as in the frequent combination  $\text{ }^{\text{c}}\text{hesed we}^{\text{c}}\text{met}$  “grace and faithfulness”: of people: Gen 24:49; 47:29; Josh 2:14; Prov 3:3; of God: Gen 24:27, etc. (see IV/2). The prep. phrase  $\text{be}^{\text{c}}\text{met}$  “in faithfulness” serves as an adv.: “faithfully, uprightly”; it describes the dependability of the person’s behavior (not the certainty of a state of affairs like the proper advs. and adverbial acc. mentioned above in D.III/7; but see 6).

The pars. confirm the precise intention:  $\text{b}^{\text{c}}\text{tāmîm}$  “uprightly” (Josh 24:14; Judg 9:16, 19); “with the whole heart (and with the whole soul)” (1 Sam 12:24; 1 Kgs 2:4); “in righteousness and with an upright attitude toward you” (1 Kgs 3:6); “with an undivided heart” (2 Kgs 20:3 = Isa 38:3); similarly Isa 10:20; 61:8; Jer 32:41; Psa 111:8; Prov 29:14. Thus  $\text{be}^{\text{c}}\text{met}$  characterizes human presence in terms of integrity and personal engagement.

5. One can “exercise  $\text{ }^{\text{c}}\text{met}$ ” ( $\text{ }^{\text{c}}\text{sh}$ ; cf.  $\text{ }^{\text{c}}\text{sh }^{\text{c}}\text{mûnâ}$ ; see D III/5): Gen 47:29; Neh 9:33; 2 Chron 31:20. But one can also “speak  $\text{ }^{\text{c}}\text{met}$ ,” an expression that refers not to the speaker’s dependability but to the pronouncement’s dependability. Words are dependable, and therefore trustworthy, if they recount a circumstance accurately, i.e., if they are true: 2 Sam 7:28; 1 Kgs 17:24; 22:16 = 2 Chron 18:15; Jer 9:4 (opposite  $\text{tll hi}$ . “to deceive”); 23:28 “who speaks my word in truth” (so Rudolph, HAT 12, 154; Klopfenstein, op. cit. 103, and others understand  $\text{ }^{\text{c}}\text{met}$  as an adverbial acc. and translate “faithfully”). In fact, one is frequently unable to decide with certainty whether  $\text{ }^{\text{c}}\text{met}$  means “uprightness” in reference to the subj. or “truth” in reference to the obj. Thus one can ask, e.g., regarding the phrase  $\text{ }^{\text{c}}\text{ed }^{\text{c}}\text{met}$ , whether  $\text{ }^{\text{c}}\text{met}$  should be understood as an attitudinal norm (“truthful witness”) or whether it confirms the truth of the circumstances attested. If one proceeds from  $\text{ }^{\text{c}}\text{ed ne}^{\text{c}}\text{mān}$  (see A.III/1; cf. Jer 42:5) one will opt for the first possibility, but from the standpoint of Isa 43:9 or Prov 14:25, one will prefer the second. According to Gen 42:16, Joseph wants to test his brothers, “whether  $\text{ }^{\text{c}}\text{met}$  is with you”; here one should clearly translate  $\text{ }^{\text{c}}\text{met}$  not “uprightness” but “truth” (see D.III/6 on  $\text{ }^{\text{c}}\text{mûnâ}$ ). Nevertheless, one may not speak of an abstraction of the specific events (so G. Quell, TDNT 1:234), so that one may translate: “whether *the* truth is with you.” In the face of great uncertainty in details, surely grounded in the fact that the distinction between (subjective) uprightness and (objective) truth was not so apparent to the Hebrews as to us, the obj.-oriented meaning is still clearly present. This situation is esp. pertinent to the juridical arena, where objective truth, not merely subjective truthfulness,

is definitely in view. Witnesses before the court can declare the statement of a litigant  $\text{ }^{\text{c}}\text{met}$  “it is true,” i.e., the relevant statement agrees with reality (Isa 43:9). An accusation can be confirmed as  $\text{ }^{\text{c}}\text{met}$  (Deut 13:15 and 17:4, made explicit by *nākôn haddābār* “the situation is really so”; cf. 22:20). In Prov 22:21 “words of  $\text{ }^{\text{c}}\text{met}$ ” explicates *qōšṭ* “truth”; *dbr pi.*  $\text{ }^{\text{c}}\text{met}$  means, if not *the* truth, then still “a true statement” (Zech 8:16; cf. Psa 15:2; Prov 8:7; 12:19 par. “lying tongue”), and *hyh*  $\text{ }^{\text{c}}\text{met}$  “prove true” (Deut 22:20; 2 Sam 7:28; cf. 1 Kgs 17:24).

6. Finally, one should note passages in which *be* $\text{ }^{\text{c}}\text{met}$  does not mean “in faithfulness, uprightly,” but “in truth, actually, really” (Judg 9:15; Jer 26:15; 28:9; cf. also the simple  $\text{ }^{\text{c}}\text{met}$  in Jer 10:10).

7. The most important parallel terms are:

- (a)  $\text{ }^{\text{c}}\text{mûnâ}$  (see D.III/8);
- (b) *ḥesed* (see III/2, 4 of people, IV/2 of God);
- (c) terms for the totality of the person (see 4);
- (d) legal terms: → *šedeq* “righteousness” (Psa 15:2; 85:12; Prov 8:7f., etc.;  $\text{ }^{\text{c}}\text{dāqâ}$  Isa 48:1; 59:14; Jer 4:2; Zech 8:8, etc.; *šaddîq* Neh 9:33); *mišpāṭ* “justice” (→ *špṭ*, Isa 59:14; Jer 4:2, etc.); *mēšārîm* “straightness” (Prov 8:6); *n<sup>c</sup>kōḥâ* “propriety” (Isa 59:14), and others;
- (e) *šālôm* (→ *šlm*; 2 Kgs 20:19 = Isa 39:8; Jer 33:6; Zech 8:16, 19; Mal 2:6; Psa 85:11; Esth 9:30).

Antonyms are: *šeqer* “deceit” (Jer 9:4; Zech 8:16; Prov 11:18; 12:19, etc.); *kāzāb* “lie” (Prov 14:25, etc.); *mirmâ* “deceit” (Prov 12:19); *reša<sup>c</sup>* “wickedness” (Prov 8:7; cf. 11:18; Neh 9:33).

8. Except for *šālôm* and the one case in which the Aramaism *qōšṭ* “truth” (Wagner no. 274; Bibl. Aram. *q<sup>c</sup>šōṭ*, Dan 4:34) parallels  $\text{ }^{\text{c}}\text{met}$  (Prov 22:21), the word field surrounding  $\text{ }^{\text{c}}\text{met}$  coincides quite precisely with that of  $\text{ }^{\text{c}}\text{mûnâ}$ .  $\text{ }^{\text{c}}\text{met}$  in the sense of “truth” has no actual par., because Hebr. has no independent word for “truth.” This phenomenon does not mean that Hebr. does not have a concept of truth, but that its concept of truth is indissolubly joined with the notion of dependability (cf. W. Pannenberg, “Was ist Wahrheit?” FS Vogel 214–239, esp. 216; H. von Soden, op. cit. [see I/7]; H.-J. Kraus, “Wahrheit in der Geschichte,” *Was ist Wahrheit?* [1965], 35–46; K. Koch, “Der hebr. Wahrheitsbegriff im griech. Sprachraum,” *Was ist Wahrheit?*, 47–65; M. Landmann, *Ursprungsbild und Schöpfungst* [1966], 213–22). Just as  $\text{ }^{\text{c}}\text{met}$  in the sense of the dependability of persons means faithfulness and uprightness, understood as truth it means the dependability of a thing or a word. In this sense, only

that which corresponds to reality or is fully appropriate to it can be dependable.

IV. 1. Like the confession of God's *ʾmûnâ*, that of his *ʾmet* becomes prominent primarily in the Psalter. The lament in Psa 31 praises Yahweh as *ʾēl ʾmet* (v 6), just as other texts call him *ʾēl neʾmān* or *ʾēl ʾmûnâ*. Thus this text simply expresses pregnantly what other laments and thanksgiving songs also attest in reference to Yahweh's *ʾmet*. No difference between *ʾmet* and *ʾmûnâ* can be ascertained in these contexts.

One may also celebrate Yahweh's *ʾmet* because one has experienced or would like to experience him as helper. Psa 69:14 implores Yahweh specifically to grant an audience "in the faithfulness of your aid." The hope of aid motivates one to take refuge in Yahweh's faithfulness. The celebration of his faithfulness is designed to move God to intervene before it is too late. To this end, the supplicant can remind him that one cannot praise his faithfulness in the underworld (Psa 30:10; Isa 38:18; cf. Psa 71:22; for *ʾmûnâ* see Psa 88:12). Or one can pray that God's light and faithfulness may lead the supplicant to God's holy mountain so that one may there sing his praise with sacrifice (Psa 43:3f.; cf. 138:2). The annihilation of the enemies is frequently an element of the aid that one expects from God's faithfulness (54:7; cf. 22:26 txt em). Psa 91:4b celebrates Yahweh's faithfulness as shield and buckler (didactic poem? cf. Kraus, *Psa*, CC, 2:221).

The hymn in Psa 146 (which also contains elements of the thanksgiving song, however) describes in an especially impressive manner what it means for Israel that Yahweh maintains faithfulness eternally. The poet does not think, as is otherwise the rule, of his personal distress, but praises Yahweh as the helper of all the oppressed. Yahweh himself is, indeed, called the God of Jacob (v 5), but he is described as the creator God and the God of Zion (v 10), who will rule eternally. Here, then, in comparison with the average piety of the Psalms, God's faithfulness (v 6) is placed against a greatly expanded horizon.

2. As in the profane arena, *ʾmet* is also readily combined with → *ḥesed* (III/1) in reference to God.

Hos 4:1 and Mic 7:20 mention *ʾmet* before *ḥesed*, but as a rule *ḥesed* stands first. The combination can vary elsewhere also (i.e., Psa 69:14), but for the most part they are joined as closely as possible through the simple *we* "and" (Psa 25:10; 40:12; 57:4; 85:11; 89:15; 138:2; beyond the Psalter: Gen 24:27; Exod 34:6; 2 Sam 2:6; 15:20; in a looser combination: Gen 32:11; Hos 4:1; Psa 26:3; 57:11 = 108:5).

One may say that the primary accent lies on *ḥesed* in these phrases. *ʾmet* modifies *ḥesed* "grace, goodness, love, goodwill" in terms of dependability.

The following occurrences in particular are noteworthy: (a) Psa 89:15. That justice and righteousness are the foundation of Yahweh's throne is thoroughly

appropriate to the context, which speaks of God's kingdom. But the statement continues: "*hesed* and *emet* stand in your presence." Here they are seen almost as beings, almost as hypostases. Thus Psa 85:11f. too can say: "*hesed* and *emet* encounter one another, righteousness and peace meet (txt em); faithfulness sprouts from the earth and righteousness blooms from heaven." The exegetes' argument as to whether the text refers to divine or human faithfulness is superfluous: the intention is naturally that God causes such faithfulness to sprout. But the formulation also allows for the recognition that *hesed* and *emet* could be envisioned as independent cosmic entities, whose control also guarantees the fertility of the land, because where they come to power, the cosmos must regain harmonious, fertile equilibrium.

(b) Psa 86:15 confesses: "You are a merciful, gracious God, patient and rich in *hesed* and *emet*" (cf. v 5). This statement is apparently an old confessional formula (without *emet* also in Psa 103:8; 145:8; Joel 2:13 and Jonah 4:2 complemented by "he repents of evil"; with *emet* in Exod 34:6, but, according to Noth, *Exod*, OTL, 261, the formula here is a secondary insertion). It seems that *emet* has gained entry into the formula only secondarily, probably by force of the combination *hesed we'emet*. One sought to establish explicitly the element of faithfulness that continues even in situations that subject the relationship between God and people to a rigorous endurance test. Expansions in Psa 86:5, "rich in mercy" by means of "gracious and forgiving," and references in the passages in Joel and Jonah to Yahweh's preparedness to repent are in the same vein.

(c) The OT speaks of *hesed we'emet* accompanied by *śh* "to do" three times beyond the Psa: Gen 24:49; 32:11 (*h'sādīm*); 2 Sam 2:6. Each of these refers to God's just guidance of people. Therefore one can also say that Yahweh's paths are *hesed we'emet* (Psa 25:10; cf. 43:3). The pious individual recognizes that he/she stands under the guidance of divine faithfulness in his/her life.

3. Because *emet* encompasses the foundations of the cosmic order, the individual must actualize *emet* just as God does. Naturally, wisdom esp. instructs to this end (Prov 3:3; 14:22; 16:6; 20:28). Gen 24 relates human faithfulness to the divine (vv 27 and 49). Grace and faithfulness, which preserve the king according to Prov 20:28, correspond to the grace and faithfulness that stand in the presence of God (Psa 89:15). Through grace and faithfulness one meets with divine and human approval (Prov 3:3f.). The demand for *emet* occurs once in the prophets as well: Hos 4:1, "There is no *emet* and no *hesed* and no knowledge of God in the land." Knowledge of God must be realized in the actualization of *hesed* and *emet*. The continuation allows for no doubt that this context envisions not the relationship with God but the relationship with one's neighbors. The OT almost never describes the individual's behavior toward God with *hesed we'emet* (or *emet* alone). The response to God's faithfulness can only be faithfulness toward one's fellow human beings. The only exceptions are late passages such as 2 Chron 31:20 and 32:1.

But behavior *be<sup>ʿ</sup>met* toward God is demanded of Israel, not primarily in the sense of “in faithfulness” (so HAL 67a), but “uprightly, genuinely, honestly” (see III/4). Behavior *b<sup>e</sup>tāmîm* and *be<sup>ʿ</sup>met* legitimately expresses the fear of God (Josh 24:14).

4. As established above (III/5), *ʿmet* in a profane usage means not only subj.-oriented “dependability, uprightness, faithfulness,” but also obj.-oriented “something dependable, truth.” Does the OT also speak of the truth of God? Decision between the two options is difficult here too. For example, contrary to many older exegetes (Delitzsch, Duhm, Marti, etc.), one must maintain “faithfulness” in Isa 59:14f. (Klopfenstein, op. cit. 46; Fohrer, *Jesaja*, ZBK, 3:219; cf. Westermann, *Isa 40–66*, OTL, 343, etc.).

The attempt to translate Psa 25:5, “guide me according to your truth (*ʿmet*), teach me,” is more frequent and the request for instruction seems to justify it. The alphabetic psalm exhibits elements of the lament, however, and laments discuss *ʿmet* in the sense of “faithfulness.” V 6 takes up *ʿmet* again through *rah<sup>a</sup>mîm* “mercies” and *ḥesed*. But particularly in view of v 10, one must translate “guide me according to your faithfulness” and not, as is customary, “in your truth.” Psa 86:11 should be understood as an exact analogy; “Teach me your way, that I may walk in your faithfulness”; God’s faithfulness is the realm in which the individual’s journey must be executed if it is to be salvific.

The usage in the two legal psalms, Psa 19 B and 119, is different. In the clause “the commandments of Yahweh are *ʿmet*” (19:10), *ʿmet* is naturally object-oriented. But the rendering “true” is nevertheless problematical. The par. phrase in v 10a states that Yahweh’s word (read *ʿimrat* for *yir<sup>a</sup>t*) is pure and will stand for eternity. Thus *ʿmet* probably means to attest to the dependability and lasting validity of the divine commandment rather than to its truth. The same situation pertains to statements concerning the law in Psa 119 (vv 43, 142, 151, 160). In each case, the word field indicates that the reference is to the duration or the “eternal” validity of the commandments, as in v 152, “From of old I know from your precepts, that you have established them for eternity.” One may wish to translate “true”; but they are true because they are dependable, and this manifests itself, in turn, in the fact that they ensure “life” (vv 40, 116, 144).

Finally, Psa 51:8 is difficult to interpret: “You are pleased with *ʿmet* in secret, and in secret you teach me wisdom.” Text and translation are uncertain (cf. Kraus, *Psa*, CC, 1:499, 503f.); but in any case, *ʿmet* here parallels *ḥokmâ* “wisdom,” and like *ḥokmâ* it can be taught. Therefore, *ʿmet* must mean truth in the sense of a secret revelation, a deep, not directly accessible knowledge.

5. This usage approaches the meaning of the occurrences in Daniel. Dan 8:26, “the vision that has been revealed is *ʿmet*,” can only mean that the vision is true because one can depend upon it, certain that the fulfillment will not fail, just as in 10:1 and 11:2 (txt? cf., however, Plöger,

KAT 18, 145f., 150). These Dan passages are sharply distinguished from 1 Kgs 17:24. The latter maintains that Yahweh has really (in truth) spoken to the prophets; the former maintains that he has communicated the truth to the apocalypticist—indeed, in such a way that this revelation is a mirror image of the coming events. These events are recorded in the book of *ʾemet* (Dan 10:21), the “book of truth,” which has been understood as a par. to the Babylonian tablets of destiny (cf. comms. by Marti, Bentzen, Porteous on the Dan passage; contra Plöger, KAT 18, 146). But the revelation long familiar in Israel can also be described as “God’s truth” (9:13).

This usage leads to 8:12, where *ʾemet* is used in a final, abs. sense. After describing the abominations of the “small horn,” the author concludes: “the *ʾemet* was thrown to the ground” (txt em; cf. *BHS*, contra Plöger, op. cit. 120, 122). Here *ʾemet* refers to the truth of Judaism, with its individual legal regulations (K. Marti, *Das Buch Daniel* [1901], 58f.; R. Bultmann, *ZNW* 27 [1928]: 118f. = *Exegetica* [1967]: 129).

The usage of *ʾemet* in Dan is unique. The closest par. to this usage is in Eccl 12:10. Bultmann (op. cit.) suspects the influence of Iranian concepts upon Dan 8:12 and thinks, probably correctly, that the “book of truth,” from which the angel communicates revelations concerning the future to the seer (Dan 10:21), also points to foreign influence. In any case, it is clear that Dan initiates a new understanding of *ʾemet*, and thereby a new understanding of truth itself.

V. The continued vitality of the word group or the Gk. equivalents in the Qumran literature, in early Judaism, and in the NT cannot be examined in detail here. The bibliog., too, can offer only a selection:

1. “faith”: In addition to A. Weiser and R. Bultmann, “πιστεύω,” *TDNT* 6:174–228, and the lexical articles in *RGG*, *EKL*, etc.:

A. Schlatter, *Der Glaube im NT* (1927); W. G. Kümmel, “Der Glaube im NT, seine katholische und reformatorische Deutung,” *TBI* 16 (1937): 209–21 = *Heilsgeschehen und Geschichte* (1965), 67–80; E. Walter, *Glaube, Hoffnung, Liebe im NT* (1940); M. Buber, *Two Types of Faith* (1951); G. Schrenk, “Martin Bubers Beurteilung des Paulus in seiner Schrift ‘Zwei Glaubensweisen,’” *Judaica* 8 (1952): 1–25; M. Bonningues, *La Foi dans l’évangile de s. Jean* (1955); G. Ebeling, *Was heisst Glauben?* (1958); id., “Jesus and Faith,” *Word and Faith* (1963), 201–46; W. Grundmann, “Verständnis und Bewegung des Glaubens im Johannes-Evangelium,” *KerD* 6 (1960): 131–54; F. Neugebauer, *In Christus, EN XPIΣTΩI: Eine Untersuchung zum paulinischen Glaubensverständnis* (1961), 150–81; H. Schlier, “Glauben, Erkennen, Lieben nach dem Johannesevangelium,” *FS Söhngen* 98–111 = *Besinnung auf das NT* (1964), 279–93; H. Ljungman, *Pistis: A Study of Its Presuppositions and Its Meaning in Pauline Use* (1964); H. Conzelmann, “Fragen an Gerhard von Rad,” *EvT* 24 (1964): 113–25 (123ff.); E. Grässer, *Der Glaube im Hebräerbrief* (1965); N.

Lazure, *Les valeurs morales de la théologie johannique* (1965), 161–204; P. Stuhlmacher, *Gerechtigkeit Gottes bei Paulus* (1966), 81–83; H. Conzelmann, *Outline of the Theology of the NT* (1969), 61f., 171ff.; C. A. Keller, “Glaube in der ‘Weisheit Salomos,’” FS Eichrodt 11–20.

2. “Amen” in Judaism, the NT, and the early church: H. Schlier, “ἀμήν,” *TDNT* 1:335–38; *StrB* 1:242–44; 3:456–61; *RAC* 1:378–80; *BHH* 1:80f.; V. Hasler, *Amen* (1969).

Further: H. W. Hogg, *JQR* 9 (1897): 1–23; G. Dalman, *Words of Jesus* (1909), 226–29; P. Glaue, *ZKG* 44, NS 7 (1925): 184–98; D. Daube, *NT and Rabbinic Judaism* (1956), 388–93.

3. “Truth”: In addition to G. Quell and R. Bultmann, “ἀλήθεια,” *TDNT* 1:232–51, see *RGG*, *EKL*, etc.:

R. Bultmann, *ZNW* 27 (1928): 134–63; F. Nötscher, “‘Wahrheit’ als theol. Terminus in den Qumrantexten,” FS Christian 83–92 = *Vom Alten zum Neuen Testament* (1962), 112–25; H. Kosmala, *Hebräer, Essener, Christen* (1959), 135–73, 192–207; L. J. Kuypers, “Grace and Truth,” *Int* 18 (1964): 3–19; O. Böcher, *Der johanneische Dualismus im Zusammenhang des nachbibl. Judentums* (1965); N. Lazure, op. cit. 70–90 (bibliog.); P. Ricca, *Die Eschatologie des vierten Evangeliums* (1966), 111–13.

H. Wildberger

## יָמַשׁ *ṁš* to be strong

S 553; BDB 54b; *HALOT* 1:65a; *TDOT* 1:323–27; *TWOT* 117; *NIDOTTE* 599

1. The root *ṁš* “to be strong” occurs only in Hebr. and sporadically in Ug. (cf. *UT* no. 228; *WUS* no. 282).

The description of the horses in Zech 6:3, 7 as *ṁmuššîm* involves a color term that does not belong to this root (cf. *HAL* 63b: “variegated”; A. Guillaume, *Abr-Nahrain* 2 [1962]: 7, “dust-colored”; W. D. McHardy, FS Kahle 174ff.).

In addition to the verb in the qal, pi., hitp., and hi. (cf. *HP* 280), the adj. *ṁmmîš* “strong” and the substs. *ṁmeš*, *ṁmšâ* (Zech 12:5 txt?) “strength,” and *maṁmāš* “exertion” occur.

On the PNs  $\text{ʔmašyâ}(hû)$ ,  $\text{ʔāmôš}$ ,  $\text{ʔamšî}$ , see *IP* 190.

2. The word group is attested 50x in the OT (qal 16x, pi. 19x, hitp. 4x, hi. 2x),  $\text{ʔammîš}$  6x, the substs. 1x each.

The verbal occurrences are located primarily in the Dtr-Chr literature and in Deut (qal 12x, pi. 6x, hitp. 3x), also in the Psa (qal 2x, pi. 3x, hi. 2x), in the wisdom literature (pi. 5x), and in the prophetic corpus (pi. 5x).

3. All meanings of the word group result from the primary meaning “to be strong, mighty.” The term occurs only with a personal subj. (God, human).  $\text{ʔmš}$  occurs only in the qal (except for the encouragement formula; see 4) in reference to the superior strength of a people (Gen 25:23; 2 Chron 13:18) and in the individual laments in reference to the oppressive might of the psalmist’s enemy. The factitive usage of the pi. conveys the idea of the intensification of physical might (often associated with  $\rightarrow kōah$ : Amos 2:14; Nah 2:2; cf. Prov 31:17; Isa 35:3; Job 4:4), the hardening of the heart (Deut 2:30; 15:7; 2 Chron 36:13; cf. F. Hesse, *Das Verstockungsproblem im AT* [1955], 16), the encouragement of the distressed (Job 16:5), or of a commissioned individual (see 4), and the restoration of a structure (temple, 2 Chron 24:13; cf. God’s establishment of the clouds, Prov 8:28). The hitp. means “to manage to do something by an exertion of might” (1 Kgs 12:18 = 2 Chron 10:18), “to be superior to someone” (2 Chron 13:7), and “to be resolutely decided” (Ruth 1:18). On the hi. see 4.

The most important synonymous roots are  $\rightarrow ḥzq$  and  $\rightarrow ʕz$ , *dll* “to be unimportant” and *rph* “to be limp” can be considered antonyms.

4. In individual laments, the superior strength of the enemy (2 Sam 22:18 = Psa 18:18; Psa 142:7) occasions the request for God’s saving intervention, which proves effective against all human might (cf. 2 Chron 13:18). Most remarkable, however, is the stereotypical encouragement formula in Deut and the Dtr-Chr literature:  $\text{ḥʔzaq weʔmaš}$  “to be firm and strong” or (pl.)  $\text{ḥizqû weʔimšû}$  (cf. N. Lohfink, *Scholastik* 37 [1962]: 32–44). The formula originally belongs to the promise of divine guidance, specifically in the area of war (Deut 31:6; Josh 1:6; 10:25; cf. also Nah 2:2;  $\rightarrow ḥzq$ ), and is issued to a leader of the people threatened by enemies (Deut 31:7, 23) or to the people prepared for battle (Deut 31:6; Josh 10:25). The relation of the formula to the keeping of the Mosaic commandments or even to the keeping of the commandments of the law code (Josh 1:7ff.; cf. Noth, *HAT* 7, 28), a relation reflecting Deuteronomistic interests, is characteristic. As a divine exhortation that removes fright, the formula is

transferred, then, into the cultic sphere (only with  $\lambda m\dot{s}$  hi.: Psa 27:14; 31:25). Similarly based in the cultic salvation oracle, the promise of Yahweh's aid issued to the servant of God also uses  $\lambda m\dot{s}$  (Isa 41:10; cf. Psa 89:22).

The interpretation of Psa 80:16, 18 is disputed; the passage may deal either with the "rearing" of the king based in the ancient concept of the father-son relationship between God and the prince (so Kraus, *Psa*, CC, 2:143) or with that of the entire people (v 16 supports this interpretation, so Weiser, *Psa*, OTL, 550; cf. Hos 10:1ff.; Ezek 16:7).

5. The most important usages of  $\lambda m\dot{s}$  mentioned above recur at Qumran, as one might expect, in the *War Scroll* (1QM) and the *Hodayot* (1QH) (cf. Kuhn, *Konk.* 17). For the encouragement formula in the NT, see 1 Cor 16:13.

A. S. van der Woude

## $\lambda mr$ to say

S 559; BDB 55b; HALOT 1:65b; TDOT 1:328–45; TWOT 118; NIDOTTE 606

1. All Sem. languages have a root  $\lambda mr$ , although it means "to say, speak" only in NWSem., i.e., in the various Can. (except for Ug.) and Aram. dialects (cf. *DISO* 17f.). In Arab. and Old SArab.,  $\lambda mr$  means "to command," a meaning also evident in later OT Hebr. In contrast, Akk. *amāru* (and apparently Ug. *amr* Gt; cf. *WUS* no. 283; *UT* no. 229) means "to see"; similarly Eth.  $\lambda mr$  I/2 "to show."

On the hypothetical development of meaning "to see > to say" cf. S. Moscati, "La radice semitica  $\lambda mr$ ," *Bib* 27 (1946): 115–26; HAL 63b with bibliog.; see also H. Kronasser, *Handbuch der Semasiologie* (1952), 93; on the Ger. "sagen/sehen" and "bemerken" [cf. Eng. "say/see" and "observe"—TRANS.] cf. Kluge 698 and Duden, *Etymologie* 633.

The existence of the Akk. meaning "to see" and the etymology of Hebr.  $\lambda mr$  based on this meaning do not justify M. Dahood's recourse to a so-called basic meaning "to see" in Psa 11:1; 29:9; and 71:10, where direct speech follows in each case (*Bib* 44 [1963]: 295f.).

In addition to the qal, the verb has a ni. (pass.) and a hi. (disputed in meaning, although likely causative; see 3b).

*mr* hitp. “to act proudly, boast” (Psa 94:4; perhaps also to be assumed in Isa 61:6) and the pertinent substantives *amr* or *emer*, “tree prunings, twig, branch,” are treated as a distinct root *mr* II by HAL 61a, 65a in contrast to GB 48a, 51.

In addition to the infrequent *qutl-* form *omer* “saying, information; thing,” the related (see 3c) *qitl-* formations *emer/imrâ* “word, pronouncement,” as well as the late Aramaizing word *ma<sup>a</sup>mâr* “word, command” (Wagner no. 149) occur as derived noms.; cf. also the Bibl. Aram. substantivized inf. *mêmar* “word, command.”

From the related NWSem. languages, the Ug. *amr* “wish, speech(?)” (WUS no. 284) and Yaudi *mrh* “speech, word, command(?)” (DISO 18; KAI no. 214.26, 32; cf. 2:221) may also certainly be mentioned.

On the PNs *maryâ(hû)* with the shortened forms *imrî* and perhaps *ômâr* and *immêr*, cf. IP 173; HAL 21b, 65f.; Gröndahl 99; Huffmon 168.

2. *mr* qal “to say,” with its 5,282 occurrences, is the most frequent verb in the OT (followed by → *hyh* “to be,” → *šh* “to do,” → *bô* “to come,” → *ntn* “to give,” → *hlk* “to go”), “one of the most common words in the language” (O. Procksch, TDNT 4:91). The basically equal distribution over the whole OT reflects this commonality, although a greater frequency is naturally encountered in the narrative texts than in legal texts or in poetic pieces.

*mr* qal occurs in all the books of the OT: Gen 603x (347x *wayyômer/wayyômar*, 81x *lêmor*), Exod 299x, Lev 80x, Num 244x, Deut 140x, Josh 136x, Judg 269x, 1 Sam 422x, 2 Sam 334x, 1 Kgs 326x, 2 Kgs 343x, Isa 241x, Jer 475x (163x *amar*, 49x *wayyômer*, 114x *lêmor*), Ezek 362x, Hos 20x, Joel 5x, Amos 52x, Obad 2x, Jonah 22x, Mic 10x, Nah 2x, Hab 3x, Zeph 4x, Hag 26x, Zech 109x, Mal 40x, Psa 99x, Job 97x, Prov 25x, Ruth 54x, Song Sol 2x, Eccl 20x, Lam 10x, Esth 52x, Dan 22x, Ezra 15x, Neh 61x, 1 Chron 72x, 2 Chron 184x. Among the 5,282 forms (Lis. does not take account of 1 Sam 4:16b and 17:10 *wayyômer*, 2 Kgs 16:7 *lêmor*, and Ezek 4:14 *wâomar*), 930x are formulaic *lêmor* (in addition to 9x *lêmor* as inf. with *le*), 2,069x are *wayyômer* or *wayyômar*, and 644 others are *waw*-cons. forms (Lis. incorrectly classifies 2 Sam 20:18a *lêmor*, 2 Kgs 9:17 *wyômar*, and 1 Chron 16:31 *wyômarû*).\*

*mr* ni. occurs 21x, hi. 2x; Aram. *mr* pe. 71x (Dan 65x, Ezra 5x, Jer 1x).

Of the substantives, *omer* occurs 6x, *emer* 48x, *imrâ* 37x, *ma<sup>a</sup>mâr* 3x (in Esth); Aram. *mêmar* 2x.

3. (a) *mr* qal means “to say, speak” (in context it is also possible to translate “to ask” or “to answer”; → *šl*, → *nh* I) and is the normal

introduction of direct or (less frequently) indirect speech (BrSynt 140). In contrast to *dbr* pi. (→ *dābār* III/1),  $\lambda mr$  never means “to speak” without indication of the content of the communication (GB 50; HAL 64a, on the apparent exceptions see *ibid.*; cf. HP 165n.192).

With respect to  $\lambda mr$ , the appearance of the so-called perfectum declarativum pf. (pf. of completion) of the 1st per. sg., a possibility for all verbs of speaking in the broadest sense (→ *qr*<sup>2</sup>, “to call,” → *brk* pi. “to bless,” → *šb*<sup>c</sup> ni. “to swear,” also → *ntn* “to give, declare transferred”), expressing the coincidence of statement and behavior:  $\lambda \bar{a}mar\hat{t}\hat{i}$  “I state hereby” (cf. Deut 32:40; Judg 2:3; 2 Sam 19:30; Isa 22:4; Psa 16:2 txt em; 31:15; 75:5; 119:57; 140:7; 142:6; Job 9:22; 32:10; cf. Berg., HG 2:27f.; BrSynt 40; D. Michel, *Tempora und Satzstellung in den Psalmen* [1960], 80, 92–95; E. Koschmieder, *Beiträge zur allgemeinen Syntax* [1965], 26–34); the formula *kōh*  $\lambda \bar{a}mar$  *yhw*h “thus says Yahweh (herewith, through me)” may also belong here.\*

God, people, animals (Gen 3:1; Num 22:28, 30), and—in the fable—trees (Judg 9:8ff.) are subjs. of  $\lambda mr$ . The speech announced by  $\lambda mr$  is appended in the majority of cases without transition; occasionally *lē* $\lambda m\bar{o}r$  (see below), *kī* (e.g., Gen 29:33; Exod 4:25; Judg 6:16), or  $\lambda \check{s}er$  (Neh 13:19, 22 “to command”) stands between introduction and that introduced (cf. Joüon §157c). The addressee is indicated by  $\lambda el$  or *le*; the same preps. also describe persons or things about which something is said. The acc. is used in cases such as Psa 41:6, “they speak wickedness against me,” with direct speech following, or when the verb should be translated “to mention” or “to name” (HAL 64a 3a-c; *le* may also be used for the latter).

$\lambda mr$  also frequently introduces direct speech following other verbs of speaking, either in the impf. cons. (after *dbr* pi., *nh*, and  $\lambda mr$  itself) or, very often, in the inf. with *l*<sup>c</sup> = *lē* $\lambda m\bar{o}r$  “in order to say, in that he said, with the words, as follows” (on the form, see BL 223, 370), after *dbr* pi.,  $\lambda \check{l}$ , *šwh* pi.,  $\lambda mr$  itself, etc.

In isolated, for the most part relatively late, passages,  $\lambda mr$  can mean “to command,” corresponding to the Aram. and Arab. usage. The usage in the sense of “to say to oneself” = “to think” is more frequent, often in the construction  $\lambda mr$  *b<sup>c</sup>libbô/* $\lambda el$ -*libbô/l<sup>c</sup>libbô* “to say in/to his heart” (cf. N. Bratsiotis, “Der Monolog im AT,” ZAW 73 [1961]: 30–70, esp. 46f.; on verbs of thinking → *hšb*). Instances of this and other features treated in this section are found in GB 50f. and HAL 64.

(b)  $\lambda mr$  ni. has a pass. sense (“to be said, to be called”) and is often used with an indefinite per. subj. (like Lat. *dicitur* “one says”).

On evidence for  $\lambda mr$  hi. “to cause to say” (Deut 26:17f.) cf. R. Smend, *Die Bundesformel* (1963), 7f., 33 (“to proclaim”); Th. C. Vriezen, “Das Hiphil von  $\lambda \bar{a}mar$  in Deut. 26,17.18,” JEOL 17 (1963): 207–10; von Rad,

*Deut*, OTL, 161f.; GB 51a.

(c) With respect to noms. of the root  $\text{ʾmr}$ , the differentiation of meanings is complicated because of specific passages in which the text is difficult or uncertain ( $\text{ʾōmer}$  in Hab 3:9; Psa 68:12; 77:9;  $\text{ʿēmer}$  in Job 20:29; Prov 19:7; 22:21). But the assessment of the term  $\text{ʿēmer}$  based on the suf. form  $\text{ʾimrô}$  of Job 20:29 is also contested (GVG 1:255: dissimilation of  $\text{ʾōmrô}$  to  $\text{ʾimrô}$ ; likewise BL 215, where the pl. and fem. forms with  $\text{ʾimr-}$  are explained as analogous formations). Perhaps the following reference points should be observed:  $\text{ʾōmer}$  never precedes a gen. or suf.; correspondingly, it has a very general meaning, in Psa 19:3f. “word” almost in the sense of “speech, language,” in Job 22:28 “matter, something” (cf. → *dābār*).  $\text{ʾimrâ}$  always appears (except for Psa 12:7[bis]) in the sg. and with a following gen. or suf., as a nomen unitatis in the meaning “individual (i.e., individually formed) saying, utterance” (of poetic or prophetic units in Gen 4:23; Deut 32:2; Isa 28:23; 32:9; otherwise, except for Isa 29:4, always of God’s word, 19x in Psa 119 as a separate theological entity). The fem. individualizing pls. in Psa 12:7, “the (individual) speeches of Yahweh are (in each instance) pure speeches,” conform to this usage; the masc. pl. of  $\text{ʿēmer}$  (the sg. is not attested at all, except for the textually uncertain passage Job 20:29) could form the collective pl. or the pl. of the totality (Nyberg 220; always with gen. or suf., except for Prov 19:7 and 22:21b; the meaning “sayings” is not “individual sayings” but “complete sayings” in all passages, even in Num 24:4, 16; Josh 24:27 “all”; Psa 107:11; Job 6:10, where “words of God” are discussed).\*

4. That God speaks is thoroughly obvious to the OT authors; when he keeps quiet, he is disturbed. This is not the place to go into the special problem of the speech and the word of God in the OT (cf. O. Procksch, *TDNT* 4:69f., 91–100; W. Zimmerli, *RGG* 6:1809–12; → *dābār* IV). Nevertheless, a few fixed formulae that discuss God’s speech, esp. in the prophetic literature, must be noted.

The usually narrative *wayyōʾmer yhw̄h/ʾlōhîm* “then Yahweh/God said” is very common; it occasionally acquires a somewhat more pregnant sense (e.g., Gen 1; cf. W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* [1964], 169–77; Westermann, *Gen*, CC, 1:110f.). Particularly significant is the no less frequent formula *kōh ʾāmar yhw̄h* “thus says Yahweh” (on the translation of the pf., see K. Koch, *Growth of the Biblical Tradition* [1969], 190; see above 3a), the common introduction of the prophetic Yahweh saying. Independently from one another, L. Köhler (*Deuterocesaja stilkkritisch untersucht* [1923], 102–5; id., *Kleine Lichter* [1945], 11–17) and J. Lindblom (*Die literarische Gattung der prophetischen Literatur* [1924], 106f.) have recognized the genre introduced with this expression as messenger speech, which has profane precursors. Following them, others have named the expression the “messenger formula” (e.g., H. Wildberger, *Jahwewort und prophetische Rede bei Jeremia* [1942], 46ff.; Westermann, *BFPS* 98ff.). The formula “thus says X” finds nontheological usage in Gen 32:4–6; similarly in Babylon and in the Amarna

correspondence (cf. Köhler, op. cit.; on pars. from Mari, see M. Noth, “History and Word of God in the OT,” *Laws in the Pentateuch and Other Studies* [1966], 179–93). A third formula, simple  $\text{ʔamar yhw}$  “says Yahweh,” appears rather frequently as an appendix to a messenger saying, occasionally even inserted into it (similar to  $\rightarrow n^{\text{e}}um yhw$ ; on the relationship of  $(k\bar{o}h) \text{ʔamar yhw}$  and  $n^{\text{e}}um yhw$ , see F. Baumgärtel, *ZAW* 73 [1961]: 278, 284ff.).

These examples make it clear that even the most everyday words could become characteristic of particular literary genres.  $db\bar{r} \text{ pi.}$  ( $\rightarrow d\bar{a}b\bar{a}r$  IV/1) and more specialized verbs such as  $\rightarrow \text{šwh pi.}$  “to command” are more likely than  $\text{ʔmr}$  to be used to describe a more specific divine discourse in the sense of a command or promise.

5. The usage of  $\text{ʔmr}$  at Qumran corresponds to that in the OT (incl. the usage of  $l\bar{e}^{\text{m}}\bar{o}r$ ). The verb acquires a fixed specialized meaning in 1QpHab and similar commentaries, where the words of Scripture are introduced with  $\text{ʔšr ʔmr}$  “when it says” (cf. K. Elliger, *Studien zum Habakuk-Kommentar vom Toten Meer* [1953], 124f.; E. Osswald, *ZAW* 68 [1956]: 245).

The LXX’s use of over 40 different Gk. equivalents to the verb reflects the unspecific nature of  $\text{ʔmr}$ , although *eipein* and *legein* predominate in numbers of occurrences (the distinction of  $\text{ʔmr} = \textit{legein}$  “to say, speak” from  $db\bar{r} \text{ pi.} = \textit{lalein}$  “to discourse” is maintained with great consistency).

The NT conforms to the OT usage, esp. in the narrative portions of the Gospels. The central meaning of the *logos* in individual NT writings is, at least linguistically, independent of the usage of  $\text{ʔmr}$  in the OT (cf. O. Procksch and G. Kittel, “λέγω,” *TDNT* 4:91–143).

S 589; BDB 58b; *HALOT* 1:71a; *TWOT* 129; *NIDOTTE* 638

1. Sem. languages have a short and a long form for the independent 1st sg. per. pron. An element *-k*, which distinguishes itself in NWSem. from ESem. by means of the final vowel (Akk. *anāku*, Ug. *ank*, Can. glosses in

EA 287:66, 69 *a-nu-ki*, Phoen.-Pun. and Old Aram.  $\text{ʔnk}$  and  $\text{ʔnky}$ , Hebr.  $\text{ʔānōkî}$ ), is appended in E. and NWSem. to a common Sem. \* $\text{ʔanā}$ . Quality and quantity of the final vowel of the short form are not uniform (on Old Bab. *ana* cf. Moscati, *Intro.* 103; *CAD* A/II:110f.; Ug. *an*, Phoen.  $\text{ʔn}$ , Hebr.  $\text{ʔānî}$ , Aram.  $\text{ʔānā}$ , Arab.  $\text{ʔanā}$ , Eth.  $\text{ʔana}$ ).

NWSem. languages (Ug., Phoen.-Pun., and Hebr.) use both the short and the long forms. In Ug. the long form predominates (approximately 5 to 1), appearing in poetic and particularly in prose texts. To date, the short form has been identified only in poetic texts. The short form and the more forceful long form could stand side by side (*KTU* 1.4.IV.59f.). In Phoen.-Pun. the short form is late and infrequent (Friedrich 111; *DISO* 19). In Hebr. the use of the long form has receded, probably under Aram. influence (cf. Wagner 130; see 2). In postbibl. Middle Hebr. the long form continues to appear only in bibl. citations.

2.  $\text{ʔānōkî}$  occurs 358x in the OT (63x bound to *we-*), and  $\text{ʔānî}$  occurs 870x (177x with *we-*).

OT	358	870	1,228	

With the exception of Obad and Nah, which have no instances of the independent sg. per. pron., the short form is represented in all OT books. The long form does not occur in Lev, Joel, Hab, Zeph, Hag, Song Sol, Eccl, Lam, Esth, Ezra, 2 Chron, and becomes less prominent in other late books; it predominates over the short form only in Gen, Deut, Josh, Judg, 1 Sam, Amos, and Ruth. The short form is esp. frequent in P, Ezek (long form only in Ezek 36:28), and Deutero-Isa (55:24), as well as in Trito-Isa (Isa 15:2). In Gen the ratio of the long to the short form is 39 to 19 in J, 16 to 13 in E, and 1 to 8 in P (source analysis following M. Noth, *History of Pentateuchal Traditions* [1972], 28ff.); cf. HAL 70a, which cites older literature on the statistics.

Short form and long form could follow one another (Exod 7:17; 2 Sam 3:13; Job 33:9); the sequence can also be reversed, however (Isa 45:12; Jonah 1:9).

3. The independent 1st sg. per. pron. allows the speaker to inject himself/herself emphatically into the discussion and to represent his/her concerns forcefully. This function of the personal pron. has been almost entirely lost in late texts (Eccl 2:11–13, 15).

The speaker is introduced by name (Gen 27:19; 45:3; Ruth 3:9), by title or profession (Gen 41:44; 1 Kgs 13:18), through reference to heritage or membership (Gen 24:24, 34; 1 Sam 30:13), by origin (2 Sam 1:8; Jonah 1:9), or by legal status (Gen 23:4; 2 Sam 14:5; Amos 7:14). The answer to

the question concerning identity is “(it is) I!” (= yes!) (2 Sam 2:20; 20:17; 1 Kgs 18:8). The speaker reports his/her status and condition (1 Sam 1:15; Psa 109:22; 119:141; Job 9:21). To superiors one describes oneself as “slave” (2 Sam 15:34; also used in diplomatic intercourse in cases of political dependence: 2 Kgs 16:7; cf. further L. Köhler, *ZAW* 40 [1922]: 43–45; Lande 30, 68ff.; H. Grapow, *Wie die alten Ägypter sich anredeten* [19602], 179–85). Interrogative exclamations express powerlessness, astonishment, and indignation (Gen 4:9; 30:2; 1 Sam 1:8; 2 Sam 3:8), as well as the speaker’s self-denigration and humble submission (Exod 3:11; 1 Sam 18:18; 2 Sam 7:18). Uses in the context of the oath (*ḥay ʾānî*, Num 14:21, 28 and a further 20x; *ḥay ʾānōkî*, Deut 32:40, the only passage with the long form; → *ḥyh* 3c) and the statement of one’s age (Deut 31:2; Josh 14:7; 2 Sam 19:36) are formulaic. One can identify oneself emphatically with another individual or with a group (Gen 31:44; Judg 7:18; 1 Sam 20:23), or distance oneself from one’s surroundings or even oppose them (Job 32:6). The per. pron. bound to *we-* is often used in contrasts (Gen 27:11; Exod 2:9; Josh 24:15; 1 Sam 17:45; 1 Kgs 12:11; Jer 36:18).

Whether one lends one’s words special force by means of repeated usage of the independent 1st sg. per. pron. depends on the concerns addressed, the degree of personal involvement, and the circumstances of the conversation (*ʾānōkî* with the pf.: Josh 7:20; 1 Sam 22:22; with the impf.: Gen 38:17; 1 Kgs 2:18). *kî* often introduces the per. pron. in subordinate clauses, as well as in relative clauses, frequently following a ptcp., in which case no particular force is intended. The preceding particles *gam* (Gen 21:26; 2 Kgs 2:3; Psa 71:22; Prov 1:26) and *ʾap*, preferred in later texts (Gen 40:16; Job 32:10, 17), can heighten the emphasis.

The impv. of → *rʾh* “to see” (2 Sam 7:2), replaced later by the demonstrative particle → *hinnēh* “behold, see,” directs the attention of the addressee in a special way to the speaker and his/her statement (Judg 7:17; cf. Gen 25:22).

4. First-per. statements of God appear primarily in the divine speeches of the patriarchal narratives, the legal portions of the Pentateuch, and the prophetic speeches. In post-exilic texts 1st per. statements of God become noticeably less prominent; often they are only citations of older formulae (Hag 1:13; 2:4). The “interpreting angel” replaces God (Zech 1:9; Dan 10:11ff.).

The independent 1st sg. per. pron. is used no differently in the divine speeches than in the human speeches. The presentation formula can begin divine speech that makes statements concerning God’s being and his behavior toward individuals or a community. The per. pron. bound to *we-* is used in contrasts of divine and human behavior and activity (Exod 4:15; 2 Sam 12:12; Isa 65:24; Hos 7:13; Jonah 4:10f.). Subordinate clauses and

relative clauses with ptcps. and per. prons. introduced by *kî* appear often in divine speeches. *gam* (Gen 20:6; Lev 26:24; Ezek 8:18) and *ʔap* (Lev 26:16; Psa 89:28) heighten the emphasis. *hinnēh* (Gen 28:15; Exod 4:23; 1 Sam 3:11; Jer 6:19; Ezek 37:5, 12, 19, 21; Amos 2:13) and the more forceful *hin<sup>c</sup>nî* (Gen 6:17; Ezek 5:8; 6:3; 34:11, 20) usually occur in reference to a new undertaking of God.

The self-presentation formula reveals God's name in association with his historical activity. God thus places the addressee under obligation. The revelation of the divine name enables the person to call on God (foundational: W. Zimmerli, "I Am Yahweh," *I Am Yahweh* [1982], 1–28; also K. Elliger, "Ich bin der Herr—euer Gott," FS Heim 9–34 = *KS* [1966], 211–31; R. Rendtorff, "Concept of Revelation in Ancient Israel," in *Revelation as History* [1968], 23–53). The self-presentation formula originates in polytheism and is broadly distributed in the ancient Near East (cf. A. Poebel, *Das appositionell bestimmte Pronomen der 1. Pers. Sg. in den westsemitischen Inschriften und im AT* [1932]). The deity's reference to his own deeds and characteristics lends the self-presentation formula the character of self-praise (in the OT in Deutero-Isa: Isa 44:24; 45:7; also in judgment and disputation speeches; cf. Westermann, *Isa 40–66*, OTL, 154–62; H.-M. Dion, "Le genre littéraire sumérien de l'hymne soi-même' et quelques passages du Deutéro-Isaïe," *RB* 74 [1957]: 215–34).

The OT self-presentation formula is an independent nom. phrase, both in the short form "I am Yahweh" and in the more complete form "I am Yahweh, your God." Yahweh does not appear as a stranger, but refers, in the context of the announcement of his name, to already well-known things and earlier events (Gen 15:7; 26:24; 28:13; 31:13; Exod 3:6; also Hos 12:10; 13:4). The appended promise speech places the future activity of God in this historical context. The self-presentation formula is not likely to have been originally associated with the proclamation of the law. The short form here, as in the exilic prophets, is a pregnant summary of the divine claim to power that derives from God's self-manifestation in Israel's history (on P cf. Lev 18–19 passim; on Deutero-Isa cf. Isa 45:21; 43:11; 45:22; 48:12).

In association with the verb *yd<sup>c</sup>*, the self-presentation formula becomes the recognition formula ("know that I am Yahweh!"). Knowledge of Yahweh takes place in the context of his historical self-manifestation (cf. the exodus tradition). The association of the recognition formula with impending events is a characteristic of exilic prophecy (in Ezek predominantly in the context of judgment sayings; in Deutero-Isa in conjunction with grant and call oracles: Isa 49:23, 26; 45:2f., 5f., 7).

5. On Qumran see S. Mowinckel, "Jeg'et i Qumransalmene," *NTT* 62 (1961): 28–46; on the NT see esp. E. Stauffer, "ἐγώ," *TDNT* 2:343–62;

also E. Schweizer, *Ego eimi* (19652), 12ff.; on the milieu: E. Norden, *Agnostos theos* (1960 = 1913), 177ff.

אסף  $\lambda sp$  **to collect** → קבץ  $qbs$

אף  $\lambda ap$  **anger**

S 639; BDB 60a; HALOT 1:76b; TDOT 1:348–60; TWOT 133a; NIDOTTE 678

1. The root  $\lambda np$  is common Sem. The subst. \* $\lambda np$  - (> \* $\lambda app$  -) “nose” derives from it (Berg., *Intro.* 212; P. Fronzaroli, *AANLR* 8/19 [1964]: 269). In turn, the subst. was the occasion for the formation of the denominative verb  $\lambda np$  in some Sem. languages.

Except in SSem., the subst., with assimilation of the middle radical and frequently in the dual, occurs regularly in all Sem. dialects in the meaning “nose” (Akk. *appu*, *AHW* 60; *CAD* A/II:184–89; Ug. *ap*, *WUS* no. 344; *UT* no. 264; on the Old Aram., cf. *DISO* 21; Imp. Aram. and Bibl. Aram.  $\lambda npôhî$  “his face,” Dan 2:46; 3:19, once again written with *n*). It is construed as masc. (K. Albrecht, *ZAW* 18 [1896]: 78).

By contrast, the verb  $\lambda np$  “to snort (in anger),” which may be denominative (Mandl. 131; cautiously, O. Grether, *TDNT* 5:392 nn.56f.), is attested only in Hebr. (qal and hitp.), Moab. (*KAI* no. 181.5), Akk. (*AHW* 320a), and Arab. (in the meaning “to disdain, scorn,” Wehr 31).

PNs formed on this root are  $\lambda appayim$  (1 Chron 2:30f.; Nöldeke *BS* 102: “little nose”; *IP* 227: “with a large nose”) and  $h^a rûmap$  (Neh 3:10; *IP* 227: “with a cleft nose”).

$\lambda nāpâ$  (Lev 11:19; Deut 14:18), an unclean species of bird with many varieties (unidentified; cf. *HAL* 70b; *IDB* 2:596; *BHH* 3:1578; G. R. Driver, *PEQ* 87 [1955]: 17f.), may be associated with the same root.

2. The verb  $\lambda np$  occurs 14x in the OT, 8x in the qal, 6x in the hitp. (the latter always in the Dtn-Dtr linguistic domain).

The use of the word  $\lambda ap$  is widely attested. The sg. occurs 235x in the OT (excl. Hab 2:15, where the conjunction  $\lambda ap$  may be attested), 25x in the meaning “nose,” 42x with reference to human, and 168x with reference to divine anger.

The dual *ʔappayim* is attested 42x (1 Sam 1:5 drops out of this group through emendation). The two specimens from the Aram. portions of the OT should also be understood as duals (“countenance”; F. Schulthess, ZAW 22 [1902]: 164).

The following list catalogs occurrences of the verb (qal, hitp.), the sg. *ʔap* (HA = human anger, DA = divine anger), and the dual *ʔappayim*.

						42

3. (a) The starting point is the concrete meaning of the subst. as a designation of

the body part “nose.” The dual form *ʔappayim* means “the two sides of the nose, the two nostrils” through which the breath of life enters and exits (Gen 2:7; 7:22); this concrete meaning is still fundamental even in Exod 15:8 and Lam 4:20 (perhaps also in *KAI* no. 224.2; cf. *KAI* 2:266; Fitzmyer, *Sef.* 104).

This is also true in Akk., where numerous occurrences demonstrate the original usage of the word to indicate the body part: piercing of the nose, amputation of the nose, etc. (*AHW* 60; *CAD* A/II:184–89).

As a *pars pro toto*, the dual form indicates the whole countenance (Gen 3:19; Aram. Dan 3:19) and found a firm place in the idiom “to fall on one’s face in greeting” (Gen 42:6; 48:12; 1 Sam 20:41; 24:9; 25:41; 28:14; 2 Sam 14:4, 33; 18:28; 24:20 = 1 Chron 21:21; 1 Kgs 1:23, 31; Isa 49:23; cf. Aram. Dan 2:46; before divine messengers, Gen 19:1; Num 22:31; in prayer, Neh 8:6; 2 Chron 7:3; 20:18; cf. also 1 Sam 25:23 *Iʔappé* “before”); cf. Akk. *appa labānu* “to prostrate oneself humbly” (*AHW* 522).

The dual is used fig. in the phrase *ʔerek ʔappayim* “patient” to indicate human (Prov 14:29; 15:18; 16:32; *ʔōrek ʔappayim* “patience” 25:15) and divine patience (Exod 34:6; Num 14:18; Jonah 4:2; Nah 1:3; Psa 86:15; 103:8; 145:8; Neh 9:17), and in the phrase *qʕsar-ʔappayim* to indicate impatience (Prov 14:17; cf. 14:29 with *rūaḥ*).

The fig. meaning “anger” occurs in only two (disputed) passages: Prov 30:33b and Dan 11:20 (cf. comms.).

(b) The sg. *ʔap* also indicates the body part, first of all.

Of humans: Num 11:20; Ezek 23:25; Amos 4:10; Prov 30:33a; Song Sol 7:5; as the seat of breath: Isa 2:22; Job 27:3; Song Sol 7:9; rings as ornamentation: Gen 24:47; Isa 3:21; Ezek 16:12; for chastisement: 2 Kgs 19:28 = Isa 37:29; of animals: Job 40:24, 26; Prov 11:22. Cf. also the somewhat more fig. usage *śîm ʔap* “to be determined” (Job 36:13; *HAL* 74b) and *gōbah ʔap* “snobbery” (Psa 10:4). Of gods: Psa 115:6; of God: see 4a.

As in the other Sem. languages, e.g., Akk. *appu* “nose,” it is also a term for the highest point or the peak of an object, etc. (*AHW* 60); Ug. *ap zd* “nipple,” *ap lb* “breast” (*WUS* no. 344), *ap tgr* “gateway” (*UT* no. 264); in NWSem. also “surface” (*KAI* no. 222A.28; no. 228A.14; cf. Fitzmyer, *Sef.* 15 “face”); Arab. *ʔanf* “nose; projection, spur (of a mountain)” (*Wehr* 31).

(c) Much more frequently *ʔap* indicates “anger,” with an easily understood development of meaning from “nose” to the gesture of “snorting” (in anger), which manifests itself in this body part (cf. Dhorme 80f.; Ug.: *WUS* no. 345; ? Aram. Cowley, no. 37.8; cf. *DISO* 21). In almost half the passages that treat human wrath, *ʔap* is associated with the verb → *ḥrh* “to become inflamed” (or the subst. *ḥʕrî*, primarily in narrative literature:

Gen 30:2; 39:19; 44:18; Exod 11:8; Num 22:27; 24:10; Judg 9:30; 14:19; 1 Sam 11:6; 17:28; 20:30, 34; 2 Sam 12:5; Isa 7:4; Psa 124:3; Job 32:2[bis], 3, 5; 2 Chron 25:10[bis]). A holy wrath seizes a person when the Spirit of Yahweh comes over him (Judg 14:19; 1 Sam 11:6). Wrath can turn away (*šûb* Gen 27:45); this is esp. the merit of discerning patterns of behavior (Prov 29:8).

4. (a) That the gods' noses (Psa 115:6), indeed even Yahweh's (Deut 33:10; 2 Sam 22:9, 16 = Psa 18:9, 16; on Ezek 8:17 txt? cf. Zimmerli, *Ezek*, Herm, 1:222, 244f.; the dual in Exod 15:8) can also be mentioned reflects the OT's anthropomorphic conceptualization.

(b) Indeed, most instances of *ʾap* refer to divine anger (168x). All cases of the verb *ʾnp* qal/hitp. describe divine anger, as does the statement in the Mesha inscription (*KAI* no. 181.5; *DISO* 19; *ANET* 320b): the god Chemosh is angry with his people.

The motivation for God's reaction may indeed be understood in terms of similar human patterns of behavior but may not be derived from them; God responds to human deeds that violate his being and commandments (on the ethical motivation, see Vriezen, *Theol.* 303–9). It may not be derived because, according to the OT perspective, divine activity answers to no tribunal, a clear expression that equal partners do not confront one another here, but that the creator confronts his creation, the lawgiver the one obligated to obey, the lord his subjects. The old pentateuchal sources already express the fact that the people can be the object of divine anger (Num 11:1, 10, 33 [J]; Exod 32:10–12, 22 [E]), but the 8th- (Hos 8:5; Isa 5:25, etc.) and 7th-cent. prophets particularly emphasize it. Esp. Jeremiah (all 24 passages exclusively of divine anger, often with other expressions, e.g., 21:5) and after him Ezekiel (11x, except for 7:3 and 43:8, always par. to → *ḥēmâ*, 25:14 and 38:18 are not directed at Israel) speak in oppressive frequency of God's anger.

In addition, it remains palpable throughout the OT that divine anger is, in the final analysis, an unexplainable reaction of a divine Lord, conceived of as a person, who defies clear conceptual definition because this Lord has revealed himself of his own free will to his people in a humanly inconceivable manner. Thus divine anger appears as a necessary correlation to divine love seeking the deliverance of his people (cf. e.g., Exod 4:14; also Psa 30:6).

For the most important expressions associated with or par. to *ʾap*, cf. the articles treating → *ḥrh* (*ḥārôn*), → *ḥēmâ*, → *ʿebrâ*, → *qsp*, → *qn?*, also → *šûb* (qal/hi.); further, *zaʿam* “wrath, curse” (Isa 10:5, 25; 30:27, etc.), → *zaʿap* “rage” (Isa 30:30), Aram. *regaz* “rage” (Dan 3:13).

For orienting overviews and bibliogs. on the theme “God's wrath” cf.

Eichrodt 1:258–69; Jacob 114–17; O. Grether and J. Fichtner, “ὀργή,” *TDNT* 5:392–412; *RGG* 6:1929–32; *IDB* 4:903–8; *BHH* 3:2246–48; further e.g., R. V. Tasker, *Biblical Doctrine of the Wrath of God* (1951); J. Gray, “Wrath of God in Canaanite and Hebrew Literature,” *Journal of the Manchester University Egyptian and Oriental Society* (1947–53): 9–19; H. Ringgren, “Einige Schilderungen des göttlichen Zorns,” *FS Weiser* 107–13.

5. The ambivalent essential characteristics anger and love are also fruitful components for the NT. Cf. F. Büchsel, “θυμός,” *TDNT* 3:167–72; G. Stählin, “ὀργή,” *TDNT* 5:419–47.

G. Sauer

אֶפֶר *ēper* **dust** → עָפָר *‘apār*

אֶרַח *‘ōrah* **way** → דֶּרֶךְ *derek*

אֶרִי *‘arī* **lion**

S 738; BDB 71b; *HALOT* 1:87a; *TDOT* 1:374–88; *TWOT* 158a; *NIDOTTE* 787

1. In addition to *‘arī*, Hebr. has *‘aryēh*, apparently an early Aram. loanword (cf. Wagner no. 28); the OT attests both forms from the very earliest layers of material. In the meaning “lion,” the word is otherwise known only in Aram. (*KAI* no. 223A.9; Fitzmyer, *Sef.* 80f., 86; Aḥ. 88f., 110, 117 = *ANET* 428b, 429a; Bibl. Aram. and later: *KBL* 1053f.; *DISO* 24).

Scholars have conjectured etymological relationships to a common Sem. word for “(large, wild, numinous) animal” (Berg., *Intro.* 210; E. Ullendorff, *VT* 6 [1956]: 192f.; Wagner no. 28; P. Fronzaroli, *AANLR* 8/23 [1968]: 280, 282, 292, 300f.), which has become specialized in individual languages to refer to various animals (Eth. *‘arwē* still “beast,” Dillmann 743; Akk. *a/erû* “eagle,” W. von Soden, *AfO* 18 [1957/58]: 393; *AHw* 247; in addition, however, *arwûm* “gazelle,” *AHw* 73; Arab. *‘arwīyat* “ibexes,” etc.; cf. *HAL* 84b, 85a). According to L. Köhler (*ZDPV* 62 [1939]: 121–24), the origin of the word, like the animal so designated, should be sought in the Hamitic realm (Eg. *rw*, etc.); J. J. Glück’s suggestion (*ZAW* 81 [1969]: 232–35) is purely conjectural.

2. The sg. <sup>ʔ</sup>lî occurs 17x (incl. 2 Sam 23:20 Q; Lam 3:10 Q), <sup>ʔ</sup>aryēh 45x (excl. 2 Sam 23:20 K; Lam 3:10 K), the pl. <sup>ʔ</sup>rāyîm 1x (1 Kgs 10:20; cf. v 19), <sup>ʔ</sup>rāyôt 17x; the distribution of the total of 80 occurrences exhibits no peculiarities (1 Kgs 13x, Jer 8x, Isa 7x, Psa 6x).

In addition, Bibl. Aram. <sup>ʔ</sup>aryēh occurs 1x (Dan 7:4) and the pl. det. <sup>ʔ</sup>aryāwātāʔ 9x (Dan 6:8–28).

3. (a) <sup>ʔ</sup>lî indicates the grown (male or female) lion.

The synonyms <sup>ʔ</sup>lābîʔ and <sup>ʔ</sup>layiš occur only in poetical texts.

<sup>ʔ</sup>lābîʔ occurs 11x in the OT, in addition to the fem. <sup>ʔ</sup>lābîyâ 1x and the pls. <sup>ʔ</sup>lābîyîm or <sup>ʔ</sup>lābîyôt 1x each. Cf. Akk. *lābu/labbu* (AHw 526); Ug. *lbu*, also in PNs (WUS no. 1435; UT no. 1347; Gröndahl 154; cf. Huffmon 225); Phoen., among other usages, in PNs <sup>ʔ</sup>bdlbʔ (KAI no. 21; cf. 2:29); Aram., Aḥ. 117 (Cowley 239); Arab. *lab(u)ʔat* (Wehr 854), etc. There may also be connections with the Gk. *leōn* (KBL 472a; AHw 526).

<sup>ʔ</sup>layiš occurs 3x (Isa 30:6; Job 4:11; Prov 30:30) and has counterparts in Akk. *nēšu* (AHw 783a), Jew. Aram. <sup>ʔ</sup>lētāʔ (Dalman 217b), and Arab. *layt* (Wehr 886).

Other designations for the lion are qualifiers: <sup>ʔ</sup>gûr means the suckling lion cub (Gen 49:9; Deut 33:22; Ezek 19:2f., 5; Nah 2:12; also used in Lam 4:3 of the jackal; <sup>ʔ</sup>gôr Jer 51:38 and Nah 2:13; cf. HAL 177b on the Sem. counterparts), <sup>ʔ</sup>šahāl the weaned youngster (Hos 5:14; 13:7; Psa 91:13; Job 4:10; 10:16; 28:8; Prov 26:13; see Köhler, op. cit.; cf. also S. Mowinckel, FS Driver 95–104), <sup>ʔ</sup>k<sup>c</sup>pîr (31x), the young lion already hunting independently (cf. BS 70n.10; J. Blau VT 5 [1955]: 342). The symbolic value of these expressions is the same; in poetic texts two designations for lion are generally par.

The lion is feared as a predator that threatens people and animals (Amos 3:12; 5:19; Prov 22:13; 26:13; mentioned together with other predators such as the bear and the wolf in 1 Sam 17:34ff.; Jer 5:6; Prov 28:15). It inhabits primarily the Jordan rift (Jer 49:19 = 50:44) and mountainous regions (Song Sol 4:8).

(b) The lion frequently appears in comparisons. Points of comparison are its strength (Judg 14:18; 2 Sam 1:23; Prov 30:30), its ferocity (Gen 49:9; Num 23:24; Isa 5:29; Nah 2:13; Psa 104:21), and its treacherous slyness (Psa 10:9; 17:12).

Because it is the strongest animal, the lion is the symbol of power and courage (2 Sam 17:10; 23:20 = 1 Chron 11:22; 1 Chron 12:9). Its place in the language of blessing should be understood from this perspective: the Balaam oracles describe Israel as a lion (Num 23:24; 24:9); the blessings of Jacob and Moses describe Judah, Gad, and Dan similarly (Gen 49:9; Deut 33:20, 22; alongside <sup>ʔ</sup>lî stand <sup>ʔ</sup>lābîʔ and <sup>ʔ</sup>gûr). Later, the description

of Israel as a lion is taken up in other speech forms (Ezek 19:1–9; Mic 5:7).

The ferocity of the lion gives occasion for comparison with the behavior of despotic rulers in prophetic (Ezek 22:25; Zeph 3:3) and wisdom (Prov 28:15; cf. 20:2) texts.

At the same time, the lion, on account of its dangerousness and treachery, is a favorite image for the “enemy” in individual laments (Isa 38:13; Psa 7:3; 10:9; 17:12; 22:14, 17?, 22; Lam 3:10; cf. Jer 12:8; in Psa 35:17 and 58:7 *k<sup>e</sup>pîr*). Prophecy compares threatening powers in the politico-historical sphere, primarily the foreign nations threatening Israel, to the lion (Isa 5:29; 15:9; Jer 2:30; 4:7; 5:6; cf. also Dan 7:4); the image lives on as a description of danger in post-exilic prophecy as well (Joel 1:6). 1 Kgs 13:24ff. and 2 Kgs 17:25f. employ this motif in a popular fashion.

It is not only in Israel that the lion indicates the power that threatens people; cf. e.g., the mention of the lion in a curse formula *KAI* 223A.9 (D. R. Hillers, *Treaty-Curses and the OT Prophets* [1964], 54–56).

Descriptions of the time of salvation speak of the fact that the lion will no longer exist (Isa 35:9) or that it will become a docile animal (Isa 11:6f.; 65:25).

Lion figures are essential in the architectural symbolism of temple and palace (alongside bulls, birdlike creatures, and palms; 1 Kgs 7:29, 36; 10:19f. = 2 Chron 9:18f.).

These animals had religious significance in Canaanite religion. On the one hand, one may think of gods such as El, Baal, and the mother goddess with their holy animals, the bull and the lion; on the other hand, such lions are also imitations of tamed lions with guard functions (cf. B. Brentjes, *WZ Halle-Wittenberg* 11 [1962]: 595ff.).

On the significance of the lion in Egypt, cf. C. de Wit, *Le rôle et le sens du lion dans l’Égypte ancienne* (1951).

The lion figures of Ezekiel’s throne-chariot vision are inspired by the images of the temple lions (Ezek 1:10; 10:14).

4. Yahweh’s activity is frequently compared with the lion’s behavior. As a rule, the image encompasses the frightening and threatening elements of his coming to judge (Jer 50:44 = 49:19; Hos 5:14; 13:7, 8 txt?; Job 10:16; but cf. Fohrer, *KAT* 16, 200; Lam 3:10; negated in Hos 11:10, provided that v 9 goes with this, cf. Rudolph, *KAT* 13/1, 213). This imagery is consonant with the fact that portrayals of theophanies use the verb *š<sup>ʔ</sup>g*, which probably originally referred only to the roaring of the lion (of thunder in Job 37:4), 5x for the terrifying speech of Yahweh (Jer 25:30 3x; Amos 1:2; Joel 4:16; always with *ntn qôl* “to raise the voice,” of the lion Jer 2:15; Amos 3:4; H. Gressmann, *FS Baudissin* 198f., cites an Eg. par.).

Yet this comparison can also emphasize Yahweh's strength and invincibility in the context of his saving intervention in the history of his people (Isa 31:4; Hos 11:10, which is not Hoseanic; cf. Wolff, *Hos*, Herm, 195, 203); correspondingly, *šg* also expresses God's might in these contexts (Hos 11:10[bis]).

Amos compares Yahweh's speech to his prophet with the lion's roar (Amos 3:4, 8). Just as the roar of the lion is a dramatic indication that it has taken prey, so the preaching of the prophet is a consequence of the fact that Yahweh has constrained him.

The OT can use the image of the lion in reference to Yahweh without embarrassment because Israel had no polemic against a lion cult (by contrast, the bull may not be associated with Yahweh); cf. J. Hempel, *ZAW* 42 (1924): 88–101 = *Apoxyismata* (1961), 14–26.

5. In the NT some reminiscences of the function of the lion in the OT are apparent; in particular, the antigod power, now Satan, is compared with the lion: 1 Pet 5:8, citing Psa 22:14; on other passages cf. W. Michaelis, “λέων,” *TDNT* 4:251–53.

F. Stolz

## אָרֶץ *ʿeres* earth, land

S 776; BDB 75b; *HALOT* 1:90b; *TDOT* 1:388–405; *TWOT* 167; *NIDOTTE* 824

1. *ʿeres* “earth, land” (root with vocalized emphatic interdental; cf. Moscati, *Intro.* 28–30) is common Sem. (Berg., *Intro.* 214) and is attested in the following forms with an essentially constant meaning: *ʿrš* Ug. (*UT* no. 376; *WUS* no. 420), Phoen., Pun., Moab. (*DISO* 25f.); *eršetu* Akk., (with a fem. ending; Old Akk. *aršatum* in a PN; cf. *CAD* E:311a); *ʿrq* or later *ʿr* Aram. (*DISO* 25f.; on the transition from *q* to *ʿ*, see W. Baumgartner, *ZAW* 45 [1927]: 100f. = *Zum AT und seiner Umwelt* [1959], 88; in Jer 10:11 *ʿarqāʿ* still stands beside *ʿarʿā*); *ʿrd* Arab. and Old SArab.; *ʿard* Tigr. (in Eth. replaced otherwise by *medr*).

The noun consistently appears as a fem.; a reminiscence of the concept of mother earth may have been retained in this form (see 4a).

Job 34:13 and 37:12 (cf. perhaps Isa 8:23 as well) attest to the form *ʿaršâ*, accented on the first syllable by the Masoretes as a locative, although no locative

meaning is present. It is usually suggested, retaining the *-h*, to read *ʔaršōh* (cf. *BHS* and comms.; cf. also the Mesha inscription, *KAI* no. 181.5–6 *bʔršh* “toward his land”; *ANET* 320b “at his land”; BL 252; Meyer 1:95). But one should not judge the variants noted in *BHS* as the older readings, nor is the suf. form in the context of Job 34:13, in particular, very sensible. Should one consider it a weakened acc. or locative ending (so GKC §90f; BL 528), or is it a by-form with an expressly fem. ending (cf. Akk. *eršetū*, Aram. *ʔrqtʔ/ʔrštʔ*, KBL 1054b)?

Only Bibl. Aram. *ʔarʕ(t)* “what is beneath, ground” in Dan 6:25 can be noted as a derivative (BLA 197).

The PN *ʔaršāʔ*, which occurs in 1 Kgs 16:9, has nothing to do with *ʔereš*, but, according to *IP* 230, is to be associated with Arab. *ʔaraḍat* “wood-worm” (contra Montgomery and Gehman, *Kings*, ICC, 289; J. Gray, *Kings*, OTL [19702], 361).

2. *ʔereš* is the fourth most common subst. in the OT. The term occurs 2,504x in the Hebr. OT in a regular distribution, 22x in Aram. Only 77 of the Hebr. occurrences offer the pl., which is thoroughly understandable given the meaning of the term: the pl. makes sense only for a small part of the full range of the term’s meaning.

The statistics for the individual books are: Gen 311x, Exod 136x, Lev 82x, Num 123x, Deut 197x, Josh 107x, Judg 60x, 1 Sam 52x, 2 Sam 40x, 1 Kgs 56x, 2 Kgs 71x, Isa 190x, Jer 271x, Ezek 198x, Hos 20x, Joel 12x, Amos 23x, Obad 1x, Jonah 2x, Mic 15x, Nah 3x, Hab 10x, Zeph 8x, Hag 5x, Zech 42x, Mal 2x, Psa 190x, Job 57x, Prov 21x, Ruth 4x, Song Sol 2x, Eccl 13x, Lam 11x, Esth 2x, Dan 20x, Ezra 13x, Neh 20x, 1 Chron 39x, 2 Chron 75x; Aram. *ʔaraq.* Jer 1x; *ʔaraʕ.* Jer 1x, Dan 19x, Ezra 1x; furthermore *ʔarʕ* 1x in Dan. Not included is the variant *ʔāreš* (Bombergiana) instead of *ʔedeq* (*BHS*) in Prov 8:16.\*

3. (a) *ʔereš* indicates (1) cosmologically: the earth (in contrast to heaven) and the dry land (in contrast to the waters); see 3b; (2) physically: the ground on which one stands (3c); (3) geographically: individual regions and parcels of land (3d); (4) politically: some governed areas and countries (3e).

Which spheres of usage are primary and which secondary may not be deduced from the OT evidence; criteria for a development must be applied to the texts. On the entire problem, cf. L. Rost, “Die Bezeichnungen für Land und Volk im AT,” FS Procksch 125–48 = *KC* 76–101.

The meaning “city” for *ʔereš* in Prov 29:4; 31:23; and Eccl 10:16 (LXX *polis*) has been suggested (cf. Dahood, *PNSP* 62f.; id., *Bib* 44 [1963]: 297f.; 47 [1966]: 280) with reference to (surely ambivalent) Phoen. pars. (*KAI* no. 14.16, 18 *šdn ʔrš ym*, “Sidon of the sea-land”; cf. *ANET* 662b: “Sidon-by-the-Sea”; Eissfeldt, *KS* [1963], 2:227ff.).

(b) In its most comprehensive meaning  $\lambda ere\dot{s}$  indicates the earth that, together with heaven ( $\rightarrow \check{s}\bar{a}mayim$ ), constitutes the entire world, the cosmos. “Heaven and earth” is a common expression for “world” (Gen 1:1; 2:1, 4; 14:19, 22, etc.; cf. B. Hartmann, *Die nominalen Aufreihungen im AT* [1953], 60; in addition to the series noted there, numerous other occurrences appear in parallelism, in all at least 75 examples).

The sequence “heaven-earth,” notable in the overwhelming majority of occurrences, still mirrors the mythical conception of the (primary) heavenly and the (secondary) earthly world. The sequence “earth-heaven” appears only either where movement from the earth to heaven is meant (Ezek 8:3; Zech 5:9; 1 Chron 21:16) or where an unequivocally geocentric worldview dominates (Gen 2:4b and Psa 148:13). The proposals of B. Hartmann (“Himmel und Erde im AT,” *SThU* 30 [1960]: 221–24) must be modified accordingly. For the Mesopotamian pars., see A. Jeremias, *Handbuch der altorientalischen Geisteskultur* (1929), 127.

No proper, specific expression for “world” occurs in the OT; cf. further the paraphrase with  $\rightarrow k\bar{o}l$  “everything, the universe” in Isa 44:24; Jer 10:16; Psa 103:19. The infrequent word *ḥeled* “lifetime” (Psa 39:6; 89:48; Job 11:17; cf. Arab. *ḥalada* “eternal”) acquires the meaning “world” in Psa 49:2 (the text of Psa 17:14 is uncertain) in a manner similar to postbibl.  $\rightarrow \acute{o}l\bar{a}m$ , Gk. *aiōn* “aeon,” and Ger. *Welt* (originally “era,” in imitation of Lat. *saeculum*; cf. Kluge 853b).\*

Alongside the bipartite worldview, a tripartite view also occurs, which arises ad hoc, for the most part, e.g., heaven-earth-sea (Exod 20:11; cf. Gen 1:10, 20, etc.), heaven-earth-water under the earth (Exod 20:4; Deut 5:8). A triad heaven-earth-netherworld ( $\rightarrow \acute{s}^{\acute{o}}l$ ) seems occasionally to be presupposed; cf. the description of the netherworld as  $\lambda ere\dot{s} taḥtīt$  or  $taḥtīyōt$  (Ezek 26:20; 31:14, 16, 18; cf. Zimmerli, *Ezek*, Herm, 2:32, 39) and the related expressions  $taḥtīt$  or  $taḥtīyōt (h\bar{a})\lambda are\dot{s}$  (Isa 44:23; Psa 63:10; 139:15), as well as Psa 115:15–17, among others.

In a few passages, the simple  $\lambda ere\dot{s}$  also at least approaches the meaning “netherworld” (cf. Akk. *eršetu*, *AHw* 245; *CAD* E:310f.; K. Tallqvist, *Sum.-akk. Namen der Totenwelt* [1934], 8ff.; *HAL* 88a: Exod 15:12; Jer 17:13; Jonah 2:7; Psa 22:30; 71:20; see further M. Dahood, *Bib* 40 [1959]: 164–66; 44 [1963]: 297).

If one conceptualizes the cosmos more precisely (esp. in later texts), one views the earth in dependence on ancient Near Eastern concepts (cf. Jeremias, op. cit. 117ff.) as having arisen through the division of the primal waters ( $\rightarrow t^{\acute{h}}\acute{o}m$ ; Gen 1; Prov 8:27–29) and as still resting upon columns in the water (1 Sam 2:8; Psa 24:2; 104:5f.; 136:6; cf. Gen 49:25; Exod 20:4; Deut 5:8; Psa 82:5; Isa 24:18; Jer 31:37; Mic 6:2, among others); the vault of heaven is anchored in the earth (Amos 9:6).

Job 26:7, which says that God spread the earth over the void, preserves another concept, according to which the earth is hung like a piece of cloth. According to Job 38:12f. the dawn grasps the borders of the earth and shakes the evildoers off it. The same concept occurs in the Akk. “Great Hymn to Šamaš” or “Hymn to the Sun-God” (I:22): “Thou (Šamaš) art holding the ends of the earth suspended from the midst of heaven” (ANET 387b; cf. SAHG 241; BWL 126f.).

The earth-water concept envisions the earth as a disk (Isa 40:22 *ḥûg hāʾāreš* “circle of the earth”; cf. Prov 8:27; Job 26:10 txt em; also Job 22:14), but the numerous passages that speak of the (four) borders (the cloth image), ends, corners, or points belong to the other conceptual context: *kanpôt hāʾāreš* (Isa 11:12; Ezek 7:2; Job 37:3; 38:13; cf. Isa 24:16), *ʾapsê (hā)ʾāreš* (Deut 33:17; 1 Sam 2:10; Isa 45:22; 52:10; Jer 16:19; Mic 5:3; Zech 9:10; Psa 2:8; 22:28; 59:14; 67:8; 72:8; 98:3; Prov 30:4), *qʾšê hāʾāreš* (Deut 13:8; 28:49, 64; Isa 5:26; 42:10; 43:6; 48:20; 49:6; 62:11; Jer 10:13; 12:12; 25:31, 33; 51:16; Psa 46:10; 61:3; 135:7; Prov 17:24), *qʾšôt hāʾāreš* (Isa 40:28; 41:5, 9; Job 28:24), *qašwê ʾereš* (Isa 26:15; Psa 48:11; 65:6). On analogous conceptualizations in Mesopotamia, cf. Jeremias, op. cit. 142–48. The two concepts stand side by side without tension in the OT; elements with origins in either of the two notions could—both in Mesopotamia and in Israel—be combined without difficulty (cf. e.g., Job 38:4–13, etc.).

Regardless of whether one speaks of the earth as a disk or of the “ends” of the earth, the question of the center of the earth arises. Ezek 38:12 mentions the *ṭabbûr* “navel” of the world (cf. 5:5 and Judg 9:37; see HAL 352b and Zimmerli, *Ezek*, Herm, 2:311, with references to ancient Near Eastern and Gk. pars.).

To be sure, the OT is not concerned with the earth as part of the cosmos so much as with that which fills the earth (*ʾereš ûmʾlōʾāh*, Deut 33:16; Isa 34:1; Jer 8:16, etc.), its inhabitants (Isa 24:1, 5f., 17; Jer 25:29f.; Psa 33:14, etc.), peoples (Gen 18:18; 22:18; 26:4; Deut 28:10, etc.), kingdoms (Deut 28:25; 2 Kgs 19:15, etc.), and the like. Thus the term “earth” in some passages can indicate—as in other languages—both the earth and its inhabitants (Gen 6:11, etc.).

*tēbēl* “mainland, circle of the earth” (→ *ʾbl* 1, 2) frequently parallels *ʾereš* in these contexts.

(c) Physically, *ʾereš* indicates the ground on which people and things stand, the dust lies (Exod 8:12f.), creeping things creep (Gen 1:26; 7:14; 8:19, etc.), the slaughtered lie (Lam 2:21), etc. On it fall rain and dew (Gen 2:5; 7:4; Exod 9:33; Job 5:10; 38:26, etc.), captured birds (Amos 3:5), the pebble (Amos 9:9), the toppled evildoer (Ezek 28:17; Psa 147:6), etc. On it sits the mourner (2 Sam 12:17, 20; Ezek 26:16; Job 2:13, etc.), as well as the dejected (Isa 47:1; Obad 3, etc.); one bows down toward it (Exod 34:8, etc.), one prostrates oneself on it before God (Gen 24:52), the king (2 Sam

14:33; 18:28, etc.), one's father (Gen 48:12, etc.), and other superiors. From it structures arise and one measures heights (Ezek 41:16; 43:14, etc.). Passages that mention that the ground or the earth (or its mouth) has opened and swallowed people (Num 16:30–34; 26:10; Deut 11:6; Psa 106:17; cf. Exod 15:12), that the ground or the earth shakes (1 Sam 14:15; Psa 46:7; 97:4, etc.), and that one can descend into the ground or the earth (Jonah 2:7) and sleep there (Psa 22:30), etc., mediate the relationship to the cosmological meaning.

In some of these cases, *ʿereṣ* approaches some usages of → *ʿādāmâ*, → *ʿāpār* can also be used similarly (cf. e.g., 1 Kgs 18:38; Isa 34:7, 9, etc.).

(d) If *ʿereṣ* is modified by a following gen., the term indicates individual regions or tracts of land.

The following random examples could easily be multiplied with many pars.: *ʿereṣ mōladtô* “his relatives’ land” (Gen 11:28; 24:7; 31:13; Jer 22:10; 46:16; Ezek 23:15; Ruth 2:11), *ʿereṣ ʿābôt* “the fathers’ land” (Gen 31:3; 48:21), *ʿereṣ m<sup>e</sup>gûrîm* “land of sojourning” (Gen 17:8; 28:4; 36:7; 37:1; Exod 6:4; all occurrences in P; cf. von Rad, *Gen*, OTL [1972], 250; *Theol.* 1:168f.; also Ezek 20:38), *ʿereṣ ʿhuzzātô* “land of his possession” (Gen 36:43; Lev 14:34; 25:24; Num 35:28; Josh 22:4, 9, 19; cf. *ʿereṣ y<sup>e</sup>ruššātô* in Deut 2:12; Josh 1:15), *ʿereṣ mōš<sup>e</sup>bōtēkem* “land of your dwelling places” (Num 15:2), *ʿereṣ memšaltô* “land of his dominion” (1 Kgs 9:19 = 2 Chron 8:6; Jer 51:28); *ʿereṣ šibyām* (or *šibyâ*) “land of your (or the) deportation” (Jer 30:10; 46:27; 2 Chron 6:37f.; Neh 3:36). Cf. also the frequent usage of “my/your/his land” as a description of the land of origin and the homeland (Gen 12:1; 24:4; Exod 18:27; Num 10:30, etc., often par. to *mōledet* “relatives”).

(e) Occurrences that speak of the region or “land” of individual tribes stand on the border between geographical and political usages of the term.

Cf. *ʿereṣ ʿeprayim* (Deut 34:2; Judg 12:15; 2 Chron 30:10), *ʿereṣ binyāmin* (Judg 21:21; 1 Sam 9:16; 2 Sam 21:14; Jer 1:1, etc.); *ʿereṣ gād* (1 Sam 13:7), *ʿereṣ gilʿād* (Num 32:1, 29; Josh 17:5f.; 22:9, 13, 15, 32; Judg 10:4, etc.); also *ʿereṣ z<sup>e</sup>bûlûn/y<sup>e</sup>hûdâ/m<sup>e</sup>naššeh/naptālî*.

The political meaning dominates where individual states are called the “land X,” whether accompanied by the collective name (e.g., *ʿereṣ yiśrāʿēl* in 1 Sam 13:19; 2 Kgs 5:2, 4; 6:23; Ezek 27:17; 40:2; 47:18; 1 Chron 22:2; 2 Chron 2:16; 30:25; 34:7; also with Edom, Asshur, Babel, Canaan, Midian, Moab; on *ʿereṣ miṣrayim* “land of Egypt” in Deut, see J. G. Plöger, *Literarkritische, formgeschichtliche und stilkritische Untersuchungen zum Deuteronomium* [1967], 100–115), the gentilic in the sg. or pl. (e.g., *ʿereṣ hā<sup>e</sup>mōrî* “land of the Amorites” in Exod 3:17; 13:5; Num

21:31; Josh 24:8; Judg 10:8; 11:21; Amos 2:10; Neh 9:8; also with reference to the land of the Girgashites, Jebusites, Canaanites, Chaldeans, Hebrews, Philistines, etc.), or as “the land of X” accompanied by a reference to the pertinent ruler (e.g., “the land of Sihon” and “the land of Og,” Deut 4:46f.; 1 Kgs 4:19; Neh 9:22); cf. also “my/your/his land” with reference to the ruler (e.g., Gen 20:15).

The concept of the *‘am hā’āreṣ* as a collective designation for the political authorities of the land also belongs to the political usage of *‘ereṣ* (cf. E. Würthwein, *Der ‘amm ha’arez im AT* [1936]; → *‘am*).

4. (a) The first theological statement using *‘ereṣ* to be treated here is that God created (→ *br’* “to create,” Gen 1:1; 2:4a, etc.; → *‘śh* “to make” Gen 2:4b; Prov 8:26; Isa 45:12, 18, etc.; → *yṣr* “to form” Isa 45:18; Jer 33:2, etc.; → *qnh* “to create” Gen 14:19, 22) the earth (heaven and earth). Admittedly, interest in Yahweh’s creative activity varies in degree in the various circles of tradition in the OT (cf. G. von Rad, “Theological Problem of the OT Doctrine of Creation,” *PHOE* 131–43; id., *Theol.* 1:139–53); discussions of the foundation of the earth or of the cosmos, however, attribute it without exception to Yahweh—as a rule either in Psa passages that have affinities with old Canaanite concepts, or in late, priestly materials.

Regarding the Can. origin, cf. esp. the expression *‘ēl ‘elyôn qōnēh šāmayim wā’āreṣ* “the most high God, the creator of the heavens and the earth” in Gen 14:19, 22, which has indisputable Can. origins; cf., among others, the Phoen. lower gate inscription of Karatepe (*KAI* no. 26A.III.18; *ANET* 654b: “El-the-Creator-of-the-Earth”), the Neo-Pun. inscription Trip. 13 from Leptis Magna (*KAI* no. 129.1), as well as the name of the god El-kunirsha, attested in Hitt., which may also derive from *‘lqn ṛṣ* (cf. H. Otten, *MIO* 1 [1953]: 135–37; W. F. Albright, *FS Mowinckel* 7f.; *ANET* 519; → *‘ēl* III/3).

In conformity with the worldview, some formulations also maintain that Yahweh established the earth (→ *yṣd*: Isa 48:13; 51:13, 16; Zech 12:1; Psa 24:2; 78:69; 102:26; 104:5; Job 38:4; Prov 3:19; → *kûn* po.: Isa 45:18; Psa 24:2; 119:90; hi.: Jer 33:2).

These varied manners of expression agree on one point: the earth is created and is not a god. The OT has no discussion of an earth god or earth goddess; likewise, the notion of “mother earth,” so widely distributed in the history of religions, is absent (cf. van der Leeuw 1:91–100; M. Eliade, “Erde,” *RGG* 2:548–50). Job 1:21; Eccl 5:14; Psa 139:15 could be allusions to this notion (cf. also Gen 3:19 and Sir 40:1).

On the appeal to heaven and earth as witnesses in Deut 4:26; 30:19; 31:28 and their ancient Near Eastern background, cf. M. Delcor, “Les attaches littéraires, l’origine et la signification de l’expression biblique ‘prendre témoin le ciel et la terre,’” *VT* 16

(1966): 8–25; Fitzmyer, *Sef.* 38.

(b) As Yahweh's creation, the earth is his property (Psa 24:1; cf. 95:4f.). Yahweh is the lord of the whole earth (Josh 3:11, 13; Mic 4:13; Zech 4:14; 6:5; Psa 97:5; 114:7 txt em; → *ʔādôn* IV/5), king of the whole earth (Psa 47:8; Zech 14:9), most high over the whole earth (Psa 97:9), God of the whole earth (Isa 54:5), God in heaven above and on the earth beneath (Deut 4:39). If heaven is Yahweh's throne, the earth is his footstool (Isa 66:1). Yahweh beholds the earth (Gen 6:12; Isa 5:30; cf. Psa 33:14), bestrides the earth (Hab 3:12), terrifies the earth (Isa 2:19, 21); but above all he is the judge of the earth (Psa 82:8; 96:13 = 1 Chron 16:33; Psa 98:9).

(c) The term *ʔereš* acquires its specific theological usage in the context of the land promise and its appropriation in the conquest tradition (cf. G. von Rad, "Promised Land and Yahweh's Land in the Hexateuch," *PHOE* 79–93; for Deut, cf. the studies of *ʔrš* and *ʔdmh* in Plöger, op. cit. 60–129).

In the event that the so-called short historical creed (G. von Rad, "Form-Critical Problem of the Hexateuch," *ibid.* 3ff.) of Deut 26:5ff. should actually be understood as an old confessional formula, then the fact that Yahweh gave Israel "this land" was already discussed in a central passage (v 9). On the problems inherent in von Rad's position, however, see Rost, *KC* 11–25.

Nevertheless, it has been generally recognized in one way or the other since Alt (*EOTHR* 64f.) that the land promise (in addition to the promise of progeny) has roots in the patriarchal period. One may regard Gen 15:18 as potentially the oldest formulation (according to O. Procksch, *Die Genesis* [1924], 111, and Alt, *EOTHR* 66n.178, the passage may be a later insertion); 12:7 and 28:18 may indicate that the land promise was handed down later at specific holy places. The double promise stands at the center of J's portrayal of the fathers (12:7; 13:15; 15:7 J?; 15:18; 24:7; cf. the later addition in 26:3f.). That the land promise occupies a minor role in Gen 12:1 has been correctly noted but probably overvalued by H. W. Wolff ("Kerygma of the Yahwist," in W. Brueggemann and Wolff, *Vitality of OT Traditions* [1982]: 49f., 61). Gen 15:13 and perhaps also 21:23 indicate that E, too, presupposes the land promise. P has reformulated the promise, with characteristic deviations (Gen 17:8; 28:4; 35:12; 48:4; cf. also P's expression *ʔereš m<sup>e</sup>gûrîm* "land of sojourning"; see 3d).

The land promise is of particular importance in Deut:

(1) Yahweh has promised the *ʔereš* to the fathers (and their descendants; *šb<sup>c</sup>* ni.: Deut 1:8, 35; 6:10, 18, 23; 8:1; 10:11; 26:3; 31:7; cf. *dbr* pi. in 9:28; 27:3). Par. terms are → *ʔdāmâ* (7:13; 11:9, 21; 26:15; 28:11) and once *g<sup>e</sup>bûl* "region" (19:8).

(2) The *ʿereṣ* is the land given by Yahweh (→ *ntn*, in inf. constructions: 1:8, 35; 4:38; 6:10, 23; 10:11; 26:3; 31:7; with a ptcp. in the relative clause: 1:25; 2:29; 3:20; 4:1; 11:17, 31; 15:7; 16:20, etc.; occasionally the formula is expanded with *lʿrištāh* “to possess it”: 5:31; 9:6; 12:1; 18:2, 14, with → *naḥʿlā*: 4:21; 15:4; 19:10; 20:16; 21:23; 24:4; or both: 25:19; 26:1). Pars. here are *ʿdāmā* and *naḥʿlā*.

(3) Israel takes possession of the land (→ *yrš*: 1:8, 21; 3:18, 20; 4:1, 5, 14, 22, 26; 5:31, 33, etc.).

(4) This land is a “good land” (1:25, 35; 3:25; 4:21, 22; 6:18; etc.; cf. Exod 3:8; Num 14:7; 1 Chron 28:8), a “land where milk and honey flow” (6:3; 11:9; 26:9, 15; 27:3; cf. Exod 3:8, 17; 13:5; 33:3; Lev 20:24; Num 13:27; 14:8; 16:13f.; Josh 5:6; Jer 11:5; 32:33; Ezek 20:6, 15; once with *ʿdāmā*, Deut 31:20).

(5) The promise of the possession of the *ʿereṣ* is associated most closely in Deut with the proclamation of the commandments. Either the conquest precedes the fulfillment of the commandments (“when you come into the land, which Yahweh, your God, gives you, you shall . . . ,” or the like: Deut 12:1; 17:14f.; 18:9; 19:1; 26:1; with *ʿdāmā*, 21:1), or the fulfillment of the commandments is the condition for the receipt of the land (4:25f.; 6:18; 8:1; 11:8f., 18–21; 16:20; 19:8f.; with *ʿdāmā*, 28:11; 30:17–20). On the theological significance of this association, cf. H. H. Schmid, “Das Verständnis der Geschichte im Deuteronomium,” *ZTK* 64 (1967): 1–15.

Deuteronomic idiom is continued in analogous expressions of Deuteronomistic stamp (Josh 21:43; 23:16; Judg 2:1f., 6). Echoes are found also in prophecy contemporaneous and subsequent to Deut, esp. in Jer (Jer 32:22) and Ezek (Ezek 33:24). At the same time, these two prophets formulate the expectation of a new possession of the land against the background of the exile (Jer 30:3; Ezek 36:28). In a wisdom individualistic form, the promise of the *ʿereṣ* lives on in Psa 37:11, 22, 29, 34; Prov 2:21f.; 10:30; cf. Isa 65:9; and finally Matt 5:5.

(d) Against the background of the land promise and its fulfillment, the land is described as “Yahweh’s land” (Hos 9:3) or “my/your/his land” (Jer 2:7; Joel 2:18; Psa 85:2, etc.; cf. *ʿadmat yhw* in Isa 14:2) in various strands of tradition in the OT. Because the *ʿereṣ* as a region is God’s possession, the *ʿereṣ* as ground may never be sold (Lev 25:23ff.; cf. H. Wildberger, “Israel und sein Land,” *EvT* 16 [1956]: 404–22). A crime against Yahweh is therefore simultaneously a crime against the land. Israel’s abominable behavior desecrates the land (Lev 18:25, 27f.; Num 35:34; Jer 2:7; 3:2, etc.). Thus God’s judgment finally includes not only Israel but also his land.

(e) Finally, at the edge of the OT, in the context of the more general apocalypticization of ancient elements, the promise of the creation of a new heaven and a new earth appears (Isa 65:17; 66:22; → *ḥādāš*).

5. The usage at Qumran is consistent with that of the OT. A formulaic manner of expression is particularly apparent in the statement that the

community is concerned with the exercise of faithfulness, justice, and righteousness “in the land” (1QS 1:6, similarly 8:3, etc.), or in the discussion focusing on the fact that the council (?) of the community must atone “for the land” (1QS 8:6, 10, etc.).

In NT, Gk. *ἔρεσ* and *ἁῶḏāmâ* are rendered without distinction by *gē*. Cf. the NT lexicons, esp. H. Sasse, “*γῆ*,” *TDNT* 1:677–81.

H. H. Schmid

## 𐤆𐤃 *ḏr* to curse

S 779; BDB 76b; *HALOT* 1:91a; *TDOT* 1:405–18; *TWOT* 168; *NIDOTTE* 826

1. The root *ḏr* appears to be common Sem., although it is attested only sporadically (cf. *HAL* 88a; P. Fronzaroli, *AANLR* 8/20 [1965]: 253f., 264; only Akk. *arāru* is in use for “to curse”; cf. *AHW* 65; *CAD* A/II:234–36; Aram. employs *lūt*, Arab. *lʿn*, etc.).

Although relatively numerous curse texts are extant from the ancient Near East (cf. the summaries in S. Gevirtz, “West-Semitic Curses and the Problem of the Origins of Hebrew Law,” *VT* 11 [1961]: 137–58; F. C. Fensham, “Malediction and Benediction in Ancient Near Eastern Vassal-Treaties and the OT,” *ZAW* 74 [1962]: 1–9; D. R. Hillers, *Treaty-Curses and the OT Prophets* [1964]), verbs for “to curse” occur only rarely. Cf. Hebr. *ḏwr* “cursed (be the one who opens this)” in a 7th/6th-cent. grave inscription from Silwan, *KAI* no. 191B.2; Aram. *yłwtyn* “they curse” in the Ahiqar proverbs, line 151 (Cowley 217, 225).

Hebr. *ḏr* occurs verbally in the qal, hi., and pi. (cf. *HP* 216), nominally as *m<sup>o</sup>ḏrâ* “curse” (BL 492).

2. The root *ḏr* is attested a total of 68x in the OT: in the qal 55x (40x in the form of the pass. ptc. *ḏrûr*, the starting point for semantic analysis), in the pi. 7x, in the ni. 1x (Mal 3:9, ptc.); the noun *m<sup>o</sup>ḏrâ* occurs 5x. Num 22:6 *yûḏr* should be understood with BL 433 as a qal pass. impf.

The distribution is very irregular; the word group occurs with emphatic frequency in some passages: Deut 27:15–28:20 (19x), Num 22–24 (7x), Num 5:18–27 and Mal (6x each), Gen 3–9 (5x).

3. (a) In view of the ancient Near Eastern and OT concepts of blessing and cursing (bibliog. in F. Horst, *RGG* 5:1649–51; C. Westermann, *BHH* 1:487f.; W. Schottroff, *Der altisr. Fluchspruch* [1969]), the meaning of *ḏr* as “to curse = cover with misfortune” in distinction from

→ *ʾlh*, → *qll* pi., and other verbs of cursing (cf. J. Scharbert, “‘Fluchen’ und ‘Segnen’ im AT,” *Bib* 39 [1958]: 1–26; H. C. Brichto, *Problem of “Curse” in the Hebrew Bible* [1963]) results first through semantic opposition to → *brk* “to bless,” as expressed particularly in the formulaic usage of *ʾārûr* or *bārûk*.

For an understanding of the semantic relationships between *ʾārûr* and the other verbal forms, cf. Gen 27:29 and Num 24:9 with Gen 12:3; Gen 3:17 with 5:29. The verb *ʾr*, then, means nothing other than “to make *ʾārûr*, pronounce *ʾārûr*, declare one *ʾārûr*.”

The restriction on “to bind, hold back” proposed by E. A. Speiser (“An Angelic ‘Curse’: Exodus 14:20,” *JAOS* 80 [1960]: 198–200) is appropriate only for the metonymic usage in the Akk. expression *arrat lānapšuri* “to curse without remission.”

*ʾr* appears in 12 passages as an antonym for *brk* “to bless”: Gen 9:25f.; 12:3; 27:29; Num 22:6, 12; 24:9; Deut 28:16–19; cf. vv 3–6; Judg 5:23f.; Jer 17:5; cf. v 7; 20:14; Mal 2:2; Prov 3:33. An *ʾārûr*, then, is the opposite of a *bārûk*, and is thus one stricken by misfortune and afflicted, whose existence is disastrous and whose presence brings misfortune.

Deut 28:15–68 impressively portrays the disastrous existence of an *ʾārûr* in everything that he does, an *ʾārûr* harvests only failure. Therefore, Balak wishes to have the people Israel made *ʾārûr* by Balaam, in order to be able to drive them out more easily afterward (Num 22:6). *ʾārûrîm* must serve others without ever coming “upon a green twig” (Gen 9:25; Josh 9:23). One “rich in *m<sup>c</sup>ērôl*” is one who must continually suffer want (Prov 28:27). According to Jer 17:5f., an *ʾārûr* is like a miserable shrub, laboriously fighting for a meager existence in the steppe, and, according to Jer 20:14–16, like a hopelessly devastated city. Joshua’s curse on Jericho is to be realized against the one who restores it, in that he loses his first- and last-born (Josh 6:26); Jonathan, who unknowingly shoulders his father’s curse, renders the normal questioning of the oracle impossible because of his *ʾārûr* status (1 Sam 14:24–28, 37). The corpse of Jezebel is *ʾārûr* (2 Kgs 9:34), first because she stands under prophetic judgment (1 Kgs 21:23), but also because her whole existence has brought disaster to the people. The serpent is *ʾārûr* because of its troubled existence and because of the fear it elicits (Gen 3:14); the ground is *ʾārûr* because it occasions nothing other than toil and often wasted work (Gen 3:17; 5:29).

By contrast, it is impossible to declare *ʾārûr* one who is *bārûk*, i.e., successful and favored with fortune (Num 22:12; cf. 23:8), and one ought not to declare *ʾārûr* the prince, upon whose *bārûk* status the well-being of all depends (Exod 22:27).

(b) *ʾārûr* is used primarily in the *ʾārûr* formula (38x, nonpredicatively only in 2 Kgs 9:34 and Psa 119:21; cf, however, LXX). One says “*ʾārûr* is X,” or “*ʾārûr* is the one who. . . .”

The one concerned is described, as a rule, with *ʔārûr hāʔiš ʔšer* . . . (Deut 27:15; Josh 6:26; 1 Sam 14:24, 28; Jer 11:3; 20:15; cf. 17:5 and *KAI* no. 191B.2) or with a simple *ʔšer* (Deut 27:26), often also with a ptcp. (Gen 27:29; Num 24:9; Deut 27:16–25; Judg 21:18; Jer 48:10[bis]; Mal 1:14), occasionally with direct address: “you are *ʔārûr*” (Gen 3:14; 4:11; Deut 28:16[bis], 19[bis]).

The *ʔārûr* formula has a double function. First, it designates a particular person, whether known to the speaker or not, as *ʔārûr*, i.e., it covers the person with disaster through the medium of the effectual word, in some circumstances through an individual particularly gifted for these purposes (Num 22–24; contra Scharbert, op. cit. 6, it must be maintained that basically everyone is capable of pronouncing the *ʔārûr* formula effectively). Presumably, most of the texts that mention only *ʔr* “to curse” envision the pronunciation of the *ʔārûr* formula. As a rule, the disaster intended for the victim is more precisely described to strengthen the formula (cf. e.g., Josh 9:23; Jer 20:14f.).

One can also describe animals and objects as *ʔārûr*: the serpent (Gen 3:14), the ground (Gen 3:17), a day (Jer 20:14; cf. Job 3:8), the “wrath” of a person (in order not to affect the person directly, Gen 49:7).

Second, through an effectual word the *ʔārûr* formula as a so-called conditional curse creates a curse zone, i.e., a potential disaster sphere, into which the one who commits the deed named in the formula enters (e.g., Josh 6:26; Judg 21:18; 1 Sam 14:24, 28; Jer 48:10). In some apparently liturgical texts, an entire network of disastrous powers, which become active in the event of transgression, is created through the formation of a series of curses (12 *ʔārûr* formulae in Deut 27:15–26; 6 *ʔārûr* formulae in Deut 28:16–19). If the formula is pronounced in the presence of other persons, they answer with *ʔāmēn* (Deut 27:15–26; Jer 11:5; cf. Num 5:22) and thereby confirm the existence of this potential disaster sphere.

In Num 5:23 the written curse (*ʔālâ*) is dissolved in a liquid; this liquid is therefore called “*ʔārûr* -making water” (*mayim mʔārʔrîm*), and it strikes the guilty woman with disaster in the ordeal.

(c) The subst. *mʔērâ* “curse, execration” appears in Deut 28:16–20 and Mal 2:2 in close relationship to *ʔr* qal (“to send a curse” = “to execrate”), as well as in Mal 3:9 with *ʔr* ni. In Prov 3:33 *mʔērâ* parallels the verbal expression *yʔbārēk* “he blesses”; *mʔērâ* indicates, then, not only the result of *ʔr*, disaster (cf. Deut 28:20 LXX *endeia* “lack”; Prov 28:27 LXX *aporia* “need”), but also *ʔārûr* making or *ʔārûr* declaring as an effective act (contra Scharbert, op. cit. 7).

4. The *ʔr* word group is doubly significant theologically.

(a) Yahweh is the absolute lord over all *ʾārûr* declaring. He himself makes people and animals *ʾārûr*, if he determines to do so, in that he speaks the fateful word (Gen 3:14, 17; 4:11; 5:29; 12:3; Jer 11:3; Mal 2:2; cf. 3:9), and one knows that his *m<sup>e</sup>ērâ* pursues some people (Deut 28:20; Prov 3:33). Above all, he can convert the human *bārûk* declaration, even that of the priest, into the opposite (Mal 2:2), or he can even give a magician, preparing to declare *ʾārûr*, the commission to do the opposite (Num 22–24). Therefore, when declaring someone *ʾārûr*, the individual makes the affected one *ʾārûr* “before Yahweh” (1 Sam 26:19).

Yahweh pronounces *ʾārûr* on the criminal (*rāšāʿ*, Prov 3:33), the murderer (Gen 4:11), the one too shrewd (Gen 3:17), the one who violates the commandment (Deut 28:20; Jer 11:3), or—in post-exilic theology—the one who does not exercise his or her holy office properly (Mal 1:14; 2:2; 3:9).

(b) The potential sphere of disaster that one creates by declaring *ʾārûr* is limited by the direction of Yahweh. The one who moves beyond the sphere of activity determined by God’s direction, i.e., the one who acts within the realm of that forbidden by Yahweh, is *ʾārûr*, persecuted by disaster. This circumstance is expressed esp. clearly in the juxtaposition of *bārûk* declaration and *ʾārûr* declaration (Deut 27:11–26; ch. 28; *ʾārûr* alone: Jer 11:3): whoever acts within the framework of God’s regulations is *bārûk* (favored by good fortune); beyond this framework one is *ʾārûr* (in the grasp of misfortune). The same principle occurs in a more wisdomlike formulation in Jer 17:5, 7: one who builds one’s life on the presence of Yahweh is *bārûk*; in contrast, one who trusts every person is *ʾārûr*. According to Jer 48:10, one who conducts Yahweh’s work negligently or hinders it is *ʾārûr*. As already seen, Yahweh’s own pronouncement of *ʾārûr* is directed at those who do not completely subordinate themselves to him (Gen 3:14, 17; 4:11; Psa 119:21). In Mal the sphere of disaster is primarily activated by improper cultic behavior and, concomitantly, by insulting Yahweh in the cult (Mal 1:14; 3:9).

5. Qumran uses the word group as the OT does: the *ʾārûr* formula is much more frequent than the simple verb (cf. Kuhn, *Konk.* 23; also *GCDS* 35). Conversely, the NT uses *epikataratos* = *ʾārûr* only in an OT quotation (Gal 3:10 = Deut 27:26; the *epikataratos* of Gal 3:13 does not correspond to an *ʾārûr* formula, but to the cs. combination *qilʿlat ʾelōhîm* in Deut 21:23; cf. L. Brun, *Segen und Fluch im Urchristentum* [1932]; J. Behm, “ἀνατίθημι,” *TDNT* 1:353–56; F. Büchsel, “ἀπά,” *TDNT* 1:448–51).

C. A. Keller

## נָשָׂא pi. to betroth

S 781; BDB 76b; HALOT 1:91b; TWOT 170; NIDOTTE 829

1. נָשָׂא pi. “to betroth a wife” has direct pars. only in postbibl. Hebr. and Aram. (נָשָׂא, also in qal, e.g., Mid. Hebr. pass. ptcp. נָשָׂא “bridegroom,” and in corresponding pass. stem forms).

One may posit connections with Akk. *erēšu* “to demand, request” (AHw 239f.; CAD E:281–85; infrequent ptcp. *ērīšu* “bridegroom,” AHw 242b; CAD E:301a; cf. Ug. נָשָׂא “to desire,” WUS no. 423; UT no. 379; Hebr. נָשָׂא “desire,” Psa 21:3) and with Arab. *ʿarūs* “bridegroom; bride,” *ʿarasa* “to arrange a marriage feast” (KBL 90a; P. Wernberg-Møller, JSS 11 [1966]: 124), but not with the Akk. *erēšu* “to cultivate” (root *hrš*, Hebr. *hrš* “to plow”) in the context of the wife-field metaphor (so A. Sarsowsky, ZAW 32 [1912]: 404f.).

2. נָשָׂא occurs 11x in the OT; 6x in the pi. (Deut 20:7; 28:30; 2 Sam 3:14; Hos 2:21[bis], 22) and 5x in the pu. (Exod 22:15; Deut 22:23, 25, 27f.).

3. The basic meaning in the pi. (resultative, expressing a juristically comprehensible result; cf. HP 248) should be rendered “to betroth a wife”; the freer translation “to betroth (from the man’s perspective)” should not be understood, in distinction from contemporary usage, as an indication of a simple engagement with the possibility of withdrawal in contrast to the public legal act of marriage (see below). The verb is constructed with a simple acc.: the *be pretii* (see GKC 119p) describes the bride-price (2 Sam 3:14, “for the foreskins of one hundred Philistines”; cf. Hos 2:21f.). The man is always the subj. (Yahweh in Hos 2:21f.; see below), the woman is the obj. to whom he betroths himself. The pu. forms indicate the pertinent pass. “to be betrothed (from the woman’s perspective).” The virgin (*b<sup>et</sup>tûlâ* or *na<sup>ca</sup>râ b<sup>et</sup>tûlâ*, Exod 22:15; Deut 22:23, 28) or the maiden (*na<sup>ca</sup>râ*, Deut 22:25, 27) is the subj. in these clauses; cf. D. H. Weiss, JBL 81 (1962): 67–69.

The determination of the legal meaning (and therefore also the precise translation) of the term is not entirely clear in view of the limited number of examples. First of all, on the one hand, one should distinguish the intention of נָשָׂא from that of the marriage ceremony proper: a man may have betrothed a maiden but not yet have “taken her as wife” (*lqh*, Deut 21:11; 22:13f, etc.; cf. also *bq* “to marry,” Deut 21:13, etc.; → *ba<sup>ca</sup>t*, *lqh* is directly juxtaposed to נָשָׂא in Deut 20:7 and to *hyh l<sup>ca</sup>iššâ* in Deut 22:29). One should also clearly distinguish נָשָׂא from *škb* “to lie with” (Exod 22:15; Deut

22:23, 25, 28; also *šgl* Deut 28:30). Similarly, *šlh* pi. “to divorce” is not an antonym for *ʔrs*, but for *lqh* or *hyh lʕiššâ* (Deut 22:19, 29; 24:1, 3f.).

On the other hand, a *lqh* or *škb* obviously follows the *ʔrs*: a betrothed man is freed from the military in order to be able to bring his wife home (Deut 20:7); if a betrothed man cannot also live with his wife, he thus stands under a curse (Deut 28:30). Betrothal is a legal relationship protected like marriage; if this relationship is broken, the guilty party receives the death penalty (like an adulterer; cf. Deut 22:23f. with 22:22; Lev 20:10, etc.).

Consequently, it seems appropriate to regard *ʔrs* pi. as a description of a publicly binding legal act, which, although not identical with marriage, enacts the marriage legally. This interpretation is confirmed by the fact that the most essential element of the betrothal is the bride-price (*mōhar*, Gen 34:12; Exod 22:16; 1 Sam 18:25), which the bridegroom must give to the bride’s father (cf. 1 Sam 18:25 with 2 Sam 3:14; Gen 34:12). If one seduces an unbetrothed virgin, he must still first pay the *mōhar* before he can take her home as wife (Exod 22:15 with the verb *mhr* qal “to acquire through payment of the *mōhar*”; Deut 22:29, “to give fifty shekels of silver”).

On marriage in the OT, cf. E. Neufeld, *Ancient Hebrew Marriage Laws* (1944); F. Horst, “Ehe im AT,” *RGG* 2:316–18 (with bibliog.); de Vaux 1:24–38 (bibliog. on pp. xxvii-xxviii); on marriage in the ancient Near East and on Jewish marriage law, cf. E. Kutsch, *Salbung als Rechtsakt* (1963), 27–33 (with bibliog.).

4. Hos 2:21f. uses *ʔrs* pi. as a metaphor. Yahweh is the subj. of this prophetic salvation message; the woman addressed is Israel according to Hosea’s picturesque speech (borrowed from the Canaanite Baal cult). The marriage relationship with Yahweh, which the adulterous Israel had violated (2:4ff.), is to be reestablished, indeed, “forever”; the announced salvation consists in this reestablishment. Yahweh also pays the *mōhar* (cf. the fivefold *be*: “in righteousness, in justice, etc.”). That *ʔrs* should be a public, “eternally valid” legal act (Rudolph, *KAT* 13/1, 80; Wolff, *Hos*, Herm, 46, 52, also speaks, therefore, of a “binding, legal act of marriage” and translates *ʔrs* with “I will make you my own”) is confirmed once again.

5. The LXX uses *lambanein* for *ʔrs* in Deut 28:30 and 2 Sam 3:14, otherwise always *mnēsteuein*, which is also used in Matt 1:18; Luke 1:27; 2:5 to characterize the legal status of Mary.

J. Kühlewein

𐤒𐤔 𐤒𐤔 fire

S 784; BDB 77a; HALOT 1:92a; TDOT 1:418–28; TWOT 172; NIDOTTE 836

1. The word occurs in most branches of the Sem. languages (with the exception of Arab.) in the sense of “fire.”

In Arab. and partially in Aram., the common Sem. word (\**ʔiṣ-/[āt-]*, cf. P. Fronzaroli, *AANLR* 8/20 [1965]: 145, 149) has been replaced with forms of the root *nûr* “to be bright” (Arab. *nār*, Aram. *nûr*); Syr. *ʔeššātā* means only “fever.”

Hebr. *ʔiššeh* “sacrifice” (not necessarily “burnt sacrifice”) apparently does not belong etymologically to *ʔeš*; cf. J. Hoftijzer, “Das sogenannte Feueropfer,” *FS Baumgartner* 114–34.

2. Statistics: *ʔeš* occurs 378x in the Hebr. OT (Ezek 47x, Jer 39x, Isa 33x, Lev 32x, Deut 29x, Psa 28x, etc.; Gen only 4x, absent in Jonah, Hag, Ruth, Eccl, Ezra, Esth); in addition, Aram. *ʔeššā* occurs 1x (Dan 7:11; usually regarded as a fem. abs., but could also be masc. emphatic; cf. Fitzmyer, *Sef.* 53) and *nûr* 17x (Dan 3:6–27; 7:9f.).

Jer 51:18 and Hab 2:13 are also included in the statistics above, which *HAL* 89b (following G. R. Driver, *JSS* 4 [1959]: 148) assign to a root *ʔeš* II “trifle.”

The pl. is absent from the OT (cf. Sir 48:3); M. Dahood (*Bib* 44 [1963]: 298) posits a dual in Jer 6:29. Num 18:9; Deut 33:2 Q; Ezek 8:2a are excluded through emendation.

3. (a) *ʔeš* concretely indicates fire as a given element of human culture, as used in the household (e.g., Isa 44:16) and handicraft (e.g., Ezek 22:20 in metallurgy; Job 28:5 in mining). In war the enemy is fought with fire (e.g., Isa 50:11 *zîqôt* “flaming arrows”); the rules of holy war, in particular, require that all the enemy’s possessions be burned (Deut 13:17; → *ḥrm*; e.g., Josh 6:24; 7:15; 8:8; Judg 20:48; similarly Num 31:10). The death penalty is executed in special cases by fire (Lev 20:14; 21:9; cf. Gen 38:24; in relation to crimes against the holy war laws, Josh 7:15, 25).

Fire is important in the cult because sacrifices are burned (on the rules for various types of sacrifice, cf. Lev 1ff.; on fire as a means of ritual purification, → *ṭhr*; on the incineration of the sacrosanct in order to preserve it from profanation, → *qdš*). Fire is subject to some regulations; if it does not correspond to them, it is *ʔeš zārâ* “illegitimate fire” (→ *zār*; Lev 10:1; Num 3:4; 26:61, the fire of Nadab and Abihu), which brings disaster. The proscription against extinguishing the altar fire belongs to a later layer of

priestly laws (Lev 6:1ff.; cf. J. Morgenstern, *Fire on the Altar* [1963]; for the later growth of legends concerning the proscription, see 2 Macc 1:18ff.).

The practice of the “Molech” child sacrifice falls subject to a special prohibition in the OT (R. de Vaux, *Studies in OT Sacrifice* [1964], 73–90; expressions: → *br* hi. *lammōlek*, Lev 18:21; 2 Kgs 32:10; Jer 32:35; *br* hi. *bāʿēš* “to cause to go through the fire,” Deut 18:10; 2 Kgs 16:3 = 2 Chron 28:3, *bʿr*, 2 Kgs 17:17; 21:6 = 2 Chron 33:6; 2 Kgs 23:10; Ezek 20:31; *šrp* *bāʿēš* “to incinerate,” Deut 12:31; 2 Kgs 17:31; Jer 7:31; 19:5 MT; cf. also Lev 20:2–5; Isa 30:33; Jer 3:24; Ezek 16:21; 23:37; Psa 106:37f.; on *tōpet* “place of fire” see KBL 1038b). The sacrifices are for a god, Melek (contra O. Eissfeldt, *Molk als Opferbegriff im Punischen und Hebräischen und das Ende des Gottes Moloch* [1935]); → *melek* 4e.

\*(b) HAL 89 offers an extensive list of the verbs and substs. associated with *ʿēš*. Specific verbs of igniting/burning/incineration are mentioned here:

(1) *ʾōr* hi. “to ignite” in Mal 1:10; Isa 27:11, in addition to the normal meaning “to cause to shine,” like *ʾūr* “light” > “fire(light)“;

(2) *bʿr* qal “to burn” (38x), pi. “to ignite, keep a fire” (13x), pu. “to be ignited” (1x), hi. “to incinerate” (6x); in addition to *bʿērā* “fuel” (Exod 22:5); cf. HP no. 31;

(3) *dlq* qal “to set fire” (Obad 18; Psa 7:14; hi. Ezek 24:10; cf. HAL 214b, and J. Blau, VT 6 [1956]: 246; L. Kopf, VT 8 [1958]: 170f.); in addition, *dalleqet* “heat of fever“;

(4) *yšt* qal “to ignite, incinerate” (4x), ni. “to catch fire, be burnt” (6x), hi. “to set fire, set on fire” (17x); by-form *šūt* hi. “to ignite” (Isa 27:4);

(5) *yqd* qal “to burn” (34x), ho. “to be ignited” (5x); also *yʿqôd* “blaze” (Isa 10:16), *yāqûd* (Isa 30:14) and *môqēd* (Lev 6:2; cf. Elliger, HAT 4, 81; Isa 33:14; Psa 102:4) “furnace“;

(6) *kwh* ni. “to be singed” (Isa 43:2; Prov 6:28); also *kʿwîyâ* (Exod 21:25[bis]) and *kî* (Isa 3:24) “brand,” *mikwâ* “burn wound” (Lev 13:24–28);

(7) *lht* “to consume, singe” (qal Psa 57:5; 104:4; pi. 9x); also *lahat* “flame, blaze” (Gen 3:24);

(8) *nšq* ni. “to catch fire” (Psa 78:21), hi. “to ignite” (Isa 44:15; Ezek 39:9);

(9) *šrb* ni. “to be singed” (Ezek 21:3); also \**šārāb* “scorching” (Prov 16:27) and *šārebet* “burn, scar” (Lev 13:23, 28);

(10) *qdh* qal “to catch fire, ignite” (5x); also *qaddaḥat* “fever” (Lev 26:16; Deut

28:22), *ʿeqdāḥ* “beryl (fire-stone)” (Isa 54:12);

(11) *šrp* “to incinerate” (qal 102x, ni. 14x, pu. 1x; also *šʿrēpâ* “that which is consumed or burned, fuel” (13x; see *bʿērâ*, only 2 Chron 16:14; 21:19 “funeral pyre”), *mišrāpôt* “incineration” (Isa 33:12; Jer 34:5).

In Bibl. Aram. *ʿzh* pe. “to heat” (Dan 3:19[bis], 22) and *hrk* hitpa. “to be singed” (3:27) occur in addition to *dlq* pe. “to burn” (Dan 7:9) and *yqd* pe. “to burn” (Dan 3:6–26; also *yʿqēdâ* “flame” 7:11).

Verbs for extinguishing are: *dʿk* qal “to extinguish” (7x), pu. “to be extinguished” (Psa 118:12; ni. “to disappear” Job 6:17) with the by-form *zʿk* ni. “to be extinguished” (Job 17:1), and *kbh* qal “to extinguish” (14x), pi. “to quench” (10x).

The most important semantically related subst. is *lahab/lehābâ* “flame” (12 and 19x, resp., also meaning “blade”; in Exod 3:2 *labbat-ʿēš* should probably be emended to *lahebet-ʿēš*; *šalhebet* “flame” in Ezek. 21:3; Job 15:30; Song Sol 8:6 txt em is an Aram. loanword; cf. Wagner no. 305); also worthy of mention are *rešep* “flame, blaze” (7x; cf. A. Caquot, *Semit* 6 [1956]: 53–63) and *šābīb* “flame” (Job 18:5; cf. Wagner no. 304; Bibl. Aram. *šʿbīb* “flame,” Dan 3:22; 7:9).

(c) As in other languages, in Hebr. fire is readily used fig. as an image of consuming passions: wrath (Hos 7:6 txt em; on the wrathful fire of Yahweh, see 4), pain (Psa 39:4), love (Song Sol 8:6), adultery (Job 31:12; Prov 6:27f.), contentiousness (Prov 26:20f.), injustice (Isa 9:17), sin in general (Sir 3:30, etc.). The point of comparison is primarily the consuming power, rarely the illuminating function, of fire (Nah 2:4; cf. F. Lang, *TDNT* 6:935; see also his references to proverbial usages).

4. Within the formation of religious tradition, fire has a place in the theophany motif.

The root of the theophany concept in Israel is twofold, reflecting the original significance of fire. A fiery volcano is the original referent in the Sinai theophany (so the J report in Exod 19:18; cf. Noth, *Exod*, OTL, 116f., 156f., 159f.; J. Jeremias, *Theophanie* [1965], 104ff.). The concept of the thunder theophany with fiery lightning stems from Canaanite religion (e.g., Psa 18:8ff.; 29; 97:2ff.; non-Israelite parallels in Jeremias, op. cit. 75ff.; P. D. Miller, “Fire in the Mythology of Canaan and Israel,” *CBQ* [1965]: 256ff.; E also describes the Sinai theophany, inappropriately for the context, as a thunderstorm; cf. Noth, op. cit. 159f.). The two concepts became intermingled very early (e.g., Hab 3:3ff.). The concept of Yahweh’s *kābôd* (→ *kbd*) is very closely linked with the theophany tradition and, therefore, with fire (Psa 29; 97:6; Isa 10:16; cf. Ezek 10; cf. von Rad, *Theol.* 1:239f.).

Unique, antiquated concepts occur singly as phenomena accompanying a divine encounter in Gen 15:17 (“torch”) and Exod 3:2 (“flame of fire from the thorn bush”; cf. Noth, op. cit. 39f.).

The concept of the Sinai fire acquires its own nuance in the conceptual framework of Deut and P. Deut speaks stereotypically of the “mountain that burns in the fire” (Deut 4:11; 5:23; 9:15); the concept of “Yahweh’s speech from the fire” (Deut 4:12, 15, 33, 36; 5:4f., 22, 24–26; 9:10; 10:4; 18:16) is more essential: All elements of the theophany are subordinated to the speech of Yahweh. P speaks of the “pillar of fire” (*‘ammûd ʿēš*) by night and the “cloud” (→ *‘ānān*) by day, appearances that are not linked with Sinai but that lead Israel (Exod 13:21f.; 14:24; 40:38; Num 9:15f.; 14:14; cf. Neh 9:12, 19; associated with Sinai and with the expression *kābôd* in Exod 24:16f., “like a consuming fire”). Similar concepts are found in Deut 1:33; Isa 4:5; Psa 78:14. In a spiritualizing manner, Deut describes Yahweh himself as “consuming fire” (*ʿēš ʾōkʿlâ*, Deut 4:24; 9:3; also Isa 33:14 and 30:27, “his tongue”). 1 Kgs 19:12 guards against a literal understanding of such statements (in addition to fire, the other theophany elements are named; cf. Jeremias, op. cit. 112–15; J. J. Stamm, FS Vriezen 327–34).

In the Psalm traditions and dependent prophecy, the theophany refers less to a discourse than to an act of God, so that here the effect of the fire is important. God appears in the “fire of wrath” (→ *ʾap*, → *ḥēmâ*, → *‘ebrâ*, Deut 32:22; Isa 30:27, 30; Jer 4:4; 15:14; 17:4; 21:12; Ezek 21:36f.; 22:21, 31; 38:19; Nah 1:6; Psa 89:47; Lam 2:4; → *qinʾâ* “zeal” also occurs in Ezek 36:5; Zeph 1:18; 3:8; Psa 79:5) in order to move against mythical or historical enemies (chaos powers, foreign nations, sinners, even Israel itself: Psa 46:10; 68:3; Isa 9:4, 18; 66:15f.; Amos 1f., etc.; also frequently in Jer, e.g., 11:16; 17:27). Freed from the context of the theophany, fire becomes the fire of judgment, which apocalypticism places at the end of time (Isa 66:24; Zech 9:4; Dan 7:9ff., etc.).

R. Mayer (*Die biblische Vorstellung vom Weltenbrand* [1956], 79ff.) offers a thorough overview of the passages in the OT that treat fire, either literally or (not always an easy distinction) figuratively, as a medium of the execution of judgment.

Although the image of the metalworker also occurs elsewhere in the proclamation of judgment (cf. Isa 1:25; Jer 6:27–30; 9:6; Ezek 22:17–22), one can speak of an actual “refining judgment” by fire only in Zech 13:9 and Mal 3:2f (Mayer, op. cit. 113f.; cf. also G. Rinaldi, “La preparazione dell’argento e il fuoco purificatore,” *BeO* 5 [1963]: 53–59).

In a folktale manner the theophany fire becomes a miraculous “fire of God” (2 Kgs 1:9ff.; Job 1:16, etc.). Angelic beings also participate in this fire of God (Ezek 10:2, 6f.; 28:14; 2 Kgs 6:17).

5. Early Judaism and the NT follow apocalyptic usage (not to mention the aftereffects of some OT texts). Cf. F. Lang, “Das Feuer im

Sprachgebrauch der Bibel” (diss., Tübingen, 1951); id., “πῦρ,” *TDNT* 6:928–952.

F. Stolz

אִשָּׁה *iššâ* **woman**

S 802; BDB 61a; *HALOT* 1:93b; *TDOT* 1:222–35; *TWOT* 137a; *NIDOTTE* 851

1. The word *iššâ* “woman” corresponds to the common Sem. \**ant-at-* (P. Fronzaroli, *AANLR* 8/19 [1964]: 162f., 166, 245, 262): Akk. *aššatu* “wife” (in addition to the infrequent Can. loanword *iššu* “woman, wife,” *AHW* 399a; *CAD* I/J:267b); Ug. *att* “wife”; Aram. *int<sup>ct</sup>â/itt<sup>ct</sup>â* “woman”; Arab. *untā* “female”; Eth. *anest* “woman.”

Because the root has *t*, it may not be derived from Hebr. *iš* “man” (contrary to the folk etymology in Gen 2:23); no etymology can be given. The vocalization of the Akk. *enēšu* “to be weak,” which presupposes a harsh laryngeal as the first radical, speaks against the derivations from a root \**nt* “to be weak” (e.g., *CML* 1 152n.17); Arab. *anuṭa* may be a denominative (cf. Fronzaroli, op. cit. 162f.).

On the irregular forms *ēšet* (sg. cs.) and *nāšîm* (pl.), possibly as harmonizations to *iš* “man” or *nāšîm* “men,” resp., see BL 617.

The pl. *iššôt*, a new formation from the sg., is attested only in Ezek 23:44 (txt?; cf. Zimmerli, *Ezek*, Herm, 1:479).

\*2. Like *iš*, *iššâ* is most frequent in the narrative books (Gen, Judg, Sam):

Lis. does not list 1 Kgs 14:5f.

The pl. *nšêhôn* “your women” occurs 1x in Bibl. Aram. (Dan 6:25; \**antâ/antâ*, the sg. of \**nšîn*, is not attested, but occurs in Imp. Aram.; cf. *DISO* 26f.).

3. (a) Naturally, the basic meaning “woman” (the female person) already implies a correlation to *š* “man” (the Hebr. words indicate this correlation even more clearly; cf. Gen 2:23).

In the vast majority of occurrences, a marital or extramarital juxtaposition to the man characterizes the term. Nominal series also occur in which the sexual aspect recedes. The expression “man or woman” can be used to mean “anyone, whoever”; “men and women” can also mean “all”; for texts with these usages and the series “men-women-children,” etc. → *š* III/1.

A broader natural word field includes the terms “son/daughter/child”

or their pls., also generally in nominal series.

Examples are: “woman-sons-daughters-in-law” (Gen 8:16; cf. 6:18; 7:7, 13; 8:18); in the context of births, “woman-son/daughter” (Gen 18:10, etc.); “women-sons” (Gen 32:23); “woman-daughters” (Gen 19:15f.); “women-daughters” (Isa 32:9 in parallelism); quite often “women-children” (Gen 30:26; Num 14:3, etc.; Psa 128:3 in parallelism).

Moreover, a veritable multitude of verbs characterize the word field of the term. Only the most important may be presented:

*hrh* “to be pregnant” (Gen 25:21; Exod 2:2; 21:22; Judg 13:3, etc.); → *yld* “to bear” (Gen 3:16, etc., *hrh* and *yld* often stand in close conjunction); → *lqh* “to take as wife, marry” (Gen 4:19; Deut 23:1; Judg 14:2, etc.); *hyh l<sup>e</sup>ʾiššâ* “to marry” (Gen 24:67, etc.); *ntn l<sup>e</sup>ʾiššâ* “to give as wife” (Gen 16:3; Judg 21:1, 7, etc.). An entire series of expressions serve to indicate sexual intercourse: *škb* “sleep (with)” (Gen 26:10, etc.); → *ydc* “to know” (Gen 4:1, 17, etc.); *bô<sup>ʾ</sup>el* “to go in to” (Gen 38:8f., etc.); → *glh* pi. *erwat ʾiššâ* “to uncover a woman’s nakedness” (Lev 18:6ff.; 20:11, 17–21); → *qrb* “to approach” (Lev 18:14, etc.); *nh* pi. “to rape” (Gen 34:2, etc.); *šgl* “to sleep (with)” (Deut 28:30, etc.). The following may also be mentioned: → *hb* “to love,” → *hmd* “to desire,” → *ʾs* “to betroth,” *zûb* “to menstruate”; *ynq* hi. “to suckle,” → *qn<sup>ʾ</sup>* pi. “to be jealous,” *n<sup>ʾ</sup>p* “to commit adultery,” → *šlh* “to divorce,” → *bgd* “to break faith.” For the late period the following may also be mentioned: *yšb* hi. “to marry = to live with a woman” (Ezra 10:2ff.; Neh 13:23, 27); → *yš<sup>ʾ</sup>* hi. “to divorce” (Ezra 10:3, 19).

No substantives are synonymous with *ʾiššâ* in its basic meaning.

The term is used only once of animals (Gen 7:2; cf. also Ezek 1:9).

(b) Like *ʾiš* “man/husband” (→ *ʾiš* III/2a), *ʾiššâ* is often used in the more specific meaning “wife” (Gen 12:5; 2 Sam 11:27, etc.). Frequent expressions are *X ʾēšet Y*, “X, the wife of Y” (e.g., Gen 11:31), and *šēm ʾišto X*, “his wife’s name is X” (e.g., Ruth 1:2).

On the status of the wife in the OT, cf. F. Horst, “Frau II,” *RGG* 2:1067f., and the literature cited there.

The common word for “concubine” is *pîlegeš* (36x, of non-Sem. origins; cf. Ellenbogen 134); *šārâ* “rival wife” occurs in 1 Sam 1:6. Further designations specifically for the wife of the king or the members of the royal harem are *šēgal* (Psa 45:10; Neh 2:6; Bibl. Aram., Dan 5:2f., 23) and Bibl. Aram. *l<sup>e</sup>ḥēnâ* (in each instance in Dan 5 alongside *šēgal*).

The context of Lam 2:20 limits *ʾiššâ* to the meaning “mother,” that of Gen 29:21 and Deut 22:24 to the meaning “bride.” In Eccl 7:26, *hā ʾiššâ* appears as a generalization (“the woman” = “the female gender”).

(c) The term is occasionally used figuratively to describe a cowardly

man, although only in the prophetic oracles against foreign nations, where it applies exclusively to the warriors or heroes of a foreign nation who have become women or like women (Isa 19:16; Jer 48:41; 49:22; 50:37; 51:30; Nah 3:13).

Otherwise *ʾiṣṣâ* occasionally stands figuratively for Israel or Jerusalem: Hos 2:4; Jer 3:1, 3, 20; Isa 54:6; Ezek 16:30, 32; 23:2ff. (see 4f).

(d) In comparison to *ʾiṣ*, *ʾiṣṣâ* is rarely generalized to mean “anyone” (Exod 3:22; Amos 4:3; Ruth 1:8f.). Expressions for “the one . . . the other” are formed with *ʾāḥôt* (→ *ʾāḥ* 3d) and *r<sup>e</sup>ʿût* (Jer 9:19; of animals, Isa 34:15f.; Zech 11:9).

4. The usages of words in more or less theological contexts are suitably diverse:

(a) In the patriarchal narratives the promise to the matriarch that she will have a son forms a narrative motif that is certainly very old. In response to the complaint of the childless woman, God (or his messenger) promises this woman a son: Gen 17:19 (cf. 16:11); 18:10; 24:36; 25:21 (cf. C. Westermann, *Promises to the Fathers* [1980], 10ff.; on the issue of polygamy, cf. W. Plautz, “Monogamie und Polygynie im AT,” *ZAW* 75 [1963]: 3–27).

(b) *ʾiṣṣâ* occurs 17x in Gen 2–3 alone. The etiology of the word in 2:23 (*mēʾiṣ*; “she is taken from the man”), the special function of the woman in the story of the fall, and the special punishment in 3:16 are emphasized.

(c) Some situations apply to series like “men-women-children (-cattle-sheep-donkeys),” such as the execution of the ban in the Yahweh wars (Num 31:9, 17; Deut 2:34; 3:6; Josh 6:21; Judg 21:10f.; 1 Sam 15:3; 22:19; 27:9, 11). Similar series occur in the prophetic judgment proclamation (Yahweh’s enemies are now the Israelites: Jer 6:11f.; 14:16; 38:23; Ezek 9:6; in the wish against the enemies: Jer 18:21).

A second life setting is apparently the act of the public reading of the law, for which “men-women-children (-foreigners)” are assembled (Deut 31:12; Josh 8:35). This usage is taken up in the assemblies that Ezra and Nehemiah hold (Ezra 10:1; Neh 8:2f.).

(d) Foreign women represent a special theological motif. In older times a marriage between an Israelite and a Canaanite was hardly objectionable (Gen 34; Exod 2:21; 4:20; cf. Deut 21:11, 13). The Deuteronomistic theology in Judg and Kgs unequivocally evaluates such a marriage with neighbors negatively: foreign women mean the importation of foreign gods and consequently apostasy from Yahweh (Judg 3:6; 1 Kgs 11:1ff.; 16:31; 21:25; 2 Kgs 8:18). The issue was particularly acute in early post-exilic times: in P (Gen 27:46; 28:1f., 6, 9; closely associated with P,

Num 25:6ff.) and in Ezra 10:2ff.; Neh 13:23ff.

(e) To violate a woman is an “abomination in Israel” (*n<sup>e</sup>bālâ*, → *nābāl*), which summons the wrath and punishment of God (Judg 19f.; cf. Gen 34). Consequently, a whole series of laws regulate the sexual relationship between man and woman:

One should not covet his neighbor’s wife (Exod 20:17; Deut 5:21). If one lies with a betrothed (Deut 22:23f.) or married woman (Deut 22:22), both parties merit the death penalty. Adultery carries the death penalty (Lev 20:10; Num 5:11ff.). A woman who has sexual intercourse with an animal merits the same punishment (Lev 20:16). An entire series of intrafamilial sexual relationships are regulated in Lev 18, the woman’s menstruation in Lev 15. Further laws concerning woman are in Exod 19:15; 21:22; Lev 12:1–8; Num 6:2; 30:4ff.; 36:3ff.; Deut 17:2, 5; 22:19; 24:1ff.; 25:5.

Prophecy occasionally reprises such laws, in part in accusations against those who transgress the commandments (sexual commandments: Hos 2:4; Jer 3:1ff.; 5:8; 29:23, etc.; idolatry: Jer 7:18; 44:15; Ezek 8:14), in part in the prophetic proclamation of judgment (2 Sam 12:11; cf. Isa 13:16; Jer 8:10; Zech 14:2). Finally, reference should be made to the Torah sentences in Ezek 18:6, 11, 15.

The wisdom literature handles these sexual problems in another manner: good judgment “protects you from the wife of another” (Prov 2:16; 6:24; 7:5; cf. 6:29). Otherwise, a good and wise wife is a gift from Yahweh (Prov 19:14; cf. the praise of the worthy wife in Prov 31:10–31).

(f) Israel or Jerusalem is occasionally described as Yahweh’s wife in prophecy, first in Hos (Hos 2:4; the metaphorical treatment in Hos 1:2ff.; 3:1ff. does not belong in this context). In a “legal process against an unfaithful wife” (Wolff, *Hos*, Herm, 32), the unfaithful wife (Israel) is accused of adultery. The image of marriage, which Hosea borrowed from Canaanite mythology, serves to oppose Israel’s attraction to precisely this Canaanite Baal cult with its cultic prostitution. The image is taken up again in the accusations of Jer (Jer 3:1, 3, 20) and Ezek (Ezek 16:30, 32; 23:44). The salvation message of Deutero-Isa (Isa 54:6) treats the image differently: Israel is the abandoned “wife of youth” whom Yahweh will call anew.

(g) The saving activity of Yahweh toward Israel is loosely compared to the act of a woman with respect to her child in Isa 49:15, “A woman will also forget her child” (cf. Isa 66:13; → *ʔēm* 4e).

5. The NT takes up the following aspects again: (a) discussion of an infertile woman to whom God promises a son (Luke 1); (b) Gen 2–3 in Mark 10:7 pars., etc.; (c) the theme of “foreign women” is modified in 1 Cor 7:12ff. into the theme of “non-Christian marriage partners”; (d) as in the OT, marriage is esp. defended, although the many sexual regulations are

lacking; (e) for fig. usages, cf. Acts 21:2, 9; 22:17. Cf. also A. Oepke, “γυυνή,” *TDNT* 1:776–89.

J. Kühlewein

## אָשָׂם *ʾāšām* **guilt**

S 817; BDB 79b; *HALOT* 1:96a; *TDOT* 1:429–37; *TWOT* 180b; *NIDOTTE* 871

1. The root *ʾšm* or (according to the evidence of Arab. *ʾaṭima* “to commit an offense”) \**ʾtm* has not yet been identified in Sem. prior to Hebr. or contemporary with the OT (on Ug., cf. D. Kellermann, “*ʾāšām* in Ugarit?” *ZAW* 76 [1964]: 319–22; on Pun., cf. Sznycer 143). On Arab. (and possibly Eth.) equivalents, cf. *HAL* 92.

Hebr. forms the following from the root *ʾšm*: the verb in qal, ni., and hi.; the abstract noun *ʾāšām*, which indicates a circumstance (GKC §84f; BL 462f.); the abstract noun *ʾašmâ*, originally a fem. inf. (BL 317, 463; clearly still so in Lev 4:3; 5:24, 26); the verbal adj. *ʾāšēm*.

2. The verb is attested 33x in qal, in addition to once each in ni. and hi., the nom. *ʾāšām* 46x, *ʾašmâ* 19x, the adj. 3x.

Of the total of 103 occurrences of the root in all forms, 49 appear in P portions of Lev and Num, 9 in Chron, 8 in Ezek, and 7 in Ezra. In the legal sections of Exod and Deut, the root does not occur at all, and it is rare in wisdom literature (Prov 2x). The historical books also use the word rarely: Gen 2x, Judg 1x, 1 Sam 4x (all in ch. 6), 2 Sam 1x, 2 Kgs 1x. The same is true for the language of the prophets: Ezek 8x and Hos 5x (verbal forms) are conspicuous; there remain only Jer 3x, Amos, Hab, Deutero-Isa, Deutero-Zech, Joel, and Isa 24 with one text each. Thus around 70% of the corpus belongs to the cultico-theologically stamped texts of the exilic and post-exilic periods.

The oldest occurrences of the nom. are in Gen 26:10 (L/J) and 1 Sam 6:3f., 8, 17, and of the adj. *ʾāšēm* in 2 Sam 14:13. The verb occurs first then in Judg 21:22, followed by *ʾāšām* in 2 Kgs 12:17, *ʾašmâ* in Amos 8:14, *ʾāšēm* in Gen 42:21 (E), and finally the verb in Hos 4:15; 5:15; 10:2; 13:1; 14:1; and Hab 1:11.

The nom. form *ʾašmâ* is used only in the post-exilic period, apart from Amos 8:14 and Psa 69:6, first alongside *ʾāšām* (Lev 4:3; 5:24, 26; 22:16). In Ezra and Chron, where, on the one hand, the remaining 13 occurrences are located, while, on the other hand, *ʾāšām* no longer occurs, *ʾašmâ* has displaced the older form *ʾāšām*. This development is confirmed in the available Qumran texts, where *ʾāšām* occurs only 2x, *ʾašmâ*, in contrast, 37x (according to Kuhn, *Konk.* 23f.; cf. *GCDS* 37f.).

Textual difficulties exist in Judg 21:22 Isa 24:6; Ezek 6:6; Hos 4:15; Hab 1:11; Prov 14:9; Ezra 10:19.

3. (a) Context, formulaic usages, and phrases indicate two foci in the OT usage of the term: (1) a situation of guilt obligation, in which someone gives something.

Cf. e.g., “bring (*bôʿ* hi.) something as *ʔāšām* to Yahweh” (Lev 5:15b, 18, 25; Num 6:12), “present (*qrb* hi.) something before Yahweh” (Lev 14:12), “place (*śim*) his life (as) *ʔāšām*” (Isa 53:10); further, the means: “*ʔāšām* -goat” (Lev 5:16; 19:21b, 22), “*ʔāšām* -lamb” (Lev 14:21, 24f.), “*ʔāšām* -silver” (2 Kgs 12:17). Cf. also the “day of the *ʔāšmā*” (Lev 5:24; cf. Hos 5:15), and finally the introduction formulae in Lev 6:10; 7:1, 7, 37; Num 18:9, as well as Hos 5:15; Isa 24:6; Zech 11:5.

(2) A situation in which someone is or becomes obligated to discharge guilt by giving something.

This situation is expressed (a) by the verb in a judgment formula in genres dealing with the declaration of guilt (in these cases with the root *ʔsm* also probably including a formal declaration of the consequences of the judgment): Hos 10:2; 13:1; 14:1; Jer 2:3; Ezek 22:4; 25:12; Prov 30:10; Psa 34:23; cf. Jer 50:7; Psa 5:11; almost all these occurrences have a tripartite structure, with the declaration of guilt located exactly between the accusation and the specific announcement of punishment; cf. also Lev 5:17, 21–23; Num 5:6f.; (b) also by the verb in a judgment formula in instruction in cultic law: Lev 4:13f., 22f.; 5:17, 19b, 23; Num 5:6f.; (c) by *ʔāšām* in declaratory formulae: Lev 5:19a; 7:5; 14:13; (d) in exhortative communication of Torah: Hos 4:15; 2 Chron 19:10b; (e) in confession: 2 Chron 28:13b; (f) in all occurrences of *ʔāšmā* (except for Lev 5:24); (g) cf. finally Jer 50:7; 51:5; Psa 68:22; Gen 26:10; also Amos 8:14, “they swear by that by which Samaria has become guilty.”

(b) This state of affairs indicates the viewpoints to be excluded for the determination of the meaning of the term:

(1) *ʔsm* is not a term for “transgression, offense.” Accordingly, the texts markedly distinguish *ʔsm* from terms for “transgression” (e.g., *mʕl*, Lev 5:15, 21; *hʕʔ*, Lev 4:2f., 13f.; 5:1f.; cf. also Ezra 9:13). Although the transgression may be of entirely different varieties (Lev 4:13; 5:2, 17–19; Num 5:6f.) and *ʔsm* can presuppose all varieties (Lev 5:21–23, 26; 2 Chron 19:10), *ʔsm* itself always refers only to a *particular type of consequence* of offenses.

(2) It is equally impossible to demonstrate that *ʔsm* means a particular type of punishment (T. H. Gaster, *IDB* 4:152: “simply a mulct,” “a fine”). The fulfillment of the obligation could vary; cf. 1 Sam 6:3f., 8, 17; Gen 42:21; 2 Kgs 12:17; Hos 14:1; Jer 51:5; Isa 53:10; also Lev 5:15ff.; Ezek 40:39; 44:29; 46:20; Ezra 10:19, etc.

(3) *ʔāšām* as fulfillment of obligation cannot be understood originally as “sacrifice,” even if the institution appears later alongside the various sacrificial rites; cf. Lev 6:10; 7:7, 37; Num 18:9; 2 Kgs 12:17; Ezek 40:39; 42:13; 44:29; 46:20 (cf. R. Rendtorff, *Studien zur Geschichte des Opfers im Alten Israel* [1967], 227f.; Elliger, HAT 4, 73ff.).

(4) Although *ʔāšām* and *ʕāwōn* (the two most nearly synonymous terms) refer to the same situation in Jer 51:5f.; Lev 5:17; 22:16; Ezra 9:6, they still express something distinct: → *ʕāwōn* addresses the element of the weight, the burdening, the burden (of guilt); in contrast, *ʔāšām* expresses the element of obligation (with respect to the resolution of guilt). *ʕāwōn ʔāšmâ* in Lev 22:16 means, then, “the burden of guilt-obligation.”

(5) Finally, functional aspects such as “reparation” or “restitution” do not appear to be the primary referent of *ʔšm*. The primary viewpoint is the situation of obligation that follows a judgment, the state of being obligated, and its fulfillment. Functional aspects appear to belong more to the presupposed sense of the situation of obligation than to be expressed in the word itself. Thus according to Lev 5:14–16, *ʔāšām* is not “compensation” (contra Elliger, HAT 4, 76; with Gaster, op. cit.: “not an indemnification . . . not compensatory”), but serves to restore (contra Gaster, op. cit.); cf. → *kpr pi. ʕal* and → *slḥ*. Cf. also Lev 5:21–26 and Num 5:6f. Gen 42:21 seems to imply an understanding of compensation. The old text 1 Sam 6:3f., 8, 17 refers to rehabilitation and restitution, Isa 53:10 to restitution; cf. Judg 21:22.

(c) The double usage—from a modern perspective—of the one root *ʔšm* (see 3a) apparently relates to a common foundation assumed in all aspects from judgment of guilt to resolution of guilt: it is *the obligation, the duty, the liability, that results from incurring guilt*. In this respect “obligation” always aims at fulfillment, even if not yet completed; the fulfillment is always characterized according to its nature, namely “liability or punishment for guilt.” This situation occurs, above all, in the case of the sentence of liability for guilt (see 3a[1]), during the period of obligation for guilt (adj. forms; cf. Prov 14:9, “fools scoff at liability for guilt”; Psa 68:22, “(he) who walks in his guilt-obligatedness”; Jer 51:5, “the land is full of guilt-liability”), and in the event of fulfillment (see 3a[2]).

In this sense, then, the nominal forms (incl. the adjs.) signify guilt-obligatedness, the verb forms, *incurring* guilt-obligation. The reason that the noun is used only in the sg. (exceptions: Psa 69:6; 2 Chron 28:10, both from *ʔāšmâ*) may be that “guilt-obligation,” with a view to judgment and atonement, is always seen as one. In contrast, the pl. forms of verbs and adjs. refer to the plurality of the obligated persons.

This common basic situation and basic meaning seem, then, to continue to dominate even in texts that do not require a choice between

“guilt” and “atonement”: Gen 26:10; 42:21 (cf. v 22c); Judg 21:22; 2 Sam 14:13; Hos 5:15 (cf. Wolff, *Hos*, Herm, 105, and Gen 42:21); 10:2; 14:1; Isa 53:10; Prov 14:9; 30:10; Ezra 10:19 MT: “and those under guilt-obligation, a goat for their guilt-obligation (penance? punishment?)”; contrast LXX: “and as their punishment (act of penance?) a lamb for their guilt-obligation.” Cf. the double perspective in the contexts of Psa 34:22f.; Lev 5:24, 26, as well.

(d) On the basis, then, of the application of the basic meaning to the various aspects of the guilt-obligation situation, the perspectival usage of the term arises. Finally, in addition to the already mentioned perspectives of being/becoming obligated by guilt and of guilt-resolution, the usage of *ʾāšām* as a means of guilt-resolution may be mentioned.

This usage is expressed grammatically by *ʾāšām* as either an acc. obj. or nomen rectum in a gen. construction: “to slaughter *ʾāšām*” (Lev 7:2, an animal is intended); “to bring *ʾāšām*” (Lev 5:6f., 15b, 25a; 19:21a); “to return *ʾāšām*” (1 Sam 6:3f., 8, 17; Num 5:7f.); “the blood of the *ʾāšām* (-animal)” (Lev 14:14, 17, 25b, 28). According to Ezek 40:39; 42:13; 44:29; 46:20, *ʾāšām*, among others, belongs to the holy offerings reserved for the priests.

The alteration of perspectives is indicated clearly in Lev 5:15f.: (1) “*ʾāšām* for Yahweh,” (2) “a goat as *ʾāšām* (*lʿāšām*),” (3) “the goat of the (*hā-*)*ʾāšām*.” In (1) *ʾāšām* is the subj., in (2) and (3) the goat is the subj. While (2) and (3) explicate the relationship between *ʾāšām* and the goat, this explication is implied in *ʾāšām*. This shows that even where the word must be understood instrumentally, it expresses more the significance, the function of the means, than the means itself. The contexts indicate that one also had the means itself in view, and stated it.

(e) The modern translation problem consists in the fact that we see primarily the different perspectives and express the distinctions and do not see and express the commonalities that are true of *šm* despite the distinctions. With attention to the basic intention of the Hebr. term, one should consequently translate: *šm* qal “to be/become guilt-obligated or liability-obligated”; *šm* ni. “to suffer guilt-obligation, guilt-liability” (Joel 1:18); *šm* hi. “to make obligated due to guilt, liable due to guilt” (Psa 5:11); *ʾāšēm* “obligated due to guilt, liable due to guilt”; *ʾāšām* and *ʾāšmâ* “guilt-obligation, guilt-liability, guilt-responsibility” (both nouns so far as possible with a view to the unity of situation and resolution). Where the element of resolution predominates or the instrumental element cannot be set aside, one may translate “resolution of guilt,” “reparation.” Alternatives include: “guilt/restitution” (Buber); “culpability/punishment” (Wolff; clear linguistically and with respect to content); “to be guilty/to do penance” (ZB; not entirely precise with respect to content and linguistically inconsistent). The following

proposals are incorrect or problematic: “to become guilty, guilt” (because this is aimed at the act of the offense); “to do wrong” (ZB, e.g., at Lev 5:17); “to burden with guilt” (*HAL* 93a; cf. *KBL* 94b; because “to burden” is more appropriate for *ʿawōn*); “guilt sacrifice” (because “sacrifice” implies something other than the punitive character of the guilt offering).

4. The understanding assumed in an *šm* situation is apparently that guilt-obligation and resolution of liability for injury will create the prerequisite for the restoration of a disturbed situation. The word has a theological character insofar as human liability is the expression, cause, or result of divine judgment or activity and is related to this divine involvement as a human situation or resolution. This relationship is directly visible where Yahweh’s privileges (e.g., in the cultic sphere) are violated. And it is implicitly the case where Yahweh’s jurisdiction is violated through the infringement of civil rights or of people. The reason for this theological quality of *šm* lies in the view that human guilt-liability involves God basically and entirely. As a consequence, every resolution of guilt simultaneously signifies a realization of liability before God. Thus one may not distinguish between a religious and a secular understanding of *šm*-situations here either.

Correspondingly, God requests or announces *šm* on account of the oppression of the righteous (Psa 5:11; 32:22f.) or on account of the violence done to the law that Yahweh oversees (Ezek 22:4; 2 Chron 19:10; cf. vv 5–9). Or the guilt-obligation of God’s enemies results in divine intervention (Psa 68:22). According to Num 5:6f, one is liable to the injured person or to his/her relative, or, if there is no relative, to God, because of the notion that a legal offense against people is an offense against God. Lev 5:14–16, 21–26 declares, as broadly as possible, that one who commits a legal offense against another is liable to God—in addition to being responsible for making restitution to the injured party.

Joseph’s brothers understand their situation as a guilt-burden for their crime against Joseph (Gen 42:21). According to 1 Sam 6:3, *šm* is supposed to bring about healing and the recognition of the reason for Yahweh’s judgment.

In this sense, *šm* is a consequence, then, of the violation of covenant (Isa 24:6) or of apostasy from Yahweh (Hos, esp. 14:1; Jer 51:5). Guilt-obligation becomes directly visible when one assaults Yahweh’s privileges, those dedicated to Yahweh, whether Israel (Ezek 25:12; Jer 50:7; Zech 11:5), a compatriot (2 Chron 28:13), the property of the sanctuary or of the priests (Ezek 40:39; 42:13; 44:29; 46:20), or a specific religious law (Ezra 10:19).

5. The LXX translated *šm* with no less than 16 different terms. In the lead, with about half the occurrences (mostly from Lev, Num, and related texts) stands *plēmmeleia* “offense” (*plēmmeleō*, etc., is not attested in the NT), followed by *hamartia* (*hamartanō*), *agnoia*, and other words for

“error.” The LXX, then, abandoned the unified basic meaning of *šm* in principle and replaced it with a number of meanings mostly of quite distinct and widely varied backgrounds. This observation applies even to the various layers of tradition noted in the LXX and despite the predominance of *plēmmeleia*. Furthermore, the LXX is not consistent in translation—with only the partial exception of relatively closed text groups (Lev, Num)—not even in the rendering of the major perspectives. These very perspectives have fallen prey to an understanding of deeds implicit in the Gk. terms. With the transition into the Greek-speaking world, then, the specific content of *šm* was basically lost.

R. Knierim

### אשר *šr* pi. to call blessed

S 833; BDB 80b; HALOT 1:97b; TDOT 1:445–48; TWOT 183; NIDOTTE 887

1. The nominal form *šre*, usually understood as the pl. cs. of an assumed *šer* “luck, fortune” (cf., however, Joüon §89l; J. A. Soggin, *TZ* 23 [1967]: 82), presents the most important form of the word family *šr* II, with some counterparts in neighboring languages, although they do not sufficiently explain the etymology of the root (cf. HAL 94–96; Zorell 87; W. Janzen, *HTR* 58 [1965]: 216; SBL 116). The derivative *šer* “luck” is attested once (Gen 30:13; cf. HAL 95b; also WUS no. 458; Neo-Pun. *šrlb* “joy of the heart(?),” KAI no. 145.11). Verbal manifestations of the root occur only in *šr* pi. and pu. and are commonly perceived as denominatives of *šre* (cf. D. R. Hillers, “Delocutive Verbs in Biblical Hebrew,” *JBL* 86 [1967]: 320–24).

2. Although the distribution of verbs is not very characteristic (pi. 7x, pu. 2x), some tendencies are perceptible for *šre*. The word is attested a total of 45x (Psa 26x, Prov 8x; also Deut 33:29; 1 Kgs 10:8[bis] = 2 Chron 9:7[bis]; Isa 30:18; 32:20; 56:2; Job 5:17; Eccl 10:17; Dan 12:12; in addition to *šer* 1x; see above), 38x in the form *šre*, 6x with pl. suf. and 1x with sg. suf. (Prov 29:18).

In view of the rather high number of Psa occurrences, the genre of the psalms in question should be examined because the question (controversial in some research) of the origin and nature of the *šre* statements essentially depends on this evidence.

This investigation indicates that the stereotypical *šrē* formula characterizes known wisdom Psalms (Psa 1; 32; 34; 106; 112; 127; 128; cf. Gunkel-Begrich 392; S. Mowinckel, *SVT* 3 [1955]: 213; Sellin-Fohrer 285ff.) or can occur in wisdom-influenced elements of other Psalms (cf. Psa 94; 119; also Psa 2:12b alongside v 10). Three of nine verbs exhibit wisdom influence (Job 29:11; Prov 3:18; 31:28; cf. Psa 41:3 Q). The extensive attempt of E. Lipiński, (“Macarismes et psaumes de congratulation,” *RB* 75 [1968]: 321–67) to demonstrate a cultic origin for the *šrē* formula, first on the basis of the Psalm passages, is already of limited value because of this association with wisdom (see further 4).

3. (a) The basic meaning of the pi., to be understood as an estimative- declarative, is “call blessed” (with e.g., GB 73; *HAL* 94a; *HP* 41, 270). *ūd* hi. “give (complimentary) testimony” (Job 29:11) and *hll* pi. “praise” (Prov 31:28; Song Sol 6:9) are occasionally par. The verb, which—like the nominal forms—refers only to persons (but never to God; see G. Bertram, *TDNT* 4:365), expresses a predicative description with positive content, a description further modified and given foundation by the context or by assertions of various types (e.g., a *kî* clause, Mal 3:12).

(b) The nominal beatitude using suf. forms and, above all, the more frequent *šrē*, confirms the verbal evidence, but exhibits at the same time a broader application, still markedly formulaic.

The form with the simple *šrē* is always in first position; so, too, usually the suf. forms (in Prov 14:21; 16:20; 29:18, however, post-positive). Par. allusions occur in 1 Kgs 10:8 = 2 Chron 9:7; Psa 144:15; doublets in Psa 32:1f.; 84:5f.; 119:1f.; 137:8f.; Prov 8:32, 34 (cf. K. Koch, *Growth of the Biblical Tradition* [1969], 7, 95), which give rise to series (these series dominate, however, only later; cf. C. A. Keller, FS Vischer 89). The syntactic extension of the form often occurs through a noun: *ādām* (Psa 32:2; 84:6, 13; Prov 3:13; 8:34; 28:14) and *nōš* (Isa 56:2; Job 5:17) “person,” *š* (sg.: Psa 1:1; 112:1; pl.: 1 Kgs 10:8 = 2 Chron 9:7) and *geber* (Psa 34:9; 40:5; 94:12; 127:5) “man,” *gōy* (Psa 33:12) and *am* (Psa 89:16; 144:15[bis]) “people,” “his sons” (Prov 20:7), “your servants” (1 Kgs 10:8 = 2 Chron 9:7), and “those who walk blamelessly” (Psa 119:1), then through a ptcp. (sg.: Psa 32:1; 41:2; 128:1; Dan 12:12; pl.: Isa 30:18; Psa 2:12; 84:5; 106:3; 119:2), or through a relative clause formed either asyndetically with an impf. (Psa 65:5; Prov 8:32; cf. BrSynt 144) or with *še* - and an impf. (Psa 137:8f.) or nom. clause (Psa 146:5). This extension characterizes or grounds the beatification of the person (or group) in question.

There are occasionally address forms (Deut 33:29; Isa 32:20; Psa 128:2; Eccl 10:17, with suf. forms; cf. Mal 3:12 with the verb). In some circumstances a congratulatory act can also be presupposed (cf. Gen 30:13; also Psa 127:3–5; 128; cf. *TDNT* 4:367), so that the beatitude may hardly be described generally as a greeting or felicitation (cf. H. Schmidt, *TSK* 103 [1931]: 141–50; Gemser’s characterization of them as “a hymnically elevated mid-form between statement and exhortation” (HAT

16, 29) may be too imprecise, according to W. Zimmerli, “Concerning the Structure of OT Wisdom,” *Studies in Ancient Israelite Wisdom* [1976], 202n.16). It should more likely be understood as a predicative salvation saying (cf. Fohrer, KAT 16, 152; also Kraus, *Psa*, CC, 1:115, with reference to M. Buber), which focuses praise on a person (or group) for his/her beneficent well-being and establishes the person as exemplary—with a particular exhortative character—and which may be issued primarily in a wisdom context, but also with a more limited religious interest.

4. Of theological significance is the fact that one does not contrast these interests so that “wisdom” is essentially equated with “empirical wisdom,” but that one emphasizes the religious character of wisdom (cf. Zimmerli, “Place and Limit of the Wisdom in the Framework of the OT Theology,” *Studies in Ancient Israelite Wisdom* 316; Ch. Kayatz, *Studien zu Proverbien 1–9* [1966], 51f., who adduces Eg. material, as does, esp., J. Dupont, “‘Béatitudes’ égyptiennes,” *Bib* 47 [1966]: 185–222). Thus felicitous good fortune can be of various types and can refer e.g., to the possession of children, beauty, and honor, to the discovery of wisdom, as well as to the forgiveness of sin and trust in God (more precise references in Bertram, *TDNT* 4:365), yet it is generally true that the person congratulated does not violate God’s established order but conforms to it (cf. Wildberger, *Isa 1–12*, CC, 196), and that, at the same time, well-being can be an observable expression of the manifest or expected blessing of God (so Janzen, op. cit. 218ff., contra S. Mowinckel, *Psalmenstudien* [1924], 5:1f., 54, and others, who, in the interests of the cult, understand *ʾašrē* as a kind of blessing very near to the word stem → *brk*, which seems inappropriate, however; cf. also J. Dupont, *Les Béatitudes* [19582], 321ff.). “Theological wisdom” and piety could also be given a nomistic turn (so, above all, in *Psa* 1; cf. also *Psa* 119:1f.; *Prov* 29:18b). Like the apocalyptic expression of *Dan* 12:12, *Psa* 1 deals with salvation as a contrast to ruin under God’s power.

5. In the LXX, which continues to remain basically true to the conceptual model of the OT, as well as in the NT, where the term “refers overwhelmingly to the distinctive religious joy which accrues to man from his share in the salvation of the kingdom of God” (F. Hauck, *TDNT* 4:367), the Gk. equivalents to the word stem *šr* are formed almost exclusively from the word group *makarios*, *makarizō*, and *makarismos*. Otherwise, the series (makarisms) are formally characteristic esp. of later literature (cf. *Sir* 25:7–11; *Matt* 5:3–12; *Luke* 6:20–23; → *hōy*). Cf. F. Hauck and G. Bertram, “μακάριος,” *TDNT* 4:362–70; J. Dupont, *Les Béatitudes* (19582); A. George, *FS Robert* 398–403; K. Koch, *Growth of the Biblical Tradition* (1969), 6–8, 39–44, 59–62; W. Käser, *ZAW* 82 (1970): 225–50.

### בגד *bgd* **to act faithlessly**

S 898; BDB 93b; HALOT 1:108a; TDOT 1:470–73; TWOT 198; NIDOTTE 953

1. The root *bgd* “to act faithlessly” has so far been identified outside Hebr. only in the Arab. dialect of the Datinah (C. Landberg, *Etudes sur les dialectes de l’Arabie Méridionale* [1905], 2:365f.; *Glossaire Datinois* [1920], 1:135), where *bajada* means “to mislead, to deceive.”

Concerning the relationship of the root to *beged* “garment, covering” (215x in the OT) or Arab. *bijād/bujd* posited by Gesenius (*Thesaurus* 177), Landberg (op. cit.), etc., which would result in a basic meaning “tecte agere,” one must abide by the caution of P. Joüon (*Mélanges de la faculté orientale de Beyrouth* 6 [1913]: 171). It is more likely that *beged* “garment” is a primary noun and can be disregarded in the following.

Derivatives include the noun *beged* “unfaithfulness” (Isa 24:16; Jer 12:1 in the cognate acc. *bgd beged*), the abstract pl. ptcp. *bōg<sup>e</sup>dôt* “faithlessness” (Zeph 3:4, in the phrase <sup>ʔ</sup>*anšê bōg<sup>e</sup>dôt* “men of faithlessness”; according to Gemser, HAT 16, 113, also in Prov 23:28 *bōg<sup>e</sup>dīm* “deceit”), and the adj. *bāgôd* “faithless” (Jer 3:7, 10, interchangeable with the act. ptcp. *bōgēd*).

2. The verb occurs 49x in the OT, only in the qal. Thirty occurrences fall in the prophetic corpus (post-exilic additions in Isa 10x, Deutero-Isa 2x, Jer 9x, Hos 2x, Hab 2x, Mal 5x), 9 in Prov, 5 in Psa, and once each in Job, Lam, Exod, Judg, and 1 Sam. Together with the five occurrences of the noun mentioned above, the whole word group occurs a total of 54x; 35x or approximately 65% in prophecy.

The verb appears abs. 35x (23x in the ptcp.) and 14x (in addition to Psa 73:15 txt em) with *be* and the person (Yahweh in Jer 3:20; 5:11; Hos 5:7; 6:7; otherwise people: woman 4x, compatriot 3x, foreign nation 2x, king 1x). It is incorrect to assume a construction with *min* in Jer 3:20; *min* here should be translated “on account of” (contra

S. Poržčan, *Sin in the OT* [1963], 61, who also incorrectly cites a construction with  $\text{בָּגַד}$ ).

3. (a) The semantics of *bgd* must be derived from the OT itself, because the Arab. pars. mentioned under 1 are hardly productive. If one begins with the three presumably oldest attestations in Exod 21:8; Judg 9:23; 1 Sam 14:33, one derives, first of all, three categories of usage for the root, the first of which may be its original setting in life, while the second and third probably represent primarily transitional areas. Two secondary areas of expansion, one pretheological and one specifically theological, are appended; this differentiation is undertaken for the sake of overview and may not signify a strict distinction in subject matter.

The following categorization results: marriage law (3b), politico-diplomatic law (3c), cultico-sacral law (3d), social (3e), and specifically theological (4a-d) spheres.

(b) Exod 21:8 relates *bgd be* strictly to a legal status within slave law, a status established through a marital relationship. A slave designated for marital relations thereby attains “at least to a certain extent—the rights of a wife” (Noth, *Exod*, OTL, 179); if she displeases her husband, she may not be sold to a foreigner. Accordingly, the verb means: “to act contrary to the duty required by law or established by a relationship of loyalty into which the parties have entered.” The translation “to act faithlessly” must bear in mind that the reference is less to an offensive attitude than to an objectively measurable offensive behavior.

If one extends the marriage law line from this passage, the following may be treated: Mal 2:14f. (on vv 10f., 16, see 3e), where *bgd* concerns divorce (v 16 *šlh* pi.) and is juridically qualified by  $\text{אֵשֶׁת בְּרִיתֶךָ}$  “wife of your marital contract” (Horst, HAT 14, 268), whose “witness” is Yahweh (v 14); Prov 23:28, where, in context with “whore” and “stranger” (= the wife of a strange man), *bôg<sup>c</sup>dîm* specifically means “adulterer”; Lam 1:2, where the faithlessly abandoned woman is a picture of Jerusalem abandoned by its allies, which established the transition to the political context (see c).

(c) Judg 9:23 exhibits *bgd* in the realm of politico-diplomatic law; it refers to the Shechemite defection from Abimelek.

In addition to Lam 1:2 (see b), Isa 21:2 (crime of the Babylonian vassals against Babel); 33:1; Hab 1:13; 2:5 lie in the same vein. In the last three passages, *bgd* has admittedly been applied, in an unusual expansion and at the same time an inversion, to the power politics of the foreign superpowers who scoffed at all limits of international law and in which “the godless (*rāšāʿ*) devours the righteous (*šaddîq*)” (Hab 1:13). It is noteworthy that Isa 33:1, “woe to the faithless, on whom faithlessness has not been practiced,” is interpreted in v 8 precisely with “he has broken the contract (*b<sup>c</sup>rit*).” “Human power must be seen as . . . dissolved by God when it attacks the law, when it commits, as it were, a faithless contract (*bgd*) by brutally oppressing in order to elevate

its own might” (Horst, HAT 14, 177).

(d) In 1 Sam 14:33, *bgd* qualifies the transgression of the ritual law of Lev 7:26f.; 17:10ff. (the prohibition against the consumption of blood) in par. to → *ḥtʿ* “to err” as a cultico-sacral offense.

Such a usage also appears in Psa 78:57, as the comparison with v 58 (“high places,” “idols”) shows. In the probable event that this passage reprimands cult prophets, *ʿanšēbōgēdôt* “men of faithlessness,” it belongs in this category too.

(e) *bgd* appears in Jer 12:6 (family); Job 6:15 (compatriots); Mal 2:10f., 16 (kinship of God’s children); and in the proverbs applied to the still pretheological realm of the community faithfulness demanded by created or natural social structures. In Psa 73:15 it means betrayal of the community of the “pious” (v 1), who, as “those who hope in Yahweh,” oppose the *bōgēdīm rēqām*, the “senselessly faithless” in Psa 25:3. Prov 25:19 associates the *bōgēd* with false testimony (v 18).

4. (a) The specifically theological usage appears in the phrase *bgd be* with Yahweh (Jer 3:20; 5:11; Hos 5:7; 6:7), and in the usage of the verbs with direct reference to the relationship with God, often the ptcp. without obj. (or with a cognate acc.) (1 Sam 14:33; Isa 24:16; 48:8; Jer 3:8, 11; 12:1; Psa 25:3; 78:57; 119:158), and in the similar usage of the adj. *bāgôd* (Jer 3:7, 10).

(b) The application of marriage law concepts to the relationship with God occurs in Jer and Hos. Corresponding to the covenant ideology underlying this application, par. expressions here are *šûb mēʿahʿrê* “to turn aside from,” *znh* “to commit harlotry,” *nʿp* “to commit adultery,” and the antonyms *šûb ʿel* “to return to,” *ʿth lʿ* “to come (back) to,” and *ydʿ ʿet-yhwh* “to (ac)know(ledge) Yahweh.” When Mal 2:10–16 uses the interrelated key words *bgd* and *bʿrît* for both marriage and the covenant with Yahweh (vv 10, 14), it has long been anticipated, as shown by Hos 6:7 (*bgd beyhwh* and *ʿbr bʿrît* “to transgress the covenant” elucidate each other) and Jer 3:8 (the “decree of divorcement” presupposes the concept of the “marriage contract”).

(c) In the remaining passages, *bgd* is measured more in terms of norms and regulations of righteousness and community loyalty: in terms of *mišpāt* (→ *špt*, Isa 33:1, 5; Hos 5:1, 7; 6:5, 7; Hab 1:12f.), of *šʿdāqâ* (→ *šdq*, Isa 33:1, 5; cf. the antonym *šaddîq* in Isa 24:16; Hab 1:13; 2:4f.), of *ʿmûnâ* (→ *ʿmn*; Jer 9:1f.; Hab 2:4f.), and of → *ḥesed* (Hos 6:4, 6f.; Job 6:14f.). The adj. *rāšāʿ* (→ *ršʿ*) parallels the ptcp. *bōgēd* in Jer 12:1; Hab 1:13. Another important par. is the root *pšʿ* “to break with” (R. Knierim, *Die Hauptbegriffe für Sünde im AT* [1965], 113ff.), which explicates the *bāgôd tibgôd* of Isa

48:8a in v 8b and the *bōg<sup>e</sup>dîm bāgādû ûbeged bōg<sup>e</sup>dîm bāgādû* of Isa 24:16 in v 20. The assumption that the political strain, in particular, found application to the relationship with God in the passages named in 4c is supported by this proximity to *pšç*, which often indicates political apostasy.

(d) It is form-critically noteworthy that most passages appear in the accusation of prophetic judgment speech, also in the threat and in the lament. Elements of lament and accusation also carry the term in Psa and Lam. The legal home of the root *bgd* required that the prophets use it for the accusatory indictment of apostasy.

5. The stereotypical usage of the ptcp. of *bgd* at Qumran to describe the “sons of darkness” = “*the* disloyal” is foreshadowed in the OT. The par. *çdt bwgdym* (CD 1:2; 6Q 3:13 = DJD 3:140) to *çseret bōg<sup>e</sup>dîm* in Jer 9:1, both of which may mean “assembly of the faithless,” is interesting.

Because *atheteō* and *asyntheteō* are the most analogous translations of *bgd* in the LXX (in addition to the sporadic *anomeō*, *enkataleipō*, and the somewhat more frequent *paranomeō*), one probably reencounters the *bōg<sup>e</sup>dîm* in the *asynthetoi* of Rom 1:31 and the primitive Christian interpretation of the OT concept of *bgd beyhwh* in Luke 10:16, “but whoever rejects (*athetōn*) me, rejects (*athetei*) him who sent me.”

בַּד *bad* **solitariness** → עָהָד *çehād*

בֹּא *bō<sup>ʔ</sup>* **to come**

S 935; BDB 97b; HALOT 1:112b; TDOT 2:20–49; TWOT 212; NIDOTTE 995

אָתָּה *çth* **to come**

S 857; BDB 87a; HALOT 1:102a; TWOT 188; NIDOTTE 910

1. The verb *bō<sup>ʔ</sup>* “to enter, come” has cognates in most Sem. languages, although sometimes with somewhat divergent meanings (Akk. *bā<sup>ʔ</sup>u* “to go along,” etc.; Arab. *bā<sup>ʔ</sup>a* “to return”); Aram. uses *çth* for “to come,” *çl* for “to enter” (both occur as Aramaisms in Hebr.; see Wagner nos. 31f., 219f.).

In Mari, Akk. *bâḷu* is attested in the West Sem. meaning “to come” (*AHw* 117b; *CAD* B:181).

Ug. *ba* corresponds to Hebr. *bôʾ* in meaning (*WUS* no. 487; *UT* no. 453). In Phoen.-Pun. the *yi*. (*KAI* nos. 5.1; 81.4) also seems to occur alongside the *qal* (*DISO* 32), as well as the subst. *mbʾ* “setting (of the sun)” (*DISO* 141).

*môbāʾ* and *mābôʾ* “entrance,” *tʿbûʾâ* “produce,” and once *biʾâ* “entrance,” perhaps as an Akk. loanword (*HAL* 102a), occur as nom. forms in Hebr.

2. *bôʾ* is the fourth most frequent verb in the OT, after *ʾmr* “to say,” *hyh* “to be,” and *ʿsh* “to do, make,” and thus the most frequent verb of movement (*hlk* “to go” is sixth after *ntn* “to give”):

The table includes passages with the place designation *I<sup>e</sup>bô<sup>ʔ</sup>h<sup>a</sup>māt* (“where one enters Hamath”) (11x; cf. M. Noth, *Num*, OTL, 104f., 250; id., BK 9, 192; K. Elliger, *BHH* 2:630), as well as Gen 30:11 Q, but not Job 22:21.

Of the nouns, *mābô<sup>ʔ</sup>* occurs 23x (Ezek 5x), *môbā<sup>ʔ</sup>* 2x (2 Sam 3:25 Q; Ezek 43:11), *t<sup>e</sup>bû<sup>ʔ</sup>â* 43x (incl. Job 22:21; 11x in Lev, 9x in Lev 25; 8x in Prov, 6x in Deut) and *bi<sup>ʔ</sup>â* 1x (Ezek 8:5).

3. The numerous usages of the verb cannot be exhaustively treated here. The lexicons (cf. GB 86–88; Zorell 98–100; *HAL* 108–10) categorize these usages by the two major meanings “to enter” (antonymn → *yš<sup>ʔ</sup>* “to exit”) and “to come” (antonym → *hlk* “to go”) and append rarer meanings (“to go,” “to come back,” etc.) together with the many idiomatic expressions.

The usage with the subject → *šemeš* in the meaning “go down” should be added to the meaning “to enter” in *HAL* 109a (Gen 15:12, 17; 28:11; Exod 17:12; 22:25; Lev 22:7; Deut 16:6; 23:12; 24:13, 15; Josh 8:29; 10:27; Judg 19:14; 2 Sam 2:24; 3:35; 1 Kgs 22:36; Isa 60:20; Jer 15:9; Mic 3:6; Eccl 1:5; 2 Chron 18:34; cf. hi. “to cause to go down,” Amos 8:9; *m<sup>e</sup>bô<sup>ʔ</sup> haššemeš* “sunset, west,” Deut 11:30; Josh 1:4; 23:4; Zech 8:7; cf. Mal 1:11; Psa 50:1; 104:19; 113:3; *ʿrb* IV, with the subst. *ma<sup>a</sup>rāb*, also occurs in the same meaning; cf. Akk. *erēbu*).

The common meaning adapts itself well to euphemistic language, e.g., in Gen 15:15 “to go to the fathers” = “to die” and frequently in the meaning “to go in to a woman” = “to live together” (Gen 6:4; 16:2, 4; 19:31; 29:21, 23, 30; 30:3f., 16; 38:2, 8f., 16, 18; Deut 21:13; 22:13; 25:5; Judg 16:1; 2 Sam 3:7; 12:24; 16:21f.; Ezek 17:44; Psa 51:2; Prov 6:29; 1 Chron 2:21; 7:23; similarly also in Arab. and Ug.; see *WUS* no. 487

on *KTU* 1.10.II.21f.).

The meaning “to come” is developed in several directions. J. G. Plöger (*Literarkritische, formgeschichtliche und stilkritische Untersuchungen zum Deut* [1967], 174–84) investigated the formulaic combination of *bôʿ* and *yšʿ* (“to come and go,” “exit and entrance”), and concluded that no specific life setting may be found for the combination (cf. Deut 28:6, 19; 31:2; Josh 6:1; 14:11; 1 Sam 18:13, 16; 29:6; 1 Kgs 3:7; 15:17 = 2 Chron 16:1; 2 Kgs 11:8 = 2 Chron 23:7; 2 Kgs 19:27 = Isa 37:28; Psa 121:8; 2 Chron 15:5; cf. Akk. *erēbu* and *ašû*, *CAD* E:263; *HAL* 109b with bibliog.).

In addition to the spatial, the temporal usage of “to come” also occurs quite often, not only with temporal expressions (e.g., → *yôm* “day,” in the prophetic introductory formula *hinnēh yāmîm bāʾîm* “behold, days are coming” in 1 Sam 2:31; 2 Kgs 20:17 = Isa 39:6; Jer 7:32; 9:24; 16:14; 19:6; 23:5, 7; 30:3; 31:27, 31, 38 Q; 33:14; 48:12; 49:2; 51:47, 52; Amos 4:2; 8:11; 9:13), but also with reference to announced events, which “arrive, come to pass” (cf. Deut 13:3; 18:22; 28:2, 15, 45; 30:1; Josh 21:45; 23:14f.; Judg 9:57; 13:12, 17; 1 Sam 9:6; 10:7, 9; Isa 5:19; 42:9; 48:3, 5; Jer 17:15; 28:9; Hab 2:3; Psa 105:19; Prov 26:2). *habbāʾôt* “the coming events” (Isa 41:22; cf. *hāʾôtîyôt*, Isa 41:23; 44:7, from *ʾth* “to come”) is substantivized.

The Aramaizing equivalent *ʾth qal* “to come” (19x) and the hi. “to bring” (2x) occur occasionally in poetical texts as synonyms for *bôʿ*, with concentrations in Deutero-Isa and Job. On Isa 21:12, see C. Rabin, FS Rinaldi 303–9.

Aram. *ʾth* “to come” occurs in the pe. 7x, in the ha. 7x in the meaning “to bring” and 2x in the meaning “to be brought.”

4. (a) Approximately 40 passages mention a “coming” of God quite distinctly (cf. G. Pidoux, *Le Dieu qui vient* [1947]; F. Schnutenhaus, “Das Kommen und Erscheinen Gottes im AT,” *ZAW* 76 [1964]: 1–22; E. Jenni, FS Eichrodt 251–61). One may best differentiate the coming of God in revelation in the old narratives, the coming conditioned by the cult or temple, and the hymnic or prophetic-eschatological descriptions of theophany.

Passages in the old narratives form a group in themselves. They describe not only the more modest coming of God’s messenger (Judg 6:11; 13:6, 8–10; cf. Josh 5:14), but also of God himself, if even, as in E, only in a dream by night (Gen 20:3 to Abimelek; 31:24 to Laban; Num 22:9, 20 to Balaam; similarly in the story of Samuel’s youth, 1 Sam 3:10) or in a rather indefinite usage in Exod 20:20 (“to come to test you”; cf. Deut 4:34, where *bôʿ* also serves only as the basis for the following verb), or, as in J, in the

cloud (Exod 19:9, J according to W. Beyerlin, *Origin and History of the Oldest Sinaitic Traditions* [1965], 10; according to Noth, *History of Pentateuchal Traditions* [1972], 31n.112, this is an addition in Dtr style).

The second group is very disparate: the altar law in Exod 20:24 (“to come to you and bless you”) presupposes the drawing near of God to a cultic act. In the Philistines’ thinking, God came into the camp with the ark (1 Sam 4:7). A cultically conditioned coming or entry of God is also probable in Psa 24:7, 9 in the context of the procession of the ark. Finally, God also returns to the new temple according to Ezek 43:2, 4; 44:2.

Depictions of epiphany or theophany, in which *bôʾ* occurs often, although not as a key term (cf. → *ysʾ*, → *yrd*, → *yp<sup>c</sup>* hi.), form the most important group theologically (Westermann, *PLP* 93–101; J. Jeremias, *Theophanie* [1965]). According to Jeremias (op. cit. 136–46), the broadly varied genre of the theophany portrayal is independent of extrabiblical motifs (contra Schnutenhaus, op. cit. 4, 6) in its initial element, the depiction of Yahweh’s arrival from his dwelling place (Deut 33:2 from Sinai; cf. Psa 68:18b txt em; Hab 3:3 from Teman); it has its original setting in the victory celebrations of the Israelite summons to arms, which celebrated the arrival of Yahweh to aid his people in the Yahweh war. From there the motif also spread widely beyond the hymnic sphere into the prophetic announcements of judgment and salvation, which could no longer announce Yahweh’s coming only from Sinai, but, reflecting the prevalent notion of the dwelling place of Yahweh, also from Zion (Psa 50:3; cf. v 2), from afar (Isa 30:27, the name of Yahweh), even from the north (Ezek 1:4; cf. Zimmerli, *Ezek*, Herm, 1:119f.; cf. also Job 37:22 txt em, *ʾth* of the glory of God), or without reference to place of origin (Isa 40:10; 59:19f.; 66:15; Zech 14:5, cf. 2:14; Mal 3:1f., 24; cf. also Isa 19:1, Yahweh comes to Egypt). Psa 96:13 = 1 Chron 16:33; Psa 98:9 associate theophany, present only in overtones, with the motif of coming in judgment. These passages all share the fact that in them *bôʾ* testifies to the God who intervenes in history.

Isa 3:14 (*bôʾb<sup>e</sup>mišpāt ʿim*, “to enter judgment with”; cf. Psa 143:2; Job 9:32; 22:4; H. J. Boecker, *Redeformen des Rechtslebens im AT* [1964], 85) and Isa 50:2 (“why have I come and no one is here?”; cf. Isa 41:28) do not concern coming in the full sense of theophany, but involve *bôʾ* in a fixed legal expression; cf. *ʾth* in Dan 7:22.

In Hos 6:3, “he will come to us like the rain,” the verb is governed by the comparison. In Hos 10:12 *bôʾ* functions only as an auxiliary verb introducing the subsequent action, as is the case in Zech 2:14 (cf. above on Exod 20:20; Deut 4:34).

(b) The verb *bôʾ* plays a distinct role, moreover, in the messianic prophecy in Zech 9:9, “behold, your king comes to you”; Gen 49:10 (“until

the *šlōh* comes [?]“) and Ezek 21:32 (“until he comes to whom the claim/judgment belongs”) remain difficult and disputed. Cf. also Dan 7:13, the coming (*ʾth*) of the “man” in the clouds of heaven.

→ *qēš* “end” (Amos 8:2; Ezek 7:2–6 is probably dependent; cf. Gen 6:13; Lam 4:18), → *yôm yhw̄h* “the day of Yahweh,” and similar expressions (Isa 13:6, 9, 22; cf. 63:4; Jer 50:27, 31; cf. 51:33; Ezek 7:10, 12; cf. vv 25f.; 21:30, 34; 22:3f.; Joel 1:15; 2:1; 3:4; Zeph 2:2; Zech 14:1; Mal 3:19, 23) are chief among the coming eschatological realities (e.g., fall, Isa 30:13; vengeance and recompense, Isa 35:4; sword, Ezek 33:3f., 6; days of vengeance and revenge, Hos 9:7; affliction, Mic 7:4; but also positively, light and salvation, Isa 56:1; 60:1; 62:11; the former dominion, Mic 4:8; with *ʾth*: Cyrus, Isa 41:25).

5. Of the very numerous translation options for *bôʾ* in the LXX, the most frequent are *erchesthai*, *eiserchesthai*, and *ēkein*. On *bôʾ* in the context of the messianic expectation at Qumran (1QS 9:11; CD 19:10f.), see A. S. van der Woude, *Die messianischen Vorstellungen der Gemeinde von Qumran* (1957), 58, 76f. On the coming of God (Acts 1:4, 8; 4:8), Christ, and the kingdom in the NT, cf. J. Schneider, “ἔρχομαι,” *TDNT* 2:666–84; id., “ἦκω,” *TDNT* 2:926–28; K. G. Kuhn, “μαρναναθά,” *TDNT* 4:466–72; A. Oepke, “παρουσία,” *TDNT* 5:858–71.

## בּוֹשׁ *bôš* to be ashamed

S 954; BDB 101b; *HALOT* 1:116b; *TDOT* 2:50–60; *TWOT* 222; *NIDOTTE* 1017

1. The verb *bôš*, formed on the biradical base \**bṭ* with a long vowel (*ā* > *ō*), occurs primarily in ESem. and NWSem., in Aram., with a trilateral resolution of the hollow root to *bḥt*; cf. the infrequent Arab. *bḥt* (Th. Nöldeke, *ZDMG* 40 [1886]: 157, 741).

One should distinguish *bôš* I from *bôš* II, used in the po. (Exod 32:1; Judg 5:28) in the meaning “to delay, hesitate” (N. H. Torczyner, *ZDMG* 70 [1916]: 557; cf. *HAL* 112f.; the meanings of Ug. *bš* and *bṭ* are disputed; cf. *WUS* nos. 597, 609f.; *UT* nos. 532, 544; Ezra 8:22 in the qal, cited as a possibility in *HAL* 113a, hardly belongs to *bôš* II).

That a double formation is possible in the hi. deserves mention as a grammatical peculiarity of *bôš* I: in addition to the normal *hēbîš*, the more frequent form *hōbîš* is to be

explained as confusion with *ybš* hi. (BL 402); see 3b.

The following are derivatives: *bōšet* and *būšâ* “shame,” *m<sup>c</sup>būšîm* “private parts”; *bošnâ* in Hos 10:6 appears to be a textual corruption (cf. Barth 346).

2. The verb occurs 129x (qal 95x, hi. 33x [*hēbîš* 11x, *hōbîš* 22x, incl. Isa 30:5 Q; Joel 1:12a, under *ybš* in Lis.], hitpo. 1x). It is absent from the Pentateuch except for Gen 2:25 (hitpo.), very rare in prose, little used in wisdom texts (Prov 6x hi.), and frequent in the Prophets (esp. Jer, 36x) and in Psa (34x).

The MT of Hos 13:15; Psa 25:3b (*BHS*) is not applicable; on Isa 30:5 Q/K, cf. comms.; Ezek 7:26 txt em (*BHS*) should be included.

Of the derivatives, *bōšet* occurs 30x, *būšâ* 4x, *bošnâ* (Hos 10:6) and *m<sup>c</sup>būšîm* (Deut 25:11) once each.

3. (a) The basic meaning in the qal is apparently “to be ashamed,” in two senses: first, objectively establishing the fact (“to come to nothing”), but at the same time, subjectively characterizing the feeling of the one come to nothing (“to feel ashamed”).

The expression *‘ad-bôš* (Judg 3:25; 2 Kgs 2:17; 8:11) is a stereotypical formula with the sense “(to the point of) embarrassment,” etc.; cf. similar formulations in Eng. (Torczyner, op. cit. assumes *bôš* II here).

The verb’s range of meaning becomes apparent in the par. expressions, sometimes with an objective and sometimes with a subjective character:

(1) *klm* ni., ho. “to be humiliated” (originally “to be injured”; cf. L. Kopf, *VT* 8 [1958]: 179), Isa 41:11; 45:16f.; Jer 14:3; 17:13 txt em (*BHS*); 22:22; 31:19; Ezek 36:32; Psa 35:4; 69:7; Ezra 9:6; more remotely, Isa 54:4;

(2) *hpr* “to feel shame,” Isa 1:29; 24:23; 54:4 (hi.); Jer 15:9; 50:12; Mic 3:7; Psa 35:26; 40:15; 71:24; more remotely, Psa 35:4; 83:18;

(3) *htt* “to be shattered, dismayed,” 2 Kgs 19:26 = Isa 37:27; Isa 20:5; Jer 17:18 (ni.);

(4) *hwr* “to turn pale,” Isa 19:9 txt em (*BHS*); 29:22;

(5) *sûg* ni. “to withdraw,” Isa 42:17; Psa 35:4; 40:15; 129:5;

(6) *bhl* ni. “to be terrified,” Psa 6:11; 83:18.

*phd* “to terrify” (Isa 44:11), *šdd* pu. or qal pass. “be destroyed” (Jer 9:18), *ʔumlal* “to wither, mourn” (Jer 15:9), *ʔbd* “to perish” (Psa 83:18), *kšl* “to stumble” (Jer 20:11) occur once each; cf. also expressions of mourning such as *hph rōš* “to cover the head” (Jer 14:3) and *nph nepeš* “to exhale life” (Jer 15:9).

The subjective or objective aspect may be isolated only in a few cases, e.g., in the diction of the individual lament, the language is of shame, remorse (Jer 31:19; 51:51; otherwise Job 19:3), or, by contrast, the enemy’s ruin (Psa 6:11; 31:18, etc.; see 4). *šmh* “to be happy” (Isa 65:13; Psa 109:28; cf. Isa 66:5) appears as the antonym of the subjective aspect.

(b) The regular hi. has the causative meaning “to cause to be ashamed” (Psa 44:8; 119:31, 116; 14:6 and 53:6 txt?; Prov 29:15, in each case with obj.); the ptcp. occurs without obj. in Prov 10:5; 12:4; 14:35; 17:2; 19:26 as a characterization of the unwise fool, primarily in contrast to the wise (*maškil*, Prov 10:5; 14:35; 17:2; *ʔešet hayil* “worthy wife” Prov 12:4; cf. the par. expression *maḥpîr* “disgraceful” Prov 19:26).

The second form, constructed on the analogy of the initial *waw/yod* verbs, almost exclusively has an inner-transitive meaning and thus approaches the qal (in Joel 1:10, 12a the distinction from *ybs* “to wither” is difficult), although a causative meaning also occurs rarely: “to shame” 2 Sam 19:6; cf. “to treat disgracefully” Hos 2:7.

(c) The hitpo., perhaps originally used by J in Gen 2:25, moves entirely in the personal-subjective realm (“to be ashamed before one another”).

(d) Like the verb, the derivatives embrace both aspects, from disgrace, worthless(ness), to shame (Deut 25:11 *m<sup>e</sup>bûšîm*, specialized in the meaning “private parts”). Parallel terms are *kelimma*® “humiliation” (Isa 30:3; 61:7; Jer 3:25; Psa 35:26; 44:16; 69:20; 109:29) and *ḥerpâ* “disgrace” (Isa 30:5; 54:4; Psa 69:20). The expression *bōšet pānîm* (Jer 7:19; Psa 44:16; Dan 9:7f.; Ezra 9:7; 2 Chron 32:21), lit. “shame of the face,” perhaps “blush,” is common. *bōšet* is used synonymously with the divine name *baʕal* in Jer 3:24; 11:13; Hos 9:10, as well as in the PNs *ʔis bōšet* (2 Sam 2:8), *y<sup>e</sup>rubbešet* (11:21), *m<sup>e</sup>pîbōšet* (21:8), perhaps also in the Lachish Letter 6:6 for Bel-Marduk (H. Michaud, *Sur la pierre et l’argile* [1958], 101; cf. HAL 158b).

The vocalization of the divine name *melek* as *mōlek* may be explained from this perspective; such has been the common opinion since A. Geiger, *Urschrift und Übersetzungen der Bibel* (1857); contra O. Eissfeldt, *Molk als Opferbegriff im Punischen und das Ende des Gottes Moloch* (1935).

4. The subjective aspect plays a minor role in the religious usage of the word, mostly in the plaintiff’s description of his/her remorseful attitude.

The objective aspect is esp. significant, first in the lament of the enemy (Psa 6:11; 35:4, 26; 40:15; 70:3; 71:13, 24; linguistically dependent, Jer 17:13, 18; Isa 26:11): The plaintiff prays for the annihilation of the enemy, but also for his/her own protection from destruction. This prayer is usually associated with the motif of trust (Psa 22:6; 25:2f., 20; 31:2, 18; 69:7; 71:1). The supplicant, then, lays claim to God's help and protection from destruction; because the enemy cannot expect this aid, he/she is abandoned to annihilation.

The prophets borrowed the verb from the cult; in prophecy it has its place in proclamations of judgment (Isa 1:29; 19:9; 41:11; 65:13; 66:5; Jer 15:9; 20:11; Ezek 16:63; 32:30; 36:32; etc.) directed either at foreign nations or at Israel, but also in promises of salvation for Israel (annihilation of the enemy; esp. since Deutero-Isa, Isa 45:17, 24; 49:23; 54:4; etc.). The concept formulated in the Psa is consistently maintained here too: that which contradicts Yahweh's will must come to naught.

Thus one can finally understand why *ba'al* is called "*bōšet*" and *melek* is vocalized on the same model: These gods are the power deeply hostile to Yahweh, revealed in Yahweh's presence as pernicious nothingness; cf. the designation *bēlyā'al*, which apparently means something similar ("worthless," "negative principle," etc.; cf. V. Maag, "*Bēlyā'al* im AT," TZ 21 [1965]: 287–99).

5. The NT continues to employ the OT usage, borrowed from the LXX, to a degree; cf. R. Bultmann, "ἀισχύνω," TDNT 1:189–91.

F. Stolz

## בָּחַן *bḥn* to test

S 974; BDB 103b; HALOT 1:119a; TDOT 2:69–72; TWOT 230; NIDOTTE 1043

1. *bḥn* "to test" is also represented outside Hebr. in Aram. (although sparsely).

On account of the proximity of meaning, an original connection with Arab. *mḥn* is postulated, as well as with the root → *bḥr* "to choose," Aram. also "to test" (older literature in GB 92a). Yet in the OT, *bḥn* "to test" and *bḥr* "to choose" are distinct (the meaning "to test" for *bḥr* in Isa 48:10; Job 34:4, 33; ni. Prov 10:20 is to be viewed as a borrowing from the Aram.; see Wagner no. 38; id., FS Baumgartner 358f.).

The two citations in DISO 33 for Imp. Aram. *bḥn* "to test" on an ostrakon from

Elephantine and in Aḥ. 203 are rather uncertain; Syr. *bḥn* pa. means “to test, dispute.” *bḥr* is apparently not attested in Old Aram.

The verb occurs in the qal and ni. The nomen agentis *bāḥôn* “examiner” occurs as a subst.

L. Köhler (TZ 3 [1947]: 390–93) identifies the *bōḥan* stone in Isa 28:16 as an Eg. loanword for a type of rock (“paragneiss”); the traditional translation “proven stone” or “proving stone” assumes derivation from *bḥn* “to test” (cf. HAL 115a).

The word *bōḥan* in Ezek 21:18 stands in an entirely uncertain text. *baḥûn* (Isa 23:13) and *baḥan* (Isa 32:14) in the meaning “watchtower” or some such (Eg. loanword; see HAL 114a, 115a) do not belong to the root.

2. *bḥn* qal occurs 25x (Psa 9x, Jer 6x, Job 4x, also in Zech 13:9[bis]; Mal 3:10, 15; Prov 17:3; 1 Chron 29:17), ni. 3x (Gen 42:15f.; Job 34:36), *bāḥôn* 1x (Jer 6:27a, with *bḥn* qal in 6:27b).

3. (a) One may not prove that *bḥn*, like *šrp* “to smelt, purify,” which acquires the fig., more general meaning “to sort (people)” and “to examine (liver and heart)” (e.g., Judg 7:4; Psa 26:2), had a technical meaning that gave rise to the metaphorical meaning “to test” (HAL 114b), even though the word occurs once with the obj. “gold” (Zech 13:9, par. *šrp* with the obj. “silver”) and the process of the purification of fine metals is readily used as a metaphor for “to purify, test” in the personal arena (*šrp* par. to *bḥn* in Jer 6:27–30; 9:6; Zech 13:9; Psa 17:3; 26:2; 66:10; cf. Prov 17:3; also perhaps Isa 48:10 *šrp* par. *bḥr* “to test”; other verbs in Mal 3:3; Dan 12:10).

Other par. verbs and usages of *bḥn* point to a rather general meaning “to test = to investigate (critically).”

*bḥn* appears alongside → *yd<sup>c</sup>* “to know, recognize” (Jer 6:27; 12:3; Psa 139:23), → *pqd* “to investigate” (Psa 17:3; Job 7:18), → *r<sup>h</sup>* “to see (inspect)” (Jer 12:3; 20:12; cf. Psa 139:24; cf. Akk. *amāru* and *barû* “to see” and “to test,” AHW 40f.), → *ḥzh* “to see” (Psa 11:4), *ṭ<sup>m</sup>* “to taste” (Job 12:11; 34:3), → *špt* “to judge” (Jer 11:20), and → *nsh* pi. “to try” (Psa 26:2; 95:9).

The objs. of testing always belong, with the exception of Zech 13:9 (gold), to the personal realm.

People (12x), their way (Jer 6:27), their words (Job 12:11; 34:3; Gen 42:16, ni.), their heart (Jer 12:3; Psa 17:3; Prov 17:3; 1 Chron 29:17; cf. also Sir 2:5; Wis 3:6; 1 Pet 1:7; → *lēb*), or liver and heart (Jer 11:20; cf. 17:10; Psa 7:10; Jer 20:12 and Psa 26:2). Concerning Yahweh as obj. (Mal 3:10, 15; Psa 81:8 txt em; 95:9), see 4.

(b) Besides the verbs already mentioned (→ *yd<sup>c</sup>*, → *nsh*, → *pqd*), a

few other, less frequent terms with various connotations must be considered as semantically related verbs:

(1) *ʕzn* pi. “to weigh out” (Eccl 12:9; cf. G. Rinaldi, *Bib* 40 [1959]: 268f.) is a denominative from *mōʕʕnāyim* “scales”;

(2) *bûr* (Eccl 9:1 txt?) and *brr* (Eccl 3:18; pi. Dan 11:35; hitp. Dan 12:10; hi. Jer 4:11) mean “to sort, test,” proceeding from the concrete notion of cleansing, sorting, purifying (Ezek 20:38 qal; Isa 52:11 ni.);

(3) on *bhr* “to test” see 1 (in Isa 48:10 1QIsaa has *bhn*);

(4) the pi. ptcp. *mʕbaššēr* “gold tester” has been suggested for *mibšār* in Jer 6:27 (*HAL* 142b) as a derivative of *bešer* “gold ore” (Job 22:24f.; cf. F. Rundgren, *Or* 32 [1963]: 178–83);

(5) *bqr* pi. “to examine, care for, have in mind” (Lev 13:36; 27:33; Ezek 34:11f.; Prov 20:25) could go back to a cultic technical term (2 Kgs 16:15; Psa 27:4; cf. *HAL* 144b with bibliog.; Kraus, *Psa*, CC, 1:334);

(6) *hqr* “to investigate, explore” (qal 22x) can also be translated “to test” in some cases (e.g., Job 29:16 of the examination of a legal case; *hqr* with Yahweh/God as subj.: Jer 17:10; Psa 44:22; 139:1, 23; Job 13:9; 28:27);

(7) on *šrp* see 3a;

(8) *šbr* qal means “to test (walls)” in Neh 2:13, 15; otherwise pi. “to hope, wait” (Wagner no. 292; cf. Lat. *spectare* and *expectare*);

(9) *tkn* “to test” (Yahweh tests the spirits/hearts/deeds: Prov 16:2; 21:2; 24:12; ni. 1 Sam 2:3) connotes that which is fixed or ordered in other occurrences of the root.

4. (a) More often than people (Jer 6:27; Zech 13:9, in a comparison; Mal 3:10, 15; Psa 95:9; the ear: Job 12:11 and 34:3; cf. Gen 42:15, 16 ni.; through emendation, also in Jer 9:6; cf. Rudolph, *HAT* 12, 66, and Psa 81:8; cf. Kraus, *Psa*, CC, 2:146), Yahweh is the subj. of the testing (all other passages, Psa 11:4, his eyes [not: “eyelashes”; cf. *UHP* 67]), in Jer 6:27 and 9:6 through the agency of his prophet. The nation is infrequently the obj. of Yahweh’s testing; as a rule it is the individual or people in general.

Jer 6:27; 9:6; Zech 13:9; Psa 66:10 (cf. also Isa 48:10) use the image of the testing and purification of fine metal in the context of Yahweh’s history with his people. Part of Jeremiah’s prophetic office involves his commission as examiner of the people (6:27); he is to lament over the negative result (6:27–30; 9:6). In the other cases of salvation manifest through judgment (Zech 13:9, the purification of the remaining one-third; Psa 66:10,

communal thanksgiving song), the “testing” takes on the sense of a purificatory judgment.

Most cases envision Yahweh’s relationship to the individual. In the language of the Psa, also adopted in the confessions of Jer, as well as in wisdom literature, one knows God as the righteous judge who tests heart and liver (Jer 11:20; 12:3; 17:10; 20:12; Psa 7:10; 17:3; 26:2; Prov 17:3; 1 Chron 29:17) and who calls the individual to account (Psa 11:4f.; 139:23; Job 7:18; 23:10). In Job 34:36, Elihu’s thought escalates to the level of trial by suffering (cf. Fohrer, KAT 16, 469).

5. The LXX most often uses *dokimazein* to translate *bḥn*. On the Qumran literature and the NT (OT quotations in 1 Thess 2:4; Acts 2:23), cf. Kuhn, *Konk.* 30f. (also *GCDS* 65) and W. Grundmann, “δόκιμος,” *TDNT* 2:255–60; G. Delling, “ἐρευνᾶω,” *TDNT* 2:655–57.

E. Jenni

## בחר *bḥr* to choose

S 977; BDB 103b; *HALOT* 1:119b; *TDOT* 2:73–87; *TWOT* 231; *NIDOTTE* 1047

I. 1. (a) The root \**bḥr* is represented irregularly in the Sem. languages. It occurs in a meaning similar to Hebr. primarily in Akk. and in later Aram. (also in Amor. and Old SArab. in PNs), but is absent (to date) in the NWSem. texts of the OT period. The basic meaning may be preserved most truly in Bedouin Arab.: “to fix one’s eyes intently upon” (*HAL* 115a).

Classical Arab. has a *bḥr* V “to penetrate deeply; to study thoroughly” (Wehr 42). J. G. Wetzstein has documented the verb in the meaning “to look around, look up (on the hunt)” or “to look (in a tent)” among the bedouin of the Syrian wilderness in the Damascus area (*ZDMG* 22 [1868]: 75, l. 9, cf. 122; 83, l. 9, cf. 148). Old SArab. seems to know only the theophoric name *ybḥrʾl* (G. Ryckmans, *Les noms propres sud-sémitiques* [1934], 1:221).

Akk. uses the verb *b̄ru*, which, according to the law of sound changes, corresponds to *bḥr*, in the meaning “to choose” (objs.: men, messengers, fighters, etc., but also things, wares) and, less certainly, “to test” (cf. *AHw* 122f. with *CAD* B:212f.), in addition to the verbal adj. *bēru* “chosen, picked,” at Mari also substantivized *beʾrum* (so *AHw* 122b and *CAD* B:211 instead of the older reading *beḥrum*, e.g., in ARM XV:193; cf. *GAG* §23e, f) in the meaning “elite troop” (cf. M. Noth, *Die Ursprünge des alten Israel im Lichte neuer Quellen* [1961], 35; D. O. Edzard, *ZA* 56 [1964]: 144; M. Wagner, FS Baumgartner 358f.). *beḥēru* “to choose, select (troops)” and *biḥirtu*

“selection (of soldiers)” occur as Aram. loanwords in Late Bab. (AHw 117f, 125b; CAD B:186a, 223b).

The root occurs in Amor. PNs (*yabḥarum, bataḥrum, biḥirum, biḥira*, etc.; cf. Huffmon 175).

The root cannot be identified in Old and Bibl. Aram. The later Aram. dialects (Jewish Aram., Christ. Pal., Syr., Mand.) use the verb in both meanings “to test” and “to choose” (Wagner no. 38).

(b) In a few passages in the OT *bḥr* also means “to test” (Isa 48:10; Job 34:4, 33; cf. Sir 4:17; ni. ptcp. “tested” in Prov 10:20; perhaps also pu. “to be tested” in Job 36:21 txt em; cf. Hölscher, HAT 17, 84f.; HAL 115b). “To test” is otherwise → *bḥn* in Hebr. (so also in Isa 48:10 according to 1QIsaa *bḥntykh*). Aram. influence is possible for both Job passages. The similarity in form and meaning suggests the likelihood that a relationship exists between the roots *bḥr* and *bḥn* (cf. the bibliog. in Wagner no. 38); the variant *bḥr* has established itself almost completely in the meaning “to select, choose,” and *bḥn* in the meaning “to test, put to the test.”

(c) M. Dahood (*Bib* 43 [1962]: 361) postulates an additional root *bḥr* “to assemble” for 1 Sam 20:30 (where *bōḥēr* is usually emended to *ḥābēr*) and Eccl 9:4 (where Q *y<sup>h</sup>ubbar* is read instead of K *y<sup>c</sup>ubḥar*) on the basis of Akk. *paḥāru* “to assemble,” Ug. *pḥr* and *mpḥrt*, Phoen. *mpḥrt* “assembly.” This suggestion may deserve consideration (cf. also HAL 115b); otherwise, the emendations cited are to be accepted, so that both passages become irrelevant for *bḥr* “to select.”

2. (a) The verb *bḥr* occurs in the qal and the ni. (on the possible pu. in Job 36:21 see 1b; on Eccl 9:4 K see 1c). The pass. ptcp. *bāḥûr* “selected,” replaced in religious language by the substantivized adj. *bāḥûr* “chosen,” belongs to the qal. Other substantives (in the profane arena) are *mibḥôr* (2 Kgs 3:19; 19:23) and *mibḥār* “choice, best.”

(b) In analogy to Akk. *beḫrum* “elite (troop),” Hebr. *bāḥûr* “(fully grown, strong) young man” (Mid. Hebr. also *b<sup>c</sup>ḥûrâ* “maiden”), pl. *baḥûrîm* (GB 91a: “young warriors,” Isa 9:16; 31:8; Jer 18:21; Amos 4:10; Lam 1:15; etc.) should not be treated apart from the verb *bḥr* (Noth, op. cit. 35; contra HAL 114a, 115a). It contrasts with *zāqēn* “old” (Jer 31:13, etc.) and parallels *b<sup>c</sup>tûlâ* “virgin” (Deut 32:25, etc.); it is used in the military sense in 2 Kgs 8:12; Isa 31:8; Jer 18:21; 48:15; 49:26 = 50:30; Ezek 30:17; Amos 4:10; Psa 78:31; 2 Chron 36:17; cf. also Ezek 23:6, 12, 23. The two abstract pls. *b<sup>c</sup>ḥûrîm* (Num 11:28) and *b<sup>c</sup>ḥûrôt* (Eccl 11:9; 12:1), which mean the “age of the young man” and the “bloom of life,” resp., belong to this *bāḥûr*.

Akk. *baḫūlāti* “warriors, troops,” which has been seen as evidence for a separate root *bḫr* since J. Barth, *ZA* 3 (1888): 59; and H. Holma, *Die Namen der Körperteile im Assyrisch-babylonischen* (1911), 100n.4 (e.g., P. Joüon, *Bib* 6 [1925]: 314f.; Zorell 103a; KBL 117b), is, according to *AHw* 96b, 117b, only artificially differentiated from *baḫūlātu* “subordinates” for Sargon and Sennacherib; this word belongs, however, to *bīu* (→ *ba<sup>c</sup>al*). G. Quell’s reference (*TDNT* 4:146n.5) to the Mid. Hebr. *bḫl* pi. “to ripen” is also unproductive (cf. Dalman 51b; *HAL* 114b).

(c) *mibḫār* (probably “selected”; cf. *IP* 224) and *yibḫār* (contra KBL 359a, probably a wish name in hypocoristic abbreviation like Amor. *yabḫarum*; cf. *IP* 209) occur as PNs in 1 Chron 11:38 and 2 Sam 5:15; 1 Chron 3:6; 14:5, resp. Here it is testimony to the individual’s belief in election. That it does not occur more frequently and that PNs containing Yahweh are altogether absent (cf., in contrast, Amor. *yabḫar-d* IM and Old SArab. *ybḫrʾl*) should be considered evidence that in Israel “election” relates primarily to the relationship between God and people (see IV).

*baḫūrîm* (2 Sam 3:16, etc.; on the location see *BHH* 1:191f.; 2:1342; in addition to *baḫūrîmî*, which is conjecturally a gentilic in 2 Sam 23:31 and 1 Chron 11:33) is possibly so named because young people were accustomed to gathering there.

II. 1. *bḫr* qal occurs in the MT 146x. The following table distinguishes between a profane usage (Pr) and a theological usage with God (TG) or with people (TP) as subj. The following distribution results:

	Pr	TG	TP	total		
Gen 2	–	–	–	2		
Exod 2	–	–	–	2		
Num –	–	3	–	3		
Deut 1	–	29	1	31		
Josh 1	–	1	2	4		
Judg –	–	–	2	2		
1 Sam	–	5	5	–	10	
2 Sam	–	5	2	–	7	
1 Kgs2	–	10	–	–	12	
2 Kgs–	–	2	–	–	2	
Isa 1–39	–	2	1	–	4	
Isa 40–55	–	1	7	–	9	
Isa 56–66	–	–	3	–	4	7
Jer –	–	1	–	–	1	
Ezek –	–	1	–	–	1	
Hag –	–	1	–	–	1	

Zech	–	3	–	3	
Psa	1	9	3	13	
Job	7	–	–	7	
Prov	–	–	2	2	
Neh	–	2	–	2	
1 Chron		2	7	–	9
2 Chron		1	11	–	12
OT	32	98	16	146	
	(22%)		(67%)		(11%)

Contrary to Lis. 208c, Jer 8:3 should be parsed as ni. The passages 1 Sam 20:30 (see I/1c); Psa 84:11; and 2 Chron 34:6 K are excluded from the profane category through textual emendation; Isa 48:10 (see I/1b) should probably be excluded from the TG category. *bḥr* is conjectured in Psa 16:4 and Job 23:13. The verb also occurs in Sir 4:17 in the meaning “to test.”

The table suggests that: (a) The theological usage predominates markedly, esp. the usage with God as subject (b) The profane usage already occurs in the old portions of the OT (already in J); the oldest passage, albeit textually uncertain, may be Judg 5:8. The theological usage is later (not yet attested in J and E), and seems therefore to have arisen and prevailed only in the course of Israel’s history. (c) The theological usage with people as subj. occurs relatively seldom; it is certain, however, that Israel’s or individual Israelites’ choice of God (or proper behavior) can be discussed. (d) The distribution, esp. of the theological usage with God as subj., is very irregular; thus it had not become dominant in all circles of Israelite piety. The concentration lies in Deut (29x) and in the Dtr history (20x).

The qal pass. ptcp. *bāḥûr* (19x, not included in the table: 2 Chron 5x; Judg 3x; 1 Sam, 2 Sam, and Jer 2x each; Exod, 1 Kgs, Psa, Song Sol, and 1 Chron, 1x each), the ni. (7x: Prov 6x, and Jer 8:3; cf. also Sir 37:28 and 41:16), and the pu. (1x; see I/1c) are not used in the profane meaning.

2. Among the substantives, *bāḥûr* always refers to the chosen of God (Psa 106:23, Moses; 2 Sam 21:6 txt?, Saul; Psa 89:4, David; Isa 42:1, the servant of God; Isa 43:20 and 45:4, the people; Isa 65:9, 15, 22; Psa 105:6 = 1 Chron 16:13; Psa 105:43; 106:5, the pious individual; cf. also Sir 46:1 and perhaps 49:19 = 50:44 emending *bāḥûr*; 13x in a noteworthy distribution: Psa 5x, Deutero-Isa and Trito-Isa 3x each, 2 Sam and 1 Chron 1x each).

*mibḥār* and *mibḥôr* occur 12x and 2x, resp., *baḥûr* “young man” 44x (36x are pl.; Jer 11x, Isa, Ezek, and Lam 5x each; Amos and Psa 3x each; Isa 42:22 is to be stricken from Lis. 207a), *b<sup>e</sup>ḥûrîm/b<sup>e</sup>ḥûrôt* 1x and 2x, resp.

III. 1. Aside from the few passages in which the translation “to test” is likely (see I/1b), *bḥr* in the profane usage means “to choose” or “to select.” Thus the historical texts speak frequently of the selection of warriors (cf. Exod 17:9; Josh 8:3; 1 Sam 13:2; 2 Sam 10:9 Q “selection from all the choice ones [*bḥûrê*] of Israel”; 17:1; cf. also *mibḥār* in Exod 15:4; Jer 48:15 *mibḥar baḥûrāyw* “his chosen band of young men”). The people choose their king (1 Sam 8:18; 12:13); the priest selects the sacrificial animal (1 Kgs 18:23, 25). But the commoner, too, is repeatedly confronted with a choice in daily life: Gen 13:11; Deut 23:17; 1 Sam 17:40, etc. The meaning of *mibḥār/mibḥôr* “choice, the best” reflects this situation; cf. e.g., Gen 23:6; Deut 12:11; Isa 22:7; Jer 22:7.

2. (a) The choice that one makes can be related strictly to an obj.: one chooses the fittest, the most appropriate, the best, and the most beautiful. Because the basic meaning may be “to regard precisely” and the verb can also mean “to test,” this value orientation is surely a primary element. The subj. itself is involved, in fact, because it evaluates, but this evaluation arises from a rational consideration. Typical of this aspect are the par. terms → *ḥzh* “to discern” (Exod 18:21 in comparison to v 25), → *ydc* “to recognize, understand” (Job 34:4; cf. Amos 3:2; Jer 1:5), → *bîn* hi. “to recognize” (Job 34:4 txt em).

(b) The subj.-conditioned, volitional meaning should be distinguished from this obj.-oriented, cognitive meaning: one chooses what one would dearly like to have, what pleases one, what one loves. A strict distinction between the two aspects is impossible. But the second aspect manifests itself very clearly in the translators’ rendering of the word in such passages with “to elect” and not simply with “to choose, select,” occasionally even with “to choose for oneself,” expressing the subj.’s engagement, as well as with “to wish for” (2 Sam 19:39), “to want” (Gen 6:2), “to have greater desire” (Job 36:21), “to be pleased with” (Prov 1:29), “to prefer” (Job 7:15) and “to determine” (Job 29:25, all examples taken from ZB); cf. also *bḥr l<sup>c</sup>* in 2 Sam 24:12 with the corresponding *qbl* pi. *le* in 1 Chron 21:11. Par. terms that appear in this sense are → *ḥmd* “to desire” (Isa 1:29), → *šʔl* “to request” (1 Sam 12:13), → *bqš* pi. “to seek” (Isa 40:20), → *ʔwh* pi. “to wish for” (Psa 132:13; Job 23:13 txt em), → *ḥps* “to take pleasure” (Isa 56:4; 65:12; 66:3f.). In Hos 5:11 *yʔl* hi. “to want” appears where one would expect *bḥr*; one chooses for oneself not simply the good, but “what is good in one’s eyes” (cf. 2 Sam 19:39). Consistent with this connotation, the ni. ptcp. means “desired, precious” (Prov 8:10, 19; 10:20; cf. also 16:16; 21:3; 22:1). The “choice” transpires in these cases on the basis of a pleasure that is not rationally founded or, indeed, rationally demonstrable.

3. (a) In the profane usage in the OT, the subj. of the act of selection

is a prominent personality (the leader of the people, the king, the priest) or the people, collectively; in the wisdom sphere, however, it is the person, the individual.

(b) In wisdom, the obj. of choice shifts too. One is called to make the correct choice between the ways of good and evil (Prov 3:31; cf. also 1:29), between right and wrong (Job 36:21; cf. also Job 9:14; 15:5; 34:33). Here it is assumed, without reflection, that people can freely choose between good and evil, right and wrong. Moral decision is not always intended by the choice of the “good” (→ *tôb*). In 2 Sam 19:39, “what is good in your eyes” means the choice of that which pleases. Isa 7:15 may mean Immanuel’s capacity to comprehend the external world by the choice of the good and the rejection of the evil (cf. Wildberger, *Isa 1–12*, CC, 315).

4. *mʾs* “to reject” occurs as the primary antonym of *bḥr*, indeed, apparently for the entire range of its meaning (cf. e.g., 1 Sam 8:7, 18; Isa 7:15; Psa 78:67; Job 34:33).

IV. The word *bḥr* has become a technical term in the OT for “election” (most important studies: K. Galling, *Die Erwählungstraditionen Israels* [1928]; H. H. Rowley, *Biblical Doctrine of Election* [1950]; Th. C. Vriezen, *Die Erwählung Israels nach dem AT* [1953]; K. Koch, “Zur Geschichte der Erwählungsvorstellung in Israel,” *ZAW* 67 [1955]: 205–26; R. Martin-Achard, “La signification théologique de l’élection d’Israël,” *TZ* 16 [1960]: 333–41; H. Wildberger, *Jahwes Eigentumsvolk* [1960]; P. Altmann, *Erwählungstheologie und Universalismus im AT* [1964]; H. J. Zobel, “Ursprung und Verwurzelung des Erwählungsglaubens Israels,” *TLZ* 93 [1968]: 1–12; H. Wildberger, “Die Neuinterpretation des Erwählungsglaubens Israels in der Krise der Exilszeit,” *FS Eichrodt* 307–24; also G. Quell, *TDNT* 4:145–68 [bibliog.]; G. E. Mendenhall, *IDB* 2:76–82 [bibliog.]).

The focus of the theological usage of *bḥr* lies on the discussion of the election of the people by God (IV/2–4, pre-exilic, exilic, and post-exilic periods), while the human choice of God or of the right path fades in significance (IV/5). The concept of God’s election of the king is, however, older in Israel than that of the election of the people (IV/1).

1. (a) Among Israel’s neighbors the king was generally regarded as the one selected by the deity (cf. S. Morenz, “Die Erwählung zwischen Gott und König in Ägypten,” *FS Wedemeyer* 118–37; R. Labat, *Le caractère religieux de la royauté assyro-babylonienne* [1939], 40ff.).

On the Nile, as in the Mesopotamian region, the title “son” expresses the special, “select” status of the king with his god, although in varied theological conceptualizations (→ *bēn* IV/3a). In the 18th–20th Dynasties, the formula “Amun, who loves (the pharaoh) X more than all other kings” occurs (Morenz, op. cit.; further D. Müller, *ZÄS* 86 [1961]: 134; Quell, op. cit. 157n.64, 158n.68). Mesopotamians say that the deity knows the king

(Akk. *edû*, → *yd<sup>c</sup>*); he is the deity's favorite (Akk. *migru*; cf. Seux 162–68, 448f.), the deity commissions him, calls his name (Akk. *nabû*), etc. The Akk. (*w*)*atû(m)* (Sum. *p*), with the meaning “to see” and the nuances “to discern, choose, call,” as well as “to look around, seek,” often used to express the election of kings by gods (Seux 368f., 433–36; *ibid.* 121f. on *itûtu* “election, elect, called”), approximates Hebr. *bhr* most closely in terms of meaning and usage. The theme “election of the king” is also present when e.g., Zkr of Hamat acknowledges: “Be’elshamayn made me king” (Aram. *mlk ha.*; ANET 655b; KAI no. 202A.3). For details see H. Frankfort, *Kingship and the Gods* (1948), 238f.; de Vaux 1:100f.

(b) In view of the situation among Israel's neighbors, one should presume that Yahweh's election of the king was a theme from the very beginning of the Israelite monarchy. The question is only the degree to which the term *bhr* already described the king's special status before Yahweh within the royal ideology. Considering the presence of this usage already in David's succession narrative (2 Sam 16:18; cf. also 2 Sam 6:21; see A. Weiser, VT 16 [1966]: 344, 348), the use of *bhr* may go back as far as the Davidic period (cf. also the admittedly late texts 1 Sam 16:8–10). Even Saul may have already been characterized as Yahweh's chosen (cf. 1 Sam 10:24 and the uncertain text 2 Sam 21:6, which, contrary to most exegetes, should probably be retained), in each case in passages that use older traditions.

(c) Even though Israel shares with its neighbors the notion of the king's election, the unique character of its faith becomes apparent very soon here too. This development becomes evident already in that the Saul tradition addresses not only the election but also the rejection of the king (1 Sam 15:23, 26, admittedly, not in the same layer of tradition, but rejection presupposes election). This duality is all the more remarkable when texts occasionally attribute imperishability to “Yahweh's anointed” (1 Sam 24:7, 11; 26:9, 11, 16, 23; 2 Sam 1:21). The king's failure explains the rejection. Just as the question arises as to how one chosen by Yahweh can fail, it expresses the recognition that election by Yahweh must find response in the proper behavior of the elect. Without an awareness of the responsibility inherent in election, election itself is called into question. That northerners apparently hardly discussed the king's election is related to this insight. Even Deut 17:15 (if 17:14ff. is truly northern, as K. Galling, TLZ 76 [1951]: 133–38, assumes, and the statement on election is not to be regarded as secondary with R. P. Merendino, *Das deuteronomische Gesetz* [1969], 179ff.) constitutes less a witness to the notion of the king's election than to the fact that this theme has not been fully developed.

(d) The situation differs in the south. No one ever doubted David's election. Admittedly, 2 Sam 7 does not exhibit the root *bhr*, but the title *nāgîd* conferred upon David is semantically related to *bāhîr* (cf. W. Richter,

BZ 9 [1965]: 77). The focus of the Nathan promise is not the election of David, however, but of his “house.” Indeed, the royal psalms (which doubtlessly belong to the pre-exilic period) have recourse to David’s election, but primarily because it implies the election of the current ruler (Psa 78:67; 89:4, 20). It was not easy to maintain belief in the election of the Davidides in the face of the quite often unpleasant reality. Psa 89 is a moving document concerning the struggle about the validity of the election of the Davidic house. The author considers it necessary to conclude from the weakness of the Davidides that Yahweh has rejected (*mʿs*) his “anointed” and has abandoned his covenant with David (vv 39f.). But he cannot and will not believe that election may thus be void. He interprets election as a covenant sworn by Yahweh to David (vv 4, 35, 50; cf. also Psa 132:11), appeals to Yahweh’s faithfulness (vv 2f., etc.), and underscores the constancy, duration, even “eternity” of the relationship between Yahweh and king created by election (vv 5, 22, 29f., 37). Election cannot become invalid, even if rejection has become evident.

(e) The tribes apparently exalted Saul to king because of his brave deliverance of Jabesh (1 Sam 11). But the narrative in 1 Sam 10:17–24 has it otherwise: Saul is chosen by lot. He is a shy man who hides. As he is brought forth, it becomes apparent that he “towers over everyone by a head.” The parallel David narrative goes deeper: the criterion is not height—Yahweh rejects David’s tall brother—“Yahweh regards the heart” (1 Sam 16:7). David’s beauty is then, indeed, extolled (v 12). But what proves David as king is neither his physical features nor his spiritual qualities, but it is the Spirit of Yahweh (v 13) that is conferred upon him in the process of election. The qualities of the chosen are therefore not incongruent with those expected of a king; but precisely why one is chosen remains, finally, a contingent, divine secret, not to be revealed.

(f) These texts do not depict the purpose to which the king is chosen. But it is self-evident that Yahweh’s anointed is committed to a task among the people. David is “prince over Yahweh’s people” (2 Sam 6:21; cf. 7:8 and Psa 78:71). Nathan’s prophecy already used the term *ʿebed* to describe the king’s relationship to God (→ *ʿbd*, 2 Sam 7:5, etc.; Psa 78:70; 89:4, etc.; 132:10). Indeed, *ʿebed yhw* became a par. term for *bʿhîr yhw* (e.g., Psa 105:6). In this context the word means the “minister” or “vizier” ordained to execute his lord’s will among the people, indeed, among the peoples (cf. W. Zimmerli, *TDNT* 5:657f., 663f.).

2. (a) From a particular point of time onward, the OT discusses not only the king’s election but also the people’s election, embodying a novelty in the history of ancient Near Eastern religion. The idea of Israel’s special status before Yahweh is nothing short of constitutive for its faith. It is already expressed in the simple formula that Yahweh is Israel’s God. One does not speak of traditions of election without reason (K. Gallig, *Die Erwählungstraditionen Israels* [1928]; H. Wildberger, *Jahwes*

*Eigentumsvolk* [1960]; cf. Zobel, op. cit. 6ff.). The notion of Israel's election can be easily expressed, however, without the term *bhr*. OT research has almost reached a consensus that Israel's election was not explicitly discussed before Deut (von Rad, *Gottesvolk* 28: "The verb *bhr* [subj., God; obj., people] is an original Dtn coinage"; Vriezen, op. cit. 47; Mendenhall, *IDB* 2:76). This consensus is questionable, however, because the pertinent statements in Deut already exhibit a molded, stereotypical form. The Psalms provide additional indications. As mentioned above, Psa 78 speaks not only of David's election but also of Judah's (v 68), commenting that Yahweh rejected the tent of Joseph and did not choose the tribe of Ephraim. This psalm gives a clue as to the great distress that the fall of Israel (or an earlier crisis of this political entity) caused proponents of the election idea. Statements concerning election in Psa 33:12; 47:5; and 135:4, usually considered post-exilic, may indeed go back to formulations older than Deut.

(b) In Deut, then, the theologoumenon of Israel's election is present in a comprehensive theological formulation. In 17:15 the book also speaks, however, of the king's election (see IV/1c), and the stereotypical formula "the place that Yahweh your God will choose" occurs most frequently by far in Deut, notably only in the law code (Deut 12:5–26:2, 20x; cf. also 31:11; Josh 9:27; etc.; see 3a). Everything points, however, to the fact that the theory of Zion's election ("in order to cause my name to dwell there," etc.) made its way into Deut only in the context of the Jerusalemite redaction (see Merendino, op. cit. 382ff.). In contrast, Deut speaks of Israel's election primarily in the second preface (Deut 7:6f.; 10:15; in addition to 14:2 and 4:37). The notion of the king's election was, without doubt, also alive in the north. But presumably under the weight of the old exodus-election tradition, possibly also as a result of the experience of the monarchy's failure, the term *bhr* became the terminological expression of Yahweh's devotion to Israel. The concept was thus transferred in the process of this democratization from the realm of myth (election of the king or of the divine mountain) into that of history (exodus from Egypt). According to the evidence of Psa 78:68, people seem to have sincerely struggled, even in Jerusalem after the demise of the north, with the question of the status of the election of the people.

(c) The classical OT text for Israel's election is Deut 7:6–8. The passage is nestled in the parenthetic piece 7:1–11, which challenges Israel to separate itself from Canaan; i.e., election is not thematic, but serves as the motivation of the parenthesis. The continuation vv 9–11 uses the covenant tradition as a second motif. Israel's election is therefore not treated in isolation, but in order to justify Yahweh's claim on Israel. Indeed, the reference to the election in 10:12 establishes Yahweh's comprehensive

demand for obedience: to fear God, to walk in his paths, to love him, and to serve him with the whole heart and soul. The stereotypical formulation “chosen from the peoples” betrays the fact that the theological usage of *bḥr* in this area resulted from interchange with Canaan.

The meaning of election is explicated by association with the two terms *‘am qādôš* “holy people” and *‘am → segulla®* “special people,” apparently derived from the tradition. Thus the polyvalent term *‘am qādôš* is simultaneously defined: Israel is not holy because of a special cultic or moral integrity, but by virtue of the fact that it has become Yahweh’s own people through election. Because Israel’s holiness is accordingly not inherent but rests upon Yahweh’s choice, however, Israel must acknowledge its obligation to behave in conformity with this act of Yahweh’s free grace. The misunderstanding that Yahweh’s choice may rest upon Israel’s special merit is resisted vehemently in 7:7f. (probably secondary; cf. the “2d-per.-pl. style”): first, in v 7 through the explication of *bḥr* by *ḥšq* “to cling to, love,” in v 8 through the reference to Yahweh’s love for Israel (→ *ḥb* IV/2) and to his faithfulness to his promise to the fathers, but then also through the negation, “not because you were more numerous than the other nations.” Deut 9:4–6 extends the notion even more clearly: “not for the sake of your righteousness (*š<sup>c</sup>dāqâ*) and the purity (*yōšer*) of your heart”—indeed, even radicalizes it: “for you are a stubborn people.” Deut 10:14f. (also secondary) further underscore the irrationality of Yahweh’s attention to Israel expressed in election by presenting Yahweh as the lord of heaven and earth.

The contribution of the Deuteronomic author is carefully conceived theologically; because of him “election” prevailed as a terminological expression of Yahweh’s attention to Israel. He interpreted election as an absolute act of grace, grounded only in Yahweh’s love for Israel, which cannot be further explained. Finally, he described it as a dialectical process: it attests to Yahweh’s love and demands obedience in faithfulness on the part of God’s people. The community-founding word proceeds from Yahweh; it demands, however, an unmistakable answer from the addressee, Israel. With this understanding of the relationship between Yahweh and Israel, Deut stands in proximity to pre-exilic prophecy.

(d) In a peculiar disjunction, the election of Zion stands alongside that of the people (12:5, 11, 14, 18, 21, 26; 14:23–25; 15:20; 16:2, 6f., 11, 15f.; 17:8, 10; 18:6; 26:2; 31:11). The even more thoroughly formulaic nature of this material makes it clear that Deut has already incorporated preexistent viewpoints. Koch (op. cit. 215f.; contra Vriezen, op. cit. 46f.) has rightly called attention to this state of affairs. Psa 132, probably early pre-exilic, already speaks of the election of Zion as Yahweh’s dwelling place (v 13). Psa 78, from the late royal period, also knows of Yahweh’s election of Zion

(v 68 “which he loves”). One can even ask whether Jerusalem’s election was not already discussed in the Jebusite period. Mesopotamian sources also occasionally mention the election of a sanctuary by a divinity, although this election usually occurs only indirectly, insofar as the king is specifically chosen to build or care for the sanctuary (cf. H. Wildberger, FS Eichrodt 309n.9). But the election of one sanctuary in the exclusive sense of the Jerusalemite cultic centralization called for in Deut is unparalleled.

The election formula, “the place that Yahweh, your God, will choose,” can be expanded by “from all your tribes” or “in one of your tribes” (12:5, 14). These expansions reflect Jerusalem’s claim to be the central place of worship for all Israel. The formula can also be expanded by the expression “in order to place his name there” (12:5, 21) or “in order to cause his name to dwell there” (12:11; 16:2, 6, 11; cf. also 12:5). In contrast to the statement of Psa 132, which still speaks naively of Yahweh’s choice of the temple as his “dwelling place,” as a “lasting resting place,” these expressions signify a sublimation. “Name” means revealing presence (→ *šēm*).

Occasionally the formula “the place that Yahweh will choose” is, indeed, simply a circumlocution for the name Zion/Jerusalem (arising from the fiction that places Deut on Moses’ lips so that Jerusalem’s election may not already be anticipated as fact). In general, however, the formula signifies more. The place of Yahweh’s presence is the source of blessing, delight, life (e.g., Psa 36:8ff.). Yahweh’s choosing this place in the midst of the tribes testifies to his solidarity with Israel; Yahweh manifests himself thus as “your God.” But the contrast with Deut’s statements concerning Israel’s election is even more striking: if Israel realizes its election in Deut by considering its salvation history, it does so here by participating in the cult of the central sanctuary. If election implies the obligation of Israel in Deut, here it implies the facilitation of a life under the protection and blessing of God. A bit of temple theology has thus broken into the amphictyonic world. It is certainly no accident that the formula occurs repeatedly in ch. 12 with its regulations governing cultic centralization and in ch. 16 with its festival calendar. Correspondingly, Deut, although doubtless in a later layer of material, already speaks of the Levites’ election “from all your tribes” (18:5; 21:5). The elect priesthood belongs to the elect sanctuary. Like the unity of the temple, the unity of the priestly family also assures the proper function of a mode of worship that grants and assures salvation.

(e) In view of the cultic election doctrine evident here, it is noteworthy that the pre-exilic prophets, both collectively and singly, do not speak of Zion’s election, or even of Israel’s, using the term *bhr*. They surely know the *concept* of election (e.g., Amos 3:2), but they also call it into question (e.g., Amos 9:7). One can understand, then, their avoidance of the term *bhr*; it too easily gave rise to the dangerous illusion that Israel’s salvation

may be assured through the execution of the cult at holy places, or that Israel is immune to disaster because it is chosen. Even the Jerusalemite Isaiah, who knew the notion of the election of the king and the temple, mentions it only to qualify it theologically by placing both concepts under the condition of faith (7:9; 28:16) and shifting them into the horizon of eschatological events (2:2–4; 9:1–6).

3. (a) The Deuteronomistic history, dating to the exilic period, found it necessary to deal with the realities of the collapse of the Davidic kingdom, the destruction of the temple, and the end of Israel as a nation. If 1 Sam 10:24 spoke of the election of Saul (cf. H. J. Boecker, *Die Beurteilung der Anfänge des Königtums in den deuteronomistischen Abschnitten des 1. Samuelbuches* [1969], 48f.) and later passages of Saul's rejection (see IV/1c), the Dtr passage 8:18 now says that the people themselves chose the king. This choice by Israel is, according to v 8, to be frankly equated with idolatry (cf. Judg 10:14). Yahweh alone can be king over Israel; the people's choice of the king was in fact a rejection of Yahweh (1 Sam 8:7). To be sure, the Deuteronomistic history did not suppress the old traditions sympathetic to the kingdoms of Saul and David, or even Nathan's promise. But the Deuteronomistic writer himself used *bhr* only of David (1 Kgs 11:34 and perhaps 8:16 txt?). Never does Dtr call one of the Davidides Yahweh's "elect," although the royal psalms do precisely that. It is easier for Dtr to speak of Jerusalem's election (1 Kgs 8:16, 44, 48; 11:13, 32, 36; 14:21; 2 Kgs 21:7 "eternally"; 23:27; as in Deut, "in order to place my name there," etc., can be added). Apart from 1 Kgs 3:8 (not certainly Dtr), Dtr never speaks of Israel's election in Kgs, apparently simply because the unconditional corollary to election according to Deut, namely, fear of Yahweh and love for him, appears to him to be lacking in the Israel of the royal period. Indeed, he not only brackets out the theme of Israel's election, but in his summary concerning the fall of the north he speaks of its rejection (2 Kgs 17:20), which, according to v 19, includes Judah too. And in 23:27 he speaks expressly of the removal of Judah "from my presence, as I removed Israel." In the same breath he speaks of the rejection of the elect city Jerusalem together with its temple (cf. also 24:20). The picture that he paints is gloomy enough, then: the people have thoroughly wasted the unheard-of possibilities that Yahweh offered Israel through election, and indirectly through the election of the king and the temple site.

But the Deuteronomistic history would indeed be misunderstood if interpreted as a funeral song for the great utopia of Israel's election: the election of the Davidides, in contrast to that of Saul, is not revoked. The conclusion of the entire work, the narrative of the friendly turn in Jehoiachin's destiny, seems to offer the house of David too yet another chance. The "eternally" in 2 Kgs 21:7 indicates that Jerusalem will yet have

a future beyond its rejection.

Josh 24 also belongs to the exilic period. It is certainly an old tradition, but the Deuteronomist has redacted it (cf. J. L'Hour, "L'alliance de Sichem," *RB* 69 [1962]: 5–36, 161–84, 350–68), e.g., in vv 15 and 22, which seem to offer Israel the possibility of free choice. But one must interpret the passage from an exilic background. Israel is in danger of transferring allegiance to other gods. The Dtr addresses his historical sermon to this situation. The decision has been made long ago: "You are witnesses against yourselves, that you have chosen Yahweh to serve him" (v 22). The chief image is "Joshua and his house" with his clear Yahwistic position. The author does not speak of Israel's election by Yahweh because for him the question is not whether Yahweh will continue to view Israel as his people, but whether Israel, under the influence of the experience of catastrophe, is willing in the final analysis to abide by the decision for Yahweh.

Dtr speaks once, though rather extensively, of Israel's election: Deut 4:37, "because he loved your fathers and chose their descendants and brought you out of Egypt." The passage, apparently an adaptation of Deut 7:6–10 to a new situation, provides clues as to the kind of test of strength belief in election underwent after the fall of Jerusalem. Here, too, election is anchored in Yahweh's love, but in his love for the fathers. Instead of the statement that Yahweh made Israel his own people in the act of election, it is now emphasized, after possession of the land has become questionable, that the election became manifest in Yahweh's gift of the land to Israel as an inheritance. The corollary to election by Yahweh is no longer just obedience and fear of God, but—after the crisis of 586 had shaken Yahwism to the core—more radically, the recognition that Yahweh alone is God and no other (v 35), in heaven above and on earth below (v 38). Nevertheless, the Deuteronomist continues in the tradition of Deut by incorporating his statement concerning election into a sermon, which has as its theme, however, not only obedience to Yahweh but return to him (v 30).

(b) At approximately the same time as the Deuteronomistic writer, Deutero-Isa must have been written. While the former was presumably active in Palestine, the latter was in Babylon. But Deutero-Isa belongs to another world, not only geographically but also intellectually. He sees himself in relation to an audience that certainly does not deceive itself concerning the extent of the collapse, but that asks uncertainly whether Israel still has a future. He answers the question by consciously concentrating his preaching on the election notion. It is indicative that he prefers to address the theme in salvation oracles. This usage occurs most impressively in Isa 41:8–13. God's people will be addressed not only as Israel and Jacob, but also as "offspring of Abraham, my friend": election is transposed even further back into history and related to the relationship

between Yahweh and Abraham. The title “my servant” for Israel is also a novelty (cf. also 44:21; 45:4). The par. terms *‘ebed* and *bāḥîr* stem from royal ideology (see IV/1f). The democratization of the concept of the king’s election is thus fully realized in Deutero-Isa (cf. e.g., 55:3ff., where the grace promised David is transferred to the people). The fact that 41:9 verifies “I have chosen you” with “and not rejected” indicates that it is combating a radical doubt in the doctrine of election. Deutero-Isa too saw election as realized in a historical act: Yahweh selected Israel “from the ends of the earth.” It may be an allusion to the call of Abraham from Mesopotamia rather than to the exodus from Egypt. At other points Deutero-Isa refers even more radically to the beginnings: According to 43:20f., the elect Israel is “the people that I formed for myself”; election is transposed into the act of Israel’s creation (cf. also 44:1f.). This radicalization does not mean, however, that election remains an event of the distant past. In 43:18 Deutero-Isa plainly exhorts his reader to cease considering the former things, because Yahweh is creating something new, and, in conjunction with the election statements in 44:2, promises of salvation follow in vv 3f. The knowledge of election opens a future for Israel. For Israel’s sake Yahweh entrusts Cyrus with dominion over the nations. Yahweh, who chose Israel, is also a redeemer (*gōʿēl*) and leads Israel, the “horror of the nations,” home in a triumphal victory procession.

By contrast, temple theology found only partial reception in Deutero-Isa. Although he hopes for the reconstruction of Jerusalem and its temple (44:26; 49:17–23), he dares not base his faith on Zion’s election. The pre-exilic prophets’ harsh critique of the absolutization of the election concept had taken effect.

This effectiveness is also true of the Deuteronomistic critique of the throne. Deutero-Isa apparently sees no future at all for the Davidides. But individual elements of the royal ideology are incorporated in his picture of God’s servant. The “servant of Yahweh” (surely a reference to an individual) is, like the king, *bāḥîr* (42:1). Like the king, he is equipped with Yahweh’s Spirit (1 Sam 16:13; Isa 11:2). As servant he has a mission in the world: he is to carry the truth to the nations, he is to be the light of the nations; through him Yahweh glorifies himself. Whoever the servant of God may be, it cannot be accidental that the titles *‘ebed* and *bāḥîr* are granted to him, as to Israel itself. He represents the true Israel, and statements about him make it clear that Israel’s election cannot be separated from his mission. All previous interpretations of election are transcended, however, by the fact that the election of the servant of God is fulfilled in representative suffering.

One could ask whether the manner in which Deutero-Isa speaks of Israel’s election might lead to the false sense of security that caused the

pre-exilic prophets to oppose the notion of election so critically. Deutero-Isa avoids the danger by basing Israel's assurance of salvation neither on the temple nor on the king; above all, he excludes the danger through his interpretation of the *ʿebed* concept. Here, too, election means being placed under obligation, but now as Yahweh's servant among the nations, not only for obedience but even for a witness in apparent failure, in suffering, and in death.

(c) Ezekiel too does not speak of the election of the Davidides or of the temple. He speaks expressly of Israel's election only once (Ezek 20:5). The reason for the obvious reticence lies in the repeatedly expressed awareness that Israel rejected Yahweh's commandments (Ezek 5:6; 20:13, etc.). Significantly, in the one passage where he mentions Israel's election, he does so only in order to accuse the people of failing to draw the implication of election, the abandonment of idols. Like the Dtr he does not want the essential contemplation and repentance to be neglected because of a reversion to election. In view of the extreme incisiveness of his judgment oracles, it is indeed remarkable that he does not speak of Israel's rejection.

(d) Jer 33:23–26 demonstrates that the problem of rejection was posed pointedly by contemporary events. The people discuss the rejection of the "two families that Yahweh chose." The author, who also probably belonged to the exilic period, forcefully resists this abandonment of faith: "As surely as I created day and night . . . , so surely will I not reject the family of Jacob and my servant David." Israel and its royal house remain chosen, not e.g., because they preserved themselves, but because Yahweh alters their fate and has mercy on them.

The author of Isa 14:1 sees it otherwise. For him, rejection has become a fact, but he dares to speak of an additional election of Israel. Just as the foundational election manifested itself in the exodus from Egypt, so now this repetition, which he also sees grounded in Yahweh's mercy, manifests itself in Israel's return to its homeland. Just as "many foreigners" accompanied Israel in the flight from Egypt (Exod 12:38), so many foreigners will join the house of Jacob in the second exodus. A later hand, then, commented rather unhappily on this beautiful notion: the nations that Israel will take along will be its manservants and maidservants.

4. (a) If the text of Jer 49:19 = 50:44 has been correctly transmitted, some circles in the exilic period expected Yahweh to install his "elect" as ruler. The reference can only be to a Davidide, and the passage would then be a further witness to the fact that belief in the election of the Davidides was not extinguished even in the exilic period. In any case, a little later in the post-exilic period Haggai dared to proclaim the Davidide Zerubbabel the elect of Yahweh (2:23). The old par. expression "my servant" is not

overlooked, and his supremacy is described with the words: “that you may be to me like a signet ring.” Zech 6:9–15 still suggests that Haggai’s contemporary Zechariah also hoped for a reestablishment of the kingdom. The prophet also speaks expressly of Jerusalem’s election (3:2). In 1:17 and 2:16 he speaks more precisely of the *re* election of the city. One is prone to judge that statement, like the similar statement in Isa 14:1, to be theologically careless—in the final analysis, destructive of the election notion. But that the statement is possible in the OT realm indicates, nevertheless, that election is not deterministic and that the correlation of divine election and human submission to obligation is taken very seriously. “Yahweh’s election does not only mean a blessed destiny. It is a summons which calls for responsibility” (Zimmerli, *Ezek*, Herm, 1:408). From another standpoint, Zechariah goes on like Isa 14:1: Yahweh will indeed continue to reside in Israel’s midst, but “many nations will adhere to Yahweh in that day and will be his people.” The particularism of the election belief is breached, a circumstance already foreshadowed in Deutero-Isa, without abandoning the special status of Israel.

(b) The post-exilic Psa 33 bears similar testimony. It uses the election concept in a felicitation: “Peace to the nation whose God is Yahweh, to the people he has chosen as an inheritance” (v 12). Israel need not fear because it is Yahweh’s own (see also Psa 135:4, where even the old term *segulla*® “special property” [cf. Exod 19:5] is used once more; further Psa 47:5). Nevertheless, Yahweh’s choice of Israel as his inheritance does not exclude, but in fact involves, his reign over the whole earth (Psa 47:8). For this reason the psalmist dares the bold statement that the princes of the nations are assembled as “the people of the God of Abraham” (v 10). Even if *ʿim ʿam* “with the people” or simply *ʿim* “with” instead of *ʿam* “people” should be read (cf. comms.), the universality of God’s dominion would still be linked to Israel’s election (cf. P. Altmann, *Erwählungstheologie und Universalismus im AT* [1964]; H. Schmidt, “Israel, Zion und die Völker” [diss., Zurich, 1968], 11f., 19ff., 99f.).

(c) Psa 105 and 106 are also post-exilic; they retrace salvation history and already presuppose the closed Pentateuch. Psa 105:6 speaks of the “descendants of Abraham, his servant” par. to the “sons of Jacob, his chosen ones (*b<sup>ʿ</sup>ḥîrāyw*).” Apparently one should read *b<sup>ʿ</sup>ḥîrô* “his chosen one” here (cf. *BHS*): the patriarch is chosen, but at the same time, naturally, in him Israel is chosen. Therefore one could speak without difficulty in v 43 as in Psa 106:5 of the people as the chosen of Yahweh. The pl. is nevertheless noteworthy: the people now appears as a collection of individuals. The question arises, however, whether the chosen and the rejected in Israel should not therefore be distinguished.

(d) Trito-Isaiah too speaks of Yahweh’s chosen (Isa 65:9, 15). Even

old promises, which were associated with Israel's election, are revisited: they will possess the land and, as Yahweh's servants, live there. The chosen is no longer the empirical Israel, however, but the yet-to-be-created people of God of the coming era of salvation. Israel, as it is, has chosen evil in Yahweh's eyes (65:12; cf. 66:3f.). People's perverted choice excludes them from the circle of Yahweh's chosen. But Yahweh must yet create the true Israel: "I will bring forth a second growth from Jacob" (65:9), and this second growth will be "my people, who seek me" (v 10). Thus the boundaries of Israel, as it has been, are totally set aside. Those who keep Yahweh's Sabbath and choose what pleases him are "circumcised"; they are to have a "name and memorial" in Yahweh's house "that is better than sons and daughters" (56:4f.). It is enlightening that the disintegration of the people Israel in the late post-exilic period made it necessary to reformulate the election doctrine. This reformulation redefines the entity of the people of God in individual terms through the required correlation between human and divine choice. But this reconceptualization does not mean a cancellation of belief in Israel's election. The new people of God will continue to be, if not "Jacob's seed," then still "seed come forth from Jacob." Even though the temple too will be "a house of prayer for all peoples" (56:7), the Yahweh-fearers will still be instructed in Jerusalem. Above all, one can fall away from the elect Israel through one's own wrong choice; the new Israel, however, does not constitute itself by means of its own correct choice, but will be Yahweh's eschatological creation.

(e) The election of the tribe of Levi to the priesthood was already attested in a secondary layer of Deut (see IV/2d). It is no surprise that P concerns itself with the question of the legitimate priesthood in three passages where it speaks expressly of election (Num 16:5, 7; 17:20): the priesthood is now limited to the descendants of Aaron. This limitation is not undisputed, however. The narrative of the rebellion of Korah's band (Num 16, P version) is a description of the ordeal that should reveal "who belongs to him and who is holy so that he may draw near to him; whom he chooses, he may draw near to him" (v 5; cf. v 7). Num 17:16ff. (v 20) also speaks of a divine declaration that certifies election. The passages become transparent in meaning only when one ascertains that, besides this election, P speaks neither of the election of the people nor that of the king. The certainty of the election of the priestly house is sufficient. Salvation is assured by the fact that the right men exercise their duty before Yahweh. The priestly perspective can be understood against the struggle to provide Israel's faith in the presence of divine grace with a certain foundation. The disadvantage is, however, that Israel's obligations are limited to cultic correctness. The protest of the pre-exilic prophets against Israel's false security, which thought it possible to base its faith in the salvation-granting presence of Yahweh upon the temple, seems to have died away.

(f) The viewpoint of P found an echo in Psa 105. It too speaks of Aaron's election. But it mentions Moses as Yahweh's servant together with him (v 26; 106:23 does indeed expressly describe Moses as *bāhîr*). The reason that the same psalm speaks of election of individuals (see IV/4c) and of that of Aaron and Moses is clear: Yahweh has chosen the people in love in order "to see its joy" in its good fortune (106:5). But Israel has proved itself unworthy of this election, as its history illustrates. It was destined to fall had not Moses "stepped into the breach" before Yahweh (106:23). This is an interesting attempt to deal with the problem of the repeated failure of the chosen people and the threat that election will be overturned in rejection; aware of its failure as Yahweh's chosen people, Israel clings to the election of its fathers, leaders, and mediators of salvation: Abraham (cf. also Neh 9:7), Jacob, Aaron, and now Moses too. The powerful spectacle in Isa 53 of the suffering of God's servant, who indeed is also Yahweh's elect, is again illuminating: "he, the righteous, my servant, will create righteousness for many" (v 11). The trial of the one who is elect makes it possible to sustain belief in the election of the many, just as one cannot speak in the NT of the election of God's people apart from Christ, the one *eklektos tou theou* (G. Schrenk, *TDNT* 4:186–92).

(g) The Chr history reworked available tradition. Accordingly, it offers no new election concept but a reformulation of earlier concepts. Its peculiar tendencies are nevertheless visible. In 1 Chron 28:4ff. and 2 Chron 6:5f. it incorporates 1 Kgs 8:16, which speaks of the election of Jerusalem and David. But the Chr expands: David's election presupposes the election of Judah, which is apparently identical with the true Israel. Above all, however, he speaks of Solomon's election too. The repetitions in 1 Chron 28:5f., 10 and 29:1 indicate that this election is of great importance to him. The actual reason for the king's election is that he is to build Yahweh a house (28:10; 29:1). Already according to Sum. and Akk. sources (see IV/2d), the deity selects the king specifically to function as caretaker of sanctuaries. In this way the Chr has associated the election of the king with that of Jerusalem as the place where Yahweh will cause his name to dwell even more closely than in the documents available to him. Elsewhere too he places great weight on Jerusalem's election (2 Chron 6:5f., 34, 38; 7:12, 16; 12:13; 33:7; Neh 1:9), the more so because he must justify an anti-Samaritan stance. Of course, the temple cannot be discussed without mentioning the Levites (1 Chron 15:2; 2 Chron 29:11). This summary indicates that the Chr is indeed interested only in the election of the temple and its priesthood. The king's election is no longer an independent theme; Israel's election is not discussed at all. If the temple worship can be properly celebrated, the problem of Israel's election becomes superfluous (1 Chron 16:13 is a quotation of Psa 105:6; Neh 9:7 too belongs to

incorporated traditional material). The old temple ideology (see IV/2d) triumphed in the end, then. At any rate “Israel” is no longer God’s people in the ethnic sense, but the cultic community as the band of those assembled at the place of sacrifice and worship, seeking God and praising him.

5. (a) God is not the only one who chooses and elects; people do too. The OT operates on the assumption that they can also choose their God or gods. If the text of Judg 5:8 is original, the oldest OT passage with *bhr* in any form speaks of the choice of new gods. In the realm of polytheism and in the complex ethnic and religious situation of Canaan, the temptation to seek success with new gods must have been great. The first commandment addresses this very situation. As a rule, *bhr* was not used of turning to other gods; the word had too much theological significance and too solemn connotations to be used in the polemic against apostasy. At any rate, Isaiah threatens: “Truly, you will be ashamed on account of the trees that you desire (*hmd*), and you will blush on account of the gardens that you chose (*bhr*)” (Isa 1:29; cf. Wildberger, *Isa 1–12*, CC, 74, 76f.). The Dtr challenges Israel sarcastically: “Go and cry to the gods whom you chose” (Judg 10:14), and in his anti-idol polemic Deutero-Isa calls to them: “See, you are nothing and your deeds are nothing; the one who chooses you is an abomination!” (Isa 41:24). The same polemic also occurs once again in Trito-Isa (Isa 65:12; 66:3), and Psa 16, approximately contemporaneous, also seems to speak of the selection of other gods (v 4 read *bāhārû* for *māhārû*, see H. Gunkel, *Psa* [19264], 52). Significantly, this usage does not occur in contexts that simply note that Israel serves other gods, but in ironic polemic: if you believe you will do better with other gods, then, good, try. If you take pleasure (as ZB translates *bhr* in Isa 66:3) in their paths, and your heart “takes delight (*hps*) in their abominations,” then also bear the consequences that such a choice brings. The choice of other gods and cults is indeed a possibility, which is given with the freedom of Israel, or its people, and it becomes a reality in this freedom time and again, but a reality that leads to self-destruction. This freedom to choose makes ruin possible.

(b) Whoever chooses a deity not only chooses another name for the divine but prescribes for himself/herself a particular path (Isa 66:3; cf. also Psa 119:30) and chooses particular regulations (Psa 119:173). Whoever denies Yahweh chooses not only what is evil in his eyes but evil per se, because Yahweh is creator and guardian of the moral world order. In this way, the wisdom ideal could be incorporated into the confession of Yahweh. In the final analysis, the choice of Yahweh or the fear of him and the choice of the way of truth (Psa 119:30) or of life are one and the same. The pious trusts in this identity: to the one who fears Yahweh, “he shows the way that he should choose” (Psa 25:12). Conversely, later wisdom, at

least, can exhort one to choose the fear of Yahweh (Prov 1:29; cf. 3:31), but can also assure that the one who makes the right choice can expect blessing. His “soul” will “lodge overnight” in the realm of the good, i.e., will find fortune and salvation, “and his descendants will inherit the land” (Psa 25:13). Thus the old blessings and curses that conclude the legal corpus can be summed up in the Deuteronomist’s interpretation by the challenge: “So choose now life, so that you may live” (Deut 30:19).

(c) Although the exhortation to choose the good in Yahweh’s eyes, the right path, life, etc., can be stated, the final consequence—the summons to choose Yahweh himself—is lacking. This summons would correspond precisely to the complaint that Israel has chosen strange gods. Josh 24:15 at least approximates this conclusion: “If it does not please you to serve Yahweh, then choose today whom you will serve.” Israel is apparently confronted here with the choice between Yahweh and the gods. But, aside from the fact that Dtr has in reality obligated Israel to a choice long since made (see IV/3a), the logic of the correlation breaks down even in this passage: the alternative to choosing the gods is not choosing Yahweh, but fear of Yahweh and worship of Yahweh in uprightness and faithfulness (v 14). Joshua contrasts the possibility of the people’s faulty decision not with his own decision to choose Yahweh but with his pledge: “But I and my house, we will serve Yahweh.” Israel is aware that one cannot choose Yahweh, as one may choose other gods. In the pluralistic history of religion, Yahweh is not one of the many options confronting the pious individual. Israel should not choose Yahweh; rather it should acknowledge that it is chosen by him. Therefore the choice of other gods affects only whether Israel will realize its potential as Yahweh’s private possession. Israel is indeed required to choose the right path, but it may also trust that Yahweh will show it this path; it should choose life, but this choice is possible because Yahweh has “placed (life) before it” (Deut 30:19).

V. 1. *bḥr* occurs 30x and *bāḥîr* 20x in the available Qumran literature (according to Kuhn, *Konk.* 30f.). The election idea is closely linked to the Sinai covenant (1Q34bis 3 II:5), more directly than in the OT. The concept is transferred from the Sinai covenant to the “new covenant”; its members are “elect of God” (1QpHab 10:13) or “of Israel” (1Q37 1:3, etc.). Within the Qumran community itself, the Zadokite priests are elect in a specific sense. The *bḥîrîm* are righteous and lead a perfect life (1QS 4:22f.), and God grants them a portion in the lot of the saints (1QS 11:7). They are chosen from the beginning of the world, which should not be understood, however, as strict determinism, for “before they were created, he knew their works” (CD 2:7f.). The chosen, then, are completely free to decide, and they are therefore also called the “free-willed” (1QS 5:1, etc.); they choose the path

themselves (1QS 9:17f.). On Qumran, cf. F. Nötscher, *Zur theologischen Terminologie der Qumran-Texte* (1956), 174f.; id., *BZ* 3 (1959): 220ff.; J. Gnilka, *BZ* 7 (1963): 44–48; J. A. Fitzmyer, “The Aramaic ‘Elect of God’ Text from Qumran Cave IV,” *CBQ* 27 (1965): 348–72.

2. The LXX usually translates *bḥr* with *eklegesthai* (for details, cf. G. Quell, *TDNT* 4:145f.). *bāḥîr* is always translated with *eklektos*; *eklegesthai* renders other Hebr. roots in only a few cases, which indicates that the word was understood as a theologically stamped term.

3. On the usage of *bḥr* or *eklegesthai* in early Judaism and in the NT, cf. G. Quell and G. Schrenk, “λέγω: ἐκλέγομαι/ἐκλογή/ἐκλεκτός,” *TDNT* 4:144–92; G. Nordholt, “Elect, Choose,” *DNTT* 1:533–43; further N. A. Dahl, *Das Volk Gottes* (1941), 51ff.; B. W. Helfgott, *Doctrine of Election in Tannaitic Literature* (1954); I. Daumoser, *Berufung und Erwählung bei den Synoptikern* (1955); H. Braun, *Spätjüdisch-häretischer und frühchristlicher Radikalismus* (1957); J. Jocz, *Theology of Election* (1958); U. Luz, *Das Geschichtsverständnis des Paulus* (1968), 64f., 179.

H. Wildberger

## בטח *bṭḥ* to trust

S 982; BDB 105a; *HALOT* 1:120a; *TDOT* 2:88–94; *TWOT* 233; *NIDOTTE* 1053

1. Only a few, isolated instances of *bṭḥ* “to trust” have been identified so far outside the OT in Can.; it is absent in Aram. (apart from a few borrowings from the Hebr.) and is represented by the roots *rḥṣ/raḥāṣu* and *tkl/takālu* in Akk. Etymologies that attempt to trace *bṭḥ* to a physical-concrete root meaning have not yet produced universally accepted results.

A Can. gloss in EA 147:56 offers *ba-ti-i-ti* (*baṭīti*) “I am confident” (cf. *CAD* B:177a; *DISO* 33).

*bṭḥ* appears in a 6th-cent. Phoen. letter (*KAI* no. 50.5) in a damaged, not entirely lucid context (“security, guarantee”?).

On the PN *mbṭḥyh*, “Yahweh is the object of (my) trust,” with the by-form *mpṭḥyh* and the abbreviated forms *mb/pṭḥ* in the Aram. Elephantine Papyri (Cowley 295a, 297b; *BMAP* 187), cf. J. J. Stamm, *FS Baumgartner* 314. Hebr. *mbṭḥyh* occurs in Lachish Letter 1:4 (cf. *TGI* 1 no. 34).

On the basis of Arab. *bṭḥ* “to throw down” (VII “to lie on one’s belly”), the

meaning “to fall to the ground” has been postulated for Jer 12:5 and Prov 14:16, whether this may be taken as the basic meaning (“to lie there” > “to depend on” >) “to trust” (G. R. Driver, FS Robinson 59f.; J. Blau, VT 6 [1956]: 244; L. Kopf, VT 8 [1958]: 165–68), or a root *bṭḥ* II is assumed (HAL 116a: qal Jer 12:5; Prov 14:16; *baṭṭūḥâ* “inhabited valley” Job 12:6; denied e.g., by Rudolph, HAT 12, 84; Fohrer, KAT 16, 237), which presumes a different etymology for *bṭḥ* I (L. Köhler, ZAW 55 [1937]: 172f.; id., OTS 8 [1950]: 144f.; and KBL 118b: following Arab. *bāṭeḥ* “pregnant mare” and Hebr. <sup>ʾ</sup>*baṭṭīḥîm* “watermelons,” he suggests *bṭḥ* “to be taut, firm” > “to be trustworthy, trust, be certain”; otherwise, Ch. Rabin, FS Baumgartner 225–28: Arab. *btʿ* with the basic meaning “to be strong” and a semantic shift from “strength, greatness” > “self-confidence”).\*

Qal and causative hi. forms are attested for the verb; there are also the nom. derivatives *beṭaḥ* and (traditionally) *baṭṭūḥôt* “security”; *biṭḥâ*, *mibṭāḥ*, and *biṭṭāḥôn* “trust”; *baṭûaḥ* “trusting.”

2. The following statistics include passages attributed to *bṭḥ* II (see above):

	qal	hi.	<i>beṭaḥ</i>	other substs.	total	
Gen	–	–	1	–	1	
Lev	–	–	3	–	3	
Deut	1	–	3	–	4	
Judg	5	–	2	–	7	
1 Sam	–	–	–	1	–	1
1 Kgs	–	–	1	–	1	
2 Kgs	8	1	–	1	10	
Isa	18	1	3	4	26	
Jer	14	2	4	3	23	
Ezek	2	–	11	1	14	
Min. Pr.	–	5	–	4	–	9
Psa	44	1	3	4	52	
Job	4	–	2	4	10	
Prov	10	–	4	4	18	
Eccl	–	–	–	1	1	
1 Chron	–	1	–	–	–	1
2 Chron	–	1	–	–	–	1
OT	113	5	42	22	182	

The column “other substs.” consists of *baṭṭūḥôt* 1x (Job 12:6), *biṭḥâ* 1x (Isa 30:15; *biṭḥēk* is counted here, following Mandl. and HAL 116a, as qal inf., in Lis. under *beṭaḥ*), *mibṭāḥ* 15x (Prov 4x; Jer, Psa, Job 3x each; Isa and Ezek 1x each), *biṭṭāḥôn* 3x

(2 Kgs 18:19 = Isa 36:4; Eccl 9:4), and *baṭūaḥ* 2x (Isa 26:3; Psa 112:7).\*

3. (a) The verb occurs most often in the OT in prayer and song formulae: two-fifths of all texts are in the Psalter; moreover, outside Psa, many more texts belong to worship genres (cf. the prayer in Isa 12:2; the song in Isa 26:4) or mirror their themes (cf. the Dtr “discourses” in Jer 7:4ff.; 2 Kgs 18:5ff.). Without implicating the pertinent institutions, reference may be made to curse and blessing formulations, etc. (cf. Jer 17:5, 7; Isa 31:1; Amos 6:1), and prophetic judgment and salvation sayings that speak of trust in a similar manner (Isa 30:12; 42:17; 47:10; 50:10; 59:4; Hos 10:13; Mic 7:5; Zeph 3:2, etc.). Even genuine wisdom passages adopt the “religious” usage of *bṭḥ* (Prov 3:5; 16:20; 28:25; 29:25; cf. Job 11:18); the cultic usage stands, therefore, prominently in the foreground. The nouns are strewn over the literary field; *mibṭāḥ* seems to have arisen only since Judah’s exile (Jer 2:37, the earliest text?).

(b) *bṭḥ* can describe secure circumstances or a secure frame of mind; the qal act. ptcp. esp. fulfills this purpose. The inhabitants of pre-Israelite Laish live calmly and peaceably (*šōqēṭ ūbōṭēaḥ*, Judg 18:7, 27) reflecting their good fortune; the word of judgment is directed against the peasant women who consider themselves safe (Isa 32:9ff.). “If a war befalls me, I will remain confident even in it” (*b<sup>c</sup>zōṭ ṣ<sup>a</sup>nî bōṭēaḥ*, Psa 27:3). One who feels safe in this manner does not fear (Isa 12:2; Psa 56:5, 12) and is shaken by nothing (Psa 21:8; cf. 25:2; 26:1). The simple qal impf. can also describe this status of security (Prov 28:1). As a rule one states the basis or direction of this feeling of security, esp. through prepositional usages (*bṭḥ b<sup>c</sup>/ṣal*). One entrusts oneself (cf. the reflexive usage in 2 Kgs 18:24; Jer 7:8) to all sorts of objects, persons, and circumstances (the city walls, Deut 28:52; battle tactics, Judg 20:36; strength? Hos 10:13; treasures, Jer 49:4; beauty, Ezek 16:15), or even to evil (Isa 30:12). The relative clause “in which you trust” is used formulaically (cf. Deut 28:52; 2 Kgs 19:10 = Isa 37:10; Jer 5:17; 7:14; Psa 41:10; 115:8). If external circumstances are ordered and peaceful, one lives “in security” (adv. *betāḥ, lābetāḥ*; cf. 1 Sam 12:11; Isa 32:17; Mic 2:8; Prov 1:33; Lev 25:18f.; Judg 18:7; 1 Kgs 5:5; Ezek 38:8ff., etc.).

*bṭḥ* is not just a stative verb, however. It also expresses the beginning of the act of trust, which increases in a secure area of life or which aims at the creation of this area. Challenges to trust and warnings against unjustified security (pure impf.: Jer 17:5, 7; Psa 44:7; 55:24; 56:4f., 12; also impv., juss., and negated: Isa 26:4; 50:10; Jer 7:4; 9:3; 49:11; Mic 7:5; Psa 4:6; 9:11; 37:3; Prov 3:5) refer to a future act of trust; pf. predicates refer to the already proved, significant “entrusting of oneself” (cf. e.g., *bāṭaḥtî* “I trust,” Psa 13:6; 25:2; 26:1; 31:7, 15; 41:10; 52:10; 56:5, 12, in addition to the

impf. <sup>ʔ</sup>*nî* <sup>ʔ</sup>*cbṭaḥ* Psa 55:24 or the ptcp. <sup>ʔ</sup>*nî* <sup>ʔ</sup>*bōṭēaḥ* Psa 27:3). Whether it describes circumstances or states confidence of various durations, frequencies, and magnitudes, it always envisions an object of confidence; *bṭḥ* almost always refers to a process at the foundation of existence (contra A. Weiser, *TDNT* 6:191f.). Whoever trusts, relies on something (cf. <sup>ʔ</sup>*ʕn* “to rely on” and Isa 30:12; 31:1; 50:10; Prov 3:5; → *smk* and 2 Kgs 18:21 = Isa 36:6; Isa 26:3; Psa 71:5f.), and everything depends upon the reliability of the other; one seeks protection (cf. → *ḥsh* and Judg 9:15; 2 Sam 22:3; Isa 30:2; Psa 11:1; 16:1; 31:2; 71:1; 91:4; 118:8f., etc.), and one stands or falls with that on which one relies.

The derivative noun *mibṭāḥ* “basis, object of confidence” (unlike the other substs., it must not be understood as an action noun, but almost always clearly refers to the object of confidence, e.g., Yahweh, Jer 17:7; Psa 40:5; 65:6; 71:5; Bethel, Jer 48:13; cobwebs, Job 8:14; tent 18:14; refined gold, 31:24; in the pl. for several objects of confidence, Isa 32:18; Jer 2:37; also Prov 22:19, “so that your confidence may be in Yahweh”), *bittāḥôn* “confidence, hope” (only 2 Kgs 18:19 = Isa 36:4 and Eccl 9:4; the nuance expressed by the nom. form cannot be precisely comprehended), *bittāḥ* “trust” (only Isa 30:15, nomen actionis; cf. the inf. in Jer 48:7), and the adj. *bāṭūaḥ* “trusting” (only Isa 26:3; Psa 112:7) fit this linguistic model very well.

4. A specifically theological usage occurs in OT passages that assume that one can successfully place confidence only in Yahweh, that no other entity can be an ultimate object of trust. This restriction applies to almost all texts in which *bṭḥ* occurs; it is thus an eminently theological term, its meaning approximating the synonyms → <sup>ʔ</sup>*mn* hi. “to believe,” → *ḥsh* “to seek refuge” (cf. A. Weiser, *TDNT* 6:191ff.; R. Bultmann, *TDNT* 6:4f.).

There are sufficient programmatic declarations concerning trust in Yahweh: wisdom (Jer 17:5 “cursed be the man who relies on men”; v 7 “blessed the man, who relies on Yahweh”; Prov 16:20 “whoever relies on Yahweh finds happiness”), prophetic (cf. Isa 30:12 “you trust in oppression and perverseness and rely on them”; v 15 “you will be helped through returning and resting, you will become strong through waiting and trusting”), and theological illustrations.

The tradition-critically complex Hezekiah narrative of the Assyrian siege of Jerusalem (2 Kgs 18f. = Isa 36f.; cf. the revised version in 2 Chron 32 woven into another context) reads like a paradigm of the theme: “Yahweh is the only God (2 Kgs 19:15, 19), trust only in him!” 2 Kgs 18f. emphasizes Hezekiah’s special virtue; the besiegers provoke the king: “In what, then, do you trust?” (18:19f.; 19:10) and draw out the logical absurdities of his faith. The unreliability of the allies, historical events, and God’s authorization of the Assyrian world ruler (18:19–25; 19:11–13) contradict Hezekiah’s trust in Yahweh (cf. esp. 18:22, 25; the climax is in v 30: “Do not let yourselves be misled by Hezekiah to have hope in Yahweh [*bṭḥ* hi.]”). Contrary to every

military calculation, Hezekiah's confidence in Yahweh is wondrously confirmed (19:35ff.). On the relationship between the narrative and Isaiah's preaching, cf. von Rad, *Theol.* 2:168f.; B. S. Childs, *Isaiah and the Assyrian Crisis* (1967); R. Deutsch, *Die Hiskiaerzählungen* (1969).

Jeremiah's Temple Sermon (Jer 7:3–15) illustrates, in view of historical events, how even confidence in Yahweh can be falsified if not linked to a genuine, direct obedience.

Both narratives are examples of exilic (Dtr) concerns for a new relationship with Yahweh.

The same theological viewpoints occur in specifically cultic and liturgical passages. Is Yahweh trustworthy? Is he the only dependable one? The song formulae encourage the participants to dare the leap of trust (examples of direct invitations in the impv. are Psa 37:3; 62:9; 115:9ff.); they confess that Yahweh is indeed aid, protection, and sanctuary (cf. Psa 25:2f.; 27:3, 5, 9f.; 28:7; 31:4, 7f.; 71:5; 91:2; cf. Gunkel-Begrich 232ff.) and that he does not disappoint his protégés (cf. the affirmation that often immediately follows a statement of confidence: "I am not afraid," etc., Psa 56:5, 12; 25:2; 21:8), and they raise the expectation that the example of trust will set a precedent (Psa 40:4). The statement "I (we) trust in Yahweh" is extremely significant, however, in the language of the Psalms.

In the Psalter, 17 of 44 passages with *bṯh* qal are such personal confessions; they are often strengthened by means of the 1st sg. or pl. per. pron. (cf. also the synonymous usages with → *ḥsh*, Psa 7:2; 11:1; 16:1; 71:1; etc.; → *qwh* pi. Isa 8:17; 25:9; Psa 25:5, 21; 40:2; 130:5; → *dbq*, Psa 63:9; 119:31; → *smk* ni., Isa 48:2; Psa 71:6; *š'ḥn* ni., 2 Chron 14:10, etc.). The personal statement of confidence stands occasionally at the end of a psalm (Psa 55:24; 84:13), but as a rule it is the focus of a formal component of the lament, the "declaration of confidence" (cf. Gunkel-Begrich 254ff.; S. Mowinckel, *Psalms in Israel's Worship* [1962], 1:220; see also "confidence" in the index).

This evidence means that Israelite tradition recognizes and demands an absolute, exclusive devotion to Yahweh; this trust in Yahweh includes *hope* of salvation (Job 11:18) and *faith* in the God of the fathers (Psa 22:4f.).

5. Jewish and Christian theologians include the meaning "confidence in God" in their considerations of the total sphere of "faith, obedience, hope." Now and then, trust once again attains the forefront (in the Qumran texts, cf. 1QM 11:2 with 1 Sam 17:45; on the apocryphal and pseudepigraphal, as well as the NT and early Christian literature, cf. R. Bultmann, "πιστεύω," *TDNT* 6:197–230, esp. 200f., 206f.; id., "πίθω," *TDNT* 6:1–11, esp. 4–6). The concept of *pepoithenai epi tō theō* has no

special theological meaning in the NT; it is subsumed under *pisteuein*, “confidence takes the form of faith” (Bultmann, *TDNT* 6:7). Cf. also StrB 3:188, 191f.; R. Bultmann, “ἐλπίζω,” *TDNT* 2:521–23.

E. Gerstenberger

## בין *bîn* to understand

S 995; BDB 106b; *HALOT* 1:122a; *TDOT* 2:99–107; *TWOT* 239; *NIDOTTE* 1067

1. The root *bîn* “to understand” (< “to distinguish”) is attested in almost the entire NWSem. and Ssem. language realm (cf. *HAL* 117b; on *bn*, attested prior or contemporaneous to the OT only in Ug., cf. *WUS* no. 531; *UT* no. 461).

Beside the verb (qal, ni., hi., po., hitpo.) are the substs. *bînâ* “insight, understanding” and *t<sup>e</sup>bînâ* “insight, facility”; cf. also the PN *yâbîn*.

The words *bn* “between” and (*ʕš hab*)*bēnayim* “champion” (*HAL* 118, 134), usually attributed to the same root, will not be treated here.

2. The verb occurs in the qal and hi. a total of 126x (incl. Jer 49:7 [Lis. lists this under *bn*] and Prov 21:29 Q); almost half of the impfs. cannot be distinguished between the two stems (BL 396; Berg. *HG* 2:149). The ni. occurs 22x (21x as the ptcp. *nābôn*, adj. “insightful”), po. 1x, hitpo. 22x, the substs. *bînâ* 37x (also 1x Aram. in Dan 2:21) and *t<sup>e</sup>bînâ* 42x.

Most of the 250 Hebr. occurrences are in the Psa and wisdom texts (Prov 67x, Job 36x, Psa 30x), and in Isa (28x), the Chr’s history (23x), and Dan (26x, in addition to 1x Aram.).

3. The verb *bîn*, rarely employed without a modifier (on the usage in wisdom literature, see 4), should be translated in both the qal and the hi. mostly with “to notice” or “to observe” (hitpo. often “to pay attention to”; on the difference in meaning between qal and hi., cf. *HP* 254).

Examples: noticing who calls (1 Sam 3:8); that the child is dead (2 Sam 12:19); shortcomings (Psa 19:13); fire (58:10); a misdeed (Neh 13:7); ruin (Job 6:30), abs., *ʕên mēbîn* “no one notices it” (Isa 57:1); paying attention to the reading of the law (Neh 8:8; cf. 8:2f., 12; 10:29); hitpo. “to inspect carefully” (1 Kgs 3:21; cf. Job 31:1, 12).

In Chron it occasionally means “to be able to do something

professionally” (→ *ḥkm*; 1 Chron 15:22; 25:7; 27:32; 2 Chron 34:12; cf. Dan 1:4, 17; 8:23; cf. *t<sup>e</sup>bûnâ* in Exod 31:3; 35:31; 36:1; 1 Kgs 7:14).

The *hi.* occasionally means “to differentiate” (1 Kgs 3:9), “to be clever” (3:11); negated, “to understand nothing” (Isa 29:16 of the potter).

In addition to the inner-transitive (internal) meaning, the *hi.* is also used about 20x as a normal causative: “to give insight,” and thence “to instruct” (e.g., 2 Chron 35:3 Q; ptc. *mēbîn* “teacher,” Ezra 8:16; 1 Chron 25:8).

For the various object and prepositional constructions, cf. *HAL* 117f.

4. Regarding the theological usage of the verbs, attention must first be directed to passages in which Yahweh appears as subject.

Yahweh notices misdeeds (Psa 94:7 par. *r<sup>h</sup>* “to see”), knows people’s thoughts (139:2; cf. 1 Chron 28:9), notices sighing (Psa 5:2 par. *ʔzn hi.* “to hear”), pays attention to people’s works (33:15), observes his people (Deut 32:10 po.). God’s *t<sup>e</sup>bûnâ* is mentioned in Isa 40:14, 28; Jer 10:12 = 51:15; granted to the king, 1 Kgs 5:9; cf. Isa 11:2, *bînâ*.

With the people or the individual as subject, *bîn* frequently deals with attention to Yahweh’s activity in nature and history (Deut 32:7 par. *zkr* “to remember”; Psa 28:5; 73:17; hitpo.: Isa 43:18; Job 37:14; 38:18; contrast Isa 52:15 and Jer 2:10).

That in the OT the right relationship to God is frequently formulated exactly with wisdom ideas (cf. H. H. Schmid, *Wesen und Geschichte der Weisheit* [1966], 199–201 with bibliog.) has still received much too little theological consideration.

A number of diverse formulations express the fact that the people or the individual ought to “understand” (often par. to *yd<sup>c</sup>* “to recognize”) something (Isa 6:9f.; 32:4; 40:21; 43:10; 44:18; Jer 23:20 = 30:24; Hos 14:10; Psa 94:8; 107:43; cf. with *bînâ*. Isa 27:11; 33:19), or that this “understanding” is often lacking (Deut 32:28f.; Isa 1:3; Jer 9:11; Hos 4:14; Psa 49:21; cf. Psa 82:5; Dan 11:37).

Later on, when the law assumes centrality in OT religion, it becomes the object or goal of this understanding: Neh 8:2f., 12; 10:29; Psa 119:27, 34, 73, 95, 100, 104, 125, 130, 144, 169; cf. already Deut 4:6 (*bînâ*).

The word group is particularly important in Prov, Job, and Dan.

The proverbs of Solomon serve *l<sup>e</sup>hābîn ʔimrê bînâ* “the understanding (or the learning) of the words of insight” (Prov 1:2), their objective is the *bînâ* or *t<sup>e</sup>bûnâ* (2:3), they are concerned with understanding the *māšāl*, the wisdom saying (1:6), acquiring

*ʿormâ* “cleverness” (8:5a), understanding the way (14:8), becoming insightful (8:5b txt?); *mēbîn* is, then, “the insightful” (8:9; 17:10, 24; 28:2, 7, 11), *bînâ* “insight” (often par. to *ḥokmâ* “wisdom”; 4:1, 5, 7; 7:4; 8:14; 9:6, 10; 16:16; 23:23; 30:2), similar to *t<sup>e</sup>bûnâ* (2:2f., 6, 11; 3:13, 19; 5:1; 8:1; 10:23, etc.), *nābôn* “prudent” (par. *ḥākām* “sage”; antonym: fool, cynic; 10:13; 14:6, 33; 15:14; 16:21; 17:28; 18:15; 19:25). False, purely human *bînâ* is treated in 3:5; 23:4; *t<sup>e</sup>bûnâ*: 21:30.

The word group is used very diversely in the poetry of Job. In addition to “profane” (6:30; 14:21; 18:2; 31:1; 32:12, etc.) and general wisdom usages (28:23; 32:8f.; 34:16; 36:29, etc., as well as most occurrences of *bînâ* and *t<sup>e</sup>bûnâ*), there are several, more specific usages: observing God’s injustice (13:1 par. *r<sup>h</sup>* “to see,” *šm<sup>c</sup>* “to hear”; cf. 23:8), Job is unable to see God (Job 9:11 par. *r<sup>h</sup>*; 23:8). He wishes to know how God would answer him (23:5 par. *yd<sup>c</sup>*); but God pays no attention (30:20 txt em). In his friends’ opinion, Job understands nothing (Job 15:9 par. *yd<sup>c</sup>*); nevertheless, he wishes them to show him his errors (6:24 par. *yrh* hi. “to teach”).

In the vision narratives of Dan, *bîn* becomes a technical term for the understanding of visions and auditions (in various constructions: 1:17; 8:5, 15–17, 27; 9:22f.; 10:1, 11f., 14; 11:33; 12:8, 10); cf. the understanding of the scriptures in 9:2 also.

5. The thought of the Qumran sect also participated in the amalgamation of wisdom, apocalypticism, and gnosticism at the turn of the era. On the meaning of wisdom expressions at Qumran, cf. F. Nötscher, *Zur theol. Terminologie der Qumran-Texte* (1956), 38ff. (on *bîn* and *bînâ*, ibid. 54ff.).

For the NT usage of the Gk. verb *ginōskein*, which already represented both *bîn* and → *yd<sup>c</sup>* in the LXX, see R. Bultmann, “γινώσκω,” *TDNT* 1:689–719.

H. H. Schmid

## בַּיִת *bayit* house

S 1004; BDB 108b; *HALOT* 1:124a; *TDOT* 2:107–16; *TWOT* 241; *NIDOTTE* 1074

## אֹהֶל *ōhel* tent

S 168–169; BDB 13b; *HALOT* 1:19a; *TDOT* 1:118–30; *TWOT* 32a; *NIDOTTE* 185–186

## הֵיכָל *hēkāl* temple

S 1964; BDB 228a; HALOT 1:244b; TDOT 3:382–88; TWOT 493; NIDOTTE 2121

1. \**bayt*- “house” is common Sem. (Berg., *Intro.* 216); fig. meanings occur in all Sem. languages as in Hebr. (cf. e.g., *AHW* 132–34; *CAD* B:272–77, 282–97; *WUS* no. 600; *UT* no. 463; *DISO* 35f.).

Direct derivatives of *bayit* do not occur in Hebr.; *bîtān* “palace” (Esth 1:5; 7:7f.) may be an Akk. loanword transmitted through Aram. (Wagner no. 42). Bibl. Aram. offers the denominative verb *bît* “to spend the night” (Dan 6:19) in addition to *bayit* (pars. in Akk., Ug., Aram., Arab., and Eth., but not in Hebr., where *lîn* “to spend the night,” also more generally “to lodge,” performs this function).

In contrast, place-names formed with *bît* - are quite frequent (*HAL* 120–24: nos. 1–52); *bît* - often originally indicated the sanctuary of a deity (e.g., *bêt dāgôn*, *bêt ʿnāt*, *bêt šemeš*).

Although not conclusive, a fem. form (Aram.) of *bîn* “between” is often assumed (Wagner no. 41; *HAL* 124a; on Ezek 41:9 cf. Zimmerli, *Ezek*, Herm, 2:373; on Job 8:17, cf. Horst, BK 16, 126) for the difficult texts 2 Kgs 11:15 = 2 Chron 23:14 (*ʿel-mibbêt [lʿ]*; see 3c) and Prov 8:2 (*bêt nʿtibôt* “crossroad”?; cf. Gemser, HAT 16, 44). In 2 Kgs 23:7b a plural of *bat* III “woven garment” should probably be conjectured to replace the present pl. of *bayit* (*HAL* 159b).

2. Statistics are complicated for *bayit* because the removal of place-names formed with *bît*- cannot always be satisfactorily accomplished.

In the following presentation, nos. 5, 30, 46, 51 listed in *HAL* 120–24 will not be counted among the place-names, following Lis. (and Mandl.), although nos. 12, 23, 27 (*bêt haggān* 2 Kgs 9:27; *bît-hakkerem* Neh 3:14; *bêt millōʿ* Judg 9:6, 20[bis]; 2 Kgs 12:21) will be (against Lis.). Excluding the approximately 50 place-names with adj. formations (around 240 occurrences) and 2 Chron 34:6 K, but including 2 Kgs 23:7b (see 1) as well as Num 1:22 and 2 Sam 19:12b (the last two omitted in Lis.), the following numbers result:

Gen	109	Hos	15	Prov	38	
Exod	59	Joel	6	Ruth	7	
Lev	53	Amos	27	Song Sol	5	
Num	58	Obad	5	Eccl	11	
Deut	45	Jonah	–	Lam	3	
Josh	25	Mic	16	Esth	28	
Judg	68	Nah	1	Dan	3	
1 Sam	61	Hab	3	Ezra	30	
2 Sam	115	Zeph	5	Neh	52	
1 Kgs	194	Hag	11	1 Chron	112	

2 Kgs	151	Zech	31	2 Chron	218
Isa	75	Mal	2		
Jer	146	Psa	53		
Ezek	181	Job	26	Hebr. OT	2,048

*bîtān* occurs 3x, Bibl. Aram. *bayit* 44x (Dan 9x, Ezra 35x), *bît* pe. 1x.

3. (a) In its basic meaning *bayit* describes the fixed “house” built of any material (*BRL* 266–73, 409–16; *BHH* 2:658f.; 3:1361–65), usually in distinction from *ʾōhel* “tent” (cf. 2 Sam 16:22; Jer 35:7, 9f.; Hos 12:10; but Psa 132:3 *ʾōhel bêtî* “my house-tent”; 1 Chron 9:23 txt? *bêt-hāʾōhel* “tent-house”; cf. Rudolph, HAT 21, 88; *ʾōhel* occurs 435x in the OT [Num 76x, Exod 62x, Lev 44x, Gen 23x, Psa 18x, Prov 14x, Judg 13x], in 60% of the texts in the cultic sense of “tent of Yahweh,” “tent of meeting,” etc. [→ *y<sup>c</sup>d* 2, 4b]) and *sukkâ* “booth” (cf. Gen 33:17; 31x in the OT); cf. A. Alt, “Zelte und Hütten,” FS Nötscher 16–25 = *KS* [1959], 3:233–42; W. Michaelis, “Zelt und Hütten im biblischen Denken,” *EvT* 14 (1954): 29–49. On the idiom “to your tents, O Israel!” in reference to the dissolution of the Israelite army and in other passages in which fixed formulae from the nomadic period have not undergone the evolution appropriate to the changed circumstances of settlement in the land (tent > house), see Alt, *KS* 3:240.

Except perhaps for the general abstract *binyān* “building” (→ *bnh* “to build”; an Aram. loanword in Ezek 40:5; 41:12[bis], 15; 42:1, 5, 10 [41:13 *binyā*]); cf. Wagner no. 44), synonyms appear only as descriptions of mansions, palaces, etc.: in addition to the frequent *bṯ hammelek* “king’s palace,” the loanwords *hékāl* “palace, temple” (Sum. \**haikal* [A. Falkenstein, *Genava* NS 8 (1960): 304] > *é-gal*, Akk. *ekallu*, Ug. *hkl*, Bibl. Aram. *hkal*; in the OT 80x in Hebr. [Jer 7:4 3x] and 13x in Aram., 14x plus 5x resp. in the meaning “palace”: 1 Kgs 21:1; 2 Kgs 20:18 = Isa 39:7; Isa 13:22; Hos 8:14; Joel 4:5; Amos 8:3; Nah 2:7; Psa 45:9, 16; 144:12; Prov 30:28; Dan 1:4; 4:21, 26; 5:5; 6:19; Ezra 4:14; 2 Chron 36:7), *ʾappeden* “palace” (< Pers. *apadāna*; cf. Wagner no. 25; Dan 11:45), and *bîtān* “palace” (see 1). The terms *ʾarmôn* (Isa 13:22 *ʾalmôn*) “(fortified) palace” (33x, primarily in the Prophets) and more definitely *bîrâ* “citadel” (18x, only in Esth, Dan, Neh, and Chron; Aram. *bîrâ* Ezra 6:2, an Akk. loanword; cf. Wagner no. 40) emphasize the aspect of fortification (cf. also *migdāl* “tower,” → *gdl*).

(b) In conjunction with *ʾēlōhîm* “God” or a divine name (less often elliptically free-standing or otherwise modified, e.g., 1 Kgs 13:32 and 2 Kgs 17:29, high places; Amos 7:13, royal sanctuary; Mic 3:12; Hag 1:8), *bayit* usually indicates a “divine house,” a “temple” (cf. *BRL* 511–19; *BHH* 3:1940–49). A few cases in the OT deal with sanctuaries of foreign gods (e.g., 1 Sam 5:2, Dagon’s temple; cf. also the place-names; see 1) or with Yahweh sanctuaries outside Jerusalem (Judg 18:31, “as long as the house of God was in Shiloh”; 1 Sam 1:7; on *bêt-ʾēl*, see 4b and → *ʾēl* III/2), but by far the majority deal with the temple in Jerusalem (→ *ʾēlōhîm* III/6; the phrase *bṯ yhwḥ* “house of Yahweh” occurs 255x in the OT [2 Chron 75x, 2 Kgs 52x, Jer 33x, 1 Kgs 22x, 1 Chron 20x, Psa 9x]; on Hos 8:1, see 3d). Synonyms are *hékāl* (see 3a), which can also indicate, however, the main

hall of the temple in distinction from the foyer and the holy of holies (*HAL* 235a), and the more general expressions *qōdeš* and *miqdāš* “sanctuary” (→ *qdš*).

(c) If we remain in the impersonal sphere without reference to the inhabitants of the house (see 3d), the fig. meanings of *bayit* touch mostly on the concept of the house as an enclosed area. If the habitation of living things plays a role, one may speak of a “resting place” (of people: Job 17:13, “If I hope, then the underworld is my house”; 30:23, “You will bring me to death, to the house where all that lives enters”; of animals: Job 39:6, the steppe as the habitation of the wild donkey; Job 8:14 and 27:18, txt em, cobwebs). The expression for the grave in Eccl 12:5, “eternal house” (*bṯ* → *ʿōlām*; cf. Psa 49:12), also attested in Pun., Palm., Gk., and Lat., goes back to a concept of Eg. origin (cf. E. Jenni, *ZAW* 65 [1953]: 27–29). “Clay houses” in which people “live” (*škn*) in Job 4:19 are not references to the grave but metaphorically to frail human bodies (cf. Horst, BK 16, 76).

Some technical usages of *bayit* also minimize the concept of habitation, resulting in a meaning “container” or the like: for bars (Exod 26:29; 36:34) or poles (Exod 25:27; 30:4; 37:14, 27; 38:5); *bāttē nepēš* in Isa 3:20 is traditionally interpreted as “perfume jars,” but also as “soul cases” = amulets (cf. Wildberger, *Isa 1–12*, CC, 153f.). Ezek 1:27 “fire that is ringed about,” which has, then, a “halo,” is also difficult (Zimmerli, *Ezek*, Herm, 1:88f., 122f.). Finally, 1 Kgs 18:32 “area for two measures of seed” recalls the meaning “plot of ground” attested for the Akk. *bītu* (*AHW* 133a).

In the sense of “inner, within” (antonym: *ḥûš* “lane, outside”), *bayit* has become a fully adv. or prep. expression in *baytâ* “inward” (Exod 28:26, etc.), *mibbayit* (Gen 6:14, etc.) and *mibbaytâ* (1 Kgs 6:15) “inside,” *mibbayit le* (1 Kgs 6:16), *lemibbît le* (Num 18:7) “inside,” and *ʿel mibbêt l'* “into the middle” (2 Kgs 11:15; cf. 2 Chron 23:14).

Neh 2:3, “the city where (*bṯ*) the graves of my fathers are,” recalls the Neo-Assyr. usage of *bīt* as a prep. or subordinating conjunction in a local clause (GAG §§116f, 175c; *AHW* 131b).

(d) In Hebr. as in the related languages, the meaning of “house” shifts frequently to the contents of the house (“property, possessions,” e.g., Gen 15:2), and particularly to the household living in the house (classically in Josh 24:15: “but I and my house, we will serve Yahweh”). *bayit* thus means “family” (Gen 7:1, etc.; → *bnh*, → *šh*), “clan” (e.g., Jer 35:2, “house” of the Rechabites, for whom the possession of a house in the concrete sense is directly prohibited), also “lineage, descendants” (Exod 2:1, etc.), and, in reference to kings, “(royal) court” or “dynasty” (Isa 7:2, 13, etc.). *bēt-ʿāb* “paternal house, (paternal) family” (e.g., Gen 24:38) becomes a term of

tribal organization in the post-exilic period (→ *ʾāb* III/4). The entire tribal and national society could also be described as *bayit* according to the model of family and tribe, thus *bêt ʿep̄rayim* “house of Ephraim” (Judg 10:9), *bêt ya<sup>a</sup>qōb* “house of Jacob” (Exod 19:3, par. “Israelites”; Isa 2:5f., etc.), esp. also in a political meaning for the two kingdoms Judah and Israel (*bêt y<sup>e</sup>hūdā*, 2 Sam 2:4, 7, 10f., etc., in all 41x; *bêt yiśrāʾēl*, 2 Sam 12:8, etc., in all 146x, 83x in Ezek; on the development of this expression in analogy to *bêt y<sup>e</sup>hūdā* → *yiśrāʾēl* 2; names for regions such as *bīt-ammānu*, etc., in Assyr.-Bab. sources are also comparable; see *RLA* 2:33ff.). Emulating this usage, Hos 8:1 calls the land (not a temple) “house of Yahweh” (cf. also Hos 9:8, 15; Jer 12:7; Zech 9:8; Wolff, *Hos*, Herm, 137). In Ezek *bêt m<sup>e</sup>rî* “house of rebelliousness” contrasts with *bêt yiśrāʾēl* (→ *mrh* 4c; cf. Zimmerli, *Ezek*, Herm, 1:134).

A more specifically constituted metonymy “house > inhabitant” occurs in the Eg. royal title “pharaoh” (Hebr. *par<sup>o</sup>ḥ*); *pr-<sup>o</sup>* “great house” originally meant the royal palace, but was then applied (since the 16th cent. BCE) to the king (*BHH* 3:1445).

4. (a) J. Hempel offers a review of the religious concepts associated with the house that were theologically significant even for the NT (“Der Symbolismus von Reich, Haus und Stadt in der biblischen Sprache,” *WZ Greifswald* 5 [1955/56]: 123–30, under the headings “Einwurzelung,” “Eingrenzung,” “Ordnung”). Aspects of cultural history and religious history, e.g., the Rechabites, who were obligated to the nomadic ideal, resisted housing construction as an expression of a distinctive faithfulness to Yahweh (Jer 35), and the prophetic polemic against mansions (e.g., Amos 3:15; 5:11), will not be further treated here, because they did not influence the usage of *bayit*.

(b) The numerous texts that discuss a “house of God” or “house of Yahweh” will not be treated further. As with other cultic objects (ark, tent, sacrifice, etc.), the essence and history of cultic institutions will not be examined with respect to the Jerusalem temple; instead, possible special theological usages will only be noted (on the theologically significant concept of the dwelling of God, cf. → *škn* “to dwell”). At just this point, however, the material is not very productive. The OT employs the term “house” without distinction for pagan temples and the temple of Yahweh in Jerusalem; it is also difficult to determine any variations in the usage of the term across time. The intentional contrast between the two meanings of *bayit*, “temple” and “dynasty,” is stylistically effective in the rejection of the temple building in 2 Sam 7:5, 11, 29 (“should you build me a house . . . Yahweh will build you a house . . . I will build you a house”).

In an ancient tradition, which still shines through in Gen 28:22, *bēt ʿlōhîm* can mean not only the constructed house of God, the temple, but also a cultic stone (*maṣṣēbâ* “massebah”) “as a representation, resting place, dwelling place of the deity” (H. Donner, *ZAW* 74 [1962]: 68–70, with the Old Aram. par. *bty ʿlhyʿ* “houses of the gods,” related to the stele that contains the covenant text in *KAI* no. 223C., lines 2f., 7, 9f.; cf. Fitzmyer, *Sef.* 90 with bibliog.; on the pre-Israelite deity Bethel [Jer 48:13? but cf. Rudolph, *HAT* 12, 258f.], cf. O. Eissfeldt, *ARW* 28 [1930]: 1–30 = *KS* [1962], 1:206–33; → *ʿl* III/2).

In addition to the earthly temple, e.g., in Shechem (Judg 9:4), in Shiloh (Judg 18:31; 1 Sam 1:7), and above all in Jerusalem, the OT also mentions a heavenly palace of God (perhaps *bayit* in Psa 36:9 [*HAL* 119b], but uncertain; possibly *hékāl* in Mic 1:2; Hab 2:20; Psa 11:4; 18:7 = 2 Sam 22:7; cf. also Isa 66:1; → *škn*). The poetic concept in Job 36:29 of heaven as God’s *sukkâ* “booth” (actually “leafy canopy”) above the clouds (Fohrer, *KAT* 16, 480) is different.

On the land of Israel as the “house” of God or Yahweh, see 3d.

5. “House” does not yet serve in the OT as a figure for the community, as is the case in Qumran (1QS 5:6; 8:5, 9; 9:6; CD 3:19; cf. J. Maier, *Die Texte vom Toten Meer* 2 [1960], 46f.) and in the NT (1 Tim 3:15; Heb 3:6; 1 Pet 2:5; 4:17). *bayit* in Num 12:7, which compares Moses’ position with “that of the chief slave who is at once the confidant of his master and the man to whom his master’s whole ‘house’ is entrusted” (Noth, *Num*, OTL, 96), can refer to Israel as the realm of Yahweh’s lordship only if the metaphor is extended (cf. Heb 3:1–6). On the LXX and the NT, cf. O. Michel, “οἶκος,” *TDNT* 5:116–59; W. Michaelis, “σκηνή,” *TDNT* 7:369–94; J. Goetzmann, “House,” *DNTT* 2:247–56, with bibliog.

E. Jenni

## בכה *bkh* to cry

S 1058; BDB 113a; *HALOT* 1:129b; *TDOT* 2:116–20; *TWOT* 243; *NIDOTTE* 1134

1. The verb *\*bky* “to cry” is common Sem. (Berg., *Intro.* 218; P. Fronzaroli, *AANLR* 8/19 [1964], 270). Hebr. derivatives are the substantives *b<sup>°</sup>kî*, *b<sup>°</sup>kît*, *bekeh* “crying.”

The words *bōkîm* (Judg 2:1, 5 with an etymology of the name, explaining *bōkîm* as the crying of the people) and *bākût* (in the expression *ʿallôn bākût* “lament oak,” Gen 35:8, also with a secondary etymology) found in place-names deserve consideration as

further derivatives. Was “crying” originally a form of expression of the tree spirit (B. Stade, *Biblische Theologie des AT* [1905], 1:112)?

*bkʿ* is also probably a by-form of *bkh*; the root occurs in this form in names of a shrub variety *b<sup>ʿ</sup>kāʾîm* (2 Sam 5:23f.; 1 Chron 14:14f.), probably dripping, “crying” shrubs. Psa 84:7 mentions an *ʿemeq habbākāʾ*, apparently the PN of a valley with sparse vegetation (with only drops of water); cf. HAL 124a. Apparently the place-name *bōkîm* was originally to be similarly understood.

2. The verb occurs 114x (qal 112x, pi. 2x). The distribution exhibits no peculiarities. *b<sup>ʿ</sup>kî* occurs 30x; *b<sup>ʿ</sup>kît* (Gen 50:4), *bekeh* (Ezra 10:1), and *bākût* (Gen 35:8) are hapax legomena.

3. The meaning of *bkh* can be consistently rendered with “to cry, bewail.” The word is used for the crying of the child in Gen 21:16; Exod 2:6. The adult cries during the lament for the dead (par. expression: *spd* “to lament,” Gen 23:2; 2 Sam 1:12; Ezek 24:16; also in this context: *dm<sup>ʿ</sup>* “to shed tears,” Jer 13:17; cf. *dim<sup>ʿ</sup>â* “tear,” Jer 31:16; Ezek 24:16; Mal 2:13; Lam 1:2; *šûm* “to fast,” Judg 20:26; 2 Sam 1:12; 12:21f.; *nûd* “to lament,” Jer 22:10; brief descriptions of lament practices in Jer 41:6; Ezek 27:31). Women esp. are to perform laments (2 Sam 1:24); it was considered particularly unfortunate if there were no one to lament the dead (Psa 78:64; Job 27:15).

Crying also played a role in the ritual lament, which usually took place in the temple; this lament is described as “crying before Yahweh” (Judg 20:23, 26). Par. expressions here are *šûm* “to fast” (Judg 20:26; Psa 69:11), *nzr* hi. “to set oneself apart [through observance of particular rules]” (Zech 7:3). It is known from post-exilic times that the priests were found on occasions of communal lament “between hall and altar” (Joel 2:17); cf. further in this context, 2 Kgs 22:19; Psa 137:1; Lam 1:2, 16. This cultic weeping originally had the purpose of winning the deity’s favor (Hos 12:5 should perhaps be so understood; see P. R. Ackroyd, *VT* 13 [1963]: 250f.; but cf. e.g., Wolff, *Hos*, Herm, 212f.), but in the OT is probably simply an indication of the pain of the laments. Jeremiah is dependent upon the diction of the individual lament when he describes his suffering (Jer 8:23; 13:17).

The crying of adults is not only determined by custom, but breaks out spontaneously in conditions of strong emotion, sickness (1 Sam 1:7f., 10), sadness over an unfortunate occurrence (Gen 27:38; Judg 11:37; 1 Sam 30:4; 2 Sam 3:16; Neh 1:4 par. to → *šûm* “to fast,” → *ʾbl* hitp. “to mourn,” → *pll* hitp. “to pray”; Isa 33:7 par. → *š<sup>ʿ</sup>q* “to cry out”), excitement (2 Kgs 8:11), emotional upset (Gen 42:24; 43:30; 50:17; 1 Sam 24:17; Job 2:12; Ezra 3:12; Neh 8:9). A call to cry occurs in the prophetic reprimand in Mic 1:10 txt em (cf. S. J. Schwantes, *VT* 14 [1964]: 455).

Greeting and farewell (Gen 29:11; 33:4; 45:2 with *b'kî*, 45:14f.; 46:29; 1 Sam 20:41; Ruth 1:9, 14, often together with verbs such as “to kiss,” “to embrace,” “to bow [before someone]”) are special cases of emotional upset. Cf. R. Lehmann, “Der Tränengruss im AT,” *Baessler-Archiv* 19 (1936), reviewed in *ZAW* 55 (1937): 137.

Weeping to accompany sowing may have been customary in Israel as an echo of Can. mourning for the death of the vegetation deity (allusion in Psa 126:6; later, weeping accompanied the Jewish New Year’s Festival; the sounding of the shofar is a symbol of this weeping; cf. F. Hvidberg, *Weeping and Laughter in the OT* [1962]), although this custom has no significance in the context of official Yahwism. On cultic weeping in later Judaism, cf. J. A. Wensinck, *FS Sachau* 26–35; and J. L. Palache, *ZDMG* 70 (1916): 251–56, who expands earlier treatments.

In poetic diction, *bkh* can be used with a nonhuman subj. (Job 31:38, the ground “cries,” par. *z'q* “to cry out”; the issue is the proper relationship between human and nature). Eccl 3:4 maintains that, like laughing, weeping has its place in human life (antonymn: *šhq*).

On the usage of the pi. (Jer 31:15, a picture of the lament for the dead; Ezek 8:14, weeping for Tammuz; cf. Psa 126:6), see *HP* 157.

4. Weeping plays a role in the relationship between God and human in only a few cases (particularly not in mourning for the dead; → *'bî*, and certainly not in the context of the vegetation cult, even though here a rather significant folk religion may need to be taken into account), as in the individual and community laments; here it is a sign of human weakness that approaches God in supplication, or an expression of emotional upset when one learns of God’s pronouncement of judgment (Judg 2:4; 2 Kgs 8:11ff.).

Weeping has a special place in the motif of the “murmuring in the wilderness” (Num 11:4, 10, 13, 18, 20; 14:1; Deut 1:45). It indicates the attitude of the disobedient people who do not have confidence in divine guidance and therefore complain.

If, then, weeping is a sign of human distress, in later apocalyptically oriented times Israel expected a new era in which such weeping would cease (Isa 30:19).

5. The latter notion, in particular, acquires some significance in the NT in that Jesus promises this end time (cf. Matt 5:4, etc.). On the whole notion in the NT, cf. K. H. Rengstorf, “κλαίω,” *TDNT* 3:722–26.

F. Stolz

בֵּן *bēn* son

S 1121; BDB 119b; HALOT 1:137a; TDOT 2:145–59; TWOT 254; NIDOTTE 1201

בת *bat* **daughter**

S 1323; BDB 123a; HALOT 1:165b; TDOT 2:332–38; TWOT 254b; NIDOTTE 1426

I. The word *bēn* (\**bin-*) “son,” with its fem. counterpart *bat* (\**bint-*) “daughter,” is common Sem. (Berg., *Intro.* 210); replaced in Eth. by *wald*, in Akk. by *māru*). It should perhaps be associated with \**bnw/y* “to build.”

The term survives in Akk. only in poetic diction and PNs; *māru/mārtu* takes its place (*AHw* 127a, 138b, 614, 615f.).

The relationship between *bar/bʿrāʿ* (*brt*), which replaces the sg. *bēn* in the Aram. realm, and \**bin* has not yet been fully explained. Cf. R. Ružička, *Konsonantische Dissimilation in den semitischen Sprachen* (1909), 68f.; contra BLA 179; Wagner no. 46; HAL 131b.

II. With around 5,000 occurrences, *bēn* is easily the most frequent substantive in the OT. Concentrations in Gen, Num, and the Chr history may be explained, first of all, on the basis of the genealogies.

PNs compounded with *ben-*, *bin-*, *bat-* and the expression *bat hayya*<sup>c</sup>*nâ*/*b*<sup>c</sup>*nôt ya*<sup>c</sup>*nâ* “ostrich” are not included in the figures above, although *b*<sup>c</sup>*n* in *rabbat b*<sup>c</sup>*nê-ammôn* and *b*<sup>c</sup>*ēn/ben-* in 1 Chron 4:20a; 7:35; 15:18 (probably a textual error, not a component of a PN) are included; 1 Chron 6:11 K is counted as a sg., 2 Chron 11:18 K is omitted (Q *bat*). Lis. overlooks *b*<sup>c</sup>*ēn* in 2 Kgs 1:17b.\*

*bar* “son” occurs in Bibl. Aram. 19x (sg. 8x, Dan and Ezra 4x each; pl. 11x, Dan 4x, Ezra 7x). *bar* appears (3x) as an Aramaism in Prov 31:2 (cf. Wagner no. 46).

III. 1. In its basic meaning *b*<sup>c</sup>*ēn* means “son,” indeed, as a rule, “the biological son of his father or mother.” This relationship delineates a primary natural word field within the family.

Usually the family relationship is expressed in the sg. with a following gen. (“son of X,” esp. frequent in the various genealogies) or through a possessive suf. (cf. e.g., the stereotypical usage in the Dtr framework, “his son X ruled in his stead,” 1 Kgs 14:20, 31, etc.). Frequently, however, the terms → *ʔāb* “father” (e.g., Gen 22:7; 42:32; 2 Sam 7:14 = 1 Chron 17:13; pl. Exod 20:5; Num 14:18, etc.) and → *ʔēm* “mother” (Gen 27:13; 43:29; Hos 10:14, etc.) occur in the immediate context; the mother can also be

further described (Judg 11:1, son of a whore; 1 Kgs 7:14, son of a widow; Gen 25:6, sons of the concubines, Judg 8:31 sg.; Gen 21:10, 13 and Exod 23:12, son of a servant) or simply be described as → *ʾiššā* “woman” (1 Sam 1:4; 1 Kgs 17:17).

A second, though less frequent word field is also naturally established: *bēn* as the male descendant corresponds to the female *bat* “daughter,” usually in nominal series in the pl. (Gen 5:4ff.; 11:11ff., etc.; in parallelismus membrorum, e.g., in Isa 60:4).

Other nominal series associated with *bēn*: woman-children (Exod 4:20, etc.); sons-woman-daughters-in-law (Gen 6:18; 7:3, 13; 8:18; cf. 8:16); women-sons-daughters (Gen 36:6; Exod 32:2, etc.); son-daughter-male slave-female slave-cattle-foreigner (Exod 20:10; cf. Deut 5:14); children-grandchildren (Deut 4:9, 25, etc.); son-daughter-male slave-female slave-Levite (Deut 12:18; 14:11, 14, cf. 12:12); sheep-cattle-sons-daughters (Jer 3:24; cf. 5:17); other series: Josh 7:24; Exod 32:29; 2 Sam 19:6; Jer 16:3.

In the meaning “son,” *yeled* occasionally occurs as a synonym for *bēn* (Exod 2:10; 1 Kgs 3:25; Ruth 4:16; in parallelism, Jer 31:20). *yeled* is considerably less frequent, however, and in the meaning “child” also much less specific than *bēn*. The term *ṭap* parallels *bēn* in Deut 1:39, certainly a reference to a small child or infant. Additional parallel terms are *ʾûl* “infant” (Isa 49:15) and *p<sup>er</sup>î-beṭen* “fruit of the womb” (Jer 13:18; Psa 127:3); on *b<sup>e</sup>kôr* “firstborn” → *rōʾš* (*riʾšôn*).

The following verbs appear regularly in the word field of *bēn*: (a) *yld* qal of a woman or the mother: “she bore a son” (often in conjunction with the preceding verb *hrh* “to be pregnant”): Gen 4:25; 16:15; 19:37f.; 21:2; 29:32; 1 Sam 1:20; Hos 1:3, etc.; in the promise of a son: Gen 16:11; Judg 13:3; Isa 7:14 (cf. P. Humbert, “Der biblische Verkündigungsstil und seine vermutliche Herkunft,” *AfO* 10 [1935]: 77–80); *yld* hi. of the father: “he begot sons and daughters” (Gen 5:4ff.; 11:11ff.; cf. Deut 28:41, etc.); *yld* pu. of the father: “a son was born to him” (Gen 4:26; cf. 10:25; 35:26, etc.); (b) *lqh ʾiššā l<sup>b</sup>bēn* “to take a wife for the son” (Gen 24:3ff.; cf. Jer 29:6, etc.); (c) *ntn l<sup>b</sup>bēn* “to give (as wife) to the son” (Gen 38:26; cf. Deut 7:3; Judg 3:6, etc.); (d) *lō<sup>2</sup>-hāyû lô bānîm* “he had no sons” (Josh 17:3; cf. Num 3:4; Deut 25:5; 1 Chron 23:17, etc.); (e) a series of verbs describing the transmission of particular traditions from the fathers to the children: *ʾmr* “to say” (Exod 12:26; Deut 6:21); *šʾl* “to ask” (Exod 13:14; Deut 6:20; Josh 4:6, 21); *ngd* hi. “to announce” (Exod 13:8); *ydc* hi. “to make known” (Josh 4:22; Psa 78:5); *lmd* pi. “to teach” (Deut 4:10); *šnn* pi. “to inculcate” (Deut 6:7); *spr* pi. “to narrate” (Joel 1:3; Psa 78:6).

*bēn* quite frequently describes animal offspring. Thus *bēn* in Lev 22:28 means the young of a cow or sheep, in Deut 22:6f. a young bird, in Gen 32:16 a camel foal, in 1 Sam 6:7, 10 calves, and in Job 39:4 a young hind. Still more frequent are phrases with *bēn* to describe young animals,

e.g., *ben-ʾātôn* “donkey foal” (Gen 49:11; Zech 9:9), *ben-bāqār* “young cow” (Gen 18:7f.; Lev 4:3, 14; Num 7:15–81, etc.); *b<sup>ē</sup>nē(hay)yônâ* “young doves” (Lev 1:14; 5:7, 11; 14:30, etc.); additional phrases, e.g., in Psa 114:4, 6; 147:9. Such a phrase also occurs once with reference to plants: *bēn pōrāt* “young fruit tree” (Gen 49:22).

2. The term is occasionally expanded, on the one hand, to indicate children, grandchildren, descendants; and on the other, in the direction of nonbiological sonship.

(a) The pl. of the word may not always be translated “sons” (in contrast to the “daughters”); rather it sometimes means “children” (sons *and* daughters), e.g., Gen 3:16 “in pain you shall bear children” (2 Kgs 19:3, also of the yet unborn), and, above all, in the usage “children and children’s children” (Exod 34:7, etc.). Occasionally *bēn* describes the “grandchild” (beside the more common phrase *ben-b<sup>ē</sup>nô*; see 3c), Gen 31:28, 43; 32:1, or even more generally, the descendants (beside the phrase *b<sup>ē</sup>nē bāneykâ* “your children’s children,” e.g., Gen 45:10, and the more common phrase *b<sup>ē</sup>nē bānîm*, Exod 34:7; Deut 4:25; Judg 12:14, etc.), for instance, 1 Kgs 9:21.

(b) One may distinguish the following spheres of reference for the OT usage of *bēn* in a nonbiological sense:

The address *b<sup>ē</sup>nî* “my son” is formulaic; it occurs occasionally in the historical books (Josh 7:19, Joshua to Achan; 1 Sam 3:6, 16, Eli to Samuel; 4:16, Eli to the messenger).

One could ask whether the address “my son” in the wisdom literature (Prov 1:10, 15; 2:1; 3:1, 11, 21, etc.) refers to an intellectual sonship, i.e., a teacher-student or master-disciple relationship. If it is true that such instructions and proverb traditions were transmitted not only at royal courts but also in the clan (cf. H. W. Wolff, *Amos the Prophet* [1973]; with additional bibliog.), however, the *bēn* addressed here may be easily understood as the biological son of his father, at least as a clan member (Prov 1:8 suggests this meaning).

The *b<sup>ē</sup>nē hann<sup>ē</sup>bîʾîm* “sons of the prophets” discussed in the Elijah and Elisha narratives (1 Kgs 20:35; 2 Kgs 2:3, 5, 7; 4:1, 38; 5:22; 6:1; 9:1) are not biological but spiritual sons of the prophets in the sense of disciples (→ ʾāb III/2b). Cf. also 2 Kgs 8:9 (Benhadad to Elisha), but also the political usage in the submission formula of King Ahaz to Tiglath-pileser, “I am your slave and your son” (2 Kgs 16:7).

Finally, the group of occurrences that describe a person as “son of Yahweh” belongs in this category (see IV/3).

The meaning of the term has been greatly expanded to describe the inhabitants of a city as “sons” (e.g., Isa 51:18, 20; 66:8; Psa 147:13; Lam

1:16); Jerusalem is figuratively compared with a mother who has borne her children (inhabitants).

3. The term *bēn* is readily combined with other words:

(a) *bēn* in the pl. cs. is combined most frequently with a following ethnic name to indicate members of this people. The expression *b<sup>e</sup>nē yīsrāʿēl* (about 630x) should be mentioned first; in addition to the rarer *יִשְׂרָאֵל yīsrāʿēl* (50x) or *ʾanšē yīsrāʿēl* (9x), it is *the* expression that refers to the “Israelites”; a distinction in meaning between the three expressions is difficult to determine.

Similar phrases, such as *b<sup>e</sup>nē y<sup>e</sup>hūdā* “Judeans,” *b<sup>e</sup>nē ʿammôn* “Ammonites,” etc., and designations for tribal members such as *b<sup>e</sup>nē lēwī* “Levites,” correspond to these ethnic terms. More general phrases, such as *b<sup>e</sup>nē ʿam* “compatriot” (Gen 23:11; Lev 20:17, etc.; in contrast to *b<sup>e</sup>nē hāʿām* “common people” in 2 Kgs 23:6; Jer 26:23) and *b<sup>e</sup>n qedem* “easterners” (Gen 29:1; Judg 8:10, etc.), also belong in this category.

(b) *ben . . . šānā* (lit. “a son of . . . years”; Gen 5:32; Num 1:3–47; 7:15–88, etc.) serves as a common expression of age.

(c) In order to specify degrees of relationship, *bēn* is occasionally combined with other terms of relationship:

*ben-ʾimmō* “son of his mother” = “brother” (Gen 43:29, par. to → *ʾāh*; cf. 27:29); *b<sup>e</sup>nē ʾābīkā* “sons of your father” = “brothers” (Gen 49:8, par. to *ʾaḥeykā* “your brothers”); *b<sup>e</sup>nē ʾiś-ʾeḥād* “sons of one man” = “brothers” (Gen 42:13; cf. v 32).

The daughter-in-law is the “son’s wife” (Lev 18:15); the granddaughter, the “son’s/ daughter’s daughter” (Lev 18:10, 17); the nephew, the “brother’s/sister’s son” (Gen 12:5; 14:12; 29:13); the cousin, the “uncle’s son” (Lev 25:49; Num 36:11); and, correspondingly, descendants are the “children’s children” (Gen 45:10; Exod 34:7, etc.).

(d) Only the most important of the remaining phrases with *bēn* preceding a gen. will be mentioned:

*ben-ʾādām* or the pl. *b<sup>e</sup>nē ʾādām* often indicates the individual (sg. 93x in Ezek; Num 23:19; Isa 51:12, etc.; pl. with art., Gen 11:5; without art., Deut 32:8, etc.; → *ʾādām* 3). *ʾnōš* (Isa 51:12; 56:2; Psa 8:5; 90:3; Job 25:6), *ʾiś* (Isa 52:14; Mic 5:6; Psa 80:18; Job 35:8; Prov 8:4), and *geber* (Job 16:21) par. *ben-ʾādām*.

*ben-hammelek* is the “king’s son, prince” (Judg 8:18; 2 Sam 9:11; 13:4, 23, 32). Otherwise phrases with *bēn* readily form adjs., e.g., *ben-šāmen* “fat” (Isa 5:1), *bēn maškīl* “clever” (Prov 10:5), *ben-māwet* “mortally doomed” (1 Sam 20:31; 26:16; 2 Sam 12:5), *b<sup>e</sup>nē ʿawlā* “wicked” (2 Sam 3:34; 7:10 = 1 Chron 17:9, etc.), *b<sup>e</sup>nē ḥayil* “wealthy, landowners subject to military service, combatants” (Deut 3:18; Judg 18:2, etc.), *b<sup>e</sup>nē b<sup>e</sup>ʾīyaʿal* “worthless fellows” (Deut 13:14; Judg 19:22; 20:13, etc.), *b<sup>e</sup>nē nēkār* “foreigners”

(Exod 12:43; Lev 22:25; 2 Sam 22:45f., etc.).

Phrases such as *bēn zākār* “boy” (Jer 20:15; cf., however, the idiom in the Aram. marriage contract, Cowley no. 15.20: *wbr dkr wṇqbh* “be it a male or female child”) or *b<sup>e</sup>nē ʾiš* “men” (Psa 4:3) indicate the degree to which the term *bēn* could be distanced from its basic meaning and could become an individuating expression in collectives and a simple filler. GVG 2:242; J. Zobel, *Der bildliche Gebrauch der Verwandtschaftsname im Hebr.* (1932), 25–35; and WUS no. 534 (*bn* 2) offer examples from the related Sem. languages of the meaning “belonging to something.”

4. The rare PNs composed with *bēn* as the first element should be seen in the context of ancient Near Eastern onomastics (cf. Huffmon 120f., 175f.; Gröndahl 80, 118f.; A. Caquot, *Syria* 39 [1962]: 239f.; on *binyāmîn* cf. K.-D. Schunck, *Benjamin* [1963], 4ff.; also: Alt, *KS* [1959], 3:198–213).

On theophoric names such as *ben-hadad*, not attested among the Israelites, cf. O. Eissfeldt, FS Baetke 110–17. The Eg. etymology of the name Moses (short form of a theophoric name with *mś* “child”; cf. H. Ranke, *Die äg. Personennamen* [1935], 1:338, 340) is no longer held.

IV. 1. One of the oldest narrative motifs in the patriarchal history is the narrative of the promise of a son and its fulfillment. In response to the complaint of the childless woman, God (or his messenger) promises her a son, e.g., Gen 18:10, 14, “in one year your wife Sarah will have a son”; cf. Gen 16:11; 17:16, 19; 21:2, etc. (C. Westermann, *Promises to the Fathers* [1980], 12ff.). This motif occurs throughout the entire OT (Judg 13:3, 5, 7; 1 Sam 1:20; Isa 7:14; 54:1) and on into the NT (Luke 1–2).

A related significant theological motif in the Gen patriarchal narratives is the transmission of the blessing through the father to his son. Gen 27 preserves the procedure most clearly, climaxing in the pronouncement of blessing in vv 27–29; cf. e.g., Gen 9:25–27; 48:15f.; 49. These texts are significant because they offer a glimpse into an intrafamilial phenomenon between father and son.

The transmission of tradition also originally transpired between father and son in the family. The son questions the significance of an action or an object, the father relates what he has heard himself (see II/1).

2. (a) Sons receive from their fathers not only the blessing; they must also bear their fathers’ guilt and they are held responsible for it: Yahweh “visits the guilt of the fathers on the children and children’s children to the third and fourth generation” (Exod 20:5; 34:7; Num 14:18; Deut 5:9; cf. Isa 14:21; Jer 32:18; → *ʾāb* IV/2b). This collective responsibility is breached in later times (Jer 31:29; Ezek 18:2, 4, 20; 2 Kgs 14:6 = 2 Chron 25:4; cf. J. Scharbert, *Solidarität in Segen und Fluch im AT und in seiner Umwelt* 1

[1958]; R. Knierim, *Die Hauptbegriffe für Sünde im AT* [1965], 204–7).

(b) The prophetic accusation refers directly to the sons' guilt: children who have forsaken Yahweh (Jer 5:7), children of harlotry (Hos 2:6), and rebellious sons (Ezek 20:21). Guilt binds children, fathers, and wives as a family (Jer 7:18); it manifests itself in the fact that the guilty sacrifice their own sons and daughters to other gods (Hos 9:13; Jer 7:31; 19:5, etc.; cf. Deut 12:31; Psa 106:37f.).

As a result, the announcement of judgment recurs in various prophets in similar phraseology: the fathers together with the sons will stumble (Jer 6:21) and will be smashed (Jer 13:14); sons and daughters will die (Jer 11:22); women and children will be led away (Jer 38:23), etc. Only on the other side of the catastrophe does a voice sound again that speaks of the return of the children (Isa 49:22).

(c) In this context the prophets' actual children and their names are interesting. Thus the names of the two sons (and the daughter) of Hosea already contain a clear pronouncement of judgment: Hos 1:3f. "Jezreel" ("for in a short time I will avenge Jezreel's blood on the house of Jehu"); 1:6 "Not-pitied"; 1:9 "Not-my-people." The same is true of the names of Isaiah's sons: Isa 7:3 Shear-jashub ("a remnant returns") and 8:3 Maher-shalal-hash-baz ("spoil speeds-prey hastens"). The name of Isaiah's first son simultaneously announces judgment (for the majority) and salvation (for the remnant); the same is true of the son announced in Isa 7:14 named "Immanuel" ("God with us"), although it is disputed in this case whether reference is made to a biological son of Isaiah (cf. H. W. Wolff, *Immanuel* [1959]; J. J. Stamm, *TZ* 16 [1960]: 439–55; id., *ZDMG* Suppl. 1 [1969]: 281–90); cf. also Isa 9:5 on the promise of the son.

That Jeremiah is not permitted to have biological sons and daughters is also a sign of the coming judgment (Jer 16:2).

(d) The address of the prophet as *ben-ʾādām*, 93x in Ezek, should be translated "you individual" (Zimmerli, *Ezek*, Herm, 1:131). At any rate, the "son of man" here is not yet a heavenly being of some sort. The expression *ben-ʾādām* in this period still parallels the terms *ʾnôš* and *ʾîš* (see III/3d), *ʾādām* is the person in distinction from God. Num 23:19 is characteristic: "God (*ʾēl*) is not a man (*ʾîš*) that he should lie, nor a son of man (*ben-ʾādām*) that he should repent."

On the figure of the one "like a man" (*k<sup>c</sup>bar ʾnāš*) in Dan 7:13 and of the associated "son of man," a term now distinct from other OT usages, cf. comms. and C. Colpe, "ὁ υἱὸς τοῦ ἀνθρώπου," *TDNT* 8:400–477.

3. The characterization of a person as "son of God" or of a group as "sons of God" occurs rarely in the OT in contrast to other religions.

(a) A few passages regard the Davidic king as a son of Yahweh: 2 Sam 7:14, “I will be his father and he will be my son”; cf. 1 Chron 17:13; 22:10; 28:6; also Psa 2:7, “You are my son, today I have begotten you.” In contrast to the old Eg. royal ideology, which represents the current pharaoh as god’s son in the physical and mythical sense, the OT offers merely an adoption concept. The conferral of divine sonship implies the special rights and responsibilities of the king (cf. G. von Rad, “Royal Ritual in Judah,” *PHOE* 222–31; M. Noth, “God, King, and Nation in the OT,” *Laws in the Pentateuch and Other Studies* [1966], 145–78, esp. 171ff.; Kraus, *Psa*, CC, 1:130f.; G. Cooke, “Israelite King as Son of God,” *ZAW* 73 [1961]: 202–25; K.-H. Bernhardt, *Das Problem der altorientalischen Königsideologie im AT* [1961], 74ff., 84ff.).

(b) In a few passages the son concept describes the relationship of Yahweh to his people Israel. Hos 2:1 and 11:1 are probably the earliest instances. Again, these texts do not envision a physical sonship, nor likely a spiritual one (wisdom tradition?), notions common in Israel’s environment. When Hosea calls Israel “God’s sons” (in contrast to the apostate “children of harlotry”), he means “an intimate relationship of care, guidance, and obedience” (Wolff, *Hos*, Herm, 27, 197f.). A later addition to the JE narrative in the Pentateuch, Exod 4:22f., characterizes Israel as Yahweh’s “firstborn son,” thus foreshadowing the last plague by which Yahweh will avenge the evil committed against his son on “Pharaoh’s firstborn son” (v 23; cf. Noth, *Exod*, OTL, 47).

The notion of rearing is prominent (as in Hos 11:1) in the discussion in Isa 1:2 of Israel as “sons” whom Yahweh has reared but who are fallen away from him again (cf. H. Wildberger, *Isa 1–12*, CC, 12f.). Deut 14:1; 32:5, 19f. discuss the “sons of Yahweh” in a similar metaphor (cf. P. Winter, *ZAW* 67 [1955]: 40–48); Jer 3:14, 19, 22; Isa 43:6; 45:11 (→ *ʾāb* IV/3; G. Quell, *TDNT* 5:971ff.).

(c) Heavenly beings, discussed occasionally, are characterized as *b<sup>ē</sup>nē-hā<sup>ʾ</sup>ʾlōhîm* “sons of God” (Gen 6:2, 4; Job 1:6; 2:1; 38:7), *b<sup>ē</sup>nē ʾēlîm* (Psa 29:1; 89:7), *b<sup>ē</sup>nē ʿelyôn* “sons of the Most High” (Psa 82:6), Aram. *bar ʾlāhîn* (Dan 3:25). “The *bēn* (‘son’) describes them, however, as sons of God, not in the physical, genealogical sense, i.e., mythologically, but generally as belonging to the world of the Elohim” (von Rad, *Gen*, OTL [1972], 114). The significance and the function of these figures is limited in the OT. Cf. W. Herrmann, “Die Göttersöhne,” *ZRGG* 12 (1960): 242–51; G. Cooke, “Sons of (the) God(s),” *ZAW* 76 (1964): 22–47.

(d) Finally, a few post-exilic passages that compare Yahweh’s activity with people with that of a father toward his son should also be mentioned: as a father carries his child (Deut 1:31), reproves his son (Deut 8:5; Prov 3:12), shows mercy to his children (Psa 103:13) or his son (Mal 3:17), so

also Yahweh behaves toward his (cf. Mal 1:6).

V. The term *huios* in the NT reflects the OT *bēn*. Discussion of Jesus as the “son” (cf. the christological titles “son of man,” “son of David,” and “son of God”) gives the term an entirely new accent in the NT. Cf. H. E. Tödt, *Son of Man in the Synoptic Tradition* (1965); F. Hahn, *Titles of Jesus in Christology* (1969); P. Wülfing von Martitz et al., “υἱός,” *TDNT* 8: 334–99; C. Colpe, “ὁ υἱὸς τοῦ ἀνθρώπου,” *TDNT* 8:400–477; E. Lohse, “υἱὸς Δαυίδ,” *TDNT* 8:478–88.

J. Kühlewein

## בנה *bnh* to build

S 1129; BDB 124a; *HALOT* 1:139a; *TDOT* 2:166–81; *TWOT* 255; *NIDOTTE* 1215

1. The root \**bny* “to build” occurs in all Sem. languages except Eth. (Akk. *banû* and Ug. *bny* also in the meaning “to create, beget”; see 3a).

A close relationship between *bēn* “son” and *bnh*, although possible, remains uncertain; the same is true of an etymological relationship between *bnh* and *brʾ* “to create” (cf. *HAL* 133).

*binyâ*, *binyān*, *mibneh* “building,” and *tabnît* “building plan, model, image” occur in the OT as nominal derivatives; PNs such as *b<sup>c</sup>nāyâ*, *b<sup>c</sup>nāyāhû*, *binnûy*, *yabn<sup>c</sup>ēl*, *yibneyâ*, etc., also derive from the root.

2. In the Hebr. OT the verb occurs 346x in the qal (incl. Ezek 16:31) and 30x in the ni. Although otherwise normally distributed, half of all occurrences of the qal are concentrated in those books that record the construction of the temple or the walls (63x in 1 Kgs, 61x in 2 Chron, 28x in 1 Chron, 23x in Neh).

Of the substantives, *tabnît* is attested 20x, the three others, all limited to Ezek 40–42, 9x (*binyān* 7x).

In Bibl. Aram. the pe. occurs 15x, the hitpe. 7x, in addition to *binyān* 1x.

3. (a) The basic meaning is “to build, erect,” occasionally “to fortify” and “to rebuild” (so also in NWSem. inscriptions; see *DISO* 38). Objects are: house, palace, wall, city, altar, temple, etc. A meaning “to create, beget” in Hebr. may not easily be demonstrated, in contrast to Akk. and

Ug., if one does not wish to assume them in PNs such as *b<sup>c</sup>nāyāh(û)*.

In Ugaritic there occurs the EI epithet *bnh bnwt*, which is translated “creator of the creation” (cf. W. H. Schmidt, *Königtum Gottes in Ugarit und Israel* [19662], 59). On the Akk., see *AHw* 103.

(b) *bnh bayit* means metaphorically “to found a family, beget descendants” (Deut 25:9; cf. Ruth 4:11), “to found a dynasty” (2 Sam 7:27; 1 Chron 17:25). In Gen 16:2 and 30:3, *bnh ni*. “to be built” is an idiom for “to obtain children.” Here too the starting point is the basic meaning, and no independent secondary meaning is present.

If the text of Job 22:23 is in order, one must also assume a fig. meaning (cf. *UHP* 53).

(c) The following parallels to the other meanings of *bnh* may be noted: *kûn hi*. “to establish” (2 Sam 7:13 = 1 Chron 17:12; Psa 89:3, 5); *nt<sup>c</sup>* “to plant” (Jer 1:10; 31:28; 45:4, etc.); *śh* “to make” (cf. 2 Sam 7:11, 27). *hrs* “to tear down” serves as an antonym, e.g., Jer 1:10; 45:4; Psa 28:5; Job 12:14; Prov 14:1.

4. (a) Theologically significant are, first of all, passages that discuss Yahweh’s building. These passages deal with promises of future salvation: 2 Sam 7:27; 1 Chron 17:10, 25 (David’s house; cf. 2 Sam 7:11; Psa 89:5); 1 Kgs 11:38 (Jeroboam’s house); Amos 9:11 (the rebuilding of David’s booth); Jer 24:6; 31:4, 28; 33:7; 42:10 (Dtr influence, often with the par. *nt<sup>c</sup>* “to plant,” of the reconstruction after judgment); Ezek 28:26; 36:33–36 (addition with an echo of Jer diction; cf. Zimmerli, *Ezek*, Herm, 2:100, 245, 251n.30); Psa 102:17; 147:2 (Zion or Jerusalem; similarly in the request in Psa 51:20; in retrospect, 78:69).

The concept occurs in a negative sense in the announcement of judgment in Jer 45:4 (tearing down that which is built); Mal 1:4 (Edom).

(b) Additional salvation sayings are Isa 58:12; 60:10; 61:4; 65:21f., of the rebuilding after the exilic crisis as a realization of Yahweh’s blessing (cf. also Jer 29:5, the task of the exiles). Jeremiah is called as a prophet “to pluck out, to destroy, to plant, and to build up,” i.e., to be active as a prophet of doom and salvation (Jer 1:10). Concerning the pairs of terms used here and elsewhere, cf. R. Bach, “Bauen und Pflanzen,” FS von Rad 7–32; S. Herrmann, *Die prophetischen Heilserwartungen im AT* (1965), 165–69.

(c) The usage of this verb in the context of salvation history can be traced to the notion that “building houses and living in them” should be considered a blessing; it is an expression of good fortune and full

enjoyment of the gifts of the settled land given the people by God, a concept esp. encountered in Deut (Deut 6:10f.; 8:12; 20:5; the contrary in 28:30).

5. Of the Qumran texts, 1QS 11:8 (*mabnît qōdeš* “holy building” as a description of God’s chosen) merits particular attention. On the NT, cf. O. Michel, “οἰκοδομέω,” *TDNT* 5:137ff.

A. R. Hulst

## בַּעַל *baʿal* owner

S 1167; BDB 127a; *HALOT* 1:142b; *TDOT* 2:181–200; *TWOT* 262a; *NIDOTTE* 1251

1. The word \**baʿl*- “lord, owner,” like its fem. equivalent, is common Sem. The transition from appellative to proper name of one or more deities is religiohistorically significant; in other usages the extensive limitation to a purely modal function (“a formal term,” *GVG* 2:240f.) should be noted. The related verb is often only a denominative.

Akk. *bēlu/bēltu* “lord/lady” (*AHw* 118–20) is thus the base for *bīlu* “to rule, control” (cf. *beʿūlātum* “discretionary or operational capital” *AHw* 124a; *baʿūlātu* “the subordinates” *AHw* 117b). Akk. *bēlu* also includes Hebr. → *ʿādôn* in its range of meaning. On the divine names Bēl (for Enlil and Marduk) and Bēlet (for Ninlil and Sarpānītu), cf. Haussig 1:46; *AHw* 118; *bēl* occurs in the OT in Isa 46:1; Jer 50:2; 51:44. Of the numerous expressions composed with *bēl*, the following may be mentioned: *bēl pī/āḥāti* “representative, commissioner” (*AHw* 120a), giving rise to Aram. and Hebr. *peḥâ* “governor” (Alt, *KS* [19643], 2:333; KBL 757b, 1112a; E. Y. Kutscher, *Tarbiz* 30 [1960/61]: 112–19), and *bēl tēmî*; cf. Aram. *b<sup>e</sup>el t<sup>e</sup>em* as an official designation (Ezra 4:8f., 17; Cowley no. 26.23; KBL 1079b; Driver, *AD* 18).\*

The preponderance of NWSem. instances (Ug.: *WUS* nos. 544f.; *UT* no. 493; Gröndahl 114–17; cf. also *DISO* 40; *HAL* 137f.; *LS* 83f.) are of the appellative “lord, owner” (limited in range of meaning by → *ʿādôn* and *mārēʿ* “lord, ruler”) and of the various divine names (see 4a). Of great significance here, too, is the usage of the word as a designation for the husband in relation to his wife (Aram., e.g., in the marital contract, Cowley no. 15.23). The verb here has often assumed the meaning “to marry” (cf. e.g., R. Yaron, *JSS* 3 [1958]: 26f.); in contrast, Ug. *bʿl* “to make, work, manufacture” (*WUS* no. 546; *UT* no. 494) should be regarded as a by-form of the root → *pʿl* “to make” (*bʿl* may also occur in this meaning in the OT: on Isa 54:5, cf. *UT* no. 494; *HAL* 136f.; as well as in Isa 1:31; Job 31:39; Prov 1:19; 3:27; Eccl 8:8; cf. M. Dahood, *Bib* 46 [1965]: 320; contrast, however, *CPT* 100f.).\*

2. The appellative *ba<sup>ʿ</sup>al* “owner” occurs 84x in the Hebr. OT (Judg 19x, Exod and Prov 14x, Eccl 7x), the fem. *ba<sup>ʿ</sup>alâ* 4x; in addition *b<sup>ʿ</sup>ēl* occurs 3x in Aram. (Ezra 4:8f., 17).

The meaning “husband” occurs 15x (except for Esth 1:17, 20, always sg.).

*ba<sup>ʿ</sup>al* appears 36x in the sg. and 48x in the pl., although the 18 pl. forms with the 3d sg. suf. all have a sg. meaning (“his/their lord” as a so-called pl. of majesty: Exod 21:29[bis], 34, 36; 22:10f., 13f.; Isa 1:3; Job 31:39; Prov 1:19; 3:27; 16:22; 17:8; Eccl 5:10, 12; 7:12; 8:8).

*ba<sup>ʿ</sup>al* occurs as a divine designation or a divine name in the sg. 58x (2 Kgs 24x, 1 Kgs 12x, Jer 11x, Judg 6x, Hos and 2 Chron 2x, Zeph 1x); see also the phrases *ba<sup>ʿ</sup>alb<sup>ʿ</sup>rît* (Judg 8:33; 9:4), *ba<sup>ʿ</sup>alz<sup>ʿ</sup>bûb* (2 Kgs 1:2f., 6, 16), and *ba<sup>ʿ</sup>alp<sup>ʿ</sup>ôr* (Num 25:3, 5; Deut 4:3[bis]; Hos 9:10; Psa 106:28); the abundant place-names formed with *ba<sup>ʿ</sup>al/ba<sup>ʿ</sup>alâ* (the classification of Num 22:41 and Hos 9:10 is disputed) and PNs are left aside here. The pl. *b<sup>ʿ</sup>ālîm* occurs 18x (see 4a).

The verb occurs 10x in qal and 2x in ni.; the fem. pass. ptcp. *b<sup>ʿ</sup>ûlâ* “married” occurs an additional 4x.

3. (a) In its basic meaning “owner (of a thing),” the semantic field of the term exhibits no consistent par. or related terms.

A ptcp. of → *qnh* “to acquire” parallels *ba<sup>ʿ</sup>al* once (Isa 1:3). The term *ʾādôn*, which can be translated “owner” only in 1 Kgs 16:24, describes more a relationship of dominion than of ownership: e.g., Joseph is *ʾādôn* “ruler” over Egypt and its inhabitants, without being owner of the land (Gen 42:30, 33; → *ʾādôn* III/1).

*ba<sup>ʿ</sup>al* (as well as *ba<sup>ʿ</sup>alâ*) is never used absolutely (except in the expression *b<sup>ʿ</sup>ūlat ba<sup>ʿ</sup>al*, see 3b), but always with an accompanying gen. or pron. suf. The gens. dependent upon *ba<sup>ʿ</sup>al* vary widely according to context; in the 13 instances in the Covenant Code alone *ba<sup>ʿ</sup>al* is the owner of a woman (Exod 21:3, 22), a domestic animal (21:34; 22:10f., 13f.; cf. Isa 1:3), esp. of an ox (21:28, 29[bis], 36), a house (22:7; cf. Judg 19:22f.), or a cistern (21:34).

(b) In 15 of the 84 occurrences mentioned, *ba<sup>ʿ</sup>al* should be understood as the “owner” of a woman, i.e., as “husband”; passages with this meaning are spread over the entire OT (Gen 20:3; Exod 21:3, 22; Lev 21:4 txt em; Deut 22:22; 24:4; 2 Sam 11:26; Hos 2:18, fig.; Joel 1:8; Prov 12:4; 31:11, 23, 28; Esth 1:17, 20). → *ʾiššâ* “wife” occurs in the semantic field without exception as the complementary term (2x in the gen. construction *ba<sup>ʿ</sup>al (hā)ʾiššâ* “husband,” Exod 21:3, 22). *ʾiš* in the meaning

“husband” is more neutral than *ba<sup>al</sup>*, which connotes ownership (the term → *ʾādôn* used in the meaning “husband” expresses a different nuance of this dependent relationship: Gen 18:12, etc.). 2 Sam 11:26 indicates, however, the close relationship of the two terms: “when the wife of Uriah heard that her husband (*ʾiṣ*) was dead, she mourned her husband (*ba<sup>al</sup>*).”

The verb *bq*, in the qal “to marry (from the male perspective)” (with three exceptions: “to rule” in Isa 26:13; Jer 3:14; 31:32; 1 Chron 4:22 is disputed) and in the ni. “to be married” (Isa 62:4; Prov 30:23), also belongs here. The semantic field displays no consistent parallels. *bō<sup>ʾ</sup> ʿel* “to go into” (Deut 21:13), *hyh l<sup>e</sup> ʾiṣṣâ* “to become wife” (Deut 21:13), and *lqh ʾiṣṣâ* “to take a wife” (Deut 24:1) appear as pars. once each. Any of the following may be married, according to context: a woman (Deut 21:13; 24:1), a virgin (Isa 62:5), a daughter of a foreign god (Mal 2:11), a rejected woman (Prov 30:23) or, in the fig. sense, Israel in exile (Isa 54:4), the land (Isa 62:4), or Jerusalem (62:5); in each case in which a community is the obj., Yahweh is the subj. (see 4b).

Although the fem. nom. form *ba<sup>al</sup>lâ* always means “mistress” (1 Sam 28:7[bis], *ʾôb* “spirit of the dead”; 1 Kgs 17:17, a house; Nah 3:4, sorcery), the verb forms a pass. ptcp. *b<sup>e</sup> ʿûlâ* “married” (Gen 20:3 and Deut 22:22 in the set phrase *ʾiṣṣâ b<sup>e</sup> ʿûlat ba<sup>al</sup>* “a married woman with a husband”; Isa 54:1 and 62:4 refer fig. to the Israel of the exilic period or to the land, contrasting *b<sup>e</sup> ʿûlâ* “the married” and *šômēmâ* “the abandoned”).

(c) The pl. cs. followed by a city name indicates, closely dependent upon the basic meaning, the “land owners,” the “citizens” of a given city (cf. also Akk. *baʾûlu* as a synonym for *rubû* “prince,” *AHw* 117b). Of the total of 21 occurrences of this meaning, 16 are concentrated in Judg 9 alone (citizens of Shechem; in v 51, of the city; in vv 46f., occupants of the fortress of Shechem); the remaining occurrences are closely related: Josh 24:11, Jericho; Judg 20:5, Gibeah; 1 Sam 23:11f., Keilah; 2 Sam 21:12, Jabesh. In each case, the expression refers to the (mostly Can.) inhabitants of a city who trade and negotiate with outsiders independently, who, probably on the basis of their land ownership, occupy lofty positions in respect to the other “inhabitants” (*yôš<sup>e</sup> bîm*) or “men” (*ʾanašîm*; cf. J. A. Soggin, *Das Königtum in Israel* [1967], 23, with a reference to *KAI* no. 222A.4; cf. Fitzmyer, *Sef.* 28).

(d) Like *bēn* “son” and *ʾiṣ* “man,” *ba<sup>al</sup>* readily combines with other nouns in cs. relationships, describing the “owner” as bearer of a characteristic or as involved with a given thing or activity, e.g., *ba<sup>al</sup> haḥ<sup>al</sup>lōmôt* “owner of dreams = dreamer” (Gen 37:19); *ba<sup>al</sup> ʾap* “possessor of wrath = wrathful” (Prov 22:24, par. to *ʾiṣ ḥēmôt* “man of excitement = hot-tempered”; cf. 29:22, where *ʾiṣ ʾap* is par. to *ba<sup>al</sup> ḥēmâ*); *ba<sup>al</sup> haqq<sup>e</sup> rānayim* “owner of the two horns = double-horned” (Dan 8:6, 20). Cf. BrSynt 69 and

the extensive list of usages with *ba<sup>al</sup>* as a formal term in *HAL* 137.

4. (a) In the OT, *ba<sup>al</sup>* as a divine designation usually refers to the Can. rival of Yahweh.

In the Ug. pantheon, Baal is considered alongside El to be king of the gods (cf. W. H. Schmidt, *Königtum Gottes in Ugarit und Israel* [19662], 10–21, 29–54); he is worshiped as the god of fertility. When he dies, vanquished by the god of death, Mot, all nature withers; when he returns again to life, nature blossoms again (A. S. Kapelrud, *Baal in the Ras Shamra Texts* [1952]; Haussig 1:253–64).

With reference to the OT, O. Eissfeldt (*ZAW* 57 [1939]: 1–31 = *KS* [1963], 2:171–98) has broken with the formerly common concept that the Baals named there are a number of smaller, insignificant local deities. According to him, they are always forms of *one* god, namely Ba<sup>al</sup>šamēm, the “god of heaven,” or the weather god Hadad (cf. *RGG* 1:805f.).

The name *ba<sup>al</sup>* appears in three areas in the OT: (1) In the narrative books, it represents a deity always linked with a particular place and exercising a particular function there.

Several passages (see 2) mention *ba<sup>al</sup> p<sup>er</sup>ôr*, who was worshiped at a border sanctuary between Moab and Israel on the mountain *p<sup>er</sup>ôr* (Num 23:28) or at *bêt p<sup>er</sup>ôr*, about 12 miles east of the northern tip of the Dead Sea (O. Henke, *ZDPV* 75 [1959]: 155–63). *ba<sup>al</sup> b<sup>er</sup>ît* “covenant Baal” (Judg 8:33; 9:4; cf. 9:46) with a temple in Shechem, *ba<sup>al</sup> z<sup>eb</sup>ûb* (2 Kgs 1:2–16, designated expressly as the city god of Ekron; cf. *BHH* 1:175f.; F. C. Fensham, *ZAW* 79 [1967]: 361–64), as well as a few deities attested only in place-names such as Baal Zaphon (Exod 14:2, 9; Num 33:7; cf. O. Eissfeldt, *Baal Zaphon, Zeus Kasios und der Durchzug der Israeliten durchs Meer* [1932]; Haussig 1:256–58) and the Baal of Hermon (Judg 3:3; cf. 1 Chron 5:23) also deserve mention.

“The Baal” without complement describes the Baal of Ophrah (Judg 6:25–32), that of Carmel (1 Kgs 18:21ff.; cf. Alt, *KS* [19643], 2:135–49; O. Eissfeldt, “Der Gott Karmel,” *SDAW* [1953], 1; K. Galling, *FS Alt* 105–25), and the Tyrian god introduced to Samaria (1 Kgs 16:31f.; 18:19; 22:54; 2 Kgs 10:18–28, etc.; cf. Alt, *KS* [1959], 3:258–302). One may ask (contra Eissfeldt) whether these deities, sometimes widely separated geographically, should really be understood as manifestations of one Ba<sup>al</sup>šamēm, rather than as distinct deities.

(2) Of the 20 occurrences of the divine designation *ba<sup>al</sup>* within the prophetic corpus, 13 are in Jer (in a few passages in Dtr formulation), 6 in Hos (on Hos 2:18, see 4b below), and one in Zeph. Hosea and, following him, Jeremiah take up Elijah’s struggle against the Baal cult. Hosea uses the image of marriage in his attack on the Baal cult: the faithless wife (= Israel) turns aside from Yahweh and whores after her lovers (Hos 2:7ff.; on the pl. *b<sup>er</sup>âlîm* in 2:15, 19; 11:2, cf. Wolff, *Hos*, Herm, 38–40). The

judgment announced by Hosea consists in the fact that Yahweh will visit the “days of the Baals” (participation in the Can. cultic festivals) on this faithless wife (2:15); the day of salvation will come when Yahweh removes the “names of the Baals” (2:19). The apostasy to the Baal cult of which Hosea accuses Israel already had roots, according to this prophet, in the early period of Israel, as the historical retrospectives show (9:10; 11:2; 13:1).

In Jer, the accusation against those who turn to the Baal cult broadens: the prophets are accused of prophesying in the name of Baal (Jer 2:8; 23:13), of sacrificing the entire people to the Baals.

The following verbs express the prophetic accusation of apostasy to the Baals: *zḥ* “to sacrifice” (Hos 11:2), *qṭr* pi./hi. “to burn incense” (Hos 2:15; 11:2; Jer 7:9; 11:13, 17; 19:4f.; 32:29); *nzr* ni. “to dedicate oneself” (Hos 9:10); *šm* “to incur guilt” (Hos 13:1); *šb* ni. “to swear” (Jer 12:16), *bnh bāmôt* “to build high places” (Jer 19:5; 32:35). The nouns used in the semantic field as parallels also indicate something of the prophetic assessment of the Baals: *bōšet* “shame” (Hos 9:10); *šiqqûšîm* “horrors” (Jer 32:34); *ʾlōhîm ʾḥērîm* “other gods” (Jer 7:9; 19:4; cf. 11:13); *pʿsîlîm* “images” (Hos 11:2).

(3) The third area, which uses most of the pls. of the term, consists of the Dtr and Chr histories closely dependent upon Hos and Jer.

Typical expressions characterizing apostasy to the Baals are: *bd* “to serve” (Judg 2:11, 13; 3:7; 10:6, 10; 1 Kgs 16:31; 22:54; 2 Kgs 17:16); *hlk ʾaḥʾrê* “to follow after” (Deut 4:3; 1 Kgs 18:18; Jer 2:23; 9:13); *znḥ ʾaḥʾrê* “to whore after” (Judg 8:33).

Occasionally fem. counterparts appear alongside the Baals as additional Can. deities: the Ashtaroth (Judg 2:13; 10:6; 1 Sam 7:4; 12:10) and Asherahs (Judg 3:7; as well as the “hosts of heaven”: 2 Kgs 17:16; 21:3 = 2 Chron 33:3; 2 Kgs 23:4f.).

(b) One only rarely dared associate the root *bḳ* with Yahweh in the later periods.

The verb *bḳ* qal in the meaning “to rule” in Isa 26:13 expresses the people’s complaint about a time when Yahweh did not rule over the supplicants but other rulers did. In Jer 3:14 and 31:32 *bḳ* is constructed with *be*; the context suggests the translation “to be lord.” Yahweh, who speaks in the 1st person, is the subj. in each case. In Jer 3:14 the term occurs in the framework of a conditional announcement of salvation: as Lord, Yahweh is mighty enough to bring the “apostate sons” back to Zion. In Jer 31:32 Yahweh proves himself to be the Lord who punished those who had broken his covenant.

*baʿal* occurs in Nah 1:2 as a mere formal term: Yahweh is *baʿal ḥēmâ* “one full of wrath.” Isa 1:3 belongs conditionally in this context too; it

compares the behavior of a donkey toward his master's crib with the behavior of Israel toward Yahweh.

Yahweh is occasionally compared to a *ba<sup>ʿ</sup>al* "husband." In Hos 2:18 *ba<sup>ʿ</sup>alî* parallels *ʾišî*. "then you will say 'my husband' and you will no longer call 'my *ba<sup>ʿ</sup>al*.'" As Wolff (*Hos*, Herm, 49) suggests, this salvation oracle treats, on the one hand, the fact that Israel will no longer merely respect Yahweh as the legal husband (*ba<sup>ʿ</sup>al*) "in that day," but will love him as husband (*ʾiš*); at the same time, however, one must understand (in view of 2:19) that one who calls Yahweh *ba<sup>ʿ</sup>alî* does not clearly distinguish between Yahweh and the Can. Baal (yet cf. Rudolph, KAT 13/1, 78f.).

Behind the unit Isa 54:1–10 stands the lament of the childless woman (cf. Westermann, *Isa 40–66*, OTL, 269ff.), an image for exilic Israel. The salvation announced by Deutero-Isaiah consists in the fact that Yahweh becomes the husband of this abandoned woman (Isa 54:5).

Trito-Isaiah uses the concept of Yahweh's marriage to the people or to the land of Israel again in Isa 62:4f. The new names "my desire" and "married" (*b<sup>e</sup>ʿûlâ*) characterize the era of salvation and contrast with the old names "abandoned" and "alone" (cf. 54:1).

On the problem of PNs with the theophoric element *ba<sup>ʿ</sup>al* in the period of the judges and the earliest monarchy, cf. *IP* 119–22; Eichrodt 1:200–203.

5. The NT displays no single counterpart to the root *bq*. The LXX already translates *bq/ba<sup>ʿ</sup>al* with great variety, e.g., in Exod 21:28 ("owner") with *kyrios*, in Judg 9 ("citizen") with *andres*, in Deut 21:13; 24:1 ("to marry") with *synoikizein*; in 2 Sam 11:26 both *ʾiš* and *ba<sup>ʿ</sup>al* ("husband") are translated with *anēr*, while the name of the Can. deity Baal is merely transliterated. The divine name continues in the NT only in the name *Beezeboul* (Mark 3:22, etc.; cf. W. Foerster, "Βεεζεβούλ," *TDNT* 1:605f.; L. Gaston, "Beelzebul," *TZ* 18 [1962]: 247–55).

J. Kühlewein

בקש *bqš* pi. **to seek**

S 1245; BDB 134b; *HALOT* 1:152a; *TDOT* 2:229–41; *TWOT* 276; *NIDOTTE* 1335

1. The root *bqš* is attested only in Hebr., Ug. (*bqt*, cf. *UT* no. 505; *WUS* no. 572), and Phoen. (*DISO* 41).

In addition to the pi. and pu., Hebr. forms a verbal abstract *baqqāšâ* “longing, desire,” morphologically an Aram. pa. inf. (GKC §84e; BL 479).

According to C. Brockelmann (ZS 5 [1927]: 31f.), *bqš*, which arose from *bqr* “to examine,” also extant in Aram. (cf. Wagner no. 45), is a rhymed form patterned after the somewhat synonymous → *drš*, which often accompanies *bqš*, cf., however, Ug. *bqt* alongside *drš*.

2. *bqš* appears as a verb in the pi. 222x, in the pu. 3x, esp. frequent in Sam-Kgs (50x), Jer (22x, 1x, resp.), and Psa (27x). The verbal noun *baqqāšâ* occurs 8x, all in Esth except for Ezra 7:6.

3. The basic meaning of *bqš* pi. is the search for something lost or missed (cf. C. Westermann, “Die Begriffe für Fragen und Suchen im AT,” *KerD* 6 [1960]: 2–30, for *bqš* esp. 2–9). In perhaps half of all occurrences, the sense is “to search for someone or something (the location of which is unknown)”; cf. Lat. *quaerere*. Objs. are persons or animals (together about 50x) or things (around 60x), e.g., Gen 37:15f.; Josh 2:22; Judg 4:22; 1 Sam 9:3; 23:14; 26:2, 20; 1 Kgs 18:10. The obj. can also be undetermined or anonymous: “to seek out, select someone (from a crowd)” (e.g., 1 Sam 13:14; 16:16; 28:7; 1 Kgs 1:2f.; Isa 40:20; Ezek 22:30; Nah 3:11, to “seek” in vain). 1 Kgs 10:24 = 2 Chron 9:23 and Prov 29:26 speak of seeking the countenance (→ *pānîm*) of a person in the sense of a display of courtesy (see 4).

If the obj. is a quality or ideal and therefore the goal is not to locate but rather to fulfill a wish or to realize a plan, the verb acquires an emotional nuance: “to strive after something, be busy, be concerned,” e.g., Jer 2:33; 5:1 (faithfulness); Ezek 7:25 (peace); Zeph 2:3 (justice, humility); Psa 4:3 (lies); 27:4 (dwelling in the house of God); above all Prov 2:4; 11:27; 14:6; 15:14; 17:9, 11; 18:1, 15 (wisdom, or the like); likewise Eccl 7:25; Dan 8:15. It is noteworthy that the cognitive element is very understated. *bqš* pi. occurs only rarely in the sense of “to examine, investigate” (cf. → *drš*). Except for Judg 6:29, where it parallels the preceding *drš* and is indeed colored by it, only a few passages from the wisdom literature with “wisdom” as the obj. merit consideration (e.g., Prov 2:4, where, however, wisdom is personified; 18:15; Eccl 7:25; 8:17).

In the meaning “to be out for something, seek after” with similar ideal objects, *šhr* pi. (12x, with God as obj. in Isa 26:9; Hos 5:15; Psa 63:2; 78:34; Job 8:5) is largely synonymous with *bqš* pi. (cf. *HP* 222).

On the delimitation of the meanings of *bqš* pi. (obj.-oriented and resultative “to trace something, try to obtain”) and *drš* (activity-related “to be concerned for, ask after, be mindful of something”) cf. *HP* 248f., and → *drš* 3.

*ncpeš* appears as the obj. around 30x, “to seek someone’s life” and *rā‘ā* 9x, “to seek evil for someone.” *bqš* pi. is used only twice in the opposite expression “to seek someone’s well-being” (Psa 122:9 and Neh 2:10 with *ṭôb* or *ṭôbâ*). In contrast to *drš*, then, *bqš* pi. in this context refers primarily to malicious intent.

About 20x *bqš* pi. refers to an urgent search for a person, thus “to desire, require,” also on the basis of a legal claim (cf. Lat. *petere*), e.g., Gen 31:39; 43:9; Num 16:10; Josh 22:23; 1 Sam 20:16; with → *dām* “blood” as obj. in 2 Sam 4:11; Ezek 3:18, 20; 33:8.

*bqš* pi. is not used as a verb of motion, “to search for a place.”

In addition to nom. or pron. objs., an inf., with *le* 17x, without *le* 2x (Exod 4:24; Jer 26:21), appears occasionally.

*bḥ* “to seek” (pe.: Dan 2:13 “one seeks”?; 6:5; pa.: 4:33) and “to request” (9x) appears as a Bibl. Aram. equivalent. For Dan 2:13 the meaning “to be on the verge, be near to, run the risk” is also possible (KBL 1058b with bibliog.); cf. *ḥšb* pi. in Jonah 1:4 and *bqš* pi. in Gen 43:30 (HAL 146a, 347b).

Other related verbs worthy of mention are: *ḥpr* “to dig,” in Job 3:21 and 39:29 in the fig. meaning “to trace, seek,” in Deut 1:2 and Josh 2:2f. “to spy out (a land)” (HAL 327a; attributed to two roots in GB 250a); *ḥps* qal/pi. “to search through” (cf. HP 130f.); further *tūr* qal/hi. “to explore, research” (qal 19x, 14x in Num 10:33–15:39; hi. 3x).

4. In the 14 passages in which God searches, the usage conforms to profane usage: “to seek after a lost one” (Ezek 34:16; Psa 119:176; cf. Eccl 3:15), “to choose selectively” (1 Sam 13:14), “to seek, examine” (Ezek 22:30; Job 10:6), “to strive after” (Exod 4:24; Judg 14:4; Zech 12:9), “to require” (Josh 22:23; 1 Sam 20:16; Ezek 3:18, 20; 33:8).

More numerous and also more significant theologically are the passages in which God is sought (perhaps one-fourth of all occurrences). The expression “to seek God” only rarely indicates a one-time event (8x), with no unique theological nuance. *bqš* pi. is used in the sense of “to seek a revelation, an oracle” only in extraordinary cases (→ *drš* 4). The only clear case is Exod 33:7. Cultic roots are also evident in Hos 5:6 (of the vain seeking of sanctuaries) and 2 Chron 20:4. The usage “to seek the face of God” or the like (see 3) occurs in 2 Sam 21:1; Psa 24:6; 27:8; 105:4 = 1 Chron 16:11; 2 Chron 7:14.

A theologically fixed usage does occur in the 30 passages in which *bqš* pi. designates proper behavior before Yahweh, repentance and fear of God. “It intends a state rather than an act” (Westermann, op. cit. 5). *bqš* pi. can parallel *drš* synonymously in these cases (Deut 4:29; Jer 29:13; Zeph

1:6; Psa 105:3f. = 1 Chron 16:10f.; 2 Chron 20:3f.).

5. Kuhn (*Konk.* 35) lists 7 occurrences in Qumran literature (cf. *GCDS* 89). The usage conforms primarily to OT usage (3x with direct obj.: *nepeš, rūaḥ, bînâ*; 2x with *le* and inf.). 1QS 5:11, which employs *bqš* (together with *drš*) in the sense of “to search, study in (be) his (God’s) commandments,” has no exact counterpart in the OT.

In the LXX 17 different verbs occur as translations of *bqš* pi. Despite the variety of equivalents, a strong concentration on *zētein* (175x) and its compounds (*ekzētein* 25x) is recognizable.

On the NT, see H. Greeven, “ζητέω,” *TDNT* 2:892–96.

G. Gerleman

## ברא *brʾ* to create

S 1254; BDB 135a; *HALOT* 1:153b; *TDOT* 2:242–49; *TWOT* 278; *NIDOTTE* 1343

1. Of the many attempts to determine the etymology of the verb, the most likely is the frequently offered association of *brʾ* I “to create” (qal, ni., in addition to the verbal abstract *bʿrāʾā*) with *brʾ* III (pi.) “to cut down, clear (a forest)” (Josh 17:15, 18), “to cut in pieces” (Ezek 23:47).

*brʾ* occurs in a Pun. inscription (*CIS* 1:347.4) as a professional designation, perhaps in the sense of “sculptor” (*DISO* 43 posits “graveur”; cf. *NE* 244).

*brʾ* I/III could have arisen from a biradical root *br*, perhaps with the meaning “to cut, divide” (cf. also G. J. Botterweck, *Der Trilateralismus im Semitischen* [1952], 64f.); yet even this assumption remains questionable.

On the one hand, *brʾ* III pi. does not exhibit the same characteristics as *brʾ* I qal (exclusive subj.: God). On the other hand, the basic meaning “to cut,” etc., does not echo anywhere in the usage of *brʾ* qal/ni. The verb is strikingly absent e.g., in the first, original portion of the creation account of Gen 1, which, in accordance with ancient Near Eastern tradition, describes the formation of light and darkness, heavenly and earthly oceans, water and land (Gen 1:4b, 7, 9 LXX) from one preexistent primordial stuff (v 2; cf. also vv 14, 18).

It is no longer possible to trace confidently a development of meaning within the OT, which limited the expression to God’s creation; at best, one may identify a growing specialization in the objects of *brʾ*-creation (see 3c

and 4). In the OT, the two verbal stems, if once combined, are kept separate. *br*<sup>ʔ</sup> I is already characteristically shaped, so that any hypothetical notion related to a specific craft or myth is no longer operative.

On the verb, in addition to the comms. and OT theologies, see: F. M. Th. Böhl, FS Kittel 42–60; W. Foerster, *TDNT* 3:1000–1015; J. van der Ploeg, *Muséon* 59 (1946): 143–57; P. Humbert, *TZ* 3 (1947): 401–21 (= *Opuscles d'un hébraïsant* [1958], 146–65); N. H. Ridderbos, *OTS* 12 (1958): 219–23; E. Dantine, *Muséon* 74 (1961): 441–51; W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* (19672), 164–67; C. Westermann, *Gen*, CC, 1:98–100.

2. (a) The verb (qal 38x, ni. 10x; *b<sup>c</sup>ṯā* 1x; cf. the statistics in Humbert, *Opuscles* 146–49) occurs primarily in the exilic prophet Deutero-Isa and (roughly contemporaneously) in P, scattered in the Psa and in other contexts. This distribution suggests that the verb is at home in cultic language; for the message of Deutero-Isa is indeed strongly influenced by the Psa. The expression seems to be foreign to wisdom literature (despite Eccl 12:1); in any case, it is surprisingly absent from Job, which frequently has recourse to the creation theme.

(b) Pre-exilic occurrences are at least very rare; thus the word is not very ancient.

The J creation account (Gen 2:4bff.) does not use the verb. Gen 6:7 J (in both the relative clause constructed with *br*<sup>ʔ</sup> and the list of living creatures) is redactionally influenced by the language of P. So *br*<sup>ʔ</sup> occurs in J actually only in Num 16:30 in the more colorless expression *br*<sup>ʔ</sup> *b<sup>c</sup>ṯā* “to produce something new, wonderful”; yet here too later influence may not be excluded on principle (cf. the term *ḗdā* “community” in v 26). The promise of wonders such as “have not yet been created” among all the peoples is an addition in Exod 34:10 between the announcement of the covenant and the proclamation of the commandments. Amos 4:13 initiates the doxologies of the book of Amos inserted only later. Isa 4:5 belongs to an “unauthentic” salvation oracle, combining theophany and creation in a highly unusual manner. The parenthesis in Deut 4:32 (*br*<sup>ʔ</sup> in a temporal clause as in Ezek 28:13, 15) derives, at the earliest, from a later (Dtr?) framework of Deut. Psa 102 (v 19), 148 (v 5), as well as 51 (v 12) are hardly pre-exilic. The promise of a new creation of the people in Jer 31:22 may be attributable to the Josianic era.

If one leaves open the question of the age of Psa 89 (vv 13, 48) and 104 (v 30), then the limited attestation is insufficient to support the assumption that the verb *br*<sup>ʔ</sup> belonged essentially to the pre-exilic witness to Israel's belief in creation. Rather, one must adhere to the judgment of J. Wellhausen: “the word and the notion only coming into use after the Babylonian exile” (*Prolegomena to the History of Ancient Israel* [1957], 305).

3. Some peculiarities characterize the usage of *br*<sup>ʔ</sup>:

(a) God is always the subj. of the expression, indeed, always Israel's

God, never a foreign deity (cf. perhaps Ezek 28:13, 15). “The most important point is that a special word is employed, which stands for nothing else than the creative agency of God, and so dissociates it from all analogy with human making and shaping” (Wellhausen, op. cit.). To the extent that the OT reserves the verb exclusively for God, this type of creation has no analogy and is, therefore, beyond conceptualization; divine activity can be perceived only insofar as it remains comparable to human activity. Therefore the verb expresses nothing further concerning the method of creation.

(b) No material from which God “creates” (cf. esp. Gen 1:27) is ever mentioned (in the acc. or with a prep.).

(c) The objs. of *br*<sup>ʔ</sup> vary often, however; they are special, extraordinary, new:

(1) Heaven and/or earth: Gen 1:1; 2:4; Isa 65:17; 42:5; 45:18; cf. 40:28; Psa 148:5; 89:13 (north and south = the whole);

(2) People: Gen 1:27; 5:1f.; 6:7; Deut 4:32; Isa 43:7; 45:12 (God “made” the earth, “created” humanity); Ezek 28:13, 15; Mal 2:10; Eccl 12:1; Psa 89:48;

(3) The people of Israel: Isa 43:1, 15; Psa 102:19; Ezek 21:35 (Ammon);

(4) Wonders, novelties, etc.: Exod 34:10; Num 16:30; Isa 48:6f.; 65:17; Jer 31:22; cf. Isa 41:20; 45:8; Psa 51:12; 104:30.

In a few passages the specificity of *br*<sup>ʔ</sup> recedes into the background. Thus Amos 4:13 (“who created the storm”) uses various verbs synonymously, or Isa 42:5 adds the “spreading” of the heavens to “creating.” *br*<sup>ʔ</sup> refers here only to an intermediate, not the final, stage of creation.

The review of materials in (3) and (4) indicates that the determinative factor is not that there was “nothing” prior to creation but that God’s activity brings about something new, which (as such) did not exist before (also Isa 41:20; Psa 51:12; 102:19). On its own, then, the verb does not describe a creation ex nihilo, but it refers precisely to that which other systems of thought (see 5) seek to ensure through discussions of creation ex nihilo: God’s extraordinary, sovereign, both effortless and fully free, unhindered creation.

4. The exilic prophet Deutero-Isaiah uses the verb *br*<sup>ʔ</sup> to describe not only the past or present (Isa 40:26, 28; 42:5; 45:12, 18; cf. Psa 104:30) but also the future (41:20; 45:8; cf. 65:17f.; Jer 31:22) work of God; just as the world as a whole (cf. 45:7) is God’s creation, so is the new salvation. By contrast, P consistently limits the previously varied usage to the creation “at the beginning.”

Even with this limitation, the specific character of the verb is still evident (in the context of the originally independent creation by the word also in Psa 148:5). Although Deutero-Isa generally continues to combine the word with various other equally significant expressions, P uses it to indicate a final action that needs no supplement and employs it in emphatic passages that do not belong in this form to the oldest layer of tradition. Superscript (Gen 1:1) and conclusion (2:3f.) together emphasize the fact that God created everything (without precondition). The threefold usage in the creation of humanity (1:27; cf. 5:1f.; but not in the announcement in 1:26) on the one hand demonstrates the peculiarity of this work, and on the other hand permits one to forgo any suggestion as to how people came to be and whence they originate (contra Gen 2:7; Psa 139:15). In the same way, mythical conceptions are excluded even though God creates the playfully free sea monsters (the first living creatures; Gen 1:21).

Despite the tendency to think comprehensively of the whole as God's work (e.g., Gen 1:1; Isa 45:7; 65:17), *brʿ* can also express God's care for the individual (Isa 43:7; Mal 2:10; Eccl 12:1). For this reason Psa 51:12 "create in me a pure heart," can express the eschatological promise of a new humanity (cf. Ezek 36:26, etc.) as a request.

5. The LXX does not always translate *brʿ* with *ktizein* (cf. W. Foerster, *TDNT* 3:1000–1035), but rather (in contrast to Aquila, Symmachus, Theodotion) occasionally in Gen with *poiein* (cf. H. Braun, *TDNT* 6:459ff.). The distinctives of the concept are not maintained, then. To the contrary, the Hellenistic notion of creation from nothing (cf. 2 Macc 7:28; Rom 4:17) seeks substantially to maintain by other means—presumably through the augmentation and inversion of the causal principle—the intention of the usage of *brʿ*.

W. H. Schmidt

ברח *brḥ* to flee → נוס *nûs*

בְּרִית *bᵉrît* obligation

S 1285; BDB 136a; HALOT 1:157a; TDOT 2:253–79; TWOT 282a; NIDOTTE 1382

I. 1. The subst. *bᵉrît* has (so far) been identified only in Hebr. (against the interpretation of TAR *be-ri-ti* in two Akk. texts from Qatna as *krt bᵉrît* by

W. F. Albright, *BASOR* 121 [1951]: 21f.; cf. J. A. Soggin, *VT* 18 [1968]: 210–15); the mention of an  $\text{ʔ}l b^{\text{r}^{\text{t}}}$  (Judg 9:46) or a  $ba^{\text{al}} b^{\text{r}^{\text{t}}}$  (Judg 8:33; 9:4) at Shechem (cf. R. E. Clements, “Baal-*b^{\text{r}^{\text{t}}}* of Shechem,” *JSS* 13 [1968]: 21–32) suggests a Can. usage of *b^{\text{r}^{\text{t}}}* too.

2. Attempts to explain the etymology of *b^{\text{r}^{\text{t}}}* are manifold.

(a) Some derive *b^{\text{r}^{\text{t}}}* from an Akk. subst. *birītu* “fetter.” *b^{\text{r}^{\text{t}}}* would then have meant “first ‘band,’ . . . then fig. ‘binding agreement’” (R. Kraetzschmar, *Die Bundesvorstellung im AT* [1896], 245; cf. P. Karge, *Geschichte des Bundesgedankens im AT* [1910], 228f., etc.). But aside from other difficulties (cf. O. Loretz, “*b^{\text{r}^{\text{t}}}* — ‘Band-Bund,’” *VT* 16 [1966]: 239–41), according to this etymology the expression *krt b^{\text{r}^{\text{t}}}*, lit. “to cut a *b^{\text{r}^{\text{t}}}*,” would mean “to cut (off) a band/fetter,” which hardly fits the (generally accepted) meaning “to make a covenant” for *krt b^{\text{r}^{\text{t}}}* (E. Nielsen, *Shechem* [19592], 114).

(b) M. Noth (“OT Covenant-Making in the Light of a Text from Mari,” *Laws in the Pentateuch and Other Studies* [1966], 108–17) compared *b^{\text{r}^{\text{t}}}* with the Akk. prep. *birīt* “between” (cs. of *birītu* “space between”) on the strength of ARM II:37.13f. But in the Akk. phrase *salīmam birīt . . . u . . . aškun*, “I brought about an agreement between . . . and . . .,” *birīt* corresponds not to the Hebr. *b^{\text{r}^{\text{t}}}* in the comparable Hebr. expression (*krt*) *b^{\text{r}^{\text{t}} bēn . . . ūbēn . . .* (Gen 9:17, etc.), but to the prep. *b̄n*.

(c) If one thinks of a derivation from a verb *brh*, then such a verb with the meaning “cecidit, secuit” (so Gesenius, *Thesaurus* 1:238f.; P. Humbert, *TZ* 6 [1950]: 60) occurs only in Arab., not in Hebr. A semasiological relationship to *brh* I “to eat,” so that *b^{\text{r}^{\text{t}}}* would originally have meant the meal attested in conjunction with the making of covenants (Gen 26:30; cf. 28; 31:46, 54; cf. v 44; E. Meyer, *Die Israeliten und ihre Nachbarstämme* [1906], 558n.1; KBL 152b; L. Köhler, *JSS* 1 [1956]: 4–7; etc.), is out of the question, because this *brh* always indicates the food of the sick and mourning, just as the related substs. *bārūt* (Psa 69:22) and *biryâ* (2 Sam 13:5, 7, 10) indicate the food of the unfortunate and ailing.

(d) *b^{\text{r}^{\text{t}}}* more probably derives from a stem *brh* II (E. Kutsch, “Sehen und Bestimmen: Die Etymologie von *b^{\text{r}^{\text{t}}}*,” *FS Galling* 165–78; cf. also already GB 114b). This stem occurs in Akk. (*barû*) with the basic meaning “to see, look” (*AHw* 109; *CAD* B:115); earlier attempts to relate *b^{\text{r}^{\text{t}}}* to this stem (e.g., H. Zimmern, *Beiträge zur Kenntnis der bab. Religion* [1901], 2:50) failed as long as the term was attested only for the “seeing” of the oracle priest. In accord with the Akk., the root *brh* II in the only Hebr. occurrence (1 Sam 17:8 “choose yourselves a man to come down to me”) means “to see, choose, select, designate (for a particular task)” (like *r^{\text{h}}* in Gen 22:8; Deut 12:13; 1 Sam 16:1; 2 Kgs 10:3; Esth 2:9; *hzh* in Exod 18:21). *b^{\text{r}^{\text{t}}}* “determination (to do a particular thing), obligation” is formed on this root.

The process of semantic development is the same as for the substs. *ḥōzeh* and *ḥāzūt*, used by Isaiah (Isa 28:15, 18; emendation is excluded) to parallel *b<sup>c</sup>ṛît*. they are derived from *ḥzh* in the meaning of the verb attested in Exod 18:21; this sense “to see > select > determine > prescribe” also recurs in the Aram. of the Tgs. (e.g., on Lev 5:10; Jer 22:13a; 32:7f.; 1 Chron 15:13) and in Palm. (customs tariff, *CIS* 2:3913; 2:114, 123, 129; cf. 1:7; 2:131; *DISO* 85).

II. The subst. *b<sup>c</sup>ṛît* occurs 287x in the OT (only in the sg.): Gen 27x, Exod 13x, Lev 10x, Num 5x, Deut 27x, Josh 22x, Judg 7x, 1 Sam 8x, 2 Sam 6x, 1 Kgs 14x, 2 Kgs 12x, Isa 12x (Deutero-Isa 4x, Trito-Isa 4x), Jer 24x, Ezek 18x, Hos 5x, Amos 1x, Obad 1x, Zech 2x, Mal 6x, Psa 21x, Job 3x, Prov 1x, Dan 7x, Ezra 1x, Neh 4x, 1 Chron 13x, 2 Chron 17x.

On account of the stratified nature of OT books, such statistics have only limited usefulness; more suggestive are statistics based on the periods of origin of the texts. The following occurrences may be placed in the pre-Dtr period: Deut 33:9(?); Josh 7:11, 15(?); 9:6f., 11, 15f.; 24:25(?); Judg 8:33; 9:4, 46; 1 Sam 18:3; 20:8; 23:18; 2 Sam 3:12f., 21; 5:3; 23:5; 1 Kgs 5:26; 15:19a, b; 20:34a, b; 2 Kgs 11:4; in J: Gen 15:18; 26:28; in E: Gen 21:27, 32; 31:44; further Exod 24:7, 8(?); Hos 6:7; 8:1(?); 10:4; 12:2; Isa 28:15, 18; from the Psa, possibly Psa 89:4, 29, 35, 40. In all, this is only about 43 occurrences. From the immediate pre-exilic period onward, *b<sup>c</sup>ṛît* occurs much more often; it acquires greater significance, then, indeed, primarily in the theological arena. Occurrences in Dtn-Dtr literature are particularly numerous. In addition to Deut 4:13 and a further 18x in Deut: Exod 19:5; 23:32; 34:10, 12, 15, 27f.; Josh 23:16; Judg 2:1f., 20; 1 Kgs 8:23; 11:11; 19:10, 14; 2 Kgs 11:17; 17:15, 35, 38; 18:12; 23:2, 3 (3x), 21; Jer 11:2f., 6, 8, 10; 14:21; 22:9; 31:31, 32a, b, 33; 34:8, 10, 13, 15, 18a, b; Amos 1:9 (62 passages, apart from Psa); 42 passages from Num 10:33; 14:44; Deut 10:8, etc., to 2 Chron 5:2, 7 mention the “ark of the *b<sup>c</sup>ṛît* of Yahweh/God”—either in a secondary expansion of the expression “ark of Yahweh/God” or originally—in which (according to the Dtr concept) the “tablets of the *b<sup>c</sup>ṛît*” (Deut 9:9, 11, 15; 1 Kgs 8:9 LXX) were stored (1 Kgs 8:9, 21; cf. Deut 10:2). P together with additions and H also constitute a large block, with 39 occurrences (Gen 6:18; 9:9–17 7x; 14:13; 17:2–21 13x; Exod 2:24; 6:4f.; 31:16; Lev 2:13; 24:8; 26:9–45 8x; Num 18:19; 25:12f.).

III. 1. As early as the end of the 19th cent., J. J. P. Valetton, Jr. (*ZAW* 12 [1892]: 1–22, 224–60; 13 [1893]: 245–79) and R. Kraetzschmar (op. cit.; see I/2a) demonstrated that the modern term “covenant” is simply inadequate to render the Hebr. *b<sup>c</sup>ṛît*. Accordingly, B. Baentsch (*Exodus-Leviticus-Numeri* [1903]), e.g., suggested “covenant” for *b<sup>c</sup>ṛît* in Exod 2:24, “unbreakable promise” in 6:4f., and “covenant regulation” in 19:5. In contrast to such differentiation, Eichrodt 1:37 (cf. also id., “Bund und Gesetz,” *FS Hertzberg* 30–49) emphasized that in Israel, as with the profane usage, the “religious *b<sup>c</sup>ṛît* too was always regarded as a bilateral relationship; for even though the burden is most unequally distributed between the two contracting parties, this makes no difference to the fact

that the relationship is still essentially two-sided.” In a new approach, J. Begrich (“Berith. Ein Beitrag zur Erfassung einer alttestamentlichen Denkform,” *ZAW* 60 [1944]: 1–11 = *GS* [1964], 55–66) interpreted *b<sup>c</sup>rît* as “a relationship, in which a more powerful party stands by a weaker party” (op. cit. 4; cf. also e.g., already B. Duhm, *Jesaja*, HKAT, 385, on Isa 55:3), wherein only the powerful party accepts an obligation and the (weaker) recipient plays no active role; only secondarily did *b<sup>c</sup>rît* come to be understood as a contract involving the rights and duties of the partners. A. Jepsen (“Berith. Ein Beitrag zur Theologie der Exilszeit,” *FS Rudolph* 161–79) also emphasized the unilaterality of the *b<sup>c</sup>rît*, interpreting it as a “solemn pledge, promise, obligation” (op. cit. 165, 178); but he disputed whether *b<sup>c</sup>rît* also means the obligation under which another is placed, at least for the profane arena (op. cit. 165). By way of affirmation and critique of these approaches, the following may be said regarding the meaning of *b<sup>c</sup>rît* (E. Kutsch, “Gesetz und Gnade. Probleme des atl. Bundesbegriffs,” *ZAW* 79 [1967]: 18–35; id., “Der Begriff *b<sup>c</sup>rît* in vordeuteronomischer Zeit,” *FS Rost* 133–43; cf. also G. Fohrer, “Altes Testament—‘Amphiktyonie’ und ‘Bund’?” *Studien zur atl. Theologie und Geschichte* [1969], 84–119, esp. 103ff.), first in the profane arena.

2. *b<sup>c</sup>rît* does not indicate a “relationship,” but is the “determination,” “obligation,” accepted by the subject of the *b<sup>c</sup>rît*, in such contexts *b<sup>c</sup>rît* can even mean the “pledge.” The content of such a *b<sup>c</sup>rît* as “self-imposed obligation” can be seen in the context: “to let (others) live,” Josh 9:15a, so also 1 Sam 11:1; Deut 7:2; Exod 23:32f.; 34:12, 15; Judg 2:2; giving a life partnership, 1 Sam 18:3 (Begrich, op. cit. 6; Jepsen, op. cit. 163); protection of the wife, Ezek 16:8, 60a; Mal 2:14; on David’s acceptance of obligations in relation to the elders of Israel, 2 Sam 5:3; cf. perhaps Psa 101 (and Jepsen, op. cit. 163f.). Not only the more powerful but also the subordinate, weaker, lowlier can accept such a self-imposed obligation, as the defeated Aramean king Ben-hadad accepted toward Ahab of Israel (1 Kgs 20:34a, b; cf. Jepsen, op. cit. 164f.; on the content cf. v 34a), Israel in relation to Assyria (Hos 12:2b; cf. v 2c), the Jews (Ezra 10:3) or Hezekiah (2 Chron 29:10) toward Yahweh. These passages do not refer to a repayment or reciprocal obligation on the part of the beneficiary of the *b<sup>c</sup>rît*. Moreover, on the occasion of the “cutting” of a *b<sup>c</sup>rît* (→ *krt*), i.e., on the assumption of a self-imposed obligation, the subj. of the *b<sup>c</sup>rît* does not even require a partner. King Josiah “cut the *b<sup>c</sup>rît* before Yahweh to follow Yahweh,” 2 Kgs 23:3a: he assumes the obligation, and the people enter into it in a second act (v 3b); and this occurs “before” Yahweh, not “with” Yahweh. Therefore, there is no covenant agreement with Yahweh or with the people. The same usage also occurs in Exod 34:10; Jer 34:15b, 18b;

Hos 10:4; 2 Chron 15:12; 34:31 (cf. also Neh 10:1, 30). Yahweh's enemies in Psa 83:6 obligate themselves to a common action against Yahweh; cf. also 2 Chron 23:16.

The one who assumes this type of self-imposed obligation can strengthen it even more through a ritual of self-deprecation, in which he passes between the parts of a slaughtered animal (Jer 34:15b, 18b, 19; Gen 15:17f.): In the event that he does not fulfill his pledge, he should experience the same fate as this animal.

3. The subject of the *b<sup>c</sup>rit* places another, the one with whom a *b<sup>c</sup>rit* is "cut," under obligation. Thus, according to Ezek 17:13ff., Nebuchadnezzar obligates the Jewish king Zedekiah: only he, not the Babylonians, must "enter into a curse" (v 13b), namely in the event he does not "maintain" this *b<sup>c</sup>rit* (on *krt b<sup>c</sup>rit* [<sup>c</sup>et-] in Ezek 17:13a cf. Aram. *g<sup>c</sup>zr d<sup>n</sup>* [<sup>c</sup>m] in *KAI* no. 222A.7; see Fitzmyer, *Sef.* 32f.). Similarly, the Gerarites want to obligate Isaac (Gen 26:28; cf. v 29a), David takes Abner into his service (2 Sam 3:12f.), the Israelites obligate David (as king, 2 Sam 3:21; cf. 2 Chron 23:3), also death (namely to spare them, Isa 28:15, 18), King Zedekiah obligates the Judeans and Jerusalemites (to release their slaves, Jer 34:8), Job obligates the stones of the field (Job 5:23; cf. Horst, BK 16/1, 87f.), also his eyes (Job 31:1), the priest Jehoiada "assembles" the leaders of the palace troops (2 Kgs 11:4). In none of these cases does *b<sup>c</sup>rit* also include an obligation of those who "cut the *b<sup>c</sup>rit*."

4. From self-imposed obligation (see 2), the concept can evolve into the assumption of mutual obligations on the part of two or more partners, into a reciprocal *b<sup>c</sup>rit*. Thus Solomon and King Hiram of Tyre have "both cut a *b<sup>c</sup>rit*" (1 Kgs 5:26b); between them for continued *šālōm* (v 26b; Eng. 5:11). The *b<sup>c</sup>rit* between the kings of Damascus and Judah (1 Kgs 15:19a) was also conceived as a nonaggression treaty, as a reciprocal obligation, probably also the one between the Arameans and Basha of Israel (v 19b). According to 1 Sam 23:18 the *b<sup>c</sup>rit* between Jonathan and David was also reciprocal, as was, according to Gen 31:44, the *b<sup>c</sup>rit* between Jacob and Laban. The translation "covenant" for *b<sup>c</sup>rit* is rooted in this secondary and relatively infrequent usage.

5. Finally, a third individual can establish a *b<sup>c</sup>rit* between two parties. No illustration indicating that this *b<sup>c</sup>rit* means obligation for the two parties occurs in the OT (for the model, cf. ARM II:37.6–14, and Noth, *op. cit.* 108ff.). According to 2 Kgs 11:17b, the *b<sup>c</sup>rit* that the priest Jehoiada established "between the king and the people" may involve the king's obligation to the people in the light of 2 Sam 3:21; 5:3; and 2 Chron 23:3. In 2 Kgs 11:17a, too, the obligation ("to be a people of Yahweh") lies clearly on one side only, namely with the people. The *b<sup>c</sup>rit* that Yahweh will

establish with the animals of the field to the benefit of the Israelites (Hos 2:20; see 7c; on the topic cf. Ezek 34:25; Lev 26:6; and H. W. Wolff, “Jahwe als Bundesvermittler,” *VT* 6 [1956]: 316–20) also belongs here.

6. Various verbs indicate the (a) establishment, (b) observance, and (c) violation or invalidation of a *b<sup>c</sup>rit* (the following also takes account of the theological usage).

(a) The oldest and most common usage is *krt b<sup>c</sup>rit*, lit. “to cut a *b<sup>c</sup>rit*,” to be translated “to reach a settlement, establish an obligation.” Contrary to the widely held opinion, the expression is not derived from the dismemberment of animals as in Jer 34:18f.; Gen 15:10, 17 (→ *krt*). Cf. *krt* → *ālā* (Deut 29:11, 13; and Phoen. in *KAI* no. 27.8f.; *ANET* 658b: “An eternal bond has been established”), *krt dābār* (Hag 2:5), *krt <sup>a</sup>mānā* (Neh 10:1).

The formula → *qūm* hi. *b<sup>c</sup>rit* “to set up, enact a *b<sup>c</sup>rit*” appears immediately prior to the exile (Ezek 16:60, etc.; cf. 2 Kgs 23:3a); cf. *qūm* hi. with the obj. *š<sup>c</sup>bū<sup>c</sup>ā* “oath” (Gen 26:3, etc.), *nēder* “vow” (Num 30:14f.; Jer 44:25), *dābār* “word, promise” (Deut 9:5, etc.), but also “word of the Torah” (Deut 27:26, etc.), *mišwā* “commandment” (Jer 35:16, etc.). The other usages are also later: with *b<sup>c</sup>rit* as obj. the verbs *ntn* “to give” (Gen 9:12; 17:2; Num 25:12), *šim* “to establish” (2 Sam 23:5), *šb<sup>c</sup>* ni. “to swear” (Deut 4:31, etc.), *ngd* ni. “to announce” (Deut 4:13), *šwh* pi. “to command” (Deut 4:13, etc.), with *be* “in” preceding *b<sup>c</sup>rit* the verbs *bō<sup>ʔ</sup>* “to enter” (Jer 34:10; Ezek 16:8; 2 Chron 15:12; cf. 1 Kgs 8:31 = 2 Chron 6:22, with *ālā*, Neh 10:30, with *ālā* and *š<sup>c</sup>bū<sup>c</sup>ā*), *br* “to enter” (Deut 29:11), *ʿmd* “to enter (into)” (2 Kgs 23:3b), further *bō<sup>ʔ</sup>* hi. “to cause to enter” (1 Sam 20:8; cf. Ezek 17:13 with *ālā*), *lqh* “to take (into)” (2 Chron 23:1; Ezek 17:13b?), *ʿmd* hi. “to cause to enter” (2 Chron 34:32 txt em).

(b) Verbs describing the observance of a *b<sup>c</sup>rit* also occur only from the late monarchy: of profane *b<sup>c</sup>rit*: *zkr* “to remember” (Amos 1:9) and *šmr* “to keep” (Ezek 17:14); God of his *b<sup>c</sup>rit* = “promise”: *zkr* (Gen 9:15 and a further 11x), *šmr* (Deut 7:9 and a further 6x; cf. Deut 7:8; 1 Kgs 2:43, with the obj. *š<sup>c</sup>bū<sup>c</sup>ā*); the person of God’s *b<sup>c</sup>rit* = “law”: *šmr* (Gen 17:9 and a further 5x; cf. 1 Sam 13:13, etc., with the obj. *mišwā*), *nšr* “to keep” (Deut 33:9; Psa 25:10), *ʿmn* ni. “to be faithful” (Psa 78:37), *h<sup>z</sup>q* hi. “to hold fast” (Isa 56:4, 6).

(c) The following describe the violation or invalidation of a *b<sup>c</sup>rit*: profane, a human *b<sup>c</sup>rit* = “promise”: *hll* pi. “to profane” (Psa 55:21; Mal 2:10), *pr<sup>r</sup>* hi. “to break” (1 Kgs 15:19); God of his *b<sup>c</sup>rit* = “promise”: *pr<sup>r</sup>* hi. (Lev 26:44; Judg 2:1), *škh* “to forget” (Deut 4:31), *hll* pi. “to profane” (Psa 89:35), *n<sup>r</sup>* “to abandon” (Psa 89:40); the person of God’s *b<sup>c</sup>rit* = “law”: *pr<sup>r</sup>* hi. (Gen 17:14, etc.; cf. Num 15:31 and Ezra 9:14, with *mišwā*, Psa 119:126, with *tô<sup>r</sup>â*, but also Zech 11:14 with *ʾah<sup>a</sup>wā* “brotherhood”), *br* “to transgress” (Deut 17:2 and a further 7x, as well as Hos 6:7?; cf. Dan 9:11 with *tô<sup>r</sup>â*, 2 Chron 24:20 and Sir 10:19 with *mišwā*, Num 22:18 and 1 Sam 15:24 with *peh* “utterance, command”), *zb* “to abandon” (Deut 29:24 and a further 4x; cf. Prov 4:2 with

*tôrâ*), *škh* “to forget” (Deut 4:23; 2 Kgs 17:38; Prov 2:17; cf. Hos 4:6 with *tôrâ*; Deut 26:13 with *mišwâ*), *mʿs* “to reject” (2 Kgs 17:15; cf. Isa 5:24 and Amos 2:4 with *tôrâ*; 2 Kgs 17:15 with *ḥuqqîm*; Lev 26:15 and Ezek 20:24 with *ḥuqqôt*; 2 Kgs 17:15 with *ʿēdôt*; Isa 5:24 with *ʿimrâ*; 1 Sam 15:23, 26 with *dābār*), *šht* pi. “to destroy” (Mal 2:8), *rš<sup>c</sup>* hi. “to be guilty (with respect to)” (Dan 11:32), *šqr b<sup>c</sup>* “to act deceitfully toward” (Psa 44:18); cf. also *gōʿal* “defilement” (Neh 13:29); the individual to a *bʿrît* = “promise” to God: *škh* “to forget” (Jer 50:5).

7. The classification by usage discussed in III/2–4 finds additional confirmation in many respects.

(a) If *bʿrît* means a self-imposed obligation, the substantive can parallel *šʿbûʿâ* “oath, vow” (Psa 105:9 = 1 Chron 16:16; cf. also *šb<sup>c</sup>* ni. *šʿbûʿâ* in Num 30:3; Josh 9:20 alongside *šb<sup>c</sup>* ni. *bʿrît* in Deut 4:31; 8:18) or even *ʿālâ* “curse” (Deut 29:11, 13; Gen 26:28; Ezek 16:59; 17:18f.). If *bʿrît* indicates the obligation of another party, however, other substantives occur as parallels, namely, those which reflect the character of this usage: *tôrâ* “instruction” (Hos 8:1; Psa 78:10; cf. also e.g., Deut 28:69 with v 58; 2 Kgs 23:3a with v 24; 2 Kgs 23:2, 21 with 22:8, 11), *ḥuqqîm* and *ḥuqqôt* “regulations” (2 Kgs 17:15; Psa 50:16 or 1 Kgs 11:11; cf. also, however, in contrast, *ḥōq* “decree to the benefit of” in Psa 2:7, with *bʿrît* and *šʿbûʿâ* in Psa 105:9f. = 1 Chron 16:16f.), *tôrôt* and *ḥōq* “instructions” and “regulation” (Isa 24:5), *ʿēdôt* “stipulations” (2 Kgs 17:15; Psa 25:10; 132:12), *piqqûdîm* “directions” (Psa 103:18), *ʿimrâ* “word (of Yahweh)” in the sense of “commandment” (Deut 33:9).

(b) From the perspective of one assuming a self-imposed obligation in the establishment of *bʿrît*, one can also be said to “swear” (cf. Josh 9:15b with v 15a; 1 Sam 20:17 LXX [!] with 18:3; Ezra 10:5 with v 3; Psa 89:4; cf. also Hos 10:4; Ezek 16:8; 2 Chron 15:12, 14). But if the subj. of the *bʿrît* obligates another, “one causes another to swear” (2 Kgs 11:4; cf. also Ezek 17:13). In cases of reciprocal *bʿrît*, one can say that both swear (to one another) (cf. 1 Sam 20:42 with 23:18; Gen 21:31b with v 32a).

(c) The classification outlined in III/2–4 is also mirrored in the use of the preps. that express the manner in which the partner is bound by having *krî bʿrît*. The prep. *le* “for” is used in the context of self-obligation; this obligation benefits the other. *ʿet-* and *ʿim* “with” constitute exceptions here (*ʿet-*: Gen 15:18; Psa 105:8f. = 1 Chron 16:15f.; Zech 11:10; *ʿim*: Hos 12:2; Job 40:28; Neh 9:8). The obligation of another is usually expressed by *ʿet-* (Jer 34:8; Ezek 17:13; Exod 34:27; Deut 5:3, etc.) or *ʿim* (Hos 2:20; Exod 24:8, etc.; cf. in Aram. *KAI* no. 222A.1, etc.; Fitzmyer, *Sef.* 12f.), and only as an exception by *le* (Josh 24:25; 2 Kgs 11:4; Job 31:1). Reciprocal *bʿrît* exists *bn . . . ûbên . . .* “between . . . and . . .” (1 Kgs 15:19). The same preps. can also appear, however, in later texts in the contexts of self-imposed obligation (Gen 9:12f., 15–17; 17:2, 7), of joint acceptance of the same obligation (2 Chron 23:16), or of the obligation of another party (Gen 17:10f.). If a third person establishes a *bʿrît* involving two parties, *ʿim* appears—appropriately—for the obligated individual, *le* “to the benefit of” for the one benefited by the other’s obligation (Hos 2:20: therefore people and animals are not “covenant partners”!). In 2 Kgs 11:17a and, probably also v 17b, cases of the obligation of only

one side, both parties are associated with *b̄n . . . ūbēn. . .*

A special case is the reference to the one involved in the *b̄rît* in the acc. In this case, *b̄rît* once again means self-obligation (Lev 26:42, “I remember my *b̄rît* [promise] to Jacob [Isaac, Abraham]”; cf. Jer 33:21a, b) or “obligation, arrangement, regulation” (Jer 33:20a, “If you could break by *b̄rît* [arrangement, regulation] concerning the day and my regulation concerning the night,” namely that both occur at the proper time, v 22b; cf. v 25 and *ḥōq* “regulation” for stars in Psa 148:6). From this standpoint, the accs. in MT of Isa 59:21; Ezek 16:8, 60; 37:26 should also be considered correct (cf. GKC §118m, q; BrSynt §81e).

IV. 1. In application to the theological realm, *b̄rît* contrasts God and human. The subj. of the *b̄rît* here is, as a rule, Yahweh; it is “his” *b̄rît*, he establishes the *b̄rît* (even in 2 Kgs 11:17a; Jer 50:5; Ezra 10:3; 2 Chron 29:10, where the Israelites or Hezekiah enter into a *b̄rît* concerning Yahweh, maintain Yahweh’s supremacy). *b̄rît* here indicates either Yahweh’s self-obligation, his promise to do or give a particular thing (IV/2; cf. III/2), or the obligation that Yahweh places upon the individual (IV/3; cf. III/3), but not a reciprocal obligation (IV/4; cf. III/4).

2. The OT speaks of Yahweh’s *b̄rît* as his “self-obligation, promise” in various contexts. The content of the various *b̄rît* varies in reference to the recipient and his/her particular situation.

(a) The OT names primarily the patriarchs as recipients of a *b̄rît*. They (or their descendants) receive a *b̄rît* in three ways: (1) Yahweh promises Abraham or his descendants the gift of the land of Canaan: already in J, Gen 15:18; then in Exod 6:4 (P); Psa 105:10 = 1 Chron 16:17. (2) Among the promises to the fathers, P also describes the “promise of increase” as *b̄rît*. Gen 17:2 + 6, 3–5. (3) Finally, Yahweh’s promise to be the God of the patriarchs or of Israel also appears as a *b̄rît*, primarily in P and the Dtr sphere: Gen 17:7, (8b); (Lev 26:45). This *b̄rît* is also probably intended in the following passages, which speak of Yahweh’s remembrance—to Israel’s benefit and well-being—of his *b̄rît* (Exod 2:24; 6:5 P; Lev 26:42, 44; Jer 14:21; Psa 106:45; 111:5; cf. 2 Kgs 13:23) or of his keeping his *b̄rît* and his faithfulness (*ḥesed*) (Deut 7:9, 12; 1 Kgs 8:23; Neh 1:5; 9:32; 2 Chron 6:14); cf. also the *b̄rît* that Yahweh swore to Israel’s fathers (Deut 4:31; 7:12; 8:18).

In all three cases *b̄rît* is the most important form of assurance next to the oath (the land: Gen 24:7 J; 26:3 addition to J; 50:24 E; Deut 1:8, 35, etc.; increase: Gen 22:16f. E; Exod 32:13 Dtr; Deut 13:18; to be their God: Deut 29:12b) and the simple promise via the word (land: Gen 12:7; 13:14f., 17; 28:13 J, etc.; increase: Gen 12:2 J; 22:17 RJE?; 26:4 addition to J; 26:24 J; 28:3; 48:4 P; Exod 32:13 Dtr; to be their God: Exod 29:45; cf. 25:8;

Deut 29:12a; Ezek 34:24a; cf. v 24b; cf. Lev 11:45; 22:33; 25:38; 26:45; Num 15:41). A distinction in the appraisal of Abraham's sons is indicated in that Gen 17 promises blessing and offspring to Ishmael (v 20; cf. Gen 16:10 J), the slave's son, just as to Isaac (cf. 17:16), while Yahweh's *b<sup>e</sup>rît* (in reference, with some LXX MSS, to the promise to be his God, v 7) is reserved for Isaac alone (vv 19, 21).

(b) The *b<sup>e</sup>rît* Yahweh established with David includes the promise that David's throne will always exist and will always be possessed by a Davidide (2 Sam 23:5; Psa 89:4, 29, 35, 40; Isa 55:3; Jer 33:21; 2 Chron 13:5; 21:7; once more in addition to the oath, Psa 89:4; 132:11; and the word, 2 Sam 7:11b, 16, 25; 1 Kgs 8:20; Jer 33:17; 1 Chron 22:8; cf. v 10; cf. Psa 89:35).

(c) P also describes Yahweh's assurance to Noah not to punish the earth again with a flood as a *b<sup>e</sup>rît* (Gen 9:8–17; cf. the simple promise in J Gen 8:21 and the oath, Isa 54:9). As a sign of the *b<sup>e</sup>rît*, Yahweh's rainbow should be a reminder of this assurance (Gen 9:12–17).

(d) *b<sup>e</sup>rît* also appears as a divine assurance of the continuity of the priestly office for Levi (Mal 2:4f., 8; Jer 33:21b; cf. vv 18, 22) or for Phinehas (Num 25:12f.; cf. Neh 13:29).

(e) The question, which arose following the conquest of Jerusalem and the fall of the Judean state in 587 BCE, of whether, in view of the people's disobedience, Yahweh had rescinded his *b<sup>e</sup>rît*, his promise to the fathers, received a variety of responses. According to one interpretation, Yahweh maintained his *b<sup>e</sup>rît* even in the exilic situation (Lev 26:44, with the Israelites; Jer 33:21, *b<sup>e</sup>rît* with David and Levi), he remembered his *b<sup>e</sup>rît* (Lev 26:42 [patriarchal *b<sup>e</sup>rît* ], 45 [exodus *b<sup>e</sup>rît* ]). Nonetheless, the prophets announce that Yahweh will —once again—establish a *b<sup>e</sup>rît* with his people: the promise that in the future he will protect Israel from a disaster similar to the contemporary experience (Isa 54:9f.) as he did humanity after the flood, the announcement of a happy future (Isa 61:8), the eschatological era of salvation, in which both war and natural catastrophe will be eliminated (Exod 34:25; Hos 2:20, a secondary text). Above all, however, Yahweh takes responsibility to see that the God-people relationship is never again destroyed by Israel's disobedience. Thus it is his *b<sup>e</sup>rît* = "promise" that his spirit (probably of obedience) and the words (of the law), which he has placed in the mouth of the Israelites, will never again leave them (Isa 59:21). The *b<sup>e</sup>rît* that God will never again cease to do good by them (Jer 32:29f.) stands in the context of the announcement that Yahweh will give them one heart and one way to fear him always (cf. Jer 24:7; Ezek 11:19; 36:26f.; on Jer 31:31–34 see 3d). In relation to such promises of a salvific future (cf. *b<sup>e</sup>rît šālôm* in Isa 54:10; Ezek 34:25; 37:26), reference can also

be made to an earlier *b<sup>c</sup>řît* (Ezek 16:60; cf. Isa 55:3).

3. (a) Thematically and explicitly paralleled with *tôrâ* “instruction,” *hōq* “precept,” etc. (see III/7a), *b<sup>c</sup>řît* indicates any act of the divine will in respect to people. The content of the obligation placed by God upon people is not usually further qualified; *b<sup>c</sup>řît* here often constitutes the totality of divine regulations, e.g., Isa 24:5; Hos 8:1; Psa 25:10, etc. Elsewhere the content may be derived from the context, as e.g., in Prov 2:17; cf. Exod 20:14; Deut 5:18 (Lev 20:10).

(b) In the Dtr realm the proclamation of Yahweh’s *b<sup>c</sup>řît* = “regulations, obligations” (for Israel) is associated with two places: (1) Horeb and (2) the land of Moab (cf. the juxtaposition in Deut 28:69).

(1) The Horeb *b<sup>c</sup>řît* is associated with the communication of the divine will at Sinai according to JE. Here *b<sup>c</sup>řît* indicates the Decalogue, the “ten words,” which are written on two tables (Deut 4:13; 5:2, 22 [vv 6–21 Decalogue!]; 9:9, 11, 15; 1 Kgs 8:21, also LXX v 9), deposited in the ark (1 Kgs 8:9, 21; cf. Deut 10:2; on “ark of Yahweh’s *b<sup>c</sup>řît*” see II). In other passages only the the first commandment, namely to worship no gods other than Yahweh, is specifically called *b<sup>c</sup>řît* (Deut 17:2; 29:24f.; 31:16, 20; 1 Kgs 11:11; cf. v 10; 19:10, 14 [here *b<sup>c</sup>řît* in the Dtr sense is inserted secondarily]; 2 Kgs 17:15, 35, 38; Jer 11:3f., 10; 22:9; cf. also 2 Kgs 23:3a, b and 2 Chron 34:32 with 2 Kgs 23:4ff. and 2 Chron 34:33).

(2) The concept of a *b<sup>c</sup>řît* = “obligation” that Moses places upon Israel in the land of Moab is a Dtr “exclusive” (Deut 28:69; 29:8,[11], 13, 20). The content is, to be sure, the Dtn code (cf. also Deut 15:1, 12 with Jer 34:12–14), which as a “Moab *b<sup>c</sup>řît*” is dated back to the Mosaic era, as the so-called “Covenant Book,” Exod 20:22–23:19 through Exod 24:3–8.

(c) In the exilic period the concept of a *b<sup>c</sup>řît* imposed on the patriarchs also appears for the first time; the requirement of circumcision according to P in Gen 17:9ff. (through v 10, distinguished markedly from the *b<sup>c</sup>řît* = “promise” in vv 2, 4, 7). Now the observance of the Sabbath is also described as a divine *b<sup>c</sup>řît* (Exod 31:16 Ps; Isa 56:4), and it, like the preparation of the showbread (Gen 17:13; Exod 31:16), is described as an “eternal *b<sup>c</sup>řît*” (Lev 24:8).

(d) In an express contrast to the *b<sup>c</sup>řît* = “obligation” associated with the exodus of the fathers from Egypt (see 3b[1]), which Israel violated, Jer 31:31–34 announces a *b<sup>c</sup>řît h<sup>a</sup>dāšâ*, a “new obligation,” in which Yahweh will place his instruction in the Israelites’ hearts in order to achieve compliance and to ensure the God-people relationship (see 2e).

(e) Nowhere is the act of law-giving, whether at Sinai/Horeb or in the land of Moab, described as *b<sup>c</sup>řît*, but only that which was communicated, established; there is therefore no *b<sup>c</sup>řît* in the sense of a “Sinai covenant.”

The presentation offered here places polarities such as “Sinai covenant-Davidic covenant” (cf. L. Rost, *TLZ* 72 [1947]: 129–34; M. Sekine, *VT* 9 [1959]: 47–57) and “Sinai covenant-Abrahamic covenant” (cf. W. Zimmerli, *TZ* 16 [1960]: 268–80) in a new light.

4. It is theologically significant that the OT does not know a reciprocal *b<sup>c</sup>rit* that pairs God and people—a *b<sup>c</sup>rit* in which both God and people accept mutually enforceable responsibilities (as e.g., the *b<sup>c</sup>rit* between Solomon and Hiram, 1 Kgs 5:26). The improperly termed “covenant formula” (more apt is: “identification formula”) “Yahweh the God of Israel—Israel the people of Yahweh” (cf. R. Smend, *Die Bundesformel* [1963]) describes the relationship between Yahweh and Israel with the terms “God-people,” indeed, in the sense of “Lord-servant.” In this God-people relationship only God establishes obligations. God can make the execution of his *b<sup>c</sup>rit* = “promise” dependent upon the fulfillment of particular conditions (Deut 7:9; 1 Kgs 8:23), the God-people relationship dependent upon the maintenance of his *b<sup>c</sup>rit* “obligations” (Exod 19:5; cf. Psa 132:12). But the individual cannot obligate God to keep his promise by fulfilling these conditions; the promise is guaranteed only by the fact that God stands by his word. If one understands “partners” as equals in relationship, then it is conceivable from the standpoint of the term *b<sup>c</sup>rit* to speak of a “partnership” between human and God.

V. 1. Postbibl. Hebr. uses *b<sup>c</sup>rit* in the same way as the OT (of *b<sup>c</sup>rit* in early Judaism; see J. Behm, *TDNT* 2:126–29; A. Jaubert, *La notion d’alliance dans le judaïsme* [1963]).

(a) Sir uses *b<sup>c</sup>rit* in the sense of the obligation that one assumes: of people, 41:19 (par. *ʾlh*); 44:12 (cf. P. A. H. de Boer, *FS Baumgartner* 25–29), 20 (Abraham accepts the circumcision *b<sup>c</sup>rit*); of God in respect to Noah, 44:17f., in respect to the fathers, 44:22, in respect to Aaron, 45:15 (priesthood), and Phinehas, 45:24 (high priesthood), in respect to David, 45:25.

(b) At Qumran *b<sup>c</sup>rit* occurs: (1) in a nontheological usage: as a self-imposed obligation, 1QS 1:16 (cf. 2 Kgs 23:3a), then in the expression *yqym bbryt ʾnpšw*, “he should take it upon himself through a *b<sup>c</sup>rit*” (i.e., “to separate himself from all evildoers”), 1QS 5:10 (cf. 1QH 14:17 as well as CD 16:1, 4, 9). *b<sup>c</sup>rit* should be understood as the obligation of another in the usage *bʿy bryty*, “those who have entered into my (the supplicant’s) *b<sup>c</sup>rit*” = “those obligated to me” (1QH 5:23); cf. in the same sense “the men of their (the priests’) *b<sup>c</sup>rit*,” 1QS 5:9; 6:19; 1QSa 1:2.

(2) In the theological realm *b<sup>c</sup>rit* means God’s self-obligation, promise, where God “remembers” his *b<sup>c</sup>rit* (1Q34 3:2, 5; 6Q15 3:5; CD 1:4; 6:2; 4QDibHam 5:9), “keeps” his *b<sup>c</sup>rit* (e.g., 1QM 18:7). The “promise” to the fathers (1QM 13:7; 14:8; CD 8:18 = 19:31), to David (4QDibHam 4:6), and to the priests (1QM 17:3) should also be

mentioned here. The *b<sup>c</sup>rît* “to act according to all that he (God) has commanded, and not to turn aside from him” (1QS 1:16f.) and “to separate oneself from all evildoers” (5:10, etc.) appears as an “obligation.” It is meant when one enters into the *b<sup>c</sup>rît* (*bô<sup>c</sup>* 1QS 2:12, 18, etc.; *br* 1:18, 20, etc.). The *bryt ḥdšh* (CD 6:19; 8:21; 19:33), which, according to CD 20:12 has been placed in effect (*qym pi.*) “in the land of Damascus (= Qumran?)” and into which one enters there, is also understood as an “obligation.”

(3) At Qumran *b<sup>c</sup>rît* can also describe a group of people: as in 1QS 5:11, 18 “(the evildoers) will not be reckoned to his (God’s) *b<sup>c</sup>rît*” (cf. CD 19:35: “(the apostates) will not be reckoned to the assembly of the people”); as in 1QM 14:4, where “his *b<sup>c</sup>rît*” parallels “people of his redemption” and in 17:7, where “Israel’s *b<sup>c</sup>rît*” parallels “lot/portion (= people) of God.” *b<sup>c</sup>rît* seems to be used in the same manner in Dan 11:22, 28, 30a, b (but not in 9:27 and 11:32). Both cases refer to believers, those who do the will of God.

2. The Aram. of the Tgs. renders *b<sup>c</sup>rît* (with only 3 exceptions) with *q<sup>c</sup>yām*, which no more means the “covenant,” etc. than does *b<sup>c</sup>rît*, rather the “arrangement” (cf. *qym pi.* as well as Aram. pa.).

That *q<sup>c</sup>yām* includes the full range of the meaning of *b<sup>c</sup>rît* is indicated by the fact that *q<sup>c</sup>yām* can stand not only for *b<sup>c</sup>rît* but for Hebr. *š<sup>c</sup>bû<sup>c</sup>â* “oath, vow” (e.g., Num 30:3; Deut 7:8; Hab 3:9), *nēder* “vow” (e.g., Gen 28:20; 31:13), and *ḥōq* “regulation” (e.g., Exod 18:16, 20; Psa 99:7; cf. Bibl. Aram. *q<sup>c</sup>yām* “ordinance,” Dan 6:8, 16). The translation *g<sup>c</sup>zērâ* “decision, law” (2 Kgs 17:15) or *ḥōray<sup>c</sup>tâ* “doctrine, law” (Lev 26:25; Ezek 16:61) for *b<sup>c</sup>rît* confirms the notion that the Aram. linguistic awareness could hear the nuance of “law” in *b<sup>c</sup>rît*.

On this point and on V/3–4, see E. Kutsch, “Von *b<sup>c</sup>rît* zu ‘Bund,’” *KerD* 14 (1968): 159–82.

3. The shift into the Gk. language and its conceptual world was more problematic. The LXX offers the word *diathēkē* about 267x for *b<sup>c</sup>rît* in all the possible meanings mentioned under III and IV, in 1 Kgs 11:11 *entolai* (on the other occurrences, cf. Kutsch, op. cit. 166n.27). Here *b<sup>c</sup>rît* is understood not as “covenant, contract,” etc., but properly as “arrangement, settlement”; at any rate, the translation *diathēkē* (“last will”) does account for the aspect of “last will” inherent in this subst. (as does Aristophanes, *Aves* 440f.; cf. Kutsch, op. cit. 167n.30).

In accord with this use of *diathēkē*, the LXX also uses it to render *tôrâ* “instruction” (Dan 9:13 LXX), *ēdūt* “testimony” = Decalogue (Exod 27:21; 31:7; 39:35 (= LXX v 14), *kātûb* “that written (in the [law]book of Moses)” (2 Chron 25:4). The grandson of Jesus Sirach also has *diathēkē* 8x for *b<sup>c</sup>rît* (Sir 41:19 [Rahlfs: v 20]; 44:12, 18, 20, 22 [23]; 45:15, 24f.), but also 9x for *ḥōq* and in 47:11 for *ḥuqqâ* “regulation.”

In contrast to LXX, Aquila offers *synthēkē* “covenant, contract” for *bʿrît* in at least 26 instances, with (perhaps) 3 instances of *diathēkē*. Symmachus also prefers *synthēkē* (Exod 24:7); but Theodotion, who has only 4 texts with *synthēkē*, stands closer to the LXX, if *diathēkē* (11x) does not go back to his exemplar here.

4. The Old Lat. version of the OT follows (with only a few exceptions) the LXX reading, translating *testamentum* for *bʿrît*, but distances itself in this even farther from the Hebr. concept. Jerome’s new translation of the Hebr. OT (390–405 CE) renders *bʿrît* 135x with *foedus* and 96x with *pactum* and thus follows explicitly the understanding of Aquila and Symmachus, but also perhaps of his Hebr. teachers. Occurrences of *testamentum* in the Psa are additional to the few passages with it in the Vg., since an older version of the Psalter was incorporated.

E. Kutsch

## ברך *brk* pi. **to bless**

S 1288; BDB 138b; HALOT 1:159b; TDOT 2:279–308; TWOT 285; NIDOTTE 1385

I. 1. The root *brk* is attested in NWSem. and SSem. (extensive treatment of the inscriptional material in W. Schottroff, *Der altisraelitische Fluchspruch* [1969], 178–98; and G. Wehmeier, *Der Segen im AT* [1970], 8–66).

In Akk. it is represented by *karābu* “to pray, dedicate, bless, greet” (*ikribu* “prayer, consecration; blessing”). The concept of blessing in the limited sense does not, however, play a significant role among the Babylonians, and the element of greeting dominates the usage of *karābu* (cf. B. Landsberger, *MAOG* 4 [1928/29]: 294–321; *AHW* 369f., 445f.; *CAD* I/J:62–66). An etymological relationship between *brk* and *karābu* is unlikely (cf. Old SArab. *krb* “to consecrate, sacrifice”).

The Arab. derivatives, esp. frequent in thanksgiving and greeting formulae, are all based on the ground form *baraka*, defined as a benevolent power proceeding from God, saints, and some animals, plants, or objects and guaranteeing wealth, well-being, health, and good fortune (cf. *DAFA* 1:567; pre-Islamic usage makes no connection with the activity of any gods; but the Koran attributes blessing expressly to God, probably under NWSem. influence; cf. J. Chelhod, *RHR* 148 [1955]: 81f., 87f.; A. Jeffery, *Foreign Vocabulary of the Qurʾān* [1938], 75; in popular belief the two concepts compete with one another).

The relationship of *brk* to Hebr. *berek* “knee,” on the one hand (cf. Akk. *birku*

“knee,” as well as “durability, might” and “lap,” euphemistically for the genitals, but also in the context of adoption rites; cf. Dhorme 108, 156f.; *AHw* 129a; M. Cohen, “Genou, famille, force dans le monde chamito-sémitique,” *FS Basset* 203–10), and Hebr. *b<sup>e</sup>rākâ* “pond,” on the other (cf. A. Murtonen, *VT* 9 [1959]: 164), is difficult to determine.

2. The verbal stems qal, pi., pu., hitp., and ni. are attested; *b<sup>e</sup>rākâ* functions as a subst.

Most Sem. languages exhibit only the pass. ptcp. for the qal (Ug.: *KTU* 1.19.IV.32; in Aram. this form occurs almost exclusively; cf. *DISO* 44); Pun., however, also had finite qal forms, in addition to the pi. (*KAI* no. 175.4f.; J. Friedrich, *ZDMG* 107 [1957]: 282–90); pe. forms in late Aram. dialects may, conversely, have been formed secondarily in analogy to the pe. pass. ptcp. (*MG* 215n.2).

Various Arab. forms correspond to the Hebr. pi.: *barraka* (subj. people, not in the Koran) “to pronounce a blessing” (cf. Lane 1:193) and *bāraka* (subj. God) “to impart life-sustaining power”; the 5th stem substantially approximates the ni. in meaning (“to receive blessing”; see III/3), the 10th stem the hitp. (“to request blessing”; see III/2f).

The noun is attested extrabibl. in NWSem. only rarely and in late texts (cf. *DISO* 44).

PNs composed with forms of *brk*, the thanksgiving name *berekyâ(hû)* and *barak<sup>ʿ</sup>ēl*, the wish name *y<sup>e</sup>berekyāhû*, and the short form *bārûk* (*IP* 183, 195f.), have counterparts esp. in Pun. (Harris 91) and in the later Aram. dialects (A. Caquot, *Syria* 39 [1962]: 246). *b<sup>e</sup>rākâ* in 1 Chron 12:3 should probably be emended to *berekyâ* (Rudolph, *HAT* 21, 104; contra *HAL* 154b).

II. The verb *brk* and the subst. *b<sup>e</sup>rākâ* occur 398x in the Hebr. OT:

1 Chron	2	–	13	1	–	–	16
2 Chron	3	–	5	–	–	2	10
OT	71	3	233	13	7	71	398

The topographical designation *‘ēmeq b<sup>‘</sup>rākâ* (2x in 2 Chron 20:26) is counted among the occurrences of the noun, but the PN *b<sup>‘</sup>rākâ* in 1 Chron 12:3 (see I/2) is not. The inf. abs. *bārôk* (Josh 24:10, otherwise *bārēk*) belongs to the pi., not to the qal.

*brk* occurs in Bibl. Aram. only in Dan (1x pe. pass. ptcp., 3x pa.).

The root occurs with remarkable frequency in the patriarchal narratives of Gen (82x) and in Deut, while it disappears entirely in the legal portions of the Pentateuch (occurrences in Num are limited to the Balaam pericope, 14x, and the Aaronite blessing, 3x). More than half of the occurrences in the Psa concern the praise of God. In the narrative books a relatively high number of forms are used in the context of greetings and good wishes. The noun occurs relatively often in texts influenced by wisdom. In the prophetic literature the root plays a nonessential role (26x).

III. One usually assumes a basic meaning (with reference primarily to the Arab. *baraka*) “benevolent power, health-creating power.” *bārûk* (see III/1) would accordingly be “one who is gifted with health-creating power,” the pi. (see III/2) would mean “to gift someone with health-creating power or to declare someone so gifted,” the ni. (see III/3) “to experience health-creating power,” and *b<sup>‘</sup>rākâ* would be the “health-creating power” as such (see III/4).

Cf. Th. Plassmann, *Signification of B<sup>‘</sup>rākâ* (1913); S. Mowinckel, *Psalmenstudien* 5 (1924); id., *Psalms in Israel's Worship* (1962), 2:44–48; J. Hempel, “Die israelitischen Anschauungen von Segen und Fluch im Lichte altorientalischer Parallelen,” *ZDMG* 79 (1925): 20–110 = *Apoxysmata* (1961), 30–113; *ILC* 1–2:182–212; F. Horst, “Segen und Segenshandlungen in der Bibel,” *EvT* 7 (1947/48): 23–37 = *Gottes Recht* (1961), 188–202; id., *RGG* 5:1649–51; J. Scharbert, *Bib* 39 (1958): 17–26; id., *Solidarität in Segen und Fluch im AT und in seiner Umwelt* (1958); A. Murtonen, “Use and Meaning

of the Words lebErek and berEkEh,” VT 9 (1959): 158–77; C. Westermann, *Blessing in the Bible and the Life of the Church* (1978); G. Wehmeier, *Der Segen im AT* (1970).

This interpretation is probably basically correct; still it must be emphasized that health-creating power is often associated to a prominent degree with the effective *word*, particularly when people bless others (cf. Horst, op. cit.). Besides, one can ask to what degree the concept of health-creating *power* (alongside divine action) was actually still current (cf. the most probable instance, Isa 65:8).

1. (a) The qal pass. ptcp. *bārûk* indicates the state of possessing the *b<sup>ê</sup>rākâ* (not the result of a preceding act of blessing; this status is expressed by the pu.; see III/2e; cf. *HP* 216f.). As a rule *bārûk* is used as a predicate in a nom. sentence; indicative forms of *hyh* “to demonstrate oneself” are added only twice (Gen 27:33; Deut 7:14; both cases express the nuance “to prove oneself to be truly *bārûk*”).

In 63 (of 71) cases, *bārûk* is used in a pronouncedly formulaic manner, indeed, as a rule, emphatically at the beginning of an utterance (58x; also *y<sup>ê</sup>hî* “may he be . . . *bārûk*”: 1 Kgs 10:9 = 2 Chron 9:8; Prov 5:18; Ruth 2:19; negated in Jer 20:14). Of these 63 cases, 38 refer to God (also the Aram. *b<sup>ê</sup>rîk* in Dan 3:28) and 25 to people (and things pertaining to them: Deut 28:4, offspring, v 5 basket; 1 Sam 25:33, cleverness; Jer 20:14, day of birth).

On the formal structure of the Israelite blessing and its form-critical development, cf. W. Schottroff, *Die altisraelitische Fluchspruch* (1969), 163–77.

The remaining 8 cases refer to people: 3x in the cs. phrase “blessed of Yahweh” (Gen 24:31; 26:29; pl. Isa 65:23) and 5x in a simple declaration that someone is “blessed” (Gen 27:29 and Num 24:9, “whoever blesses you will be blessed”; Gen 27:33, “he shall remain blessed”; Num 22:12, “you may not curse the people, for they are blessed”; 1 Kgs 2:45, a blessing formula with a prefixed subj., Solomon).

A regular antonym for *bārûk* is *ʔārûr* (→ *ʔr*; Gen 9:25f.; 27:29; Num 24:9; Deut 28:3–6 par. vv 16–19; Jer 17:7 par. v 5; 20:14).

(b) In reference to people, *bārûk* has largely the same meaning as *ʔašrê* “happy” (→ *ʔšr*; cf. Jer 17:7 with Psa 40:5) and was apparently replaced in later times by this word. *bārûk* (in this sense the LXX generally rendered it by *eulogēmenos*) is, first, an exclamation of thankfulness and admiration, and, at the same time, a felicitation (Gen 14:19; 1 Sam 23:21; 25:33; 26:25; 2 Sam 2:5; Ruth 2:19f.; 3:10; cf. Prov 5:18, “may your fountain [= wife] be *bārûk*,” i.e., a source of joy). The one designated as *bārûk* is the originator of a healthful situation and therefore the object of

praise and thanks. The one praised is preferably associated with God: *bārûk ʾattâ Iʿyhwh* “you are, thanks to Yahweh, a doer of good,” i.e., equipped by Yahweh with benevolent power (1 Sam 15:13; fem.: Ruth 3:10; pl.: 1 Sam 23:21; 2 Sam 2:5; Psa 115:15; 3d per.: Gen 14:19; Judg 17:2; Ruth 2:20; cf. also the cs. phrase “blessed of Yahweh,” see 1a, further Num 22:12; Psa 118:26). In Judg 17:2, the exclamation *bārûk bʿnî Iʿyhwh* is the mother’s protective measure against a curse threatening the son.

The *le* in the expression *leyhwh* is often interpreted as a *lamed* auctoris and *bārûk* is understood passively as a wish (“may X be blessed by Yahweh”). In Aram. burial and memorial inscriptions, however, *bryk l* and *bryk qdm* (“blessed is/may be X to”) alternate without significant difference in meaning (cf. *RES* 1788 with *KAI* nos. 267, 269; *RES* 608, 960–62, 1366 with *RES* 1364, 1368, 1370, 1376, etc.; cf. also the expression *brk l* “to bless someone to a deity” = “to recommend someone to a particular deity with the request that the deity bless the individual,” Phoen. *KAI* no. 50.2; Eg. Aram. *RHR* 130:17:2f.; Hermop. nos. 1–6, with the addition in each case of “that she [the deity] may let me see your face again”; perhaps also in Ug. *KTU* 1.17.I.23; cf. *UT* no. 517; C. H. Gordon, *Ugaritic Literature* [1949], 86; also Hebr. *brk* pi. *lipnʾyhwh*, Gen 27:7). This construction may correspond to the OT usage, so that the *le* should also be understood here in the sense of a *lamed* relationis: “complete blessing with Yahweh” (cf. J. Scharbert, *Bib* 39 [1958]: 21f.: “may X be one for Yahweh to bless”). The fact that syntactically analogous curse formulae are formed with *lipnʾ* supports this interpretation (Josh 6:26; 1 Sam 26:19 pl.; cf. Num 5:16; 1 Kgs 8:13).

Also in relation to people, the formula that begins with *bārûk* in Deut 7:14 and 28:3–6 (v 5 in reference to fruit basket and kneading trough) describes the Israelites and their activity as crowned with success, although only to the degree that they adhere to the instructions of Yahweh. The sixfold repetition of the word in Deut 28:3–6 (cf. the corresponding sixfold *ʾārûr* “cursed” in Deut 28:16–19 and the twelvefold *ʾārûr* in Deut 27:15–26) clearly indicates the character of the effectual, energizing word (cf. the triple repetition of *bārûk* in 1 Sam 25:32f. and the double in Gen 14:19f.; cf. also 1 Kgs 10:8f. = 2 Chron 9:7f. with *bārûk* alongside a double *ʾašrê*). These presumably cultic series concern the creation of a virtual well-being zone (or, for *ʾārûr*, an illness zone), formed in accordance with the behavior of the Israelites. The *bārûk* formula in Jer 17:7 (alongside *ʾārûr*), which resembles wisdom diction (cf. Psa 40:5), also belongs in this context.

(c) In reference to God, *bārûk* (in this sense the LXX generally rendered it with *eulogētos*; Exod 18:9f.; 1 Kgs 5:21; Zech 11:5; cf. J. Hempel, *ZDMG* 79 [1925]: 88f.) is an even more joyous exclamation of thanksgiving and admiration. The basis of joy is as a rule specifically cited, introduced with *ʾašer* (Gen 14:20; 24:27; Exod 18:10; 1 Sam 25:32, 39; 2

Sam 18:28; 1 Kgs 1:48; 5:21; 8:15 = 2 Chron 6:4; 1 Kgs 8:56; 10:9 = 2 Chron 9:8; Psa 66:20; Ruth 4:14; Ezra 7:27; 2 Chron 2:11), *še-* (Psa 124:6), *kî* (Psa 28:6; 31:22), a ptcp. (Psa 72:18; 144:1), or an asyndetic clause (Zech 11:5). One occasionally addresses God directly: “you are *bārûk*” (Psa 119:12; 1 Chron 29:10).

God is *bārûk* because he gives all sorts of beneficial things: a king (1 Kgs 1:48), indeed, a wise king (1 Kgs 5:21; 10:9 = 2 Chron 9:8), rest (1 Kgs 8:56), might (Psa 68:36), good thoughts (Ezra 7:27); because he keeps faith (Gen 24:27; Psa 31:22; 66:20; Ruth 4:14), grants victory (Gen 14:20; 2 Sam 18:28), sends an enraged man a wise woman (1 Sam 25:32), then sees to justice himself (1 Sam 25:39), teaches the art of war (Psa 144:1), hears prayers (Psa 28:6; 66:20), does wonders (Psa 72:18), fulfills promises (1 Kgs 8:15), and, finally, even apparently gives a scoundrel opportunity to become rich (Zech 11:5). All this may be summarized to a degree in the lapidary formula *bārûk šēm k<sup>e</sup>bôdô* (Psa 72:19).

Such an exclamation is not linked solely to a particular cultic situation: it forces itself to the lips whenever the individual suddenly finds himself/herself before a demonstration of the benevolent might of God. One can say, therefore, that one “blesses God (in prayer)” (Gen 24:27; Psa 135:19–21; 1 Chron 29:9f.), or also—typically—that one “blesses people” (Gen 14:19f.; 1 Kgs 1:47f.; 8:14f., 55f.). All cases concern a declaration of God as *bārûk* on the basis of a concrete demonstration of his might. One of the analogous usages of *bārûk* mentioned in 1b above is excluded from usage in reference to God: one cannot call him *bārûk* sub conditione.

2. (a) In the pi. *brk* has various shades of meaning, primarily factitive and declarative-estimative, according to whether God (see 2d) or people (with people as obj., see 2b; with God as obj., see 2c) are subjects; the pu. (see 2e) and the hitp. (see 2f) offer the corresponding pass. and reflexive meanings.

Of the 233 occurrences, 97 concern God’s blessing activity (incl. Gen 48:16: angel; Gen 32:27, 30: man; Gen 49:25; txt em *ʔēl šadday*), 136 concern human activity (incl. Psa 103:20–22: heavenly beings, creation). God is the grammatical subj. of finite verbs in 87 cases (in addition to 4x impv., 4x inf. abs., 2x inf. cs.), people are the subj. 85x (incl. Job 31:20: loins of the poor; in addition to 26x impv., 5x inf. abs., 15x inf. cs., 5x ptcp.).

The 6 cases that use *brk* pi. euphemistically for “to curse” (1 Kgs 21:10, 13; Job 1:5, 11; 2:5, 9) may be mentioned first. Regarding the fact that the OT never has God as the obj. of a verb for “to curse,” except in prohibitions (cf. the commandment Exod 22:27; Lev 24:15; further Isa 8:21; 1 Sam 3:13 txt?), cf. J. Hempel, *ZDMG* 79 (1925): 91; as well as Schottroff, op. cit. 165.

Outside the OT and the texts under its influence, NWSem. uses the finite verb *brk* almost exclusively with particular deities as the subj. The notion that a person may bless (= pronounce a blessing formula) may, however, be attested in Ug. by *KTU* 1.19.IV.32 (Pġt asks her father or the gods for the blessing). The meaning “to praise (God)” is entirely absent. Ug. parallels *brk* with *mrr* “to strengthen” (*KTU* 1.15.II.14f., 19f.; 1.19.IV.32f., I.23f., 34f.), clearly demonstrating that the primary meaning is “to equip with life-force.” In Pun. *ḥnn* “to demonstrate grace” parallels *brk* once (*CIS* 1:5891.2f.); in *CIS* 1:196.5 this verb replaces the *brk* common in the closing wishes of dedicatory inscriptions.

The content of blessing is usually not distinctly cited; it is already contained in the verb itself. Exceptions use either a double acc. (Gen 49:25; Deut 12:7; 15:14; Isa 19:25; cf. *KAI* no. 26A.III.2f.) or introduce the content with *be* (Psa 29:11; cf. *KAI* no. 26C.III.16f.; *ANET* 654a); in all other cases this prep. indicates the realm in which the blessing is bestowed (Gen 24:1; Deut 2:7; 14:29; 15:4, 10, 18; 16:15; 23:21; 24:19; 28:8; 30:16; contra J. Scharbert, *Bib* 39 [1958]: 21n.5).

(b) In everyday Israelite speech, *brk* pi. (subj.: people, obj.: people) means, first, quite simply “to greet” (Gen 47:7; 1 Sam 13:10; 25:14; 2 Sam 6:20; 2 Kgs 4:29; 10:15; Prov 27:14; 1 Chron 16:43), “to bid farewell” (Gen 24:60; 28:1; 32:1; 47:10; Josh 22:6f.; 2 Sam 13:25; 19:40; cf. Ug. *KTU* 1.15.III.17), or “to congratulate” (Exod 39:43; 2 Sam 8:10 = 1 Chron 18:10; 1 Kgs 1:47; Neh 11:2; oneself: Psa 49:19), “to wish well” (Josh 14:13), “to thank” (Deut 24:13; 2 Sam 14:22; Job 31:20), or “to honor thankfully” (Prov 30:11). The use of the verbs often seems to have lost much of its vigor; indeed, the most correct usage would be the locution “to pronounce someone *bārûk*” (cf. Arab. *barraka*, further Arab. *kabbara* “to declare Allah *akbar*,” *sallama* “to declare someone *salām*”; cf. D. R. Hillers, “Delocutive Verbs in Biblical Hebrew,” *JBL* 86 [1967]: 320–24), i.e., originally, to describe one as benevolently active and as possessor of health-creating power. Indeed, one said “*bārûk ʾattā*” or “*bārûk yhwḥ*” (cf. 1 Kgs 1:47f.) or also *y<sup>c</sup>bārek<sup>c</sup>kā yhwḥ* “Yahweh bless you!” (Jer 31:23) or *yhwḥ ʿimm<sup>c</sup>kā* “May Yahweh be with you!” (Ruth 2:4). Mention is occasionally made of embracing the departing (*nšq* Gen 32:1; 2 Sam 19:40), bowing before superiors (2 Sam 14:22), and perhaps also on parting prior to marriage, offering a lengthy blessing (Gen 24:60).

Such declarations of *bārûk*, “greeting,” “bidding farewell,” and “congratulating” were also made, naturally, in the realm of cultic encounters or in encounters with “holy” persons. To be mentioned here are e.g., Melchizedek’s “greeting” to Abraham (Gen 14:19, with an extended *bārûk* formula), or the “farewell” of the priest Eli to Elkanah (1 Sam 2:20, with a wish formula). At the beginning of cultic assemblies one “greeted” the participants (Josh 8:33; 1 Kgs 8:14f.; in the course of a procession, Psa

118:26), at the end one “dismissed” them with blessing formulae (Lev 9:22; 2 Sam 6:18; 1 Kgs 8:55; Psa 129:8). Examples of the formulae are *bārûk yhwh* (1 Kgs 8:15, 56), *b<sup>ê</sup>rûkîm <sup>l</sup>attem* (Psa 115:15), *birkat-yhwh <sup>l</sup>êkem* (Psa 129:8), or *y<sup>ê</sup>bārek<sup>ê</sup>kā yhwh* (Num 6:24, with the extended, tripartite formula of the priestly blessing with the doubled appeal to the “face of Yahweh,” i.e., his wellness-creating presence). In these cultic contexts the actual wellness-creating character of the *bārûk* pronouncement was probably more vivid than usual.

The one who pronounces the formula “places himself/herself” before the congregation (1 Kgs 8:55; Josh 8:33), “spreads his/her arms over them” (Lev 9:22), and “speaks with a loud voice” (1 Kgs 8:55). Then “one places the name of Yahweh on the people” (Num 6:27). Perhaps the only passage in which a prophet “blesses” a cultic meal (1 Sam 9:13) should be mentioned in this context. Samuel presumably “blesses” not the meat but the participants in the sacrificial meal; cf. J. Scharbert, *Bib* 39 (1958): 24; contra J. Hempel, *ZDMG* 79 (1925): 35; F. Horst, *EvT* 7 (1947/48): 25; A. Murtonen, *VT* 9 (1959): 163.

In the course of the cultic assembly, absentees could also be included in the “congratulation” (Exod 12:32; cf. *pll hitp. b<sup>ê</sup>cad* “to make intercession for” par. to *brk pi.* in Psa 72:15).

The Balaam pericope deals with a cultic congratulation of a special kind (Num 22–24). Instead of “cursing” (*ʔr*, Num 22:6; 24:9; *qbb*, 23:11, 25; 24:10; *z<sup>ʕ</sup>m*, 23:7f.), the man with access to extraordinary powers must declare Israel *bārûk*, because—as God observes at the very outset—it is already irrevocably *bārûk* (22:12).

Of supreme importance for people in the ancient Near East is one’s final “farewell” before death (Gen 27; 48; 49; Deut 33). In the case of such a “farewell” and “well-wishing,” *brk pi.* seems to acquire an expressly factitive sense (cf. *HP* 216f.): through the pronouncement of *bārûk* one makes the addressees *bārûk*; this result is at least the original intention of the custom. This intention is the reason for the measures designed to amplify the “power” to be transferred (the meal of Isaac), for the emphasis upon the exact identification of the recipient (Gen 27:24; 48:8f.; cf. the careful naming of the sons and tribes in Gen 49 and Deut 33), for the embrace (Gen 27:26f.), and for the laying on of hands (Gen 48:14). The well-considered choice of the formulae pronounced indicates, however, that these formulae did not simply involve a transferral of power; these formulae refer primarily to fertility, well-being, and victory over the enemies.

(c) 40x (27x in Psa) people (or God’s creation, Psa 103:20–22) “bless” God, i.e., declare him *bārûk* (in addition to the Aram. Dan 2:19; 4:31, see also the euphemistic usage of *brk pi.* [see 2a], and Isa 66:3 “to worship an idol”). Par. expressions indicate that the usage deals primarily

with a laudatory “thanksgiving”: *hll* pi. “to praise” (Psa 145:2; cf. 135:1, 19f.), to proclaim praise (*tehilla*®; 66:8; 145:21; cf. 34:2), *ydh* hi. “to praise” (100:4; 145:10), to exclaim the name of Yahweh (63:5), *šr* “to sing” and *bšr* pi. “to proclaim” (96:2), to exalt Yahweh (145:1), to remember his benevolent deeds (103:2).

Since this meaning is to be expected for the declarative pi. (“to designate God as *bārûk*”; cf. Gen 24:27, *bārûk yhw* with the summary in v 48 “and I blessed Yahweh”), the assumption that this usage of the word described first a process intended to intensify God’s power (so e.g., S. Mowinckel, *Psalmenstudien* [1924], 5:27–30; S. H. Blank, *HUCA* 32 [1962]: 85–90) becomes unnecessary, esp. since this usage may not be demonstrated otherwise in Sem. and it apparently rests upon an inner-Hebr. semantic development. Derivatively, *brk* pi. can also accompany other objs. (Psa 10:3 “he praises success,” txt em; 49:19 “he praises himself”; Isa 66:3 “he worships an idol”).

For such a “blessing” one prostrates oneself before Yahweh (Gen 24:48; Neh 8:6; 1 Chron 29:20), or one stands up (Neh 9:5), positions oneself in the temple (Psa 34:2, anytime; 134:1, at night), in the midst of the assembly (Psa 26:12; 68:27), in unison with the whole creation (Psa 145:10; 103:20–22), while one cries “*bārûk yhw*” (Gen 24:27; Psa 135:18–21; 1 Chron 29:9f.). Grounds for this laudatory thanksgiving are personal experiences (Gen 24:48), the experience of victory over the enemies (Josh 22:33; Judg 5:2, 9), or—in the Psa—anything at all, for which Israel has God to thank.

(d) In 80 of 97 cases with *brk* pi. and a divine subject, the discussion concerns the fact that God “blesses” or “may bless” people (Gen 25x, Deut 19x, Psa 14x), in 17 cases the blessing of God extends to animals (Gen 1:22; cf. Deut 7:13) and things (Sabbath: Gen 2:3; Exod 20:11; house and field, work and harvest, etc.: Gen 27:27; 39:5; Exod 23:25; Deut 7:13b; 28:12; 33:11; Jer 31:23; Hag 2:19; Psa 28:9; 65:11; 132:15[bis]; Job 1:10; Prov 3:33): God makes people and things *bārûk*, he furnishes them with the power of fertility and growth, he grants life, happiness, and success.

*brk* pi. in these texts is often paralleled by a whole series of verbs such as “to make fruitful, to multiply” (Gen 17:20, etc.), “to love, to multiply” (Deut 7:13), “to grant life, to multiply” (Deut 30:16), “to protect, to cause the face to shine, to lift the countenance, to grant *šālôm* (→ *šlm*)” (Num 6:23–27), but esp. → *ntn* “to give” (children and riches, Gen 17:16; 24:34; 28:3f.; 48:3f.; Psa 29:11); also e.g., “to pour out grace” (Psa 45:3), “to help” (Gen 49:25), “to establish the gates” (Psa 147:13), “to be with you” (Gen 26:3, 24), etc. The expression “to grant *šālôm*” summarizes the blessing activity of God (Psa 29:11; cf. Hempel, op. cit. 51ff., but also Westermann, *Blessing* 22).

It is clear that such activity of God often appears as a wish formulated by people, i.e., as a felicitation and benediction, e.g., for Isaac (Gen 28:3),

Jacob (Gen 48:16; 49:25), Moses (Deut 1:11; cf. 33:11), or anyone at all in daily life, on greeting (Ruth 2:4), and, finally, also in the cult (Psa 29:11; 67:2, 7f.; 115:12f.; 128:5; 134:3; Num 6:24), occasionally in the form of a prayer addressed directly to God (Psa 5:13; 28:9; 109:28; Deut 26:15; 33:11). This phenomenon indicates a close association between God's "blessing" and human speech: God's activity can be actualized through human speech, it can be ignited by it.

Many texts demonstrate therefore that God's health-creating act can be in response to human deed and speech: the hearing of prayer (Gen 17:20; cf. 32:27, 30) or the fulfillment of the blessing pronounced by the priests (Num 6:27). In addition, God "blesses" those who "bless" his elect (Gen 12:3), and he "blesses" other people for the sake of the chosen (Gen 26:24; 30:27; cf. 39:5), i.e., he creates well-being and success for them. God is certainly the author of beneficial activity; yet the person must also affirm this activity (cf. Psa 109:17).

Deut (cf. already Gen 22:17) esp. emphasizes the close relationship between human action and divine blessing: if Israel fully subjects itself to Yahweh's instructions, he will "bless (it) in all its undertakings," i.e., cause everything to succeed for it, in the city, in the field, at the beginning of work, at its end, etc. (e.g., Deut 7:13; 14:29; 15:10, 18; 23:21; 24:19; 30:16; cf. 27:1–14). Conversely, Yahweh's blessing is a motivation for the joyous fulfillment of his instructions (12:7; 15:4, 6, 14; 16:10, 15, etc.).

In this sense the psalmist confesses: "You bless the righteous" (Psa 5:13), just as Job is richly rewarded for his faithfulness (Job 42:12).

Despite the close interaction between human and divine word and deed, both the old patriarchal tradition (Gen 12:1–3) and the later P (Gen 1:28; 5:2; 9:1; 17:16) teach that in the final analysis all "blessing," i.e., all benevolent power, the source of fertility, victory, and well-being, is based on God's free decision, grounded only in himself, and on his word, which actualizes this decision (cf. H. Junker, *BETL* 12 [1959]: 548–58; C. Westermann, *BHH* 3:1757f.). Perhaps one should add 2 Sam 6:12, where Yahweh "blesses (Obed-Edom) for the sake of the ark," i.e., bestows well-being (according to 1 Chron 26:4f.: eight sons) on account of his own presence.

(e) The pu. is the pass. conjugation corresponding to the pi. In reference to people (Num 22:6; Psa 37:22; 112:2; 128:4; Prov 20:21; 22:9) or things (Deut 33:13, land; 2 Sam 7:29b = 1 Chron 17:27b, the Davidic dynasty), it means "someone (something) has been blessed." Num 22:6 ("he, whom you bless, is blessed," par. *yû'ār* "he receives a curse") and 1 Chron 17:27 ("for you, Yahweh, have blessed it"; cf. 2 Sam 7:29 "through your blessing") speak, then, expressly of a prior act of blessing. God's authorship of the blessing is otherwise either directly stated (Deut 33:13;

Psa 37:22) or implied by the context (Psa 112:2; 128:4; Prov 20:21; 22:9).

The pu. ptc. appears in Psa 113:2; Job 1:21; Aram. Dan 2:20 in the function that the pi. pl. impv. has otherwise (cf. Psa 113:1 *hal'êlû*): people are summoned to praise God. All three cases employ the juss.: “May the name of Yahweh (God) be praised.” The same usage, in reference to a king, should apparently be assumed for Psa 72:17 (txt em according to LXX).

Par. to the call to the cultic curse against Meroz (Judg 5:23; cf. 21:5), Judg 5:24(bis) probably deals with a call to carry out a blessing ritual for Jael.

(f) The hitp. (reflexive pi. with *t* -prefix) means quite generally “to make or call oneself *bārûk*.” Deut 29:18 is rather unequivocal in this regard: as a countermeasure against a threatening curse one calls oneself *bārûk* “protected” (cf. Num 22:12; 23:8) by declaring: “I have *šālôm*” (i.e., nothing can happen to me). The formula *brk* hitp. *be* “to make oneself happy through (mention of another, particularly blessed person, or God in a blessing)” is a favorite appeal to this other person as a model (Gen 22:18; 26:4; Jer 4:2 refers to Israel; cf. Rudolph, HAT 12, 31; Psa 72:17) or source (Isa 65:16[bis], God) of benevolent power (cf. Gen 48:20; Prov 10:7). The translation of A. Murtonen (VT 9 [1959]: 172), “to consider oneself fortunate on account of,” is much too weak.

3. The ni. occurs only 3x in the patriarchal narratives (Gen 12:3b; 18:18; 28:14). It is often understood as a pass. (e.g., Zorell 130a; cf. von Rad, *Gen*, OTL [1972], 160) or in the sense of the hitp. (“to wish for blessing for oneself,” e.g., HAL 153; H. Gunkel, *Gen* [19103], 165). Yet the usage of this conjugation—in contrast to the pu. and hitp.—probably emphasizes its specific meaning. It indicates an action completed on the subj., without viewing the subj. itself (hitp.) or another person (pu.) as the author of the action (cf. H. Junker, BETL 12/13 [1959], 553). *brk* ni. means, then, “to experience blessing, participate in blessing,” etc. (cf. J. Schreiner, BZ 6 [1962]: 7; O. Procksch, *Gen* [19243], 96f.).

Gen 12:3b means, then, “by you shall all the families of the earth gain blessing.” This is the only meaning possible for Gen 18:18; God’s monologue inserted by the Yahwist in the narrative (18:17f.) is meant to explain God’s desire to include Abraham in his secrets; he does so because Abraham plays a significant role in his plan of salvation: “through him shall all families of the earth gain blessing.” Gen 28:14 renews the same promise for Jacob and his descendants.

4. (a) Like *brk* pi., the subst. *b<sup>ê</sup>rākâ* occurs in a multitude of meanings. The OT seems to use *b<sup>ê</sup>rākâ* only in some relationship to God’s action, not simply to indicate the power of growth and increase (corresponding to Arab. *baraka*; see 1a), except perhaps in Isa 65:8.

God's intention not to destroy his whole people is manifest here in an idiom from the language of the vinedresser; the proverb is best understood from the standpoint of the second pruning of the vine (Dalman, *AuS* 4:312f., 330f.) in which infertile vines are removed; the vines that promise to bear fruit should be left uncut: "As is said, when one finds sap in the vine: Do not ruin it, there is life in it."

(b) In approximately 25 cases *b<sup>ē</sup>rākā* indicates the effective *bārûk*-declaration directed by people to people (Gen 27:12–41, 6x; Deut 11:26f., 29; 23:6 = Neh 13:2; Deut 28:2; 30:1, 19; 33:1; Josh 8:34; Ezek 44:30; Mal 2:2; Job 29:13; Prov 10:6f.; 11:11, 26; 24:25; perhaps also Gen 49:28), i.e., the benevolent word of blessing (cf. the programmatic phrase in Prov 11:11 "through the *bārûk* saying of the righteous the city will be exalted.")

In Gen 27:12 the pair of terms *b<sup>ē</sup>rākā* and *q<sup>ā</sup>lālā* indicate both the blessing or curse saying and the resulting success or failure: "Then I brought on myself curse (pronouncement and power) and not blessing (pronouncement and power)." The same double meaning may also be present in the other usages of *b<sup>ē</sup>rākā* in the context of Gen 27 (vv 35–38, 41). The marked objective character of blessing here (v 35, "your brother has taken your blessing"; cf. v 36a; v 36b, "have you not reserved a blessing for me?") may be largely attributed to the adoption of a pre-Israelite exemplar of the narrative (cf. E. A. Speiser, *JBL* 74 [1955]: 252–56).

2 Kgs 18:31 = Isa 36:16, "make *b<sup>ē</sup>rākā* with me = let us exchange blessings"—an invitation to an official peace treaty—presumably also belongs here (cf. A. Murtonen, *VT* 9 [1959]: 173f.; according to J. Scharbert, *Bib* 39 [1958]: 19, *b<sup>ē</sup>rākā* should be understood here as "allegiance"; cf. 2 Sam 14:22; 1 Kgs 1:47).

(c) In 6 or 7 passages *b<sup>ē</sup>rākā* indicates a gift. At issue here is a *bārûk*-declaration in the form of a gift; derivatives of the root *brk* are often closely associated with the idea of giving.

Caleb bequeaths his daughter a *b<sup>ē</sup>rākā* (Josh 15:19 = Judg 1:15), Jacob brings Esau a *b<sup>ē</sup>rākā* (Gen 33:11), just as Abigail brings David (1 Sam 25:27), David, the elders of Judah (1 Sam 30:26), and Naaman, Elisha (2 Kgs 5:15). In Prov 11:25 *nepes<sup>š</sup> b<sup>ē</sup>rākā* is presumably a person who gives gifts. 1 Kgs 10:8–10 explicitly links *bārûk*-declarations to gift giving.

(d) In Neh 9:5 and 2 Chron 20:26(bis), *b<sup>ē</sup>rākā* indicates the people's laudatory thanksgiving of God, the laudatory *bārûk*- declaration (Neh 9:5, "and they praise (*brk* pi.) the majestic name, which is exalted above all glory (*b<sup>ē</sup>rākā*) and all praise (*tehilla*®)"; 2 Chron 20:26 "explains" the place-name *ēmeq b<sup>ē</sup>rākā* with reference to the praise offered there). This usage apparently developed only secondarily from the usage of *brk* pi. in the

sense of “to praise” (see 2c). In Judaism this type of usage of the term became the most common: *b<sup>ē</sup>rākā* = “benediction” (cf. the Mishnah tractate *Berakot*).

(e) In 23 cases *b<sup>ē</sup>rākā* is associated with Yahweh, particularly as a summary of his health-creating activity (“Yahweh gives blessing,” etc., Gen 28:4; Exod 32:29; Lev 25:21; Deut 28:8; Isa 44:3 par. *rūaḥ* “spirit”; Joel 2:14; Mal 3:10; Psa 21:4; 133:3 par. *ḥayyîm* “life”; “from Yahweh” Psa 24:5 par. *š<sup>ē</sup>dāqā* “righteousness”; “Yahweh’s blessing,” etc., Gen 39:5; Deut 12:15; 16:17; 33:23 par. *rāšôn* “good fortune”; 2 Sam 7:29; Psa 3:9 par. *y<sup>ē</sup>šû<sup>‘</sup>ā* “salvation”; 129:8; Prov 10:22; mediated by various natural powers, Gen 49:25 3x; Ezek 34:26b; Psa 84:7). Many texts deal more emphatically with the transmission of power (*šwh* pi. “to regulate,” Lev 25:21; Deut 28:8; Psa 133:3; “to pour out,” Isa 44:3; cf. Mal 3:10), others focus upon its effects, namely fertility of the fields and well-being among people (Gen 39:5; Deut 12:15; 16:17; 33:23; Joel 2:14; Mal 3:10; Psa 21:4; Prov 10:22), the status of the recipient of the promise (Gen 28:4), and of the priest (Exod 32:29), and the continuation of the dynasty (2 Sam 7:29). The statement made in a few passages that Yahweh “pours” the *b<sup>ē</sup>rākā* may be related somehow to the occasional appearance of the *b<sup>ē</sup>rākā* as vitalizing rain, dew, etc. (Gen 49:25a; Ezek 34:26b; Psa 84:7). In a land like Israel, God’s beneficial rule is understandably experienced, among other ways, in the distribution of the rains; yet this usage should not mislead one to see the central meaning of the word in this element.

(f) Theologically interesting, if not easy to interpret, are the 5 cases (in addition to Ezek 34:26a txt?), where people appear as *b<sup>ē</sup>rākā* for others: Gen 12:2; (Abraham for the nations); Isa 19:24 (Israel in the midst of the world); Zech 8:13 (Israel among the nations); Psa 37:26 (the descendants of the righteous for their fellows); Psa 21:7 (pl., the king for his people). In Psa 37:26 *b<sup>ē</sup>rākā* status is brought about through God’s health-creating word and deed. The people characterized as *b<sup>ē</sup>rākā* are truly *b<sup>ē</sup>rūkîm*, i.e., the essence of benevolence and well-being (cf. Psa 21:7), and are therefore, on the one hand, a source of well-being for others (so H. Junker, *BETL* 12/13 [1959]: 553; contra J. Scharbert, *Bib* 39 [1958]: 25: a proverbial example in blessings), and on the other hand, an incarnate blessing, “through which” one calls others and oneself *bārûk*.

(g) In a few passages *b<sup>ē</sup>rākā* (or the pl.) indicates the status of “good fortune,” whether the result of human *bārûk*-saying or of divine *bārûk*-making.

According to Prov 28:20, the one who acts faithfully is *rab-b<sup>ē</sup>rākôt* “rich in well-being” (or “rich in pronouncements of blessing”?); opposite: “whoever seeks to become

rich quickly does not avoid injury”; cf. Prov 28:27, where “rich in curses” is the opposite of “without want”). Psa 109:17 uses the word in its double meaning: “Whoever does not love the *b<sup>ṣ</sup>rākā* (= the benediction) distances himself/herself from it (i.e., the *b<sup>ṣ</sup>rākā* as well-being effected by the benediction).” The *b<sup>ṣ</sup>rākôt* in Gen 49:26(bis) should also presumably be perceived as well-being resulting from a *bārûk*- declaration (cf. v 25).

IV. The overview of the theological usage of the word group in the individual layers of the OT may be divided, in accordance with the three major categories of usage, into treatments of God’s blessing (IV/1; see esp. III/1a, 2a, d, e, 3, 4e), blessing through human agency (IV/2; see III/1a, 2b, f, 4b, c) and the praise of God (IV/3; see III/1c, 2c, e, 4d).

1. OT language concerning God’s blessing has *brk* first (a) in the adaptation of pre-Yahwistic traditions, then (b), esp. in the promises to the patriarchs in Gen in J and P, (c) in Deut, and (e) in wisdom, while *brk* fades in significance (d) in the prophetic literature.

(a) A few passages preserve the memory that the blessing is not a specifically Israelite phenomenon, but one that also occurs among the neighbors of God’s people (esp. in Num 22–24; cf. particularly 22:6). The OT also unabashedly incorporates materials that show that blessing was originally understood as a substance effective in itself (Gen 27: the dying father transfers his life-force to his son; Gen 32: Jacob wrests the blessing from the numen). Yet such texts are then edited so that no doubt can arise about the OT’s contention that Israel’s God is the only true source of all blessing (thus the benediction in vv 27–29 interprets the blessing extorted by Jacob in the context of Gen 27 unequivocally as God’s gift; according to Gen 32:30 the deity blesses freely; Balaam must act toward Israel in express commission of Yahweh, Num 22:18; 24:13 J; 22:38 E; verbal clauses relate the impersonally formulated benedictions in Deut 7:14; 28:3–6 to God’s action; cf. 7:13; 28:7–14). Not only passages that explicitly name Yahweh as giver of blessing, but also all other contexts integrate the discussion of blessing with the faith of Israel: all blessing comes from Yahweh.

Remarkably, very little is said concerning the manner of its mediation. Blessing is experienced in the natural processes of growth and multiplication, in productivity and success. Even in these phenomena, faith sees Yahweh at work, without the necessity of always expressly naming his activity. Above all, the texts do not give evidence that—as often maintained—blessing was traced to the effectiveness of the divine word. The whole OT relates blessing to divine speech only in two contexts: in P’s creation account (“God blessed, saying” Gen 1:22, 28; 9:1; cf. 35:9f.; 48:3f) and Isa 19:25 (“whom Yahweh of hosts has blessed, saying”). The first instance subordinates the discussion of blessing to the priestly notion of creation through the word, the second may involve an imitation of a prophetic speech. Nevertheless, these exceptions confirm the rule that the OT understands blessing as a direct act of Yahweh.

(b) The blessing concept, originally naturalistic and then anchored in the narrow realm of the family (cf. e.g., Gen 24:34–36: the blessing of Abraham = “Sarah has born him a son even at his age”), is related to the activity of the God who works in the history of his people, first of all through the adaptation of this word in the promises to the fathers (Gen 12:2f.; 17:16, 20; 22:17; 26:3, 24; 28:14): the God who maintains the life of his people and multiplies them in the cultivated land is no other than he who saved Israel from Egypt (on the distinction between the saving and blessing activity of God, cf. Westermann, *Blessing* 1–14, among others).

That this viewpoint became definitive for the OT may be essentially because of the theological work of the Yahwist (cf. H. W. Wolff, “Kerygma of the Yahwist,” in W. Brueggemann and Wolff, *Vitality of OT Traditions* [1982], 41–66). For J the promise of descendants stands in the foreground in the blessing (Gen 12:2, “I will make you a great nation and I will bless you”; 26:24, “I will be with you and bless you and multiply your descendants”). Yet Yahweh’s actual goal is not reached in Israel’s growth to a great and mighty people. As the structure of the promise in Gen 12:2f. makes clear (cf. A. Murtonen, *VT* 9 [1959]: 159f.; H. Junker, *BETL* 12/13 [1959]: 554; Wolff, *op. cit.* 47–49), the actual goal is “that in you all families of the earth shall gain blessing” (Gen 12:3b; cf. 18:18; 28:14). With the call of Abraham, the possibility of God’s blessing takes the place of the curse burdening humanity (Gen 3–11, 5x *yr* “to curse”).

P relates the blessing to the two most important elements of the promise to the patriarchs, the promises of descendants and of land (cf. Gen 17:4–8; 28:3f.; 35:11f.; 48:3f.). God’s blessing applies not just to Israel but to all of humanity from the beginning of creation onward. It consists of God’s providing humanity, as all living beings (Gen 1:22), with the power of fertility and multiplication (cf. the frequent combination of *prh* and *rbh* qal: Gen 1:22, 28; 8:17; 9:1, 7; 35:11; 47:27; Exod 1:7; hi.: Gen 17:20; 28:3; 48:4; Lev 26:9; outside P only in Jer 23:3, in reverse order, Jer 3:16; Ezek 36:11); the genealogies characteristic of P clarify the manner in which the blessing appears (cf. Westermann, *Gen*, CC, 1:17f.).

The concept of blessing characteristic for this documentary source may also be consistently maintained in the passage that discusses the Sabbath blessing (Gen 2:3a; God’s blessing of things and institutions is mentioned elsewhere in Gen 27:27; 39:5; Exod 20:11; 23:25; Deut 7:13; 28:12; 33:11; Jer 31:23; Psa 65:11; 132:15; Job 1:10; Prov 3:33): since God sets the holy day apart (*qdš* pi.), he furnishes it with a power that makes it “fertile” for humanity (cf. Westermann, *Gen*, CC, 1:167–77).

The gift of the land is, then, in the real sense the “blessing of Abraham” (Gen 28:4; cf. the repetition of the promise to Jacob, Gen 48:4).

(c) Deut does not relate the blessing to the gift of the land itself

(regularly associated with Yahweh's "oath"), but to the maintenance and support of life in the cultivated land (cf. the blessing in Deut 7:13; 14:29; 15:4, 10, 18; 16:15; 23:21; 24:19; 28:8, 12; 30:16; cf. Exod 23:25). The commandment to place the blessing on Gerizim and the curse on Ebal on entry into the land (Deut 11:29) signals the beginning of a new epoch in salvation history with the conquest of the land: God's enduring activity in blessing replaces episodic acts of salvation (cf. Josh 5:11f.; the enjoyment of the produce of the land replaces the eating of manna). Israel's relationship to God is also largely determined by its attitude to the land's produce: will they be understood as gifts of the Canaanite fertility gods or do the people recognize Yahweh as the sole grantor of all blessing? The more carefreely Israel enjoys the benefits of blessing (namely the fertility of people, cattle, and field; cf. Deut 7:13; 28:3–6), the more properly it honors Yahweh (cf. von Rad, *Theol.* 1:229f.).

As a result, a close functional relationship between blessing and call to obedience also exists, mirrored in a peculiar duplication of statements: on the one hand, the promise of blessing is issued in an unconditional form (Deut 16:15; 28:8, 12); on the other hand, one encounters statements that call for keeping the commandments "in order that Yahweh, your God, may bless you" (14:29; 23:21; 24:19; cf. 15:10, 18) or which are conditionally phrased "if you . . . , then Yahweh, your God, will bless you" (30:16; cf. 7:12f.; 15:4f.). That Yahweh grants blessing freely demands recognition of his exclusive power to bless.

The whole people receives the blessing. Consequently, the blessing notion contains the actual motivation for the "humanitarian commandments" in Deut: as long as the weakest member of the community does not also participate in the fullness of God's blessing, the promise remains unfulfilled (cf. von Rad, *Gottesvolk* 42–49; Eichrodt 2:336).

Statements concerning the fulfillment of God's blessing correspond to the announcements of it in Gen and Deut (cf. Gen 24:1, 35; 25:11; 26:12; 30:27, 30; 32:30; 35:9; 48:3; Deut 2:7; 12:7; 15:6, 14). Outside these layers, references to God's blessing are more infrequent. A particular concentration may be identified, however, for the confession of confidence, "Yahweh will bless," etc. (cf. Psa 29:11; 67:7f.; 128:5; 134:3a; probably also 115:21a; in prayer style in Psa 5:13; 65:11; 109:28) and for benedictions, "May Yahweh bless," etc. (cf. Num 6:24; Psa 67:2; 115:12b–14; Ruth 2:4 as a greeting). Otherwise, corresponding statements occur in rather diverse contexts (pi.: Exod 20:24; Num 6:27; Josh 17:14; Judg 13:24; 2 Sam 6:11f. = 1 Chron 13:14; 2 Sam 7:29 [cf. 1 Chron 17:27]; Isa 19:25; 51:2; 61:9; Psa 45:3; 107:38; 147:13; Job 42:12; 1 Chron 4:10; 26:5; 2 Chron 31:10; pu.: 2 Sam 7:29 [cf. 1 Chron 17:27]; Psa 37:22; 112:2; 128:4; Prov 20:21; 22:9; on the noun cf. III/4e, less clearly also in Deut 28:2; Isa 19:24; Ezek 34:26a; 44:30; Mal 2:2; Psa 21:7; Prov 10:6; 24:25; 28:20; 1 Chron 5:1f. txt

em).

(d) Prophetic books focus much less upon the blessing, since their real interests lie in God's activity in salvation and judgment. The root *brk* does not occur at all in pre-exilic texts. Only since Deutero-Isa does this term describe God's future activity (cf. Isa 44:3; 51:2; Ezek 34:26; Joel 2:14; Hag 2:19; Zech 8:13; Mal 3:10), an activity not exhausted in single acts of salvation but accompanying human life continually and experienced in the natural processes of growth and multiplication (cf., however, already Hos 2:20–25, without *brk*). The language of blessing also governs "descriptions of salvation" (cf. Westermann, *Blessing* 32–34, with bibliog. on 26n.14), although *brk* occurs in such a depiction only in Isa 65:23.

(e) Unlike prophecy, wisdom experiences God's activity not in his great acts in history but in the regular daily phenomena of life, in the realms of the household, the field, and the village, in the sector, then, to which blessing normally pertains. As always in the OT, blessing consists of numerous descendants (Psa 112:2; 128:3f.; Job 42:13), land ownership (Psa 37:22), large herds (Job 1:10; 42:12), wealth (Psa 112:3; Prov 10:22; 24:25; 28:20), long life (Psa 133:3), and a lasting memory (Prov 10:7). Insight into the impermanence of earthly possession surfaces occasionally (e.g., Prov 11:28; 23:4f.); this insight likely leads to the differentiation between those goods seen as God's gift and those the individual acquires for himself/herself; the one who seeks to secure his/her own life in this manner misses good fortune (Prov 10:22; 20:21). Nevertheless, the conviction that the righteous may expect blessing (Psa 37:25f.; 112:2; Prov 3:33; 10:6f.) and the godless may expect misfortune and failure is fundamentally upheld. The criteria for "righteousness" are relationship to God (Psa 112:1f.; 128:4; Prov 28:20) and proper treatment of the fellow human being (Prov 11:26; 22:9; 24:25).

2. The blessing bestowed by people in the public or private cult is not actually dependent upon the spiritual power of the one blessing, upon the receptivity of the one blessed (see e.g., *ILC* 1–2:182f.; S. Mowinckel, *Psalmstudien* [1924], 5:10f.), or upon the efficacy of the spoken word (e.g., F. Horst, *RGG* 5:1649–51; E. J. Bickerman, *RB* 69 [1962]: 524). Rather, the ones who bless function as intermediaries through whom God himself blesses. This point becomes esp. evident in texts that mention a blessing formula in association with *brk* (paternal blessing: Gen 27:27–29; 48:15f., 20; cf. 28:1, 3f.; bridal blessing: Gen 24:60; cf. Ruth 4:11; Tob 10:11; priestly blessing: Num 6:23–27; cf. Psa 67:2; 115:12–15). As a rule, the blessing explicitly claims God as bestower of the blessing. This claim is particularly emphasized in association with the Aaronite blessing: when the priests place the name of Yahweh on the people, i.e., speak the previously cited blessing formula (Num 6:24–26), Yahweh himself blesses his people

(v 27). The expression used only for the priestly blessing *brk b'šēm yhw* “to bless by using (invoking) the name of Yahweh” has the same intention (Deut 10:8; 21:5; 2 Sam 6:18 = 1 Chron 16:2, David functions as a priest; Psa 129:8b, concluding blessing—it does not belong to the greeting of the reaper; 1 Chron 23:13; cf. H. A. Brongers, *ZAW* 77 [1965]: 8f.).

The notion that the gift of blessing was a priestly privilege may be supported only for the relatively late layers of the OT (Aaronites: Num 6:23; 1 Chron 23:13; levitical priests: Deut 21:5; 2 Chron 30:27; the tribe of Levi: Deut 10:8; Deut 10:8 and 21:5 are secondary; cf. von Rad, *Deut*, OTL, 79f., 136). The oldest traditions do not mention the priestly blessing at all, probably in order to declare that life and prosperity need not be periodically recreated through the cult, but that they are given to people on the basis of God's free decision (Gen 8:22 J). That Deut, too, does not yet place emphasis on the priestly blessing as a privilege may be elucidated by the fact that, according to 27:12 (cf. 11:29; Josh 8:33), the members of all twelve tribes are commissioned to bless and to curse. Although one must also understand that in such a procedure (in analogy to Deut 27:14–26) the people only answer the recited formulae with “amen” (cf. 1QS 2:1–10; *m. Sota* 7:5), it is still noteworthy that in essence the responsibility of the whole community for the granting of blessing and curse is accented.

Although the primary layer of P does not yet view the bestowal of blessing as a priestly privilege (others who bless: Isaac, Gen 28:1, 6; Jacob, 49:28; Moses, Exod 39:43 [Lev 9:23a is secondary]), blessing still receives a highly significant place in its historiography (cf. K. Elliger, *ZTK* 49 [1952]: 134): according to Lev 9:22 Aaron pronounces the blessing upon the people after the offering of the first sacrifice, and the theophany that follows (v 23b) legitimizes sacrificial practice as well as the institution of the priestly blessing.

The tradition of Gen 14:18–20—closely related to P—could have a similar significance: Melchizedek's blessing on Abraham demonstrates the priestly blessing as an essential component of worship “after the order of Melchizedek” (cf. W. Zimmerli, *FS Rost* 255–64).

The priestly blessing is applied as a rule to a larger community. 1 Sam 2:20 also discusses the bestowal of blessing upon an individual, however (cf. Psa 91; 121). If, according to 1 Sam 9:13, Samuel is to “bless” the sacrifice, this probably means that it was his privilege to pronounce the *b'rākā* at mealtime (cf. 1QS 6:4f.; 1QSa 2:17–20; Mark 8:6f.; Luke 9:16).

The texts prove to be rather uninterested in the blessing procedure itself. Only Gen 48:17 alludes to the laying on of hands in the context of the paternal blessing; Lev 9:22 mentions the raising of the hands during the priestly blessing.

3. In association with the praise of God, *brk* plays a role in a particular group of praises and exhortations to praise.

(a) Praises formed with *bārûk* substantially follow a fixed schema: *bārûk* — divine name or appellative (sometimes additional epithets)—a clause giving the reason for praise, often introduced with the relative particle (cf. W. S. Towner, *CBQ* 30 [1968]: 386–99; W. Schottroff, *Der altisr. Fluchspruch* [1969], 163ff.; see III/1c). Such statements of praise are, first, spontaneously expressed in everyday life immediately after the experience of divine assistance (Gen 24:27; 1 Sam 25:32, 39; 1 Kgs 1:48; Ezra 7:27); sometimes they are spoken not by the person who experienced God's deed but by deeply moved observers (Exod 18:10; 2 Chron 2:11; Aram. Dan 3:28, in each case in the mouth of a non-Israelite; Ruth 4:14). The same formula is used in association with some cultic procedures in Gen 9:26; 14:20; 1 Kgs 8:15 = 2 Chron 6:4; 1 Kgs 8:56.

It occurs in Psa 28:6 and 31:22 (a causal clause introduced by *kî*, cf. 1 Sam 23:21) in individual laments, indeed, at the point at which the lament evolves into praise (cf. Gunkel-Begrich 243–47; Westermann, *PLP* 59–64). The statement of praise (with *šc* -) functions similarly in a communal song of thanksgiving (Psa 124:6). Psa 68:20 introduces the description of the divine saving act in this manner. Such usages of this statement of praise develop into a doxological formula that occurs primarily at the conclusion of some psalms (66:20, with *šer*, 68:36, without a causal clause; 135:21). This placement leads to the use of the formula as the conclusion of the first four books of Psa as well, joined secondarily to the respective psalms (Psa 41:14; 72:18f.; 89:53; 106:48; cf. Kraus, *Psa*, CC, 1:16ff.).

Psa 106:48 seems to be a revision of 1 Chron 16:36, so that the doxology may have been introduced from Chron into the psalm, which in turn may have become the conclusion of the fourth psalm collection (cf. Rudolph, *HAT* 21, 128).

The formula begins a psalm only in 144:1 (with a participial continuation). Here, too, it apparently does not function as a call to praise; rather, the psalm begins without prelude (contra Psa 18), directly with the praise of God. Ezek 3:12 is a self-contained exclamation of praise, if the text is original (usually emended to *b'rum*, e.g., Zimmerli, *Ezek*, Herm, 1:94); also Deut 33:20; Zech 11:5.

Third-per. statements of praise primarily address a human forum; the speakers celebrate God's greatness, manifest in the concrete act toward their hearers (cf. e.g., Exod 18:10, "Yahweh is full of blessing, who delivered you"; 1 Sam 25:32, "Blessed be Yahweh, . . . who sent you"; Ruth 4:14, "Blessed be Yahweh, who has not left you without a redeemer"). Prayer style is first used in two late texts, i.e., God is addressed directly, "You are full of blessing, Yahweh" (Psa 119:12; 1 Chron 29:10, in each as

an introduction to a prayer or a request).

This usage becomes the most common, then, in the deuterocanonical literature (cf. Dan 3:26, 52 LXX; Tob 3:11; 8:5, 15–17; 11:14, etc.), at Qumran (1QS 11:15; 1QH 5:20; 10:14; 11:27, 29, 32, etc.), and in Jewish prayers (18 Benedictions). Apparently the doxologies constructed in this manner in the oldest portions of the Jewish liturgy and in the latest layers of the OT go back to a common pattern (cf. Towner, *op. cit.* 397–99).

(b) The pl. impv. of *brk* pi. occasionally occurs as the introit of a hymn: “Praise Yahweh” (Psa 96:2; 100:4; 134:1f.; cf. Judg 5:2, 9) (in addition to the more frequent introductions with →*hll* pi., Psa 113:1; 117:1; 135:1, 3, etc.; → *ydh* hi., Psa 33:2; 105:1; 106:1; 107:1, etc.). The pu. ptcp. with *y<sup>e</sup>hî* functions similarly in Psa 113:2; Dan 2:20 (Aram.).

The call to praise in Neh 9:5 is independent of the following thanksgiving prayer (cf. 1 Chron 29:20; Psa 68:27, although the pf. should more likely be read here; cf. Kraus, *Psa*, CC, 2:47). Psa 135 repeats it once more at the end (vv 19f.) applied to the various groups within the community. It is then also expanded to call for God’s praise by all people (Psa 66:8; 96:2), the entire creation (103:22a), and the powers surrounding the heavenly king (103:20f.).

In songs of the individual, one appropriately calls upon oneself (Psa 103:1f., 22b; 104:1, 35) or declares one’s intention in the voluntative (16:7; 26:12; 34:2; 63:5; 145:1f.).

As is true of statements of praise, declarative statements concerning God (Psa 16:7; 26:12; 34:2) seem to be original in contrast to the prayer (63:5; 145:1f.; 26:12 LXX). The supplicant addresses, then, a human audience and declares to it the intention to praise God (Psa 26:12, “I will praise Yahweh in assemblies”). Such declarations occur characteristically at the beginning of individual songs of thanksgiving (34:2, with *ydh* hi., e.g., 9:2; 57:10; 138:1f.), in vows of praise at the end of individual laments (26:12), and in the songs of assurance that have arisen from them (16:7; 63:5). More frequently, the supplicant’s concern continuously to praise God comes to expression (Psa 34:2; 63:5; 145:1f.).

V. In Judaism (and in the NT) usage evolves in such a way that reference to the praise of God now predominates. In the NT, 40 of the total of 68 occurrences of *eulogein* and its derivatives concern praise of God. The concept of blessing itself is modified through relation to the Christ event (Acts 3:25f.; Gal 3:8f.; Eph 1:3). The summons to bless directed to people is assigned to the commandment to love the enemy (Luke 6:27f.; Rom 12:14; 1 Pet 3:9; cf. 1 Cor 4:12). The cultic blessing is not mentioned; cf., however, the peace greeting of the disciples (Matt 10:12f.; Luke 10:5f.) and Jesus’ blessing (Mark 10:16, blessing the children; Luke 24:50, farewell blessing). Cf. H. W. Beyer, “εὐλογέω,” *TDNT* 2:754–65; W.

Schenk, *Der Segen im NT* (1967); C. Westermann, *Blessing in the Bible and the Life of the Church* (1978).

C. A. Keller (I-III)/G. Wehmeier (IV-V)

בָּשַׂר *bśr* pi. **to bring a message** → מַלְאָךְ *mal'āk*

בָּשָׂר *bāśār* **flesh**

S 1320; BDB 142a; HALOT 1:164a; TDOT 2:317–32; TWOT 291a; NIDOTTE 1414

1. The subst. \**baśar*- “flesh, body” may be identified with certainty only in WSem. (HAL 156b; P. Fronzaroli, AANLR 8/19 [1964]: 170, 253, 266, 277). Whether the root can also be found in the Akk. *bišru* “infant” remains questionable (AHw 131a; CAD B:270a); cf., however, Pun. *bšr* (also written *bš̄r* and *bš̄r*) “child, offspring” (J. Hoftijzer, “Eine Notiz zum pun. Kinderopfer,” VT 8 [1958]: 288–92; DISO 45). The relationship sometimes suggested to the verb *bśr* pi. “to report, bring a message” is unlikely.

Ug. occurrences are KTU 1.4.II.5, “the covering of her body”; 1.24.9, “blood for his flesh”; 1.15.IV.25, V.8, of meat at a meal (cf. UT no. 534; WUS no. 598).

Other texts contemporary with the OT are only the passages with Aram. *bšr* (= Bibl. Aram. *b<sup>e</sup>śar*) in the sayings of Ahiqar, line 89, “to pour out his blood and consume his flesh,” and line 104, “why should wood contend with fire, flesh with the knife, a man with the king?” (Cowley 215f.).

Arab. *bašar* signifies more broadly “human being,” *bašarat*, by contrast, “skin” (see 3).

2. In the OT, Hebr. *bāśār* is attested 270x and Aram. *b<sup>e</sup>śar* 3x (Dan 2:11; 4:9; 7:5; Lis. overlooks Gen 9:15a; for detailed statistics according to chronological categories cf. D. Lys, *La chair dans l’Ancien Testament, “Bâsâr”* [1967], 15–19). Hebr. occurrences are distributed as follows:

Gen 33	2 Kgs6	Psa 16
Exod 14	Isa 17	Job 18
Lev 61	Jer 10	Prov 4

Num 17	Ezek 24	Eccl 5		
Deut 13	Hos 1	Lam 1		
Judg 6	Joel 1	Dan 2		
1 Sam	4	Mic 1	Neh 2	
2 Sam	3	Hag 1	1 Chron 1	
1 Kgs4	Zech 4	2 Chron 1		
		total	270	

3. The beginning point is the numerous passages in which *bāsār* designates the corporeal substance of the human or animal, living or dead body. Within this broad realm the specific referent can vary greatly: flesh as food, as sacrifice, or as an object of P's sacral-medicinal purity prescriptions. Sometimes *bāsār* occurs alongside other parts of the body as a vital component of the corporeal whole: with bones (Job 2:5; *ʿešem* 123x, 20x in the meaning "even these"; cf. Dhorme 9f.; L. Delekat, VT 14 [1964]: 49–52), with skin and bones (Lam 3:4; *ʿôr* "skin, hide" 99x, 46x in Lev 13), with skin, blood (→ *dām*), and excrement (Num 19:5), with skin, bones, and sinew (Job 10:11; cf. Ezek 37:6, 8).

Otherwise biological relationship is indicated by the expression "(my/your) bone and flesh" (Gen 2:23; 29:14; Judg 9:2; 2 Sam 5:1 = 1 Chron 11:1; 2 Sam 19:13f.; cf. W. Reiser, "Die Verwandtschaftsformel in Gen. 2,23," TZ 16 [1960]: 1–4). "(Your/our) flesh" alone sometimes has the same meaning (Gen 37:27; Isa 58:7; Neh 5:5) and twice the cs. phrase *š<sup>e</sup>ʿerbāsār* does (Lev 18:6; 25:49).

The expression "flesh and blood" to describe the person as mortal occurs first in Sir 14:18.

About 50x *bāsār* indicates the body, i.e., the visible flesh of the person or, as an exception, the animal (Job 41:15), the corporal in its totality with emphasis upon the visual and the graphic. This usage always concerns the live body; *bāsār* is never used of the corpse, not even in Ezek 32:5. For all this, *bāsār* is deeply tied to the material and is never used in the sense of "appearance, figure"; *bāsār* is *corpus*, not *figura*. Significantly, the word is used in contrast to various terms for the spiritual life: → *rūah* "spirit" (Gen 6:3; Num 16:22; 27:16; Isa 31:3; Joel 3:1), → *nepeš* "soul" (Gen 9:4; Deut 12:23; Job 14:22), → *Iēb* "heart" (Ezek 44:7, 9; Psa 84:3).

The other words for "body," e.g., *g<sup>e</sup>wîyâ* (Ezek 1:11, 23; Dan 10:6), Bibl. Aram. *g<sup>e</sup>šēm* (Dan 3:27f.; 4:30; 5:21; 7:11), readily evolve further into the meaning "being, self" (*gap* Exod 21:3f.; *g<sup>e</sup>wîyâ* Gen 47:18; Neh 9:37; cf. Hebr. *ʿešem*, Aram. *garmā*?, Akk. *ramānu*) or into the meaning "corpse" (*g<sup>e</sup>wîyâ* Judg 14:8f.; 1 Sam 31:10, 12[bis]; Nah

3:3[bis]; Psa 110:6; *gûpâ* 1 Chron 10:12[bis]; cf. 1 Sam 31:12; *peger* 22x, Aram. *pagrâ* and Akk. *pagru* also “body”; cf. D. Neiman, *JBL* 67 [1948]: 55–60, on Lev 26:30 and Ezek 43:7, 9; otherwise *n<sup>e</sup>bēlâ* 48x, → *nbl*). Cf. Dhorme 7–12; F. Baumgärtel and E. Schweizer, “σῶμα,” *TDNT* 7:1044–48.\*

Arab. *bašarat* means “skin” (see 1). A slight alteration of perspective becomes apparent in the shift of meaning “body” > “skin.” The skin is outwardly visible portion of the body. The semasiological proximity of the two concepts is apparent in a few OT passages in which both meanings are equally possible (Psa 102:6; 119:120; Job 4:15). Other passages clearly distinguish the two concepts (Lev 13:2ff.).

An expansion of meaning toward the abstract occurs in the expression *kol-bāšār* “all flesh,” which appears approximately 40x and which can refer either to humanity (e.g., Deut 5:26; Psa 65:3; 145:21) or to all creatures, i.e., people and animals (e.g., Gen 6:17; 9:16f.; Job 34:15; cf. A. R. Hulst, “*Kol-bāšār* in der priesterlichen Fluterzählung,” *OTS* 12 [1958]: 28–68).

In a few passages (*mik*)*kol-bāšār* can be translated “of all kinds, varieties” (esp. in P: Gen 6:19; 7:15; 8:17; 9:16; Num 18:15).

*bāšār* occurs as a euphemism for penis in Lev 15:2f.; Ezek 16:26; 23:20.

The much less common word *š<sup>e</sup>ēr* “flesh” is largely synonymous with *bāšār* in profane usage, but is not employed as a theological term, primarily because it has no collective usage (Exod 21:10; Jer 51:35; Mic 3:2f.; Psa 73:26; 78:20, 27; Prov 5:11; 11:17; originally more the inner, bloody flesh; cf. F. Baumgärtel, *TDNT* 7:107f.; in P in the meaning “blood relative”: Lev 18:6, 12f.; 20:19; 21:2; 25:49; Num 27:11; in addition to Lev 18:17 *š<sup>a</sup>râ* txt?; on the Sem. equivalents and their shifts in meaning, cf. Fronzaroli, op. cit. 168, 252f., 266, 277)

4. *bāšār* is theologically significant in passages that express a qualitative assessment. Only as an exception does this usage involve an evaluation of status, as in Ezek 11:19 and 36:26, where the bestowal of a heart of flesh instead of a heart of stone is an aspect of religious renewal. A negative judgment is more often evident, particularly if the flesh, i.e., humanity, is qualitatively distinguished as mortal and impotent from the divine being as spirit (Gen 6:3, 12; Isa 31:3; 40:6; Jer 17:5; Psa 56:5; 78:39; Job 10:4; 2 Chron 32:8). Cf. also J. L. Helberg, “Communication on the Semasiological Meaning of Basar,” *OuTWP* (1959): 23–28 (cf. *ZAW* 72 [1960]: 284); J. Scharbert, *Fleisch, Geist und Seele im Pentateuch* (1966), 13, 25f., 40f., 48–56; Lys, op. cit.

5. In the Qumran texts *bāšār* is a frequent and theologically significant term (cf. H. Huppenbauer, “Bšr ‘Fleisch’ in den Texten von Qumran,” *TZ*

13 [1957]: 298–300; R. E. Murphy, “Bśr in the Qumran Literature,” *Sacra Pagina* 2 [1959]: 60–76; R. Meyer, “σάρξ,” *TDNT* 7:110–14). A characteristic shift of meaning in relation to the OT usage appears in many passages: flesh involves not only mortality but also sinfulness. The altered connotation appears in expressions such as *rûaḥ bāsār* “spirit of the flesh” (1QH 13:13; 17:25), *bśar ʿašmâ* “guilty flesh” (1QM 12:12), *bśar ʿawel* “evil flesh” (1QS 11:9).

In rabbinic usage, too, characteristic shifts of meaning in relation to the OT occur; on this and the NT, cf. R. Meyer and E. Schweizer, “σάρξ,” *TDNT* 7:115–51; H. Seebass and A. C. Thiselton, “Flesh,” *DNTT* 1:671–82.

G. Gerleman

בַּת *at* **daughter** → בֵּן *bēn*

גָּחַ *gʰ* **to be high**

S 1342; BDB 144a; *HALOT* 1:168a; *TDOT* 2:344–50; *TWOT* 299; *NIDOTTE* 1448

1. The root *gʰ* (\**gʷ/y*) occurs in NWSem.

Cf. Ug., *KTU* 1.17.VI.44 *gan* “arrogance” (par. *pšc* “sin”; *UT* no. 548; *WUS* no. 613); Pun., *Poen.* 1027 *gune bel* (*DISO* 46 “grandeur of Bel”; Sznycer 144); Syr., *LS* 99f.; Mand., Drower-Macuch 72a, 76a, 89.

The Eg. root *qʰy* “to be high” is attested in association with things, persons, and gods; the fig. meaning “with a high back = arrogantly” also occurs (cf. Erman-Grapow 5:1ff.).

In addition to the verb in the qal, the adjs. *gēʰ*, *gēʰch*, *gaʰyôn* “arrogant” and the substs. *gēʰâ* “arrogance,” *gaʰwâ* “height, majesty, pride,” *gēʰût* “ascension, grandeur, insolence,” and *gēʰwâ* “arrogance, pride” occur in the OT as nominal derivatives, the last term also, perhaps as a Hebr. loanword, in Bibl. Aram. Cf. further the PN *gēʰûʿel* (Num 13:15; see, however, *HAL* 161b).

2. *gʰ* qal occurs 7x (also in Sir 10:9 in the meaning “to overreach”), *gēʰ* 1x (Isa 16:6), *gēʰch* 8x (excl. Psa 123:4 Q; also in Sir 10:14; 11:30),

*ga<sup>ʔ</sup>yôn* 1x (Psa 123:4 K), *gē<sup>ʔ</sup>â* 1x (Prov 8:13), *ga<sup>ʔ</sup>wâ* 19x (also in Sir 7:17; 10:6–8; 13:20; 16:8), *gā<sup>ʔ</sup>ôn* 49x (also Sir 10:12; 48:18), *gē<sup>ʔ</sup>ût* 8x, *gēwâ* 3x (also 1QS 4:9) and 1x in Bibl. Aram. (Dan 4:34).

Aside from a few cases of *gā<sup>ʔ</sup>ôn* in Ezek, all occurrences of the root appear in poetical texts (even *g<sup>ʔ</sup>h* qal in Lev 26:19; cf. Elliger, HAT 4, 367). The 100 occurrences in the OT are represented most strongly in the prophetic literature (Isa 24x; Jer and Ezek 10x; Zech 3x; Hos, Amos, Nah, and Zeph 2x each; Mic 1x), elsewhere roughly equally in the wisdom literature (Job 11x, Prov 7x) and in hymnody (Psa 15x, also Exod 15:1[bis], 7, 21[bis]; Deut 33:26, 29).

3. All meanings of the root *g<sup>ʔ</sup>h* and its various derivatives are grouped around the basic meaning “to be/become high”:

(a) The more infrequent concrete meaning occurs in Job 8:11 (papyrus grows aloft); Ezek 47:5 (the water rises in the river); Isa 9:17 (the rising of the smoke is described as *gē<sup>ʔ</sup>ût* *‘āšān*). The archaic style of two psalms, which describe Yahweh’s conquest of the powers of chaos in the mythical tradition, suggests the meaning “arrogance, rebellion, impetuosity” even for the discussion of the “raging, foaming” of the sea (*ga<sup>ʔ</sup>wâ* Psa 46:4; *gē<sup>ʔ</sup>ût* 89:10; cf. Job 38:11).

Lit. and fig. meanings (G. R. Driver, FS Robinson 59, “raging of the Jordan”; KBL 162, “high trees”; better: Rudolph, HAT 12, 84, “splendor”) are even opposed in attempts to explain Jeremiah’s depiction of the thicket of Jordan *g<sup>ʔ</sup>ôn hayyardēn* (Jer 12:5; 49:19 = 50:44; cf. Zech 11:3).

(b) Figuratively, the root expresses human pride, arrogance, and presumption. In a positive sense, the land is Israel’s *gā<sup>ʔ</sup>ôn*, “pride” (Psa 47:5; Nah 2:3; cf. Isa 13:19 of Babel); according to Isa 4:2, the fruit of the land contributes to Israel’s “pride (*gā<sup>ʔ</sup>ôn*) and ornamentation (*tip<sup>ʔ</sup>eret*, → *p<sup>ʔ</sup>r*.)” Most passages should, however, be understood in a negative sense.

P. Humbert (“Démésure et chute dans l’AT,” FS Vischer 63ff.) offers a collection of Hebr. synonyms for “pride, arrogance”; worthy of mention are the roots → *gbh*, → *gdI*, → *rûm*, and *yāhîr* “presumptuous, proud” (Hab 2:5; Prov 21:24; cf. J. Blau, VT 5 [1955]: 342), *r<sup>ʔ</sup>hab lēb/nepēš* “presumptuous” (Psa 101:5; Prov 21:4; 28:25), *sll* hitpo. “to behave high-handedly” (Exod 9:17), *zîd* qal “to be impudent” (Exod 18:11; Jer 50:29), hi. “to act impudently” (Deut 17:13; 18:20; Neh 9:10, 16, 29), *zēd* “cocky, impudent” (Isa 13:11, etc.), *zādôn* “impudence” (Deut 17:12, etc.).

*š<sup>ʕ</sup>pal rûah* “humble” (Prov 16:19; 29:23) and *šah<sup>ʕ</sup> ‘ēnayim* “with downcast eyes” (Job 22:29) may be cited as antonyms, in addition to the verbs *špl* hi. “to abase, humble” (Job 22:29; 40:11; Prov 29:23), *kn<sup>ʕ</sup>* hi. “to humble” (Job 40:12), *šht* hi. “to ruin” (Jer 13:9), *šbr* “to shatter” (Lev 26:19).

(c) Wisdom literature warns against the proud and arrogant attitude in the measured equilibrium of the comparative *tôb*-saying (Prov 16:19); it is aware that disaster follows impudence (Prov 16:18); God abases the “pride of the arrogant” (Job 22:29 txt em; cf. Fohrer, KAT 16, 352; cf. Job 40:11f., on which see S. Loffreda, “Raffronto fra un testo ugaritico [2 Aqhat VI, 42–45] e Giobbe 40:9–12,” *BeO* 8 [1966]: 103–16), God tears down the house of the proud (Prov 15:25), and abundantly repays the one who “practices arrogance” (Psa 31:24).

The laments of the Psalter often use the root *gʿh*, and its derivatives characterize the → *rāšāʿ*, the “evildoer” (e.g., Psa 36:12; 59:13; 73:6; 94:2; 140:6; nevertheless, the term *gēʾîm* can hardly be regarded as a reference to a specific group, namely the Sadducees, as H. Steiner, *Die Geʾim in den Psalmen* [1925], 22–30, thinks). Psa 10:2 describes the *rāšāʿ* as *gēʾût* (txt em) in terms of high-handedness and self-sufficiency, as one who devises dangerous plans for the destruction of the humble (*ʿānî*, → *ʿnh* II). Characteristic is the “proud self-assurance” of speech (Psa 17:10; cf. 73:9), the “arrogance” with which their lips “speak insolence (*ʿātāq*) against the righteous” (Psa 31:19).

4. (a) Wisdom proposes that the arrogant fall and the humble receive honor (cf. Prov 29:23), challenging people to self-moderation; the prophets use the root theologically to describe the perverse, self-glorifying relationship of people to God. In both Israel (Jer 13:9, 17; Ezek 7:20, 24; 16:49, 56; 24:21, cf. Lev 26:19; Ezek 33:28) and the foreign nations (Isa 13:19; 16:6; cf. Isa 48:29; Ezek 30:6, 18; Zeph 2:10; Zech 9:6; 10:11), God thwarts self-glorification. God will expose as empty any *gāʾôn* that Israel impudently adopts (Amos 6:8; Hos 5:5, “Israel’s arrogance testifies openly against it”; cf. 7:10; here arrogance is the final prosecution witness against Israel). According to Isa 2:12 the “day of Yahweh of hosts” consists precisely in the execution of judgment “on all the proud and haughty and on all the lofty and high (following LXX)” (cf. 13:11). “Isaiah does not speak, as wisdom does, about what is good or better, but rather about what Yahweh Sebaoth opposes with his whole being, because of his claim to be the only one who is ‘high,’ the only one who is lord and king” (Wildberger, *Isa 1–12*, CC, 115).

(b) God’s *gʿh* (Exod 15:1, 21), *gāʾôn* (Exod 15:7; Isa 2:10, 19, 21; 24:14; Mic 5:3; Job 40:10), *gaʾwâ* (Psa 68:35), and *gēʾût* (Isa 26:10; Psa 93:1), divine characteristics and predications of majesty, nobility, and kingdom (*hʾdar gʿōnô* “sublime majesty,” Isa 2:10, 19, 21; on the phrase cf. Joüon §141m: “superlative nuance”), contrast with the presumed *gāʾôn* of people, which people can claim for themselves only in foolish arrogance

(cf. Job 40:9–11, God’s royal robes, Fohrer, KAT 16, 519f.). The substantial correlation of Psa 68:35 (cf. Psa 104); 93:1; and Deut 33:26 (cf. Pun. *gune bel*; see 1) may indicate that this predication deals with concepts originally borrowed from Can. religion (royal god of heaven), although now united with traditions of God’s saving acts on Israel’s behalf (Exod 15:1, 21).

5. The LXX frequently renders *gʿh* in reference to God with *doxa* or the like; otherwise, it usually translates *hybris* or *hyperēphania*, etc., with a somewhat more negative connotation than MT and accenting the aspect of arrogant action (G. Bertram, *TDNT* 8:300; id., “Hochmut’ und verwandte Begriffe im griech. und hebr. AT,” *WO* III/3 [1964]: 32–43).

On Judaism, the NT, and early Christianity, cf. G. Bertram, “ὕβρις,” *TDNT* 8:295–307.

H.-P. Stähli

## גָּלַח *gʿl* to redeem

S 1350; BDB 145a; *HALOT* 1:169a; *TDOT* 2:350–55; *TWOT* 300; *NIDOTTE* 1457

1. The verb *gʿl* occurs only in Hebr. From the OT it enters Samaritan as a loanword (*HAL* 162a) and the language of postbibl. Judaism as an authentic legacy (cf. *TDNT* 4:350f. and 7:987f.).

Regarding the PN *gʿlyhw* on a seal impression from Beth-zur, cf. *DOTT* 223f.

So far only one occurrence has been identified in the Qumran literature: CD 14:16, where the ptcp. *gōʿēl* appears in the meaning “(nearest) relative.”

The limitation of the verb to Hebr. contributes to the difficulties in establishing its etymology.

At any rate, it is totally unrelated semantically to the homonymous *gʿl* ni. “to be made (cultically) unclean” (*HAL* 162f.: a by-form of *gʿl*, → *ʿm*). This dissociation should be maintained with Fohrer (KAT 16, 110) among others, against A. R. Johnson (“Primary Meaning of *gʿl*,” *SVT* 1 [1953]: 67–77), who assumes the common basic meaning “to cover” for both *gʿl* verbs. This meaning would have resulted in the sense “to protect” for the first *gʿl* and the sense “to soil” for the second. *gʿl* “to protect” provides a questionable point of departure for the verb under consideration, however, a point of departure totally inappropriate to its actual denotation; cf. also J. Blau, *VT* 6 (1956): 244f. on Job 3:5.

The verb occurs in the qal and the ni.; *g<sup>e</sup>ullâ* (in a nominal formation favored for legal terms; cf. F. Horst, FS Rudolph 153: “the right or obligation of redemption [buying back]”) and *g<sup>e</sup>ûlîm* (Isa 63:4; according the L. Köhler, ZAW 39 [1921]: 316 and HAL 161b: “time, status of the *gōʿēl* blood avenger”; on the nominal formation cf. BL 472 and Gulkowitsch 20) are derivative abstract nouns. The PN *yigʿāl* (impf. form; cf. IP 28, 200) also derives from the root.

2. The root *gʿl* occurs 118x in the OT (with the PN *yigʿāl* in Num 13:7; 2 Sam 23:36; 1 Chron 3:22 there are 121). The qal ptcp. *gōʿēl* (46x) is, except for Gen 48:16 and Psa 103:4, substantivized and will be cataloged separately in the following list (the number in parentheses indicates the number of occurrences of the special combination *gōʿēl haddām* “blood avenger”; in Num 35:12 *haddām* should probably be supplied).

	qal	ni.	subst.	<i>g<sup>e</sup>ullâ</i> <i>gōʿēl (g<sup>e</sup>ûlîm)</i>	total	
Gen	1	–	–	–	1	
Exod	2	–	–	–	2	
Lev	13	7	2	9	31	
Num	–	–	8 (6)	–	8	
Deut	–	–	2 (2)	–	2	
Josh	–	–	3 (3)	–	3	
2 Sam	–	–	–	1 (1)	–	1
1 Kgs	–	–	1	–	1	
Isa	9	1	13	(1)	24	
Jer	1	–	1	2	4	
Ezek	–	–	–	1	1	
Hos	1	–	–	–	1	
Mic	1	–	–	–	1	
Psa	9	–	2	–	11	
Job	1	–	1	–	2	
Prov	–	–	1	–	1	
Ruth	12	–	9	2	23	
Lam	1	–	–	–	1	
OT	51	8	44 (12)	14+1	118	

This overview reveals a particular profile: the qal is concentrated in Lev and Ruth, the ni. and *g<sup>e</sup>ullâ* also in Lev, namely chs. 25 and 27, which are concerned with repurchase and redemption. This circumstance is also

associated with the prominence that Ruth assumes in the first column. The distribution of *gōʿēl haddām* may be explained by the fact that the figure of the blood avenger has its place in the asylum laws offered in Num 35, Deut 19, and Josh 20. Regarding *gōʿēl*, 10 of 13 occurrences in Isa belong to Deutero-Isa, the first to assign Yahweh the attributes of a *gōʿēl* of his people.

3. (a) The preceding list also demonstrates that legal literature, in particular, used *gʿl* qal/ni. This phenomenon suggests that the verb has a legal provenance, from which it was adapted in the terminology of the cult and in religiotheological language. As will be shown (see 4), the old, legally stamped meaning remains largely active in this adaptation.

On the understanding of the verb in this sense, cf. O. Procksch, “*λύω*,” *TDNT* 4:328–35; J. J. Stamm, *Erlösen und Vergeben im AT* (1940), 27–45; A. Jepsen, “Die Begriffe des ‘Erlösens’ im AT,” *FS Hermann* 153–63; N. H. Snaith, “Hebrew Root *gʿl*,” *ALUOS* 3 (1961/62): 60–67.

(b) The original sense of *gʿl* and its derivatives *gōʿēl* and *gʿullâ* appears unmistakably in Lev 25. This ch., which belongs to H but which developed in a long process (cf. Elliger, *HAT* 4, 335ff.), contains regulations aimed at the reestablishment of original conditions in Israel, freed from intrusions. Taking account of only the extensive passages, these regulations include the Sabbath year (vv 1–7) and the year of Jubilee, i.e., the restitution of all property to the original owner every 49 years (vv 8–55). In association with the latter of these regulations but probably originally independent from them (cf. Noth, *Lev*, *OTL*, 189), a passage concerning the *gʿullâ* occurs in both vv 25–28 (vv 29f.) and vv 47–49 (vv 50–55). The *gʿullâ* in the first passage concerns the property (*ʿhuzzâ*), which an Israelite in material need may be forced to sell. The near relative described as *gōʿēl* exercises the *gʿullâ* by “paying the purchase-price . . . and thus getting back the piece of land that had been sold. This was not in order to retain it himself, but only to return it to the original owner” (Noth, *op. cit.* 189).

The second passage (vv 47–49) deals with an impoverished Israelite who has had to sell himself to a wealthy patron or neighbor. The *gōʿēl* should redeem (*gʿl*) him. Family members who bear this responsibility are named in vv 48f.: brothers, paternal uncles, cousins, any other blood relative. If an Israelite must sell himself not to a foreigner but to a fellow citizen, the law (vv 39–46) does not call for the *gʿullâ* but for the liberation that will follow anyway in the year of Jubilee. The postulated year of Jubilee competes, in this regard, with the old regulation concerning the

manumission after six years of the Hebrew who has fallen into debt slavery (Exod 21:2–6; Deut 15:12ff.).

The *g<sup>e</sup>ullâ* as the right or obligation to buy back lost family land or enslaved persons was not limited to Israel. Babylonian law knows it both for land and for persons, in connection with which the Bab. verb *paṭāru* “to loose, redeem” replaces the Hebr. *g<sup>l</sup>*. *paṭāru* exceeds *g<sup>l</sup>* in usage, however, by indicating not only repurchase (by the family), but also redemption in general, e.g., of a slave or a captive; cf. *AHW* 849–51.

(1) Repurchase of land: Laws of Eshnunna §39 = *ANET* 163a; R. Haase, *Die keilschriftlichen Rechtssammlungen in dt. Übersetzung* (1963), 14; the same issue in Old Bab. contracts in M. Schorr, *Urkunden des altbab. Zivil- und Prozessrechts*, VAB 5 (1913), 119. (2) Redemption of persons who have been sold: of free persons see Mid. Assy. Laws §48 = *ANET* 184b; Haase, *op. cit.* 107; of slaves see Code of Hammurapi §§119, 281 = *ANET* 171a, 177b; Haase, *op. cit.* 37, 55; this is also the subject of letter no. 46 in R. Frankena, *Briefe aus dem British Museum*, AbB 2 (1966). (3) The redemption of a captive soldier in the Code of Hammurapi §32 = *ANET* 167b; Haase, *op. cit.* 27.

The uniqueness of the Israelite *g<sup>e</sup>ullâ* in contrast to the Bab. lies in its relationship to Yahweh. Because the land belongs to him and the Israelites have received it from him as a loan, it may not be sold absolutely and should be subject to the right of repurchase (Lev 25:23f.). And, according to Lev 25:42, an Israelite should not continue to be a slave, because he/she is a descendant of those whom Yahweh freed from Egypt.

(c) The OT finds the *g<sup>e</sup>ullâ* effective in practical life only with respect to land ownership and blood vengeance, i.e., respect for a dead fellow clan member, probably because of the right to freedom after six years that a member of the covenant people enjoys. Jeremiah exercises the *g<sup>e</sup>ullâ* for property (Jer 32:6–15). He acquires land in Anathoth, which his cousin must sell for unspecified reasons. This transaction is a case, then, not of repurchase but of prepurchase; cf. Rudolph, *HAT* 12, 209. Similarly, according to Ruth 4, Boaz acquires a plot of ground belonging to the deceased Elimelek through the exercise of the *g<sup>e</sup>ullâ*. The wording in Ruth 4:3, “the field that Naomi has sold,” seems to presuppose that Boaz repurchases for the family something that has already been transferred to outside hands. Yet the ptcp. *mōk<sup>r</sup>â*, “is about to sell,” has often been read instead of the pf. *māk<sup>r</sup>â*, and, besides, the unemended text also permits the translation “Naomi wants to sell”; cf. Gerleman, *BK* 18, 35. One cannot, therefore, determine with certainty whether prepurchase or repurchase is described.

(d) Now, according to Ruth 4, Boaz also acquires Ruth, the widow of Mahlon, together with the field “in order to reestablish the name of the

deceased on his property” (4:5, 10). Boaz enters into a levirate or in-law marriage with Ruth, who represents Naomi here. Because this is the only case of this nature in the OT, one may not be certain whether the levirate is one of the obligations of the *gōʿēl*. In view of the essential relationship of *gʿullâ* and levirate—both seek to keep the family whole—it is entirely probable.

The designation of the one who exercised blood vengeance as *gōʿēl haddām* (→ *dām*) indicates that blood vengeance was surely a component of *gʿullâ*. He is accordingly the one who seeks (→ *bqš* pi., → *drš*) the shed blood and the murderer to whom it clings and returns it to the community to which it belongs. “This ‘return’ presupposes that the murdered is indeed, completely dead, but not his blood; rather, it still conceals secret life” (K. Koch, *VT* 12 [1962]: 410).

The broad range of the *gōʿēl*’s responsibilities are indicated by repurchase, blood vengeance, and, in the unique case, levirate. He was the nearest relative responsible in family matters (so Procksch, *TDNT* 4:330).

At times the full meaning of the word could diminish, so that *gōʿēl* would then only mean something like “relative,” as in 1 Kgs 16:11; CD 14:16; and probably also Num 5:8.

(e) According to the preceding, *gʿl* and its derivatives prove to be family law terms. Koch (op. cit. 410) renders its sense well with “to redeem that which belongs to the family from outside jurisdiction.” This rendering encompasses the salvific character of the term, extending beyond the purely legal; the reacquisition of lost family belongings brings liberation and salvation, the renewal of an earlier order, the reestablishment of a lost totality; cf. also Jepsen, op. cit. (see 3a), 159.

4. (a) The salvific element, which always applies to the old legal term, blossoms in religiotheological language. *gʿl* here does not accidentally parallel → *yšc* hi. “to save” (Isa 49:26; 60:16; 63:9; Psa 72:13f.; 106:10), → *nšl* hi. “to save” (Exod 6:6), → *ʿzr* “to help” (Isa 41:14), → *h̄yh* pi. “to make well” (Psa 119:154), and → *nḥm* pi. “to comfort” (Isa 52:9). The verb → *pdh* “to free, redeem, liberate” stands nearest to *gʿl* in this regard. In some of its uses, however, this verb is a neutral commercial law term, which does not include the notion of the reacquisition of that which has been lost (cf. Stamm, op. cit. 7ff.; slightly different, Jepsen, op. cit. 154f.). Although the difference between the two verbs was probably always apparent (see 4f), they still approximate one another, as the usage in Lev 27 (see immediately below) and their par. occurrence show (Hos 13:14; Isa 51:10f. = 35:9f.; Jer 31:11; Psa 69:19).

(b) In religious language, the use in cultic terminology stands alone. It

is present in Lev 27, a ch. concerning voluntary gifts and the existent or nonexistent possibility of redeeming them by monetary payment.

*gʾl* is the verb used predominantly in this respect (vv 13, 15, 19f., 28, 31, 33). *pdh*, which occurs together with *gʾl* again in v 27 in reference to the redemption of the firstborn of unclean animals, stands alone in v 29, in the prohibition against redeeming a person dedicated to the ban.

Offerings whose redemption is treated in Lev 27 are primarily originally the property of the cult practitioner that he reacquires by payment of the prescribed amount, if permitted. The preference for *gʾl* should be understood in this manner. One could determine the reason v 29 uses the neutral *pdh*, foreign to the notion of reacquisition, only if one could establish what this late text means by “ban.” If it were, as in earlier times, spoils of war, then *pdh* would indicate that the redeemer had no prior claim to it. If “ban” in v 29 also means Israelite property (as in v 28), which could or must be surrendered, then *pdh* would be used in a broader sense no longer strictly distinguishable from *gʾl*. This is also true for v 27, where *gʾl* and *pdh* occur together. The *gʾl* of the text also reflects an expanded usage in reference to the redemption of a portion of the tithe (v 31) that belongs to Yahweh without question and is removed from any human claim.

(c) If one arranges occurrences from the religiotheological realm according to the groups of people who experience liberation, and considers the time period involved, the following picture emerges:

(1) Deliverance of the *individual*:

(a) In the past: Gen 48:16; Psa 107:2; Lam 3:58;

(b) In the present: Psa 19:15; 69:19; 72:14; 103:4; 119:154; Job 3:5; 19:25; Prov 23:11;

(2) Deliverance of the *people*:

(a) In the past: Exod 6:6; 15:13; Psa 74:2; 77:16; 78:35; 106:10; Isa 51:10; 63:9;

(b) In the future: Hos 13:14; Isa 35:9f.; Jer 31:11; 50:34; Mic 4:10.

Additional Deutero- and Trito-Isa texts: *gʾl* Isa 43:1; 44:22f.; 48:20; 52:3, 9; 62:12; *gōʿēl* Isa 41:14; 43:14; 44:6, 24; 47:4; 48:17; 49:7, 26; 54:5, 8; 59:20; 60:16; 63:16.

This arrangement, which I have used earlier (Stamm, op. cit. 7ff.), has the advantage of extreme clarity, but the disadvantage of too rigid schematization, which forces one to emphasize, more than is appropriate for Hebr., differences in tense and the distinction between individual and community. For these reasons, I now prefer, with Jepsen (op. cit. 158ff.), to

discuss first occurrences that directly involve the basic meaning of *gʾl* and then those in which it is less applicable.

(d) Prov 23:10f. and Jer 50:34 apply to Yahweh the status of the *gōʿēl* in a family as the helper of the relative fallen into distress, calling him *gōʿēl* as protector of the weak over against a mighty opponent. Job (Job 19:25) calls God, the last guardian of his right, his *gōʿēl*, which could be paraphrased in Eng. with a term such as “lawyer” or “legal aid.” Disappointed by his friends and robbed by God of his rights (Job 19:7ff.; 27:2, 5), Job nevertheless falls back on God, because he is not totally unaware of God’s true nature, intent upon delivering (cf. Job 16:18–21).

In accord with a common ancient Near Eastern ideal, the constitutive activities of the *gōʿēl* are esp. expected of the king (Psa 72:13f.), who “saves (*yšʿ hi.*) the life of the poor and redeems their life from oppression and violence (*yigʾal napšām*).” *gʾl* here certainly includes, among other concepts, legal aid through which the king reestablishes the rights deprived from the subject who seeks his assistance. With regard to Yahweh, this is also the intention of the request, “Conduct my case and redeem me; preserve my life according to your word” (Psa 119:154), and of the confession, “You, Yahweh, have led the fight for my life, you have saved my life (*gāʾaltā ḥayyāy*)” (Lam 3:58), or, as *gʾl* can also be translated here, “have reestablished my life” (so Jepsen, op. cit. 160).

One of Job’s statements cursing the day of his birth (3:5) preserves the concrete sense of *gʾl* “to ransom lost property”: “darkness and gloom should demand payment of it,” i.e., the powers of chaos, which are older than the light, should exercise their old right to that day.

(e) *gʾl* refers to the liberation from Egypt in the passages mentioned previously (see 4c; Exod 6:6; 15:13; Psa 74:2; 77:16; 78:35; 106:10; Isa 63:9), which recall other acts of deliverance in addition to the initial act. In Isa 51:10 the pass. ptcp. *gʾlīm* indicates those saved at the Reed Sea. But the *pʿdūyē yhw* “those redeemed by Yahweh” in v 11 are those who experience the second, eschatological exodus (on problems concerning the content of the text, cf. Westermann, *Isa 40–66*, OTL, 243). All of these texts, even Exod 15:13, could be dated from the exilic to the post-exilic periods. I call attention to this point for the following reasons: in older times the verbs *yšʿ hi.* “to lead out” and *ʾlh hi.* “to bring up” were most common for the deliverance from Egypt (cf. Stamm, op. cit. 14f., and P. Humbert, *TZ* 18 [1962]: 357–61). They were joined in Deut (Deut 13:6; 15:15; 21:8; 24:18; 7:8; 9:26) by *pdh* “to redeem, liberate.” The corresponding use of *gʾl* depends upon this innovation. This use does not necessarily mean, however, that *gʾl* had lost its specific sense “to regain something lost” and

had become entirely conformed to *pdh*. Although this amalgamation is possible (cf. above 4a, c), one may expect that late documents that associate *gʾl* with the liberation from Egypt all presuppose the patriarchal tradition, even if they do not mention it. Thus one could also include the patriarchal period in the usage of *gʾl*, and one could understand the exodus from Egypt as the return of the enslaved to their legitimate lord, as a reestablishment of their freedom.

(f) Deutero-Isaiah proclaimed the return of the Babylonian exiles as a second exodus surpassing the first (cf. von Rad, *Theol.* 2:239), and like the first, the second will be a redemption. Apparently, Deutero-Isaiah appropriated the term introduced by Deut, except he used *gʾl* rather than *pdh*. The root *pdh* and its derivative *p<sup>e</sup>dût* “redemption” is certainly not unknown to him, but its two occurrences are rather insignificant (Isa 51:11 = 35:10; 50:2). Consequently, the weight that *gʾl* must have had for the prophet becomes only the more apparent.

The term appears often in Deutero-Isa (cf. 4c), but variations in usage are limited. Beside the dominant qal, only one unique ni. occurs, in a passage of disputed authenticity, Isa 52:3, “Since you were sold for nought, you will be redeemed without price” (cf. Westermann, *Isa 40–66*, OTL, 247). In addition, this is the only occurrence of an impf. form of the verb. Apart from the similarly infrequent pass. ptcp. *g<sup>e</sup>ûlîm* “the redeemed” (Isa 51:10), only the pf. and the act. ptcp. of the qal occur. The former has its place, on the one hand, in the promise of salvation (Isa 43:1; 44:22) and, on the other, in the eschatological song of praise (44:23; 48:20; 52:9; cf. C. Westermann, *Forschung am AT* [1964], 157ff.). Both genres discuss the immediately imminent, but still future, salvation in the so-called prophetic pf. as though it had already transpired. While the prophet addresses the promise of salvation to the exiled Jews, the worldwide circle of addressees answers the message that reaches them in the song of praise.

As seen by Deutero-Isaiah, this liberation or redemption has the most comprehensive dimension, applying not only to the exiles in Babylon (48:20) and to the wider Diaspora (43:5f.; 49:12, 18, 22f.), but also to the nations. As witnesses of the emancipation by which Yahweh reconstitutes his people, the nations themselves will recognize Yahweh for who he is (41:4f.; 45:6; 49:26; 52:10) and will become aware of the impotence of their idols (41:11; 42:17; 45:24). In view of all this, what is the significance of the prophet’s preference for *gʾl* as a term for redemption? (On the other verbs of salvation he uses, see 4a.) The significance is most clearly seen in his designation of Yahweh as *gōʾēl*, thus becoming the first to apply this attribute to him (for texts see 4c).

He adopts the epithet *q<sup>e</sup>dôš yisrāʾēl* “the holy one of Israel” introduced by First Isaiah and repeatedly adds the new term *gōʾēl* (41:14; 43:14; 48:17; 49:7). The others majestic titles combined with *gōʾēl* are: “King of

Israel” (44:6), “the mighty one of Jacob” (49:26), and “maker” (*yōšēr*: 44:24, “Thus says Yahweh, your redeemer, your maker from the womb onward”). Here terms for making and redeeming have almost become synonymous. They “describe a sweep, a history, God’s history with his chosen people” (so Westermann, *Isa 40–66*, OTL, 155). By not only comparing Yahweh’s saving activity with the act of an earthly redeemer, but even equating the two through the use of the word *gōʿēl*, Deutero-Isaiah anchors the end of Israel’s history in its beginning. Such is the call of Abraham, whose descendants the exiled Jews are and continue to be (41:8; 51:2). Even if their ancestors and they themselves were sold and rejected since the early days because of their apostasy, this separation is not final because there is no bill of divorcement (50:1). Because no such separation exists, the prophet can use the verb *gʾl* in order to attest at the same time that no separation exists. For as *gōʿēl* Yahweh does not purchase strange goods; rather, he regains that which has always—since the time of Abraham—belonged to him. Yahweh lays claim to his ancient right to Israel; he actualizes a claim that is his because he has created and chosen this people and he is its king. Only *gʾl* shaped by family law and not the neutral *pdh* could serve as a vehicle for this message.

*gʾl* seems to be interpreted in a more narrowly commercial sense in the salvation oracle in Isa 43:1–7, indeed, such that Yahweh offers other lands as a ransom for Israel, i.e., probably that he grants them to the world ruler Cyrus as reparation for the soon-to-be-freed Israel. This reading presumes that one may appeal to vv 3 and 4 in addition to v 2 in order to elucidate v 1, a presumption that is uncertain (cf. Jepsen, op. cit. 161). Even if this assumption is appropriate, the fact remains that in 45:13 the prophet has Cyrus fulfill his mission “without purchase price and without gift.”

(g) Following Deutero-Isaiah, Trito-Isaiah also calls Yahweh *gōʿēl*. In Isa 59:20 and 60:16 this designation also occurs in an eschatological context; in 63:16 *gōʿēl* parallels *ʾāb* “father,” but in a broader sense encompassing deliverance from Egypt, salvation in the present, and salvation in the future.

The confession in Psa 19:15 (“Yahweh, my rock and my redeemer”) expresses confidence in Yahweh’s future protection, and the same is true for the passage already mentioned (4d), Jer 50:34, in view of the deliverance of those enslaved by Babel: “Indeed, their redeemer is strong, Yahweh of hosts is his name.”

As we saw (4e), *gʿûlîm* in Isa 51:10 means those saved by Yahweh at the Reed Sea. Trito-Isaiah appropriated the expression (62:12), although for him it refers to the members of the people brought home from the Diaspora (cf. v 11). The author of the apocalypse Isa 34–35, imitating

Deutero-Isa, uses the word *g<sup>e</sup>ʾûlîm* in 35:9b, 10a, but once again the redeemed are those who return from the Diaspora on wondrously prepared streets: “There the redeemed will go, the redeemed of Yahweh will return thereon.” Return always means the reconstitution of a lost totality and thus is essential to the *gʾl* concept. Hence one may say that the old sense of the verb is still alive in the passages just mentioned, perhaps no longer in all its legal connotations, but still such that an essential aspect of *gʾl*—the liberating reconstitution of the original—finds unmistakable expression.

(h) According to Jepsen (op. cit. 161), this is no longer the case in the following 8 passages: Gen 48:16; Hos 13:14; Mic 4:10; Jer 31:11; Psa 69:19; 103:4; 106:10; 107:2. With the single exception of Psa 69:19, these passages always associate *gʾl* with the prep. *min* “from” and parallel it three times to *pdh* (Hos 13:14; Jer 31:11; Psa 69:19). Both usages indicate that *gʾl* here means less the reconstitution of an earlier status than liberation from the might of an opposing power, manifest as a political enemy (Mic 4:10; Jer 31:11; Psa 106:10), as a personal opponent (Psa 69:19), as a situation of need (Gen 48:16; Psa 107:2), as ill-fate (Hos 13:14), and as fatal illness (Psa 103:4).

Another brief word is necessary regarding two of these texts, Psa 106:10 and Gen 48:16. Psa 106:10, “And he redeemed them from the power of the enemy,” concerns, according to the context, deliverance from Egypt, so that the passage has already been treated (4e). Because it offers *gʾl min* “to redeem from,” however, it belongs at the same time in the series of texts above. In Gen 48:16, in the blessing of the dying Jacob (according to E), the words *hammalʾāk haggōʾēl ʾōtî mikkol-rā<sup>c</sup>* should be rendered with Jepsen (op. cit. 161): “The angel, which has protected me from all evil.” This is a derived meaning for *gʾl*, not the original, as Johnson thinks (cf. 1).

(i) The expanded usage of *gʾl* just mentioned also applies to the PN *yigʾāl* (see 1 and 2) “he (Yahweh) has redeemed,” i.e., he has redeemed the child so named from evil, esp. from sickness. This name should be understood in analogy to the Bab. name *iptur-sin* “Sin (the moon god) has undone (the evil),” formed with the verb *paṭāru* (see 3b; cf. Stamm, AN 191).

5. In post-OT literature, *gʾl* continues to have a threefold usage: in reference to God’s saving intervention in general, to the liberation from Egypt, and to the (eschatological) redemption of Israel (cf. TDNT 4:350; 7:987f.).

The LXX renders *gʾl* either with *lytrousthai* or *rhyesthai* (cf. TDNT 4:332; 6:999), but not by *sōzein*.

Exceptions are Isa 44:23, where LXXA has *elytrōsato* instead of *ēleēsen*, and Jer

31:11 (LXX 38:11), where the second verb in the parallelism *pdh //gʿl* is represented by a form of *exaireisthai* (*exeilato*).

The LXX offers *ho anchisteuōn* “the one who exercises the right of the nearest relative” for *gōʿel haddām* “blood avenger.” The related subst. *anchisteus/anchisteutēs* “nearest relative” corresponds to the Hebr. *gōʿel* in 2 Sam 14:11; 1 Kgs 16:11, and the verb *anchisteuein* is used for *gʿl* in Ruth. The abstract *gʿullâ* “the right (or the duty) of redemption” in Ruth 4:6f. = *anchisteia*; Lev 25:29, 48 = *lytrōsis* (so also Isa 63:4 for *gʿullîm*); Lev 25:31f. = *lytrōtai* “(houses) which are redeemable”; Lev 25:24, 26, 51f. = *lytra*. The renderings in Jer 32:7f.; Ezek 11:15; Job 3:5 are particularly noteworthy.

The NT used both of LXX’s verbs, although they lose a great deal of significance in contrast to *sōzein*. The latter occurs 106x, *lytrousthai* only 3x, and *rhyesthai* 16x. The use of *lytrousthai* is supplemented, however, by the derivatives *lytron*, *lytrōsis*, etc., which will not be considered here (cf. F. Büchsel, “λύω,” *TDNT* 4:335–56).

NT usage of *lytrousthai* and *rhyesthai* exhibits a deficiency in comparison to the OT in that the redemption from Egypt is not treated, and a surplus in that Jesus is also the author of salvation in addition to God. This situation is true for all three uses of *lytrousthai* (Luke 24:21; Titus 2:14; 1 Pet 1:18). Their subject is the eschatological salvation brought about by Jesus.

*rhyesthai* also describes eschatological salvation; it is attributed to God (Matt 6:13; Rom 11:26; Col 1:13) and to Jesus (1 Thess 1:10). Following the OT use of *gʿl*, *rhyesthai* also refers to salvation from the might of opposing powers. These powers include: death (Matt 27:43; Rom 7:24; 2 Cor 1:10), enemies (Luke 1:74; cf. 2 Tim 4:17), disobedient or perverse and evil people (Rom 15:31; 2 Thess 3:2), temptations (2 Pet 2:9), and oppression or persecution (2 Tim 3:11; 4:18). The theme of salvation in the primeval period, so important in the OT, is represented only by the reference to the deliverance of Lot (2 Pet 2:7).

J. J. Stamm

## גבה *gbh* to be high

S 1361; BDB 146b; *HALOT* 1:170a; *TDOT* 2:356–60; *TWOT* 305; *NIDOTTE* 1467

1. The root *gbh* (with consonantal *h*) “to be high” occurs almost exclusively in Hebr.

*gbh* “height” in the Siloam tunnel inscription should be mentioned as an extrabibl. occurrence: “And the height of the rock above the head(s) of the miners was 100 cubits” (ANET 321b; KAI no. 189.5f.).

Aram. uses → *rûm*. The only Aram. occurrences of *gbh* independent of the OT are Aḥ. 107 (Cowley, 216, 233, “A king is like the merciful[?]: even his voice is high”) and the Pahlavi ideogram *gbh* (HAL 163b).

Cf. also Arab. *jabhat* “forehead”; on the relationship of the roots *gbh* and *gbḥ* “to be bare,” cf. P. Fronzaroli, AANLR 8/19 (1964): 165, 167 (“rideterminazione espressiva”).

In addition to the qal “to be high, elevated, haughty” and hi. “to raise” of the root, the derivatives *gābōah* “high, elevated, haughty,” *gōbah* “height, growth, majesty, arrogance,” and *gabhūt* “arrogance” also occur in the OT.

The adj. occurs 4x in the cs. state in the form *gebah*, derived either from \**gābēah* or better from *gābōah* (cf. W. Baumgartner, FS Eissfeldt [1958], 31), as well as in the form *g<sup>e</sup>bōah* in 1 Sam 16:7 (listed as an inf. in Mandl. 245c).

2. Most of the 94 occurrences of the root (qal 24x, hi. 10x, *gābōah* 41x, *gōbah* 17x, *gabhūt* 2x) appear in the Prophets (Ezek 22x, Isa 14x, Jer 7x), in the Psa (7x), and in wisdom literature (Job 8x, Eccl 5x, Prov 4x).

3. All meanings of *gbh* and its derivatives are closely grouped around the basic meaning “to be high.”

(a) The qal indicates the growth of a tree (Ezek 31:10, 14), or a branch (Ezek 19:11), the elevation of the heaven above the earth (Isa 55:9 *gbh min* = “to tower above”; Psa 103:11), or of the clouds above people (Job 35:5); Saul towers above all the people by a head (1 Sam 10:23).

A causative hi. meaning “to raise” occurs in 2 Chron 33:14 (wall); Ezek 17:24 (to let a tree grow tall); Jer 49:16 (the nest; cf. Obad 4); Job 5:7 (to fly high, in conjunction with *‘ûp* “to fly”; Job 39:27 without *‘ûp*); Psa 113:5 (to dwell on high, spoken by God); Prov 17:19 (door; according to Gemser, HAT 16, 73, and Ringgren, ATD 16/1, 74, the mouth is meant; cf. Mic 7:5; Psa 141:3; the saying would then be directed at bragging).

The adj. *gābōah* describes objects such as high mountains (Gen 7:19; Isa 30:25; 40:9; 57:7; Jer 3:6; Ezek 17:22; Psa 104:18), hills (1 Kgs 14:23; 2 Kgs 17:10; Jer 2:20; 17:2), gates (Jer 51:58), battlements (Zeph 1:16), towers (Isa 2:15), gallows (Esth 5:14; 7:9), horns (Dan 8:3), trees (Isa 10:33; Ezek 17:24; cf. 31:3 in conjunction with *qômâ*: “tall growth”). It refers to tall people (1 Sam 9:2; 16:7).

The subst. *gōbah* indicates the height, the stature of the trees (Ezek 31:10, 14; Amos 2:9); it serves as a term for measurement (cf. Ezek 40:42, the height of a table, alongside *‘ōrek* “length” and *rōḥab* “breadth”; 41:22

txt em, the height of an altar; 2 Chron 3:4, the height of the hall; 1 Sam 17:4, the height of Goliath; cf. also the Siloam tunnel inscription; see 1). Ezek 41:8 may well be read *gabbâ* “raised pavement” with *BHS* instead of *gōbah*; cf. Gk. *gabbatha* John 19:13; Zimmerli, *Ezek*, Herm, 2:371f.

The more common word for “height” in measurements is *qômâ* (→ *qûm*; Exod 25:10, 23, etc.; 1 Kgs 6–7; 2 Kgs 25:17, etc.; cf. Rudolph, *HAT* 21, 207, on 2 Chron 4:1).

(b) The following fig. meanings with positive or negative connotations also derive directly from the basic meaning.

Eccl 5:7, “For a loftier one watches over the lofty, and an even loftier one over them” refers to “superiors” (Zimmerli, *ATD* 16/1, 191: “in view of the multiple layers of the structure of civil offices or of the court, one always observes and spies on the other and seeks to supplant him”).

Isa 52:13, which concerns the future exaltation of the servant of God in sharp contrast to his humility (v 14), *gbh* denotes the majesty of God’s servant (cf. the par. terms → *rûm* and → *ns’*).

In a negative sense *gbh* means the haughty, arrogant attitude of people. In addition to roots that appear individually (cf. Isa 3:16; Ezek 16:50), the following fixed phrases may be mentioned here:

*gbh lēb* “the heart is proud” (*HAL* 163b: “to have high aspirations”; Ezek 28:2, 5, 17; Psa 131:1; Prov 18:12; 2 Chron 26:16; 32:25). 2 Chron 17:6 is the only passage that discusses the “pride of the heart” in a positive sense (“high-spirited” may be a good translation): Jehoshaphat is “high-spirited” in following Yahweh and therefore removes the high places and Asherahs from Judah;

*g<sup>c</sup>bah lēb* “high-spirited” (Prov 16:5); *g<sup>c</sup>bah rûah* “haughty” (Prov 7:8); *g<sup>c</sup>bah ‘ēnayim* “proud-eyed, haughty, condescending” (Psa 101:5; cf. here the par. term *r<sup>c</sup>ḥab lēbāb* “the broad, arrogant heart,” as well as Isa 2:11 *‘ēnē gabbūt* “the haughty eyes” and Psa 131:1 *lō<sup>’</sup> rāmū ‘ēnay* “my eyes do not look haughtily”);

*gōbah lēb* “haughtiness” (2 Chron 32:26; cf. Ezek 31:10); *gōbah rûah* “haughtiness” (Prov 16:18); *gōbah ‘ap* “arrogance” (Psa 10:4);

*dbr* pi. *g<sup>c</sup>bōhâ* “to speak loftily, haughtily” (1 Sam 2:3).

Esp. noteworthy par. terms that appear in the context of *gbh* are the roots → *g<sup>h</sup>*, → *ns’* and → *rûm* (cf. Isa 2:11f., 17; Jer 13:15, 17; 48:29; Prov 16:18, etc.), *‘ātāq* “audacity” (1 Sam 2:3), and as antonyms the roots *špl* “to be lowly, humble” (Isa 2:11; 5:15; cf. 10:33; Ezek 17:24; 21:31), *šhh* “to

bend down” (Isa 2:17; cf. 5:15), *kn*<sup>c</sup> “to humble oneself” (2 Chron 32:26). It becomes apparent that *gbh* is closely related to *g<sup>h</sup>*, *ns<sup>o</sup>* and *rûm* in the semantic field of arrogance; a distinction in meaning is hardly perceptible; the terms often seem interchangeable.

(c) Wisdom warns against a haughty, arrogant (impudent) attitude in Prov 16:18 (here together with → *g<sup>h</sup>*); 18:12; Eccl 7:8 (a *tôb*-saying with a contrasted *ʿerek rûah* “patient”); such an arrogant individual is an abomination to God and will not go unpunished, Prov 16:5 (cf. Psa 131:1, the declaration of loyalty of the *šaddîq*).

4. The preceding gives rise to the theological usage.

(a) Wisdom is at first concerned more with observations of life than theological notions (see Prov 16:18), although Prov 16:5 admittedly already emphasizes the relationship to God (cf. here the king’s vow of loyalty, Psa 101, where the king, as representative of Yahweh’s judicial authority in Israel [Kraus, *Psa*, CC, 2:279], expressly addresses himself in v 5 to the *g<sup>e</sup>bah ʿênayim*). But the following passages characterize human arrogance as the haughty behavior of ignoring God (Jer 13:15; 1 Sam 2:3; Psa 10:4), as the proud attitude of the one who opposes God (Ezek 28:2). Therefore, the exalted will be humbled and the humble exalted (Ezek 21:31; cf. Job 36:6f.; in a metaphor, Ezek 17:22–24); therefore, judgment comes over the *gbh* of the individual (cf. Zeph 3:11f.: the new behavior here is that of the *dal* and *ʿânî*, the “lowly” and the “humble”; in Jer 49:16 the aerie is a picture of the haughty pride of Edom in its unconquerable mountain fortresses; Ezek 31:10). In Isa 2:12–17 (→ *g<sup>h</sup>* 4a) the day of Yahweh comes as judgment upon all the exalted and haughty (cf. in 2:12 the roots *g<sup>h</sup>*, *rûm*, *ns<sup>o</sup>* and, according to the LXX, *gbh* in par.; on 2:17, cf. 2:11; 5:15 is probably a gloss in Isa diction: *ʿênê g<sup>e</sup>bôhîm* “the eyes of the arrogant”; for the details of the traditiohistorical backgrounds of this passage, see Wildberger, *Isa 1–12*, CC, 111–15).

(b) The theological use of the root in a few passages to indicate God’s majesty arises from the meaning “to be exalted, majestic” (cf. Job 40:10, *gôbah* alongside *gāʾôn* as an attribute of God’s dominion), primarily with a view to God’s infinite transcendence and incomparability as the absolutely superior (Psa 113:5; cf. Job 22:12; Psa 103:11; Isa 55:9; Job 11:8), whose glance down becomes a helpful act, a bending down to the helpless and poor (cf. Psa 113:5f.).

5. The LXX employs various terms to translate *gbh*, most often *hypsos* and *hypsēlos*, but never *hybris*. The OT usage of *gbh* survives at Qumran (cf. CD 1:15; 2:19), in early Judaism (cf. StrB 2:101ff.), and in the NT (cf. G. Bertram, “ὕψος,” *TDNT* 8:602–20).

## גבר *gbr* to be superior

S 1396; BDB 149b; *HALOT* 1:175a; *TDOT* 2:367–82; *TWOT* 310; *NIDOTTE* 1504

1. The root *gbr* “to be superior, strong” occurs in all branches of the Sem. languages; the subst. in the meaning “man” is limited to NWSem. (P. Fronzaroli, *AANLR* 8/19 [1964]: 245).

Akk. exhibits only the verb *gapāru* “to be superior” and the corresponding verbal adj. *gapru* “superior” (*AHw* 281; on the *b/p* shift, cf. the summary in M. Weippert, *Settlement of the Israelite Tribes in Palestine* [1971], 75–79).

Phoen. demonstrates only the subst. *gbr* “man” (*KAI* no. 24.8; no. 30.2), in Neo-Pun. perhaps *gbrt* “mighty deed(s?)” (*KAI* no. 145.6); similarly, the Mesha stele attests only the substs. *gbr* “man” and *gbrt* “woman” (*KAI* no. 181.16). Ug. exhibits the root only in PNs (cf. Gröndahl 126).

The root plays a large role in Aram., where in addition to the verb (*KAI* no. 223B.19; Fitzmyer, *Sef.* 82f.), the subst. *gbr* “man” (often in the sense of “anyone”), in particular, occurs in a broad distribution since Old Aram. (*DISO* 47; *LS* 102f.; cf. also *gbrth* “his might” in *KAI* no. 214.32).

Eth. *gbr* developed into the general verb “to do, work” (Dillmann 1159–67).

In addition to the qal, the verb occurs in pi., hi., and hitp.; nom. derivatives are *geber*, *g<sup>c</sup>bûrâ*, *g<sup>c</sup>bîr*, *g<sup>c</sup>bîrâ*, and *gibbôr*, in Bibl. Aram. *g<sup>c</sup>bar*, *g<sup>c</sup>bûrâ*, and *gibbar*.

The PNs *geber* (1 Kgs 4:13–19), a short form of *gabrîʾēl* (Dan 8:16; 9:21; *IP* 190: “God has proven himself strong”; cf. C.-H. Hunzinger, *RGG* 2:1185), and the place-names *gibbar* (Ezra 2:20) and *ʿšyôngeber* (*BHH* 1:461f.) must be included.

2. The verb *gbr* occurs 25x in the OT, 17x qal, 3x pi., 2x hi., and 3x hitp. The figures for the nouns are: *geber* 66x (Job 15x, Psa 10x, Jer 9x, Prov 8x), *g<sup>c</sup>bûrâ* 61x (Psa 17x, 2 Kgs and Isa 7x), *g<sup>c</sup>bîr* 2x (Gen 27:29, 37), *g<sup>c</sup>bîrâ* 15x, *gibbôr* 159x (1 Chron 31x, Jer 19x, 2 Sam 16x, Psa and 2 Chron 12x).

In Bibl. Aram. *gebar* appears 21x (Dan 17x), *gibbar* 1x (Dan 3:20), and *g<sup>c</sup>bûrâ* 2x (Dan 2:20, 23). In all, the word group occurs 352x in the OT in a rather broad pattern of distribution.

3. (a) All semantic nuances of the *qal* are related to the basic meaning “to be/become superior, strong.”

*gbr* can be used abs., with a comparative *min* (Gen 49:26; 2 Sam 1:23), *ʿal* (2 Sam 11:23) or *be* (1 Chron 5:2). Thus Gen 7:18–20, 24 uses *gbr* 4x to express the rising of the flood waters (7:18 par. *rbh* “to become many”). In battle *gbr* signifies “maintaining the upper hand” over the enemy (Exod 17:11; 2 Sam 11:23; Lam 1:16).

The pi. verb should be translated “to make strong” (Zech 10:6, 12; Eccl 10:10 in conjunction with *h<sup>a</sup>yālîm* “to expend might”), the hi. as an inner-trans. (internal) “to show oneself strong” (Psa 12:5; Dan 9:27 txt?), and the hitp. “to show oneself superior” (Isa 42:13; “to behave proudly” Job 15:25; 36:9).

The verb has no regular antonym; the flood narrative uses the verbs *škk* “to recede” (Gen 8:1) and *h<sup>s</sup>sr* “to diminish” (8:3, 5) as opposites of *gbr*.

(b) The basic meaning of *g<sup>e</sup>bûrâ*, closely related to the verb, is “superiority, strength, might.”

Very often it is “military might” (Isa 3:25; Jer 49:35; Ezek 32:29f.; in combination with *milḥāmâ* “battle”: 2 Kgs 18:20 = Isa 36:5; Isa 28:6). The Dtr framework uses *g<sup>e</sup>bûrâ* in the more general sense of “ability” (always in association with *šh* “to do”: 1 Kgs 15:23; 16:5, 27; 22:46, etc.). *g<sup>e</sup>bûrâ* can mean the “strength of the stallions” (Psa 147:10; Job 39:19) or fig. the “splendor” of the sun (Judg 5:31).

It has no consistent antonym in the semantic field.

(c) The segholate form *geber* (see H. Kosmala, “The Term *geber* in the OT and in the Scrolls,” *SVT* 17 [1969]: 159–69) is primarily attested in later OT literature (Psa, Job, Prov). The basic meaning of the root is curtailed here; *geber* is used as a rule just like → *ʾîš* “man.”

Thus *geber* can parallel *ʾîš* (Jer 22:30; Mic 2:2), *zākār* “man” (Jer 30:6), *ʾnôš* “person” (Job 4:17), or *ʾādām* “person” (Job 14:10). *ʾiššâ* “woman” (Deut 22:5; in the series “men-women-children,” Jer 43:6; cf. 44:20) and *n<sup>e</sup>qēbâ* “woman” (Jer 31:22; cf. Rudolph, HAT 12, 198f.) occur as antonyms. Like *ʾîš* (here the distance from the basic meaning of the root becomes esp. apparent), *geber* can even mean “male child” (Job 3:3) or be generalized to the pron. “anyone” (Joel 2:8, etc.; cf. the usage in Aram.; see 1).

(d) The intensive form *gibbôr* conforms closely to the meaning of the root.

*gibbôr* can be translated adj. as “strong” (1 Sam 14:52 “strong man” alongside *ben-ḥayil*; cf. 2 Sam 17:10; Psa 112:2 progeny; Gen 10:9 “mighty hunter”; Prov 30:30 uses *gibbôr* of an animal).

Accordingly, the basic meaning of the subst. is “strength”; par. terms include *ʿaddîr* “powerful one” (Judg 5:13), *ḥāzāq* “strong one” (Amos 2:14), and *ʿarîš* “mighty one” (Isa 49:25). *gibbôr* is the “strong (man)” in contrast to the (weak) woman (Josh 1:14; cf. Jer 48:41; 49:22; 51:30) or simply to the weak (Joel 4:10 *ḥallāš*) or the stumbling (1 Sam 2:4 *kšl*); as a development of this basic meaning *gibbôr* should be translated “tyrant” in Gen 10:8 = 1 Chron 1:10. Wisdom literature can contrast the strong with the wise (Prov 21:22; cf. Jer 9:22).

In most cases *gibbôr* is the “war hero,” sometimes in the common phrase *gibbôr ḥayil* (or the pl.). This phrase occurs 4x in Josh and 27x in Chron, for example. In particular, the par. terms that appear in the semantic field unambiguously indicate a military function for the *gibbôr* (phrases such as *ʾiš milḥāmā*, or the like: Josh 6:2f.; 10:7; 2 Sam 17:8; 2 Kgs 24:16; Isa 3:2; 42:13; Ezek 39:20; Joel 2:7; 4:9; 2 Chron 17:13; *ʾanšē ḥaḥayil*. 2 Kgs 24:16; Isa 5:22; Jer 48:14; Nah 2:4). *gibbôr ḥayil* in a more general sense, however, can also simply mean “capable man” (1 Sam 9:1; 1 Kgs 11:28; 2 Kgs 5:1; 1 Chron 9:13; 26:6). Regarding the *gibbôr ḥayil* as the social class of the (land-owning) militia, cf. the (somewhat divergent) positions of E. Würthwein, *Der ʿamm haʿarez* (1936), 15, 28; J. van der Ploeg, *RB* 50 (1941): 120–25; id., *OTS* 9 (1951): 58f.; de Vaux 1:70; Noth, *BK* 9, 257.

(e) Closely dependent on the basic meaning of the root, *g<sup>e</sup>bîr* can mean the “lord, master” (only Gen 27:29, 37), before whom servants (v 37) bow (v 29).

The fem. form is *g<sup>e</sup>bîrâ* “lady, mistress” (with the antonym *šiphâ* “maid” in Gen 16:1ff.; Isa 24:2; Psa 123:2). *g<sup>e</sup>bîrâ* is an honorary title at the royal court either for the queen (1 Kgs 11:19 par. *ʾiššâ* “wife”) or the king’s mother (1 Kgs 15:13 par. *ʿēm* “mother”; cf. Jer. 13:18, etc.). On the office of *g<sup>e</sup>bîrâ*, → *ʿēm* 4b.

4. (a) The discussion of Yahweh’s strength (*g<sup>e</sup>bûrâ*) occurs primarily in the Psa, in various contexts: in descriptive praise of Yahweh’s strength (Psa 65:7; 66:7; 89:14; 145:11; cf. Jer 10:6; Job 12:13; 1 Chron 29:11f.; 2 Chron 20:6); in the lament, which questions Yahweh’s might (Isa 63:15); in the request for God’s might (Psa 54:3; 80:3); in the vow of praise (Psa 21:14; 71:18); and in the historical psalms (Psa 106:8). Outside the Psa, Yahweh’s *g<sup>e</sup>bûrâ* is mentioned only 3x, in prophecy: in the announcement of judgment (Isa 33:13; Jer 16:21) and in the announcement of messianic salvation (Isa 11:2).

A whole series of pars. occur in the semantic field of the discussion of Yahweh’s *g<sup>e</sup>bûrâ*: *ʿōz* “strength” (Psa 21:14), *y<sup>e</sup>šûʿâ* “help” (Psa 80:3), *qînʾâ* “zeal” (Isa 63:15), *z<sup>e</sup>rôa<sup>c</sup>* “arm” (Psa 71:18; cf. 89:14), *yād* “hand” (Jer 16:21), *gedulla*® “greatness,”

*tip'eret* “majesty” (1 Chron 29:11), and *kōaḥ* “might” (1 Chron 29:12; 2 Chron 20:6). Although *g<sup>e</sup>bûrâ* and *ḥokmâ* “wisdom” are opposites in Eccl 9:16, they become par. terms in Job 12:13 and Prov 8:14.

(b) Descriptive praises express the greatness and strength of Yahweh's → *ḥesed* “grace” by the verb (in qal; Psa 103:11; 117:2). The contention that people, in contrast to God, are not strong in their own might (*kōaḥ*) and that therefore the godless will become naught (1 Sam 2:9), is a statement of trust. The lamenter's experience that enemies (Psa 12:5, hi.; Lam 1:16) and the godless (Job 21:7) are strong nevertheless and even feel that they are superior to God (*gbr* hitp. in Job 15:25; 36:9) is a harsh contrast.

(c) A variety of contexts use *gibbôr* to express the fact that Yahweh is “strong” (Deut 10:17 = Neh 9:32 par. *gādōl* “great” and *nôrā'* “frightful”; Jer 32:18 par. *gādōt*, cf. Isa 10:21) or a “hero” (Isa 9:5; Jer 20:11; Zeph 3:17).

(d) The Psa occasionally discuss Yahweh's *g<sup>e</sup>bûrôt*. Terms like *tehilla*® “glorious deed” and *nīplā'ôt* “wondrous deeds” (Psa 106:2 in the context of a report of Yahweh's historical acts; cf. Psa 71:16f.; 145:4ff.) occur in the semantic field. Introductions to descriptive psalms of praise (Psa 145:4ff.; 150:2) or expressions of confidence in lament contexts (Psa 20:7; 71:16; cf. 106:2; Deut 3:24) mention such *g<sup>e</sup>bûrôt*, and one may surmise that *g<sup>e</sup>bûrôt* should be understood as “Yahweh's mighty historical acts,” by which supplicants do not refer to specific events, but describe and summarize, at once, Yahweh's historical activity.

(e) The reports that the historical books give concerning the holy wars often discuss the fact that Yahweh himself fights against the enemies (*lhm* ni. Exod 14:14, etc.) and confuses them (*hmm* Josh 10:10, etc.), but the root *gbr* is entirely absent from these reports. By contrast, the root designates Yahweh's military might in the Psa and in prophecy. Thus the entrance liturgy of Psa 24:8 describes Yahweh as *'izzûz w<sup>e</sup>gibbôr* “strong one and hero” and in par. as *gibbôr milḥāmâ* “hero in battle”; similarly, the eschatological song of praise in Isa 42:13 has the hitp. verb as well as *gibbôr* (par. *ʾš milḥāmâ*). The lament in Jer 14:9 (“Why are you like a warrior who cannot help?”) and the late historical Psa 78:65 also use *gibbôr*.

(f) In contrast, the term *geber* in the general meaning “man, person” is never used of Yahweh; rather, Yahweh and his activity are distinguished from those of the *geber* (Job 10:5; 22:2; 33:29; Prov 20:24).

5. The LXX translates the word group with a wide variety of terms; the NT too has no uniform correlation to *gbr*. Cf. Kosmala, “The Term *geber* in the OT and in the Scrolls,” SVT 17 (1969): 167–69, on the post-OT usage of *geber* (esp. at Qumran).

J. Kühlewein

גָּדוֹל *gādôl* **great**

S 1419; BDB 152b; HALOT 1:177b; TDOT 2:390–416; TWOT 315d; NIDOTTE 1524

1. The root *gdl* “to be great” occurs only in Hebr. and Ug. In accordance with the general susceptibility of qualitative adj. modifiers to innovation, there is no common Sem. designation for “great”; terms for “great” in the other Sem. languages (Akk. *rabû*, Phoen. *ʿdr*, Aram. *rab*, Arab. *kabîr*, Eth. *ʿabîy*) exist with other meanings in Hebr. (→ *rab* “much, many,” → *ʿaddîr* “majestic,” *kabbîr* “strong, mighty,” *ʿbh* “to be thick”).

It is doubtful that *gādôl* is associated with the (common Sem.) root *gdl* II “to turn, twist” (Hebr. *gādîl* “tassels,” Deut 22:12; 1 Kgs 7:17; Akk. *gidlu* “skein”; Aram. *g<sup>c</sup>dîlā* “string,” etc.; on Arab. cf. J. Blau, VT 5 [1955]: 339); cf. GB 130b; SNHL 18f. (M. Dahood, Bib 45 [1964]: 397 also suggests *gdl* II unnecessarily in Psa 12:4 and 41:10).

Ug. uses *rb* (→ *rab*) more frequently than *gdl* for “great” (WUS no. 632; UT no. 562).

In addition to the verb in qal, pi., pu., hi., and hitp., Hebr. exhibits the nom. formations *gādôl* and *gādēl* (verbal adj.) “great,” *gōdel* and *g<sup>c</sup>dûllâ* (*g<sup>c</sup>dûllâ*) “greatness,” as well as *migdāl* “tower” (in place-names also *migdōl*), also found in Ug., Moab. (DISO 142), Aram. and, as a loanword, in Arab. (Fraenkel 236f.), Copt., and Berber (GB 396a).

The PNs *g<sup>c</sup>dalyâ(hû)*, *yigdalyāhû*, and *giddēl* (a shortened form; cf. *gdwl* in the Elephantine texts, BMAP 149) should also be mentioned; textually uncertain are *giddaltî* (1 Chron 25:4, 9; cf. Rudolph, HAT 21, 167f.) and *hagg<sup>c</sup>dôlîm* (Neh 11:14; cf. Rudolph, HAT 20, 184).

2. *gdl* occurs 54x in the qal (incl. Esth 9:4, inf. abs., listed in Lis. as an adj.), pi. 25x, pu. 1x, hi. 34x, hitp. 4x. *gādôl* appears 525x (incl. 1 Sam 6:18; excl. Esth 9:4 and Neh 11:14; see above) in the following distribution: Jer 48x, Deut 44x, Ezek 36x, 1 Sam 35x, Gen 33x, Psa 30x, 2 Kgs 29x, Neh and 2 Chron 27x, Josh 26x, 1 Kgs 22x, 2 Sam 18x, Exod and Dan 15x, Isa and Jonah 14x, Judg 12x, 1 Chron 11x, Zech 10x, Num and Esth 8x, Hag, Job, and Ezra 6x, Mal, Prov, and Eccl 4x, Joel 3x, Lev, Zeph and Nah 2x, Hos, Amos, Mic, and Lam 1x; it does not occur in Obad, Hab,

Ruth, or Song Sol. *gādēl* occurs 4x (Gen 26:13; 1 Sam 2:26; Ezek 16:26; 2 Chron 17:12), *gōdel* 13x (Deut 5x), *g<sup>e</sup>dūllā* (Esth 6:3 *g<sup>e</sup>dūlā*) 12x (1 Chron 4x, Psa and Esth 3x, also 2 Sam 7:21, 23), *migdāl* 49x (excl. 2 Sam 22:51 Q *migdōl* and the place-names).

3. (a) The numerous concrete-dimensional and abstract-figurative usages of *gādōl* “great” in reference to persons and things (cf. e.g., the categorization in *HAL* 170b) largely correspond to those of Eng. “great.” The semantic range is somewhat broader because *gādōl* also means “old (the older/oldest)” (cf. *qāṭān/qāṭōn* “small” and “young [the younger/youngest],” e.g., in Gen 29:16, “The older was named Leah, the younger Rachel”; 44:12, “He began with the oldest and ended with the youngest”), and “rich, wealthy” (e.g., 2 Sam 19:33; 2 Kgs 4:8), as well as “esteemed, leading” (often substantivized: e.g., sg. Lev 19:15; 2 Sam 3:38; Jer 52:13; pl. 1 Sam 17:14; 2 Sam 7:9; 2 Kgs 10:6; Jer 5:5, etc.); expressions such as *qōl gādōl* “loud voice” (Gen 39:14; Deut 5:22, etc.), *ʾōr gādōl* “bright light” (Isa 9:1), or *ʿōd hayyôm gādōl* “it is still high day” (Gen 29:7) are also somewhat idiomatic. The semantic range may be somewhat more restricted in view of the fact that not *gādōl* but → *rab* “much, many” is used with some terms of volume (e.g., with *r<sup>e</sup>kūš* “possessions,” Gen 13:6; *māqôm* “space,” 1 Sam 26:13; *derek* “way,” 1 Kgs 19:7; → *t<sup>e</sup>hôm rabbâ* “the great primeval waters,” Gen 7:11; Isa 51:10; Amos 7:4; Psa 36:7).

The normal antonym of *gādōl* in all its meanings is *qāṭān* “small, young, petty” (47x) or *qāṭōn* (54x, occurs only in the masc. sg., assimilated to the nom. formation of *gādōl*, BL 466), cf. e.g., Gen 1:16; Exod 18:22; Deut 25:13f.; 1 Chron 12:15.

*šāʿîr* “small, young, petty” (23x, incl. Dan 8:9, 8x in Gen) does not occur in opposition to *gādōl*, but to *b<sup>e</sup>kōr/b<sup>e</sup>kîrâ* “firstborn” (Gen 19:31–38; 29:26; 43:33; 48:14; Josh 6:26; 1 Kgs 16:34), *rab* “the elder” (Gen 25:23), *ʾaddîr* “majestic” (Jer 14:13), and *ʿāšûm* “strong” (Isa 60:22).

The merism “great and small” in the meaning “all,” also favored in other languages, occurs quite often (cf. P. Boccaccio, “I termini contrari come espressioni della totalit in Hebraico,” *Bib* 33 [1952]: 173–90; A. M. Honeyman, “Merismus in Biblical Hebrew,” *JBL* 71 [1952]: 11–18; H. A. Brongers, “Merismus, Synekdoche und Hendiadys in der bibel-hebr. Sprache,” *OTS* 14 [1965]: 100–114; on Eg. cf. A. Massart, FS Robert 38–46). Of 32 cases, 25 concern persons, the others animals (Psa 104:25) or (almost always negated) things (Num 22:18; 1 Sam 20:2; 22:15; 25:36; 30:19; 2 Chron 36:18).

The morphology of the usages varies greatly. *qāṭān* (12x; in Esth 1:5, 20; 2

Chron 31:15; 34:30 also in the masc. sg.) occurs along with *qātōn* (20x); the sequence of the expressions also varies (24x small-great, 8x great-small). The arrangement *min... w<sup>ead</sup>* “from . . . to” is most frequent (17x; *miqqātōn w<sup>ead</sup>-gādōl*, Gen 19:11; 1 Sam 5:9; 30:2; 2 Kgs 23:2; 25:26; Jer 8:10; 42:1, 8; 44:12; 2 Chron 15:13; with arts. or sufs., 1 Sam 30:19; Jer 6:13; 31:34; *miggādōl w<sup>ead</sup> qātān*, Esth 1:5, 20; 2 Chron 34:30; with sufs., Jonah 3:5); one also finds the simple *we* “and” (1 Sam 25:36; 1 Kgs 22:31 = 2 Chron 18:30 txt em; Jer 16:6; Job 3:19; 2 Chron 36:18), *ke . . . ke* “as . . . so” (Deut 1:17; 1 Chron 25:8; 26:13; 2 Chron 31:15), *’ō* “or” (Num 22:18; 1 Sam 20:2; 22:15), and *’im* “together with” (Psa 104:25; 115:13).

(b) The two substs. *gōdel* and *g<sup>e</sup>dūllā* are not simply synonyms. Rather, *gōdel* signifies abstract greatness (of God: Deut 3:24; 5:24; 9:26; 11:2; 32:3; Psa 150:2; of his grace, Num 14:19; of his arm, Psa 79:11; of arrogance of the heart, Isa 9:8; 10:12; of the pharaoh compared to a cedar, Ezek 31:2, 7, 18), and *g<sup>e</sup>dūllā/g<sup>e</sup>dūlā* means specifically either “high position, honor, majesty” (of God: 1 Chron 29:11; of a person: Psa 71:21; Esth 1:4; 6:3; 10:2) or something “great,” a “great deed” (of God: 2 Sam 7:21, 23; cf. 1 Chron 17:19[bis], 21, twice in the pl.; Psa 145:3, 6); the latter meaning is expressed in the plural, besides through the substantivized fem. pl. of *gādōl* (*g<sup>e</sup>dōlōt* “great things, great deeds”; Deut 10:21; Jer 33:3; 45:5; Psa 71:19; 106:21; Job 5:9; 9:10; 37:5; of Elisha, 2 Kgs 8:4; great speech, Psa 12:4; involvement with great things, Psa 131:1).

(c) In principle, the verb acquires no new connotations in comparison to the adjective. *gd* qal means not only “to become great = grow” (of children: Gen 21:8, 20; 25:27; 38:11, 14; Exod 2:10f.; Judg 11:2; 13:24; 1 Sam 2:21; 3:19; 1 Kgs 12:8, 10 = 2 Chron 10:8, 10; 2 Kgs 4:18; Ezek 16:7; Job 31:18 [cf. Fohrer, KAT 16, 423]; Ruth 1:13; of a lamb, 2 Sam 12:3; of a horn, Dan 8:9f.) and “to become great = be well-off” (Gen 24:35; 26:13[bis]; 1 Kgs 10:23 = 2 Chron 9:22; Jer 5:27; Eccl 2:9), but also “to be great, prove oneself great” (of God, his might, his name, his deeds: Num 14:17; 2 Sam 7:22, 26 = 1 Chron 17:24; Mal 1:5; Psa 35:27; 40:17 = 70:5; 92:6; 104:1; outcry, Gen 19:13; boasting, Zech 12:7; lament, Zech 12:11; pain, Job 2:13; guilt, Lam 4:6 and Ezra 9:6) and “to be great = be significant, mighty, valuable” (king: Gen 41:40; 2 Sam 5:10 = 1 Chron 11:9; Messiah, Mic 5:3; Mordecai, Esth 9:4; Ephraim and Manasseh, Gen 48:19[bis]; life, 1 Sam 26:24[bis]). Verbal clauses here are distinguished from nom. clauses with *gādōl* as predicate (something over 50x) by the fact that the former describe (analytically) an empirically perceived process and do not express (synthetically) a subjective assessment of a phenomenon (cf. the confession formulated as a new perception with a predicate adj. in Isa 12:6, “Great in your midst is the Holy One of Israel,” with the verbal statement of confidence that already presupposes the experience of Yahweh’s greatness in Mal 1:5, “You will say yourselves: Yahweh proves himself to

be great beyond Israel's borders"; cf. *HP* 26, 29–33).

The pi. of *gdl* is mostly factitive "to make great" (Gen 12:2; Num 6:5; Josh 3:7; 4:14; 1 Kgs 1:37, 47; Esth 3:1; 5:11; 10:2; 1 Chron 29:12, 25; 2 Chron 1:1; reflexive in the hitp. "to show oneself great" Ezek 38:23) and "to raise, rear" (2 Kgs 10:6; Isa 1:2; 23:4; 44:14; 49:21; 51:18; Ezek 31:4; Hos 9:12; Jonah 4:10; Dan 1:5; pass. in the pu., Psa 144:12; cf. *HP* 58f.), less frequently declarative "to declare great = praise" (Psa 34:4; 69:31; cf. the PN derived from a psalm quotation in 1 Chron 25:4, 9; cf. *HP* 40–43) or evaluative "to consider great" (Job 7:17; reflexive in the hitp. "to brag" Isa 10:15; Dan 11:36f.).

*gdl* hi. is either a normal causative "to make something great, to prove oneself great" (Gen 19:19; 1 Sam 12:24; 20:41 txt?; 22:51 K = Psa 18:51 Q; Isa 9:2; 28:29; 42:21; Ezek 24:9; Joel 2:20f.; Amos 8:5; Obad 12; Psa 41:10; 126:2f.; 138:2; Eccl 1:16; 2:4) or an inner-causative "to make oneself great = brag" (Jer 48:26, 42; Ezek 35:13; Zeph 2:8, 10; Psa 35:26; 38:17; 55:13; Job 19:5; Lam 1:9; on the distinction from the hitp. see *HP* 46–49) or "to make oneself become great = become great, wonderful" (Dan 8:4, 8, 11, 25; 1 Chron 22:5).

Again, of the relatively uncommon antonyms *qtn* qal "to be small" (Gen 32:11; 2 Sam 7:19 = 1 Chron 17:17), hi. "to make small" (Amos 8:5), and *šʿr* qal "to be small, petty" (Jer 30:19; Zech 13:7; Job 14:21), only the former occurs opposite *gdl*.

4. (a) If one surveys passages with *gādól* in a theological usage, it becomes apparent that the statement "Yahweh is great," etc., occurs primarily in the hymnic texts of the Zion tradition (Psa 48:2 "great is Yahweh and greatly to be praised in the city of our God"; 77:14 "who is as great a god as God"; cf. Kraus, *Psa*, CC, 2:116; 95:3 "for Yahweh is a great God, a great king over all gods"; cf. 47:3 "a great king over all the world"; 96:4 = 1 Chron 16:25 "for great is Yahweh and greatly to be praised, he is more awesome than all the gods"; cf. Psa 145:3; 99:2 "Yahweh is great in Zion, he is exalted over all the nations"; 135:5 "Yahweh is great, our Lord is greater than all gods"; 147:5 "great is our Lord and rich in might"; also a reflection of Jerusalemite theology, Isa 12:6 "great in your midst is the Holy One of Israel"; and, as a hymnic motif in an individual lament, Psa 86:10 "for you are great and you do wonders"). Several passages also make clear that Yahweh's greatness over against the other gods was the original intention (Psa 77:14; 95:3; 96:4; 135:5), easily understandable as an adaptation from pre-Israelite Jerusalemite cult tradition concerning *ʾēl* → *ʿelyôn* (cf. the epithets → *ʾaddîr* and → *rab*, equally at home in Canaan, and also evident in Ug. as divine predications; on the Eg. designation of the divine as *wr* "the great," see S. Morenz, *Äg. Religion* [1960], 156f.). At the same time, Yahweh's greatness may be

related to the nations of the world, often in conjunction with the royal title (Psa 47:3; 86:9f.; 99:2; cf. also Jer 10:6f. “you are great and great is your name in might”; Mal 1:14 “I am a great king”; Ezek 38:23 “I will prove myself to be great and holy before the eyes of many nations,” with *gdl* hitp.), or stated without any particular referent (Psa 48:2; 145:3; 147:5; cf. also Psa 104:1 “Yahweh, my God, how great you are,” with *gdl* qal).

But divine predications could also be formed with *gādôl* or with *gdl* qal in other contexts, such as confessional statements (Exod 18:11, Jethro: “now I know that Yahweh is greater than all gods”; 2 Sam 7:22, David: “therefore, you are great, my Lord Yahweh”; 2 Chron 2:4, Solomon: “and the house that I will build must be great; for our God is greater than all gods”) and statements of confidence in prayers of lament and supplication (Psa 35:27; 40:17 = 70:5; cf. Mal 1:5; each of these passages with *gdl* qal). A further tradition complex is recognizable in the Dtn series of divine epithets (Deut 7:21 “Yahweh . . . , a great and awesome God”; 10:17 “the great, strong, and awesome God”), which are particularly popular in the diction of the post-exilic communal prayer (Jer 32:18; Neh 1:5; 8:6; 9:32; cf. 4:8; Dan 9:4; all passages with *gādôl*).

Since the Dtn period, God’s “greatness” is also discussed in the abstract (*gōdel* Deut 3:24; 5:24; 9:26; 11:2; 32:3; Psa 150:2; *gedulla*® 1 Chron 29:11 in a long series of similar expressions); the PNs *g<sup>c</sup>dalyâ(hû)* and *yigdalyāhû* (“God is great”) had already come into use somewhat earlier (Zeph 1:1 or Jer 38:1).

The book of Job expresses God’s greatness (in contrast to that of people or the creation) not by *gdl* but by *rbh* qal (Job 33:12 “God is greater than any human”) and by *šaggî<sup>ʔ</sup>* “exalted” (36:26 “see, God is exalted, we know him not”; cf. also 37:23 *šaggî<sup>ʔ</sup>kōāḥ* “great in power”); *ʔlkabbîr* “mighty God” in 36:5 is probably a textual error.

The messianic king, as representative and instrument, also receives the predicate “great” in Mic 5:3, “For now he will be great (*gdl* qal) to the ends of the earth.”

(b) The numerous passages that speak of the greatness of the divine character, manifestation, or activity should be distinguished from divine predications. Noteworthy here are esp. the name of God (→ *šēm*; *gādôl*. Josh 7:9; 1 Sam 12:22; 1 Kgs 8:42 = 2 Chron 6:32; Jer 10:6; 44:26; Ezek 36:23; Mal 1:11; Psa 76:2; 99:3; *gdl* qal: 2 Sam 7:26 = 1 Chron 17:24; *gdl* pi.: Psa 34:4; 69:31; *gdl* hi.: Psa 138:2 txt?) and the day of Yahweh (→ *yôm*; Jer 30:7; Joel 2:11; 3:4; Zeph 1:4; Mal 3:23; cf. Hos 2:2 “the day of Jezreel.”)

Further entities of this type associated with *gādôl* are *ʔap* “wrath” (Deut 29:23,

27), *z<sup>c</sup>rôa<sup>c</sup>* “arm, might” (Exod 15:16; cf. Psa 79:11 with *gōdel*), *ḥēmâ* “anger” (2 Kgs 22:13 = 2 Chron 34:21; Jer 36:7), *ḥesed* “grace” (1 Kgs 3:6 = 2 Chron 1:8; Psa 57:11 = 108:5; 86:13; 145:8; cf. Num 14:19 with *gōdeṭ*, Gen 19:19 with *gdl* hi.), *y<sup>c</sup>šû<sup>c</sup>ôt* “salvation” (2 Sam 22:51 = Psa 18:51 with *gdl* hi.), *kābôd* “glory” (Psa 21:6; 138:5), *kōaḥ* “strength” (Exod 32:11; Jer 27:5; 32:17; Nah 1:3, etc.; Num 14:17 with *gdl* qal), *n<sup>c</sup>qāmôt* “vengeance” (Ezek 25:17), *ḥēsâ* “counsel” (Jer 32:19), *rah<sup>a</sup>mîm* “mercy” (Isa 54:7, otherwise with → *rab*), and *tôrâ* “instruction” (Isa 42:21 with *gdl* hi.).

Particularly popular in Dtn-Dtr literature and later in connection with the exodus tradition (cf. Exod 14:31 J, “the great demonstration of might” with → *yād*) are expressions with *gādôl* that discuss great deeds, signs, wonders, etc., in the early history of the people (Deut 4:32, 34, 36f.; 6:22; 7:19; 9:29; 11:7; 26:8; 29:2; 34:12; Josh 24:17; Judg 2:7; 2 Kgs 17:36; Jer 32:21; Neh 1:10; cf. in P Exod 6:6 and 7:4; in reference to a phenomenon in Samuel’s time, 1 Sam 12:16).

Finally, expressions that appear in rather varied contexts for the great deeds of Yahweh should also be mentioned (*g<sup>e</sup>dûllâ*: 2 Sam 7:21, 23; cf. 1 Chron 17:19[bis], 21; Psa 145:3, 6; *g<sup>e</sup>dôlôt*: Deut 10:21; Jer 33:3; 45:5; Psa 71:19; 106:21; Job 5:9; 9:10; 37:5; *gdl* hi.: 1 Sam 12:24; Joel 2:21; Psa 126:2f.).

(c) In the great majority of passages, *gādôl* is thus a thoroughly positive term. This significance is no less true for its application to the people Israel, which, according to the patriarchal promises, is to become a “great people (→ *gôy*)” (Gen 12:2; 17:20; 18:18; 21:18; 46:3; Deut 26:5; cf. also Exod 32:10; Num 14:12; Deut 4:6–8; with → *rab*, Gen 50:20; Exod 1:9). In contrast, negative connotations, which treat human arrogance (with *g<sup>e</sup>dôlôt* Psa 12:4; with *gōdel* Isa 9:8; 10:12; with *gdl* hitp. Isa 10:15; Dan 11:36f.; with *gdl* hi. see the passages cited in 3c), are relatively rare for the root *gdl* (in contrast e.g., to → *g<sup>h</sup>*, → *gbh*).

To some degree as a corrective for the overestimation of human greatness, several passages in the OT emphasize the smallest or youngest, or the smallness and low position of a family or a people (Benjamin, Gideon, Saul, David, Bethlehem-Ephrathah, even Israel). On these “statements of insignificance or humility” (with *qātôn* Gen 42:13, 15, 20, 32, 34; 43:29; 44:26; 1 Sam 15:17; Isa 60:22; with *qātān* Gen 44:20; 1 Sam 16:11; 17:14; with *šā<sup>c</sup>ûr* Gen 43:33; Judg 6:15; 1 Sam 9:21; Isa 60:22; Mic 5:1 txt em; Psa 68:28; with *m<sup>c</sup>aṭ* Deut 7:7 “not because you were more numerous than all nations did Yahweh incline to you and choose you, for you are the smallest among all the peoples, but because Yahweh loved you”), see O. Bächli, “Die Erwählung des Geringen im AT,” TZ 22 (1966): 385–95.

5. In the language of Qumran, which hardly progresses beyond OT usage, a new word *gwdl* for “thumb” appears (1QM 5:13; cf. *qōṭen* “little

finger” in 1 Kgs 12:10 = 2 Chron 10:10).

On the LXX, intertestamental literature, and the NT, see W. Grundmann, “μέγας,” *TDNT* 4:529–44; O. Michel, “μικρός,” *TDNT* 4:648–59.

E. Jenni

גוֹי *gôy* **people** → עַם *‘am*

גוּר *gûr* **to sojourn**

S 1481; BDB 157b; *HALOT* 1:184a; *TDOT* 2:439–49; *TWOT* 330; *NIDOTTE* 1591

גֵּר *gēr* **sojourner**

S 1616; BDB 158a; *HALOT* 1:201a; *TDOT* 2:439–49; *TWOT* 330a; *NIDOTTE* 1731

1. The root *gûr*, certainly attested in the meaning “to sojourn” only in NWSem., occurs outside Hebr. almost exclusively as a subst. “guest, protégé, client.”

Akk. *gurru*, associated with *gēr* in *CAD* G:140b, is explained differently in *AHW* 287a.

The Ug. occurrences from *KTU* 1.19.III.47; 1.140.35 are very uncertain (*WUS* nos. 690f.; *UT* no. 567; Gray, *Legacy* 122, 243).

Phoen.-Pun. *gr* means “protégé, client” (*KAI* no. 37A.16, B.10; a frequent element in PNs, Harris 92f.; cf. Stamm, *AN* 264, on *ubārum*), as does Moab. *gr* in *KAI* no. 181.16f., where a fem. can also be inferred (*KAI* 2:176).

Because the Old Aram. *gûr* “to be exiled” (so *DISO* 49 following Dupont-Sommer) should be disregarded (thus, with some difference, Fitzmyer, *Sef.* 91; *KAI* 2:263; K. R. Veenhof, *BO* 20 [1963]: 142–44, followed by R. Degen, *Altaram. Grammatik* [1969], 19, 71), Aram. examples begin with Nab. and Palm. *gr* “client” (*DISO* 53). Later Aram. dialects develop the divergent meaning *gûr* “to commit adultery” (*gayyôrā*’ “adulterer”).

SSem. equivalents adduced (namely Arab. *jār* “neighbor”; cf. Eth. *gôr*) contribute

nothing to the elucidation of the Hebr. root.

The verb *gûr* (qal and hitpo.) “to sojourn,” the subst. *gēr* “foreigner, protégé,” and the derivative abstract formations *gērût* (Jer 41:17 in a place-name; according to Alt, *KS* [1959], 3:358f. “guest’s fief”) and *m<sup>e</sup>gûrîm* “strangerhood” occur in Hebr.

2. After the exclusion of the homonyms *gûr* II “to attack” and *gûr* III “to be afraid,” Lis. 319f. lists 81 occurrences of *gûr* qal (incl. Judg 5:17; Isa 54:15b; Jer 13x, Lev 11x) and 3 of the hitp. (1 Kgs 17:20; Jer 30:23 txt?; Hos 7:14 txt?). Although *gûr* is already attested before the exile (Gen 12:10; 19:9; 20:1, etc.), the focus of the usage lies in the exilic and post-exilic literature (in H, Lev 17–26, 10x; in Jer 42–50, 12x).

*gēr* occurs 92x in MT (Deut 22x, Lev 21x, Exod 12x, Num 11x, Ezek 5x, Psa 4x), *m<sup>e</sup>gûrîm* 11x (excl. the sg. form in Psa 55:16; Gen 6x and Exod 1x, all passages in P; further Ezek 20:38; Psa 119:54; Job 18:19; Lam 2:22), *gērût* 1x.

The term *gēr* has evidently been used since early times (Covenant Code 6x, 2 Sam 1:13), but it apparently came into frequent usage only toward the end of the state of Judah (de Vaux 1:75) or after the exile. This phenomenon can be adequately explained in terms of events of the period (population loss, emigration, economic difficulties) and theological motifs (the community’s concerns for its unity in distinction from the environment, achieved, in part, by the integration of the “sojourner in your gates”; thus the weight that the legal texts of priestly origin place on this problem; cf. Elliger, HAT 4, 227).

3. (a) The *gēr* is distinguished from the foreigner in general, the *nokrî* or → *zār*, in that he/she is the stranger who has settled, who has established himself/herself for a particular period in the land and to whom a special status is granted. The *tôšāb* “inhabitant,” discussed in post-exilic priestly texts in particular (14x, 8x in Lev), often parallels the *gēr* (Gen 23:4; Lev 25:23, 35, etc.). The social status of the *tôšāb* is comparable, if not identical, with that of the *gēr*. The Spartan *perioikos* or the Athenian *metoikos* would be comparable to the *gēr*.

The *gēr*, alone or in a group, has left his/her homeland as a result of political, economic, or other circumstances and seeks protection in another community, as Abraham did in Hebron (Gen 23:4), Moses in Midian (Exod 2:22 = 18:3), the Bethlehemite Elimelech and his family in Moab (Ruth 1:1), an Ephraimite in Benjaminite territory (Judg 19:16), and even as the Israelites in Egypt (Exod 22:20 = 23:9 = Lev 19:34 = Deut 10:19; Lev 25:23). The relationship between the landless Levites and the *gērîm* also bears comparison: Judg 17:7ff.; 19:1; Deut 14:29; 26:11–13, etc.

The *gēr* does not enjoy the full rights of an Israelite; e.g., he/she possesses no land (according to Ezek 47:22 this limitation will be revoked in the Israel of the future). The *gēr* is usually the servant of an Israelite, who is lord and patron (Deut 24:14). As a rule, the *gēr* is poor (cf., however, Lev 25:47) and is as a result numbered among the economically weak who, like widows and orphans, can lay claim to aid.

They have the right to glean (Lev 19:10; 23:22; Deut 24:19–21, etc.); they stand under divine protection (Deut 10:18; Psa 146:9; Mal 3:5); the Israelites should love them as they love themselves (Lev 19:34; Deut 10:19), bearing in mind their own sojourn in Egypt (Exod 22:20, etc.); they take care not to oppress the *gēr* (so already in the Covenant Code, Exod 22:20–23; 23:9), who enjoys largely the same rights as their own citizens (participation in the tithe, Deut 14:29; Sabbath year, Lev 25:6; cities of refuge, Num 35:15). According to Lev 20:2; 24:16, 22; Deut 1:16, Israelite and *gēr* are subject to the same law; in short, in daily life no distinction between *gērîm* and Israelites existed (de Vaux 1:75).

(b) From a religious perspective the same prescriptions are valid for Israelites and *gērîm* (Exod 12:49; Num 15:15f.): the *gēr* too must keep the Sabbath (Exod 20:10 = Deut 5:14), the fasts of the Day of Atonement (Lev 16:29), and the Passover (Num 9:14, etc.), on the condition that he is circumcised (Exod 12:48). He can sacrifice (Lev 17:8; 22:18; Num 15:15f., etc.) and participate in the festivals (Deut 16:11, 14). He is by all means obligated to observe purity regulations (Lev 17:8–16; 18:26, etc.; cf. Lev 17:15 in contrast to Deut 14:21). Thus the *gēr* is more or less equal to the Israelite even in this area.

Consequently, the LXX translation of the Hebr. term primarily with *prosēlytos* and understanding of the *gēr* as a proselyte in the technical sense, i.e., as one who, through an act of initiation (circumcision), has identified himself with Judaism (so also Mid. Hebr. *gēr* and Aram. *gîyā/ôrā*?, cf. *DISO* 53; see 5 below), is not surprising at all. In the LXX *prosēlytos* occurs 77x, *paroikos* 11x (Gen 15:13; 23:4, etc., i.e., when the specific understanding of the term as a proselyte is excluded), *xenos* 1x (Job 31:32), and *g(e)iōros* 2x (Exod 12:19; Isa 14:1).

(c) As the sources indicate, the status of the *gēr* evolved over time. The legal texts suggest an increasingly pronounced tendency to assimilate the *gēr* to the Israelites, esp. in religious contexts (the technical term for the native full citizen is *ʿezrāh*, 17x, juxtaposed with the *gēr* in Exod, Lev, Num, Josh 8:33; Ezek 47:22; in addition to Lev 23:42 and Psa 37:35 txt em). Originally a foreigner who settled in Israel or in one of the tribes and as such was placed under Yahweh's protection (Covenant Code), the *gēr* already merits special treatment in Deut alongside the widow and the

orphan, indeed, on the basis of a salvation-historical concept: Israel itself was once *gēr*. Finally, the priestly tradition practically makes the stranger a member of the community by imposing precise requirements upon him.

Regarding the history of the term and its background, cf. A. Bertholet, *Die Stellung der Israeliten und der Juden zu den Fremden* (1896); E. Neufeld, *HUCA* 26 (1955): 391–94; P. Grelot, *VT* 6 (1956): 177f.; de Vaux 1:74f.; F. Horst, *RGG* 2:1125f. with bibliog.; K. G. Kuhn, *TDNT* 6:727–44; Th. M. Horner, “Changing Concepts of the ‘Stranger’ in the OT,” *ATR* 42 (1960): 49–53; L. M. Muntingh, “Die Begrip *gēr* in die OT,” *NedGTT* 3 (1962): 534–58.

4. The following viewpoints are theologically significant:

(a) Yahweh himself cares for the sojourner in Israel. Israel’s God is at the same time its patron and commands his people not only not to oppress the sojourner but even to love him/her (Lev 19:33f.; Deut 10:19; → *hb* IV/1).

(b) Deut in particular (Exod 22:20b; 23:9b are secondary, Lev 19:34b is a development of Deut 10:19) draws a connection between the ethical requirement with reference to the *gēr* and Israel’s sojourn in Egypt.

(c) In addition, however, a few passages also treat Israel (like formerly its ancestor Abraham as a type, Gen 23:4) as *gēr* (and *tōšāb*) in Canaan, in Yahweh’s land (Lev 25:23 “the land is mine, but you are strangers and sojourners with me”; Psa 39:13 “for I am a guest with you, a sojourner like all my fathers”; 119:19 “I am a guest on earth”; 1 Chron 29:15 “for we are guests and strangers before you like all our fathers”). On these (spiritualized) concepts and their traditio-critical origins—among other things, the asylum function of the sanctuary also plays a role here (cf. Psa 15:1 with *gûr*; also the Phoen. theophoric proper names formed with *gēr*)—cf. K. L. Schmidt, “Israels Stellung zu den Fremdlingen und Beisassen und Israels Wissen um Seine Fremdling- und Beisassenschaft,” *Judaica* 1 (1945): 269–96; K. L. and M. A. Schmidt, *TDNT* 5:846–48; H. Wildberger, *EvT* 16 (1956): 417–20.

5. In the Hellenistic era the religious aspect of the term *gēr* underwent increased accentuation. *gēr* no longer indicated just the settled foreigner, but the pagan accepted into the Jewish community, the proselyte (in both Judaism and the NT distinguished from the *sebomenos*, the “God-fearer”; cf. Acts 13:50, etc.). Cf. K. G. Kuhn, “προσήλυτος,” *TDNT* 6:727–44; K. L. Schmidt, M. A. Schmidt, and R. Meyer, “πάροικος,” *TDNT* 5:841–853; W. Grundmann, “δῆμος: παρεπίδημος,” *TDNT* 2:64f.

R. Martin-Achard

## לוֹט *gôrāl* lot

S 1486; BDB 174a; HALOT 1:185a; TDOT 2:450–56; TWOT 381a; NIDOTTE 1598

1. *gôrāl* “lot” is attested only in Hebr. and may be said, with a degree of certainty, to be related to Arab. *jarwal* “pebble” (HAL 195a).

2. *gôrāl* occurs 77x in the Hebr. Bible (excl. Prov 19:19 K; read Q *gdI*), mostly in late texts (lacking in Gen, Exod, Deut, Sam, Kgs, Amos, Hos, the authentic passages of Isa, etc.), in accordance with its sacral-legal primary meaning predominantly in priestly contexts (Lev 16:8–10 5x, Num 7x, Josh 14–21 26x, 1 Chron 13x, the remaining books 3x or less).

It remains questionable whether *gôrāl* should be read for *gādôl* and *gilyôn gôrāl* should be translated “common tablet” in Isa 8:1, with K. Galling, ZDPV 56 (1933): 213.

3. (a) In a concrete meaning, *gôrāl* indicates the lot cast in order to make particular decisions (in Lev 16:8–10 for the selection of the rams for Yahweh and Azazel, in Judg 20:9 for the attack on Gibeah, for the distribution of the spoils in Obad 11, of people in Nah 3:10, of the nation in Joel 4:3, of clothing in Psa 22:19 [cf. Mark 15:24 pars.], for the cessation of hostilities in Prov 18:18, etc. [more examples in HAL 178a; J. Lindblom, “Lot-Casting in the OT,” VT 12 [1962]: 164–66).

The hypothesized technique of casting lots (like the precise meaning of Urim and Thummim and the ephod) remains unclear even today (cf. A. Musil, *Arabia Petraea* [1908], 3:293f.; Dalman, *AuS* 2:43f.; StrB 2:596f.; R. Press, *ZAW* 51 [1933]: 227–31; *BHH* 2:1103; Lindblom, op. cit. 164–78). One should possibly assume various techniques for various places, times, and contexts. Particular indicators with reference to *gôrāl* result from Prov 16:33, according to which the lot is shaken in the lap, as well as from the verbs that *gôrāl* can serve as subj. or obj. (*ʿlh* “to come up,” *yšʿ* “to come out,” *hyh le* and *npl ʿlIʿ* “to fall upon,” or *ʿûl* hi., *ydd*, *yrlh*, *npl* hi., *ntn*, *šlk* hi. “to cast”).

*pûr* (only in Esth) and *qsm/qesem* should be mentioned as semantically related.

Esth 3:7 and 9:24 use *gôrāl* as a gloss or translation of *pûr* (used with *npl* hi. “to cast”; Akk. *pûru* “lot”; cf. L. Dürr, *OLZ* 38 [1935]: 297; J. Lewy, *Revue Hittite et Asiatique* 5 [1939]: 117–24), and 9:26 derives the name of the Purim festival (*pûrîm* also in 9:28f., 31f.) from it (cf. e.g., Ringgren, *ATD* 16/2, 115f.; Bardtke, *KAT* 17/5, 243ff. with bibliog.; *BHH* 3:1532).

According to KBL 844f., *qsm* means “to inquire of the lot oracle, practice

divination” (20x); *qesem* “lot oracle” (11x) and *miqsām* “inquiry of the lot oracle” belong to this root. Wildberger (*Isa 1–12*, CC, 99, 105f. on Isa 2:6 txt em) argues for a somewhat broader meaning “to divine.”

(b) According to Num 26:55f.; 33:54; 34:13; 36:2f.; Josh 14:2, etc., territory was to be allotted to the individual Israelite tribes during the conquest by means of the lot. Alt even suggests that every seven years a new lottery took place (*EOTHR* 128n.119; cf. also id., *KS* [1959], 3:373–81 on Mic 2:1–5).

Subsequently, the allotment of a tribe or a family can be metonymically described as *gôrāl* (Josh 15:1; cf. 16:1; 17:1, 14, 17; Judg 1:3, etc.). *gôrāl* thus becomes a par. term for *naḥ<sup>al</sup>lâ* “inheritance” (→ *nḥl*), *ḥēleq* “portion” (→ *ḥlq*), *ḥebel* “allotment,” *y<sup>c</sup>ruššâ* “possession” (→ *yrš*), *ḥuzzâ* “property” (→ *ḥz*), → *segulla*® “possession,” *miqneh* “acquisition” (→ *qnh*), → *ḥeres* “land,” etc.

The absence of the term in Deut may well be due to the fact that Deut is not interested in individual tribal portions but only in the land as a whole (cf. von Rad, *Gottesvolk* 43).

(c) Like *naḥ<sup>al</sup>lâ*, *ḥēleq*, and *ḥebel*, *gôrāl* is also used figuratively and generally means, then, “portion, fate, destiny.”

The transition from the proper to the fig. meaning may be demonstrated more readily for *ḥēleq* and *naḥ<sup>al</sup>lâ* than for *gôrāl*. Num 18:20 may serve as one example among many: “Yahweh said to Aaron: You shall receive no inheritance (*nḥl*) in your land and you shall have no portion (*ḥēleq*) of it; I am your portion (*ḥēleq*) and your inheritance (*naḥ<sup>al</sup>lâ*) among the Israelites.”

The most important passages for the fig. usage are Isa 17:14 (par. *ḥēleq*); 34:17 (par. *ḥlq* pi.); 57:6 (par. *ḥēleq*); Jer 13:25 (par. *m<sup>c</sup>nāt* “portion”; cf. Wagner no. 175); Psa 16:5f. (par. *m<sup>c</sup>nāt*, *ḥēleq*, and *ḥebel*); perhaps Psa 125:3; Dan 12:13, “You will arise to your lot at the end of days.”

On the whole problem, cf. J. T. E. Renner, “A Study of the Word *Gôrāl* in the OT” (diss., Heidelberg, 1958).

4. To the degree that the casting of lots in the understanding of the OT, as for antiquity in general, may be considered a request for divine judgment, all usages of *gôrāl* can be describe as theological. The fig. usage makes this concept clear by the fact that Yahweh expressly determines the lot and fate of people or even is their lot himself. One passage does not assume the otherwise automatic identification of decision

by lot and divine judgment (it may even be called into question): Prov 16:33, “The lot is cast in the lap, but all judgment (*mišpāṭ*) comes from Yahweh.”

5. At Qumran the term underwent a further semantic transformation. It simultaneously indicates: (a) a decision or a conclusion, (b) a rank or office within the community, (c) a party or adherents, (d) the fate coming to pass (as requital), and (e) (in 1QM) even a military formation (cf. F. Nötscher, *Zur theologischen Terminologie der Qumran-Texte* [1956], 169–73).

The NT follows LXX usage, which translates *gōrāl* in the majority of cases (62x) with *klēros*, for which the fig. meaning predominates in the NT. Cf. W. Foerster and J. Herrmann, “κλήρος,” *TDNT* 3:758–85.

H. H. Schmid

## גִּיל *gîl* to rejoice

S 1523; BDB 162a; *HALOT* 1:189b; *TDOT* 2:469–75; *TWOT* 346; *NIDOTTE* 1635

1. *gîl* “to rejoice” also occurs outside Hebr. in Ug., where in *KTU* 1.16.I.15, II.37 the par. *šmh* “to be happy” (Hebr. → *šmh*) seems to assure the meaning.

Regarding the suggested connection with Arab. *jāla* “to revolve, wander about,” cf. P. Humbert, “Laetari et exultare dans le vocabulaire religieux de l’AT,” *RHPR* 22 (1942): 213 = *Opuscules d’un hébraïsant* (1958), 144; contrast L. Kopf, *VT* 9 (1959): 249f. (Arab. *jll*). Each of the Ssem. verbs adduced for the meaning of *gîl* in the OT is unproductive (cf. still *HAL* 182).

Hebr. forms the verbal nouns *gîl* and *gîlâ* in addition to the verb (qal). On the PN <sup>ab</sup>*bîgayil*, cf. J. J. Stamm, *FS Baumgartner* 316.

2. The verb occurs 45x (Psa 19x [2:11 may be disregarded due to emendation], Isa 11x, Min. Pr. 8x, Prov 5x, in addition to Song Sol 1:4 and 1 Chron 16:31 [= Psa 96:11], the subst. *gîl* 8x (Psa 3x, Prophets 4x, Job 3:22 txt?), and *gîlâ* 2x (Isa 35:2; 65:18).

The assignment of Psa 43:4 to *gîl* I “youth(?)” or *gîl* II “joy” is disputed (*HAL* 182a).

3. (a) The word group occurs almost exclusively, then, in the

prophetic books and in the Psa; a great portion of the prophetic texts, however, contain psalm forms. Thus *gîl* belongs in the context of the cult; it has a firm place in the process of the praise of God. It occurs only rarely in profane contexts (Isa 9:2b; 16:10 = Jer 48:33; Hab 1:15; Psa 45:16; Prov 2:14; 23:24f.; 24:17; Song Sol 1:4). Isa 16:10 = Jer 48:33; Hos 9:1; and 10:5 use the word in the context of the prophetic accusation.

*śmh* “to be happy” most often (over 30x) parallels *gîl*; it is followed by *śûś/śîś* “to be happy,” *rnn* “to rejoice,” *rûa<sup>c</sup>* hi. “to cry out,” *ʿlz* “to exult,” etc.; cf. the list in Humbert, op. cit. 206, 137f.

The resultant picture indicates that *gîl* belongs in the semantic field indicated by Eng. “joy.” This semantic field is much more richly developed in Hebr. than in modern languages because in Hebr. joy does not primarily mean a feeling, an emotion, or an attitude, but joy visibly expressed, i.e., a congregational act. Now, because options for the verbal and gestural expression of joy are highly varied, one has difficulty precisely translating many Hebr. terms. The rendering of *gîl* with “to rejoice” or “to jubilate” is only an approximate, rough translation. Because *gîl* parallels *śmh* in more than half its occurrences, the broader sense of the word, even if not the precise nuance, is firmly established.

Like *śmh*, *gîl* can express joy in the profane realm: at a wedding (Psa 45:16 subst.; cf. Song Sol 1:4), the joy of parents in their children (Prov 23:24f.), joy at the division of plunder, joy at harvest, joy at gloating, etc. (Isa 9:2b; 16:10 = Jer 48:33; Hab 1:15; Prov 2:14; 24:17). One cannot, however, distinguish sharply between the profane and the cultic usage; in Joel 2:23 joy for the rain is simultaneously “joy for Yahweh.” The usage of the word still gives clear evidence of a phase in which profane event and holy event were not differentiated.

(b) Subjects of *gîl* are (1) people: an individual (Isa 61:10; Hab 3:18; Psa 9:15; 13:6; 16:9; 31:8; 35:9; 43:4 txt?; 51:10; Prov 23:24f.; 24:17), the nation (Psa 14:7 = 53:7; 48:12, etc.), the nations (Isa 25:9; cf. 66:10), the poor and the righteous (Isa 29:19; Psa 32:11), enemies (Psa 13:5; cf. Hab 1:15), evil (Prov 2:14), idol priests (Hos 10:5), and the king (Psa 21:2); (2) nature: the earth (Isa 49:13; Psa 96:11 = 1 Chron 16:31; Psa 97:1), steppe and desert (Isa 35:1f.), and hill (Psa 65:13 with *gîlâ*); (3) God (Isa 65:19; Zeph 3:17).

People are thus predominantly the subject of the verb. In this respect the people or the individual are usually intended in contrast to God. Because God’s praise always has the tendency to broaden itself, the circle of the joyous is also broadened to include creation. God “rejoices” in two late texts.

The (intrans.) verb is generally used absolutely. Otherwise it is often constructed with *be* (usually in reference to God, e.g., Psa 118:24, or his deed, e.g., Psa 9:15), also twice with *ʿal* (Hos 10:5; Zeph 3:7); cf. Humbert, op. cit. 205, 137.

4. (a) The vast majority of passages refer to praising God. The impv. cry of praise is issued in the context of the call to praise: Psa 32:11, “Be happy over Yahweh, and rejoice, O righteous”; similarly Isa 65:18; 66:10; Joel 2:21, 23; Zech 9:9. Psa 149:1f. extends the impv. cry of praise in a juss.: “Sing to Yahweh a new song . . . , may Israel rejoice in its creator, may the sons of Zion rejoice over their king”; juss. also occur in Isa 35:1f.; Psa 96:11 = 1 Chron 16:31; Psa 97:1. A call to praise in the 1st per. (voluntative or cohortative) occurs in Psa 118:24, “This is the day which Yahweh has made, let us rejoice and be happy over it”; similarly in Isa 25:9; Psa 31:8. The call to praise in the “eschatological song of praise” is a prophetic variation (Isa 49:13; 61:10; 66:11; Zech 9:9). Praise or joy is a consequence of God’s action: Psa 9:15, “That I may tell . . . , (that) I may rejoice over your aid”; cf. Isa 29:19; 41:16; Zech 10:7; Psa 14:7 = 53:7; 16:9; 21:2; 48:12; 51:10; 65:13; 89:17; 97:8; with the subst. Isa 9:2a txt em; Psa 43:4 txt?; the joy of Yahweh corresponds to this praise in Isa 65:19; Zeph 3:17. *gîl* occurs in the vow to praise in Psa 35:9, “But I will rejoice over Yahweh and be happy over his aid,” in addition to Hab 3:18; Psa 13:6.

The motif “so that my enemies may not rejoice” occurs in prayer in Psa 13:5. The disappearance of happiness and joy (from the house of Yahweh) is mourned in the lament (Joel 1:16) and announced in the judgment oracle (Isa 16:10 = Jer 48:33).

In all these groups the basic procedure is the same: the happy, joyous reaction to an event, in most passages to a saving or liberating act of God (Psa 9:15; 35:9). An act of God in the history of the people or of an individual is usually intended, but history includes God’s creative activity (Joel 2:21, 23). The fact that passages termed “profane” also have essentially the same intention should be understood on this basis; even parents’ happiness in their children (Prov 23:24f.) presupposes an act of God and is, so seen, joy over an act of God.

(b) The contrast to the two Hos passages in which *gîl* is modified negatively, is, then, all the more pronounced: 9:1, “Do not rejoice, Israel! Do not exult (read *ʿal-tāgēl* for *ʿel-gîl* ) like the nations! For you are unfaithful to your God” (cf. the translation of Wolff, *Hos*, Herm, 149), and 10:5, “They rejoice over it because of its glory” (txt?). Wolff (op. cit. 153) says of 9:1: “In the Old Testament the word-pair גִּיל-שָׂמַח (“rejoice-exult”) occurs for the first time in Hosea. The expression is at the same time evidence for the originally Dionysian character of the Canaanite fertility

cult.” It may be assumed with certainty that *gîl* also occurred in the Canaanite fertility cults, and it is directly attested by 10:5, if the text is in order. One may not conclude from this, however, that the procedure intended by *gîl* or the term *gîl* itself belonged originally to “the Dionysian character of the Canaanite fertility cult” (cf. Wolff, *ibid.*). Jubilation as an expression of joy, esp. in the cult, is one of the most widely known phenomenon common to religions. In Hos 9:1 (just as in Amos 5:23), however, *Israel’s* joy and exultation in *its* worship is rejected; not because it had its origins in the Canaanite fertility cult, but because it is not in response to the activity of Israel’s God: “for you are unfaithful to your God.”

5. The LXX usually renders *gîl* by *agalliaomai*, less often by *chairō*. Qumran (cf. Kuhn, *Konk.* 44c) and the NT continue the OT usage. Cf. R. Bultmann, “ἀγαλλιάομαι,” *TDNT* 1:19–21.

C. Westermann

## גלה *glh* to uncover

S 1540; BDB 162b; *HALOT* 1:191b; *TDOT* 2:476–88; *TWOT* 350; *NIDOTTE* 1655

\*1. Hebr. *glh* (trans.) meaning “to uncover” has primarily NWSem. counterparts (*DISO* 50; *HAL* 183b; also Arab. *jalā* “to make/become clear”): Phoen. in the Ahiram inscription (*KAI* no. 1.2), *wygl ʾrn zn* “. . . shall uncover this sarcophagus” (*ANET* 661b); Imp. Aram. in *Ah.* 141, “Reveal not (*ʾltgly*) thy [*secrets*] before thy [*fri*]ends” (*ANET* 429b); and in Cowley no. 37.8, “if we were to appear [*glyn ʾnpyn*] before . . . ,” as well as in later Aram. (cf. e.g., *LS* 115f.).

A second (intrans.) meaning occurs in Ug., which offers a verb of motion (M. H. Pope, *El in the Ugaritic Texts* [1955], 64; *WUS* no. 652, *gly* “to proceed toward”; *UT* no. 579, “to leave”), also in Hebr. and in later Aram. “to go forth, to go into exile” (as an Aram. loanword also in Akk. *galû*, cf. *AHw* 275b), as well as in Arab. (*jalā* “to emigrate”).

The relationship of the two meanings, as usually understood (*GB* 139f.; *HAL* 183f.; Pope, *op. cit.*), can be pictured in terms of a regular elliptical omission of the obj. “land” resulting in the meaning “to go forth, to emigrate = to lay (the land) bare.” In view of the questionable nature of this derivation, it is probably preferable to leave the etymology issue open and to assume two different verbs for semasiological purposes (cf. Mandl.

262f.; Zorell 151f.): a trans. *glh* I “to uncover” (see 4) and an intrans. *glh* II “to go forth, to be led into exile” (see 3).

*glh* occurs in the OT in all seven stems (as do only *bq<sup>c</sup>* “to divide,” → *hlh* “to be weak, sick,” → *yd<sup>c</sup>* “to know,” → *yld* “to bear,” and → *pqd* “to visit”); with the division into two verbs, the qal, ni., pi., pu., and hitp. remain for *glh* I “to uncover,” and qal, hi., and ho. (Isa 38:12 ni. is textually uncertain) remain for *glh* II “to go forth.” Of the noms., *gillāyôn* “tablet” (Isa 8:1; on Isa 3:23 see HAL 185b) may be assigned to *glh* I; *gôlâ* “exiles; exile” and *gālût* “deportation; deportees” (each with a secondary abstract or concrete meaning, resp.) belong to *glh* II.

*glh* I pe. “to reveal” and *glh* II ha. “to take into exile,” as well as the subst. *gālû* “deportation,” occur in Bibl. Aram.

Whether the PN *yogli* (Num 34:22) should be derived from *glh* I remains uncertain (cf. *IP* 244).

2. The verb occurs in Hebr. 187x (Mandl. mentions Jer 52:29 in some MSS and editions, as well), in Aram. 9x. The distribution of the verb stems is as follows: qal 50x (“to uncover” 21x, “to go forth” 29x, if, contrary to Mandl., Prov 27:25 should be assigned to *glh* II), ni. 32x (Isa 8x, 1 Sam 6x, Ezek 5x, 2 Sam 4x), pi. 56x (excl. Psa 119:22, which, contrary to Lis., belongs to *gll* pi.; Lev 24x, Isa 6x), pu. 2x, hitp. 2x, hi. 38x (Jer 13x, 2 Kgs 12x), ho. 7x; Aram. pe. 7x (Dan), ha. 2x (Ezra). As for the two verbal roots, *glh* I occurs 112x (in addition to 7x Aram.) and *glh* II 75x (incl. Isa 38:12 ni.; as well as 2x Aram.).

*gôlâ* occurs 42x (Ezra 12x, Ezek 11x, Jer 10x), *gālût* 15x (Jer 5x, Ezek 3x), Aram. *gālû* 4x.

3. Ezek 12:3(bis), where the prophet receives the commission “go forth,” and the lament in 1 Sam 4:21f. “the glory has departed from Israel” demonstrate the basic meaning of *glh* II. The same or a similar meaning occurs in Isa 24:11; 38:12 txt? (ni.); Hos 10:5; Job 20:28 (par. *ngr* ni. “to flow, to pour out”); Prov 27:25 (par. *ʔsp* ni. “to be assembled”); Lam 1:3. In the remaining passages, the qal means “to be led into exile” (20x): Judg 18:30(?); 2 Sam 15:19; 2 Kgs 17:23 (par. *sûr* hi. “to remove”); 24:14; 25:21; Isa 5:13; 49:21 (par. *sûr* “to turn aside”); Jer 1:3; 52:27; Ezek 39:23; Amos 1:5; 5:5(bis); 6:7(bis); 7:11(bis), 17(bis); Mic 1:16. There are also 39 hi. passages with the meaning “to lead away (into exile)” and 7 ho. passages (pass., in meaning similar to the qal). The verb has acquired a special place in the prophetic announcement of judgment in Amos (Amos 1:5; 5:5, 27; 6:7; 7:11, 17) and Jer (Jer 13:19; 20:4; 22:12; 27:20); this announcement of judgment occurs only once in the early period of Isaiah’s preaching (5:13). Most passages occur—in a variety of contexts—in

narratives, once even in the sufferer's lament (Lam 1:3).

Notably, only a few, mostly prophetic texts describe Yahweh as the one who takes Israel (Judah) into exile: Jer 29:4, 7, 14; Ezek 39:28; Amos 5:27; Lam 4:22; 1 Chron 5:41 (other nations: 2 Kgs 17:11); the subj. of the verb is usually the nation that takes Israel into exile or its ruler. The notion is certainly firmly established in the prophetic announcement of judgment that the exile is Yahweh's judgment; still, the whole weight of a concrete political event, which resists thorough theologization, characterizes the process described by *glh*. Only once and relatively late is Yahweh's activity identified with a political event in an explicitly conceptual manner: "Yahweh by the hand of Nebuchadnezzar" (1 Chron 5:41). In contrast, cf. e.g., Ezekiel's discussion of the exile; he primarily employs the thoroughly unpolitical verbs *pûš* hi. and *zrh* "to disperse" (*glh* qal/hi. only in Ezek 39:23, 28; cf. 12:3), and here Yahweh is regularly the subj. (5:10, 12; 11:16; 12:14f.; 20:23; 22:15; 36:19).

The fact that Yahweh, the God of Israel, took his own people into exile makes sense in the context of history, at the beginning of which stood the promise of and guidance into the land; Yahweh's judgment consists of his removal of the gift of the land from the people who turned away from him despite every warning (cf. the parallelism of the expulsion of the nations in the conquest and the expulsion of Israel in 2 Kgs 17:11 [Dtr], similarly Deut 7:22; 8:19f.).

Remarkably, *glh* does not occur in this usage in the Pentateuch, nor in Deut, where expulsion from the land is an important and emphasized threat in the event of disobedience (instead, *ʔbd mēʿal hāʔāreš*, "to disappear from the land," Deut 4:26; 11:17; cf. 8:19f.; *pûš* hi. "to scatter," 4:27; 28:64). The fact that *glh* "to go forth," which could also refer to the old and widespread practice of the deportation of an individual (2 Sam 15:19), became specialized to mean "to be taken into exile" only when deportations of whole population groups as a means of conquest entered Israelite history, contributed to this usage; in this regard, one should remember the mass deportations and resettlement of the Neo-Assyr. Empire, and of the Urartians (Wolff, *Amos*, Herm, 149–52). 8th-cent. prophecy (esp. Amos) adopted the verb only in this specialized meaning, although it did not gain universal popularity, as Deut demonstrates; only in Dtr diction does it become the dominant term for exile. This assumption is supported by the fact that the noms. *gôlâ* and *gālût* "exile, exiles" occur only in the prophets of judgment and in later historical books.

One can detect another process with respect to *šbh* "to lead out as captives": *šbh* originally indicated the plundering of captives (esp. of women and children) on military campaigns (Gen 34:29; 1 Sam 30:2ff., etc.); after the deportation of Samaria an expansion of the basic meaning appears (Obad 11), so that exile can also be indicated

by *šbh* (1 Kgs 8:46ff.; Jer 13:17; Ezek 6:9).

4. (a) *glh* I qal “to uncover” refers primarily to the organs of perception: “to uncover = open” the ear (a human subj.: 1 Sam 20:2, 12f.; 22:8[bis], 17; Ruth 4:4; divine subj.: 1 Sam 9:15; 2 Sam 7:27 = 1 Chron 17:25; Job 33:16; 36:10, 15); “to expose = open” the eye (Num 24:4, 16; cf. pi. Num 22:31 and Psa 119:18). *glh* is also used for the publication of a document (Esth 3:14; 8:13), the pass. ptcp. *gālûy* for the open (as opposed to the sealed) bill of sale (Jer 32:11, 14). Otherwise, *sôd* “secret” is the only obj. of *glh* qal (Amos 3:7; Prov 20:19; see also Prov 11:13 and 25:9 with *glh* pi.; cf. *HP* 202f.).

(b) The ni. envisions action with respect to the subj. itself; the translation can be either pass., “to be uncovered” (nakedness: Exod 20:26; Isa 47:3; Ezek 16:36, 57 txt em; 23:29; skirt: Jer 13:22; foundations: 2 Sam 22:16 = Psa 18:16 par. *rʕh* ni. “to become visible”; Ezek 13:14; cf. Mic 1:6 pi.; guilt, evil: Ezek 21:29; Hos 7:1; Prov 26:26; “to become known” Isa 23:1; “to be revealed” Dan 10:1 [a word]) or reflexive, “to expose oneself” (3x in 2 Sam 6:20), “to show oneself, reveal” (people: 1 Sam 14:8, 11; gates of death: Job 38:17 par. *rʕh* ni.; God: Gen 35:6; 1 Sam 2:27[bis]; 3:21; Isa 22:14; his arm: Isa 53:1; his majesty: Isa 40:5; his righteousness: Isa 56:1; his word: 1 Sam 3:7). The impv. in Isa 49:9 can be understood as a tolerative, “let yourself be revealed = come into the light.” The plur. ptcp. *hanniglôt* refers to the Sinai revelation and should not be translated “what is revealed,” but (nonresultantly) “what has been revealed (is valid for us and our children forever).”

(c) The pi. always indicates the disclosure of something normally hidden (“to disclose”; cf. *HP* 202f.). It parallels the qal to a degree: to “open” eyes (Num 22:31; Psa 119:18 alongside *nbʔ* hi. “to view”), “to make known, publish, reveal” (Jer 11:20; 20:12; 33:6; Psa 98:2), “to divulge” (Isa 16:3; Prov 11:13; 25:9). Other meanings are: “to discover, find” something hidden (Jer 49:10; Job 12:22 par. *yšʕ* hi. *lāʔôr* “to bring to light”; Mic 1:6 foundations), “to uncover, accuse, punish” guilt (Job 20:27; Lam 2:14; 4:22 par. *pqd* “to visit”; Isa 26:21 bloodguilt). The chief use of the pi. refers, however, to the forbidden sexual realm (40x of the uncovering of private parts or of that which covers them: skirt, veil, cover in Deut 23:1; 27:20; Isa 22:8; 47:2[bis]; 57:8 txt em; Nah 3:5; Job 41:5; Ruth 3:4, 7). 24 passages in this group occur in Lev 18 and 20. They are legal prescriptions treating forbidden sexual relations; “to uncover the shame” here is primarily an expression for engagement in sexual intercourse. In many passages it has the meaning “to rape.”

These passages are significant for the meaning of the verb *glh* as a whole in that

the verb in them has a negative tone in the ear of the Israelite: with the obj. *ʿerwā* “shame, nakedness,” *glh* was something forbidden, something that one must avoid. This connotation is associated with the Israelite concept that clothing is essential to being human; it is a gift of the creator (Gen 3:21), and disrobing harms human worth.

Besides Lev 18 and 20, prophetic accusations charging Israel with faithlessness toward Yahweh (Isa 57:8; Ezek 23:18[bis]; cf. Ezek 16:36, 57 ni.) and related announcements of judgment use *glh* pi. in the manner under discussion: Israel will be violated by its lovers (Hos 2:12; Nah 3:5; Ezek 16:37; 22:10; 23:10; cf. Jer 13:22 ni.; against Babel Isa 47:2[bis]).

The pu. ptcp. means “open, uncovered” (Prov 27:5, a reprimand; Nah 2:8 txt?), the hitp. means “to uncover oneself” (Gen 9:21, Noah; Prov 18:2, “heart”).

(d) Relatively few passages have God as the subj. of *glh* I; thus its proper usage is in the realm of profane events. At any rate, one cannot see this verb as a theological term; rather, the Hebrews heard in it a thoroughly this-worldly process that could occasionally—but only rarely—be used to describe an act of God, primarily in two groups of texts: (1) just as a human being can be said to expose (open) someone’s ear, so can God; and (2) just as a person can appear to someone else, so God can appear (reveal himself) to someone.

(1) The revelation in 1 Sam 9:15, “But Yahweh had . . . exposed the ear of Samuel,” is a divine instruction to the mediator concerning the anointing of the king. The expression “to open the ear” occurs in the same context in Isa 22:14, “But Yahweh of hosts has revealed himself to my ear”; the clause replaces the messenger formula and is the only passage of this nature in the pre-exilic writing prophets. In 2 Sam 7:27 = 1 Chron 17:25 David prays: “You have uncovered the ear of your servant.” Here, however, it is not a direct revelation but one mediated by the prophet. Three passages in Job (Job 33:16; 36:10, 15; all in the discourses of Elihu) refer to God’s revelation to a normal person; in 33:16 it takes place by means of a dream or a night vision, in 36:10, 15 it is God’s warning or reprimand that no longer comes as a direct revelation but through difficulties. Here, then—already in the OT!—the word “to reveal” no longer has transcendental character; it means something that anyone can experience, even in the normal events of life.

(2) In Gen 35:7 the phrase “for there God revealed himself to him” refers back to the theophany in Gen 28. The passage shows that the verb can describe a theophany; it does so, however, only in this passage, never in the narrative of a theophany. The word occurs 3x in the narrative of Samuel’s childhood. A man of God reminds Eli: “Thus says Yahweh: I did indeed reveal myself to the house of your father when they were still in Egypt” (1 Sam 2:27); and then 1 Sam 3:21 says: “Yahweh revealed himself

to Samuel” (cf. also 1 Sam 3:7 “the word of Yahweh had not yet been revealed to him”). Here then *glh* indicates explicitly a verbal revelation in prophetic fashion. This reference also appears in Amos 3:7 in the programmatic phrase: “Yahweh does nothing . . . without disclosing (revealing) his decision to his servants, the prophets.” The phrase is not spoken by Amos; rather, it is a later reflection concerning the activity of the prophets. The passages in 1 Sam 2 and 3 (as well as 9:15), together with Amos 3:7, demonstrate that the verb *glh* can serve, *subsequently*, in reflection from a distance, to describe the prophetic reception of the word. But even this sense appears only in a very small group of texts (incl. also the late passage Dan 10:1). It thus becomes even more obvious that, like the theophanies, the prophetic reception of the word per se is *not* indicated in the OT by *glh*.

Passages from the Balaam pericope describe the seer as “with downcast and uncovered eyes” (Num 24:4, 16; cf. 22:31). Here the verb *glh* describes a specific process of revelation: the eyes of the seer are opened so that he sees something that he otherwise could not see and that only he sees. Only here does the verb *glh* belong integrally to the process of the seer’s vision; here an original locus for the verb *glh* in a “revelation” process can be unmistakably recognized in the description of the vision of the seer (cf. H. Haag, “‘Offenbaren’ in die hebräischen Bibel,” *TZ* 16 [1960]: 251–58; further W. Zimmerli, “‘Offenbarung’ im AT,” *EvT* 22 [1962]: 15–31 with bibliog.; R. Schnackenburg, “Zum Offenbarungsgedanken in der Bibel,” *BZ* 7 [1963]: 2–22).

The concluding phrase of Deut 29:28, “The hidden remains with Yahweh, our God, but what is revealed (apparent) is valid for us and our children for ever,” implies that the word of God, God’s commandments and promises, are openly accessible. The verb *glh*, with God as subj., points to this free accessibility of God’s word for the Israelites.

In Isa 40:5 “. . . and the glory of God will be revealed,” the word has the sense “will be recognizable, perceptible,” as the continuation demonstrates: “. . . and all flesh will see.” This text indicates not a specific process of revelation but God’s activity in history: the glory of Yahweh will be recognizable in his act of deliverance for Israel. The verb functions similarly in Isa 56:1. The question in Isa 53:1: “And to whom will the arm of Yahweh be revealed?” means: To whom has the activity of Yahweh become clear? In all three passages, therefore, *glh* refers to God’s activity in history.

(e) If one surveys passages with God as the subj. of *glh*, one discovers that *glh* in the OT has not become a term for revelation. No fixed, frequent, and clearly defined usage can be demonstrated. *glh* can indicate God’s appearance or self-revelation in discourse or in action, but this meaning only rarely occurs and overwhelmingly in retrospect. The verb

is so minimally tied to specific revelation processes that it can also indicate, in addition to verbal revelation to the prophets (only rarely) or an appearance of the divine (only Gen 35:7), God's activity in history and in an individual's destiny. The expression of these extremely varied types of God's self-revelation with one verb—still rarely used for these purposes—also indirectly demonstrates that Israel saw these various possibilities for revelation as relatively close together, and one could not play the one against the other. It ought also to be observed that the verb *glh* in this meaning did not produce a nom. formation.

5. The two distinct groups of meaning are also mirrored in the LXX renderings: *glh* II is predominantly translated by *apoikizein*, followed by *metoikizein* and the corresponding derivatives. *aichmalōteuein*, etc., also occur, corresponding more to the Hebr. *šbh*, although even in Hebr. some overlappings are already apparent. The basic meaning still stands behind the translation *aperchesthai*.

The overwhelmingly predominant rendering of *glh* I is *apokalyptein*; it corresponds precisely to the Hebr. verb in the sexual realm as well as in reference to the sense organs. Occasionally, however, other verbs of removal (i.e., *ektithēmi*) or of perception (*epiphainein*, *phaneroun*) could also be used. The LXX too, then, did not yet understand *glh* as a special term for “to reveal.”

The situation has already changed at Qumran. The traditional usages of *glh* I also occur here (*glh* II occurs only as a citation of Amos 5:27 in CD 7:14f.): “to open” the ear (1QH 1:21; 6:4; 18:4f.; CD 2:2; etc.), the heart (1QH 12:34; 18:24), the eyes (1QH 18:19; CD 2:14). Yet a specific technical usage also appears: the revelation of the eschaton contained in the Torah and the Prophets that must be made known through study of the Scriptures (*drš*) and exegesis (*pešer*; 1QS 1:9; 5:9, 12; 8:1, 15f.; 9:13, 19; cf. 1QpHab 11:1; 1QH 5:12; CD 3:13; 15:13; cf. D. Lührmann, *Das Offenbarungsverständnis bei Paulus und in paulinischen Gemeinden* [1965], 84–87, with bibliog.).

On the NT see, in addition to Lührmann, A. Oepke, “καλύπτω,” *TDNT* 3:556–92. No relationship between the OT usage of *glh* and the NT concept of revelation, which shifts the focus from the process of revelation to that which has been revealed (the content of revelation), can be identified, but the parallelism continues on into the NT as an indication of the saving activity of God and of the apocalyptic vision of a particular individual (Rom 3:21; 1 Cor 14:6); cf. Lührmann, op. cit. An essential distinction between the usage of *glh* in the OT and the NT concept of revelation lies in the fact that the strict association of revelation and faith is entirely absent here; in the OT *glh* indicates a self-disclosure of God that can be experienced.

גמל *gml* to do, show

S 1580; BDB 168a; HALOT 1:197a; TDOT 3:23–33; TWOT 360; NIDOTTE 1694

1. The root *gml* may only be certainly and originally identified in Akk., Hebr., and Arab.; but the meanings diverge sharply.

Akk. has *gamālu* “to treat cordially, to spare, to save” (AHw 275f.; CAD G:21–23) and numerous derivatives, particularly *gimillu* “cordial (less often, negative) requital” (AHw 288f.) and *gītmālu* “to complete” (AHw 294; although CAD G:110f. separates it from *gamālu* on account of the divergent meaning).

Jew. Aram., Sam., and Mid. Hebr. occurrences (HAL 189a) are purely bibl. usages and consequently offer no independent information.

In Arab. two different terms appear: *jamala* “to gather” and *jamula* “to be pretty” (with derivatives, e.g., *jumlat* “totality, sum”). On the problem of etymology, cf. L. Kopf, VT 8 (1958): 168f.

One should probably posit some connection to the root *gmr* (attested in Akk., Ug., Hebr., Aram., etc.).

Hebr. has only the qal in the meaning “to be at an end, bring to an end” (Psa 7:10; 12:2; 57:3; 77:9; 138:8; cf. Bibl. Aram. *g<sup>c</sup>mîr* “filled out” in Ezra 7:12). M. Dahood (“The Root GMR in the Psalms,” TS 14 [1953]: 595–97; Bib 45 [1964]: 400) suggests the meaning “to avenge” for Psa 7:10; 57:3; 138:8 (followed by HAL 190a “to retaliate, avenge”) corresponding to Ug. *gmr* (WUS no. 664; UT no. 592) and combines *gmr/gml*; cf. O. Loretz, “Das hebr. Verbum GMR,” BZ 5 (1961): 261–63. The LXX translation of Psa 57:3, where *euergetēsas* renders *gōmēr*, demonstrates that the root *gmr* could be understood in the sense of the meaning of *gml*.

The OT uses only the ni. (“to be weaned”) in addition to the qal; nom. derivatives are: *g<sup>c</sup>mûl* and *g<sup>c</sup>mûlâ* “deed, requital,” and *tagmûl* “good deed”; the PNs *gāmûl*, *g<sup>c</sup>mallî*, and *gamlî<sup>c</sup>ēl* should also be included (IP 182).

2. The verb *gml* qal occurs 34x (23x in the meaning “to do, show,” 11x “to wean, mature”), *gml* ni. “to be weaned,” 3x (Gen 21:8[bis]; 1 Sam 1:22). *g<sup>c</sup>mûl* occurs 19x (pl. only Psa 103:2), *g<sup>c</sup>mûlâ* 3x (sg. 2 Sam 19:37, pl. Isa 59:18 and Jer 51:56), *tagmûl* 1x (Psa 116:12, pl., with an Aram.

suf.). Of the total of 60 occurrences of the word group, 15 are in Psa, 12 in Isa, 6 in 1 Sam, and 5 in Prov.

3. It is difficult to accept a basic meaning valid for all derivatives. The meaning “to execute, do (to the end, to completion), complete” most probably underlies the subsequent development (cf. GB 144a “to complete” with reference to the Arab. *kml* “to be complete,” etc.). From here it can evolve, on the one hand, into the meaning “to do,” either good (1 Sam 24:18a; Prov 11:17; 31:12) or evil (Gen 50:15, 17; Deut 32:6; 1 Sam 24:18b; Isa 3:9; Psa 7:5; 137:8; Prov 3:30; 2 Chron 20:11), which occasionally assumes the nuance of “requital, repayment” (2 Sam 19:37). Cf. also the double meaning in Akk. *turru gimilla* (AHw 289a; see 1). Only through it can a relationship that has become uneven be rebalanced and brought to perfection (cf. e.g., Psa 7:5). Thus *gml* can be used in conjunction with *šlm* pi. “to requite” (Joel 4:4; Psa 137:8). On the other hand, the meanings “to perfect (a child) = wean” (1 Sam 1:23f.; 1 Kgs 11:20; Isa 11:8; 28:9; Hos 1:8; Psa 131:2) and “to ripen” (Num 17:23, almonds on Aaron’s staff; Isa 18:5, grapes) can develop from the starting point assumed above.

The subst. *g<sup>e</sup>mûl* occurs only in the sense of repayment and requital (Isa 3:11; Prov 12:14; 2 Chron 32:25) or of the doing of good or evil (Joel 4:4, 7; similarly *g<sup>e</sup>mûlâ* 2 Sam 19:37), which can revisit the agent (Judg 9:16; Obad 15; Psa 28:4; 94:2; Lam 3:64). Like the verb, *g<sup>e</sup>mûl* can be used in conjunction with the root *šlm* (Isa 59:18; 66:6; Jer 51:6; Joel 4:4; Psa 137:8; Prov 19:17; with *šûb* hi. “to requite” Joel 4:4, 7; Psa 28:4; 94:2; Prov 12:14; Lam 3:64).

4. Derivatives of the root *gml* also describe God’s relationship to people (2 Sam 22:21 = Psa 18:21) and vice versa (Joel 4:4). The examples particularly emphasize God’s action for good (Isa 63:7; Psa 13:6; 103:10; 116:7; 119:17; 142:8), although they do not suggest a specific connotation. The subst. indicates divine deeds (Psa 103:2) requiring corresponding human behavior (Isa 35:4). It is often associated with *šlm* pi. (see 3; Isa 59:18 has *g<sup>e</sup>mûlâ* too; 66:6), indicating the original meaning “to complete, repay (in order to bring to a conclusion)” (esp. in Prov 19:17). Thus God can even be called *ʔēl g<sup>e</sup>mûlôt* “God of requital” (Jer 51:56, against Babel, par. “he will repay them” with → *šlm* pi.).

5. *gml* occurs in the documents from Qumran in the meaning “to do”; *g<sup>e</sup>mûl* also occurs (Kuhn, *Konk.* 45f.; also GCDS 104). The LXX uses *antapodidōmi*, etc., most frequently, among numerous other translations, thereby taking into account, however, only the meaning “to do, requite”; cf. F. Büchsel, *TDNT* 2:169, on this term in the NT.

## גָּרַע *g<sup>ʿ</sup>r* to scold

S 1605; BDB 172a; HALOT 1:199b; TDOT 3:49–53; TWOT 370; NIDOTTE 1721

1. The verb *g<sup>ʿ</sup>r* “to scold” occurs in the OT only in the qal; two fem. substs. derive from it: *g<sup>e</sup>ʿārâ* and *mig<sup>ʿ</sup>eret* (HAL 192a, KBL 494a with suppl. 164). The root also occurs in Ug. (*UT* no. 606; *WUS* no. 681; Gröndahl 125) and in other related languages (Aram., Arab., Eth., sometimes for the sounds made by cattle and horses; cf. Ug. *KTU* 1.72.27), but is lacking in Akk. (cf. HAL 192a).

2. The verb is attested in the OT 14x, the subst. *g<sup>e</sup>ʿārâ* 15x, the subst. *mig<sup>ʿ</sup>eret* 1x (Deut 28:20).

Mal 2:3 should surely be emended with Horst (HAT 14, 266), HAL, and others to *gōdēa<sup>ʿ</sup>*, the emendation of *g<sup>ʿ</sup>r* for *rg<sup>ʿ</sup>* in Isa 51:15; Jer 31:35, suggested by H. Gunkel, *Schöpfung und Chaos* (1896), 94n.8, has not gained acceptance.

Prov 13:8 should be emended with Gemser, HAT 16, 48 (contra F. M. Seely, “Note on *g<sup>ʿ</sup>rh* with Especial Reference to Proverbs 13:8,” *Bible Translator* 19 [1959]: 20f.); the second *g<sup>e</sup>ʿārâ* in Isa 30:17 is stricken by many exegetes (e.g., O. Procksch, *Jesaja*, KAT, 1:394).

3. According to P. Joüon (“*gā<sup>ʿ</sup>ar* et *g<sup>e</sup>ʿārāh*,” *Bib* 6 [1925]: 318ff.; and Seely, op. cit. 20f.), the basic meaning of *g<sup>ʿ</sup>r* is “to cry aloud, scream at” (cf. also A. A. Macintosh, “A Consideration of Hebrew *g<sup>ʿ</sup>r*,” *VT* 19 [1969]: 471–79). Of the many verbs with the meaning “to cry” (see KBL suppl. 73; → *š<sup>ʿ</sup>q*), it is distinguished by its limitation to “to cry out scoldingly, scold.” The concept of scolding has the basic meaning in German, too, of “to raise commotion about something” (Kluge 643). Scolding or reviling is “a sterilized and domesticated form of cursing or exorcising” (*BFPS* 68; van der Leeuw 2:408f.); it seeks “to tear someone down.” The stem *g<sup>ʿ</sup>r* occurs in Psa 119:21 and Deut 28:20 alongside forms of → *ʾr*. Many passages attest to the destructive effect of *g<sup>ʿ</sup>r* (J. Pedersen, *Der Eid bei den Semiten* [1914], 82; Seely, op. cit. 20f.); for this reason the rendering “to threaten” (so HAL and others) is not recommended (*BFPS* 65f.: “threatening” primarily means a gesture, leaves open the question of the realization of that which is threatened, and usually has a qualified or conditional character—all of this does not apply to *g<sup>ʿ</sup>r*; cf. Joüon, op. cit. 320). Gen

37:10 demonstrates the “destructive” character of the  $g^{\zeta r}$  through the report of the words of the reprimand. The wisdom examples in Prov 13:1; 17:10; Eccl 7:5 should be understood in the same sense. The subj. of  $g^{\zeta r}$  in these cases is the father or the wisdom teacher. When in Ugaritic Baal scolds the gods on account of their cowardice (KTU 1.2.I.24), or Anat scolds Baal on account of his overzealousness in the battle with Yamm (1.2.IV.28), when the captain of the temple guard does not scold Jeremiah in Jer 29:27, and when the servants of Boaz do not scold Ruth in Ruth 2:16, in each case the scolding was meant to hinder something (Gunkel, op. cit. 59n.2). In Isa 30:17,  $g^{\zeta r}$  describes a military action; it cannot, however, easily concern the “battle cry of the Assyrians” (B. Duhm, *Jesaja*, HKAT [19685], 221; J. Jeremias, *Theophanie* [1965], 33n.2, considers this the basic meaning); rather, it concerns the reprimand at the beginning of the battle (cf. Gunkel, op. cit. 113), as we know it from Homer’s *Iliad* (e.g., 17.11f.; cf. 1 Sam 17:41ff.; Enuma Elish IV:76ff.). In Hebrew the battle cry is called  $t^{\epsilon}rû^{\zeta}â$  or *šerah*. The point in Isa 30:17 would then be: the Israelites already flee at the reprimand.

The use of  $g^{\zeta r}$  (almost always) with *be* (= an inimical “against”; BrSynt §106h) and of  $g^{\epsilon\zeta}ârâ$  with *min* in conjunction with verbs with a pass. meaning (e.g., Psa 18:16; 76:7; 80:17) or with “to flee” (Isa 30:17; Psa 104:7) corresponds to the characteristic just mentioned.

4. The specifically theological usage connects primarily with the reprimand in battle. The  $g^{\zeta r}$  often occurs in connection with Yahweh’s struggle with chaos (Psa 104:7; Job 26:11; Nah 1:4; Psa 68:31; 106:9; 18:16 [= 2 Sam 22:16]; Isa 50:2; cf. Gunkel, op. cit. 68, 106, 111; Jeremias, op. cit. 20, 31ff., 67f., 90ff., 146; it must be maintained against Ph. Reymond, “L’Eau, sa vie, et sa signification dans l’AT,” SVT 6 [1958]: 188f., that the chaos struggle and thus the  $g^{\zeta r}$  do not originally belong to the creation concept; cf. Westermann, *Gen*, CC, 1:31). The effects of the  $g^{\zeta r}$  are: the sea, the water, the  $t^{\epsilon}hôm$ , the Reed Sea flee, recede, or dry up, the pillars of heaven sway.  $g^{\zeta r}$  stands parallel to God’s “wrath” ( $za^{\zeta}am$ , →  $\lambda ap$ , →  $h\bar{e}mâ$ , Nah 1:4ff.) or to  $rg^{\zeta}$  “to agitate,”  $m\dot{h}s$  “to strike down,”  $hll$  po. “to bore through” (Job 26:11).  $g^{\zeta r}$  occurs together with the chaos struggle motif in epiphanies (Westermann, *PLP* 93ff.).  $g^{\zeta r}$  in Yahweh’s struggle with the nations (Isa 17:13; Psa 9:6; Isa 66:15, a world judgment epiphany; Psa 80:17; 76:7 at the Reed Sea) and with the spirits of Belial (1QM 14:10) may also be associated with the chaos struggle motif. Where Israel is the obj. of a divine reprimand (Isa 51:20; 54:9), the concept of Yahweh as a warrior also probably stands in the background. In Mal 3:11 Yahweh’s reprimand is supposed to hinder the locust plague (Horst, HAT

14, 273); in Zech 3:2 Yahweh reprimands the Satan for opposing a majestic act of Yahweh (Horst, BK 16, 13f.).

5. Qumran follows the theological usage of the OT. On the LXX and the NT, cf. E. Stauffer, “ἐπιτιμῶ,” *TDNT* 2:623–27; Joüon, op. cit. 320f.; H. Hanse, “λοιδορέω,” *TDNT* 4:293f.; H. C. Kee, *NTS* 14 (1967): 232–46.

G. Liedke

גֵּר *ēr* **sojourner** → גּוּר *gûr*

דָּבַק *dbq* **to hang on**

S 1692; BDB 179b; *HALOT* 1:209a; *TDOT* 3:79–84; *TWOT* 398; *NIDOTTE* 1815

1. The root *dbq* occurs only in Hebr., Aram., and Arab. (apparently adapted from Aram.; Fraenkel 120f.); cf. Eth. *ṭbq*.

The verb appears in the qal, pu., hi. (normal causative “to make stick” and inner-trans. or internal “to make oneself stick, overtake”), and ho.; additionally, there are a verbal adj. *dābēq* “adhering, attached” and a subst. *debeq* “solder” (Isa 41:7), “appendage” (1 Kgs 22:34 = 2 Chron 18:33).

Extrabibl. occurrences contemporary with the OT are only Aram. pe. in the Elephantine Papyri (5th cent. BCE; *DISO* 54), used in contracts concerning the borders around plots of ground, sections of buildings, etc. (e.g., *BMAP* 9.9 *ʿlyʾlh byt qnḥnty dbq lh ʾgr bʾgr* “in the upper portion thereof the house of Q. borders on it, wall to wall”); also in 1QapGen in the meaning “to reach” (usually stereotypically, e.g., 21:1 *ʿd dy dbqt lbyṯ ʾl* “until I arrive at Bethel”).

2. The OT exhibits the word group 60x in Hebr. and 1x in Aram. in a normal distribution (*dbq* qal 39x, pu. 2x, hi. 12x, ho. 1x; Aram. pe. 1x; Hebr. *dābēq* 3x, *debeq* 3x).

3. All meanings cluster tightly around the basic meaning “to be close by”; only the most important are mentioned here:

(a) In the objective realm the (neutrally inflected) qal expresses the circumstance of “hanging on, sticking to, hugging to, bordering on,” with the verb construed intrans. with the preps. *b<sup>e</sup>*, *le*, *ʾel*, *ʿim*, and *ʾah<sup>a</sup>re<sup>e</sup>*, except in Gen 19:19. Causative hi. “to cause to hang on” with *b<sup>e</sup> or ʾel* belongs in this category.

(b) Of persons, the qal means “to hang on, hold fast to, hold on to (willingly),” etc.; the (inner-trans.) hi. “to cause oneself to be close by” signifies “reaching, overtaking, following” in military contexts (with an obj. or with  $\text{ʔah}^{\text{ʔrē}}$ ).

Aram. pe. also has the meanings “to reach” and “to follow” to a degree (1QapGen, Christ. Pal., and Syr.); regarding the transition in meaning, cf. *dbq* with  $\text{ʔah}^{\text{ʔrē}}$  in Jer 42:16.

(c) *ḥšq* qal “to hang on (in love)” (8x) is the verb most clearly related semantically. It is used to describe a relationship between man and woman (Gen 34:8; Deut 21:11), human and God (Psa 91:14), and God and human (Deut 7:7; 10:15), as well as more generally in the meaning “to have desire (for an activity)” (1 Kgs 9:19 = 2 Chron 8:6, with the corresponding subst. *ḥēšeq* “lust, desire,” 1 Kgs 9:1, 19; 2 Chron 8:6). *ḥšq* pi. “to bind” (Exod 38:28, plus the pu. Exod 27:17; 38:17, and *ḥiššūq* “[binding =] wheel spoke,” 1 Kgs 7:33) and *ḥāšūq* “binding” (8x in Exod 27:10f.; 36:38; 38:10–19) have acquired a technical, mechanical meaning.

(d) *ʔzb* “to leave” (Gen 2:24; Ruth 1:14, 16), *sūr* “to turn aside” (2 Kgs 3:3; 18:6), and *ʔh mēʔahʔrē* “to fall away from” (2 Sam 20:2) can be cited as antonyms to *dbq* “to hang on to.”

4. The theological usage of *dbq* “to cling to (God)” directly continues the usage treated in 3b. Except for Psa 63:9, “My soul clings to you,” all occurrences belong to Dtn-Dtr language: Deut 4:4; 10:20; 11:22; 13:5; 30:20; Josh 22:5; 23:8,(12); 2 Kgs 18:6. Cf. also the different metaphor in Jer 13:11 and *ḥšq* qal “to cling to (in love)” in Psa 91:14. Whether Dtn-Dtr diction connotes the par. expression → *ʔhb* “to love” (cf. Deut 11:22; 30:20; Josh 22:5; 23:11f.; *ʔhb* parallels *dbq* elsewhere in Gen 34:3; 1 Kgs 11:2; Prov 18:24) or obedient faithfulness (cf. 2 Sam 20:2, plus W. L. Moran, *CBQ* 25 (1963): 78; *dbq* beside *ʔbd* in Deut 10:20; 13:5; Josh 22:5; 23:7f.) can remain undecided (N. Lohfink, *Das Hauptgebot* [1963], 79). At any rate, the verb is usually an optional filler in longer series of verbs of proper relation to God (tables in Lohfink, op. cit. 303f.). In contrast to Dtn → *ʔhb* “to love” and *ḥšq* “to cling to out of love” (Deut 7:7; 10:15), God is never the subj. of *dbq*.

5. The Dtn theological usage is no longer current at Qumran and in the NT (except possibly for 1 Cor 6:17); by contrast, Gen 2:24 plays a greater role (cf. K. L. Schmidt, “ $\kappa\omicron\lambda\lambda\acute{\alpha}\omega$ ,” *TDNT* 3:822f.).

E. Jenni

## דָּבָר *dābār* word

S 1697; BDB 182a; HALOT 1:211a; TDOT 3:84–125; TWOT 399a; NIDOTTE 1821

I. 1. Lexicographers distinguish between two roots: *dbṛ* I “to be behind, turn the back” (Arab. *dub[u]r*), and II “word, matter.” The rather rare root I includes a series of derivatives (*d<sup>ʿ</sup>bîr* “back room,” *dōber* “pasture,” *dōb<sup>ʿ</sup>rôt* “raft,” *midbār* “steppe”); but root II stands remarkably isolated and is limited primarily to the frequent term *dābār* “word, matter” and to *dbṛ* pi. “to talk, speak.” The much more weakly developed qal, ni., pu., and hitp. stems appear in addition to the pi. form. Also etymologically related to *dbṛ* II are *dibrâ* “matter” as a secondary development of *dābār*, *dibbēr* as a rare nom. form based on the verb, and *midbār* (II) “instrument of speech, mouth” as a nomen instrumenti.

M. Dahood (*Bib* 33 [1952]: 47f.) sees a Phoen. construction in the prep. phrase *ʿal-dibrat* (Eccl 3:18; 7:14; 8:2) on account of the final *-t*.

The hapax legomenon *dabberet* (Deut 33:3) also apparently derives from the verb *dbṛ* pi.; cf., however, I. L. Seeligmann, *VT* 14 (1964): 80, who argues for a derivation from *dbṛ* I (“behind you”). *dābār* may also stand behind *deber* “bubonic plague,” which could be understood as a euphemism; cf. the Ger. usage of *Ding* as a nebulous designation for “illnesses, esp. if sores and boils are associated with them” (J. and W. Grimm, *Deutsch Wörterbuch* [1860], 2:1164).

HAL 201b and KBL 199b attribute not only Job 19:18; Song Sol 5:6 (2 Chron 22:10 “to eradicate”; cf. *dbṛ* hi. “to drive off,” Psa 18:48; 47:4) to *dbṛ* pi. I, but also Isa 32:7; Psa 75:6; 127:5. Moreover, HAL 202b posits a *dbṛ* pi. III “to have descendants” for Prov 21:28. Barr (*CPT* 324) catalogs other conjectures.

## 2. A convincing etymology for *dābār* has not yet been found.

On the etymological connection between *dbṛ* I and *dbṛ* II, cf. e.g., W. Leslau, *Language* 25 (1949): 316; J. T. Milik, *Bib* 38 (1957): 252; Barr (*SBL* 129–40) argues against misuse of etymology.

*dbṛ* II is normally associated with *d<sup>ʿ</sup>bôrâ* “bee,” explained as a onomatopoeic “buzz.” That *dābār* is used only rarely in legal discourse and *dbṛ* pi. is not used at all speaks against Buhl’s position that the basic meaning of *dābār* is “a matter handled in a legal procedure and in the assembly of the people” (F. Buhl, “Über die Ausdrücke für: Ding, Sache u.ä. im Semitischen,” *FS Thomsen* 33); see III/2.

The rare Akk. *dab/pāru* “to become full” (*CAD* D:104a) belongs in another semantic realm than the Hebr. *dbṛ* and offers nothing to the etymology of *dbṛ*.

Meanwhile, in *dabābu* Akk. possesses a richly developed term that corresponds semasiologically—both in the noun and the verb—to the Hebr. root in a remarkable manner. Like Hebr. *dābār*, the subst. *dabābu* represents “speech” and “legal matter”; as a verb it means “to speak” in the broadest sense (*CAD* D:2–14; *AHW* 146f.). Hebr. also knows the root *dbb*: *dibbâ* “rumor, slander” (9x). The question is, however, whether the semasiological affinity between Akk. *dabābu* and Hebr. *dābār/dbr* is a mere coincidence, or whether it may point to an etymological relationship. The semasiological isolation of NWSem. *dbr* suggests the possibility that *dbr* is only an apparent root and that the words should be understood as analogous formations whereby an original *dbb* was assimilated to the semasiologically related and somewhat synonymous  $\rightarrow$   $\lambda mr$  “to say.” The phonetic kinship between *dbr* and  $\lambda mr$  lies not only in the third, but also in the middle radical (labial). Only a reminder of the well-known phenomenon that groups of roots with two common radicals are often semasiologically identical or related is necessary here (cf. Moscati, *Intro.* 72f.).

3. Beyond Hebr. (cf. also occurrences in the Lachish Letters and in the Siloam inscription, l. 1), the root is restricted to a limited usage in Phoen.-Pun. (pi. “to speak” and subst. “word, matter”) and in Imp. Aram. texts (only in the usage *ʾ dbr* “in reference to”; see *DISO* 55). Only the nom. form *dibrâ* “concern” occurs in Bibl. Aram. (Dan 2:30; 4:14; cf. KBL 1063b).

*dbr* II is unattested in Ug.; the root *rgm* expresses the meanings “to speak” and “word” (cf. *UT* no. 2307; *WUS* no. 2491).

II. The noun *dābār* is attested 1,440x and is the 10th most common subst. With 1,084 occurrences the pi. of the verb is far more frequent than the qal (41x).

Lis. omits 2 Chron 8:14 for *dābār* (1 Chron 17:6; 2 Chron 34:16 in the appendix); Job 16:4 is listed as a qal instead of as a pi. verb. The following table does not count *lōʾ dābār* as a proper name in Amos 6:13 (etc.) and *dbr* pi. III in Prov 21:28 “to have descendants,” but does count (against *HP* 231, 282 following *HAL* 201b) Isa 32:7; Psa 75:6; 127:5 (see l/1). The distinction between sg. and pl. consistently follows the Q (sg. in Judg 13:17; 1 Kgs 8:26; 18:36; 22:13; Jer 15:16; Psa 105:28; 119:147; Dan 9:12; Ezra 10:12; pl. in Psa 147:19).

The following also occur: *dbr* ni. 4x (Ezek 33:30; Mal 3:13, 16; Psa 119:23), pu. 2x (Psa 87:3; Song Sol 8:8), hitp. 4x (Num 7:89; 2 Sam 14:13; Ezek 2:2; 43:6), *dibrâ* 5x (Psa 110:4; Job 5:8; Eccl 3:18; 7:14; 8:2), *dibbēr* 2x (Jer 5:13; 9:7), *dabberet* 1x (Deut 33:3); *midbār* 1x (Song Sol 4:3); Bibl. Aram. *dibrâ* 2x (Dan 2:30; 4:14).

III. 1. (a) The basic meaning of *dbr* pi. differs rather sharply from the semasiologically related and somewhat synonymous verb → *ʾmr* “to say, speak.” For the latter, attention to the content of the speech is important, but *dbr* pi. indicates primarily the activity of speaking, the production of words and phrases. *ʾmr* requires that the content of the speech (in direct address) be given or sufficiently characterized by the context (accordingly, *ʾmr* is not used abs.); *dbr* pi. can stand abs. without further

reference to that which is communicated (e.g., Gen 24:15; Job 1:16; 16:4, 6; cf. *HP* 165).

In view of the broader significance of *dbr* pi., it is natural that its subjects derive from a much more limited and unified semantic field than is the case for  $\lambda mr$ . For  $\lambda mr$  a profusion of speaking subjs. is possible (land, sea, animals, trees, night, fire, work, saying, etc.); the speakers in connection with *dbr* pi. are almost exclusively personal (divine or human) or designations of the organs of speech: mouth, lips, tongue, voice. Even Job 32:7 “the days may speak” has people in mind. In addition, “the spirit of Yahweh” (2 Sam 23:2) and “heart” (Psa 41:7 txt?) stand as subjs. of *dbr* pi.

Meanwhile, *dbr* pi. also often describes the pronunciation of a particular content. Indeed, as a trans., *dbr* pi. has a great capacity for taking objects. The most frequent occurrences are *dābār* (sg. and pl.) and other designations for moral and ideal values that appear as the content of speech: good, evil, truth, lies, faithfulness, apostasy, wisdom, folly, pride, humility, salvation, judgment, justice, perversity, etc.

The manner of speech can also be more nearly qualified with the aid of adverbial additions: “with audacity” (Deut 18:22), “secretly” (1 Sam 18:22; Isa 45:19; 48:16), “uselessly” (Ezek 6:10), “in the heart” (1 Sam 1:13), and “haughtily” (Psa 17:10).

The manner in which the addressee is indicated distinguishes *dbr* pi. markedly from  $\lambda mr$ . For the latter a simple *le* sufficiently expresses the close relationship to the addressee, but *dbr* pi. normally requires the stronger prep.  $\lambda el$ , approximately ten times more common with this verb than *le*.

Occasionally, *dbr* pi. appears in conjunction with complementary temporal expressions illuminating the scope of the verb, e.g.,  $\rightarrow \check{s}m^c$  “to hear” (Isa 66:4; Job 42:4),  $\lambda m$  ni. “to be silent” (Ezek 24:27), *ḥšh* “to keep silent” (Eccl 3:7),  $\rightarrow \check{s}h$  “to act” (Ezek 12:25, 28).

(b) The connotation of the qal diverges somewhat from the pi. The common act. ptcp. usually indicates someone who customarily functions as speaker, who speaks under commission or because of his/her inner nature: truth (Psa 15:2), lies, falsehood (Jer 40:16; Psa 5:7; 58:4; 63:12; 101:7), right (Isa 33:15; 45:19; Prov 16:13), salvation (Esth 10:3), folly (Isa 9:16), insolence (Psa 31:19); in Zech 11x of the prophet’s interpreting angel; Gen 16:13 of  $\lambda el r^o \check{q}$ , the special god of Hagar who used to speak to her; Num 27:7 and 36:5 of a speech constantly in someone’s mouth (Nyberg 221; cf. also the differentiation between *dbr* qal and pi. in *HP* 164–70).

2. (a) Like the Akk. root *dbb*, the Hebr. root *dbr* has a nom. function in addition to the verbal. The basic meaning of the noun *dābār* corresponds, in the first instance, very precisely to that of the verbs: “what

is spoken, word.”

The difference between *dbr* pi. and  $\lambda mr$  is reflected in a comparison of *dābār* with  $\lambda emer$  ( $\rightarrow \lambda mr$  3c). As one may infer, not least of all from the frequent expression  $\lambda imr\acute{e}-p\acute{i}/p\acute{i}k\acute{a}/p\acute{i}w$  “the speech of my/your/his mouth,” the oral character is essential to  $\lambda emer$ . It is primarily a term for communication, a simple means of oral communication and understanding between distant persons. *dābār* is associated with “mouth” by the aid of a cs. phrase only as an exception (Jer 9:19; Psa 36:4; Prov 18:4; Eccl 10:12f.), all the more preferably, however, with terms qualifying the content of the “word,” esp. with indications of moral and religious value (see III/1a on the objs. of *dbr* pi.).

(b) *dābār* exhibits an expansion of the verbal meaning that OT persons would hardly have perceived as a shift of meaning: *dābār* stands not only for “word,” i.e., for the linguistic carrier of meaning, but also for the content itself. In this regard, however, an important reservation must be made. If one wishes to reckon with a dual meaning for *dābār* (e.g., “word” and “matter”), then one should not refer to the ancient worldview, which knew no sharp distinction between spiritual and concrete, to explain this semasiological duality. The contrast between “word” and “matter” does not primarily concern a contrast between spiritual and concrete. *dābār* does not signify “object” in an empirical sense, i.e., in contrast to “person” or as a designation for someone’s property (cf. *k<sup>o</sup>l* “object, device”), but is thoroughly abstract in character. Something of the activity of the verb is always implied in *dābār*: it indicates something that can occasion some discussion or treatment or that can become the object of such a discussion, thus “concern, incident, event” (e.g., 1 Sam 4:16; 10:16; 21:9; 2 Sam 1:4; 1 Kgs 12:30; Ruth 3:18; Esth 1:13; 2:22; 8:5; Ezra 10:9). The formula *dibré hayyāmîm* “the events of the day” in the sense of “annals” (1 Kgs 14:19 and a further 32x, *sēper dibré hayyāmîm* in Kgs; likewise in Esth 2:23; 6:1; 10:2; Neh 12:23; cf. 1 Chron 27:24), the frequent association of *dibrí* with a PN, usually that of a king (e.g., 1 Kgs 11:41 “the history of Solomon”), and *hadd<sup>o</sup>bārîm hā<sup>o</sup>elleh* “these events” (Gen 15:1; 22:1, 20, etc.) are characteristic.

(c) *dābār* is also useful as a replacement when a specific expression is not immediately available or should be avoided (e.g., Gen 19:8; 1 Sam 20:2; 2 Chron 29:36), esp. in conjunction with a negation (e.g., 1 Sam 20:21; 22:15) or with *kōl* “all” (Num 31:23; Judg 18:7; 19:19). In this diminished sense, *dābār* has even assumed the function of an indefinite pron.; a similar generalization and designation has also affected other nouns, e.g., *m<sup>o</sup>lā<sup>o</sup>kā* “word” > “something” (Exod 36:6; Lev 7:24, etc.). *dābār* acquires a more definite meaning by means of attributive or genitival modification or by reference to an event or process.

Thus *dābār* can also indicate the nature and cause for any concern or event (Josh 5:4; 1 Kgs 11:27), esp. following *ʿal* used as a prep. or a conjunction: “for . . . sake, because”; *dibrâ* appears in the same function in Eccl 3:18; 7:14; 8:2.

(d) It is noteworthy that *dābār* does not find frequent usage in legal language, and it is questionable whether it occurs at all as a technical juristic term. Primary consideration should be given to the unique expression *baʿal dʿbārîm* (Exod 24:14): “whoever has a legal case.” In other passages it hardly seems possible to conceive of *dābār* as a precise, technical legal term (Exod 18:16; 22:8; Deut 1:17; 16:19; 19:15). *dābār* here apparently stands as an imprecise replacement for the technical term → *rîb*.

\*3. In Bibl. Aram., *dābār* and *db̄r* pi. are represented by the synonymous *millâ* “word, matter” (24x in Dan) and *mll* pa. “to speak” (5x in Dan). These terms have also entered into Hebr. from Aram. (cf. KBL 1093b, 1094b; *DISO* 152, 154; Wagner nos. 171f.); Hebr. *millâ* “word” occurs 38x (Job 34x, otherwise only in 2 Sam 23:2; Psa 19:5; 139:4; Prov 23:9) and *mll* qal “to give a sign” 1x (Prov 6:13), pi. “to speak, proclaim” 4x (Gen 21:7; Psa 106:2; Job 8:2; 33:3; on 1 Chron 25:4, 26, cf. Rudolph, HAT 21, 166f.).

The Old Pers. loanword *pitgām* “word, message” (KBL 1114b; *DISO* 238) is another synonym in Aram. (Bibl. Aram. 6x: Dan 3:16; 4:14; Ezra 4:17; 5:7, 11; 6:11), which also occurs in Hebr. as an Aramaism (Eccl 8:11; Esth 1:20; cf. Wagner no. 241).

IV. 1. God/Yahweh stands as the subject of *db̄r* pi. almost 400x. A fixed theological usage is most likely in passages that use “to speak” absolutely, i.e., without obj. or adv. modifier. “Yahweh/God (or the mouth of Yahweh) has spoken” occurs in about 40 passages, almost without exception in the Prophets, esp. frequently in Ezek (18x) and Isa (12x), rarely in Jer (1x, 13:15); outside the Prophets, Psa 50:1, 7.

The use of preps. accords with the remarks in III/1a, i.e., *ʿel* exhibits a marked predominance in theological language (more than 150x). Far behind are the roughly equal occurrences of the preps. *le* and *ʿal*.

2. (a) The noun *dābār*, an important theological term, plays a disproportionately significant role in theological language, esp. in the expression *debar yhw̄h* “word of Yahweh” (besides the OT theologies, cf. O. Grether, *Name und Wort Gottes im AT* [1934]; L. Dürr, *Die Wertung des göttlichen Wortes im AT und im antiken Orient* [1938]; W. Zimmerli, *RGG* 6:1809–12). The expression appears in the sense of “Yahweh’s affair” in only 1 Chron 26:32 and 2 Chron 19:11, both times juxtaposed with the par.

*debar hammelek* “the king’s affair.” Otherwise *debar yhwh* always means “the word of Yahweh” (242x in the OT, incl. 9 passages in which the divine name differs), and the expression appears usually (225x) as a technical term for the prophetic verbal revelation.

The distribution of the 242 passages cited (233x *debar yhwh*, excl. 2 Chron 19:11; as well as *d<sup>e</sup>bar <sup>ʔ</sup>dōnāy yhwh* in Ezek 6:3; 25:3; 36:4; *d<sup>e</sup>bar (hā)<sup>ʔ</sup>lōhîm* in Judg 3:20; 1 Sam 9:27; 2 Sam 16:23; 1 Kgs 12:22; 1 Chron 17:3; excl. 1 Chron 26:32; *d<sup>e</sup>bar <sup>ʔ</sup>lōhēnū* in Isa 40:8) exhibits a strong concentration in prophetic literature, incl. the prophetic narratives: Ezek 60x, Jer 52x, 1 Kgs 34x, 2 Kgs 16x, Zech 13x, Isa and 2 Chron 9x, 1 Sam 8x, 1 Chron 6x, Hag 5x, 2 Sam 4x, Jonah 3x, Gen, Exod, Josh, Hos, Amos, Mic, Zeph, Psa 2x each, Num, Deut, Judg, Joel, Mal, Dan, Ezra 1x each, thus 152x in Isa–Mal and 62x in 1 Sam–2 Kgs.

In more than half the cases, *debar yhwh* stands as subj., even with *hyh ʔel* “to come to” as predicate 118x (Gen 15:1; 1 Sam 15:10; 2 Sam 7:4; 24:11; 1 Kgs 6:11; 12:22; 13:20; 16:1, 7; 17:2, 8; 18:1, 31; 21:17, 28; 2 Kgs 20:4; Isa 28:13; 38:4; Jer 29x; cf. H. Wildberger, *Jahwewort und prophetische Rede bei Jeremia* [1942], 19–42; Ezek 50x; cf. Zimmerli, *Ezek*, Herm, 1:144f.; Jonah 1:1; 3:1; Hag 1:1, 3; 2:1, 10, 20; Zech 1:1, 7; 4:8; 6:9; 7:1, 4, 8; 8:1, 18; Dan 9:2; 1 Chron 17:3 *d<sup>e</sup>bar <sup>ʔ</sup>lōhîm*; 22:8; 2 Chron 11:2; 12:7; cf. also Gen 15:4 and 1 Kgs 19:9 with *hinnēh* instead of *hyh* ). Unique predicates of *debar yhwh* are *glh* ni. “to be revealed” (1 Sam 3:7), *yš<sup>ʔ</sup>* “to go out” (Isa 2:3 = 4:2), and *qûm* “to last” (Isa 40:8).

*debar yhwh* appears as an obj. in 52 passages, 36 times in association with the verb *šm<sup>c</sup>* “to hear” (incl. 1 Sam 9:27 *d<sup>e</sup>bar <sup>ʔ</sup>lōhîm* with *šm<sup>c</sup>* hi.); other predicates are *bzh* “to despise” (Num 15:31; 2 Sam 12:9), *drš* “to seek” (1 Kgs 22:5 = 2 Chron 18:4), *klh* “to be fulfilled” (Ezra 1:1 = 2 Chron 36:22), *m<sup>ʔ</sup>s* “to reject” (1 Sam 15:23, 26), *ml<sup>ʔ</sup>* pi. “to fulfill” (1 Kgs 2:27; 2 Chron 36:21); also, with one occurrence each, *bqš* pi. “to seek” (Amos 8:12), *yr<sup>ʔ</sup>* “to fear” (Exod 9:20), *ngd* hi. “to announce” (Deut 5:5), *qûm* hi. “to carry out” (1 Sam 15:13), *r<sup>ʔ</sup>h* “to see” (Jer 2:31 txt?), and *šmr* “to pay heed to” (2 Chron 34:21).

Just as *dābār* does not seem to be a legal term native to profane usage, neither can a juristic character be demonstrated for *debar yhwh*. The expression unequivocally indicates God’s legal word in only seven passages, all of which belong to a late period: Num 15:31; Deut 5:5; 2 Sam 12:9; 1 Chron 15:15; 2 Chron 30:12; 34:21; 35:6.

(b) The pl. cs. phrase *dibr<sup>ʔ</sup>yhwh* occurs 17x (Exod 4:28; 24:3f.; Num 11:24; Josh 3:9; 1 Sam 8:10; 15:1; Jer 36:4, 6, 8, 11; 37:2; 43:1; Ezek 11:25; Amos 8:11; 2 Chron 11:4; 29:15); to these may be added three passages with *<sup>ʔ</sup>lōhîm* (Jer 23:36; Ezra 9:4; 1 Chron 25:5). The pl. stands as the obj. of verbs of speech much more often than the sg.: *ngd* hi. “to announce” (Exod 4:28) *spr* pi. “to recount” (Exod 24:3), *dbr* pi. “to proclaim” (Num 11:24; Jer 43:1; Ezek 11:25), *ʔmr* “to say” (1 Sam 8:10), *qr<sup>ʔ</sup>*

“to cry out” (Jer 36:6, 8). The pl. does apply to prophetic verbal revelation, but not in the almost completely exclusive way in which the sg. does.

(c) Besides the cs. relationship, *dābār/d<sup>c</sup>bārîm* occurs more than 300x in reference to God. In approximately 3/4 of these passages, the term indicates prophetic verbal revelation, regarding which the pl. has a much greater frequency than it does in the cs. relationship (the ratio of sg. to pl. is about 4:5). In almost 1/5 of the passages, thus somewhat more frequently than in the cs. relationship, the “word” is an indication of God’s legal word. This usage of *dābār* already occurs in pre-Dtn times, although rarely and with some limitations: only in the pl. and only as a characterization of the giving of the covenant law at Sinai. In Deut an expansion to other laws is visible (e.g., Deut 12:28; 15:15; 24:18, 22; 28:14; 30:14). The same loosening of usage is also present in P (Exod 29:1; Lev 8:36, etc.).

In Dtr and post-Dtr texts, furthermore, *dibr’* (cs. pl.) occurs in combination with various terms referring to customs, law, and cult: → *tôrâ* (Deut 17:19; 27:3, 8, 26; 28:58; 29:28; 31:12, 24; 32:46; Josh 8:34; 2 Kgs 23:24; Neh 8:9, 13; 2 Chron 34:19), → *b<sup>c</sup>rît* (Deut 28:69; 29:8 [cf. v 18 → *’ālâ*]; 2 Kgs 23:3; Jer 11:2, 6, 8; 2 Chron 34:31), *sēper* “book (of the law, the covenant)” (2 Kgs 22:11, 13, 16; 23:2; 2 Chron 34:21, 30). The result of this loosening of usage is that the earlier distinction between prophetic and legal *dābār* is greatly effaced in Dtr and post-Dtr texts.

In wisdom literature (Prov and Sir) *dābār*, like the related terms *tôrâ* and *mišwâ* “commandment,” describes the doctrines of wisdom and does not occur in the meaning “word of God” (cf. E. G. Bauckmann, *ZAW* 72 [1960]: 33–63).

(d) As a theological term *dābār* is clearly distinguished in the OT from the related term → *šēm* “name.” The two never appear in conjunction as subj. or obj. of a sentence, nor as alternatives or corresponding terms in par. verses. This formal separation of the two terms reflects a conceptual distinction: “As the name of God, the *šēm* describes him as a person, and, therefore, concerns God in his totality. The *dābār* is an expression of the thoughts and will of God” (Grether, op. cit. 169). “The *šēm* mediates God’s presence in the world, the *dābār* his activity in it. The former is the representative, the latter the voluntative manifestation of Yahweh” (op. cit. 179). Characteristic of this distinction is the fact that the “holy word” is mentioned only once (Psa 105:42), but *šēm* is regularly associated with the concept of holiness (→ *qdš*).

(e) *dābār* also plays a rather significant role in the discussion of the so-called hypostatization of divine activities and attributes. The autonomy and personification of *dābār*, reaching its highest degree of development

only in the postcanonical era, is already present in its initial stages in the OT (Grether, op. cit. 150ff.; Dürr, op. cit. 122ff.; H. Ringgren, *Word and Wisdom: Studies in the Hypostatization of Divine Qualities and Functions in the Ancient Near East* [1947], 157ff.). The following passages are listed as the most unequivocal OT examples: Isa 9:7, “The Lord sends a word against Jacob, and it descends upon Israel”; 55:10f., “For like the rain . . . , so, too, is my word that comes from my mouth: it does not return to me empty, but works what I have decided, and carries out that for which I sent it”; Psa 107:20, “To those to whom he sent his word to heal them”; 147:15, “Who sent his word to earth.” The discussion suffers from the almost exclusive perception of hypostatization as a religiohistorical phenomenon, a type of mythologization: a divine attribute is separated from the deity, considered autonomous, and understood as an independent entity or even as a special deity. It is questionable, however, whether one may isolate the “hypostatization” of divine attributes from the general propensity for objectification and personification of the abstract active throughout the OT. Human emotions and activities are objectified and considered autonomous just as often as divine attributes: evil, perversity, anxiety, hope, wrath, goodness, faithfulness, etc. (Psa 85:11f.; 107:42; Job 5:16; 11:14; 19:10, etc.; cf. G. Gerleman, “Bemerkungen zum atl. Sprachstil,” FS Vriezen 108–14).

3. The term *millâ* “word,” which originated in the Aram.-speaking realm (see III/3), is rare in theological language. It occurs only twice as an indication of the divine word (2 Sam 23:2; Job 23:5; see also the Aram. in Dan 4:30), but never in a cs. relationship with Yahweh or God.

V. In the Qumran texts both the verb and the noun are frequent. Kuhn (*Konk.* 47–49; also GCDS 106f.) catalogs over 50 and over 90 occurrences, resp.

The LXX usually renders *dbr pi.* with *lalein* (→ *ἄνω* 5). The relatively uniform usage of *dābār* in the Hebr. OT has decayed; two Gk. terms translate it: *logos* and *rhēma*, distributed in the canonical books in a ratio of roughly 2:1 (cf. E. Repo, *Der Begriff “Rhēma” im Biblisch-Griechischen* [1951], 1:188).

NT usage agrees with the OT insofar as “word of God” indicates the self-revelation of God in the spirit and thus appears as a synonym of “gospel.” In addition, “the word,” the *logos*, is closely associated and even equated with the person of Jesus. Numerous studies of *logos* also treat, more or less extensively, the backgrounds of the term in the OT and in Palestinian and Hellenistic Judaism. The following may be mentioned: A. Debrunner, H. Kleinknecht, O. Procksch, and G. Kittel, “λέγω,” *TDNT* 4:69–143; G. Stählin, “μῦθος,” *TDNT* 4:762–95; V. Hamp, *Der Begriff “Wort” in den aram. Bibelübersetzungen* (1938).

G. Gerleman

## דֹּר *dôr* generation

S 1755; BDB 189b; HALOT 1:217b; TDOT 3:169–81; TWOT 418b; NIDOTTE 1887

1. *dôr* “generation” belongs to a common Sem. root *dwr*, for which the meaning “duration” dominates in ESem. and the meaning “generation” in WSem. (P. Fronzaroli, *AANLR* 8/20 [1965]: 143, 148). The word group comprises Akk. *dūru* “circular wall” (*AHW* 178); Hebr. *dôr* “(circular) encampment, dwelling” (Isa 38:12) and *dûr* “circle” (Isa 29:3; “ball”? Isa 22:18; cf. also *dûr* “to stack up in circles,” Ezek 24:5); Bibl. Aram. *dûr* “to dwell” (7x in Dan; KBL 1064a; in Psa 84:11 as an Aram. loanword; cf. Wagner no. 68), *m<sup>c</sup>dôr* (Dan 4:22, 29; 5:21), and *m<sup>c</sup>dār* (Dan 2:11) “dwelling”; Arab. *dawr* “circumference, circle,” *dāra* “to circle,” and *dār* “dwelling,” etc., are apparently not directly related.

Besides the frequent Akk. terms *dāru/dūru* “long duration,” *darû* “to last,” *dārû* “lasting,” *dārîtu* “duration, eternity” (*AHW* 164, 178b), *dāru* also occurs once at Mari as a WSem. loanword meaning “lifetime” (*AHW* 164b; *CAD* D:115b).

Ug. *dr dr* corresponds to the Hebr. *dôr dôr* (Exod 3:15); in addition, *dr bn il* (par. *mḫrt bn il*) “assembly of the sons of God” also occurs (cf. *WUS* nos. 785f.; *UT* no. 697). Phoen.-Pun. *dr* means “family, generation” (*DISO* 60); here too the expression *kl dr bn ʾlm* “the whole generation of the sons of the gods” occurs (Karatepe inscription, *KAI* no. 26A.III.19; cf. *ANET* 654b; F. J. Neuberg, *JNES* 9 [1950]: 215–17; M. Dahood, *Le Antiche Divinit Semitiche* [1958], 66).

Aram. extrabibl. examples are late, e.g., Syr. *dārā* “era, generation” (*LS* 147a).

Opinions regarding etymology are divided, esp. concerning whether *dôr* is associated with the “circle” concept.

If this question is answered affirmatively, then *dôr* would indicate “the circular, self-contained passage of time . . . in which a human generation completes its development” (C. von Orelli, *Die hebr. Synonyma der Zeit und Ewigkeit* [1871], 34; similarly W. A. Ward, *Or* 31 [1962]: 398f., who refers, additionally, to Eg. *tr* “time”). The etymological relationship to “circle” has probably correctly been denied by other scholars (cf. also Fronzaroli, op. cit. 143): Neither Akk. *dāru* nor Hebr. *dôr* concerns the concept “circle”; rather, they belong to the semantic sphere of “duration, continuum”

(CAD D:108b). A third etymology associates *dôr* with a root *dhr* “wagon race,” thus \**dahru* > \**dāru* > *dôr*, properly, “circuit in a race,” then “cycle” (W. F. Albright, *BASOR* 163 [1961]: 50f.).

Bibl. Aram. has *dār* with the same meaning in the dual expression *dār w<sup>e</sup>dār* (Dan 3:33; 4:31) and a derivative *t<sup>e</sup>dār* “duration” (Dan 6:17, 21; KBL 1135f.).

2. *dôr* occurs in the OT 166x (92x alone and 37x in the formula *dôr dôr*), Bibl. Aram. *dār* 4x. The pl. has the masc. form *dôrîm* 3x (Isa 51:8; Psa 72:5; 102:25), otherwise the fem. form *dôrôt* occurs (48x).

The word is esp. frequent in the Psalter (59x with 21 repetition formulae). *dôr* occurs in the Prophets only in Isa (17x, excl. 38:12), Jer (4x), and Joel (5x). In the Pentateuch, the older sources (Gen 7:1; 15:16; Exod 1:6; 3:15; 17:16; Num 32:13) and Deut (11x) use the sg., the priestly layers the pl. (Gen 5x, Exod 4x, Lev 14x, Num 9x).

Regarding the frequency in P and in the Psa, cf. Akk. *dār, dūr*, and (ana) *dūr dār*, limited principally to poetic and juristic language (CAD D:108b).

3. In contrast to a series of other collective terms referring to origin and relationship (*zera<sup>c</sup>* “descendants,” *mišpāḥâ* “tribe,” *tôlêdôt* “descendants”), *dôr* is primarily temporal. As the word’s etymology indicates, it belongs semantically to the temporal sphere: “duration, continuum.” According to the Hebr. concept of time, however, temporal extension is not conceived as a simple abstraction. It must always be perceived in terms of its content (von Rad, *Theol.* 2:100f.). The period of time indicated by *dôr* may be comprehended only as the duration of the people living in it. The past, like the future, is described as a series of many sequential generations.

The referent of the word can vary greatly. The concrete notion of a collective group of people living at a particular time occasionally becomes prominent (Gen 6:9; 7:1; Exod 1:6; Lev 23:43; Num 32:13; Deut 1:35; 2:14; 23:3f., 9; 29:21; 32:5, 20; Judg 2:10; Isa 41:4; Jer 2:31; Joel 1:3; Psa 12:8; 14:5; 24:6; 78:6, 8; Prov 30:11–14; Eccl 1:4). Here *dôr* almost always stands in a very general sense, i.e., “the total group of contemporaries active in public life” (M. Noth, *Deuteronomistic History* [1981], 105n.12). Only rarely does it have an exclusive sense indicating a limited circle within the people (Psa 24:6; 112:2; Prov 30:11–14).

Other passages definitely emphasize the temporal character, i.e., Isa 51:9. *dôr* has the sense of a temporal modifier in particular in a few usually fixed formulae: *dôr wādôr* (30x, 18x in Psa), without *waw*: Exod 3:15; 17:16; Prov 27:24 K; cf. Ug. *drdr* and Akk. *dūr dār* “forever.” Other double forms, which do not serve as temporal advs., are *dôr l<sup>e</sup>dôr* (Psa 145:4), *dôr*

*dôrîm* (Psa 72:5; with prefixed *le* Isa 51:8; with *be* Psa 102:25). The pl. with suf. and prefixed *le* characterizes P and is almost exclusively employed by it (39x); *I<sup>c</sup>dôrôtēkem/I<sup>c</sup>dôrôtām/I<sup>c</sup>dôrôtāyw* “according to your/their/his generations” functions as a temporal adv. pointing to the future and is roughly synonymous with *I<sup>c</sup>ôlām* (→ *ôlām*).

Regarding Isa 53:8, where G. R. Driver (*JTS* 36 [1935]: 403) and others translate *dôr* with “destiny” (e.g., D. W. Thomas, *ETL* 44 [1968]: 84), cf. Westermann, *Isa 40–66*, OTL, 265.

4. *dôr* has no specifically theological usage. As a temporal adv. *dôr* is noneschatological. The infrequency of the word in the prophets and in their statements concerning the future are noteworthy. As a designation for a group of people, too, *dôr* exhibits no specifically theological references. The “generation” is rather rarely the topic of religious and ethical assessment (Deut 1:35; 32:5, 20; Psa 12:8; 14:5; 24:6; 78:8; 112:2; Prov 30:11–14).

5. Kuhn (*Konk.* 49) catalogs roughly 30 occurrences in Qumran texts (see also *GCDS* 108). OT usage continues for the most part. The expressions *dôrôt neṣaḥ* (1QH 1:16) and *dôrôt ôlām* (1QH 1:18; 6:11; 4QP Bless 4) “eternal generation” (cf. Isa 51:9) are noteworthy.

The LXX translates *dôr* almost exclusively by *genea*, which indicates origin and descent. On the NT, cf. F. Büchsel, “γενεά,” *TDNT* 1:662–65.

G. Gerleman

## דִּין *dîn* to judge

S 1777; BDB 192a; *HALOT* 1:220a; *TDOT* 3:187–94; *TWOT* 426; *NIDOTTE* 1906

1. The root *dîn* is common Sem. (cf. *HAL* 211).

The word group occurs among Israel’s neighbors frequently, in Akk. (*AHw* 150f., 167f., 171f., 571f.), Ug. (*WUS* no 766; *UT* no. 657), and Aram. (*DISO*, 56f., 143), but is absent from Phoen.-Pun. (→ *špī*).

In the OT, the verb *dîn* occurs in the qal and ni.; the following subst. derive from it: *dîn* “legal case” (substantivized inf., BL 452), *dayyān* “judge” (nomen agentis, BL 478), *mādôn* and *midyān* “conflict” (verbal nouns with *m* - prefix, BL 491; on *midyān* cf. I. L. Seeligmann, *FS Baumgartner* 256),

and *m<sup>e</sup>dînâ* “jurisdiction, province” (*m-* locale, BL 492; cf. Wagner no. 152).

*dîn* also occurs in the PNs *dînâ* (see 3), <sup>ʾ</sup>*bîdân*, and *dānîyēʾl* (HAL 219a), in the personal, place, and tribal name *dān*, and in the place name *mādôn* (Noth, HAT 7, 67f.; M. Weippert, *Settlement of the Israelite Tribes in Palestine* [1971], 34n.100); for extrabibl. proper names, cf. Stamm, AN 355b; Huffmon 182f.; Gröndahl 123).

2. The verb *dîn* occurs in the Hebr. OT 22x in the qal (Psa 8x, Jer 4x) and 1x in the ni. (2 Sam 19:10 “to quarrel”); also in Bibl. Aram. 1x in the pe. (Ezra 7:25). The subst. *dîn* appears 20x (incl. Job 19:29 K; 35:14; Prov 5x, Job and Jer 4x each), in addition to 5x in Bibl. Aram.; *dayyān* 2x (1 Sam 24:16; Psa 68:6), Aram. 1x (Ezra 7:25); *mādôn/midyān* 23x (incl. 2 Sam 21:20; in Prov 19x); *m<sup>e</sup>dînâ* 53x (39x in Esth, often in a distributive reduplication), Aram. 11x.

3. Contrary to the judgment of J. van der Ploeg (CBQ 12 [1950]: 248) and B. Gemser (SVT 3 [1955]: 124n.4), who attribute a broad, fluctuating meaning to *dîn*, it may be established that the root originally designated precisely authoritative, binding judgment in a legal procedure. The usage in the Code of Hammurabi (Driver-Miles 1:73), in Ug. (WUS no. 766), and in the OT and the fact that the subjs. of *dîn* are almost always authorities—indeed, primarily the king (king: Jer 21:12; 22:16; Psa 72:2; Prov 20:8; 31:5, 8f.; high priest in a royal function: Zech 3:7, cf. Horst, HAT 14, 228; the leaders of the tribe of Dan: Gen 49:16)—support this viewpoint; on the basic forensic meaning of *dîn* cf. also H. J. Boecker, *Redeformen des Rechtslebens im AT* (1964), 85n.7; Seeligmann, op. cit. 256. Deut 17:8 may also be easily explained if *dîn* together with *dām* “bloodguilt” and *negac* “misdeed” had the precise meaning “contested authoritative-judicial decision.”

The basic meaning of *dîn* is thereby distinguished from → *špṭ*, which originally referred to decisions reached in nonbinding arbitration. Both roots expand in meaning to full synonymity. Consequently *špṭ* can play the dominant role in the OT that *dîn* has in Akk. (B. Landsberger, “Die bab. Termini für Gesetz und Recht,” FS Koschaker 223), while *dîn* plays only a secondary role in the OT. In 1 Sam 24:16; Isa 3:13; 10:2; Jer 5:28; 21:12; 22:16; Psa 7:9; 9:5, 9; 72:2; 76:9; 140:13; Prov 31:9; 1QH 9:9, *dîn* occurs alongside *špṭ* (cf. Ug. KTU 1.17.V.7f.). In addition to *am* “people” (Gen 49:16; Psa 72:2), the poor, suffering, orphans, and widows are objs. of *dîn* (Jer 5:28; 21:12; 22:16; Prov 31:5, 8f.; on the extra-Israelite parallels of this *justitia adiutrix miseri*, see Wildberger, *Isa 1–12*, CC, 50f.). Here *dîn* takes the meaning “to create justice” or “legal claim.”

In *m<sup>c</sup>dînâ* the root tends toward “to govern” (→ *špt*); *m<sup>c</sup>dînâ* designates the “judicial and administrative region” of the kingdom of Israel (1 Kgs 20:14–19), Judah (Lam 1:1), the Neo-Bab. Empire (Dan 3:2, etc.), the satrapy of the Pers. Empire (Esth, Ezra, Neh); cf. C. C. Torrey, “Medina and Polis,” *HTR* 17 (1924): 83ff.

The (partially synonymous) parallelism of *dîn* and *rîb* (Isa 3:13; with *dayyān* 1 Sam 24:16; with *mādôn* Jer 15:10; Hab 1:3; Prov 15:18; 17:14; cf. 1QH 5:23, 35) points to another extension of *dîn* ‘s meaning. *rîb* develops from the basic meaning “conflict” to “procedure” (→ *rîb*). In Job 35:14; 36:17; Esth 1:13, *dîn* means “procedure, legal struggle” (*HAL* 211b; cf. *AHw* 172a; *PRU* 3:223f.; *DISO* 56f.). Similarly, in *mādôn/midyān* “conflict, quarrel,” *dîn* assumes, in assimilation to *rîb*, the latter’s basic meaning (thus, insightfully, Seeligmann, op. cit. 256f.). The expressions *ēšet midyānîm*, etc., “quarrelsome wife” (Prov 19:13; 21:9, 19; 25:24; 27:15; cf. Gemser, *HAT* 16, 81) are characteristic.

*dîn* “to judge, hold proceedings” in Eccl 6:10 belongs here (cf. 2 Sam 19:10 *dîn* ni. “to squabble”), as does the fem. name *dînâ* “legal struggle,” which was probably artificially formed for Gen 34 (J. J. Stamm, *FS Baumgartner* 331).

4. Passages in which Yahweh is the subj. of *dîn* exhibit the meanings “to judge = pronounce judgment” and “to judge = create justice” (subst. “legal claim”): Gen 15:14; 30:6; Deut 32:36 = Psa 135:14; 1 Sam 2:10; 24:16; Isa 3:13; Psa 7:9; 9:5, 9; 50:4; 54:3; 68:6; 76:9; 96:10; 110:6(?); 140:13; Job 19:29; 36:7. Yahweh “judges” the nations (Gen 15:14; Psa 7:9; 9:9; 96:10; Job 36:31[?]) and his people Israel (Deut 32:36 = Psa 135:14; Isa 3:13; Psa 50:4). These two statements may fuse Jerusalem’s pre-Israelite cultic tradition (God as creator-king-world judge) with specifically Israelite tradition (Kraus, *Psa*, CC, 1:84f., 492). Yahweh creates justice for the suffering, etc. (Psa 9:5; 54:3; 68:6; 76:9; 140:13; 1 Sam 24:16; for Rachel, Gen 30:6). The laudatory names *dānîyēʾl*, “El is judge” (*IP* 35, 92, 187; cf. further the bibliog. in *HAL* 219a and in the comms. on Dan and Ezek 14), the abbreviation *dān* (*HAL* 218b with bibliog.; *BHH* 1:317f.), and the likewise theophoric name *ʾabîdān* (*HAL* 4b) “(my) father has judged” reflect the usage of *dîn* in lament (Psa 7:9; 54:3; 140:13) and praise (Deut 32:36 = Psa 135:14; 1 Sam 2:10; Psa 9:5, 9; 76:9; 1QH 5:13).

5. Qumran texts (esp. 1QH 5:13) use *dîn* similarly to the OT; on *dîn* in the Talmud, cf. Z. W. Falk, *JSS* 5 (1960): 352; on the LXX, Judaism, and the NT, cf. F. Büchsel and V. Hertrich, “κρίνω,” *TDNT* 3:921–54.

G. Liedke

דָּל *dal* poor → ענה *nh* II

## דָּם *dām* blood

S 1818; BDB 196a; HALOT 1:224a; TDOT 3:234–50; TWOT 436; NIDOTTE 1947

1. The biradical root \**dm* “blood” is common Sem. (GVG 1:344; Ug.: WUS no. 754).

In addition to Hebr. *dām*, a form <sup>ʾ</sup>*dāmâ* with prosthetic *aleph* occurs in Deut 32:43, just as Akk. *adam(m)u* occurs alongside the more customary *dāmu*, HAL 15b and AHW 10a explain them as by-forms of the root <sup>ʾ</sup>*dm* “to be red.” On the uncertain Phoen.-Pun. examples (KAI no. 43.11; no. 103.2) and Augustine’s “nam et Punice edom sanguis dicitur” (*Enarratio in Psalmos* 136:18), cf. DISO 58; KAI 2:61, 114; according to J. Hoftijzer (VT 8 [1958]: 289) <sup>ʾ</sup>*edom* should be understood as the form with the art. prefixed. Aram. <sup>ʾ</sup>*edmā* in addition to *d<sup>ʿ</sup>mā* can be explained as the result of a purely phonetic process (GVG 1:217; NB 118).

2. The OT attests *dām* 360x (sg. 288x, pl. 72x).

The word is most frequent in Lev (88x) and Ezek (55x), followed by Exod (29x; Lis. does not list Exod 12:22a), Deut (23x, as well as <sup>ʾ</sup>*dāmâ* in Deut 32:43), Psa (21x), Num and Isa (15x each).

3. As the only OT term for “blood,” *dām* has a broad range of usage: it designates human and animal blood, esp. blood spilled in sacrifice, war, or some other violence. The phrase “to spill blood” is the semasiological background of a natural transferral of meaning, also encountered in other languages, which uses *dām* (sg. and pl. *dāmîm*) in an abstract sense: “the shedding of blood, war.” *deber* “plague” appears a few times as a par. (Ezek 5:17; 28:23; 38:22). In this abstract sense, *dām* has become an ethically qualified concept: “bloody deed” and (in accordance with Hebr. thought almost synonymously) “bloodguilt” (Num 35:33; Deut 17:18; 19:10; 21:8; 22:8; Judg 9:24; 1 Sam 25:26, 33; Hos 1:4; 4:2; 12:15; Prov 28:17). “To spill blood” is often, esp. in Ezek, synonymous with “to commit murder” (Gen 9:6; 37:22; Num 35:33; Deut 21:7; 1 Sam 25:31; Psa 79:3; Prov 1:16; Ezek 16:38; 18:10; 22:3f., 6, 9, 12, 27; 23:45; 33:25; 36:18).

Not only murder is considered to be bloodshed, but also nonritual slaughter in

which the blood of the animal is not brought to the altar (Lev 17:4).

The expression *bēn dām l'dām* “between blood and blood” (Deut 17:8; 2 Chron 19:10) involves a distinction between acts of bloodshed to be assessed variously (murder, manslaughter).

A genuine metaphor occurs only in the expression “blood of the grape(s)” (Gen 49:11; Deut 32:14; Sir 39:26).

The OT very rarely uses *dām* to designate colors. The only clear passage is 2 Kgs 3:22 (cf. Isa 63:1–6 with the word *nēṣaḥ* “stream of blood” in vv 3, 6).

The Akk. (*AHW* 158b; *CAD* D:79b) and perhaps Phoen. (*DISO* 58) use of *dām* to designate descent and relationship is entirely absent (Dhorme 11). Hebr. associates this semantic function with → *bāsār* “flesh.”

4. (a) The language of sacral law employs a manifold usage of the word *dām*, esp. in P and Ezek. The peculiar formula *ʿmd ʿal-dām* “to stand against someone’s life” refers to appearance before a legal body in session, whether as plaintiff, witness, or judge (cf. 1 Kgs 21; Elliger, HAT 4, 258f.).

The apparently ancient taboo declaration of the blood of purification with the formula *m<sup>e</sup>qōr dāmeyhā* “source of her blood” (Lev 12:7; 20:18; cf. 15:19) is priestly.

The formula of bloodguilt, “his blood be on him (or on his head),” also belongs to the legal sphere and establishes the guilt of one condemned to death and thereby the innocence of the executor of the sentence (H. Reventlow, *VT* 10 [1960]: 311–27; K. Koch, *VT* 12 [1962]: 396–416). The formula occurs in its pure form (always *dāmîm* in pl. with suf. and *be* with suf.) only in P (Lev 20:9, 11–13, 16, 27), but also in a somewhat altered form elsewhere (Josh 2:19; 1 Kgs 2:37; Ezek 18:13; 33:4f.).

(b) Some religiohistorical concepts associated with blood may be mentioned briefly at this point in order to call attention to terms that stand in a special relationship to *dām* in the OT, esp. in P.

Blood is considered the locus of life (Lev 17:11, “The soul of the flesh is in the blood”; → *nepes̄*) or is identified with it (Gen 9:4; Lev 17:14; Deut 12:23). For this reason, blood may not be consumed (Lev 3:17; 7:26f.; 17:10, 12, 14; Deut 12:16, 23; 15:23), nor flesh “that has its blood” (Gen 9:4; cf. Lev 19:26; 1 Sam 14:32–34; Ezek 33:25). Probably originally understood animistically (on religiohistorical aspects cf. W. E. Mühlmann, *RGG* 1:1327f.; J. H. Waszink, *RAC* 2:459–73), the statements are stripped of this character through attribution to the revelation of God’s will and foundation upon it (Elliger, HAT 4, 228).

A similar phenomenon is also true of the significance of blood as a means of atonement (Lev 4:5–34; 16:14–19; 17:11, etc.; → *kpr*) and as a community-building factor in making covenant (Exod 24:6, 8; → *b'rit*). Blood does not act by means of inherent expiatory power, but because Yahweh designated it as a means of atonement (Lev 17:11, “I gave it to you for the altar so that it may work atonement for you”; cf. Vriezen, *Theol.* 266).

Human blood enjoys God’s special protection (Gen 9:5f.). It is regarded as the property of the tribe; consequently, the tribe is obligated, in the event of a murder, “to redeem” (→ *g'l*) the blood by the death of the murderer, to reacquire it for the family (*gō'el haddām* “blood avenger,” Num 35:19–27; Deut 19:6, 12; Josh 20:3, 5, 9; 2 Sam 14:11; cf. Koch, op. cit. 409–14).

5. Kuhn (*Konk.* 50) catalogs 16 occurrences of the word in the Qumran texts (3x pl.; see also *GCDS* 110). The usage conforms to that of the OT: spilling of blood, bloody deed, blood of the sacrifice, menstrual blood. Expressions such as “blood arrow” (1QM 6:3) and “to hear of bloody deeds” (*dāmîm*, 1QH 7:3) go beyond OT usage.

On Judaism and the NT, cf. E. Bischoff, *Das Blut im jüdischen Schrifttum und Brauch* (1929); J. Behm, “αἷμα,” *TDNT* 1:172–77; L. Morris, “Biblical Use of the Term ‘Blood,’” *JTS* 3 (1952): 216–27; 6 (1955): 77–82.

G. Gerleman

## דָּמָה *dmh* to be like

S 1819; BDB 197b; *HALOT* 1:225a; *TDOT* 3:250–60; *TWOT* 437; *NIDOTTE* 1948

## כִּי *ke* like

BDB 453a; *HALOT* 2:453b; *TDOT* 7:1–7; *TWOT* 937; *NIDOTTE* 3869

1. *dmh* “to resemble” is extant beyond Hebr. in Aram. (*DISO* 58; *KBL* 1066b; *LS* 156f. with reference to Fraenkel 272: Arab. *dumyat* “picture” is an Aram. loanword). The demarcation between one of more homonymous roots with the meaning “to be silent,” “to destroy,” etc. (*HAL* 216b; J. Blau, *VT* 6 [1956]: 242f.; cf. N. Lohfink, *VT* 12 [1962]: 275–77; A. Baumann, “דָּמָה *dāmāh* II,” *TDOT* 3:260–65) is disputed in individual cases.

The verb occurs in the qal “to be like,” ni. “to become like,” pi. “to equate, compare” and estimatively “to consider appropriate, plan, imagine,” and hitp. “to equate oneself.” Derived noms. are *d<sup>c</sup>mî* “half,” *dimyôn* “resemblance,” and *d<sup>c</sup>mût* “figure, representation.”

The last subst. occurs once in Imp. Aram.: *BMAP* 3:21 *byt ldmwt bytk*, “a house like yours.”

2. According to Lis. 366, *dmh* occurs in qal 13x (excl. Jer 6:2 [cf., however, Rudolph, HAT 12, 42] and Hos 4:5 [cf. Rudolph, KAT 13/1, 97]), pi. 14x (incl. Hos 12:11), hitp. 1x (Isa 14:14); additionally, ni. 1x in Ezek 32:2 according to Zimmerli, *Ezek*, Herm, 2:154, and *HAL* 216a. The substs. *d<sup>c</sup>mî* (Isa 38:10) and *dimyôn* (Psa 17:12) are hapax legomena: *d<sup>c</sup>mût* occurs 25x.

Bibl. Aram. has two occurrences of *dmh* pe. (Dan 3:25; 7:5).

3. (a) *dmh* qal “to be like” introduces comparisons in laments (Isa 1:9 “like Gomorrah”; Psa 102:7, “I am like the bittern in the wilderness”; 144:4, “The human being is like a breath”; cf. Lam 2:13 pi.), in prophetic metaphorical language (Ezek 31:2, 8[bis], 18, concerning the pharaoh), in love songs (Song Sol 2:9, 17; 7:8; 8:14; cf. 1:9 pi.), and in hymnic language (Isa 46:5; Psa 89:7; pi. in Isa 40:18, 25; 46:5; see 4a).

The following verbs that parallel *dmh* qal/pi. have similar meanings: (1) *hyh ke* “to be like” (Isa 1:9; Ezek 31:8; Psa 102:7; cf. Psa 50:21); (2) *šwh* qal “to be like” (Isa 40:25 pi.), hi. “to compare” (Isa 46:5 pi.; Lam 2:13 pi.); *šwh* qal occurs a total of 8x, ni. 1x “to be alike” (Prov 27:15), pi. “to make alike, equal, appease” 5x, and hi. “to equate, compare” 2x; cf. *HP* 35, 111; Bibl. Aram. *šwh* pe. “to be like,” Dan 5:21 K (Q pa.); hitpa. “to be made like” Dan 3:29; (3) *mšl* hi. “to compare” (Isa 46:5); otherwise *mšl* qal “to speak a metaphor, a proverb” 10x, pi. “to recite metaphors” 1x, hi. “to become like” 5x, hitp. “to become similar” 1x; also *māšāl* “proverb”; cf. O. Eissfeldt, *Der Maschal im AT* [1913]; A. R. Johnson, *SVT* 3 (1955): 162–69; for further bibliog. see Sellin-Fohrer 311; (4) *šmm* “to equal” (Ezek 31:8; otherwise only in Ezek 28:3); (5) *ʿrk* qal in the meaning “to juxtapose, compare” (Psa 89:7; Isa 40:18 pi.; without par. to *dmh*: Psa 40:6; Job 28:17, 19; otherwise in the meaning “to arrange”).

(b) The question as to whether the abstract form *d<sup>c</sup>mût* “semblance, resemblance,” best translated in many passages with “something like” (L. Köhler, *TZ* 4 [1948]: 20f.), refers to equivalence or only to some diminished similarity (Köhler, op. cit.; W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* [1964], 143; Westermann, *Gen*, CC, 1:146f.) may be answered by observing that the word in and of itself refers to total comparability and not to a perceptibly lesser degree of mere similarity, but that the need to refer to comparability exists only if similarity is not self-evident.

In a few passages (Isa 13:4 and Psa 58:5, the text is questionable), *d<sup>e</sup>mût* refers to pictorial or fig. representations (2 Kgs 16:10, model or plan of an altar; Ezek 23:15, mural painting; 2 Chron 4:3, cattle figures under the bronze sea) underscoring their correspondence to the original (“imitation, copy”). *d<sup>e</sup>mût* occurs most frequently in descriptions of visions in Ezek (as nomen regens: Ezek 1:5[bis], 10, 13 [txt?], 16, 26[bis], 28; 10:1, 10, 21f.; distanced from the related word: 1:22; followed by *k<sup>e</sup>mar<sup>h</sup>eh* “like the appearance of”: 1:26; 8:2) and Dan (Dan 10:16), where the identification of that which is seen with divine reality is only suggested.

On the *imago* passages (Gen 1:26; 5:1, 3) and on Isa 40:18, where *d<sup>e</sup>mût* also means “copy, likeness,” see 4a and → *selem*.

The closest semantically related word is *tabnât* “image, model” (20x, derived from the root *bnh* “to build”). On the words for “figure” (*t<sup>e</sup>mûnâ*, *tô<sup>h</sup>ar*, *qešeb*) and “picture” (*maš<sup>k</sup>ât*, etc.) → *selem*.

(c) The semantic field of equality and similarity is not dominated in Hebr. by verbs and nouns, but by the comparative particle *ke* “like” (on form and usage, cf. GKC §118s-x; Joüon §§103b, c, g, 133g, 166l, m, 174d, i; BrSynt 96, 104f., 126).

Of the more than 3,000 occurrences of the particle *ke* in the Hebr. OT (57x *k<sup>e</sup>mô*; in Bibl. Aram. *ke* is attested around 80x, incl. 22x *kol-q<sup>o</sup>bêl* “correspondingly,” *k<sup>e</sup>an/k<sup>e</sup>enet/k<sup>e</sup>et* “now” 17x, *k<sup>e</sup>dî* “like, as” 5x), over 500 fall to the conjunction *ka<sup>h</sup>šer* “like, as,” and about 250 to the combination *ke* + inf., which should be primarily rendered in Eng. with a temporal clause (most often with *šm<sup>c</sup>* “to hear” 46x, *bô<sup>h</sup>* “to come” 26x, *klh* pi. “to finish” 25x, *r<sup>h</sup>* “to see” 25x). Most frequently *k<sup>e</sup>* (or *k<sup>e</sup>mô*) precedes subst. of general and abstract meaning: *kôl/kol-* “totality, all” (127x, 75x *k<sup>e</sup>kôl<sup>h</sup>šer* “according to all, that which”), *dābār* “word” (94x), *yôm* “day” (78x), *mišpāt* “prescription, custom” (42x), *mar<sup>h</sup>eh* “looks, appearance” (25x), *ma<sup>a</sup>šeh* “deed” and *et* “time” (22x each); comparisons to concrete elements and living beings are more rare: *iš* “man” and *mayim* “water” (23x), *šô<sup>h</sup>n* “sheep” (20x), *šeh* “fire” (19x), *hōl* “sand” (14x).

Although passages with *ke* comprise only a small fraction of the occurrences of most of the nouns associated with *ke* (of around 600 different Hebr. terms with *ke* something more than half occur only once in this combination), some words, e.g., *môš* “chaff,” apparently specialize in usage in the simile. The proportion of designations for animals is also somewhat above average. Statistically, following *šô<sup>h</sup>n* in animal similes are: → *š<sup>h</sup>aryeh* “lion” (16x, incl. 1x Aram.; also other designations for lions, e.g., *k<sup>e</sup>pîr* 9x, *lābî<sup>h</sup>* 6x, *šahal* 3x, *gôr* 1x), *nešer* “eagle, vulture” (12x), *šippôr* “bird” (10x), *sûs* “horse” and *yônâ* “dove” (9x), and *šayyāl(â)* “deer” (8x). Of course, these figures are true

only for the similes with *ke*; indirect similes and metaphorical comparisons cannot be included here.

The most frequent forms with suf. per. prons. (*kā-*, *k<sup>e</sup>mô-*, *kāmô-*, something over 100x) are *kāmôkā* “like you” (31x), *kāmôhû* “like him” (24x), and *kāmônî* “like me” (17x). Finally, *ke* with proper names occurs about 60x. Comparison is most often made to David (9x), the Anakim and Daniel (3x each), all other PNs (even Moses and Job), only once each. The place-names Lebanon and Sodom (4x each), Gomorrah and Shiloh (2x each) are worthy of mention (all others, even Jerusalem, e.g., only once). On the divine designations, see 4b.

4. (a) In theological contexts, *dmh* (*d<sup>e</sup>mût*) and synonyms function in hymnic statements concerning Yahweh’s incomparability (cf. C. J. Labuschagne, *Incomparability of Yahweh in the OT* [1966], 28–30). In addition to Psa 89:7, “For who in the clouds compares to Yahweh (*ʿrk l<sup>e</sup>*), is like Yahweh [*dmh qal*] among the divine beings?” (cf. Psa 40:6, “Nothing is to be compared to you [*ʿrk ʿel*]”), a few passages from Deutero-Isa may be cited here: Isa 40:18, “To whom will you compare God (*dmh pi.*) and what will you set beside him (*ʿrk*) as a likeness (*d<sup>e</sup>mût*)?”; 40:25, “To whom will you liken me (*dmh pi.*), that I should be like him (*šwh qal*)?”; 46:5, “To whom will you liken me (*dmh pi.*), to whom compare me (*šwh hi.*)? To whom will you equate me (*mšl hi.*), that we should be alike (*dmh qal*)?” In each case, the context indicates that Yahweh’s incomparability with respect to the impotent gods is intended, his claim to uniqueness, in contrast perhaps to frequent similar statements in Bab. texts (with *maḥāru* and *šānānu* “to equal”; cf. Labuschagne, op. cit. 31–57) that hyperbolically praise first one, then another, god (cf. J. Hehn, *Die biblische und die babylonische Gottesidee* [1913], 99). Consequently, any other power’s claim to equality with Yahweh is harshly contested; cf. Isa 14:14, where the hubris of the king of Babel is characterized in mythical terms: “I will ascend above the clouds, I will become like (*dmh hitp.*) the Most High.”

Concerning humanity’s resemblance to God, manifest in dominion over the animal world (Gen 1:26f.; cf. 5:1, 3; Psa 8:6–9), but which goes back to unique concepts, comparison should be made to → *šelem*, with which *d<sup>e</sup>mût*, which interprets this term (combined with *be* or *ke*), seems to be rather interchangeable.

(b) Statements concerning God’s incomparability composed with the particle of comparison *ke* (Labuschagne, op. cit. 8–29) divide essentially into two groups, both with formal pars. in daily language: negated nom. clauses of the form *ʿên . . . ke . . .* “there is none . . . like . . .” (Exod 8:6; 9:14; Deut 33:26; 1 Sam 2:2[bis]; 2 Sam 7:22 = 1 Chron 17:20; 1 Kgs 8:23

= 2 Chron 6:14; Jer 10:6f.; Psa 86:8; cf. Isa 46:9, with the negation  $\neg$ epes ) and rhetorical questions with an implied negation  $m\hat{i}k^e$ ... “who is like . . . ?” (Exod 15:11[bis]; Isa 44:7; 49:19 = 50:44; Mic 7:18; Psa 35:10; 71:19; 77:14; 89:9; 113:5; cf. Deut 4:7). The sentence names  $m\hat{i}k\bar{a}y\hat{a}(h\hat{u})$ ,  $m\hat{i}k\bar{a}y^eh\hat{u}$ ,  $m\hat{i}k\hat{a}(h\hat{u})$ ,  $m\hat{i}k\bar{a}^{\neg}el$  (“Who is like Yahweh/God”) also belong in the latter category (cf. *IP* 144; Labuschagne, op. cit. 21f., 126–29; contra B. Hartmann, *ZDMG* 110 [1961]: 234).

Designations used for God in this context are: *yhwh* (Exod 8:6; Deut 4:7; 1 Sam 2:2; Psa 113:5; associated with *ke* only 4x),  $\neg loh\hat{i}m$  (1 Sam 2:2; Psa 77:14;  $k\bar{e}^{\neg}loh\hat{i}m$  otherwise only in Gen 3:5 on the lips of the serpent: “That you will become like God”; Zech 12:8 in a hyperbolic promise: “The one who stumbles will be like David, and the house of David like a deity”; 2 Chron 32:17 of the gods of other peoples),  $\neg el$  (Deut 33:26; otherwise only in Job 40:9, “Is your arm like the arm of God?”; with  $k^cm\hat{o}$ , Job 19:22, “Why do you persecute me like God?”), also  $k\bar{a}m\hat{o}n\hat{i}$  “like me” (Exod 9:14; Isa 44:7; 46:9; Jer 49:19 = 50:44),  $k\bar{a}m\hat{o}k\bar{a}$  “like you” (Exod 15:11[bis]; 2 Sam 7:22 = 1 Chron 17:20; 1 Kgs 8:23 = 2 Chron 6:14; Jer 10:6f.; Mic 7:18; Psa 35:10; 71:19; 86:8; 89:9), and  $k\bar{a}m\hat{o}h\hat{u}$  “like him” (Job 36:22; cf. Job 40:9, “Do you have the voice of the thunder like him?”).

The statement of incomparability, which is hymnic in the broader sense, is always established, whether by the context, by a direct formulation, or, indeed chiefly, by the mighty intervention of Yahweh in history as a just deliverer (not accidentally also in the plague and exodus tradition; in the individual lament Psa 35; 71; 77; 86 as a motivation for the individual sufferer’s cry for help), but also by his creative power (in Deutero-Isa closely associated with deliverance). The following are special formulations: in the Song of Hannah, 1 Sam 2:2, “No one is holy ( $q\bar{a}d\hat{o}s$ ) like Yahweh,” and in the speech of Elihu, Job 36:22, “Who is a teacher ( $m\hat{o}r\hat{e}h$ ) like him?” (on the content and origin of these statements, cf. the extensive treatment of Labuschagne, op. cit. 64–153).

5. Formulae that state God’s incomparability in an OT manner also occur at Qumran (1QH 7:28; 1QM 10:8; 13:13).

The LXX primarily uses *homoios* and its derivatives, less frequently *isos* (only in 2 Macc 9:12 *isotheos* of Antiochus, in a negated usage); usually *homoio\text{ma}* stands for  $d^cm\hat{u}t$ , less frequently *homoio\text{sis}*, once each *homoios* (Isa 13:4), *idea* (Gen 5:3), and *eik\text{on}* (Gen 5:1).

On the LXX and the NT, where 1 John 3:2 constitutes the eschatological counterpart to Gen 3:5 and where Jesus’ equality with God (Phil 2:6) appears as a new theme, cf. G. St\text{ah}lin, “\text{ί}σο\text{ς},” *TDNT* 3:343–355; J. Schneider, “\text{ὅ}μοιο\text{ς},” *TDNT* 5:186–199.

דַּעַת *daʿat* **knowledge** → יָדַע *ydʿ*

דֶּרֶךְ *derek* **way**

S 1870; BDB 202b; HALOT 1:231b; TDOT 3:270–93; TWOT 453a; NIDOTTE 2006

אֶרַח *ʾōrah* **way**

S 734; BDB 73a; HALOT 1:86b; TWOT 161a; NIDOTTE 784

1. The root *drk* “to tread (with the feet)” is common Sem.; it exhibits numerous, sometimes phonetically or semantically divergent, manifestations (HAL 221f.; P. Nober, *Bib* 40 [1959]: 196\*f.).

Akk. *daraggu* “path/trail” (AHW 163a; CAD D:108b) is a rare synonym for the more common *urḫu* or *ḥarrānu*, cf. also *darāku* “to follow after(?)” and *darku* “following” (AHw 163a, 164a).

The Ug. fem. subst. *drkt* “dominion, might” (WUS no. 792; UT no. 703; CML 1 154; CML 2 145) parallels *mlk* “kingdom” (KTU 1.108.6f.: *bʿlt mlk* par. *bʿlt drkt* of Anat, *Ugaritica* 5:551); see 3c.

The root seems to occur in Phoen.-Pun. and in Old Aram. only verbally: “to tread upon, enter, draw (a bow)” (DISO 60).

The Hebr. noun *derek* “way” (*qitl* formation? cf. Brønno 134) can be construed as both masc. and fem. (K. Albrecht, ZAW 16 [1896]: 54f.). In addition to the noun and the verb (qal and hi.), the derived subst. *midrāk* “footprint, foot breadth” (only Deut 2:5) also occurs.

2. The noun *derek* is attested in the OT 706x, predominantly in the sg. (543x; counting Prov 21:29 Q as sg., Jer 17:10 Q as pl.). It may be that the two duals in Prov 28:6, 18 should be read as pl. (cf. e.g., F. Nötscher, *Gotteswege und Menschenwege in der Bibel und in Qumran* [1958], 56).

3. (a) The meaning of *derek* developed in many ways in both spatial-geographical as well as metaphorical-figurative senses from the basic meaning “(traveled and thus established) way.” Only the most important of the numerous uses of the word will be treated here (in addition to the lexicons, see the extensive presentation of Nötscher, *op. cit.* 17–69).

Among the numerous spatial-geographical “ways,” the OT knows those specifically designated because they are highly traveled highways:

the “king’s highway” in the Transjordan, leading from Damascus to Aqaba (Num 20:17; 21:22; cf. *HAL* 222b; Y. Aharoni, *Land of the Bible* [19682], 49–52), the “highway of the tent dwellers” (Judg 8:11), and the “highway of the sea,” leading to the sea or running in the region of the sea (Isa 8:23; cf. Aharoni, op. cit. 41–49).

The concrete meaning “way” evolves imperceptibly into the meaning “movement on the way”: A person who travels on a street goes “his way,” in order to reach a goal (e.g., Gen 24:27, 48; 32:2, etc., frequently combined with → *hlk* “to go”; *badderek* = “underway”).

The action of travel is even more strongly emphasized when *derek* means “journey,” “undertaking,” or even “military campaign” (Gen 42:25; 45:21, 23; 1 Sam 21:6 *derek ḥōl* “profane undertaking”; cf. also Akk. *ḥarrānu* “way, journey, caravan, campaign,” *AHw* 326f.; *CAD* H:106–13).

From the vantage point of the goal, “way” acquires the meaning “way that has been traveled, stretch of the way (between two points)” (cf. e.g., Gen 31:23 “seven days’ journey long”).

A similar idea lies behind the use of *derek* to indicate the direction of a movement, whether it is undertaken or only described. Direction can be indicated by the four points of the compass (Deut 11:30, etc., esp. in the description of the new temple in Ezek 40:6ff.) or by regions and locales (Gen 16:7, etc.).

(b) In a fig. meaning, the life of a person can be described as the “way” on which one finds oneself (cf. A. Gros, *Le thème de la route dans la Bible* [1957], 17–30); often, then, one may translate “conduct, behavior” (e.g., Gen 6:12). This terminology acquired special significance in wisdom literature (Prov 1:15, etc.) and for the religious realm (see 4). If the goal of all human lives is in view, the “way” of all people, which leads to death, can be indicated (Josh 23:14; 1 Kgs 2:2; on Prov 14:12, cf. *HAL* 223a). In a rather general manner, *derek* indicates particular givens in human life or in nature, in the sense of “behavior, condition, practice, manner” (e.g., Prov 30:19f.; Gen 19:31, of the ways of the sexes toward one another; Gen 31:35, of the condition of the woman in the monthly cycle; cf. Gen 18:11 with *ʾōrah*; see 3d).

(c) Whether one can use Ug. *drkt* “dominion, might” to elucidate some passages in the OT must remain questionable. The passages adduced for this purpose (with *drk* qal: Num 24:17; with *derek*: Jer 3:13; Hos 10:13; Amos 8:14; Psa 67:3; 110:7; 119:37; 138:5; Job 26:14; 36:23; 40:19; Prov 8:22; 19:16; 31:3) are largely comprehensible even without this assumption or could be explained in some other manner.

The series of suggestions begins with Albright’s remark on Num 24:17; further passages were cited now and again by various authors; cf. W. F. Albright, *JBL* 63 (1944): 219; id., *SVT* 3 (1955): 7; id., *FS Robert* 23f.; P. Nober, *VD* 26 (1948): 351–53;

S. Bartina, *VD* 34 (1956): 202–10; J. B. Bauer, *VT* 8 (1958): 91f.; M. Dahood, *TS* 13 (1952): 593f.; 15 (1954): 627–31; id., *Bib* 33 (1952): 33; 38 (1957): 320; id., *PNSP* 40; id., *UHP* 55, etc.

The following authors have criticized this opinion: H. Zirker, *BZ* 2 (1958): 291–94; Nötscher, op. cit. 17f., 25f.; cf. further Rudolph, *KAT* 13/1, 206, on Hos 10:13; Fohrer, *KAT* 16, 522, on Job 40:19.

\*(d) Nötscher (op. cit. 12–17) treats semantically related substs. The following merit mention:

(1) *ʾōrah* “way” (57x, except for Gen 18:11 only in poetical texts, in 1/4 of the cases par. to *derek*; most frequent in Prov, 19x; also Psa 14x, Job 10x, Isa 8x, Gen and Judg 2x each, Joel and Mic 1x each; additionally *ʾḥ* “to wander, travel” 6x and *ʾōr<sup>ʿ</sup>ḥā* “caravan” 3x) and Bibl. Aram. *ʾrah* “way” (Dan 4:34; 5:23) with a range of meaning similar to *derek*; cf. Akk. *urḫu* and Aram. *ʾḥ/ʾorḥā* (*DISO* 24; *KBL* 1053b);

(2) *h<sup>ʾ</sup>līkâ* “way, lane; caravan, procession; activity” (6x; → *hlk*);

(3) *mesilla*® (27x) and *maslûl* (Isa 35:8) “(piled up) street” (*sll qal* “to pile up”);

(4) *ma<sup>ʿ</sup>gāl* “rut, track” (13x, in Prov 7x; from *ʿgālâ* “wagon”);

(5) *nāṭīb* (5x) and *n<sup>ʿ</sup>ṭībâ* (21x; almost always par. to *derek* or *ʾōrah* “path”; cf. Ug. *ntb* and *ntbt* “path,” *WUS* no. 1870; *UT* no. 1715);

(6) *š<sup>ʿ</sup>bîl* “path” (Jer 18:15; Psa 77:20; in each case par. to *derek*).

All these terms may also be used fig. or picturesquely.

(e) The verb *drk* qal always maintained the basic meaning “to tread” (obj.: land, Deut 1:36; way, Isa 59:8; waves, 1 Sam 5:5; etc.). The verb was occasionally specialized in two ways: the warrior “treads” his bow with his feet in order to bend it (Isa 5:28; 21:15, etc.; cf. *BHH* 1:264, 267), and the farmer “treads” the winepress in order to press grapes (e.g., Judg 9:27; cf. Dalman, *AuS* 4:364f.; on Mic 6:15, cf. Dalman, op. cit. 207).

*drk* hi. renders the causative meaning “to cause to tread, cause to travel” (Isa 11:15, etc.; with an elliptical obj., “feet” = “to tread down, step on” in Jer 51:33; Job 28:8; on Judg 20:43 cf. *HAL* 222a). “To cause to walk in a way” then becomes “to lead” (Prov 4:11, etc.).

4. (a) Religious language can also, at first, refer concretely to the way or journey of a god (1 Kgs 18:27), divine being (Gen 19:2), or Yahweh (Deut 1:33; Nah 1:3; cf. A. Kuschke, “Die Menschenwege und der Weg Gottes im AT,” *ST* 5 [1952]: 106–18; F. Nötscher, *Gotteswege und*

*Menschenwege in der Bibel und in Qumran* [1958], 23ff.). Here, however, the primary intention is a metaphorical reference to the behavior and volition of God (cf. Gros, op. cit. 30–40), who turns attention to the people but nevertheless transcends them (Isa 55:8f.; Job 34:27, etc.). The people and its members should walk in God's way, i.e., lead their lives in obedience to God (Exod 32:8, etc.), to which end God's commandments serve as guideposts (e.g., Deut 5:33). To diverge from them (Deut 11:28, etc.) is to pervert God's ways (Num 22:32) and to go in other ways (one's own, Isa 53:6; the sinner's, Psa 1:1; strange gods', Jer 10:2). This behavior by Israel's kings, who do not walk in David's, and thus Yahweh's, way (thus in 1 Kgs 3:14), but in that of Jeroboam (1 Kgs 15:26, etc.), is esp. condemned.

(b) The verb *drk qal* can describe God's movement: on the heights of the earth (Amos 4:13; Mic 1:3; cf. U. Devescovi, *RivB* 9 [1961]: 235–37), on the heights of the sea (Job 9:8; cf. Hab 3:15). The bending of the bow is mentioned in Zech 9:13; Lam 2:4; 3:12 (cf. Psa 58:8); the treading of the winepress in Isa 63:3(bis) and Lam 1:15.

The hi. describes Yahweh's guidance of the pious, etc. (Isa 48:17; Psa 25:5; etc.; Devescovi, op. cit. 237–42).

5. In the community of Qumran the nuance of meaning indicated in 4a is particularly represented, a phenomenon that reflects the character of the texts. In essence no new viewpoints are added; cf. Nötscher, op. cit. 72–96.

Although not explicit in the formulation of the NT (Matt 7:13f.), the dualism of the two ways is already present and prefigured in essence; cf. B. Couroyer, "Le chemin de vie en Egypte et en Israël," *RB* 56 (1949): 412–32; Nötscher, op. cit. 64–69; Michaelis, "ὁδός," *TDNT* 5:53–55.

On "way" in the NT and in early Christianity, cf. W. Michaelis, op. cit. 42–118; Nötscher, op. cit. 97–122; A. Gros, *Je suis la route* (1961); E. Repo, *Der "Weg" als Selbstbezeichnung des Urchristentums* (1964).

G. Sauer

## דַּרַשׁ *drš* to inquire after

S 1875; BDB 205b; *HALOT* 1:233a; *TDOT* 3:293–307; *TWOT* 455; *NIDOTTE* 2011

1. *drš* is a WSem. verb, also attested outside Hebr. in Ug., Aram., Eth., and Arab.

Syr. *drš* “to dispute,” or the like, apparently a Hebr. loanword, has assimilated to a word for “to tread” (cf. Hebr. and Aram. *drk*; Mid. Hebr., Jew. Aram. *drs*, Arab. *drs* “to thresh,” Akk. *darāsu* “to force out,” *AHW* 163b), but is nevertheless to be distinguished from it (cf. *NB* 38n.4). Concerning a questionable occurrence of Akk. *darāšu* “to attempt(?)” in hymnic-epic language, cf. W. von Soden, *ZA* 49 (1949): 175f.; *AHW* 163b.

2. The OT has *drš* only in the Hebr. portions: qal 155x (Chron 40x), ni. 9x. The late verbal abstract *midrāš* “exposition” (Aram. pe. inf., GKC §85h) occurs only twice (2 Chron 13:22; 24:27; cf. Sir 51:23).

3. (a) The range of profane usage is rather limited, esp. in comparison to the semantically related → *bqš* pi., and makes up only about 1/4 of the total occurrences. But even the profane usage of *drš* is clearly distinguished from that of *bqš* pi. There are only isolated examples of *drš* meaning “to search for someone or something” (Deut 22:2; Job 10:6 with *bqš* as a preceding par.; 39:8 with *ʾaḥar*). The usage in Psa 109:10 “to seek (futilely), beg,” paralleling → *šʾl* pi., is semantically related (cf., nevertheless, *BHS*).

(b) In contrast to *bqš* pi., *drš* belongs primarily to the cognitive sphere: “to inquire after something, ask about something, investigate.” One examines not the location of a thing or event but its nature. In this sense, the verb can be grammatically constructed in a variety of ways: abs. (Deut 13:15; 17:4; 19:18; Judg 6:29; Isa 34:16; Eccl 1:13), with a direct obj. (Lev 10:16; Ezra 10:16 txt em), or with the preps. *ʾel*, *b<sup>e</sup>*, *lc*, and *ʿal*.

The verbal abstract *midrāš* “exposition” is also rooted in this sphere of meaning (cf. Rudolph, *HAT* 21, 238; G. Rinaldi, *Bib* 40 [1959]: 277).

(c) A shift of meaning toward the emotive occurs in an even greater degree for *drš* in the meaning “to strive after something, aspire” than for *bqš* pi. Objects of the verb are mostly qualitative-ideal values, primarily of a positive nature: “justice” (Isa 1:17; 16:5), “good” (Amos 5:14; Esth 10:3), “Yahweh’s works” (Psa 111:2), but also “evil” (Prov 11:27). *drš* occurs in the expression “to strive for someone’s hurt (*rāʿâ*)” only in Psa 38:13 (*drš* here parallels *bqš* pi., which precedes it and apparently determines its meaning) and Prov 11:27 (cf. Jer 38:4). The contrasting “to seek someone’s well-being (*šālôm*)” is attested 4x (Deut 23:7; Jer 29:7; 38:4; Ezra 9:12; cf. Esth 10:3).

In contrast to *bqš* pi., *drš* never governs a subsequent inf.

Emotional coloration is even more pronounced when *drš* means “to take care of something, take charge of,” a meaning that belongs first to theological language, but that also has nontheological application (Jer 30:14; Psa 142:5; Prov 31:13; 1 Chron 13:3).

(d) *drš* in the sense of “to demand, require” belongs to theological language. The only exception is 2 Chron 24:6 (*drš ʿal*), the only passage where a human being makes demands (C. Westermann, “Die Begriffe für Fragen und Suchen im AT,” *KerD* 6 [1960]: 16).

4. (a) Most occurrences of *drš* are by far theological and cultic. In the sense of “to demand, require,” the verb almost exclusively has Yahweh as subj. Objects are “blood” (Gen 9:5a; Ezek 33:6; Psa 9:13; ni. Gen 42:22), “soul” (Gen 9:5b), “a vow” (Deut 23:22), “my sheep” (Ezek 34:10), and “sacrifice” (Ezek 20:40); also Mic 6:8 “what Yahweh requires of you.” In the remaining pertinent passages, the obj. is godless behavior so that the verb assumes the sense “to punish” (Deut 18:19; Psa 10:4, 15,; 2 Chron 24:22).

(b) A series of narratives use *drš yhwh* as a fixed expression for the prophetic inquiry of Yahweh (according to 1 Sam 9:9, originally through a seer or man of God) in a crisis situation, temporally limited to the monarchic period. Here, too, the inquiry does not primarily seek information, but is intended to bring about the removal of the inquirer’s distress. Only crises of a political order are related (even when personal distress is at issue): (1) the endangerment of the dynasty by the illness of the king (2 Kgs 8:7–15) or of the crown prince (1 Kgs 14:1–6, 12–13a, 17, 18); cf. 2 Kgs 1:2ff.; 2 Chron 16:12; Gen 25:22; further, without *drš*, Isa 38 and 2 Kgs 5); (2) endangerment of the totality in the perils of war (1 Kgs 22 = 2 Chron 18; 2 Kgs 3; cf. Jer 21:1–10; 37:3–21) and in a threat from Yahweh’s wrath (2 Kgs 22 = 2 Chron 34). The narratives treated here belong to a broader group with the pattern: announcement through the word of the prophet—arrival of this word; i.e., the focal point is not the inquiry but the functioning of the prophetic word, which intervenes in history and, e.g., rejects and deposes kings (1 Kgs 14; 2 Kgs 1; 8). Ezek 14:1–11; 20:1–3 bring this possibility for inquiry to an end, because it is in principle rejected by the prophet.

The process is always as follows: In a crisis situation, the king sends a messenger (always a high-ranking personality from those very near to the king) with a present to the prophet at home in order to inquire of him concerning the outcome of the crisis. The prophet answers with a word of God. The whole process transpires *outside* the cultic sphere (Westermann, op. cit. 18).

The inquirer is an individual, in the transmitted narratives usually the king, with the only exceptions being the matriarch Rebekah (Gen 25:22), the elders (Ezek 14; 20), and “someone” in 1 Sam 9:9. Yahweh is always the acc. obj. (*drš ʾet-yhwh*), in 1 Kgs 22:5 = 2 Chron 18:4 it is modified *drš ʾet-d<sup>o</sup>bar yhwh. mēʾittô* “from him,” referring to the prophetic mediator, usually follows. The use of the prep. *min* indicates that the prophet is seen only as the mediator of the word that proceeds from God, never as the

instrument of the inquirer. The question concerning the outcome of the crisis follows. But this question “implies supplication . . . to God” (Westermann, op. cit. 18) that he might transform the crisis. In Jer 37:3, 7 the prophet is expressly requested to intercede (cf. Ezek 36:37, “I will allow myself to be entreated for [le] Israel”). The institution of inquiry may have been related to the intercessory office of the prophet (Westermann, op. cit. 21). Presumably, inquiry of God through a man of God originally occurred because of personal crises of individuals and was only later expanded to include community crises (Westermann, op. cit. 28). The gloss in 1 Sam 9:9 supports this supposition, even if it is a late reminiscence.

1 Kgs 22 associates inquiry by means of a prophet with elements of the → *šʾl* inquiry via the lot, known esp. in the context of holy war. The narrative in 2 Kgs 3 is similar, apparently composed in literary dependence upon 1 Kgs 22 (Westermann, op. cit. 19); it associates the threat posed by enemy superiority with a natural crisis (the troops’ lack of water). Accordingly, there is a two-part question and a two-part prophetic answer. The *šʾl* inquiry occurs through the priestly lot. It is attested only for the premonarchial period. Its gradual dissolution, which led to its disappearance after the establishment of the Davidic monarchy, may be clearly followed in Sam (Westermann, op. cit. 10–13).

Otherwise, the institution of prophetic inquiry of Yahweh is presumably referred to in the accusation in Isa 31:1 (cf. 30:2 with *šʾl*) and in the warning in Amos 5:4; i.e., “Here institution stood against institution: Amos opposed the appeal to Yahweh at the cultic site with the appeal to Yahweh that is possible only through a prophet” (Westermann, op. cit. 22); see further Isa 9:12; Jer 10:21; Hos 10:12.

Exod 18:15 refers presumably to the same process as Deut 17:9, namely the procurement of a divine decision in a difficult legal case.

(c) *drš* is used with *be* in reference to the interrogation of a strange god, Baal-zebul, in 2 Kgs 1:2f., 6, 16, perhaps in order to direct attention to the frequent practice in polytheism of calling upon a lesser deity in prayer in order that this deity may intercede for the supplicant with a higher deity or even with the high god. The usage in 1 Sam 28:7, “I will inquire through (*be*) her (i.e., the spiritual medium),” also supports this interpretation. Two apparent exceptions are qualified by the polemical antithesis to the inquiry of strange gods: in the gloss 2 Kgs 1:16 “to inquire by the word of Yahweh,” and Ezek 14:7, where an idolatrous Israelite has the gall to approach the prophet in order to inquire of Yahweh in the same manner as one of his idols.

(d) If a ghost is the obj. of *drš*, the construction *drš ʿel* is used in the sense of “to turn to” (Deut 18:11; Isa 8:19; 19:3; cf. 1 Chron 10:13), as *drš ʿel* with a person (Isa 11:10, the shoot of Jesse) or a place (Deut 12:5, the

cultic site chosen by Yahweh) as obj. indicates. It is revealing in both passages that the approach involves the journey to the place on a pilgrimage. This observation suggests a conclusion concerning the original sense of *drš ʿel hāʾôb*: one must travel to the ancestral cultic site or the ancestral burial place in order to interrogate the dead.

(e) The last two attempts to inquire of Yahweh (Ezek 14; 20; certainly rejected by the prophet) belong in the early exilic period. With the cessation of the pre-exilic institution of inquiry, a far-reaching evolution of meaning transpired. *drš yhw* acquired the general meaning “to have recourse to Yahweh” and soon no longer indicated a concrete action but the habit of the pious.

One may explain this evolution of meaning primarily on two bases. First, in ancient times prophetic inquiry of Yahweh belonged directly to the lament of the supplicant in distress (see 4b). After one component, inquiry via a prophet, dropped out of the process as a whole, the term for the whole became the designation for the remainder, namely the lament. *drš yhw* as “turning to Yahweh in distress” was now only possible through the lament. Second, the lament climaxed in the questions directed to God: “Why have you . . . ?” and “Yet how long will you . . . ?” The commonality here is not only the interrogation of Yahweh but also the question once addressed to God by the prophet. “Will I recover from this illness?” (2 Kgs 8:8) is very near in intention to the lamenter’s question “Yet how long . . . ?”

Now, in a few passages, *drš* indicates the process in which an individual turns to God in lament (Psa 22:27; 34:5; 69:33; 77:3; Job 5:8; cf. Lam 3:25; Psa 9:11; 34:11). These passages all stem from the late period when this pre-exilic institution was hardly still in existence; but the designation had survived. In a late, diminished usage, *drš* twice means only “to call to God” (1 Chron 21:30, by David; Psa 105:4 = 1 Chron 16:11, in the call to praise).

In other passages *drš* also indicates the process of communal lament. Isa 58:2 paraphrases the individual elements of the communal lament that v 3a quotes directly: v 2a “they desire knowledge of my ways” = “How long will you yet be angry?”; v 2b “like a nation that practices justice . . .” = confession of innocence; v 2c “they ask me for righteous judgments” = “Why have you brought this evil upon us?”; v 2c “they desire God’s nearness” = “Why do you hide your countenance?” The whole process is called *drš yhw* in v 2a. Psa 78:34 “When he slaughtered them, they asked (*drš*) after him” is explicated in v 35 through the citation of the confession of confidence from the communal lament. 2 Chron 20:3 is a royal call to communal lament. Cf. also Jer 29:12f.; Isa 55:6; 2 Chron 15:2, 4 (*drš* = *bqš*).

Lament rituals dominated worship in the exilic and post-exilic eras, at least until the rebuilding of the temple (cf. Lam; Zech 7:3; 8:19; Isa 58:2), where a confession of guilt such as Psa 79:8 (cf. Psa 106; Isa 63:10, 17) could even respond to pre-exilic prophecy of judgment (cf. the tendency of the Dtr history; see H. W. Wolff, “Kerygma of the Deuteronomistic Historical Work,” in W. Brueggemann and Wolff, *Vitality of Old Testament Traditions* [1982], 83–100). Thus, “to abide by the community and its worship” could become synonymous with “to abide by Yahweh and his regulations.” This evolution is completed in Dtr theology, where repentance and new observance of the commandments on the part of people are prerequisites for God’s attention to laments (cf. e.g., 1 Sam 7:3–4 before vv 5ff.; furthermore, Deut 4:29; Isa 55:6f.; 58; Jer 29:13; 2 Chron 15:2, 4). “Here, the one-time procedure occasioned by a particular circumstance has become an attitude, a habit . . . ‘to turn to God’ has become ‘to abide by God’” (Westermann, *op. cit.* 24). “This abiding by God is an important, characteristic designation of relationship to God from the Deuteronomistic era on to the time of the Chronicler. It has roughly the same meaning in the OT as the NT and then Christian ‘believing in God’” (*ibid.* 28).

*drš yhw* became such a comprehensive designation for Yahweh worship that it often stands as the antithesis of idolatry (Isa 65:1, 10; Jer 8:2; Zeph 1:6; Ezra 6:21; 2 Chron 15:12f.; 17:3f.; 34:3; cf. Psa 24:6; Ezra 4:2; 2 Chron 25:15, 20). Consequently, it occurs regularly in the evaluations of kings in Chron (2 Chron 12:14; 14:3; 17:4; 19:3; 22:9; 26:5; 30:19). But, at the same time, *drš yhw* became synonymous with “to fulfill God’s will” or “to keep the commandments” (1 Chron 22:19; 2 Chron 14:6a; 31:21; likewise Psa 14:2 = 53:5; 119:2, 10); the lament no longer stands in the background here—only the conditional promise of blessing.

Because the proclamation of the commandments and the conditional promise of blessing was increasingly individualized, it became possible in Psa 34 for not only the concrete warning in v 6 to follow the report of deliverance in the individual thanksgiving song (v 5), but also a general promise of salvation for the individual who abides by God (vv 9b–11) and an admonition to keep the commandments (vv 12ff.). As with the communal lament above, here too the possibility of being heard and delivered depends upon the supplicant’s fulfillment of the commandments.

In a few late passages even the commandments could be the obj. of *drš* (Psa 119:45, 155; 1 Chron 28:8), in the late gloss Isa 34:16 even “the scriptures.” Cf. here also *midrāš* “exposition, edifying paraphrase” (see 2, 3b).

The use of preps. varies without pattern in late texts. Thus *drš yhw* (2 Chron 34:21) stands alongside *drš byhw* (2 Chron 34:26; 1 Chron 10:14) and *drš lē’lōhîm* (2

Chron 34:3; *lyhwh*, 2 Chron 20:3) or Job 5:8 *drš ʿel-ʿēl*.

5. In the available Qumran texts *drš* appears about 40x (according to Kuhn, *Konk.* 52f.). As in the OT, “to seek God” is a general designation of reverence for God in many passages.

Above all, however, the cognitive sense of *drš* is richly attested and expanded to new realms of meaning, esp. in theological language: “to study the commandments,” “to study the law.” Esp. noteworthy are a few usually fixed expressions: *dwršhtwrh* “student of the law” (CD 6:7; 7:18; 4QFlor 1:11); also *dwršy ḥlqwt* “producers of smooth interpretations” (1QH 2:32, etc.), a formula with which the Qumran community described the Pharisees. The opposing position is represented by the Talmudic phrase *dôr<sup>e</sup>šē ḥ<sup>a</sup>mûrôt* “producers of strict interpretations,” the pharisaic designation for the Qumran sectarians (cf. C. Roth, *RQ* 2 [1960]: 261–65). Concerning the usage of *drš* in Talmud and Midrash, cf. further L. Margoulies, *Leshonenu* 20 (1956): 50ff. (Hebr.).

On “to seek” in the NT, cf. H. Greeven, “ζητέω,” *TDNT* 2:892–96.

G. Gerleman (1–4a, 5)/E. Ruprecht (4b–e)

## הֶבֶל *hebel* **breath**

S 1892; BDB 210b; *HALOT* 1:236a; *TDOT* 3:313–20; *TWOT* 463a; *NIDOTTE* 2039

1. Words related to *hebel* “breath” occur in Aram. and in SSem. (cf. *HAL* 227a). The verb *hbl* qal “to become/be involved with nothing” and hi. “to make nothing, delude” are denominative.

This word is apparently related to the name *hebel* (= Abel; cf. the pausal form in Gen 4:2a), which may be an appellative.

2. The noun occurs 73x, the verb 5x (qal 4x, hi. 1x). The noun appears 41x in Eccl alone; a concentration is also evident in the language of the Psa (9x; also Isa 49:4; Jer 10:3, 8, 15; 14:22; 16:19; 51:18; Job 7:16). A group of 6 passages belong to texts influenced by Dtr (see 4a).

*hebel* usually occurs in the abs. st. When used like a genuine noun it usually has the meaning “idol” (see 3c). In the cs. relationship it serves as governing noun (on the form *h<sup>a</sup>bēl* see Wagner 134) mostly to intensify the concept (*h<sup>a</sup>bēl h<sup>a</sup>bālîm*, Eccl 1:2[bis]; 12:8); as the governed noun it should be translated adj. In addition there is an adv. use (e.g., Job 9:29 “uselessly”). The frequent construction with a bipartite nom. clause (about 30x) is noteworthy.

3. (a) The basic meaning of *hebel* is “wind, breath” (only Isa 57:13

par. *rûah* “wind”); this is adduced in comparisons for useless and transitory things (Psa 62:12; 144:4; Prov 21:6; cf. Akk. *šāru*, J. Hehn, *ZAW* 43 [1925]: 222f.; O. Loretz, *Qohelet und der Alte Orient* [1964], 127f.).

(b) The basic meaning totally disappears in the largest category of occurrences (nom. clauses); here *hebel* is simply a negative term characterizing human experiences and basic qualities. The common translation “nothingness, nothing” is often too general. The precise negative connotation intended results only from the context: the scale reaches from “unstable” (par. *kāzāb* “deceit,” Psa 62:10), “transitory” (par. *šēl* “shadow” in Psa 144:4; cf. 39:7), and “useless, vain” (par. *ʾēn yitrôn* “no gain,” Eccl 2:11; *rîq* “empty, nothing,” Isa 30:7; 49:4) to “senseless, nonsense, bad” (par. *hʾîrāʿ* “evil plague,” Eccl 6:2; *rāʿabbā* “great evil,” Eccl 2:21).

(c) The notion of uselessness gained separate status as a designation for other gods. Here *hebel* means idols (→ *ʾîl* 4); cf. the formulaic usages “to provoke Yahweh with idols” (Deut 32:31; 1 Kgs 16:13, 26; Jer 8:19) and “to follow after the idols” (2 Kgs 17:15; Jer 2:5).

4. *hebel* occurs predominantly in three areas:

(a) As a designation for other gods in the Dtr accusation against Israel’s apostasy (Deut 32:31; 1 Kgs 16:13, 26; 2 Kgs 17:15; Jer 2:5; 8:19) and as a contrasting motif in the confession of confidence: the worshiper relies upon Yahweh, not upon the idols (Psa 31:7; Jer 14:22; 16:19; Jonah 2:9; see also the late idol polemic in Jer 10:3, 8, 15).

(b) *hebel* occurs as a disqualifying term in the individual lament. The supplicant laments the uselessness of his effort (Isa 49:4) and the transience of his life (Job 7:16); both refer to human fate per se in a generalization typical for the lament (Psa 39:6f., 12). This limited humanity is occasionally juxtaposed with the unlimited goodness and power of God (Psa 62:10; 94:11; 144:4).

(c) The actual focus of the exceedingly concentrated use of *hebel* in Eccl is judgment (nom. clause). On the basis of trial, observation, and reflection, Qohelet repeatedly comes to an annihilating judgment, mostly concerning very concrete things (*[gam-] zeh hebel* “[even] this is nothing,” Eccl 2:15, 19, 21, 23, 26; 4:4, 8, 16; 5:9; 6:2, 9; 7:6; 8:10, 14; cf. 2:1; 11:10); it more or less broadens only rarely (*hakkōl hebel* “all is nothing,” 2:11, 17; 3:19; cf. 11:8). The summary motto of 1:2 and 12:8 is to be attributed to a redactor (F. Ellermeier, *Qohelet* [1967], 1/1:94ff.). For Qohelet, *hebel* refers not simply to everything, but to three specific complexes: (1) his efforts, indeed, human work in general, are unproductive, useless, and vain (2:1, 11, 19, 21, 23; 4:4, 8; 5:9; 6:2); here *hebel* is an exact antonym for *yitrôn* “use” (cf. 2:11; so also Ellermeier, op. cit. 38). Work is senseless, because God capriciously allows one to enjoy the fruits of one’s work but denies them to another (2:24–26); finally,

however, because humans are mortal and must leave their possessions to another (2:18–21; 6:1f.). (2) The wisdom mastery of life, which seeks to order human behavior and actions, is senseless, for, as it happens, the righteous have the fate of the godless (8:10–14); in the final analysis, the wise die like the foolish (2:15; 6:7–9). (3) Behind these judgments stands Qohelet’s insight into human transience (6:12; 11:8, 10; cf. 7:15; 9:9), which makes humanity equal to all creation (3:19). In the light of the impending fate of death, all the future (11:8), all events whatsoever, are incomprehensible and senseless (1:14; 2:17). God is certainly not subject to the *hebel* verdict, but neither is he a savior from that verdict (thus Hertzberg, KAT 17/4, 222ff.; Loretz, op. cit. 234ff.); rather, in his incomprehensible actions he is the final cause for human finitude.

5. The LXX translates *hebel* primarily with *mataiotēs, mataios*. Thus a moral element comes into play; the fallibility intended is no longer so much creaturely as ethical (cf. G. Bertram, ZAW 64 [1952]: 30–34). Qumran identifies transience with sinfulness even more directly (1QS 5:19; 1QM 4:12; 6:6; 9:9; 11:9; 14:12). On the NT, see O. Bauernfeind, “μάταιος,” TDNT 4:519–24.

R. Albertz

## הדר *hādār* **splendor**

S 1926; BDB 214a; HALOT 1:240a; TDOT 3:335–41; TWOT 477b; NIDOTTE 2077

1. Extra-Hebr. words related to *hādār* “ornament, splendor, majesty” may be identified with certainty only in Aram.

On Ug. *hđrt* see 3b; on Old SArab. *hdr* “ornament(?)” cf. Conti Rossini 131b; on Eg. *hđrt* cf. H. Donner, ZAW 79 (1967): 331n.57.

A relationship to Hebr. *đr* (LS 172a; → *đaddîr*) or Arab. *hdr* “to effervesce” (GB 175a), which is sometimes posited, is rather doubtful.

The verbal forms are apparently denominatives from the subst. *hādār* (W. J. Gerber, *Die hebr. Verba denominativa* [1896], 163f.; BLA 273). In addition to *hādār* (in Dan 11:20 with a segholate cs. form *heder* instead of the more common *hadar*, cf. BL 552; HAL 230a), a fem. *h<sup>a</sup>dārâ* “finery, grandeur” occurs (see 3b); Bibl. Aram. has *hadar* “majesty” and *hdr* pa. “to glorify.”

Imp. Aram. has *hdr* “majesty” (Aḥ. 108) and *hdyr* “majestic” (Aḥ. 207; cf. *DISO* 63).

2. The root occurs 42x in the Hebr. OT (excl. *h<sup>a</sup>dûrîm* in Isa 45:2, where *h<sup>a</sup>rârîm* should be read according to 1QIsaa; cf. *HAL* 229b; contra e.g., Zorell 185a); it is represented 6x in Aram.

The verb appears 6x in Hebr., 4x in the qal and 1x each in the ni. and the hitp. (see 3c). The subst. *hādār* occurs 31x (incl. *heder* in Dan 11:20; pl. only in Psa 110:3), *h<sup>a</sup>dārâ* 5x. The word group occurs most often in the Psa (15x; Isa 8x; Prov 4x; Lev 3x); it is entirely absent from narrative texts.

Aram. occurrences are limited to Dan (noun and pa. 3x each).

3. (a) The subst. *hādār* characterizes nature’s grandeur (Lev 23:40; Isa 35:2a) and human beauty (Isa 53:2; Psa 8:6; Prov 20:29; 31:25). In reference to God, the declaration of beauty acquires the meaning “glory, grandeur, majesty” (cf. Isa 35:2b with v 2a; see 4). In the sense of “majesty,” *hādār* is also an attribute of the earthly king (Psa 21:6; 45:4, 5 [txt?]; Aram. Dan 4:27, 33; 5:18; cf. *h<sup>a</sup>dārâ* Prov 14:28). The pl. in Psa 110:3 may more likely refer to the royal finery (consisting of various ornamental pieces; cf. G. Widengren, *Sakrales Königtum im AT und im Judentum* [1955], 103n.22). *hādār* also pertains, however, to cities (Isa 5:14; Ezek 27:10; Lam 1:6) or a tribe (Deut 33:17). According to Dan 11:20, Israel is *heder malkût* “an ornament of the kingdom.”

Several passages describe God or a person as “clothed” with *hādār* (Yahweh, Psa 104:1; Job 40:10; housewife, Prov 31:25; Jerusalem, Ezek 16:14; qal ptcp. Isa 63:1).

Par. terms for *hādār* are → *hōd* “loftiness” (Psa 21:6; 45:4; 96:6; 104:1; 111:3; Job 40:10; 1 Chron 16:27), *kābōd* “glory” (→ *kbd*; Isa 35:2; Psa 8:6; 21:6; cf. Psa 145:5, 12), *paḥad* “terror” (Isa 2:10, 19, 21), → *kōaḥ* “might” (Psa 29:4), *ōz* “strength” (→ *zz*, Psa 96:6; Prov 31:25), *tip<sup>ʿ</sup>eret* “ornament” (→ *p<sup>ʿ</sup>r*, Psa 96:6; Prov 20:29), and *tō<sup>ʿ</sup>ar* “stateliness” (Isa 53:2). Other synonyms for *hādār* include *eder* (→ *addîr* 1), *gā<sup>ʿ</sup>ôn* (→ *g<sup>ʿ</sup>h*), *ḥemed* (5x, → *ḥmd*), and *s<sup>ʿ</sup>bî* “splendor” (18x, used in Dan 8:9; 11:16, 41, 45 for Jerusalem or Israel; cf. v 20).

In Aram. *ḥ<sup>ʿ</sup>sēn* “might” (Dan 4:27), *zîw* “splendor” (Dan 4:33), *malkû* “dominion,” *g<sup>ʿ</sup>bûrâ* “strength,” and *y<sup>ʿ</sup>qār* “honor” (Dan 5:18) accompany *hadar*.

(b) *h<sup>a</sup>dārâ* occurs only in the cs. state, 4x in the phrase *hadrat-qōdeš* (Psa 29:2; 96:9 = 1 Chron 16:29; 2 Chron 20:21), once in *hadrat-melek* (Prov 14:28). In the last passage, like *hādār* in corresponding contexts,

*h<sup>a</sup>dārâ* means “majesty, splendor, loftiness” in contrast to *m<sup>ç</sup>hittâ* “ruin, fall.” The other passages have been traditionally understood as “fall down before Yahweh in holy ornaments,” or the like. This interpretation should be maintained with H. Donner, *ZAW* 79 (1967): 331–33 (cf. too, however, A. Caquot, *Syria* 33 [1956]: 37–41; E. Vogt, *Bib* 41 [1960]: 24; W. H. Schmidt, *Königtum Gottes in Ugarit und Israel* [1966], 56) over against the translation “revelation, appearance” (F. M. Cross, *BASOR* 117 [1950]: 19–21; Kraus, *Psa*, CC, 1:344f.; *UT* no. 752; P. R. Ackroyd, *JTS* 17 [1966]: 393–96) on the basis of Ug. *h<sup>dr</sup>t* in *KTU* 1.14.III.51, which parallels *ḥlm* “dream” and could mean something like “vision, face”; the derivations in *UT* no. 752 and *WUS* no. 817 remain uncertain in any case.

(c) The *qal* verb means “to adorn someone’s appearance, honor someone” (Lev 19:32 “you should stand up in the presence of a gray head and honor the aged”). In juridical terminology it acquires the nuance “to give preference (in judgment).” Lev 19:15 demands impartial judgment: “You should not regard the person of the poor (*nš<sup>ç</sup>p<sup>ç</sup>nē-dāl*), nor favor the mighty (*h<sup>dr</sup>p<sup>ç</sup>nē gādól*).” The apodictic saying in Exod 23:3 is also usually emended as an apodosis (*BH* 3; *HAL* 230a; Exod 23:6 represents the protasis).

The Aram. *pa.* always means “to honor (God)” (par. *brk pa.* Dan 4:31; par. *rûm po.* 4:34; par. *šbh pa.* 4:31, 34; 5:23).

The *hitp.* refers to self-attributed honor (“before the king” Prov 25:6, par. to “to assume the place of the mighty.”) The *ni.* should be rendered “to come to be honored” or the like (Lam 5:12).

4. *hādār* plays a special role in Israel’s praise (Psa 96:6; 104:1; 111:3; 145:5, 12; 1 Chron 16:27) as an expression of God’s royalty (cf. H. Gross, *FS Junker* 96; H. Wildberger, *TZ* 21 [1965]: 481f.). Hymnic praise of Yahweh’s “beauty” (von Rad, *Theol.* 1:364–67) grows out of the experience of his historical deeds (Psa 111:3; 145:5, 12). The communal prayer (Psa 90:16) is based on it. The association of God’s splendor with his activity in history is broadened to include Yahweh’s glory revealed in his creation (Psa 104:1). Even when Israel speaks of God’s majesty as unwavering (Psa 96:6; 1 Chron 16:27), it means that which takes place at God’s impulse (Isa 35:2b; cf. 63:1). The “splendor of his majesty” is experienced even in Yahweh’s judgment (*h<sup>a</sup>dar g<sup>ç</sup>ōnô*, Isa 2:10, 19, 21; the combination of two synonymous words has superlative force, Joüon §141m).

Yahweh’s chosen, Israel’s king (Psa 21:6; 45:4f.; Prov 14:28), the pious (Psa 149:9; cf. Mic 2:9), Jerusalem (Ezek 16:14), and Zion (Lam 1:6), participate in his majesty. Israel also recognizes God’s grandeur in creation and consequently praises the creator (Psa 8:6). But Israel knows that it cannot obtain divine glory for itself (Job 40:10). Perfect beauty exists only

insofar as God grants *hādār* (Ezek 16:14).

5. The LXX renders the root *hdr* by some 20 different terms, most frequently by *doxa*, *megaloprepeia*, *euprepeia*, and *timē*. The influence of *hādār* is active in NT statements concerning the beauty of God (and of Jesus; cf. the use of Psa 8:6 in Heb 2:5–10); cf. G. Kittel and G. von Rad, “δοκέω,” *TDNT* 2:232–55; J. Schneider, “τιμή,” *TDNT* 8:169–80.

G. Wehmeier (1–3)/D. Vetter (4–5)

## הוֹד *hōd* **highness, majesty**

S 1935; BDB 217a; *HALOT* 1:241a; *TDOT* 3:352–56; *TWOT* 482a; *NIDOTTE* 2086

1. *hōd* “highness, majesty” occurs only in Hebr.

The etymological relationship to Arab. *ʿawada* “to be heavy,” WSem. *ydh* hi. “to praise,” or Arab. *nahuda* “to be beautiful, strong” is uncertain (GB 176b; KBL 227b, 364a; *HAL* 231a; Zorell 186a).

2. The subst. occurs 24x in the OT (Psa 8x, Job and 1 Chron 3x each, Zech and Dan 2x each, Num, Isa, Jer, Hos, Hab, and Prov 1x each).

3. The declaration “highness, majesty” obviously derives from the usage of the term as a royal predication (Jer 22:18; cf. Rudolph, *HAT* 12, 141f.; Psa 21:6; 45:4; Dan 11:21; 1 Chron 29:25; in Zech 6:13 of the priest-king). This derivation also stands in the foreground when *hōd* expresses God’s majesty (Hab 3:3; Psa 8:2; 148:13; Job 37:22). The expression also applies in isolated cases—in somewhat the sense of “splendor”—to people (individuals: Num 27:20; Prov 5:9; Dan 10:8; a nation: Hos 14:7), animals (Zech 10:3; Job 39:20), and plants (Hos 14:7). In Dan 10:8 *hōd* (like Aram. *zîw*, Dan 5:6, 9f.; 7:28) means the radiance of the face, “complexion”; by contrast, in Prov 5:9 the term does not refer to the external appearance but indicates “the product of the best years of life” (Gemser, *HAT* 16, 34). To a greater or lesser degree, the expression implies the experience of astonishment and joy in all passages.

On par. terms, see 4. In Dan 10:8 *mašḥêt* “ruin” is the opposite of *hōd*.

The weight of the term lies in theological usage. God’s *hōd* has been revealed to Israel in the deeds of the Lord of history and of creation. Israel magnifies Yahweh and acknowledges his majesty with the expression of

his *hōd*.

The confessional names (*hōd<sup>c</sup>yâ, hōd<sup>i</sup>yâ*, short form *hōd*) formed with *hōd* (or *hūd*) also express this position (IP 146; on <sup>ʾ</sup>*bîhūd, ʾhîhūd, ʾammîhūd, ʾēhūd* cf., however, Stamm, HEN 416a, 418a).

The word occurs in the description of God's immanence (Isa 30:30; Hab 3:3; cf. Job 37:22). It also reflects Israel's experience of God's majesty in the descriptive psalm of praise (Psa 111:3; 145:5), as well as its astonished perception of God's majesty in his creation (Psa 8:2; 104:1; 148:13). The same psalm motif (praise of the creator—praise of the Lord of history) determines the structure of Job 38–41; here praise takes the form of divine speech (cf. C. Westermann, *Structure of the Book of Job* [1981], 105–23; id., *Isa 40–66*, OTL, 154f., on Isa 44:24–28). *hōd* recurs in the development of both parts: in the praise of the creator (under the description of the frightful might of the horse, 39:20) and the praise of the judge (40:10). Israel can speak of Yahweh's dominion over the world only in praise of his majesty (Psa 96:6; 1 Chron 16:27; 29:11).

A king's *hōd* is a gift of Yahweh's own dignity (Isa 22:18; Zech 6:13; Psa 21:6; 45:4; Dan 11:21; 1 Chron 29:25; cf. Sir 10:5). According to P, Moses and Joshua also possess *hōd* (Num 27:20). The notion that Moses is to grant something of his *hōd* to Joshua with his commission, as previously a portion of Yahweh's *hōd* was granted to him, seems to underlie this statement. Moreover, the predicate applies in two metaphorical sayings to the people to whom God has devoted himself. Once, the Israel restored by Yahweh is compared with the "glory" of the fruitful olive tree (Hos 14:7); again, in the saving activity of Yahweh Judah assumes the role of the "glorious" war steed (Zech 10:3).

Combinations with similar terms illuminate the connotation of the term in reference to God's grandeur and majesty: *hōd* parallels *tehillā*® "glory," *nōgah* "radiance," and *ʿōz* "strength" in Hab 3:3f.; *zāhāb* "gold(en brilliance)" in Job 37:22 (perhaps to be read *zōhar* "brilliance" according to BH 3). In a series of five divine predications, *hōd* parallels *g<sup>c</sup>dūllā* "greatness," *g<sup>c</sup>bûrâ* "might," *tip<sup>c</sup>eret* "majesty," and *nēṣaḥ* "brilliance" in 1 Chron 29:11. The pair *hōd w<sup>c</sup>hādār* (→ *hādār*) describes Yahweh's royal radiance in Psa 96:6; 104:1; 111:3; 145:5 (*h<sup>a</sup>dar k<sup>b</sup>ôd hôdekā, → kbd*); 1 Chron 16:27; Job 40:10 (par. *gā<sup>c</sup>ôn wāgōbah, → g<sup>h</sup>, → gbh*), but also the dignity granted the king (Psa 21:6; 45:4).

5. The LXX renders *hōd* by almost a dozen different terms, most frequently by *doxa* (9x) and *exomologēsis* (4x).

The animated diction and meanings associated with *hōd* are found in

its most important NT equivalent: *doxa* refers to the king/kingdom (e.g., Matt 4:8; 6:29), to the creation (e.g., 1 Cor 11:7; 15:40f.), and to God, in particular (cf. G. Kittel and G. von Rad, “δοκέω,” *TDNT* 2:232–55).

D. Vetter

וֹי *hōy* **woe**

S 1945; BDB 222b; *HALOT* 1:242a; *TDOT* 3:359–64; *TWOT* 485; *NIDOTTE* 2098

1. Among the interjections that cannot be traced to verbal roots, *hōy* “woe” and other exclamations included here (e.g., → <sup>ʔ</sup>*hāh* “ah”) may be classified as pure exclamations, while → *hinnēh* “behold” and *has* “hush!” (→ *hš*), together with impvs. that have devolved into interjections (→ *hlk*, → *qûm*, → *rʔh*), have the character of a demand.

In respect to phonetics and, to a degree, to usage, <sup>ʔ</sup>*ōy*, <sup>ʔ</sup>*ōyâ*, <sup>ʔ</sup>*ī*, and *hō* could be grouped with *hōy*. *heʔāh* (<sup>ʔ</sup>*āh*), which expresses a more joyous excitement, stands alone.

2. Ch. Hardmeier (cited in Wolff, *Joel*, Herm, 242f.) offers precise statistics for *hōy* in its various constructions. *hōy* occurs 51x, almost exclusively in prophetic literature (Isa 21x, Jer 11x, Hab 5x, Zech 4x, Ezek 3x, Amos and Zeph 2x, once each in 1 Kgs 13:30; Mic 2:1; Nah 3:1), in 3/4 of all cases it introduces a prophetic woe oracle.

<sup>ʔ</sup>*ōy* has a significantly broader distribution; it occurs 24x (twice in Ezek 16:23), most frequently in Jer (8x; Isa and Ezek 4x, Num, 1 Sam, Hos 2x each, Prov and Lam 1x each). *hō-hō* occurs in Amos 5:16, the lengthened form <sup>ʔ</sup>*ōyâ* in Psa 120:5, the form <sup>ʔ</sup>*ī*, common in Mid. Hebr., in Eccl 4:10 and 10:16 (cf. *HAL* 37b).

*heʔāh* occurs 12x (Psa 7x, repeated in three passages; Ezek 3x; Isa 44:6; Job 39:25). Passages with <sup>ʔ</sup>*āh* (Ezek 6:11; 18:10; 21:20) are textually uncertain (cf. Zimmerli, *Ezek*, Herm, 1:180f., 371, 430).

3. *hōy* “ah! woe!” may be first identified as the introductory cry of a lament for the dead (1 Kgs 13:30 “woe, my brother!”; Jer 22:18 “ah, my brother, ah, sister!” and “ah, lord, ah, your majesty!”; cf. Rudolph, *HAT* 12, 142; 34:5 “woe, lord!” in each instance with *spd* “to lament the dead”; cf. Jahnou 83–87, and others), like *hō-hō* in Amos 5:16 (alongside *mispēd*

and *n<sup>eh</sup>* “lament for the dead”), and perhaps *hōy* in Jer 48:1 (“concerning Nebo,” with *ʿal*) and 50:27 (Babel, with *ʿal*) in a prophetic funeral song (G. Wanke, *ZAW* 78 [1966]: 217).

In eight or nine passages, *hōy* serves in other contexts as an introductory declaration of excitement: “ha!” (Isa 1:24; 17:12; 18:1; Jer 30:7 txt?; 47:6) or as an agitated demand: “up!” (Isa 55:1; Zech 2:10[doubled]; 2:11).

The remaining passages contain *hōy* with a subsequent noun as an introduction to a woe oracle (often in series: Isa 5:8, 11, 18, 20–22; 10:1; cf. Wildberger, *Isa 1–12*, CC, 188–217; Hab 2:6, 9, 12, 15, 19; otherwise: Isa 1:4; 10:5; 28:1; 29:1, 15; 30:1; 31:1; 33:1; 45:9f.; Jer 22:13; 23:1; Ezek 34:2; Amos 5:18; 6:1; Mic 2:1; Nah 3:1; Zeph 2:5; 3:1; Zech 11:17; followed by the prep. *ʿal* or *le*, Ezek 13:3, 18; cf. above, Jer 48:1; 50:27); see 4.

*ʾōy* is sharply distinguished from *hōy* in grammatical and semantic usage (G. Wanke, *ZAW* 78 [1966]: 215–18). With the exception of Num 24:23 and Ezek 24:6, 9, *ʾōy* (*ʾōy-nāʾ* Jer 4:31; 45:3; Lam 5:16; *ʾōyā* Psa 120:5; *ʾ* Eccl 4:10; 10:16) is always followed by a particular person or group of persons introduced by *le* (without further qualification by ptcps., adjs., and subst.) and a causal clause.

The most original usage is in the 1st per. “woe is me” (Isa 6:5; 24:16; Jer 4:31; 10:19; 15:10; 45:3; cf. Psa 120:5) or “woe is us” (1 Sam 4:7f.; Jer 4:13; 6:4; Lam 5:16) in the context of the sudden arrival of a threat in the so-called cry of anxiety (1 Sam 4:7f.; Isa 6:5; 24:16; Jer 4:13, 31; 6:4; cf. Num 24:23), which metamorphoses ambiguously into a complaint in the context of an already present crisis (Jer 10:19; 15:10; 45:3; Lam 5:16; Psa 120:5).

In the address “woe to you” (Num 21:29 = Jer 48:46; Jer 13:27; Ezek 16:23; with *ʾ*, Eccl 10:16), *ʾōy* acquires the character of a secondary threat (or reprimand), as is also true for usages of the 3d per. (Isa 3:9, 11; Ezek 24:6, 9; Hos 7:13; 9:12; with *ʾ* Eccl 4:10; cf. Prov 23:29 with a substantivized *ʾōy* “woe” par. to a synonymous *ʾābōy* “ah”).

4. Exhaustive examinations of the form-critical derivation of the woes have been offered (cf. the detailed study by Wolff, *Joel*, Herm, 242–45; W. Schottroff, *Der altisraelitische Fluchspruch* [1969], 112–20). Despite some analogies of a formal (series and appended ptcps.; cf. Deut 27:15–26) and semantic nature (opposition to antisocial behavior), one cannot very well view *hōy* as a weakened *ʾārūr* (→ *ʾr*) or the woe as a mutation of the cultic curse (so S. Mowinckel, *Psalmenstudien* [1924], 5:2, 119–21; P. Humbert, *Problèmes du livre d’Habacuc* [1944], 18–23; Westermann, *BFPS* 189–94; J. L. Crenshaw, *ZAW* 79 [1967]: 47f.; cf. too H.-J. Hermisson, *Studien zur isr. Spruchweisheit* [1968], 89f.; Wildberger, *Isa 1–12*, CC, 196), because the curse formulae, “in contrast to the *hōy* sayings, do not simply

emphatically specify dangerous consequences of a particular deed that are immanent and result from the deed itself; rather, they attribute such consequences to the deed, in the first place, through the express pronouncement of curse and thus actually first establish them” (Schottroff, *op. cit.* 117; cf. Wolff, *op. cit.* 242). The explanation of the prophetic woe as an adaptation of the funeral lament seems more illuminating: “The *hōy*, which probably originally belonged to the lament for the dead, should make it clear that the seed of death is already inherent in a particular human behavior” (so G. Wanke, “אָיִ and אָיִהּ,” *ZAW* 78 [1966]: 218; cf. R. J. Clifford, *CBQ* 28 [1966]: 458–64; J. G. Williams, *HUCA* 38 [1967]: 75–91; Schottroff, *op. cit.* 113–17, who treats ancient Near Eastern pars. for secondary usage of the woe cry of the lament for the dead in the sense of a threat or warning). It is possible, in this respect, that the prophets adopted a form of speech in this use of the woe cry already developed in pedagogical tribal wisdom (E. Gerstenberger, *JBL* 81 [1962]: 249–63; H. W. Wolff, *Amos the Prophet* [1973], 17–34; *id.*, *Joel*, Herm, 242–45; Schottroff, *op. cit.* 117–20).

*hōy* does not occur in pairings with → *ʾāšrê* “blessed be the one who . . .” (cf. W. Janzen, *HTR* 58 [1965]: 215–26), but, at most, with *ʾōy* or *ʾ* and in parallelisms clearly influenced by wisdom: Isa 3:10ff. (read *ʾāšrê* for *ʾimrû*, Wildberger, *Isa 1–12*, CC, 125, 134f.; contra W. L. Holladay, *VT* 18 [1968]: 481–87) and Eccl 10:16f. (cf. Schottroff, *op. cit.* 118).

5. The LXX renders the interjections mostly with *ouai*. On early Judaism (Qumran has no available examples) and on the NT, cf. StrB 1:778f. and the comms. on Luke 6:24–26; C. H. Dodd, FS Robert 406f.

E. Jenni

## הַיַּה *hyh* to be

S 1961; BDB 224a; *HALOT* 1:243a; *TDOT* 3:369–81; *TWOT* 491; *NIDOTTE* 2118

1. Aram. *hwh* (KBL 1068f. and suppl. 200; *DISO* 63f.) corresponds to the verb *hyh* “to become, be” in the OT (rarely *hwh* as an Aramaism; cf. Wagner no. 72) and in the Siloam Inscription (*KAI* no. 189).

Akk. *ewû* “to become” (*AHw* 266f.; cf. P. Fronzaroli, *AANLR* 8/19 [1964]: 164, however, with regard to the initial sound of the root) and the Amor. PNs derived from the root *\*hwy* (Huffmon 72f., 159f.) must also be taken into consideration; comparison with

the Hebr. *hwh* II “to fall” (only in Job 37:6) and Arab. *hawā* “to fall” contributes little.

Semantic counterparts to *hyh* “to be” are formed in Akk. with *bašû*, in Ug., Phoen.-Pun., Arab., and Eth. with verbs of the root → *kûn*.

The ni. “to take place” occurs in addition to the qal; Hebr. has no other derivatives of the root; cf., however, → *yhwh*.

\*2. With 3,540 occurrences of the qal (excl. Hos 13:14 <sup>ʿ</sup>*hî*, → <sup>ʿ</sup>*ayyēh* 4; Lis. omits Gen 42:36; 1 Kgs 22:33; 2 Kgs 1:17) and 21 occurrences of the ni., *hyh* is the second most frequent verb in the OT. Hebr. *hwh* “to be, become” appears 5x (Gen 27:29; Isa 16:4; Eccl 2:22; 11:3; Neh 6:6), Bibl. Aram. *hwh* 71x (plus read with MSS *h<sup>a</sup>wāh* instead of *hū<sup>ʿ</sup>* in Dan 6:11).

The proportion of the form *way<sup>e</sup>hî* in the total is, therefore, a good measure of the narrative character of a book; cf. the sequence of frequency for the totals (Ezek, Gen, Jer, Exod, Isa, 1 Kgs, etc.) with that for *way<sup>e</sup>hî* (Gen, 1 Kgs, Josh, Ezek, 1 Sam, 2 Kgs, etc.).

3. The verb *hyh* is not necessary to indicate the simple existence or identity of a person or thing. A nom. clause is employed, i.e., *ʔānōkî yhw<sup>h</sup> ʔlōheykā* “I (am) Yahweh, your God” (Exod 20:2); *šemeš ûmāgēn yhw<sup>h</sup>* “Yahweh (is) sun and shield” (Psa 84:12). The use of *hyh* generally gives rise to a more fully packed and dynamic statement concerning the being of a person or thing, a being expressed in the entity’s actions or deeds, fate, and behavior toward others.

*hyh* qal signifies not only “to be” but also “to become, act, happen, behave”; the verb combines with various preps. that modify its meaning; thus e.g., *hyh be* “to be located, happen in,” *hyh le* “to serve as, become, belong to” (as in several languages, it serves the functions of the absent verb “to have”; cf. G. Benveniste, *Problèmes de linguistique générale* [1966], 187–207), *hyh ʕim* “to stand beside”; *hyh ʔaḥ<sup>2</sup>rê* “to abide with (someone)”; *hyh ʔel* is esp. typical in the narrative introductions of prophetic oracles: *way<sup>e</sup>hî d<sup>e</sup>bar yhw<sup>h</sup> ʔel* (→ *dābār* IV/2a), where *hyh* describes the intrusion of the word in the life of the prophet (cf. HAL 233f. and, exhaustively, C. H. Ratschow, *Werden und Wirken: Eine Untersuchung des Wortes hajah als Beitrag zur Wirklichkeitserfassung des AT* [1941], 7–30; independently, T. Boman, *Hebrew Thought Compared with Greek* [1970], 38–49, whose conclusions, however, should be restricted; cf. SBL 58–72).

These meanings are approximated in poetic parallelism, e.g., *ʕmd* “to stand (there)” (Psa 33:9), *kûn* ni. “to exist” (Psa 89:37f.; cf. 90:17 po.), *qûm* “to come about”

(Isa 7:7; 14:24); further synonymous and antithetical pars. in Ratschow, op. cit. 5f.

In conjunction with a predicate adj., *hyh* expresses the behavior or the characteristics of a thing or a person: “But the serpent was more cunning than all the animals” (Gen 3:1); “It is not good that the man should be alone” (Gen 2:18). Combined with the inf. abs., it indicates the duration of a movement: “But the water sunk even further” (Gen 8:5; cf. v 3). In a highly attenuated meaning, *hyh* serves only to temporally establish the statement: “It should be a male and a female” (Gen 6:19), and can be viewed as a simple copula (BrSynt 28; BM 2:96). But even then *hyh* often maintains the function of describing a behavior or a status: “and both the man and his wife were naked” (Gen 2:25). Preceding a narrative verb, *way<sup>c</sup>hî* “and it happened” becomes a mere stylistic figure, which L. Köhler (VT 3 [1953]: 304) designates a “hypertrope,” although the *hyh* treated under 4b(1) still resonates through it.

The *ni.* occurs primarily in late texts (and in Qumran) in the meaning “to come to pass, happen” (e.g., Deut 4:32; Jer 5:30; Zech 8:10), perhaps also “to be away” (Dan 8:27).

4. Three theological usages of *hyh* may be distinguished: (a) the implicit, (b) the explicit (in reference to miracle accounts, in prophetic oracles, in legal prescriptions, and in the covenant formula), and (c) the abs. theological use in Exod 3:14a (on which cf. Ratschow, op. cit. 31–86).

(a) In curse and blessing texts, *hyh* indicates the destiny of the cursed or blessed person; this fate takes effect in accordance with the evil or good power in its bearer: “So I will make you a great nation and bless you and make your name famous, and you will be a blessing” (Gen 12:2); Abraham is already blessed, and this blessing, which is inherent in his being, will manifest itself in results. “And your descendants shall be like the dust of the earth” (Gen 28:14): this promise of descendants is not yet realized, but it “is” due to the blessing that presses toward its realization. Similarly, “that man shall be like the cities that Yahweh has destroyed” (Jer 20:16). These formulae mention Yahweh not as the actual agent; they place the blessing or curse in direct relationship to its actualization in history. Here *hyh*, usually in the pf., expresses the inner dynamics of the blessing or the curse, a force released by the word that will unavoidably take effect.

Yahweh worship critiqued this dynamistic-realistic concept of blessing and curse. It tied the effects of the word to the personal intervention of God. Through the use of *hyh* in the impf., blessing becomes promise and curse becomes threat that Yahweh himself will actualize in the future. Here *hyh* indicates the historical fulfillment of the word of Yahweh, events that will

transpire as a result of his intervention: “Count the stars, if you can count them . . . so shall your descendants be” (Gen 15:5); “Your land shall become a wilderness and your cities rubbish heaps” (Lev 26:33). *hyh* emphasizes the reality of that which Yahweh has foretold and which shall be actualized in historical events.

Blessing and curse appear in weakened forms as wish and prayer; a person speaks the word, but the actualization is implicitly left to the decision of Yahweh: “They should become like the grass on the roofs that withers even before it grows” (Psa 129:6); “Their wives shall be robbed of children, shall become widows” (Jer 18:21). Even in the wish form, the verb *hyh* remains dynamic; it indicates the tension between that which is already present, hidden or incognito, and that which will be actualized according to Yahweh’s decision.

(b) *hyh* occurs in explicit relation to Yahweh in four literary contexts:

(1) Miracle accounts use numerous verbs of action, but *hyh* appears at the climax of the narrative to describe the wondrous event: “Then Moses and Aaron went to Pharaoh and did what Yahweh had commanded: Aaron cast his staff before Pharaoh and his people and it became a serpent” (Exod 7:10); “But Lot’s wife behind him looked back, and she became a pillar of salt” (Gen 19:26); “And Gideon said . . . : The wool alone should remain dry, while dew falls upon the ground all around. And God did so that night” (Judg 6:39f.). In each case, the report uses *hyh* to describe not a simple historical process but the reality of the event that intervenes in earthly affairs and manifests the absolute power of Yahweh. The *hyh* of the event is the evidence of the → *ʿsh* (“deed”) of God; cf. Amos 3:6b, “Does a mishap take place in a city and Yahweh has not done it?” The same meaning occurs in the creation accounts (Gen 1:3; 2:7). Elsewhere God’s personal intervention is not always so carefully expressed. But as in the miracle narratives, in reports concerning banal historical events *hyh* can still indicate the dynamics of occurrences through Yahweh’s action—even if the individual cannot always recognize God’s hand therein (Eccl 1:9).

(2) In addition to more banal usages, the prophets employ *hyh* in prophetic oracles to describe events embodying Yahweh’s personal intervention in judgment and grace: “For Gaza will be desolate” (Zeph 2:4); “Therefore your way will become a slippery path for you” (Jer 23:12); “And a pure street will be there” (Isa 35:8), etc. This usage concerns that which Ratschow calls the “proper prophetic usage” (op. cit. 67). One finds it frequently in Hos (6x), Mic (3x), Isa (28x), relatively less frequently in Jer (12x) and Ezek (29x); see the summary in Ratschow, op. cit. 67–74. The emphasis of the prophetic statements lies on the unexpected, incredible, and yet certain and real nature of the announced events. By multiplying

par. statements with a plethora of images, but without thoroughly describing the process, the prophets indicate that their *hyh* is not meant to express the precise course of events, but essentially the sovereign intervention of Yahweh in its various manifestations: “and it will come to pass in the coming days . . .” (Isa 2:2); “in that day it will come to pass . . .” (Isa 7:18, 21, 23, cf. v 22). This intervention, both in judgment and in salvation, remains a wonder transcending the normal course of events and demonstrating the effectiveness of divine decision: “Truly, as I purposed, so did it come to pass (*hyh*), and what I decided comes to be (*qûm*)” (Isa 14:24).

(3) In legal prescriptions, *hyh* dictates the relationship of the covenant people vis--vis God, people, and the environment: “On the first day you shall hold (lit. ‘there shall be for you’) a holy assembly” (Exod 12:16); “Everything banned in Israel shall fall to you” (Num 18:14); “Anything, however, which does not have scales and fins . . . shall be to you an abomination. Indeed, they shall be an abomination to you” (Lev 11:10f.). Noteworthy in the final example is the coincidence of a simple nom. clause and a clause with *hyh*, in which the verb makes it clear that the concern is not a determination of fact but a legally prescribed behavior. This legal circumstance reflects the situation as God sees it and as he has established it for the well-being of the people. But it is also concerned that the people recognize the situation and give it place in their daily life. “You shall have no other god beside me (*lô’ yihyeh l’kâ*)” (Exod 20:3); here the verb appears in the sg., for the commandment does not seek to deny the existence of other gods but to demand that Israel acknowledge no other gods. In all of these Torah texts, the dynamic meaning of *hyh* describes the movement of God’s will impinging repeatedly upon the daily life of his people and bringing Israel truly to become that which it should be according to God’s will: “You shall become holy, for I (am) holy, Yahweh, your God” (Lev 19:2).

(4) The final literary context of the theological usage of *hyh* to be treated is that of the covenant formula (cf. R. Smend, *Die Bundesformel* [1963]). Both covenant partners are obligated thereby to a particular behavior toward one another. The short form reads: “I will be your God and you shall be my people” (Jer 7:23; cf. 11:4; 24:7; 31:33; Ezek 36:28, etc.); Deut 26:17f. offers a longer, bipartite formula: “Yahweh has declared to you today that he wishes to be your God . . . and you have declared to Yahweh today that you wish to be his own people . . .” (cf. Smend, op. cit. 7f.). One may also compare the covenant formula with David: “I will be his father, and he will be my son” (2 Sam 7:14). Here *hyh* indicates the mutual behavior of the covenant partners in the present and in the future in its active and dynamic character: What they are for one another owing to the

covenant is renewed by each act of one toward the other so that they become ever more and ever better what they already are. Thus the characteristic exhortation of Deut parenthesis to Israel is to become the people it already is by “walking” (*hlk*) and “obeying” (*šmr*).

The texts do not direct such a call to the other covenant partner, Yahweh himself. Deut 26:17f. ties the two clauses of the covenant formula to Israel's obedience. This conjunction does not mean, however, that the validity of the covenant depends exclusively on Israel's obedience. To the contrary, the covenant exists only because Yahweh established it (the formula is mostly transmitted as God's 1st-per. speech), and God's *hyh*, in itself, implies the measures that Yahweh will use in the future on Israel's behalf. But Israel's *hyh* is threatened by the disobedience, the forgetfulness, the inaction of those who fancy themselves to have reached the goal and must consequently be activated by the call to obedience.

(c) Exod 3:14a uses *hyh* abs., without prep. or predicate noun, as Yahweh's 1st-per. speech in a formula:  $\text{ʔehyeh ʔašer ʔehyeh}$  (ZB, GNB mg. “I will be who I will be”; see Noth, *Exod*, OTL, 45).

(1) The passage is problematic in four ways:

(a) A literary-critical problem: vv 14f. give a dual answer to v 13 “what is your name?” Is the original answer contained in v 14 where the tetragrammaton appears in its usual form? In this case v 14a would be a theological amplification seeking to clarify the sense of the tetragrammaton, and v 14b would be a redactional transition (so B. D. Eerdmans, *Atl. Studien* 3 [1910], 12–14; Noth, *Exod*, OTL, 43f.). But v 14 could also be regarded as original; its more difficult content would have then led to an expansion in v 15 in more traditional forms (so G. J. Thierry, *OTS* 5 [1948]: 37).

(b) An etymological problem: The formula very probably contains an allusion to the tetragrammaton. Is it a philologically tenable etymology or a merely theological paronomasia? What is the original meaning of the tetragrammaton?

(c) A historical problem: When did the name Yahweh come into use? Are E and P correct when they attribute the first usage in Israel to Moses? What are the origins of the name? With respect to these two groups of questions, cf. the article → *yhwh*.

(d) An exegetical problem: Do the two  $\text{ʔehyeh}$  s in v 14a have the same significance? There is no decisive reason to contest this point (E. Schild, *VT* 4 [1954]: 296–302, wants to differentiate the notion of identity in the first verb from the notion of existence in the second: “I am he who is”). The repetition of the verb is not tautological but emphatic (cf. Exod 33:19). Moreover, is the syntax of  $\text{ʔašer}$  correct? Yes, for if the subj. of the clause introduced by  $\text{ʔašer}$ , in the form of a pron., is already the subj. or attribute of the main clause, the verb remains in the same person (GKC §138d; Schild, op. cit. 298; cf. Exod 20:2; 1 Kgs 8:22f.; 1 Chron 21:17).

(2) The formula is understood in three different ways:

(a) As a statement concerning God's being: cf. LXX *egō cimi ho ēn* “I

am the one who is”; Luther: “I alone have being, whoever clings to other things errs” (*Weimarer Ausgabe* 16:49); Schild, op. cit. 301: “It is a positive answer in which God defines himself as the One who is, who exists, who is real.” Cf. too O. Eissfeldt, *FF* 39 (1965): 298–300 = *KS* [1968], 4:193–98. Other usages of *hyh*, however, call this interpretation into question and show that the sense of the passage exceeds the simple statement of God’s being (aseity).

(b) As an attempt to avoid revealing the name: so Köhler, *Theol.* 242n.38: “God does not reveal to Moses the secret of His nature (= His name). Moses will see who God is from His works. . . . *Deus absconditus* in the strictest sense”; cf. Gen 32:30; Judg 13:18. The context (a positive answer parallel to v 12, repetition of the expression in v 14b) requires a word that gives a positive answer to v 13 without violating God’s secret.

(c) As a statement concerning the activity of God. The majority of exegetes (with slight nuances of opinion) understand the passage as a proclamation of the ever-new activity of God in history; thus Eichrodt 1:190: “I am really and truly present, ready to help and to act, as I have always been” (cf. among others, Th. C. Vriezen, FS Bertholet 498–512; id., *Theol.* 179f.; von Rad, *Theol.* 1:180f.; Noth, *Exod.* OTL, 44f.). The active and dynamic meaning of *hyh* speaks for an interpretation along these lines.

(3) Three elements of the formula are esp. noteworthy: (a) It does not go beyond 1st-per. forms, not merely for syntactical reasons. God remains a sovereign “I” and cannot become an “it” at the disposal of human curiosity. (b) The verb is in the impf., the tense of action open to new acts. God offers himself to be known as a result of his historical deeds for his people. (c) The usage of *hyh* here stands in the lineage of the three chief theological usages in the miracle reports, the prophets, and the covenant formula: it treats the ever-renewed activity with which Yahweh intervenes in history in order to prove himself to be the true Lord.

Apart from Exod 3:14, this abs. use of *hyh* occurs only in Hos 1:9, “I (am)  $\text{לֹא־אֶהְיֶה}$  (I am not present) for you,” i.e., I decline to continue playing the role that I assumed in response to Moses in Exod 3:14.

Several authors have suggested a textual correction along the lines of the covenant formula (“I am not your God”). Nevertheless, the *lectio difficilior* is preferable (cf. Wolff, *Hos*, Herm, 9).

Moreover, the absence of an echo of Exod 3:14 is not remarkable. Even in its context, the formula stands to the side; the weight lies on the commission of Moses in v 15. In order to describe Yahweh’s faithful assistance, the texts prefer the frequent expression *hyh im* over the abs. *hyh*: “I am with you” (Exod 3:12; cf. Josh 1:5; Judg 2:18; 1 Sam 18:12), where the prep. does not complement the verb but underscores its active

and purpose-oriented significance.

5. In its modifications of the formula of Exod 3:14, early Judaism primarily emphasizes God's eternity; so Tg. Ps.-J. Exod 3:14b, "It is I, who was and will be"; similarly, Midr. Exod 3:14. The formula is also interpreted, however, in terms of God's creative activity in accordance with Psa 33:9; thus Tg. Ps.-J. 3:14a, "He who spoke and the world came into being, who spoke and the universe existed," or in the sense of Deutero-Isaiah's polemic against the impotence of the idols (Isa 43:10f.; 44:6), thus Tg. Ps.-J. Deut 34:39, "I am he who is and was, and I am he who will be, and there is no other god beside me." Even when eternity is emphasized, the concept of existence inherent in the verb *hyh* retains an active character.

In the NT *einai* very often appears where the Hebr. uses a simple nom. clause (e.g., Matt 26:26 par. "this is my body") or a verb of being (Matt 26:38 "my soul is troubled," an allusion to Psa 42:6 with *šāḥ* hitpo.). Elsewhere it assumes the function of the narrative *way<sup>e</sup>hî* "and it came to pass" (e.g., Luke 6:6) or of the prophetic *w<sup>e</sup>hāyâ* "and it will come to pass" (e.g., Matt 13:42); cf. M. Johannesson, "Das biblische καὶ ἐγένετο und seine Geschichte," *Zeitschrift für vergleichende Sprachforschung* 53 (1926): 161–212; id., "Die biblische Einführungsformel καὶ ἔσται," *ZAW* 59 (1942/43): 129–84; K. Beyer, *Semitische Syntax im NT* (1962), 1:29–65. But *einai* still preserves the active force of the theological *hyh* in a few significant christological texts: "Behold, I am with you always" Matt 28:18, along the lines of the Hebr. *hyh 'im*; the Johannine usage should esp. be mentioned here, in the prologue "in the beginning was the Logos," and in the words by which Jesus assumes the divine title of Exod 3:14: *egō eimi* "I am" (John 8:4, 28, 58; 13:19). The tripartite formula in Acts 1:4, 8, "he is and he was and he comes," refers to God (cf. 4:8; 11:17; 16:5); E. Stauffer, "ἐγώ," *TDNT* 2:349–51; F. Büchsel, "εἰμί," *TDNT* 2:398–400; E. Schweizer, *Ego eimi* (1939).

S. Amsler

הֵיכָל *hēkāl* temple → בַּיִת *bayit*

הֵלֵךְ *halk* to go

S 1980; BDB 229b; HALOT 1:246a; TDOT 3:388–403; TWOT 498; NIDOTTE 2143

1. The verb *hlk* “to go” occurs in most Sem. languages (with dissimilar meanings in Old SArab., “to behave” [HAL 236a], and Arab., “to perish” [Wehr 1031]).

Cf. Akk. *alāku* (AHw 31–34; CAD A/1:300–328); Ug. *hlc* (WUS no. 830; UT no. 766); Can. *yilaku* (impf. in an Amarna Letter, AO 7098, rev. 27; F. Thureau-Dangin, RA 19 [1922]: 98); Phoen.: Friedrich 70; Old Hebr. and Moab.: DISO 65; Aram.: KBL 1069; DISO 65; LS 176f.; Drower-Macuch 148b.

Hebr. exhibits the *qal*, *pi.*, *hitp.*, *ni.*, and *hi.* conjugations.

As with expressions for “to go” in many Indo-European languages (F. Rosenthal, Or 11 [1942]: 182f.), the inflection of *hlc* is rather irregular. Impf., impv., *qal* inf. cs., and all forms of the *hi.* are formed like the verbs with initial *y/w*. This phenomenon is usually explained (GKC §69x; Berg. HG 2:131; BL 384f.) as a result of the apparent initial *y/w* form in the *hi.* pf. (*hahlaka* > *hālaka* > *hōlaka* > *hōlīk*, BL 214; Meyer 2:142); somewhat differently Z. S. Harris, *Development of the Canaanite Dialects* (1939), 33; J. M. Allegro, WO 2/3 (1956): 264–66.

Some Aram. formations appear to be based upon a root \**hwk* (Bibl. Aram. pe. impf. *y<sup>c</sup>hāk*, inf. *m<sup>c</sup>hāk*; cf. BLA 144; DISO 65; F. Degen, *Altaram. Grammatik* [1969], 79; contra F. Rundgren, AcOr 21/4 [1953]: 304–16). In addition, the impv. *lēk* in the Can. languages allows for the inference of a biradical base \**lk* (Meyer 2:142). On this basis, Gordon suspects that the triconsonantal *hlc* may have arisen through the combination of \**hk* and \**lk* (UT no. 766).

Nevertheless, the form occasionally occurs with three consonants in Hebr., as in Moab. (*w<sup>h</sup>hlc* “so I went,” KAI no. 181.14f. alongside *lk*, “go” l. 14; ANET 320b) and in Old Phoen. (*hlc*, KAI no. 27.21, along with *lkt*, KAI no. 26.II.4; *wylk*, II.19; cf. Friedrich 70): *yah<sup>a</sup>lōk* “he goes,” Jer 9:3, etc.; *ʿeh<sup>l</sup>lōk*, Job 16:22, etc.; *tihalak*, Exod 9:23; Psa 73:9; inf. *h<sup>a</sup>lōk*, Exod 3:19; cf. Berg. HG 2:131.

Bibl. Aram. consistently substitutes forms of *ʕl* for *hlc* in the pe. pf. and impf. (KBL 1069a). Instead of the *ha.* it may be better to read the *pa.* in Dan 3:25; 4:34 (BLA 274).

Derived substs. include:

(a) *hālīk* “step,” better “foot” according to Vg.; cf. M. Dahood, *Bib* 45 (1964): 404;

(b) *h<sup>a</sup>līkâ* “way, road; caravan, procession; one’s entire behavior” (HAL 236a);

(c) *hēlek* “(going >) flow; (visit >) visitor” (nomen actionis, BL 460; HAL 238a);

(d) *mah<sup>a</sup>lāk* “path, stretch of the way” (BL 490);

(e) *tah<sup>a</sup>lūkôt* “procession” (BL 497; yet cf. BHS on Neh 12:31; KBL 1020a);

(f) Bibl. Aram. *h<sup>a</sup>lāk* “tax” (KBL 1069; cf. Akk. *ilku*, a type of tax that vassals were obligated to pay; *AHW* 371f.; *CAD* I/J:73–81; H. W. Bailey, *Asia Major* 7 [1959]: 18f.).

The fem. PN *hammōleket* (1 Chron 7:18, perhaps also in v 15; cf., however, J. Morgenstern, *ZAW* 49 [1931]: 58) is also a derivative.

2. The verb *hlk* occurs 1,547x in the Hebr. OT: 1,412x in the qal, 64x in the hitp., 45x in the hi., 25x in the pi., and 1x in the ni. In addition, it occurs 7x in Bibl. Aram. (pe. 4x, pa. 1x, ha. 2x, but see 1).

Mandl. does not list Isa 55:1b *l<sup>o</sup>kû* (1 Chron 18:13 is listed in the addendum); Zech 3:7 *mahl<sup>o</sup>kîm* is attributed to *mah<sup>a</sup>lāk* according to Lis.; Num 17:11 *w<sup>o</sup>hōlēk* to the hi. (Lis.: qal).

Of the substs., *hālîk* occurs 1x (Job 29:6), *h<sup>a</sup>lîkâ* 6x (Nah 2:6; Psa 68:25[bis]; Job 6:19; Prov 31:27), *hēlek* 2x (1 Sam 14:26; 2 Sam 12:4); *mah<sup>a</sup>lāk* 5x (Ezek 42:4; Jonah 3:3f.; Zech 3:7; Neh 2:6), *tah<sup>a</sup>lūkôt* 1x (Neh 12:31), Aram. *h<sup>a</sup>lāk* 3x (Ezra 4:13, 20; 7:24).

3. (a) The meaning of the verb is firmly established with “to go” and varies only little according to the context, i.e., when not used of people to express the capacity for self-locomotion (Gen 9:23, etc.), but of some animals or things: serpents crawl (Gen 3:14), foxes dash about (Lam 5:18 pi.), ships sail (Gen 7:18; Psa 104:26 pi.), a limb drags along (Gen 32:31), etc. Even water “goes,” i.e., “flows” (Gen 2:14; 8:3; etc.; cf. also l. 4 of the Siloam Inscription, *ANET* 321b), and the tone of the trombone “sounds” (Exod 19:19).

In a few cases, the inf. abs. *hālôk* joins other verbal forms to strengthen the notion of enduring action (e.g., Gen 8:3, 5; 12:9; Judg 14:9; 2 Kgs 2:11; cf. GKC §113u; BrSynt 82–84). The finite verb form of *hlk* can also serve similarly to clarify, i.e., in combination with *lqh*, Gen 27:14; *npl*, Gen 50:18; *šlh*, 2 Kgs 3:7; *mr* Isa 2:3 (*HAL* 236b).

In addition to the usage expressing the simple commandment, the impv. forms *lêk*, *l<sup>e</sup>kâ*, and *l<sup>e</sup>kû* are also frequently used in combination with another verb to strengthen a demand and can then be best translated “up! now then!” (Gen 37:13, 20; Exod 4:19, etc.). In this respect, *leka*® has often “become a fixed interjection and, as such, may also be directed to a fem., Gen 19:32, or to several persons, Gen 31:44” (BL 385).

The verb acquires a special nuance when it describes the way leading to an end or goal; e.g., of the end of the rain (Song Sol 2:11), of the dew (Hos 6:4), of the wind (Psa 78:39), of the clouds (Job 7:9), and of pain (Job 16:6). Applied to human life, the meaning “to go to death, die” results (Gen 15:2; Josh 23:14; 1 Kgs 2:2; Psa 39:14; 58:9; Job 10:21; 14:20; 16:22; 19:10; 27:21; Eccl 1:4; 3:20; 6:4, 6; 9:10; 1 Chron 17:11).

The hi. in Psa 125:5, the pi. in Hab 3:11 (sun and moon), and the only ni. (Psa 109:23) also belong here.

In conjunction with *ʔaḥar* and *ʔaḥʾreʿ* “behind,” it comes to mean “to follow, follow after” (Gen 24:5, 8; 32:20, etc.), which is frequent in religious usage (see 4b).

The meanings of *hlk* hi. are all more or less clearly causative (“to cause to go, lead, bring,” etc.). On *hlk* pi. “to go around, go back and forth,” cf. *HP* 151–53. The hitp. “to stroll, go back and forth,” the qal, and the pi. also have the fig. meaning “to live” in the general sense of personal conduct (see 4b).

Semantically related motion verbs all have a somewhat more specialized meaning; cf. *rûṣ* “to run,” → *bôʾ* “to come, enter,” → *yṣʾ* “to exit,” → *ʾlh* “to go up,” → *šûb* “to return,” etc.; → *yšb* “to remain” and → *ʿmd* “to stand” have the opposite meaning.

(b) The subst. of the root *hlk* with their manifold meanings (see 1) may all be derived from the basic meaning “to go.” In regard to Hab 3:6 (paths of the stars), cf. the Akk. and Ug. (*KTU* 1.19.II.3, 7, IV.38) pars. cited in *HAL* 236a. The fig. meaning “life-style” (*hʾlîkôt* Prov 31:27) is also present in Akk. *alaktu*, pl. *alkakātu* (*AHW* 31, 36b; *CAD* A/1:297–300).

4. (a) It is of minor importance in the religious sphere that even Yahweh, like the gods, can be envisioned as “going” (Psa 115:7 pi.). Here one remembers Yahweh’s walking in the Garden of Eden (Gen 3:8 hitp.) or his departure following the visit to Abraham (Gen 18:33). Yahweh can also go on the clouds (Psa 104:3 hi.) or walk in heaven (Job 22:14 hitp.). Righteousness precedes him (Psa 85:14 pi.).

More important than these anthropomorphic concepts, however, are references in which Yahweh’s going has the specific dimension of coming to aid his people or to punish them. He goes to redeem a people for himself (2 Sam 7:23 = 1 Chron 17:21), and is experienced as aid (Psa 80:3; Zech 9:14; also Hos 5:14f.). In the vast majority of cases, Yahweh’s accompaniment is experienced as the exercise of a leadership role in the period of the wilderness wandering (Exod 33:14–16; 34:9; cf. Lev 26:12 hitp.; Deut 20:4; 23:15 hitp.; 31:6, 8; 2 Sam 7:6f. hitp. = 1 Chron 17:6; in the new exodus: Isa 45:2; 52:12), and it found picturesque representation in the discussion of the pillars of cloud and fire in which Yahweh precedes the people (Exod 13:21; Num 14:14; Deut 1:30, 33).

The function of the ark of Yahweh may also be understood in this context as a visible symbol of Yahweh’s presence leading the people and behind which later participants in cultic acts assembled in procession, even if this use of *hlk* is not very sophisticated (Josh 3:6; 6:9; 1 Sam 6:12; cf. Num 10:33–36; Judg 4:14; 2 Sam 5:24; 6:5). The people’s manufacture of gods that were meant to assume the same function signifies apostasy (Exod 32:1, 23; cf. 1 Kgs 12:28–30). If the people prove disobedient, Yahweh can only move against them (Lev 26:24, 28, 41; Num 12:9).

(b) From the human standpoint, obedient following after Yahweh corresponds to God's movement toward his people to accompany them and guide them (cf. F. J. Helfmeyer, *Die Nachfolge Gottes im AT* [1967]). The expression *hlk 'ah'yrê* "to follow after" is immediately and fully comprehensible to Israelites conversant with nomadic life and can consequently be used to describe the totality of the communal and individual life-style. But only a few passages, chiefly in Dtr texts, refer to following after Yahweh (Deut 13:5; 1 Kgs 14:8; 2 Kgs 23:3 = 2 Chron 34:31; also Jer 2:2 in the picture of bridal courtship; Hos 11:10; cf. also 1 Kgs 19:20f. "to follow after a prophet"; on synonymous expressions, cf. Helfmeyer, *op. cit.* 93–122). More often, this behavior refers to apostasy, and thereby to following after strange gods (Baal, etc.: Deut 4:3; 6:14; 8:19; 11:28; 13:3; 28:14; Judg 2:12, 19; 1 Kgs 11:5, 10; 18:18; 21:26; 2 Kgs 13:2; 17:15 = Jer 2:5; Jer 2:8, 23, 25; 7:6, 9; 8:2; 9:13; 11:10; 13:10; 16:11; 25:6; 35:15; Ezek 20:16; cf. N. Lohfink, *Das Hauptgebot* [1963], 76f.) and some illusions and delusions (Jer 3:17; 16:12; 18:12; Ezek 13:3; 33:31). The act of following after other gods always includes apostasy from Yahweh too, as 1 Kgs 9:6; 18:21; and Jer 5:23 clearly express. For synonyms for following after strange gods, cf. Helfmeyer, *op. cit.* 152–79.

In addition to public apostasy, expressed by following after strange gods, living without God is described by various expressions that always emphasize the self-sufficient human action: to follow deceit, etc. (Jer 6:28; 23:14; Job 31:5), to walk according to one's own or evil counsel (Jer 7:24; Psa 1:1; Job 34:8), to walk after one's own heart (Jer 11:8; 23:17) or in darkness (Isa 59:9 pi.; Eccl 2:14).

The fact that following after strange gods is explicitly discussed much more often than following after Yahweh may be explained by the origin of the theme of "following after" in the pagan cultic procession (thus *HAL* 237a; *BWL* 38f.). Israel, therefore, avoided this means of expression (P. Volz, *Der Prophet Jeremia* [19282], 17; G. Kittel, *TDNT* 1:211; on the whole question, see E. G. Gulin, "Die Nachfolge Gottes," *StudOr* 1 [1925]: 34–50). On the one hand, the argument that it applied not at all to behavior toward Yahweh but only to behavior toward strange gods, because the pious Israelite led his/her life "before" and not "behind" Yahweh (thus H. Kosmala, "Nachfolge und Nachahmung Gottes, II: Im jüdischen Denken," *ASTI* 3 [1964]: 65–69), is untenable in the light of the texts cited above. On the other hand, Helfmeyer (*op. cit.*) affords the expression "to walk after Yahweh" too much significance when he does not even try to explain the different frequencies of usage. In his view (e.g., *op. cit.* 202), the concept arises from the events associated with holy war and has been transformed by Dtn-Dtr circles into theological language.

At any rate, it is noteworthy that the pious Israelite's attitude toward

Yahweh is primarily oriented to keeping Yahweh's commandments. A multitude of expressions are available to the OT for describing this posture, expressions that also sometimes speak of going in the ways (→ *derek*), in the commandments and instructions of Yahweh, etc. (so too Helfmeyer, op. cit.). One should remember that apostasy and walking in the ways of strange gods can be discussed together because, at least for the Israelites, Yahweh's ways were clearly prescribed by the revealed commandments, while apostasy is characterized by the negation of these very commandments. Now, although during the wilderness wanderings and the conquest the notion of following after the divine Lord was more prominent, this idea was replaced in the period of settlement by the knowledge that Yahweh dwells in the midst of his people. Any apostasy was, then, estrangement from Yahweh and synonymous with following after strange gods. Thus life *with* Yahweh can be described with *hlk* alone (without <sup>ʾ</sup>*ah<sup>a</sup>re*) in conjunction with words like *š<sup>c</sup>dāqōt* (Isa 33:15 "in righteousness"), *haṣnēa<sup>c</sup>* (Mic 6:8 "humbly"), or *tāmîm* (Psa 15:2 "blamelessly"). The hitp. particularly expresses this relationship. The pious walks "with God" (thus P: Gen 5:22, 24; 6:9) or "before" him, i.e., face-to-face with him and in responsibility to him (Gen 17:1; 24:40; 48:15; 1 Sam 2:30; 2 Kgs 20:3 = Isa 38:3; Psa 26:3; 56:14; 101:2; 116:9; Prov 6:22; 20:7; in the qal also 1 Kgs 2:4; 3:6; 8:23, 25[bis]; 9:4).

(c) In most cases Yahweh is the subj. of hi. forms of the verbs (24 of 45x). He can "cause" the water of the sea "to go away" (cf. Luther, Exod 14:21) or lead the blind (Isa 42:16, etc.); for the most part, however, Israel is the obj. of divine leadership and guidance (Lev 26:13; Deut 8:2, 15; 28:36 into exile; 29:4; Josh 24:3; Isa 48:21; 63:13; Jer 2:6, 17 txt?; 31:9; Hos 2:16; Amos 2:10; Psa 106:9; 136:16).

5. Concerning the usage of the Qumran community, one can determine that *hlk* was also used as the verb of motion in general (e.g., of the sallying forth of the army, 1QM 7:3f.). Nevertheless, the usage in the sense of ethicoreligious behavior is by far the more frequent, in accordance with the nature of the texts (e.g., CD 2:15, 17; 3:2, 5; 7:7; 1QS 1:6; 4:5f.; 5:4; 8:2; 1QSa 1:1; 1QH 15:18).

In early Judaism and in the NT, the verb "to go" was used as widely as *hlk* in the OT; cf. F. Hauck and S. Schulz, "πορεύομαι," *TDNT* 6:566–79; G. Kittel, "ἀκολουθέω," *TDNT* 1:210–16. On the theme of discipleship and imitation, H. Kosmala produces material that exceeds the information in *TDNT* ("Nachfolge und Nachahmung Gottes, I. Im griechischen Denken," *ASTI* 2 [1963]: 38–85; "II. Im jüdischen Denken," *ASTI* 3 [1964]: 65–110). M. Hengel (*Nachfolge und Charisma* [1968], with bibliog.) demonstrates the degree to which the NT notion of following advances its OT model. Jewish-Hellenistic concepts are also treated here.

The root *hlk* is the basis for the subst. Halakah, which designates the entire early Jewish-rabbinical doctrine of proper conduct (cf. *WTM* 1:471f.; Jastrow 353; *UJE* 5:172–75; *JE* 6:163; *BHH* 2:626f.).

G. Sauer

## הלל *hll* pi. to praise

S 1984; BDB 237b; *HALOT* 1:248b; *TDOT* 3:404–10; *TWOT* 500; *NIDOTTE* 2146

1. *hll* pi. “to extol, praise,” probably an onomatopoeic formation, has counterparts in most Sem. languages (e.g., Akk. *alālu* Gt, “to sing a joyous song,” Š “to rejoice,” *AHw* 34; Ug. *hll* “to rejoice”? *UT* no. 769; but *WUS* no. 832 “crescent moon,” cf. *hēlēl* Isa 14:12; further citations in *HAL* 238b).

The verb occurs only in the pi. (*HP* 246), pu., and hitp. Derivatives are *hillûlîm* “rejoicing” (Lev 19:24, at the feast of the harvest; Judg 9:27, at the vintage festival of the Shechemites), *mah<sup>a</sup>lāl* “praise, acknowledgment, cry” (Prov 27:21), and above all *tehillā*® “glory, praise.” The PNs *hillēl*, *y<sup>c</sup>hallel<sup>e</sup>l*, and *mah<sup>a</sup>lal<sup>e</sup>l* also occur (contra *IP* 169, 184, 205: from *hll* I “to light up”).

2. *hll* pi. occurs 113x (Psa 75x, 2 Chron 12x, 1 Chron 7x, Prov 4x), pu. 10x (Psa 6x), hitp. 23x (Psa 8x, Jer 7x, Prov 4x), *hillûlîm* 2x (see above), *mah<sup>a</sup>lāl* 1x (see above), and *tehillā*® 57x (Psa 30x, Isa 11x, Jer 6x).

Of the total of 206 passages (146 verbal, 60 nominal) almost 2/3 occur in the Psa or in Psa motifs and 1/7 in the Chr material. In addition, a small group occurs in Prov (10x) and in prophetic texts, mostly in the context of the announcement of salvation. This preliminary overview already shows that *hll* has its proper place in worship; worship is the execution of that which the call to praise invokes; all passages in the Chr material treat cultic praise of God.

3. Both verb and noun can indicate an interpersonal exchange that should usually be rendered “praise.” A person’s beauty (pi. Gen 12:15; 2 Sam 14:25; Song Sol 6:9; pu. Psa 78:63) or an insight (Prov 12:8 pu.) are praised. Nom. usages refer esp. to a city’s fame (in the oracles against the nations, Jer 48:2; 49:25; 51:41; Ezek 26:17 pu. speaks of Tyre, the famous city on the sea). Wisdom mentions praise or self-praise (hitp.): the able housewife is praised (pi. Prov 31:28, 31; hitp. 31:30); “The one who binds on the sword may not boast like one who lays it aside” (1 Kgs 20:11);

similarly, Jer 9:22f.; Prov 20:14; 25:14; 27:1; pi. 27:2. One praises the king (2 Chron 23:12f.) or boasts of him (Psa 63:12).

4. Most passages by far praise God (Judg 16:24, the Philistine god): in the Psa (4a-c), in the Chr (4d), and in prophetic discourse (4e); cf. Westermann, *PLP* 15–162; F. Crüsemann, *Studien zur Formgeschichte von Hymnus und Danklied in Israel* (1969).

(a) The use of the verb and of the noun *tehillā*® in the Psa is concentrated in two groups; the main group is in the call to praise. The majority of the Psa passages involve this one form of the impv. call to praise: “Praise, you servants of the Lord, praise the name of the Lord!” (Psa 113:1[bis]; also Psa 22:24; 117:1; 135:1[bis]; 148:1[bis], 2[bis], 3[bis], 4, 7; 150:1[bis], 2[bis], 3 [bis], 4[bis], 5[bis], 6; Jer 20:13; 31:7; further *hal’û(-)yāh* 24x [→ *yhwh* 2]; with *tehillā*®, Psa 100:4; 149:1; cf. Psa 66:2, 8; Isa 42:10; in addition the version in the hitp. in Psa 105:3 = 1 Chron 16:10).

That this is by far the most widely represented use of the word is only clear, however, if one considers the multitude of par. verbs that constitute the totality of impv. calls to praise (most significant → *ydh* hi.; further → *rnn*, → *šûr*, → *brk* pi. “to praise,” → *gd* pi. “to exalt,” → *rûm* po. “to exalt”); *zmr* pi. “to sing, play, praise” occurs 45x (Psa 41x, additionally Judg 5:3; 2 Sam 22:50; Isa 12:5; 1 Chron 16:9), 19x in impv. pl., 20x sg. and 1x pl. in the voluntative, 4x in the juss., 1x in the inf. (Psa 92:2). Cf. also Bibl. Aram. *šbh* pa. “to praise” (5x in Dan) and Hebr. *šbh* pi. (6x: Psa 63:4; 117:1; 145:4; 147:12; Eccl 4:2; 8:15; hitp. “to boast” Psa 106:47 = 1 Chron 16:35), an Aramaism (Wagner nos. 299–302).

What is the significance of this call to praise? It is necessary because it calls for something that is not taking place or is not taking place sufficiently; indeed, the call issues forth unrelentingly, untiringly, ever anew, because that for which it calls is recognized as absolutely necessary, sustaining, supportive of the community and because a very strong impulse to give praise is present in the community. This compulsion, the conviction that *hll* pi. must take place, is the first element determining the call to praise. It must occur so that God may be recognized, affirmed, confirmed in his deity, indeed, in the fullness of his deity. But that is only one aspect; the many par. verbs of celebration and rejoicing (→ *gîl*, → *rnn*, → *šmḥ* ) demonstrate that this praise of God can take place only in joy, that it is an expression of joy addressed to God. One cannot, therefore, hear the call to praise God in the OT without hearing the encompassed call to joy. The elements that the NT differentiates in the invitation to faith and the call to joy are still one in the OT call to praise.

As a second feature, the use of the verb demonstrates a marked predominance of pl. forms. The impv. call to praise virtually exists only in

the pl. (sg. only Psa 146:1 “Praise Yahweh, O my soul”; 147:12 “Praise your God, O Zion” addresses a collective entity). The fact that, almost without exception, a congregation is called to praise shows that the act of praising God has its proper setting in the congregational gathering; the choir, the plurality of voices, is inherent in it (cf. Isa 64:10 in retrospect: “your holy house, where our fathers praised you”). Through God’s praise, the congregation expresses its self-understanding, its being vis--vis God. Correspondingly, accompanying instruments are mentioned explicitly in the impv. call to praise; they, too, belong to a communal act. Thus *hll pi.* is established as an essential element of worship.

A third element is closely related: This call to praise is not issued in the OT solely to people. This phenomenon is often not sufficiently noted. Praise is an act directed to God that can involve the whole creation; in it, the human being stands as one creature amid others. This observation implies that the human being as a rational being, with the faculties of judgment and conviction, is not properly intended as the subj. of the process described by *hll pi.*, but as a creaturely being, with characteristics shared by the other creatures. In short, the intellect cannot praise God—only the breathing, rejoicing, singing person. An existence relative to God is intended that absolutely cannot come about through reason. Thus the exuberant phrase concluding Psa 150 and the whole Psalter precisely captures the proper sense of God’s praise: “All that has breath, praise the Lord!” (v 6).

The impv. call to praise is appropriate to a particular psalm genre, the descriptive praise of God or hymn. The elements set forth above are characteristic of this genre. The necessity of the ever-new call to praise presupposes the continuation of ever-recurring worship. The recognition of the life-sustaining significance of this praise of God standing behind this call to praise is exhibited in the structure of the descriptive psalm of praise: it seeks to present God in the fullness of his being and action (cf. *PLP* 116ff.). In the affirmation of God’s deity in the joy, which is intended by *hll pi.*, the community at worship recognizes itself over against the God who is not only Israel’s Lord but also the creator and Lord of history; therefore, nations and kings, all of creation can be called to praise (Psa 148; 150). *hll pi.* cannot, however, be limited to this one psalm genre where it originated because, given the tendency to concentrate verbs of praise and joy, the boundaries between the individual verbs of praise were no longer strictly maintained and they more or less assimilated to one another. At any rate, the texts still show that *hll pi.* is the dominant verb of the impv. call to praise as an element of the descriptive praise of God.

The impv. call to praise can be expanded through the juss.: “they should praise” (most clearly in Psa 148:5, 13; also Psa 22:27; 69:35; 107:32; 149:3; grammatically sg.

in 150:6). The juss. occurs otherwise in anticipation of praise in the conclusion of the individual lament (Psa 74:21; 102:19; *tehilla*®, Psa 102:22; 149:1).

(b) In addition to the impv. call to praise, only one other form of the term's use has great significance: the voluntative, in which an individual announces or expresses, in the presence of another, his intention to praise God. This announcement occurs in the vow of praise at the end of the individual lament and in the introit of the descriptive praise (psalm of thanksgiving) of the individual. But the term specific to this form is not *hll pi.* but → *ydh hi.*; thus *hll pi.* occurs in this form only as a variant or supplementary term: at the conclusion of individual laments, Psa 22:23; 35:18; 69:31; 109:30; at the beginning of the psalms of praise, only 145:2 and 146:2; additionally, in the middle of Psa 56:5, 11(bis). Psa 119:171 can also be classified here. Characteristically, however, the special significance of *hll pi.* appears here too: even individual praise occurs in community (expressly emphasized in Psa 22:23, "In the midst of the congregation I will praise you"; 35:18; 109:30). The "I will praise" is frequently expressed nominatively: Psa 119:171, "My lips shall overflow with praise"; 145:21, "My mouth shall proclaim Yahweh's praise"; elsewhere Psa 9:15; 22:26; 35:28; 71:6, 8, 14; 109:1; Jer 17:14.

The relationship of this form "I will praise" (which can only be insufficiently characterized as "vow of praise" or "announcement of praise") to the form "praise!" is clear: the *hll pi.* is affirmed, accepted by an individual. One can also recognize the vital significance of praise in this form; it is so important that the decision for it and the joy in it must be expressed: "His praise shall ever be in my mouth!" (Psa 34:2). As the call to praise must be issued, so also must it be expressed in the presence of others: I want to be present! One senses in this group of texts that the speakers saw the affirmation of God's praise and the affirmation of life as a participation in the stream of events. This form particularly manifests the distinction from the Chr's use (see 4d): The institutionalization of God's praise makes such an affirmation, such a decision to praise God, unnecessary; it was, after all, decreed, established, and proceeding according to official decree. But that which the Psa refer to by *hll pi.* requires personal impulse; the spontaneous character is necessarily inherent in it; it is only authentic praise of God if it arises from this spontaneous impulse.

The special character of *hll pi.* becomes even clearer in a small group of passages that belong to neither of these two forms but that fosters reflection concerning God's praise and thus reflectively highlights the uniqueness of this praise. In this reflective usage, God's praise and God are closely identified with one another, on the one hand: "You are due praise" (Psa 65:2; cf. 147:1). Jeremiah can confess: "For you are my

praise” (Jer 17:14). Psa 109:1 addresses God: “God my praise,” and Deut 10:21 states: “He is your praise and your God.” Psa 22:4 is unique: “You who are enthroned upon the praise of Israel.” On the other hand, human existence and praise of God are closely identified with one another: “let my soul live, that it may praise you!” (Psa 119:175). The statement “the dead do not praise Yahweh” (Psa 115:17; Isa 38:18) negatively articulates the same sentiment: Praise of God is essential to existence; it is itself a manner of existence. If it has ceased, authentic life has also ceased. Thus the one who participates in the fullness of existence is praised as fortunate, as is the one who praises God (Psa 84:5). *hll pi.* is existential joy directed to God, singing to God.

(c) The word has another only slightly different meaning, although it should still be classed separately, in which the profane meaning “renown (noun), to laud” (see 3) refers to God. This difference is esp. true for *hll hitp.* and *tehilla*®. Everyday or gnomic self-praise is applied to descriptions of God so that one can say: “Glorify his holy name!” (Psa 105:3 = 1 Chron 16:10) or “Glorify the Lord, O my soul” (Psa 34:3). As the form shows (Psa 105:3 belongs to the impv. call to praise, Psa 34:3 to the announcement of praise), *hll hitp.* with God as obj. approximates here an alternative term for “to praise.” Thus it can parallel *šmḥ* “to be happy” in the conclusion of a psalm (Psa 64:11).

Accordingly, God’s glory can be discussed: “The earth is full of his renown” (Hab 3:3). Thus *tehilla*® can parallel *kābôd* “glory” (Isa 42:8) or *šēm* “name” (Psa 48:11; cf. Isa 48:9). God’s renown is proclaimed (Isa 42:12; 60:6), reported (Psa 78:4; 79:13), and amplified (71:14).

A few of these passages have the pl. *tʿhillôt* (Exod 15:11; Psa 78:4; Isa 60:6; 63:7), which can be rendered “famous deeds.” It is typical of Hebr. that this pl. does not mean to express, e.g., the variety of statements of praise (cf. Psa 22:4), but the variety of occasions to praise, i.e., God’s deeds that awaken praise or exaltation. Exaltation and that to be exalted are understood as a unity. This linguistic peculiarity also has a theological component: Passages in which *hll pi.* with God as obj. means “to extol” and *tehilla*® means “famous deed” presuppose that the deity of God cannot be understood in the OT as being per se, as a transcendental Being; God is not God other than in his action, and, in turn, nothing other than human experience reacts in praise.

(d) The second group of occurrences in addition to the Psa is found in the Chr. A remarkable difference in usage consists in the fact that here almost all passages report or express something concerning God’s praise; but the Psa employ the word only to set the praise of God in motion (in the impv. call to praise), to ignite it (voluntative), to state that it should take place (juss.), while narrative and declarative forms are almost totally absent. Moreover, not only the frequent occurrence in the Chr but also the accentuated meaning of *hll pi.* is noteworthy; it occurs frequently at high

points in the narrative of the sequence of events, and it is particularly emphasized (e.g., 2 Chron 5:13; 7:6; 29:30; Ezra 3:10f.). This emphasis is often specifically articulated: “with a loud voice” (2 Chron 20:19), “with all might” (30:21 txt em), “with joy” (29:30), and esp. informative, 2 Chron 5:13: “And as they blew and sang together, they sounded as one voice to the glory and praise of Yahweh.” It is evident that God’s praise was something decisively important, something supremely central, not only for the concept of worship but also for the concept of relationship to God. At the same time, however, it must be an expression of the core of the speaker’s existence; personal engagement is involved in all these phrases. God’s praise must have expressed the fulfillment of existence for these people in a special way. It must be born in mind, in this respect, that the clergy speaks here.

Consequently, the second, even more marked component is the institutional character of this praise of God. (1) It is explained as an institution, i.e., God is praised in a service arranged for this purpose (2 Chron 8:14), and this arrangement goes back to David (2 Chron 7:6; 8:14; Neh 12:46), it occurs “according to David’s direction” (Ezra 3:10). (2) Praise of God is conducted according to a fixed order of service (Neh 12:24) that regulates even the details; singers are “appointed” and wear vestments (2 Chron 8:14; 20:21; Ezra 3:10); it is commissioned (1 Chron 16:4). The order of service also regulates the time: “Moreover, they are to appear morning by morning and in the evenings for the glory and praise of Yahweh” (1 Chron 23:30); this is an inherent obligation of their service (2 Chron 8:14; 31:2). (3) Thus the decisive change with respect to the pre-exilic era is apparent: the praise of God has become a matter for the temple singers. The congregation can certainly join in praise (Ezra 3:11) or it can respond with the Amen (1 Chron 16:36; Neh 5:13); but the priests and Levites are expressly named as subjs. in the vast majority of passages that mention the praise of God.

There can be no question that the cultivation of this cultic music, which is at once vocal and instrumental, brought it to a high state, and that we must recognize a high cultural achievement in the Jerusalemite temple music of the Pers. and Gk. eras. There can also be no question that the temple music performed by the priests and Levites was a concern of the whole nation and an essential element of the community’s worship in which the community participated, body and soul. But, at the same time, one must recognize the deep change that resulted from the institutionalization of God’s praise. An objectivization and technologization of God’s praise is almost necessarily linked to this institutionalization; it resounds unmistakably in some of the expressions cited above; it is evident in the fact that many passages consistently give the content of God’s praise in the refrain “thank the Lord, for he is good” (2 Chron 5:13; 7:6; 20:21; Ezra 3:10, 11), which is now formulaically fixed. It is also evident in the fact that

various Psa are mechanically combined in the psalm excerpts cited in Chron; the original structure of the psalms no longer seems to have meaning. One phrase is highly informative for the understanding of *hll pi.* in the Chr: “. . . who is exalted above all praise and fame” (Neh 9:5). To be sure, this phrase intends to pronounce a very special praise; in reality, it can lead to the severance of the mainspring of praise. In the early period, God is seen as exalted above all praise, but the majesty of God is present in Israel’s praise rising to him (Psa 22:4).

(e) Another usage occurs in a relatively small group of texts in the context of prophetic speech. Although both the Psa and Chr deal exclusively with the ongoing praise of God, prophetic passages, esp. in the context of the announcement of salvation, speak of God’s future praise or future glory. This language is best understood on the basis of the nom. usages. The intended obj. of the *tehilla*® here is Israel. Interestingly, the present or past of famed Babylon, Tyre, etc., are discussed, but not the *tehilla*® of Israel or Jerusalem. The discussion of Israel’s glory is possible only in the dismay of the deep shame signified by the collapse of Judah, as mirrored in Lam. Only now does prophecy announce that Israel or Zion will again come to glory, *tehilla*®. This glory will, however, be entirely the work of God: “Until he makes it (Zion) the glory of earth” (Isa 62:7); “You will call your walls salvation and your gates glory” (60:18; cf. 61:11; Jer 13:11; 33:9; Zeph 3:19, 20; also Deut 26:19).

But the verbal use also undergoes a turn to the future in prophetic speech: in the very brief songs of praise with which Deutero-Isaiah occasionally concludes a section, the impv. call to praise appears in a new sense: already in the present, the prophet calls for praise and jubilation over God’s newly announced saving act to restore Israel’s homeland. Here, however, mostly terms of joy and jubilation appear (*tehilla*® only Isa 42:12); this form of song, praising God’s saving act in the future, is imitated in Jer 20:13; 31:7 (pi.). In Isa 62:9 and Joel 2:26, the praise of God responds to God’s new act of blessing announced for the era of salvation.

5. The LXX translates *hll pi.* mostly with *ainein*, etc., also with *hymnein* and *exomologeisthai*, *hll hitp.* with *enkauchasthai*, *epainein*, and *endoxazesthai*, etc. The noun is rendered mostly with *ainesis*, as well as with *hymnos*. The translation covers the semantic range of the Hebr. word rather extensively. The call to praise *hal’lû-yāh* is already so liturgically established that it is transliterated by LXX: *allēlouia*. Verb and noun are also attested in Qumran (Kuhn, *Konk.* 60, 230; also *GCDS* 516). The few NT occurrences stand entirely in the OT tradition; cf. H. Schlier, “αἰνέω,” *TDNT* 1:177f.; id., “ἀλληλουϊά,” *TDNT* 1:264; G. Delling, “ὕμνος,” *TDNT* 8:489–503.

## החם *hmm* to confuse

S 2000; BDB 243a; HALOT 1:251a; TDOT 3:419–22; TWOT 507; NIDOTTE 2169

1. The verb *hmm* and its by-form *hûm* in the meaning “to bring into confusion” are limited to Hebr. and, with only a few examples, Aram.

Together with *hmh* “to make noise” and *nhm* “to growl, snarl,” they may belong to a biradical root *hm* “to make noise, be restless, startle,” etc., widespread in Ssem. with an intrans. meaning and in reduplicated formations.

*hmm* occurs in Tg. Aram. and *hûm* in Old Aram. in the etpe. “to be beside oneself, be confused, lament” (KAI no. 226.6: *hwm ʾthmw*; ANET 661b “being distraught”; DISO 64). Cf. also Ug. *nhmmt* “confusion, concern” (so WUS no. 846; CML 1 156a; contra UT nos. 778, 1621; CML 2 152).

A root *hmm* II is apparently present in Jer 51:34, which, following an Arab. counterpart, should be rendered “to suck dry” in accord with the par. expression *ʾkl* “to devour” (cf. HAL 241a).

The ni. forms may derive from *hmm* or *hûm*. The hi. forms of *hûm* are textually very problematic. The subst. *m<sup>e</sup>hûmâ* “confusion, panic” derives from *hûm*.

2. *hmm* qal occurs 12x (excl. Jer 51:34; see 1), *hûm* qal 1x (Deut 7:23), ni. 3x (1 Sam 4:5; 1 Kgs 1:45; Ruth 1:19), and hi. 2x (Mic 2:12 and Psa 55:3, emended by HAL 232b as a form of *hmh* or *hûm* ni.). *m<sup>e</sup>hûmâ* occurs 12x.

3. The basic meaning of *hmm* is “to bring into unrest, confuse.” The subj. is Yahweh 10x (or the “hand of Yahweh” in Deut 2:15); thus the word has an almost exclusively religious usage (as does *hûm* qal and, with the exception of Amos 3:9 “tumult” and Prov 15:16 “unrest,” *m<sup>e</sup>hûmâ*; see 4b).

Exceptions are Esth 9:24, with Haman as subj. (*hmm* “to confuse,” par. *ʾbd* pi. “to destroy”; cf. Bardtke, KAT 17/5, 394), and Isa 28:28, with “the ploughman” as subj. (obj. “wagon wheel and steed”; “to bring into confusion, drive along” may be considered as a possible meaning).

Ni. passages (see 2) may all be rendered “to fall into unrest, agitation.”

4. (a) The religious usage of the verb has its original setting in the

narratives of holy war (Exod 14:24, exodus from Egypt; Josh 10:10, battle in Gibeon; Judg 4:15, Deborah's battle; 1 Sam 7:10, victory at Ebenezer; cf. G. von Rad, *Holy War in Ancient Israel* [1991], 48f.). The concept suggests that at the beginning of the battle Yahweh sends confusion among the enemy troops. Yahweh, not the Israelite army, is the expressed author of the confusion; the process occurs "before the eyes of the Israelites" (Josh 10:10) or "before Barak" (Judg 4:15). According to 1 Sam 7:10, Yahweh sends the confusion in the midst of a thunderstorm. Deut 7:23 characterizes the whole event in its ideal course and in reference to the conquest (cf. Exod 23:27).

In Deut 2:15, conceptual horizons and vocabulary resemble those of the passages just treated, yet the obj. of the confusion is Israel itself, placed under the "terror of God" as punishment for its disobedience. This use is an original variation of the motif by the author of the first Dtn introductory discourse; cf. also 2 Chron 15:6.

2 Sam 22:15 = Psa 18:15 (in the theophany, Yahweh brings confusion among the powers of chaos) and Psa 144:6 (a theophany of Yahweh in battle against the nations) stand within the specifically Jerusalemite tradition of battle with chaos and the nations. One should probably attribute the use of the verb *hmm* to the influence of the holy war tradition; both streams of tradition apparently began to have influence in Jerusalem very early.

(b) The subst. *m<sup>e</sup>hûmâ* "confusion" is also at home in the ideology of the holy war (Deut 7:23; see 4a; 28:20 in the curse threat; cf. Deut 2:15 and 2 Chron 15:5; 1 Sam 5:9, 11: the ark taken away to Philistia causes a divine terror; in the Prophets: Isa 22:5 par. *m<sup>e</sup>bûkâ* "confusion"; Ezek 7:7; 22:5; Zech 14:13; → *yôm* ), as well as in its eschatological form in the prophetic concept of the "day of Yahweh" (cf. von Rad, *Theol.* 2:119–25).

The OT knows of the following additional terms for the phenomenon of "divine terror":

(1) *h<sup>a</sup>rādâ* or *herdat* *lōhîm*. 1 Sam 14:15(bis) with an earthquake as an accompanying manifestation;

(2) *ēmâ*. Exod 15:16; 23:27; Josh 2:9 (in each case in reference to the conquest); Deut 32:25 as a curse threat; in another usage in Gen 15:12 (terror falls upon Abraham);

(3) *paḥad*. Exod 15:16; Deut 2:25; 11:25 (in each case in reference to the conquest); Isa 2:10, 19, 21 (in conjunction with the day of Yahweh); according to 1 Sam 11:7 after Saul's call to arms, the terror of Yahweh fell on the people;

(4) *ḥittat* *lōhîm*. Gen 35:5 (in conjunction with Jacob's pilgrimage from Shechem

to Bethel, the surrounding cities are overcome by divine terror).

What may one conclude on this basis concerning the phenomenon of divine terror? It consists of a primarily neutral “being beside oneself,” an ecstasy called forth by God that paralyzes any capability for action. It can have a positive character (Gen 15:12; 1 Sam 11:7); in the holy war, however, it affects the enemies, who then fall defenselessly victim to Israel. Like the holy war in general, the concept is linked with the ark (1 Sam 5:9, 11) and goes back to the nomadic existence of Israelite tribes (similar concepts among Bedouin tribes, for whom the clan god, represented by a mobile sanctuary and identified with Allah, is warlord in decisive battles and fights the enemy; cf. A. Musil, *Manners and Customs of the Rwala Beduins* [1928], 571ff.).

In the Dtn ideology of the holy war, the motif characterizes Israel’s victory over the enemy as the work of Yahweh alone (cf. von Rad, *Holy War*, 115–27). Its basic connotation is thus the “*soli deo gloria*.”

5. In the NT the motifs indicated here are no longer active.

F. Stolz

## הִנֵּה *hinnēh* **behold**

S 2009; BDB 243b; *HALOT* 1:252a; *TWOT* 510a; *NIDOTTE* 2180

1. Interjections and particles comparable to *hēn* or (the expanded form) *hinnēh* “behold” are attested in almost all Sem. languages (cf. *HAL* 242a).

In the OT environment, cf. Ug *hn* (*UT* §12.7 and no. 782), Akk. *annû* in EA (*AHW* 53b; *CAD* A/2:138; cf. too A. Salonen, *AfO* 19 [1959/60]: 157b), Phoen.-Pun. *hn* (Friedrich 120; Sznycer 77f., 89, 106f.).

Aram. *hn* means “if” (*DISO* 66; Bibl. Aram. *hēn*, 15x; KBL 1069f.), but *hʿ* (*DISO* 62; Bibl. Aram. *hāʿ*, Dan 3:25) or *hlw* (*DISO* 65; Bibl. Aram. <sup>ʿ</sup>*lû*, Dan 2:31; 4:7, 10; 7:8[bis]; KBL 1050b; along with <sup>ʿ</sup>*rû*, Dan 7:2, 5–7, 13; KBL 1053b) are used as the interjection “behold” (Leander 128; BLA 266).

*hēʿ* “behold” appears twice in the Hebr. OT (Gen 47:23; Ezek 16:43 txt?), cf. Aram. *hʿ*. Some authors view *hēmmâ* in a series of passages not as the per. pron. “they” (3d masc. pl.) but as an equivalent to *hinnēh* (see T. F. McDaniel, *Bib* 49 [1968]: 33f. on Lam 1:19; following the Ug. *hm*, *WUS* no. 837).

2. *hinnēh* occurs (according to Mandl.) a total of 1,057x in the OT (*hinnēh* 446x; *w<sup>e</sup>hinnēh* 360x, incl. Jer 18:3 Q; *w<sup>e</sup>hin<sup>e</sup>nî* 181x, in Isa 65:1 twice; with other sufs. 70x, 37x *w<sup>e</sup>hinnām*); it is distributed over all portions, numerous in Jer (138x), Gen (125x), Ezek (114x), 1 Sam (84x), Isa (77x), Min. Pr. (63x), Kgs (55x each), 2 Sam (46x), Judg (44x), Exod (41x), 2 Chron (40x), thus primarily in the Prophets and in the narrative literature.

*hēn* (100x) is frequent in only a few books (Job 32x, Isa 27x, Gen 12x, Exod and Psa 5x each, Num and Deut 4x each, Lev 3x, Jer, Prov, and 2 Chron 2x, Ezek and Hag 1x each).

3. *hinnēh* (*hēn*, *hē<sup>ʔ</sup>*) can still be recognized as a component of a primitive command, presenting the substance of the command (e.g., Gen 47:23b; cf. BrSynt 3). In the dual function of an address or exclamation as well as the temporal characterization of an event or circumstance, the interjections refer to a person or thing. Followed by a noun they form a clause (e.g., Gen 12:19; 15:17), they precede a complete nom. clause (e.g., Gen 28:15), or they replace a clause (e.g., Gen 22:1, 7; 30:34; Job 9:19). Rarely, they introduce a verbal clause and accent the predicate (e.g., Gen 12:11). On the syntax and style of *hēn /hinnēh*, cf. GKC §§116p, q, 147b; BrSynt 3, 52, 56; K. Oberhuber, *VT* 3 (1953): 5, 10; L. Alonso-Schökel, *Bib* 37 (1956): 74–80; J. Blau, *VT* 9 (1959): 132f.

The (asyndetic) impv. of *r<sup>ʔ</sup>h* “to see” can assume a similar function as a call for attention and a demonstrative in that it loses its proper verbal significance (in approximately 1/3 of all cases, e.g., Gen 27:27; 31:50; 41:41; Exod 7:1; 31:2; 33:12; Deut 1:8, 21, etc.; fem. 1 Sam 25:35; pl. Gen 39:14; Exod 35:30; Josh 8:4, 8; 23:4; 2 Sam 15:28; recognizable e.g., in Gen 37:14; 1 Sam 24:12; 26:16; 1 Kgs 12:16; Ezek 40:4, etc.); cf. 2 Sam 7:2 *r<sup>e</sup>ēh nā<sup>ʔ</sup>* with the par. passage 1 Chron 17:1 *hinnēh*; see Lande 15f., 53.

In a few passages (not clearly distinguishable owing to the fluid transition) *hēn* has assumed the meaning “if” under Aram. influence (e.g., Exod 8:22; Isa 54:15; Jer 3:1; Hag 2:12; 2 Chron 7:13; cf. Wagner no. 74).

4. From a theological perspective, the frequent use of *hinnēh* as an introduction to the prophetic announcement of judgment indicating God’s intervention should be emphasized. In this position, the attention getter combines readily with 1st-per. divine speech as *hin<sup>e</sup>nî* with ptcp. (cf. P. Humbert, “La formule hébraïque en *hineni* suivi d’un participe,” *REJ* 97 [1934]: 58–64 = *Opuscles d’un hébraïsant* [1958], 54–59; K. Koch, *Growth of the Biblical Tradition* [1969], 211f.); cf. also the so-called challenge formula *hin<sup>e</sup>nî ʔēleykā* “behold, I want at you” (P. Humbert, *ZAW*

51 [1933]: 101–8 = *Opuscles* 44–53). As a rule, the formula precedes the causal clause (cf. H. W. Wolff, *ZAW* 52 [1934]: 2–6); it frequently stands in the immediate context of the messenger formula (e.g., Jer 6:21; 9:6; 10:18); cf. *BFPS* 149; R. Rendtorff, *ZAW* 74 [1962]: 176f.). Usually a pf. cons. follows. Less frequently the formula is formed with *hinnēh ʾānōkî / ʾānî* instead of with *hin<sup>e</sup>nî* (e.g., Amos 2:13; on this and the use of *hinnēh* in Amos, cf. Wolff, *Amos*, Herm, 142). A simple (*w<sup>e</sup>*)*hinnēh* also introduces the announcement of intervention for judgment (rarely in the divine 1st per. with a finite verb, e.g., Jer 7:20; Ezek 22:13; more often in the 3d per. of God, e.g., Amos 9:8; Isa 3:1; most frequently in the description of God’s activity, e.g., Amos 4:2; Jer 7:32) and in isolated cases the consequences of intervention (e.g., Ezek 30:21); a few times it underscores the cause (e.g., Jer 6:10; Ezek 22:6).

*hinnēh* probably comes to prophetic judgment speech from the prophetic vision report (e.g., Amos 7:1, 4, 7; Jer 4:23–26; Ezek 1:4; 2:9; cf. H. W. Wolff, *Frieden ohne Ende* [1962], 38ff.). Here it assumes the same positions as in the seer’s oracle and in the dream account, both of which belong to the background of the prophetic vision report. In the seer’s oracle, the deictic particle is connected to a verb meaning “to see” and signals the narration of the vision perceived by the seer alone (e.g., Num 23:9). In the dream account, *w<sup>e</sup>hinnēh* follows the introductory verb *hlm* “to dream” (Gen 28:12; 37:6f., 9; 41:1, 5; Judg 7:13) or the subst. *h<sup>a</sup>lôm* “dream” (Gen 40:9, 16; 41:22; *hin<sup>e</sup>nî* with ptcp. in Gen 41:17). It opens the description of the vision and simultaneously marks its importance for the hearer.

By contrast, the indicative function of the particle in prophetic announcements of salvation (e.g., Isa 38:5) as in symbolic announcements (which derive from them; e.g., 1 Kgs 11:31; 13:3; Isa 38:8; cf. Josh 3:11) may be explained in terms of a divine decision pronounced in response to an inquiry (e.g., in holy war: Judg 1:2; 1 Sam 24:5; cf. G. von Rad, *Holy War in Ancient Israel* [1991], 42f.; cf. also the designation formula, e.g., 1 Sam 9:17 with Isa 42:1; 52:13).

5. In the LXX in by far the majority of cases, *idou* corresponds to the Hebr. interjections, in vision reports (esp. in Ezek) also *eidon kai idou*.

The later history of this command for attention, “behold,” reaches into apocalyptic literature (e.g., Dan 8:3, 5; 10:5), visionary presentations (e.g., Matt 17:3; Acts 4:1), and announcements of God’s activity in the NT (e.g., Luke 1:31; 2:10; cf. W. Michaelis, “ὄραω,” *TDNT* 5:315–82; P. Fiedler, *Die Formel “Und siehe” im NT* [1969]).

הַר *har* **mountain** → שִׁיּוֹן *šiyyôn*

זָכַר *zkr* **to remember**

S 2142; BDB 269b; HALOT 1:269b; TDOT 4:64–82; TWOT 551; NIDOTTE 2349

1. (a) *zkr* is the form of the common Sem. root *dkr* shared by Hebr., Akk., most NWSem. dialects, and Eth.

*dkr* occurs in Ug. (in PNs: *UT* no. 724; Gröndahl 71, 196), Old SArab. and Arab., *dkr* in dialectical variants of old WSem. PNs (W. L. Moran, FS Albright 68n.34; cf. Huffmon 187) and in later Aram. dialects (esp. Bibl. Aram.). On Phoen.-Pun. *skr* (not yet *zkr* in the hypocoristic PNs on 11th/10th cent. BCE arrowheads, *KAI* no. 22), cf. *GVG* 1:164; Friedrich 20.

Of the root's two meanings in Old SArab. and Arab., "to remember" and "to mention," the former, "to remember," is the basic meaning of *zkr* in Hebr. and the NWSem. inscriptions (*DISO* 76f.). In contrast, Akk. *zakāru* "to say, speak, mention, swear" (*CAD* Z:16–22) is purely a verb of speaking (a thorough treatment of *zkr* in the Sem. languages is in W. Schottroff, "Gedenken" im Alten Orient und im AT [19672], 1–106).

In Akk. and Ug., where, however, the meaning of *dkr* is not yet discernible, *ḥasāsu* (*CAD* H:122–25; *AHw* 329f.) and *ḥss* (*UT* no. 986; *WUS* no. 1060) mean "to remember."

Contrary to the equation of the meanings of Hebr. *zkr* and Akk. *zakāru* proposed by P. A. H. de Boer (*Gedenken und Gedächtnis in der Welt des AT* [1962], esp. 44, 63f.), the Can. gloss in *EA* 228:19 from Hazor (*li-iḥ-šū-uš-mi/ia-az-ku-ur-mi* "may the king, my lord, remember everything that has been done against Hazura") already supports the identification of *zkr* with Akk. *ḥasāsu* "to remember" that took place in pre-Hebr. SCan. (Meyer 1:24f.).

There is no evidence for an etymological relationship to the homonymous word *zākār* "male" (yet Ug. diverges with *dkr*: *WUS* no. 740, or *da-ka-rum*: C. F. A. Schaeffer, *AfO* 19 [1959/60]: 194; cf. Schottroff, op. cit. 4–8, 372; P. Fronzaroli, *AANLR* 8/19 [1964]: 244).

(b) Besides the qal of *zkr*, "to remember," Hebr. attests the hi. counterpart to Akk. *zakāru*, "to mention, name," and the ni. pass. of the qal and hi. "to be remembered" (cf., however, J. Blau, "Reste des i-Imperfekts

von *zkr*, *qal*,” VT 11 [1961]: 81–86). Nom. formations of the root occurring in the OT are:

(1) the segholate *zēker* “memory, mention, name,” also attested as an nomen actionis in the nom. form *qitl* in Akk. (*zikru* “statement, command, name,” CAD Z:112–16), Phoen.-Pun., Aram. (*zkr*, DISO 77), Old SArab. (*dkr*, RES 2693.7), and Arab.;

(2) the abstract noun with (-ān >) -ōn, *zikkārōn* “memorial” (Eccl 1:11; 2:16, Aramaizing *zīkrōn*; Bibl. Aram. \**dokrān*, \**dīkrōn*; cf. BLA 195; J. Cantineau, *Le Nabatéen* [1930]: 1:47f.) occurring also in Phoen. (*skrn*), Aram. (*zkrn*, *dkrn*, *dkrwn*, DISO 78), and Old SArab. (*dkrn*; G. Ryckmans, *Muséon* 71 [1958]: 127 no. 4);

(3) the sacrificial term *ʔazkārâ* (cf. R. Rendtorff, *Studien zur Geschichte des Opfers im Alten Israel* [1967], 185–87), probably related to the technical usage of the hi. for sacrifice (Isa 66:3; Psa 38:1; 70:1) and perhaps to be translated with “appeal (to a name)” (R. Dussaud, *Les origines cananéennes du sacrifice israélite* [1941], 93–95; D. Schötz, *Schuld- und Sündopfer im AT* [1930], 55) in analogy to the appeal to the deity during sacrifice in Akk. (cf. Schottroff, op. cit. 27f., 328–38) and Aram. (a statue of Hadad from Zinjirli, KAI no. 214.16: *yzbḫ hdd wyzkr ʔšm hdd* “undertakes sacrifices for Hadad and calls on the name of Hadad”);

(4) the substantival hi. ptcp. *mazkîr* “speaker, herald,” translating the Eg. official title *whm.w* as a term for an office in the Jerusalemite royal court (J. Bégrich, ZAW 58 [1940/41]: 1–29 = GS [1964], 67–98; R. de Vaux, RB 48 [1939]: 394–405; differently, H. Reventlow, TZ 15 [1959]: 161–75; contra H. J. Boecker, TZ 17 [1961]: 212–16);

(5) the verbal adj. *zākûr* “mindful” (GKC §50f; Meyer 2:28).

It is disputed whether *zēker* should be understood as a denominative from the hi. (B. Jacob, ZAW 17 [1897]: 48f.; J. Bégrich, *Studien zu Deuterocesaja* [1963], 33n.94; id., GS [1964], 79n.29; B. S. Childs, *Memory and Tradition in Israel* [1962], 12) or as a causative of the *qal* (J. J. Stamm, TZ 1 [1945]: 306; de Boer, op. cit. 15f., 63) and whether *ʔazkārâ* should be treated as a subst. with an *ʔ* as an element of the stem and a concrete meaning like *ʔalmānâ* “widow” (G. R. Driver, JSS 1 [1956]: 99f.) or as an abstract formation in the form of an Aramaizing ha. inf. (Meyer 2:33) or ap. inf. (GKC §85b; Wagner 133).

The two Bibl. Aram. examples of the root, *dokrān* (Ezra 4:15) and *dīkrōn* (Ezra 6:2), have the meaning “record,” which occurs frequently in Imp. Aram. papyri from Egypt (DISO 78); under Aram. influence, Hebr. *zikkārōn* in Exod 17:14; Mal 3:16; Esth 6:1 also adapts to this meaning (Wagner no. 76a; on *zikkārōn* in Isa 57:8, cf. Schottroff, op. cit. 319–21).

On the PNs formed with *zkr*, see 4a.

2. Forms of the root *zkr* occur in the MT a total of 288x: qal 171x (Psa 44x, Deut 15x, Jer 14x, Ezek 10x, Neh 9x, Job 8x, Deutero-Isa 7x), hi. 31x (Psa 6x), ni. 20x (Ezek 8x), *zēker* 23x (Psa 11x), *zikkārôn* 24x (only exilic and post-exilic, P in Exod–Num 14x), *ʔazkārâ* 7x (P in Lev–Num), *mazkîr* 9x, *zākûr* 1x (Psa 103:14); in addition, Bibl. Aram. *dikrôn* and *dokrân* 1x each. The root does not occur in Joel, Obad, Zeph, Hag, Ruth, Dan.

Textual criticism: Exod 34:19 read with Vers. *hazzākār*, Isa 63:11 read *wayyizkârû*, Jer 23:36 read with LXX *tazkîrû*, Ezek 16:22, 43 read with Q *zākart*, Nah 1:14 read probably *yizzākēr* (cf. *BHS*); Nah 2:6 read probably *yizzākârû* (cf. LXX; see *BHS* and E. Sellin, *Das Zwölfprophetenbuch*, KAT, 365, 368); Psa 77:12a read with Q, Vers. *ʔezkôr*; Psa 89:48 read *zʔkor-ʔdōnāy*, 1 Chron 16:15 read *zākar* (cf. Psa 105:8).

3. (a) *zkr* may hardly be understood as a primarily cultic (F. Schwally, *ZAW* 11 [1891]: 176–80; H. Gross, *BZ NS* 4 [1960]: 227–37; contra B. Jacob, *ZAW* 17 [1897]: 48–80), legal (H. Reventlow, *TZ* 15 [1959]: 161–75; contra H. J. Boecker, *TZ* 17 [1961]: 212–16; id., *Redeformen des Rechtslebens im AT* [1964], 106–11), or ancient magical term (*ILC* 1–2:106f., 256f.; de Boer, op. cit. 64; contra Childs, op. cit. 17–30). The various usages of the root in the OT oppose derivation from a single origin. The basic meaning of the qal (and, correspondingly, of the related ni. pass.) is “to remember.” Evidence of this basic meaning can be seen in the use of the verb in contrast to *škh* “to forget” (13x) and *mhh* “to wipe away, blot out” (Isa 43:25; Psa 109:14; Neh 13:14) and parallel to verbs and expressions for acts of thought, e.g., *bîn* “to pay attention to, understand, perceive” (Deut 32:7; Isa 43:18), *hgh* “to consider (begrudgingly)” (Psa 63:7; 77:7 txt em; 143:5), *hšb* “to take into account, consider” (2 Sam 19:20; cf. Psa 77:6f.), *šîah* “to meditate” (Psa 77:7; 143:5), *ʔh ʕal lēb* “to come to mind,” etc. (2 Sam 19:20; Isa 46:8; 47:7; 57:11; 65:17; Jer 3:16; 44:21; 51:50), as well as the occasional purposive focusing of memory on recognition (Mic 6:5; Ezek 6:7–10).

But that *zkr* connotes an active relationship to the obj. of memory that exceeds a simple thought process (*ILC* 1–2:106f., 256f.; cf. Childs, op. cit. 17–30; Schottroff, op. cit. passim) is already indicated somewhat by these contrasts and pars., and even more clearly by others, e.g., *gZR* ni. “to be cut off” (Psa 88:6), *brk* pi. “to bless” (Psa 115:12), which also parallels *zkr* in the Sem. languages (esp. in the Nab. Sinai graffiti; cf. Schottroff, op. cit. 71f.), *ʕsh hēsed* “to demonstrate covenant loyalty” (Gen 40:14; Judg 8:34f.), *pqd* “to be concerned about” (Jer 3:16; 14:10; 15:15; Hos 8:13 = 9:9; Psa 8:5 106:4; cf. Isa 23:17), the opposition with *šmr* “to observe, keep” (cf. Exod 20:8 with Deut 5:12; also Psa 103:18; 119:55), moreover, the purposive focusing of memory on a particular deed (*zkr le* plus inf. cs., similar to *ʔmr lʕ* plus inf. cs., “to remember to do

something,” Exod 20:8; Psa 103:18; 109:16; or *zkr kî* plus obj. clause, Job 36:24; cf. Num 15:39).

(b) No semantic evolution may be traced. Yet terms in the semantic field and special constructions occasionally demonstrate nuances of meaning.

Thus in passages that have lament expressions in the semantic field of *zkr* (Num 11:4f.; Psa 42:5, 7; 137:1; Lam 3:20), memory participates in the lament emphasis. In other passages, e.g., Neh 4:8, where *yrt* “to fear” is an antonym for *zkr*, the verb expresses an attitude of trust or, as in Ezek 23:27, where *ns’ ênayim ʔel* “to raise the eyes toward” parallels it, a longing need.

Inclusion among terms for hymnic praise of God (Psa 105:1–5 = 1 Chron 16:8–12; cf. Psa 63:6f.) or use as an expression for the call to prayer (Job 2:8; cf. Psa 119:55) indicates that the basic stem can also signify an announcement (B. Jacob, *ZAW* 17 [1897]: 63; cf. too de Boer, op. cit. 14f.).

In passages that use *zkr* with the *dativus commodi* (*incommodi*) of person and the acc. of object construction (e.g., Jer 2:2; Psa 79:8; 98:3; Neh 13:22), that append a prep. expression with *ke* “according to” (Neh 6:14; cf. Psa 25:7) or *ʕal* “on account of (particular deeds)” (Neh 13:14, 29), or that state the obj. of memory with *l’ôbâ* “for good” (Neh 5:19; 13:31; cf. *bṯb* in the Nab. Sinai graffiti and *lṯb* in the Aram. inscriptions from Hatra; Schottroff, op. cit. 68–78, 83–85) instead of the objective acc., *zkr* conveys a saving or harmful intention: “to remember to someone’s benefit/harm.”

(c) Nevertheless, the most frequent construction is the acc. of object or of person (indicated in late texts by an Aramaism with *le*: Exod 32:13; Deut 9:27; Psa 25:7; 136:23; BrSynt 87) or the obj. clause introduced by *kî*, *ʔēt ʔscr, mâ*. Memory pertains to past events that the memory awakens to realization because of their present significance (Gen 42:9; Num 11:5; 2 Kgs 9:25), to places and objects to which the one remembering clings (Jer 3:16; 17:2; Psa 42:5, 7; 137:1, 6), but also to present realities that have a formative character for existence (Isa 54:4; Job 11:16; Prov 31:6f.; Eccl 5:18f.; Lam 1:7; 3:19f.) or demand observation as an obligation (Num 15:38–40; Josh 1:13–15; Mal 3:22; Amos 1:9 too; cf. the usage of *zkrn* with a view to the content of an international treaty: *KAI* no. 222C.2f.; Fitzmyer, *Sef.* 18f., 73).

Fixed usages are:

(1) the application of *zkr* in the experience of amenable circumstances, which in the wisdom realm will be given imperative, examined reflection, with regard to their consequences and in the service of certain admonitions (Job 4:7; 40:32–41:1; Eccl 11:8; Sir 7:11, 16; 8:5, 7; 9:12; 14:11f.; 31:12f.; 41:3; cf. also Judg 9:2; Job 21:6f. and Isa 47:7; Lam 1:9); Job 13:12 seems to call such admonishing reminders *zikkārôn*;

(2) the courtly use of *zkr*, also attested extrabiblically (Lachish Letter II = *KAI* no. 192.4; cf. *ANET* 322a; Aḥ. 53, Cowley 213, 221; cf. *ANET* 428a), to indicate the relationship in which a superior approaches an inferior (Gen 40:14, 23; 1 Sam 25:31; cf. Eccl 9:15). Discussion of a ruler's remembering (EA 228:18–25; Esth 2:1; cf. too Esth 6:1–11) or not remembering (2 Sam 19:20; 2 Chron 24:22) an act of loyalty or disloyalty done him belongs in the context of this courtly use (Schottroff, op. cit. 43f., 116f., 164, 384f.), which is still not a specifically juristic use of *zkr* (thus Boecker, *Redeformen* 106–11). Such remembering finds expression in demonstrations of mercy or vengeful interventions as acts of dominion.

(d) In the derived stems and the nom. formations of the root the following peculiarities are noteworthy: parallelism with various verbs of speaking (cf. Exod 23:13; Isa 43:26; 49:1; Jer 4:16; 23:35f.) and contrast with words for “keeping silent” (Isa 62:6; Amos 6:10) are characteristic for the meaning of *zkr* hi. “to mention, name” (and the corresponding ni. pass.), which competes primarily with *qrʿ* “to call”; for the meaning of *zēker*, competition with *šēm* “name” (Exod 3:15; Isa 26:8; Psa 135:13; Job 18:17; Prov 10:7; see also Hos 12:6; Psa 30:5; 97:12; and cf. B. Jacob, *ZAW* 17 [1897]: 70; contra de Boer, op. cit. 17f.), which may also be observed in Akk. and Phoen. (cf. *CIS* 1:7 = *KAI* no. 18.6–8 *lkny ly lskr wšm nʿm tḥt pʿm ʾdny bʾšmm lʿm* “that it may be a memorial and a good name for me at the feet of Baʿal-shamem forever”); for the meaning of *zikkārôn*, the parallelism with *ʾôt* “sign” (Exod 13:9; Josh 4:6f.).

Fixed usages are:

(1) the use of the hi., ni. (mostly with the obj. or grammatical subj. *šēm* “name”), and the noms. *zēker* and *zikkārôn* (so too Phoen. *skr*, *skrn*, Aram. *zkr*, *dkr[w]n*, and Old SArab. *dkrn* in burial inscriptions) for the living's remembrance of the dead in the form continuing laudatory mention of the name (for the Akk. see F. R. Kraus, *JNES* 19 [1960]: 127–31; *za-kar šu-me* also occurs in this context in a more specialized sense as the invocation of the ghost to a sacrifice for the dead; cf. A. L. Oppenheim, *BASOR* 91 [1943]: 36–39). The name of the dead may be preserved through the son (2 Sam 18:18) or (as a substitution) through the memorial stele (cf. Isa 56:5 and Phoen. *mšbt skr bhym* “memorial stele among the living,” *CIS* 1:116 = *KAI* no. 153.1, etc.; cf. W. F. Albright, *SVT* 4 [1956]: 242–58; K. Galling, *ZDPV* 75 [1959]: 1–13). A lasting good memory is expected for the righteous (Psa 112:6; Prov 10:7); the cessation of memory, equivalent to total annihilation, is expected for evildoers and enemies (Isa 26:14; Psa 9:7; 34:17; Job 24:20) or conferred upon them in curse and judgment sayings (Exod 17:14; Deut 25:19; 32:26; Jer 11:19; Ezek 21:37; 25:10; Hos 2:19; Zech 13:2; Psa 83:5; 109:15). Qohelet denies

any lasting memory for the dead whatsoever (Eccl 1:11; 2:15f.; 9:4f.).

(2) the juristic use of the hi. with a per. obj. as a technical term for the charge in a legal proceeding (Isa 43:26; cf. J. Begrich, *Studien zu Deuterojesaja* [1963], 33; but not Gen 40:14) and with the obj. *ʿāwôn* “guilt” (Num 5:15; 1 Kgs 17:18; Ezek 21:28f.; 29:16; but not Gen 41:9 with the obj. *h̄ʾāʾay*, “I must mention my failures”); as a designation for the demonstration of guilt in investigations involving subjective evidence (Num 5: ordeal oath; Ezek 21: arrow oracle) or through encounter with the numinous quality surrounding the man of God (1 Kgs 17; cf. Schottroff, op. cit. 264–70; contra H. Reventlow, *TZ* 15 [1959]: 161–75; H. J. Boecker, *TZ* 17 [1961]: 212–16; id., *Redeformen*, 106–8, who understand *zkr* hi. *ʿāwôn* as the activity of the plaintiff in court and see the hi. ptcp. *mazkîr* as describing the function of bringing charges).

(3) the cultically shaped use of *zēker* (Psa 6:6; 111:4; 145:7) and of the hi. of *zkr*, which, like the *qal*, occurs in hymnic calls to praise in series with synonyms (Isa 12:4–6; Psa 71:16; cf. 1 Chron 16:4), to designate the hymnic praise of God. As a human act of confession (in Josh 23:7; Isa 48:1 alongside other acts of confession), *zkr* hi. (*b̄*)*šēm ʾlōhîm* “to call on the name of God (in the cult)” (Exod 23:13; Isa 26:13; Amos 6:10; Psa 20:8; cf. H. A. Brongers, *ZAW* 77 [1965]: 17f., and the analogous use of the Akk. *šuma zakāru* “to call on the name [of a deity],” *CAD* Z:17f.) corresponds to God’s self-declaration legitimizing a particular cultic site (Exod 20:24; cf. J. J. Stamm, *TZ* 1 [1945]: 304–6; H. Cazelles, *Etudes sur le Code de l’Alliance* [1946], 40–43). In the unique passage Neh 2:20, *zikkārôn* refers to participation in the (Jerusalem temple-) cult in general (cf. F. Horst, *RGG* 2:1405).

4. In the theological realm, *zkr* describes the reciprocal relationship between Yahweh and Israel or individual Israelites.

(a) As already indicated by NW and SWSem. equivalents to the OT theophoric thanksgiving name *z̄karyâ(hû)* “Yahweh remembered,” its variants and abbreviations (cf. *IP* 186f.; Schottroff, op. cit. 96–106, 382–84), as well as statements such as that of a benefactor in Lapethos on Cypress (*KAI* no. 43.16: “May salvation and goodness become my lot and the lot of my seed, and may Melqart remember mine”), the OT’s discussion of God’s memory for his worshipers involves a religious conception already preexistent in its environment. Such divine remembrance refers to the deity’s beneficial and sufficient attention to the individual (cf. Num 10:9: *zkr* ni. par. to *yš̄c* ni. “to receive help”), as experienced e.g., by the barren in the gift of the child (Gen 30:22; 1 Sam 1:11, 19, as the background of the thanksgiving name mentioned), but also in other situations of distress and generally in participation in the divine blessing (Psa 115:12). The dead are excepted from such remembrance (Psa 88:6; cf. C. Barth, *Die Errettung*

*vom Tode* [1947], 67–76); yet, as an exception, Job 14:13–15 envisions the possibility that God’s remembrance, in the sense of the resumption of concern for life and salvation (cf. Gen 8:1; cf. for the contrary Lam 2:1), could also apply to one hidden in Sheol.

(1) Impv. *zkr* occurs as a fixed religious term since antiquity in exclamations of petition (Judg 16:28; cf. 1 Sam 1:11), and then primarily in individual supplications (Jer 15:15; Psa 25:7) and collective laments (Psa 74:2; 106:4); the corresponding indicative describes Yahweh’s reversal of need retrospectively in the song of thanksgiving (Psa 136:23; cf. 115:12) and in the descriptive praise of the hymn (Psa 8:5; 9:13). Even more frequent than this usage of *zkr* with a per. obj. is the use of the verb in exclamations of request that call Yahweh to remember the frailty of human life (Psa 89:48; Job 7:7; 10:9), the shame of the supplicant (Psa 89:51; Lam 5:1), the slander attributed to Yahweh by his opponents (Psa 74:18, 22), as well as his promise (Exod 32:13; Deut 9:27; Psa 119:49; Neh 1:8), the covenant maintained by him (Jer 14:21), and his gracious mercy (Hab 3:2; Psa 25:6f.), as motivations for his beneficial intervention on behalf of the supplicant. The laudatory discussion of Yahweh’s remembrance of human frailty (78:39; 103:14) and his promises (Psa 105:8 = 1 Chron 16:15; Psa 106:45; 111:4) in the thanksgiving song and hymn correspond to these requests. A third group of requests challenge Yahweh to decide for a saving relationship by remembering the good deeds of his worshipers (2 Kgs 20:3 = Isa 38:3; Jer 18:20; cf. also Psa 20:4; 132:1; 2 Chron 6:42) or by forgetting their shortcomings (Isa 64:8; Psa 25:7; 79:8), but a malevolent memory of the deeds of the enemy should pertain (Psa 137:7; cf. Psa 109:14 ni.).

(2) This usage of *zkr* can be observed primarily at the end of various sections of Neh in Nehemiah’s pleas for Yahweh to remember his deeds in a benevolent sense (Neh 5:19; 13:14, 22, 31) and the deeds of his enemy in a malevolent sense (Neh 6:14; 13:29).

(3) The specifically prophetic usage of the verb always has, from God’s perspective, the deeds of people as the obj. (Isa 43:25; Jer 2:2; 14:10; 31:34; 44:21; Hos 7:2; 8:13; 9:9; ni. Ezek 3:20; 18:22, 24; 33:13, 16), apart from Jer 31:20 and Ezek 16:60, where the objs. are, resp., Israel and the covenant maintained by Yahweh for Israel. In this respect, *zkr* has a benevolent sense only in Jer 2:2f., where Yahweh mentions, as the motive for his former disposition to benevolent relations with his people, Israel’s youthful faithfulness in response to Israel’s objection that he had not sufficiently cared for it (cf. Jer 2:5). Otherwise, Hosea (14:10) and Jeremiah (44:21) characteristically threaten that Yahweh will remember in a way that makes Israel’s transgression the standard for his punitive intervention. In Ezek *zkr* ni. (cf. Psa 109:14 and perhaps also the qal in Psa 20:4; but on this passage cf. E. Kutsch, *Salbung als Rechtsakt* [1963],

11–13) has close contact with *ḥšb*, the term for the cultic-declarative accounting of righteousness for life or of unrighteousness for death (cf. von Rad, *PHOE* 125–35, 243–66; Zimmerli, *GO* 178–91; H. Reventlow, *Wächter über Israel* [1962], 95–134). Ezekiel uses this cultic concept in order to sharpen the contrast between the judgment fatalism of the exilic generation and individual responsibility for one's actions. Looking forward to the coming salvation, Deutero-Isaiah (43:25) and Jeremiah (31:34) announce nonrecollection of guilt as Yahweh's forgiveness (cf. S. Herrmann, *Die prophetischen Heilserwartungen im AT* [1965], 179–85, 195–204).

(4) Although K. Koch (*ZTK* 52 [1955]: 20f.) relates this usage of *zkr* to the association of human deeds with God's initiation of the cause-effect relationship (cf. H. Reventlow, *TZ* 15 [1959]: 161–75; E. Pax, *Liber Annuus* 11 [1960/61]: 74–77; cf. also F. Horst, *Gottes Recht* [1961], 286–91; id., *RGG* 6:1343–46), H. J. Boecker (op. cit. 106–11; cf. Childs, op. cit. 31–33, and for the Neh passages, U. Kellermann, *Nehemia: Quellen, Überlieferung und Geschichte* [1967], 6–8, 76–88) traces this usage of *zkr* with the acc. of obj. and the dative of person only to the legal sphere: "to remember to the benefit of (in defense)/to the detriment of (an accusation)." Still, the usage in dedicatory inscriptions seems more likely to have been adopted here (K. Galling, *ZDPV* 68 [1950]: 134–42; Schottroff, op. cit. 217–38, 392–95).

(5) As attested extrabiblically, e.g., in the dedicatory inscription no. 14 in M. Dunand and R. Duru, *Oumm el-ʿAmed, Texte* (1962), 193 (ll. 1f.: "[this is what] your servant Abdosir, the son of Ariš, praised as a memorial [*skrn*]"; cf. also Aram. *dkr[w]nṯbl* . . . "good memory for PN," e.g., Nab.: J. Cantineau, *Le Nabatéen* [1932]: 2:11–13; Dura-Europos: A. Caquot, *Syria* 30 [1953]: 245f.), the use in the dedicatory inscriptions is reflected by *zikkārôn* in Zech 6:14 and esp. in P (Exod 28:12, 29; 30:16; 39:7; Num 10:10; 31:54; cf. K. Koch, *ZTK* 55 [1958]: 44; Childs, op. cit. 67f.), which also characteristically uses the verb *zkr* as a term for the divine covenant giver's keeping of the covenant (Gen 9:15f.; Exod 2:24; 6:5; Lev 26:42, 45; cf. W. Elliger, *Kleine Schriften zum AT* [1966], 174–98; Zimmerli, *GO* 205–16; Childs, op. cit. 42–44).

(b) Israel's remembrance of Yahweh and his saving acts corresponds to Yahweh's remembrance of Israel.

(1) *zkr* occurs in the Psa as a term for confident appeal to Yahweh, as those who voice songs of lament and thanksgiving confess (Psa 42:7; 63:7; 77:4; 119:55; cf. also Isa 64:4; Jonah 2:8; Jer 20:9), esp. for actualizing remembrance of Yahweh's saving acts (Psa 77:6f., 12.; 119:52; 143:5; in the call to actualizing praise: Deut 32:7; Psa 105:5 = 1 Chron 16:12; in the historical psalm as an act Israel sometimes undertakes but usually neglects: Psa 78:34f., 42; 106:7; Isa 63:11; Neh 9:17; cf. also Judg 8:34). Such remembrance can, indeed, hardly be understood as a

reflection of an actualization of the past in cultic drama (S. Mowinckel, *Psalmstudien* 2 [1920]; A. Weiser, *Glaube und Geschichte im AT* [1961], 280–90, 303–21); rather, it is a reminiscent and laudatory reprise of the past in authentic recognition of the temporal interval, but for the sake of its present significance (cf. H. Zirker, *Die kultische Vergegenwärtigung der Vergangenheit in den Psalmen* [1964]; Westermann, *PLP* 214–49; W. Beyerlin, *ZAW* 79 [1967]: 208–24).

(2) In Deuteronomic parenesis, the representation of particular individual motifs from the salvation-history tradition serves to inculcate Yahweh's commandments (Deut 5:15; 7:18; 8:2, 18; 9:7; 15:15; 16:3, 12; 24:9, 18, 22; 25:17). The fixed schema of this parenesis (cf. N. Lohfink, *Das Hauptgebot* [1963], 125–36; Schottroff, *op. cit.* 117–25, 385–88), which binds together commandment, exhortation to remembrance, and renewed admonition, may be explained on the basis of Levitical preaching, usually seen against the background of the covenant formula, esp. with respect to the derivation of the obligation from the benevolent deeds of the covenant giver (K. Baltzer, *Covenant Formulary* [1971], 31–38; N. Lohfink, *op. cit.*; D. J. McCarthy, *Treaty and Covenant* [1963], 109–40; von Rad, *Deut*, *OTL*, 19–23; W. Beyerlin, *FS Hertzberg* 9–29; but cf. Schottroff, *op. cit.* 385–88). In addition, Deut (Deut 16:3), Dtr (Exod 13:3, 9; Josh 4:7), and the other exilic and post-exilic documents (P: Exod 12:14; Lev 23:24; Num 17:5; moreover: Neh 2:20; Esth 9:28) use *zkr* and *zikkārôn* for feast days and cultic events, which are thereby historicized and made to serve the representation of some salvation-history traditions. Here, too, *zkr* is not participation in dramatic cult representations but reminiscent involvement in the matrix of events by representing past phenomena through proclamation or symbol (cf. M. Noth, *EvT* 2 [1952/53]: 6–17; Childs, *op. cit.* 45–65, 74–89; N. W. Porteous, *FS Weiser* 93–105; von Rad, *Theol.* 2:99–112; S. Herrmann, *FS Rost* 95–105; J. M. Schmidt, *EvT* 30 [1970]: 169–200).

(3) Prophecy since the 8th cent. BCE employs *zkr* in a comparable usage. The condemnation in Mic 6:3–5 demands that the people remember Yahweh's saving acts in order to recognize the untenable nature of their objections against Yahweh. Isa 17:10 bases the threatened judgment on the fact that Israel had not considered Yahweh. *zkr* also occurs in this sense later on in the invectives (Isa 57:11; Ezek 16:22, 43; 23:19; cf. also Isa 47:7). Nevertheless, in exilic and post-exilic prophecy, *zkr* appears primarily in salvation oracles (Isa 44:21f.; 46:8; Jer 51:50; Ezek 6:9; 16:61, 63; 20:43; 36:31; Zech 10:9) in close association with the call to repentance (see Wolff, *GS* [1964], 130–50), esp. in conjunction with the announcement of a new saving act of Yahweh surpassing all previous ones (Isa 43:18; 46:9; 54:4; 65:17; cf. C. R. North, *FS Robinson* 111–26; von Rad, *Theol.* 2:243–50; Zimmerli, *GO* 192–204; S. Herrmann, *Die*

*prophetischen Heilserwartungen im AT* [1965], 298–304).

5. On Judaism and the NT, cf. J. Behm, “ἀνάμνησις,” *TDNT* 1:348f.; O. Michel, “μνησκόμοι,” *TDNT* 4:675–83; G. Schmidt, FS Meiser 259–64; K.-H. Bartels, “Dies tut zu meinem Gedächtnis” (diss., Mainz, 1959); M. Thurian, *Eucharistie: Eihneit am Tisch des Herrn?* (1963); de Boer, op. cit. 44–62.

W. Schottroff

## זנח *znh* to commit harlotry

S 2181; BDB 275b; *HALOT* 1:275a; *TDOT* 4:99–104; *TWOT* 563; *NIDOTTE* 2388

1. The root *znh* also occurs outside Hebr. in (postbibl.) Aram., Arab., and Eth.

For Judg 19:2 one may assume a root *znh* II “to become angry,” corresponding to Akk. *zenû* “to be angry” (*CAD* Z:85f.; G. R. Driver, *WO* 1/1 [1947]: 29f.; *HAL* 264; *CPT* 286, 326).

Nom. derivatives are *z<sup>ē</sup>nûnîm* (cf. D. Leibel, *Lešonenu* 20 [1956]: 45f.), *z<sup>ē</sup>nût*, and *taznût*. The verb occurs in the qal (with a substantivized fem. ptc. *zōnâ* “whore”), the pu. (only Ezek 16:34), and the hi. (causative, on Hos 4:10, 18; 5:3 cf. Rudolph, *KAT* 13/1, 105, 116).

2. The verb occurs in the qal 83x (excl. Judg 19:2; see 1; 33 are substantivized *zōnâ*, Ezek 21x, Hos 10x), in the pu. 1x, and in the hi. 9x (Hos 4x, 2 Chron 3x). *z<sup>ē</sup>nûnîm* occurs 12x (Hos 6x), *z<sup>ē</sup>nût* 9x (Jer and Ezek 3x each), and *taznût* 20x (only in Ezek 16 and 23).

Of the total 134 occurrences of the root, 47 fall to Ezek (42 in Ezek 16 and 23), 22 to Hos, 9 each to Lev and Jer, 5 each to Judg and Isa, and 4 each to Gen, Josh, and Prov.

3. (a) The basic meaning of the qal should be translated “to whore, commit harlotry” (of the woman; Num 25:1 of the man). The verb is either used abs. (Gen 38:24, etc., in about half the cases) or constructed with: *ʔah<sup>3</sup>rê* “after” (Exod 34:15f., etc.; frequent), a simple acc. (Jer 3:1), *ʔel* (Num 25:1; Ezek 16:26, 28), *ʔet* (Isa 23:17), *be* (Ezek 16:17); in the meaning “to be unfaithful to” it is used with *taḥat* (Ezek 23:5) or *mittaḥat* (Hos 4:12), *mē<sup>ʿ</sup>al* (Hos 9:1) or *min* (Psa 73:27).

The pu. form attested in Ezek 16:34 represents qal pass. (“to be solicited for prostitution”). The hi. in Hos 4:10, 18 is usually translated as an inner-causative like the qal (e.g., Wolff, *Hos*, Herm, 72f.), otherwise causatively “to lure into lewdness” (see 1).

*znh* has no direct synonym.

(b) *znh* referred originally to unregulated, illicit sexual behavior between man and woman. Par. terms include *ḥll* pi. “to profane” (Lev 19:29; 21:9), *bḡd* “to behave treacherously” (Jer 3:8), *mʿl* “to behave treacherously” (1 Chron 5:25), *ṭmʿ* ni. “to make oneself unclean” (Ezek 20:30; 23:30; Hos 5:3; Psa 106:39), or *nʿp* pi. “to commit adultery” (Hos 4:13f.).

Whoever commits harlotry commits an abomination in Israel (Lev 19:29 *zimmâ*; Deut 22:21 *nʿbālâ*). Accordingly, harlotry is punished: whoever commits harlotry is burned (*šrp* ni. Gen 38:24; Lev 21:9), annihilated (*krt* hi. Lev 20:6; *bʿr* pi. Deut 22:21; *šmt* hi. Psa 73:27).

4. Theological language uses *znh* in a fig. sense to describe apostasy from Yahweh and conversion to other gods. This usage has four focal points:

(a) In Hosea’s prophecy: Here the subj. is not just any woman but the northern kingdom of Israel (9:1), the land (1:2), presented fig. as Yahweh’s wife; it is unfaithful to Yahweh and “whores away from Yahweh” (4:12; 9:1). With the aid of this concept adapted from the Canaanite Baal cult and its cultic prostitution, Israel’s pro-Canaanite inclination is sharply attacked. “To whore away from Yahweh” is synonymous with adultery (4:13f.), with worshiping Baal as husband, and therefore calls forth prophetic judgment (cf. Wolff, *Hos*, Herm, 13f.).

(b) This fig. usage is employed again by Jeremiah. Here, too, it is not the individual but Judah/Israel who is accused of harlotry (2:20; 3:1, 6, 8). The high hills, mountains, and green trees (2:20; 3:6) are named as the sites of the harlotry (as already in Hos 4:13), apparently specific Baalistic cultic sites.

(c) The use of *znh* is markedly concentrated in Ezek 16 and 23, which reprise the images of Hos 1–3 and Jer 3 (the term *taznût* occurs only in Ezek 16 and 23). Here, too, Israel exercises its idolatry at specific cultic sites (heights 16:16) or with cultic objects (masc. images, 16:17). The strange gods are described as idols (*gillûlîm* 6:9; 23:30) or horrors (*šiqqûšîm* 23:30). Israel pursues them although they are totally unconcerned for Israel (16:34).

The following must also be emphasized: (1) The charge of harlotry with strange gods is expanded in 16:26, 28; 23:5 through the idea of harlotry with foreign nations, thus through the charge of political bondage. (2) According to 23:3, 19 whorish apostasy did not begin with the conquest and contact with the Can. Baal religion, but already in Israel's early era, in Egypt. (3) 6:9 speaks fig. of "prurient hearts."

(d) Following Hosea, the term then found acceptance primarily in Dtr theology, namely in the stereotypical form "to play the harlot after (strange) gods (of the land)" (Exod 34:15f.; Deut 31:16; Judg 2:17; 8:27, 33; cf. Num 25:1; Psa 106:39; 1 Chron 5:25).

5. On NT usage in the context of the environment of the NT, cf. F. Hauck and S. Schulz, "πορνή," *TDNT* 6:579–95.

J. Kühlewein

זעם *zʿm* **to curse** → קלל *qll*

זעק *zʿq* **to cry out** → קָסַעַק

זָר *zār* **strange**

S 2114; BDB 266a; *HALOT* 1:279a; *TDOT* 4:52–58; *TWOT* 541; *NIDOTTE* 2319

1. *zār* "strange, different" is the (often substantivized) verbal adj. of the root *zûr* II "to turn away" (Hebr. *qal*, *ni.*, *ho.*; with counterparts in SSem. and Aram.; cf. L. A. Snijders, *OTS* 10 [1954]: 1–21).

The root should be distinguished from *zûr* I "to press" (Judg 6:38; Isa 59:5; Job 39:15) and *zûr* III "to stink, be repugnant" (Job 19:17; *HAL* 256b). Akk. *zûru* "to hate" also belongs to the latter (\**dir*; cf. Arab. *dāra*; cf. Akk. *zā'iru* "hostile, enemy," *CAD* Z:14f., 97–99; cf., nevertheless, P. Wernberg-Møller, *VT* 4 [1954]: 322–25).

Counterparts to *zār* occur outside NWSem. (*DISO* 80) in SSem.; cf. *HAL* 268a on the meanings that have developed somewhat further (Mid. Hebr. "layman"; Arab. "pilgrim").

2. *zār* occurs 70x in the OT (excl. Prov 21:8 *wāzār*; cf. *HAL* 249b), most frequently in Prov (14x), Isa (9x), Num (8x), Jer and Ezek (7x each).

Concentrations lie in the Prophets (29x), wisdom (17x), and the priestly literature (Exod–Num 15x).

3. In both adj. and subst. usages *zār* assumes rather varied meanings (cf. the more detailed investigation by L. A. Snijders, “Meaning of *zār* in the OT,” *OTS* 10 [1954]: 1–154); it often appears in proximity to → *nēkār* “foreign land” or *nokrî* “strange, foreign” (cf. P. Humbert, “Les adjectifs *zār* et *nôkrî* et la femme étrangère des Proverbes bibliques,” *FS Dussaud* 1:259–66 = *Opuscules d’un hébraïsant* [1958], 111–18), but should be distinguished from *gēr* “sojourner” (→ *gûr*).

(a) The most common meaning, esp. in the Prophets, is “stranger” in the ethnic or political sense, thus usually “non-Israelite.” *zārîm* indicates the foreign peoples with whom Israel had contact, esp. its political enemies: the Assyrians or Egyptians (Hos 7:9; 8:7; Isa 1:7), Judah’s immediate neighbors (Lam 5:2), and the Babylonians (Jer 51:51; Ezek 28:7, 10; 30:12; 31:12, etc.). Thus *zār* occurs in proximity to → *šar* “enemy”; the stranger is simultaneously the enemy.

Designations for “foreign” gods, i.e., of the deities of foreign nations, belong in this category too (Deut 32:16; Isa 17:10; Jer 2:25; 3:13; Psa 44:21; 81:10; cf. Jer 5:19).

(b) *zār* occurs chiefly in wisdom literature, at first in the rather neutral meaning “belonging to another” (Prov 6:1; 11:15; 14:10; 20:16, etc.), but this expression can also convey overtones of animosity (Job 19:15; cf. v 17; cf. G. R. Driver, *Bib* 35 [1954]: 148f.; contrast *CPT* 256f., 326), illegitimacy (Hos 5:7 “strange children”), etc. The other is the outsider whose behavior endangers the existence of the group because he/she stands outside the laws of the community. The *ʾiššâ zārâ* “strange woman” in Prov 1–9 (2:16; 5:3, 20; 7:5) should be mentioned here, a woman who seems to be less the ethnic stranger or the devotee of an Astarte cult (cf. G. Boström, *Proverbiastudien* [1935]) than the (Israelite) wife of another, a lascivious wife against whom the wise warns students (cf. Humbert, op. cit.; id., *Revue des Etudes Sémitiques* [1937], 49–64; Snijders, op. cit. 88–104; Gemser, *HAT* 16, 25f.). Thus *zār* “other” can acquire a rather negative meaning (“dangerous, hostile”).

(c) Esp. in the post-exilic priestly tradition, *zār* indicates that which is contrary to something holy or to a cultic prescription (Elliger, *HAT* 4, 137), thus e.g., someone who does not belong to the Aaronide priesthood (Exod 29:33; Lev 22:10, 12f.; Num 3:10, 38; 17:5; 18:4, 7), to the Levites (Num 1:51), or to the cultic community (Exod 30:33). In many cases, then, *zār* virtually means “layman, unauthorized” (“profane” in the cultic sense). The fire (Lev 10:1; Num 3:4; 26:61) or the incense stand (Exod 30:9) can also be termed *zār* “illegitimate, forbidden” in reference to the incense offering,

because it does not accord with cultic prescriptions (Snijders, op. cit. 111–23).

d) Finally, the meaning “unusual, unheard-of” in the description of Yahweh’s behavior in Isa 28:21 (similarly Prov 23:33 “rare”) should be mentioned; only this text uses *zār* predicatively.

4. For the most part, Israel relates very reservedly to that described as *zār*. The foreigner almost always signifies a threat, something that calls existence into question, esp. from the Dtr-P viewpoint. The *zārîm* thus become the “pagans,” with whom no covenant can be made (Deut, Ezra, Neh; cf. A. Bertholet, *Die Stellung der Israeliten und der Juden zu den Fremden* [1896]). The *zār* is somehow irreconcilable with Yahweh; cf., nevertheless, the position of Deutero-Isa, Jonah, and Hellenistic Judaism, as well as the attitude toward the *gēr* (→ *gûr*).

5. On *zār* “strange” in early Judaism and in the NT, cf. F. Büchsel, “ἄλλος,” *TDNT* 1:264–67; G. Stählin, “ξένος,” *TDNT* 5:1–36.

R. Martin-Achard

זרעו *z'roa<sup>c</sup>* **arm**

S 2220; BDB 283b; *HALOT* 1:280b; *TDOT* 4:131–40; *TWOT* 583a; *NIDOTTE* 2432

1. Counterparts to Hebr. *z'roa<sup>c</sup>* “arm” formed from the same root occur only in the NW and WSem. languages (*HAL* 269a).

According to P. Fronzaroli (*AANLR* 8/19 [1964]: 259, 279) \**dirā<sup>c</sup>* is common Sem., although replaced in ESem. by \**yad-* > *idu* “arm,” which, in turn, is replaced by *qātu* in the meaning “hand”; in WSem. \**dirā<sup>c</sup>* limited \**yad-* to the meaning “hand” from the original meaning “hand plus arm” (→ *yād*). Arab. *dirā<sup>c</sup>* is restricted to the meaning “forearm” and has replaced the common Sem. word \**ammāt-* (Hebr. *ammâ*, Akk. *ammatu*) “cubit, forearm” as a designation for the body part as well as the unit of length.\*>"Symbol">

On a possible relationship to \**dr<sup>c</sup>* “to sow” (Hebr. *zr<sup>c</sup>*), cf. Fronzaroli, op. cit. 259; *UT* §5.4).

If the Neo-Assyr. *durā<sup>c</sup>* is related to the same root (*CAD* D:190f.; see, however, *AHw* 177b), it is probably a WSem. loanword. The glosses of EA 287:27 and 288:34 attest the Old Can. *zuruh*.

Ug. *ḏr* (WUS no. 2723; UT no. 733) retains the original *ḏ* instead of the normal *d* (cf. UT §5.3).

Bibl. Aram. *ʿedrā* (Ezra 4:23; on the vocalization, cf. BLA 215) with a prosthetic *aleph* occurs in addition to *derā* (Dan 2:32; cf. DISO 61). As a result, Hebr. *ʿezrôa* (Jer 32:21; Job 31:22) may also be explained as an Aramaism (HAL 28a).

2. Of 93 occurrences in the OT (2x *ʿezrôa*; and 2x in Aram.), 39 appear in the prophetic literature (17 alone in Isa, 13 in Ezek), 14 in Psa, 9 in Deut, 7 in Job, and 6 in Dan.

The pl. is formed 19x with a fem. and 4x with a masc. ending.

3. In the proper sense, *zʿrôa* indicates one's "arm," esp. the "forearm" (e.g., Isa 17:5; 44:12; Ezek 4:7). The masc. pl. occasionally means the "shoulders" (2 Kgs 9:24); in the cultic sphere, the sg. may also mean the shoulder portion of the sacrificial animal (Num 6:19; Deut 18:3).

Like → *yād*, in the fig. sense (Dhorme 140) the word represents the powerful (Job 38:15; cf. 22:8), strong (Jer 48:25), and helpful (Psa 83:9) "power, might" of its owner. Just as *zʿrôa gʿdôlâ* "strong arm" corresponds to a "populous nation" in Ezek 17:9 and Akk. *emūqē* "armed forces" can also alternate with *idā(n)*, in Dan 11:15, 22 *zʿrôṭ* indicates an army (*zʿrôṭim* 11:31; sg. 11:6, on the text, cf. Plöger, KAT 18, 155, and P. Wernberg-Møller, JSS 3 [1957]: 324f.; cf. also Ezek 22:6, where many exegetes, e.g., A. M. Honeyman, VT 1 [1951]: 222, nevertheless prefer the reading *zarʿô* "his seed").

*zʿrôṭ ʿôlām* "everlasting arms" parallels the "ancient gods(?)" in the hymn in Deut 33:27; cf. I. L. Seeligmann, VT 14 (1964): 78, 87f.

Both → *yād* "hand" and *yāmîn* "right hand" often parallel *zʿrôa*, and terms like → *kôah* "might" and *gʿbûrâ* "strength" (→ *gbr*) are fig. pars.

4. Corresponding to the profane usage, various literary genres employ *zʿrôa* anthropomorphically to describe the strong (predominantly in the hymns: Psa 89:14; 98:1; Exod 15:16; in vows to praise, Psa 71:19), helpful (Psa 44:4; 77:16; 79:11; 89:22; Isa 33:2; 40:11; Hos 11:3), and punitive (Isa 30:30) might of God (P. Biard, *La puissance de Dieu* [1960]). The benevolent aspect is often emphasized through the stereotypical expression "with strong hand and outstretched arm." This usage, however, is limited to Deut (Deut 4:34; 5:15; 7:19; 11:2; 26:8) and literature influenced by Deut (Isa 32:21; Psa 136:12), and always refers to the divine act of redemption in the exodus from Egypt (without explicit reference in Solomon's prayer dedicating the temple, 1 Kgs 8:42 = 2 Chron 6:32). It is

related to the new exodus from the Diaspora in Ezek 20:33f. The notion of judgment upon Israel, which is also involved in this text, is absent from Deutero-Isa, where God's saving might is esp. accentuated and eschatologically interpreted by the expression "arm of Yahweh" (Isa 51:5, 9; 52:10; 53:1; cf. H. L. Ginsberg, "The Arm of YHWH in Isaiah 51–63 and the Text of Isaiah 53:10–11," *JBL* 77 [1958]: 152–56). In Trito-Isa Yahweh's arm even appears as a type of hypostasis (in reference to the exodus from Egypt in Isa 63:12; more generally, 59:16; 63:5; cf. also 62:8, which discusses Yahweh's oath by his arm; cf. G. Pfeifer, *Ursprung und Wesen der Hypostasenvorstellungen im Judentum* [1967], 17). The expression "with great strength and outstretched arm" in Deut 9:29 and 2 Kgs 17:36 (Dtr) refers to the exodus from Egypt, but in Jer 27:5 and 32:17 it indicates God's creation (portrayed as a battle).

The OT contains little or no celebration of human arms (Gen 49:24, but in the context of the "strength of Jacob"). Rather, the "arm of flesh" as a description of feeble human strength is contrasted with God's might (2 Chron 32:8; cf. Jer 17:5; Psa 44:4), which breaks (Ezek 30:21f., 24b; cf. Psa 10:15) and cuts off (1 Sam 2:31; Mal 2:3 txt em) human arms, but which can also strengthen them (Ezek 30:24a, 25).

5. The NT discusses God's arm only in the sense of its saving demonstrations of power; cf. H. Schlier, "βραχίον," *TDNT* 1:639f.

A. S. van der Woude

חָדַשׁ *ḥādāš* **new**

S 2319; BDB 294a; *HALOT* 1:294a; *TDOT* 4:225–44; *TWOT* 613a; *NIDOTTE* 2543

1. The root \**ḥdt* occurs in all Sem. languages with the same meaning (Berg., *Intro.* 220).

Hebr. has *ḥdš* pi. "to renew," hitp. "to renew oneself," and the noms. *ḥādāš* "new" (in the place-names *ḥ<sup>a</sup>dāšā* Josh 15:37; and Aram. *ḥāšôr ḥ<sup>a</sup>dattâ* Josh 15:25; cf. Wagner no. 88) and *ḥōdeš* "new moon, month" (on the fem. PN *ḥōdeš* in 1 Chron 8:9, see J. J. Stamm, FS Baumgartner 322).

Hebr. *ḥādāš* corresponds to Akk. *eššu* (cf. *eddēšû* "being ever renewed"), Ug. *ḥdt* (*WUS* no. 908; *UT* no. 843), Phoen.-Pun. *ḥdš* (in the name of the city Carthage, *qrḥdšt* = "new city"), and Aram. *ḥ<sup>a</sup>dat* (*DISO* 83; *KBL* 1074a), which occurs once in Ezra 6:4 as a textual error.

The place-name *ḥodšî* in 2 Sam 24:6 should be disregarded in favor of an emendation.

2. *ḥdš* pi. occurs 9x, hitp. 1x (Psa 103:5), *ḥādāš* 53x (Isa 40–66 10x, Psa 6x, Ezek 5x), and *ḥōdeš* 283x (Num 38x, Ezek 27x, Esth 24x).

*ḥādāš* appears 20x in narrative texts (also Deut 32:17 and Judg 5:8 txt?), 19x in prophetic texts, 6x in Psa, 2x in Job and Eccl, 1x in Song Sol and Lam.

3. (a) Like *ḥādāš* “new,” the verb *ḥdš* pi. “to renew” has no genuine synonyms and is usually contrasted to “old, former”: the temple (2 Chron 24:4, 12, par. *ḥzq* pi. “to renovate”), an altar (2 Chron 15:8), and cities (Isa 61:4, par. *bnh* “to rebuild”) are renewed, i.e., reestablished; the monarchy is renewed (1 Sam 11:14). God is called upon once again to maintain the former good fortune or salvation (Lam 5:21 “renew our days as of old”), to renew life (Psa 51:12, beside *brʿ* “to create”; cf. L. Kopf, VT 9 [1959]: 254f.); he is praised because he renews the face of the earth (Psa 104:30, beside *brʿ*) and sees to it that youthfulness is renewed (Psa 103:5 hitp.). Only Job 10:17 (“to renew witnesses” = “repeatedly to produce new witnesses”) contrasts “new” with “already at hand.”

(b) The everyday usage of *ḥādāš* “new” occurs primarily in the narrative texts, both in contrast to “old” and in the meaning “not yet existent.” In the realm of production there is mention of new grain (Lev 26:10, in contrast to *yāšān* “old, last year’s”), of the offering of firstfruits (Lev 23:16; Num 28:26), of new (fresh) fruits (Song Sol 7:14, in contrast to *yāšān*); in the realm of craftsmanship of new houses (Deut 20:5; 22:8), new wineskins (Josh 9:13; cf. *bāleh* “old, used” in vv 4f.; Job 32:19), new ropes (Job 15:13; 16:11f.), new wagons (1 Sam 6:7 = 1 Chron 13:7; 2 Sam 6:3[bis]), a new sword (2 Sam 21:16), a new coat (1 Kgs 11:29f.), a new vessel (2 Kgs 2:20), and the new forecourt (2 Chron 20:5). Prophetic texts mention a new threshing sled (Isa 41:15) and the new temple gate (Jer 26:10; 36:10; cf. the “old gate” in Neh 3:6; 12:39). With respect to persons, *ḥādāš* describes the newly married woman (Deut 24:5; on Akk. and Ug. pars. see HAL 282b), the new king over Egypt (Exod 1:8), and new gods, i.e., those which Israel has only come to know in Canaan (Deut 32:17 “newcomers, who have only recently appeared”).

The adjs. *ṭārî* “fresh, moist” (Judg 15:15, bones; Isa 1:6, wounds) and *lah* “still moist, fresh” (Gen 30:37; Num 6:3; Judg 16:7f.; Ezek 17:24; 21:3; subst. *lcaḥ* “fresh ones” in Deut 34:7; on the root *lḥḥ* cf. A. van Selms, FS Vriezen 318–26) are somewhat related to *ḥādāš* in meaning.

Reviewing these texts, one notices that the term occurs with extraordinary rarity. It has only one large category of usage: the discussion of the newly crafted. If one compares the frequency of occurrence of the term “new” in modern European languages, as well as in Gk. and Lat., the

limited usage in the OT is all the more remarkable. The same conclusion is also indicated by the slight number of derivatives from the root. One may compare in Eng.: renew, renovation, newness, novelty, news, newcomer, newly, New Year, etc. Ancient Israelites apparently perceived relationships between occurrences so strongly that they did not consider “new” what moderns would, or at least they did not describe them as “new.” This question deserves further investigation. It is certain, at any rate, that the experience of the new is limited for the Israelite to very few areas of experience; the Israelite only rarely speaks of the new.

4. (a) *ḥādāš* occurs in prophetic texts only during the exile or very near to it (Deutero-Isa 5x, Trito-Isa 5x in three passages, Jer 4x, Ezek 5x in three passages; the date of Jer 31:22, 31 is disputed; cf. e.g., Sellin-Fohrer 396 with bibliog.). This fact is significant in itself: only the exilic period—no other period in the whole history of Israel!—discussed an innovation in the history of God’s relationship with Israel. This circumstance becomes even more suggestive when one examines the passages more closely: Apart from those passages that belong to everyday usage (Isa 41:14; Jer 26:10; 36:10), exilic or immediately post-exilic prophets speak of a novelty in three contexts: (1) Isa 42:9f.; 43:19; 48:6 (Deutero-Isa): the former and the new; (2) Jer 31:31 and Ezek 11:19; 18:31; 36:26 (cf. Jer 31:22): new covenant and new heart; (3) Isa 65:17; 66:22 (Trito-Isa; cf. 62:2): new heaven and new earth.

(1) The group of texts in Deutero-Isa is the most significant theologically because this series of texts consciously and reflectively contrasts the new with the former; here “the new” becomes an explicit theme of theological reflection (cf. also, without the contrast, Jer 31:22 “for Yahweh creates a novelty in the land”; Isa 62:2 “you will be called by a new name”). Of four passages, three (42:9; 43:19; 48:6) belong in the context of salvation preaching, the fourth (42:10) is a response of praise: the new song corresponds to the new act of God.

The newly announced innovation is contrasted with the former that has already appeared (*rīšōnôt*, Isa 42:9; 43:18), a reference both to God’s prior saving activity (esp. in 43:18) and to the announcement of judgment (42:9). It must be said of the innovation now announced: “From now on I will let you hear something new that you did not know” (48:6).

This is not clear solely from the three passages in which the term “new” occurs. Rather, in order to understand the intention of these passages, one must also consider the condemnation speeches that refer to this innovation as the “future” (*ḥabbāʾôt*, → *bôʾ*; 41:21–29, esp. v 22: “the former . . . the future”; cf. 46:9–13), in addition to Deutero-Isaiah’s salvation preaching as a whole, which makes it clear why the announced saving act of God is really an innovation. The entirety of Israel’s prior history is seen as “the former” in comparison to this innovation. The “new” consists in the fact that the

deliverance from exile now proclaimed will no longer be carried out by Israel's armies and by an Israelite leader inspired by Yahweh, but by the Pers. king Cyrus (44:24–45:7), thus dissociating Israel's deliverance from Israel's might, and that this deliverance is based upon forgiveness (43:22–28), so that the nations too can be invited to this new salvation of Yahweh (45:20–25). It may be emphasized once again that this explanation of the "innovation" in the three passages (42:9; 43:19; 48:6) is possible only on the basis of the total proclamation of Deutero-Isa. Only in this manner does it become clear that here, for the first time in the entire history of salvation preaching, a "new" thing is proclaimed.

(2) The saying concerning the new covenant in Jer 31:31–34 contrasts this covenant with the former things, as does the group of "new" passages in Deutero-Isa: "Not like the covenant that I made with your fathers." As in Deutero-Isa, this new covenant in Jer is based on forgiveness (v 34b). That this new covenant concerns the behavior of an individual (v 33) is distinctive and unique to Jer 31:31–34. The Ezek passages that speak of the "new" make the same statement (Ezek 11:19; 18:31; 36:26). They discuss the new heart and the new spirit that God creates for people and that he will place within them (Psa 51:12 could be influenced by this discussion).

The Jer saying (cf. also Jer 31:22) and the three Ezek sayings are close to one another topically and temporally; Jer 31:31–34 also belongs in the exilic period. These passages are distinct from the Deutero-Isa passages primarily in that they shift the emphasis to individual behavior, while for Deutero-Isa the "new" is to be experienced.

(3) The promise of a new heaven and a new earth in Isa 65:17 (echoed in a later addition, 66:22) deals with an expansion of Deutero-Isa's promise of an innovation into a cosmic promise. Although one cannot say whether Jer 31:31 and Ezek 11:19; 18:31; 36:26 are influenced by Deutero-Isa, this influence is certain for Isa 65:17. This text assumes that Yahweh will bring about an act of deliverance for Israel that will be new in comparison to the totality of prior history. Already in Deutero-Isa this promise to creation had influenced the description of the return from exile, for which the desert is transformed into a garden; nevertheless, the promise of salvation in Deutero-Isa remains within the bounds of historical phenomena. Isa 66:22, a promise of the creation of a new heaven and a new earth, completes the transition to apocalyptic speech that transcends history. Whether 65:17 is already so intended is uncertain; if it should be translated: "I create anew the heavens and the earth" (Westermann, *Isa 40–66*, OTL, 408), then it refers only to a wondrous renewal of everything that does not necessarily include a prior annihilation. As 66:22 demonstrates, however, the phrase was later understood apocalyptically; for the first time here the new thing that God creates no longer stands in historical continuity with the current reality, but transcends it.

(b) In the Psa, *ḥādāš* occurs only in a single context: the discussion of the “new song.” The impv. demand “sing to Yahweh a new song!” is issued in Psa 33:3; 96:1; 98:1; 149:1, the same call in the cohortative in 144:9, and, also in the 1st per. but transposed into narrative praise, in 40:4 “Put a new song in my mouth, praise our God.”

Because the impv. demand in Isa 42:10 calls to praise in response to Yahweh’s new act of deliverance using the same diction as these Psa texts, and Psa 96 and 98 also demonstrate the influence of Deutero-Isa in other ways (Kraus, *Psa*, CC, 2:251f., 263f.; Westermann, *PLP* 138–42), it is possible that the “singing of the new song” in this whole group of texts derives from Deutero-Isa. But even if one cannot prove dependence upon Deutero-Isa, the “new song” is in any case meant as it is in Isa 42:10, i.e., as a response to Yahweh’s new act.

The song called for here is not “new” because a new text is to replace the old, or a new melody the old; this notion is thoroughly foreign to these psalms. The song is “new” because God has brought about something new, and the song is to respond to this new act of God; this new act of God is to resound in the new song.

(c) A few passages in the third portion of the canon remain to be treated. Lam 3:23, “His mercy is new every morning,” uniquely describes the persistence of God’s mercy in analogy to the new harvest or the new garment. This idiom accords with modern thought; hence it is not accidental that this very phrase became the inspiration for a hymn: “Great is thy faithfulness, morning by morning new mercies I see.” (A well-known Eng. hymn has been substituted for the Ger. here; they parallel rather closely.) But this phraseology is not typical for the OT; it occurs only in this one passage. “New” also refers to people in the sense of “not exhausted”: Job 29:20, “My honor remains new with me.”

Taking all occurrences of the term into account, one can understand Qohelet’s skeptical wisdom at the close of the OT period: “There is nothing new under the sun” (Eccl 1:9f.). Yet this phrase seems already to assume a higher assessment of the new in daily experience itself than is otherwise attributed to it in the OT.

5. In conclusion, one can identify a precise use of the word “new” in the OT that, in the concentration of prophetic passages, points to one moment in history and, in the response to this novelty in the “new song” of the Psa, to a particular act of God in Israel’s history: the innovation proclaimed after the political collapse of Israel/Judah, the end of the monarchy, and the destruction of the temple in Jerusalem. The OT no longer unequivocally treats this innovation based on God’s forgiveness, the dissociation of Israel’s deliverance from Israel’s might, and the prospect of a call to salvation for the nations as an already present historical reality (it never reports the new covenant, the new salvation, or the new form of the

people of God); thus the NT discussion of the innovation that has appeared in Christ is thoroughly consistent with OT usage.

On the NT, cf. J. Behm, “καὶνός,” *TDNT* 3:447–54; id., “νέος,” *TDNT* 4:896–901.

C. Westermann

הוה *ḥwh* hišt. **to bow down**

*HALOT* 1:295b; *TDOT* 4:248–56; *TWOT* 619; *NIDOTTE* 2556

1. Although *hištah<sup>a</sup>wāh* has been traditionally understood as a hitpa<sup>l</sup>el of the root *šḥh* (as a by-form of *šûaḥ* and *šḥḥ*; cf. e.g., GKC §75kk; BL 420; Joüon §79t; KBL 959), derivation from the root *ḥwh* is now established by the Ug. root *ḥwy*, and the form is explained as a *t*-reflexive of the old *šap<sup>l</sup>el* (*WUS* no. 912; *UT* 83 and no. 847; Moscati, *Intro.* 128; *HAL* 283b with bibliog.; Meyer 2:126, 162f.). In addition to Hebr. and Ug., the root is attested in Arab.: *ḥawā* “to gather, collect, unite,” *V* “to curl (up), coil (up)” (Wehr 219).

One should distinguish *ḥwh* I pi. “to announce” (Aram. loanword in Hebr.; cf. Wagner nos. 91f.; J. A. Soggin, *AION* 17 [1967]: 9–14) from *ḥwh* II.

2. The 170 occurrences of *ḥwh* hišt. are esp. well represented in the narrative books (Gen 23x, Psa 17x, 2 Sam and Isa 13x, 1 Sam and 2 Kgs 12x, Exod, 1 Kgs, and 2 Chron 11x, Deut and Jer 8x, Judg and Ezek 4x, Josh, Zeph, Esth, Neh, and 1 Chron 3x, Num and Zech 2x, Lev, Mic, Job, and Ruth 1x; Lis., 1421b overlooks Zech 14:17).

3. The evidence suggests the meaning “to bow (deeply)” for *ḥwh* hišt. (cf. Ug., Arab.). The Aram. portions of Dan use the synonymous *sgd* (Dan 2:46; 3:5–28 11x), which also appears in Isa 44:15, 17, 19; 46:6 alongside *ḥwh* hišt. (Aram. *sgd* is a loanword in Hebr., Arab., and Eth.; cf. Wagner no. 195).

*ḥwh* hišt. can be combined with *ʔaršâ* “to the ground” (Gen 18:2; 24:52; etc.; *ʔereš* Isa 49:23) or *ʔappayim ʔaršâ* “with the face to the ground” (Gen 19:1; 42:6, etc.; with *le* Gen 48:12; with *ʕal* 2 Sam 14:33), with the resulting meaning “to bow down to the ground, fall prostrate” or “to bow with one’s face to the ground, fall on one’s face” (before someone or something: with *le* of the person or the thing, rarely *ʕal*, Lev 26:1, or *ʔel*, Psa 5:8).

The verbs *qdd* (only in conjunction with *ḥwh* hišt. as an act preparatory to the latter) “to bow (in homage), kneel down” (Gen 24:26; Exod 34:8; 1 Sam 24:9, etc.; cf. KBL 821b), *npl* “to fall down” (2 Sam 1:2; 9:6, 8, etc.), and *kr<sup>c</sup>* “to kneel down, genuflect” (Esth 3:2, 5; in Psa 95:6 with *brk* qal “to kneel down”) also occur in the semantic field of *ḥwh* hišt.; other related verbs are *kpp* qal “to bend,” ni. “to bow” (Isa 58:5; Psa 57:7; 145:14; 146:8; ni. Mic 6:6), *šḥḥ* qal/ni., “to stoop” (Isa 2:9, 11, 17, etc.; hi. “to stoop to someone” Isa 25:12; 26:5), and *šḥḥ* qal “to bow one’s head” (Isa 51:23; hi. “to bow down” Prov 12:25); also likely, *hbr* qal in Isa 47:13 (cf. J. Blau, *VT* 7 [1957]: 183f.; E. Ullendorff, *JSS* 7 [1962]: 339f.; *HAL* 227b).

According to W. von Soden, forms such as *ušḥeḥin*, which occur in the Akk. of the Amarna Letters and the Ug. texts and which are associated with Hebr. *šḥḥ/šḥḥ* (KBL 959f.), derive via Hurrite from Akk. *šukênu* “to fall prostrate” (GAG §109m).

The same stereotypical expression is almost always encountered in Ug.: *lp<sup>n</sup> il thbr wtql ištḥwy wtkbdnh* “she (Anat) bowed down at El’s feet and fell prostrate, did homage and honored him” (*KTU* 1.6.I.35–38, etc.; cf. J. Aistleitner, *Die mythologischen und kultischen Texte aus Ras Schamra* [1959], 18).

The gesture indicated by *ḥwh* hišt. approximates the Islamic *sujūd* described by E. W. Lane: “He next drops gently upon his knees . . . places his hands upon the ground, a little before his knees, and puts his nose and forehead also to the ground (the former first) between his two hands” (as cited by D. R. Ap-Thomas, *VT* 6 [1956]: 229; cf. the illustrations in *ANEP* no. 355, as well as nos. 45f.). On the bowing down “from afar” in Exod 24:1, cf. S. E. Loewenstamm, “Prostration from Afar in Ugaritic, Accadian and Hebrew,” *BASOR* 188 (1967): 41–43.

One falls down before a superior and to express extreme honor and homage, e.g., before strange guests (Gen 18:12), as a supplicant before the powerful (Gen 33:7; 2 Sam 16:4), Moses before Jethro (Exod 18:7, with *nšq* “to kiss”), Abigail before David (1 Sam 25:23, 41), before the priest (1 Sam 2:36), the prophet (2 Kgs 2:15; 4:37), the king (2 Sam 14:4, 33; 24:20; 1 Kgs 1:16, 23; 2 Chron 24:17; Psa 45:12, etc.), and figuratively, nations or kings before Israel (Gen 27:29; Isa 45:14; 49:23; 60:14).

4. Similarly, in the cultic realm *ḥwh* hišt. also describes homage and worship (proskynesis) before stars (Deut 4:19; Jer 8:2), before the holy mountain (Psa 99:9), in the temple (2 Kgs 5:18), before the angel of Yahweh (Num 22:31), before Yahweh (Gen 24:26, 48, 52, etc.), before strange gods (see below; among other things, the verb *ʿbd* “to serve,” which often accompanies *ḥwh* indicating the close association of cultic act

and proskynesis). *ḥwh* ḥišt. here describes the attitude of prayer frequently assumed (with a following *pll* hitp. “to pray,” Isa 44:17; 1 Sam 1:28; the prayer is mentioned in Gen 24:26, 48; Exod 34:8; on other prayer gestures, cf. *BHH* 1:521; de Vaux 2:458f.) or the prayer itself (a verbum proprium for “to pray” beside *ḥwh* ḥišt. occurs rarely; see J. Herrmann, *TDNT* 2:789). Yet *ḥwh* ḥišt. does not merely describe the external gesture of “bowing down,” but “very quickly came to be used for the inward religious attitude” (Herrmann, *ibid.*) and can itself, therefore, often be rendered by “to pray, plead.”

One should not view *ḥwh* ḥišt. as a specifically Yahwistic term. Indeed, a great number of occurrences are in texts that denounce Israel’s apostasy and the cults of the foreign gods and idols (cf. Isa 2:8, 20; Jer 1:16; 8:2). In the Dtn-Dtr literature, *ḥwh* ḥišt., together with *ʿbd* “to bow down and serve,” becomes a fixed expression, otherwise unattested, which describes the worship of strange gods (according to Zimmerli, “Das zweite Gebot,” FS Bertholet 553 = Zimmerli, *GO* 237, a total of 27 passages; cf., among others, Deut 4:19; 5:9 = Exod 20:5; Deut 8:19; 11:16; Judg 2:19; 2 Kgs 17:16; 2 Chron 7:19, 22; Jer 13:10; see also N. Lohfink, *Das Hauptgebot* [1963], 74f., 99f., 178). Only Deut 26:10 (without *ʿbd*!) offers *ḥwh* ḥišt. in a positive sense as prostration before Yahweh, and it belongs to an older, adapted cultic tradition (cf. von Rad, *Deut*, OTL, 157f.). The Psalms differ (with the exception of Psa 81:10; 106:19); they exhibit *ḥwh* ḥišt. as the act of homage paid to Yahweh, the God(-king) enthroned on Zion, and go back to old Jerusalemite (originally Can.) cult tradition (Psa 22:28; 29:2; 86:9; 95:6; 96:9; cf. 1 Chron 16:29; Psa 97:7; 99:5, 9; 132:7; cf. also Zech 14:16f.; Isa 27:13).

5. The LXX almost always renders the root with *proskynein*. On the NT, cf. J. Herrmann and H. Greeven, “εὐχόμεαι,” *TDNT* 2:775–808; H. Greeven, “προσκυνέω,” *TDNT* 6:758–66.

H.-P. Stähli

## הִזָּה *ḥzh* to see

S 2372; BDB 302a; *HALOT* 1:301a; *TDOT* 4:280–90; *TWOT* 633; *NIDOTTE* 2600

1. Hebr. *ḥzh* “to see” is apparently a loanword from Old Aram. (Wagner nos. 93–98; otherwise e.g., Ginsberg and Dahood, see below), where *ḥzh* is the usual word for “to see” (Hebr. → *rʾh*; KBL 1074b, suppl.

201a; *DISO* 84f.; > Arab. *ḥāzin* “seer”; cf. Ug. *ḥdy*, *CML* 1 138n.18; *CML* 2 146).

Cf. also Phoen. *ḥzh* “to see” in the 9th-cent. Kilamuwa inscription, *KAI* no. 24.11f., and in Lidzbarski, *KI* no. 38 from the 4th cent. (*DISO* 84f.).

On Old Aram. *ḥzh* pa., cf. Fitzmyer, *Sef.* 40; R. Degen, *Altaram. Grammatik* (1969), 78.

H. L. Ginsberg (FS Baumgartner 71f.) associates Hebr.-Phoen.-Aram. \**ḥzw* “to see” with Arab. *ḥdw* “to be facing”; cf., however, the rejection of the verb *hdh* II “to see” postulated by M. Dahood (*Bib* 45 [1964]: 407f.; *HAL* 280 too) on the basis of the equation of Ug. *ḥdy* with *ḥzh* (contra *WUS* no. 905; tentatively *UT* no. 839).

*ḥzh* occurs in Hebr. and Bibl. Aram. only in the qal and pe., resp.; derived noms. are *ḥōzeh* I “seer,” *ḥōzeh* II “covenant” (see 3b and → *b<sup>c</sup>řt* I/2d), *meḥ<sup>c</sup>zâ* “window,” and the numerous expressions for “seeing,” incl.: *ḥāzôn*, *ḥāzût*, *ḥ<sup>a</sup>zôt*, *ḥizzāyôn*, *maḥ<sup>a</sup>zeh*, Aram. *ḥ<sup>c</sup>zû/ḥezwâ<sup>ʔ</sup>* and *ḥ<sup>a</sup>zôt* (BL 185). PNs formed from *ḥzh*, e.g., *ḥ<sup>a</sup>zâ<sup>ʔ</sup>ēl*, *yaḥ<sup>a</sup>zî<sup>ʔ</sup>ēl*, etc. (*HAL* 289a; see 4c) are also numerous.

2. *ḥzh* and its derivatives are attested 175x in the OT (Hebr. 130x, Aram. 45x, excl. proper names); specifically, the verb occurs in Hebr. 55x (Isa 12x, Ezek, Psa, and Job 9x each, Prov 3x, Exod, Num, Mic, Song Sol, and Lam 2x each, Amos, Hab, and Zech 1x each), in Aram. 31x (Dan 30x, 1x the pass. ptcp. *ḥ<sup>a</sup>zēh* in the meaning “appropriate, customary”; Ezra 1x), the substs. *hōzeh* 17x (2 Chron 7x, Isa [incl. 28:15] and 1 Chron 3x each, 2 Sam, 2 Kgs, Amos, and Mic 1x each), *ḥāzôn* 35x (Dan 12x, Ezek 7x, Isa, Jer, and Hab 2x each), *ḥ<sup>a</sup>zôt* 1x (2 Chron 9:29), *ḥāzût* 5x (Isa 3x, Dan 2x), *ḥizzāyôn* 9x (Job 4x, Isa 2x, 2 Sam, Joel, and Zech 1x each), *maḥ<sup>a</sup>zeh* 4x (Num 2x, Gen and Ezek 1x each), *meḥ<sup>c</sup>zâ* 4x (1 Kgs 7:4f.), Aram. *ḥ<sup>c</sup>zû/ḥezwâ<sup>ʔ</sup>* 12x, and *ḥ<sup>a</sup>zôt* 2x in Dan. Forms of the root are concentrated, then, primarily in Dan (58 = 1/3 of the total), Isa and Ezek (22 and 17x, resp., 17x in the other prophets together), and Job (13x).

3. (a) The meaning “to see (in a vision)” is the basis of 23 Hebr. verb forms (see 4a); 32 verbs in the meaning “to see” (incl. even Exod 18:21 and Mic 4:11) are dispersed in later literary traditions (Psa, Job, Prov, Song Sol, post-exilic passages in Isa). Of 32 passages, about 21 fall to a theological usage (see 4b-d) and 11 to a profane usage (see 3b). With the exception of the substs. treated in 3b, all derived substs. may be accounted for by the meaning “to look.” About 3/4 of all occurrences of the root, then, develop this meaning (cf. A. Jepsen, *Nabi* [1934]: 43ff.). In a modification of this chief meaning, *ḥzh* is used when Israel or an individual “sees”

Yahweh and his activity in history and creation (16x; see 4b), less often, when Yahweh “sees” (see 4c). The verb appears as a “poetic synonym” (GB 220b) for → *rʿh* “to see” only in its final phase of development.

(b) Profane diction distinguishes between “to see” (on Job 8:17, cf. *BH* 3; Horst, *BK* 16/1, 125f., 134) in the sense of “to experience” (Psa 58:9; cf. Eccl 7:1), “to look upon with joy” (Song Sol 7:1[bis]; cf. Prov 23:31) or with connotations of malicious glee (Mic 4:11; cf. Obad 12f.; BrSynt 96), “to perceive (with understanding)” (Prov 22:29; 29:20; cf. 1 Sam 25:17), “to experience, acquire for oneself” (Job 15:17; 27:12; Prov 24:32; cf. Eccl 1:16), and “to observe, watch carefully” (Isa 47:13; cf. Exod 1:16).

The profane substs. *meh<sup>c</sup>zâ* “window” (1 Kgs 7:4f.), *hōzeh* and *hāzût* = *b<sup>c</sup>rit* (Isa 28:15, 18; cf. bibliog. in A. R. Johnson, *Cultic Prophet in Ancient Israel* [19622], 13f.n.3; → *b<sup>c</sup>rit* /2d: “to perceive” > “to prescribe”), and *hāzût* “appearance” also belong to the meaning “to see.”

(c) The Aram. root seems to exhibit a similar semantic development. The primary usage in the context of visions gives rise to the common use of *hzh* in the sense of “to look (on with)” (Ezra 4:14; Dan 3:25, 27; 5:5, 23), “to examine, experience” (Dan 2:8), and “to be appropriate” (pass. ptcp. Dan 3:19), and of *h<sup>c</sup>zû/hezwā<sup>c</sup>* in the meaning “figure” (Dan 7:20). In contrast, *h<sup>a</sup>zôt* “sight” is used only in a profane sense (Dan 4:8, 17).

4. (a) *hzh* and its derivatives indicate, first of all, visionary experience. Num 24:4, 16 transmit an ancient example of this usage (W. F. Albright, “Oracles of Balaam,” *JBL* 63 [1944]: 207–33). *hzh* and *mah<sup>a</sup>zeh* occur in every instance of this usage in the introduction to a visionary oracle containing the self-introductory and legitimation formula, *n<sup>c</sup>ūm bil<sup>c</sup>ām*. Balaam sees visions from God and renders them in his own words. As the history of the gen. construction → *ne<sup>c</sup>ūm* with a human PN indicates, the prophets used visionary genres. Nonetheless, they never use *hzh* to report a vision, but → *rʿh* directly introduces (as in the seer’s oracle in Num 23:9, 21; 24:17) the prophetic vision report (e.g., Amos 7:1, 4, 7; Isa 6:1; Jer 4:23ff.; Ezek 1:4; 2:9). *hzh* refers generally to the reception of revelation (cf. Wildberger, *Isa 1–12*, CC, 5f.; Wolff, *Amos*, Herm, 124). It occurs in the foundation of the announcement of judgment that Israel cites (Isa 30:10[bis]; Ezek 12:27), in the condemnation of false prophets who cause Yahweh to act through “deceptive visions” (Ezek 13:6–9, 16 [citing the people], 23; 21:34; 22:28; Zech 10:2), and in the archaic tradition in Exod 24:9–11 (v 11b), which relates the finalization of the covenant in the form of a third-party vision narrative.

The equation of seer and prophet (Amos 7:12, 14; Mic 3:7; cf. v 5; Isa 29:10; 2 Kgs 17:13; cf. 2 Chron 9:29; 12:15 with 13:22; cf. S. Mowinckel,

*Psalmenstudien* [1923], 3:9ff.; H. Junker, *Prophet und Seher in Israel* [1927], 77ff.; esp. Jepsen, *Nabi* [1934], 43ff.; R. Hentschke, *Die Stellung der vorexilischen Schriftpropheten zum Kultus* [1957], 150; S. Lehming, *ZTK* 55 [1958]: 163n.3; A. Gunneweg, *ZTK* 57 [1960]: 6) mirrors a historical process (1 Sam 9:9; cf. O. Plöger, *ZAW* 63 [1951]: 157–92; J. Lindblom, *Prophecy in Ancient Israel* [1962], 87ff.). The prophets applied the old designations of the seers to themselves, as well as their specific forms of experience and expression. The term *hōzeh* in specialized usage signifies a charismatic office (perhaps the “seer”) for which not every *nābîʿ* was qualified (Amos 7:12, 14 [cf. Wolff, *Amos*, Herm, 312f.]; Isa 28:7; 30:10: *rōʾîm* and *hōzîm* are par.; cf. Wildberger, *Isa 1–12*, CC, 5f.).

The uses of *hzh* and *rʿh* are explained in terms of the contrast of “true” and “false” prophets (F. E. König, *Der Offenbarungsbegriff des AT* [1882], 2:29ff., 72f.; contra J. Hänel, *Das Erkennen Gottes bei den Schriftpropheten* [1923], 7ff.) or in terms of varied functions of the *nʿbîʾîm* and the writing prophets (Jepsen, op. cit. 53ff.; contra Johnson, op. cit. 12n.2), or they are regarded as synonymous (Lindblom, op. cit. 90). The usage of the verb and its derivatives almost contradicts the depiction of *hzh* as probably a reference to auditions rather than to visions (cf. Johnson, op. cit. 11ff.; similarly Jepsen, op. cit. 48f.). Thus Balaam’s self-introduction mentions *hzh* and *maḥʾzeh* (Num 24:4, 16 testifies to the origins of both in the visionary oracle) together with the “hearing of divine words”; consequently, forms of the root were related from the earliest period onward to experiences that incorporated vision and audition. In Dan 8–11 1st-per. accounts preserve the meaning of *hāzôn* as a vision (frequently associated with *rʿh* qal/ni.); it may also be present in Isa 29:7; Ezek 7:26; 12:22–24, 27; 13:16 (contra Johnson, op. cit. 7, 14, 37f.). All other passages give evidence of the subst. as a synonymous expression for → *dābār* “word” (e.g., 1 Sam 3:1; Hos 12:11; Mic 3:6f.; Psa 89:20). The early usage of the root in Num 24:4, 16 already demonstrates a line of development further strengthened in the prophetic tradition; cf. the combination of *hzh* qal with *hāzôn* (Johnson, op. cit. 14n.1: “to make an observation” Isa 1:1; Ezek 12:27; 13:16), with *dābār* (Isa 2:1; Amos 1:1; Mic 1:1), *maśśāʿ* (→ *nśʿ*, Isa 13:1; Hab 1:1; Lam 2:14[bis]). It is equally possible that *hāzût* (Isa 29:11 and sg. *hʾzôt* 2 Chron 9:29) = *dābār*, but Isa 21:2 likely refers to a vision. *hizzāyôn* (Joel 3:1; Job 7:14; 20:8; 33:15; cf. Job 4:13; in a place-name in Isa 22:1, 5) emphasizes the proximity of dream and visionary experiences (in addition to *hāzôn*, Isa 29:7; Dan 1:17; cf. 1 Sam 3:1; Mic 3:6); it occurs in the sense of *dābār* in 2 Sam 7:17.

(b) “To see” Yahweh or his act means: to experience God’s intervention either in the history of the people or of the nations (Zion hymn,

Psa 46:9; salvation oracle for the eschaton, Isa 33:17, 20; in the Isa apocalypse, Isa 26:11[bis]; on Isa 48:6, see Westermann, *Isa 40–66*, OTL, 194) or in individual existence (all occurrences appear in the context of the individual lament: in Psa 17:15 it modifies, in 58:11 it replaces, a vow of praise; cf. *PLP* 74f.nn.23f.; in Job 23:9 it follows God’s accusation as a prayer; 24:1 is an indirect accusation of God; cf. C. Westermann, *Structure of the Book of Job* [1981], 57f.; Job 19:26f. is a confession of confidence, *ibid.* 102f.; Psa 11:7; 27:4; 63:3 are portions of individual psalms of confidence). *hzh* occurs once in the descriptive praise of the creator (Job 36:25, alongside *nbṭ* hi. “to look”).

(c) Conversely, “God sees” means: God intervenes on someone’s behalf, thus in Psa 17:2 (introductory request of an individual lament) and Psa 11:4 (psalm of confidence).

PNs formed with *hzh* also mirror the doubled usage of “to see.” In this regard, they correspond either to the request for God’s attention in the psalm of lament (“May God/Yahweh see”) or to narrative praise (“Yahweh has seen”); cf. *IP* 186, 198.

(d) Finally, a few varied meanings may be mentioned: *hzh* “to see” = “to gain insight” (Job 34:32, a confession of sin), “to feast one’s eyes” (Isa 57:8, the justification for an announcement of judgment; contra G. R. Driver, *FS Eilers* 54), “to recognize” = “to choose for an office” (Exod 18:21).

(e) The Aram. verb is used in connection with visions like *hzh* (e.g., Dan 2:26) and *rḥ* (e.g., 4:7, 10). The derivative *ḥezwāʾ* (emphatic st.) occurs only in a dream context (e.g., 2:28) and resembles in this respect Hebr. *ḥāzôn* and *ḥizzāyôn*.

5. On the rendering of the Hebr. and Aram. terms in the LXX, cf. W. Michaelis, *TDNT* 5:324–28.

The various meanings of *hzh* and its derivatives are echoed in the NT: *blepō* (e.g., Acts 1:11), *eidon* (e.g., Acts 9:12; Rev 1:2), *horama* (e.g., Acts 9:10, 12), and *horasis* (e.g., Acts 2:17; Rev 9:17) refer formally to a vision; *blepō* appears in the sense of historical experience of God’s action (e.g., Matt 13:16); *eidon* (e.g., Matt 5:16), *blepō* (e.g., Rom 7:23), and *theōreō* (e.g., Acts 4:13) occur in the fig. meaning “to perceive”; *theōreō* in the sense of “to live” (e.g., John 8:51); cf. W. Michaelis, “ὁράω,” *TDNT* 5:315–82.

D. Vetter

קִּיָּם *hṣq* **to be firm**

S 2388; BDB 304a; HALOT 1:302b; TDOT 4:301–8; TWOT 636; NIDOTTE 2616

1. The verbal root *ḥzq* is also attested in Aram. and Arab., in addition to Hebr. (Jew. Aram., Mand., and Arab. also *hrzq*).

Isa 22:21 and Nah 2:2 (pi.) together with the Arab. *ḥazaqa* (cf. Syr. *ḥ<sup>e</sup>zaq*) “to bind firmly” (Lane 2:560) support the thesis of J. L. Palache (SNHL 29) that the basic meaning of *ḥzq* is “to tie up, gird up firmly.”

Wagner no. 99 is correct not to consider *ḥzq* pi. in the meaning “to gird” an Aramaism (contra G. R. Driver, SVT 1 [1953]: 30).

Whether Akk. *ešqu* “massive” should be attributed to the same root (cf. AHW 257) is questionable. *iz/šqātu* “fetter” is an Aram. loanword in Akk. (AHW 408b; W. von Soden, AfO 20 [1963]: 155). The same may be true of Akk. *ḥazīqatu* “headband,” which Palache cites in support of his thesis (op. cit.), but which is attested only in Neo-Bab. and Neo-Assyr. (AHW 339a).

The adjs. *ḥāzāq* and *ḥāzēq* and the substs. *ḥēzeq*, *ḥōzeq*, *ḥezqâ*, and *ḥozqâ* with the meanings “strong” or “strength” derive from the root (*ḥezqâ* “to become strong” and *ḥozqâ* in 2 Kgs 12:13 “restoration” function as infs.).

On the PNs *ḥizqî*, *ḥizqîyâ(hû)*, *y<sup>e</sup>ḥizqîyâ(hû)*, and *y<sup>e</sup>ḥezqêl*, cf. IP nos. 474f., 659f.

2. Of the 290 occurrences of the verb (qal 81x, pi. 64x, hi. 118x, hitp. 27x), 98 passages fall to the Chr literature alone (1 Chron 12x, 2 Chron 39x, Ezra 5x, Neh 42x). The remaining examples occur primarily in the Dtn-Dtr books (Deut 9x, Josh 8x, Judg 12x, 1 Sam 6x, 2 Sam 18x, 1 Kgs 9x, 2 Kgs 15x), in the major writing prophets (Isa 21x, of these 13x in Deutero-Isa, Jer 15x, Ezek 12x), and in Dan (13x). The use of the verbal root in the three post-exilic prophets (Hag 3x, Zech (5x), and Mal (1x) stands out markedly from that of the other Minor Prophets (Hos 1x, Mic 2x, Nah 3x). The remaining figures are: Gen 6x, Exod 15x, Lev and Num 1x each, Psa 5x, Job 7x, Prov 4x. Thus *ḥzq* is chiefly attested in the Dtr-Chr literature and esp. in the late books of the OT.

The use of the adj. *ḥāzāq* (total 56x, Deut and Ezek 10x, Exod 7x, 1 Kgs and Jer 4x each) paints the same picture. *ḥāzēq* occurs only 2x (Exod 19:19; 2 Sam 3:1), *ḥēzeq* 1x (Psa 18:2), *ḥōzeq* 5x (3x *b<sup>e</sup>ḥōzeq yād* “mightily” in Exod 13:3, 14, 16), *ḥezqâ* 4x, and *ḥozqâ* 6x (5x *b<sup>e</sup>ḥozqâ* “with force,” as well as 2 Kgs 12:13, where a pi. inf. may be read; cf. HAL 292b).

3. The chief meaning “to be/become strong, firm” in the qal produces the most important meanings in the derived stems: pi. “to strengthen,” hi. “to grasp, hold firm,” and hitp. “to prove to be strong/courageous” (*HAL* 290–92; cf. *HP* 283), with no basic distinction between physical and mental/emotional strength.

→ *ʕmš* “to be strong,” → *ʕzz* “to be powerful,” and the subst. *ʕz* “power” and → *kōaḥ* “strength” function as synonyms; cf. also → *yād* “hand” and → *zʿrôaʕ* “arm.”

The qal is used esp. of the dominant strength of a people (Judg 1:28; Josh 17:13; 2 Sam 10:11; 1 Kgs 20:23), a king’s might (2 Chron 26:15), a battle’s intensity (2 Kgs 3:26) and, above all, of a famine (Gen 41:56f.; 47:20; 2 Kgs 25:3; Jer 52:6). In conjunction with *yād* “hand” the qal means “to be courageous, take courage” (2 Sam 2:7; Ezek 22:14), the pi. “to encourage, urge on,” either of another person (1 Sam 23:16; Judg 9:24; Isa 35:3; Jer 23:14; Job 4:3) or of oneself (Neh 6:9 inf. abs. instead of 1st per.). This usage of *ḥzq* also occurs without the addition of *yād* (qal 2 Sam 16:21; pi. 2 Sam 11:25). *ḥzq* pi. is attested in conjunction with *b<sup>ʕ</sup>yād* in the sense of “to help” in Ezra 1:6, in the same meaning without *be* but with *yād* in Ezra 6:22, without *b<sup>ʕ</sup>yād* in 2 Chron 29:34 (also as hi. Ezek 16:49; Lev 25:35). In a military-defensive sense, the pi. means the fortification of cities (2 Chron 11:12), towers (2 Chron 26:9), or kingdoms (2 Chron 11:17), the hi. the strengthening of a guard (Jer 51:12). While 2 Kgs 12:6–15; 22:5f.; 1 Chron 26:27; 2 Chron 24:5, 12; 29:3; 34:8, 10 employ the pi. of *ḥzq* for the repair of buildings, Neh 3:4–32 (34x) uses the hi. for the repair of city walls (with one exception: 3:19 pi.; cf. *HP* 103f.). The subjs. of a hi. form in the meaning “to grasp” are often terms such as “terror” (Jer 49:24), “horror” (Jer 8:21), “distress” (Jer 6:24; 50:43), and “woes” (Mic 4:9). The hi. too can be combined with *yād* (with *b<sup>ʕ</sup>yād* “to take by the hand” Gen 19:16; Judg 16:26, etc.; with *yād* “to help” Ezek 16:49; Job 8:20; cf. Gen 21:18 with *yād* and *be* “to hold one’s hand over another protectively”).

Other usages of *ḥzq* include: with *dābār* “word” (as the subj. of *ḥzq qal*) and *ʕal* of the person (2 Sam 24:4 = 1 Chron 21:4 “the commandment of the king remained firm with respect to X”; Mal 3:13 “you spoke impudently against me”), as well as the formula for reporting visions, “the hand of Yahweh lay hard (adj.) on me,” Ezek 3:14 (→ *yād*).

4. In the theological sphere the pi. (Ezek 30:25 hi. following v 24 pi.; cf. *HP* 89) means Yahweh’s strengthening. It refers primarily to military-defensive strength (Judg 3:12; Ezek 30:24; Hos 7:15; Psa 147:13). Yet Samson too prays for divine power in his final stand (Judg 16:28), and once God “heals” the sheep neglected by the bad shepherds (Ezek 34:16; cf. v 4).

J uses forms of  $\rightarrow kbd$  to describe “intransigence”; E and P use  $h\dot{z}q$  qal for willful intransigence and  $h\dot{z}q$  pi. for hardening of the heart through God’s agency (F. Hesse, *Das Verstockungsproblem im AT* [1955], 18f.). In Exod the obj. is always  $\rightarrow l\bar{e}b$  “heart” (cf. also Ezek 2:4, with adj.). Phrases with  $p\bar{a}n\hat{m}$  “face” (Jer 5:3 pi.) and  $m\bar{e}\dot{s}a\dot{h}$  “forehead” (Ezek 3:7–9, adj.) also occur in Jer and Ezek. This intransigence can more likely be explained from a salvation history perspective, as a “process in the universal, eschatologically oriented judgment of God” (J. Moltmann, *RGG* 6:1385), than as a theological aporia (the OT could not charge delusion to demonic powers) or as a religiopsychological principle (cf. von Rad, *Theol.* 2:151–55; E. Jenni, *TZ* 15 [1959]: 337–39).

The impf. of  $h\dot{z}q$  (sg. and pl. qal) and the expanded usages ( $h\dot{z}q$  alongside  $\lambda m\dot{s}$  “be firm and steadfast,” Deut 31:7, 23; Josh 1:6f., 9, 18; 1 Chron 22:13; pl.: Deut 31:6; Josh 10:25; 2 Chron 32:7; together with  $\acute{s}h$  “and do it” in various combinations, Ezra 10:4; 1 Chron 28:10, 20; 2 Chron 19:11; 25:8; qal alongside hitp., 2 Sam 10:12 = 1 Chron 19:3; qal impf. repeatedly, Dan 10:19) have their place in salvation oracles as a formula of encouragement (probably originally before battle: Deut 31:6f., 23; Josh 1:6, 9; 10:25; 2 Sam 10:12; 2 Chron 32:7) and, more generally, in the promise of divine guidance as attested by the frequent addition “do not fear” (Deut 31:7; Josh 1:9; 10:25; etc.) and the support formula “I will be with you” (Deut 31:8, 23; 1 Chron 28:20; 2 Chron 19:11; cf. H. D. Preuss, “. . . ich will mit dir sein!” *ZAW* 80 [1968]: 139–73). In the Dtr-Chr literature, the formula (in various forms) also refers to keeping the law (Josh 1:7; 1 Chron 22:13; 2 Chron 15:7; cf. Ezra 10:4; 2 Chron 19:11; Deut 12:23), and in Hag 2:4 and 1 Chron 28:10, 20 to the construction of the temple. The usage supplemented by  $\acute{s}h$  (see above; cf. Hag 2:4) remains limited, meanwhile, to Hag and Chron (W. A. M. Beuken, *Haggai-Sacharja 1–8* [1967], 53–60, who, like N. Lohfink, “Die deuteronomistisch Darstellung des Übergangs der Führung Israels von Moses auf Josua,” *Scholastik* 37 [1962]: 32–44, views the encouragement formula as an element of the genre for induction into office).  $h^{\acute{a}}z\dot{a}q\ wa\dot{h}^{\acute{a}}z\bar{a}q$  occurs only once in a vision report (Dan 10:19). Cf. also  $\rightarrow \acute{s}m\dot{s}$  4.

The formula  $b^{\acute{e}}y\bar{a}d\ h^{\acute{a}}z\bar{a}q\hat{a}$  “with a strong hand” in Num 20:20 (J) refers to Edom, but otherwise (esp. in Deut, where the expression is usually expanded to “with a strong hand and an outstretched arm”) to the divine saving act of redemption from Egypt (on which see, however,  $\rightarrow y\bar{a}d$  and  $\rightarrow z^{\acute{e}}r\hat{o}a^{\acute{e}}$ ; B. S. Childs, “Deuteronomistic Formulae of the Exodus Tradition,” *FS Baumgartner* 30–39).

5. The usage of  $h\dot{z}q$  in the Qumran literature resembles that of the OT, except that the pi. in the sense of “to harden” does not occur and the

usage “with a strong hand” in reference to the exodus is lacking. On the NT, cf. W. Michaelis, “κράτος,” *TDNT* 3:905–15; W. Grundmann, *Der Begriff der Kraft in the neutestamentlichen Gedankenwelt* (1928).

A. S. van der Woude

## חָטָא *ḥṭʿ* to miss

S 2398; BDB 306b; *HALOT* 1:305a; *TDOT* 4:309–19; *TWOT* 638; *NIDOTTE* 2627

1. The root \**ḥṭʿ* “to miss” is common Sem. (Berg., *Intro.* 220; P. Fronzaroli, *AANLR* 8/20 [1965]: 252f., 263, 268); Akk. *ḥaṭû* “to miss, sin” (*AHw* 337f., 350; also e.g., *ḥiṭu/ḥiṭtu* “lack, sin”), Ug. *ḥṭʿ* “to sin” (*WUS* no. 1019; *UT* no. 952), Aram. *ḥṭʿ* “to sin” (*DISO* 85; KBL 1075a; the verb does not occur in Bibl. Aram.; the oldest occurrence is Aḥ. 50 *ḥṭʿyk* “your failures” with the 3d radical ʿ, later > y), Arab. *ḥaṭīʿa* “to commit an error” (Wehr 245), Eth. *ḥaṭʿa* “to not find” (Dillmann 619f.).

In the OT the verb occurs in the qal “to miss (a mark), fall short,” in the hi. either the normal causative “to occasion to sin” or the inner-causative “to let oneself err, fail” (*HP* 267), in the pi. either the estimative-declarative “to have to recognize something as failed” (Gen 31:39), the denominative “to remove sin” (privative with *ḥēṭʿ*), or “to bring as a sin offering” (resultative-productive with *ḥaṭṭāʿt*), in the hitp. the reflexive-privative “to remove one’s sin” (on Job 41:17, “to withdraw,” cf. Hölscher, *HAT* 17, 96).

There are four fem. substs. for “sin,” etc., in addition to the masc. segholate formation *ḥēṭʿ* (< \**ḥiṭʿ*; cf. Akk. *ḥiṭu*): *ḥeṭʿâ* (only Num 15:28 txt?), *ḥʿāʿâ* (BL 463), *ḥaṭṭāʿâ* (only Exod 34:7; Isa 5:18; BL 477), and *ḥaṭṭāʿt* (BL 611, 613). There is also the nomen agentis *ḥaṭṭāʿ* “sinful, sinner” (BL 479).

Bibl. Aram. has the subst. *ḥʿāy* “sin” (Dan 4:24) and (as a loanword from Hebr.) *ḥaṭṭāyāʿ* “sin offering” (Ezra 6:17 K, Q *ḥaṭṭāʿâ*).

2. An overview of the 595 occurrences of the root in the OT (verb 237x, noun 356x Hebr., 2x Aram.; Lis. does not list Num 29:25 *ḥaṭṭāʿt*) produces the following table (*ḥeṭʿâ* [1x Num], *ḥaṭṭāʿâ* [1x each in Exod and Isa], and *ḥʿāʿâ* are included under “other”):

	qal	pi.	hi.	hitp.	<i>ḥēṭ'</i>	<i>ḥattā'</i>	others	<i>ḥattā'λ</i>	total

OT	181	15	32	9	33	19	11	293	593

More than one-fourth of the occurrences of the verb belong to the language of the priestly traditions (Lev, Num, Ezek). A further one-fourth occur in the historical books (esp. 1 Sam–2 Kgs); a great segment of these occurrences, esp. the hi. forms, is shaped by Dtn-Dtr linguistic traditions, incl. also Hos and Jer. The prophets (somewhat) independent of these two groups do not use the word or use it only minimally.

The oldest examples are to be found in J (11x) and E (10x), in older layers of the books of Sam, in Isa, Hos, and in Deut and Josh. They constitute about one-fourth of the occurrences.

Almost one-third of the various nouns belong to priestly language (P, Ezek; cf. also Psa, Deutero-Isa, and Trito-Isa). Dtn-Dtr diction is also represented with about 50 occurrences. In two-fifths of all passages *ḥattāʾ* means “sin offering” (cf. the statistics in R. Knierim, *Die Hauptbegriffe für Sünde im AT* [1965], 19f.).

3. (a) The basic meaning “to miss (a mark)” is lit. apparent in Judg 20:16 (hi.) “they all hurled stones and hit precisely, without missing,” while in Prov 19:2 “whoever rushes about missteps,” the transition from the lit. to the fig. usage in the sense of a perverted life-style is clear. More important is the observation that the root—apart from a few exceptions (cf. also Prov 8:36, with the antonym *msʾ* “to find” in v 35; Job 5:24 “so you will miss nothing”)—is used almost exclusively to describe religious circumstances. This area uses the term fig. only to disqualify particular procedures. That the term objectively disqualifies an act, left otherwise unspecified, as a crime, an error, makes it a comprehensive term for “sin.” In this respect, both the basic meaning itself and the usage of all derivatives in whatever context indicate the factuality of the error (cf. e.g., qal, Gen 39:9; 40:1; 42:22; 1 Sam 2:25; *hattāʾ* Gen 13:13; *ḥēṭʾ*, Lev 19:17, etc.).

For these reasons the OT prefers the root *ḥṭʾ* above all other terms for “sin.” The verb outstrips all verbs for “to sin” (Knierim, op. cit. 13, 19). The substs., taken together, also lead, although they are closely followed by → *ʿāwōn*. Only the adj. *rāšāʿ* (→ *ršʿ*) decisively outweighs *ḥattāʾ*.

(b) The term is used formulaically to a noteworthy degree. The formulaic usages and phrases and their life settings point to a great range of distribution of realms of experience that exposed Israel to the experience of error (cf. Knierim, op. cit. 20–55, 257f.). Error was expressed in institutionalized procedures like Yahweh’s convicting sentence in the cultic-judicial act, the priestly Torah, the sermon, the (political or legal) act of submission, and the (cultic or politicolegal) individual or communal confession of sin. This distribution and the thoroughly legal implications of the usage of the term express the fact that “sin” is demonstrated and condemned officially (institutionally) and objectively with the aid of unilateral and universally binding categories and is accordingly to be acknowledged by the one found guilty.

The following usages of the verb merit attention: (1) the old, official individual confession of sin, for which *ḥātāʾtî* “I have sinned” is the OT’s primary formulation (30x); it occurs primarily in the confession after (sacral or profane) legal sentencing (Josh 7:20; 1 Sam 15:24; 2 Sam 19:21; 24:10; Psa 41:5; 51:6) and in the affirmation of innocence following an indictment (Judg 11:27; 1 Sam 24:12); (2) the communal confession of sin, *ḥātāʾnû*

“we have sinned” (24x), in rites of penance or prayers of repentance; it forms the prerequisite for the reversal of a crisis situation and stands in close connection with the removal of strange gods and the communal lament (cf. Num 14:40; 21:7; Judg 10:10, 15; 1 Sam 7:6; 12:10; Jer 3:25; 8:14; 14:7, 20; Dan 9:5ff.; Neh 1:6); (3) the indictment or verdict formulae (qal pf. 3d per. sg. or pl.) with a setting in profane (Gen 40:1; 1 Sam 19:4) or sacral procedures or diction (Exod 32:31; Hos 4:7; Psa 78:32; Zeph 1:17); it discloses an error or justifies the sentence; (4) this same genre occurs in the 2d per. sg. or pl. in the direct, indicting address of the prophetic or Dtn preacher (e.g., Exod 32:30; Num 23:23; Deut 9:16, 18; Jer 40:3; Hos 10:9).

One may identify about 15 usages for the nouns. (Knierim, op. cit. 43–54), which generally refer, in various settings, to all types of errors (legal, cultic, social, etc.); cf. one example each in 2 Sam 12:13; Jer 16:10; Hos 8:13; Gen 41:9; Lev 16:16; Mic 3:8; Psa 59:4; 32:5; Lam 4:22; Psa 51:4; Jer 36:3; Psa 85:3; Isa 44:22. Worthy of specific attention are: (1) *nś' ḥēṭ'* “to bear an error” (17x), often translated “to forgive”; the usage refers, however, to the basic procedure whereby an error must be borne; the question as to whether it signifies the forgiveness or the punishment of the sinner depends upon the context, which speaks of burdening either the sinner or a representative (cf. Lev 19:17; 22:9; 20:20 beside Exod 34:7 and Gen 50:17; Exod 32:32; 1 Sam 15:25); (2) the combination of the root *ḥṭ'* with *mût* “to die” (11x); cf. e.g., Deut 22:26 (mortal sin) and Amos 9:10; Deut 21:22; 24:16; 2 Kgs 14:6; Ezek 18:4, 20.

(c) The etymology of the term (“to miss a mark”) and the contexts indicate that the criterion for “error” is not particular commandments but injury to a communal relationship: a person sins against a person or against God (cf. the programmatic statements in 1 Sam 2:25; Jer 16:10–12; 1 Kgs 8:46). Nevertheless, to the extent that a particular communal relationship implies norms of relation, violation of the norms results in injury to the relationship. In this sense, then, norms appear in the context of the discussion of “error,” i.e., in reference to crimes against the ban (1 Sam 14:33ff.), adultery (2 Sam 12:13) or sexual folly (Lev 20:20), theft (Gen 31:36), crimes against innocent blood (2 Kgs 21:17), against Yahweh’s anointed (1 Sam 24:12), idolatry (Deut 12:29f.), social misdeeds (Mic 3:8; 6:6–8, etc.). Hosea encompasses legal, ethicosocial, and cultic errors without distinction (Hos 4:1, 6–8).

The use of the word in the so-called profane-legal sphere is also significant, e.g., in Hezekiah’s confession of rebellion (2 Kgs 18:14) or in reference to the failure to discharge professional duties by Pharaoh’s baker and butler (Gen 40:1); cf. also Gen 42:22; 43:9. Beside the known impossibility of strictly distinguishing between the profane and the sacral realms, these usages of the term indicate that the discussion of

“sin” applies to all areas of life and was in no way limited only to the religious sector.

For the rejection of a behavior as “error,” it is basically inconsequential whether a deed occurs consciously or unconsciously. In a great many passages, such a distinction plays no role whatsoever. Neither the motive nor the attitude is characterized, but the fact as such. Unconscious errors are named in Gen 20:9; Num 22:34; Lev 4–5; Psa 38:4, 19; 41:5 (cf. Knierim, op. cit. 68). Thus the person is also responsible for unconscious error. On the one hand, this objective, unpsychologized evaluative criterion demonstrates the dependence of the sinner on external judgment. On the other hand, passages like Gen 4:7; Deut 15:9; 22:26, which emphasize subjective attitudes, and those like Gen 20:7, 17; 1 Sam 14:45; Num 22; Exod 21:13f., etc., which regulate unintentional misdeeds, indicate a growing tendency to consider subjective responsibility and esp. to bring about a clearer understanding of the failure of human conscience.

The term is clearly used in the context of the dynamistic understanding of existence (“destiny determining spheres of action”), namely with reference to the unity of error and judgment, as well as the relationship between community and individual. “The sinner must die in his *ḥēṭ*” is a phrase valid for centuries (cf. Num 27:3; Deut 19:15; 24:16; 2 Kgs 14:16; Psa 51:7; Dan 9:16). Here, as elsewhere, an interaction of legal and phenomenal spheres of thought is apparent, the sense of which is to express the legal unity of error and judgment (by legal notions) as well as the unity of the two legal categories (by phenomenal spheres of thought).

Totality or corporate thought is also original to the discussion of “sin” (cf. Gen 9:22; 20:9; 26:10; Josh 7:11; 8:5; 10:5, 7; 14:1). But it was modified under the influence of diverse experience and breached at several points. Types of such modification are found (1) in Exod 20:5f.; Jer 32:18: emphasis on the superabundance of grace over judgment with a view in each case to a community (cf. Exod 34:6f.; Num 14:18); (2) in Gen 18:17ff.: a question as to whether the fate of a society is determined by the minority of the righteous or the majority of the guilty; (3) in Josh 7: the relief of the national unit to the burden of the family unit (cf. 2 Sam 24:17); (4) Num 16:22: “God of the spirits of all flesh, a (one) person sins, and you will be angry with the whole community?” Here the differentiation between the sinners and the righteous reveals the individual. Cf. the transition to the legal statement in Ezek 18; Deut 24:16; Jer 31:20. As far as may be determined, this discovery of the individual has its setting in the distinction between the righteous and the sinners practiced in the priestly handling of the Torah.

(d) The root *ḥṭ* is the major term in the highly differentiated OT terminology for “sin” (cf. Knierim, op. cit. 13nn.1, 19). Although almost all

terms originally had a specific significance with respect to content, *ḥtʿ*, *rāʿā* ( $\rightarrow r^{cc}$ ),  $\rightarrow ʿāwōn$ , and *pešaʿ* ( $\rightarrow pšʿ$ ) are formal terms, preferred as generic terms for “sin.” Of these *rāʿā* “bad, evil” stands alone; the other three are used complementarily, a phenomenon evident in that they are combined 4x in an immediate or an extended context: Exod 34:7; Lev 16:21; Num 14:18; Ezek 21:29; Psa 32:1, 5; 59:4; Dan 9:24, as well as Isa 59:12; Jer 33:8; Mic 7:18f.; Psa 51:3–7; Job 7:20f.; 13:23 (cf. Isa 1:2, 4; Ezek 33:10, 12). Even though this triad is formulaic and systematically expresses the mass of all possible errors, one may not simply view the three terms in the triad as synonyms. Each disqualifies “sin” in its own way. Nevertheless, where they are used together as a formula, they are intended to represent all other terms for “sin.”

4. (a) The term *ḥtʿ* is used in all of its derivatives, apart from a few exceptions, in the context of theological statements. It is moreover the most frequently used theological term for “sin” in the OT, second only to *rāʿā* in the general semantic field of terms related to “evil” (on this general theme cf. the OT theologies and Th. C. Vriezen, *RGG* 6:478–82 with bibliog.; further Knierim, op. cit.; and Š. Pořbčan, *Sin in the OT* [1963]). As such, it characterizes some deeds or behaviors theologically; it disqualifies an act or behavior as condemned by Yahweh. The disqualification comes to expression in a great many forms and settings, which nevertheless all presuppose Yahweh’s condemnatory actions and thereby imply a specific theological motif. The theological character of the understanding of “error” is therefore not only grounded in the meaning of the word, formally and psychologically only minimally developed, but in terms of whether and how Yahweh views a misdeed. In this sense “error” has the same weight as all other types of “sin.” The statistical assessment of the terminology preferred to different degrees in the individual sources of the OT supports this observation (cf. Knierim, op. cit. 245ff.).

(b) The following may be mentioned as the chief contexts in which disqualification is expressed as Yahweh’s judgment: (1) the realm of Yahweh’s judgment in the oracle or sermon of Yahweh, and the resultant confession of sin (cf. the formulaic usages in 3b). These settings make it most clearly apparent that the confession of “sin” corresponds to a revelatory (disclosing) process (cf. also Lam 2:14; 4:22b; Mic 3:8; Isa 58:1); (2) where *ḥtʿ* implies acts against Yahweh or Yahweh’s regulations or against people under Yahweh’s protection; (3) where the violation of norms affects Yahweh’s privileges and a communal relationship protected by him; (4) where in the objective apprehension of guilt Yahweh approaches people as the judge beyond human control, and where the person becomes aware of the inevitability of the confrontation with God in the demonstration of subjective responsibility; (5) where legal and phenomenal spheres of

thought are means by which Yahweh punishes “error” (cf. Knierim, op. cit. 82ff.; cf. e.g., Hos 5:12, 14; Amos 3:6b); (6) where Yahweh sovereignly determines, modifies, or graciously breaks through the unified, fatal relationship between “sin” and judgment in history, the life of the individual, and of the community.

5. In the Qumran texts the verb occurs (4x), as well as the nom. forms *ḥētʿ* (1x) and *ḥaṭṭāʿt* (15x, according to Kuhn, *Konk.* 70; see also *GCDS* 253). The almost consistent formulaic usage in conformity with OT usage is noteworthy.

The situation in the LXX is enlightening in that about 26 Hebr. expressions for “sin” are rendered by only 6 Gk. terms, a circumstance that doubtless points to a strong thematization and theoretization of the OT concept of sin in the Gk.-speaking world; cf. G. Quell, *TDNT* 1:268f. Correspondingly, the LXX regularly renders all derivatives of *ḥṭʿ* by *hamartanō*, *hamartia*, etc., only occasionally by *adikeō*, *adikia*, and only the derived stems of the verb are rendered otherwise. Thus for the NT *ḥṭʿ* would be represented primarily by *hamartia*, but *hamartia* would by no means have had *ḥṭʿ* as its only Hebr. equivalent—without taking into account the entirely new ontological and hamartiological understanding in the NT (cf. G. Quell, G. Bertram, G. Stählin, and W. Grundmann, “ἁμαρτάνω,” *TDNT* 1:267–316). Nevertheless, in one passage an OT mode of thought seems to recur in the NT discussion of “bearing the burden of guilt” (*nśʿ ʿāwōn/ḥēṭʿ*): John 1:29; cf. 1 Pet 5:7; Gal 6:2.

R. Knierim

## היה *ḥyh* to live

S 2421; BDB 310b; *HALOT* 1:309a; *TDOT* 4:324–44; *TWOT* 644; *NIDOTTE* 2649

1. (a) The root *ḥyy/ḥwy* “to live” is richly developed in the WSem. realm, but is absent from Akk., which has the equivalent *balātu* (P. Fronzaroli, *AANLR* 8/19 [1964]: 248f., 263; 8/23 [1968]: 280, 291, 300; → *plṭ*). Several examples occur already in old Sem. inscriptions (Can.: EA 245:6; cf. *CAD* H:32b; Ug.: *WUS* nos. 911, 916; *UT* no. 856; Gröndahl 137; Phoen.-Pun., Hebr., and Aram.: *DISO* 86f.; *HAL* 295f.).

In Ug. and Phoen.-Pun., *w* is also encountered as the 2d radical (cf. also the Amor. names in Huffmon 71f., 191f.); on the orthography in Pun., and on the form

borrowed in Lat. as a salutation using the impv. *ave*, cf. Friedrich 17, 78, 120.

No satisfying etymology may be demonstrated. Neither “to breathe” (Gesenius, *Thesaurus* 1:467f.) nor “to draw together” (H. J. Fleischer, *Kleinere Schriften* [1885], 1:86) is illuminating.

The following OT forms derive from a second root *ḥwh*: *ḥawwâ* “tent village,” *ḥay* “kin” (1 Sam 18:18; according to L. Delekat, *VT* 14 [1964]: 27f., also Psa 42:9) and *ḥayyâ* “troop” (2 Sam 23:11, 13; Psa 68:11); cf. *HAL* 284a, 296b, 297b.

(b) The verb appears in Hebr. in qal, pi., and hi. The qal pf. 3d masc. sg. sometimes, esp. in the Pentateuch, resembles a geminate (BL 423).

Among the noms. derived from the verb one finds, first of all, the subst. and adj. *ḥay* “life,” “alive,” as well as its fem. *ḥayyâ*, which as an abstract occasionally signifies “life” but more often, as a collective, “living beings.” The plurale tantum *ḥayyîm* in the sense of “life” is usually understood as an abstract pl. (pl. of duration).

According to Brockelmann, it involves an abstract variant of the adj. *ḥay*: *b<sup>c</sup>ḥayyîm* “among the living” > “in life” (BrSynt 16; *bḥym* in a late 6th-cent. Phoen. inscription [KAI no. 13.7] can mean “among the living” [so *ANET* 662a] or “in life”). *ḥayyîm* has also been understood as an artificial analogous formation, a secondary back-formation of an abs. st. of the cs. st. sg. *ḥê* falsely understood as a pl. (J. Barth, *ZDMG* 42 [1888]: 344; Nyberg 202).

The *ma*- noun *miḥyâ* “sustenance,” “animation,” and the hapax legomenon *ḥayyût* “lifetime” formed with the abstract suf. *-ût* (2 Sam 20:3; cf. BL 505) occur as verbal abstracts. The fem. pl. adj. *ḥāyôt* “lively” is also a hapax legomenon (Exod 1:19; cf. BL 465; contra G. R. Driver, *ZAW* 67 [1955]: 246–48).

The root is sparsely attested as part of a PN, in fact only in the two theophoric sentence names *y<sup>c</sup>ḥî<sup>l</sup>ēl* and *y<sup>c</sup>ḥîyâ* “God/Yahweh lives” (juss. with an indicative meaning).

Pe. and ha. occur in Bibl. Aram., as well as the noms. *ḥay* “living,” *ḥayyîm* “life,” and *ḥêwâ* “animal.”

2. An overview of the occurrences of the root (in the arrangement of Mandl., which differs from that of Lis., but Psa 18:47 treated as adj., like 2 Sam 22:47) results in the following table (II = *ḥayyâ* “life”):

	qal	pi.	hi.	<i>ḥay</i>	<i>ḥayyâ</i>	II	<i>ḥayyîm</i>	total
Gen 49	4	6	26	20	–	20	125	

Exod 3	4	–	3	2	–	4	16	
Lev 3	–	–	23	9	–	1	36	
Num 5	1	2	6	1	–	–	15	
Deut 15	3	–	8	1	–	12	39	
Josh 3	1	4	2	–	–	2	12	
Judg 1	1	1	1	–	–	1	5	
1 Sam	2	3	–	22	1	–	2	30
2 Sam	4	1	1	15	1	–	4	26
1 Kgs6	2	–	22	–	–	4	34	
2 Kgs16	1	5	18	1	–	2	43	
Isa 7	1	3	8	6	1	4	30	
Jer 9	1	–	16	3	–	4	33	
Ezek 43	4	1	24	31	2	2	107	
Hos 1	2	–	2	4	–	–	9	
Amos3	–	–	2	–	–	–	5	
Jonah	–	–	–	–	–	–	3	3
Hab 1	1	–	–	–	–	–	2	
Zeph –	–	–	1	2	–	–	3	
Zech 3	–	–	1	–	–	–	4	
Mal –	–	–	–	–	–	1	1	
Psa 11	20	–	13	8	3	26	81	
Job 5	2	–	5	5	6	7	30	
Prov 4	–	–	1	–	–	33	38	
Ruth –	–	–	2	–	–	–	2	
Song Sol	–	–	–	1	–	–	–	1
Eccl 3	1	–	8	–	–	13	25	
Lam 1	–	–	1	–	–	2	4	
Esth 1	–	–	–	–	–	–	1	
Dan –	–	–	1	1	–	1	3	
Neh 4	2	–	–	–	–	–	6	
1 Chron	–	1	–	–	–	–	–	1
2 Chron	2	–	–	4	1	–	–	7
OT	205	56	23	236	97	12	148	777

In addition, *miḥyâ* occurs 8x (for texts see 3f), *ḥāyeh* and *ḥayyût* 1x each; the place-name *b<sup>e</sup>ēr laḥayrō* is not counted (Lis. erroneously lists Gen 16:14 under *ḥay*).

Pe. occurs in Bibl. Aram. 5x, ha. 1x, *ḥay* 5x, *ḥayyîn* 2x, *ḥêwâ* 20x.

Of the approximately 800 occurrences of the root, Gen (126x), Ezek (107x), and Psa (81x) are the most involved. The absence of *ḥayyîm* in Chron/Ezra/Neh and the sparse usage in the Prophets (14x) are noteworthy.

3. All instances of the root may be grouped rather closely around the concept “life.” A good approach is to proceed from the verb and to consider the various nom. abstract and collective forms on the basis of the verb.

(a) The basic and most frequently attested meaning of the qal is “to be/remain alive”; the contrary, “to be dead, to die” (→ *mût*) is always involved somehow, even if it is not explicitly expressed. An accentuated contrast occurs often, e.g., in the expression “live and not die” (Gen 42:2; 43:8; 47:19; Deut 33:6; 2 Kgs 18:32; Ezek 18:21, 28; 33:15; Psa 89:49; 118:17) or “die and not live” (2 Kgs 20:1 = Isa 38:1).

A weakened sense results when *hyh* is more precisely modified by the addition of the place or the time (“to stop for a time at a place”: Gen 47:28; Lev 25:35f.; Lam 4:20; time: esp. in the genealogies of P in Gen 5 and 11, also Gen 47:28; 2 Kgs 14:17 = 2 Chron 25:25; Jer 35:7; Job 42:16; Eccl 6:3, 6; 11:8).

The verb acquires a somewhat altered meaning in those passages in which it describes not an enduring situation but a momentary process: “to become alive again” (1 Kgs 17:22; 2 Kgs 13:21; Isa 26:14, 19; Ezek 37:3, 5f., 9f., 14; Job 14:14). Closely related, and for the ancient Israelites hardly distinct, are the passages in which *hyh* means becoming well, recovery from an illness (Gen 45:27; Num 21:8f.; Josh 5:8; Judg 15:19; 2 Kgs 1:2; 8:8–10, 14; 20:7; Isa 38:9, 21). The depiction of recovery as becoming alive or coming to life bespeaks the fact that sickness diminishes life, that genuine life is health. Here it can be clearly seen that “life” in the OT does not mean simply being alive, but having complete, fulfilled life.

The meaning is modified along other lines when the limited duration of corporal life is emphasized (Gen 27:40; Deut 8:3; 2 Kgs 4:7).

In addition to persons, subjs. of the verb are *lēbāb* “heart” (Psa 22:27; 69:33), *nepes̄* “soul” (Gen 12:13; 19:20; 1 Kgs 20:32; Isa 55:3; Jer 38:17, 20; Ezek 13:19 pl.; 47:9; Psa 119:175), *rūah* “spirit” (Gen 45:27), and *ʿāšāmôt* “bones” (Ezek 37:3, 5).

Plants and, remarkably, animals are never the subj. of *hyh*.

In the acclamation *y<sup>e</sup>hīhammelek* (1 Sam 10:24; 2 Sam 16:16; 1 Kgs 1:25, 31, 34, 39; 2 Kgs 11:12 = 2 Chron 23:11; cf. Neh 2:3), the verb is apparently a juss. with an indicative meaning: “the king lives, he possesses royal power” (P. A. H. de Boer, *VT* 5 [1955]: 225–31; cf., however, Dan 2:4; 3:9; 5:10; 6:7, 22 with impv.).

(b) Pi. and hi., both with the meaning “to keep alive, let live,” are distinct in that the pi. places greater emphasis upon the contrast to “to die, be dead,” while the hi. expresses the weakened concept of “duration” (*HP* 37, 58, 61–64).

An expanded use of the pi. as vigorous technical language occurs in

a few passages: 2 Sam 12:3; Isa 7:21 “to rear (young animals),” Hos 14:8 “to raise (grain),” 1 Chron 11:8 “to rebuild (a city)”; the last meaning also occurs in Phoen. (*KAI* no. 4.2; *ANET* 653a “restored”).

(c) *ḥay* means both “lively” and “alive,” *vivus* and *vivens*, and has adj. and subst. functions. It can refer to people and animals as well as to God, but not to plants, which are never considered living things in the OT (E. Schmitt, *Leben in den Weisheitsbüchern Job, Sprüche und Jesus Sirach* [1954], 116). The designation *ḥay* can also be attributed to *nepeš* “soul” (Gen 1:20f., 24, 30; 2:7, 19; 9:10, 12, 15f.; Lev 11:10, 46; Ezek 47:9) and *bāšār* “flesh” (Lev 13:10, 14–16 of the excrescence of a wound; 1 Sam 2:15 of raw animal flesh). The expression “living (i.e., flowing) water” is an expanded usage (Gen 26:19; Lev 14:5f., 50–52; 15:13; Num 19:17; Jer 2:13; 17:13; Zech 14:8; Song Sol 4:15).

On the expression *kācēt ḥayyâ* “at this time next year” (Gen 18:10, 14; 2 Kgs 4:16f.) cf. Akk. *ana balāt* “in the coming year” (*AHw* 99a; R. Yaron, *VT* 12 [1962]: 500f.; O. Loretz, *Bib* 43 [1962]: 75–78: *ḥayyâ* does not mean “life” but “next year”).

The superlative formula *ḥy ḥym* “living of the living” occurs as a royal title on a Neo-Pun. burial inscription (*KAI* no. 161.1).

*ḥay* occurs as a subst. only in the oath formula: *ḥē* X “by the life of X” (M. Greenberg, *JBL* 76 [1957]: 34–39). The nomen rectum of the cs. relation is almost always God/Yahweh; the nomen regens is then *ḥay*. In rare cases in which a human being takes an oath, the formula is normally *ḥē-napš<sup>c</sup>kā*, and it usually appears in conjunction with a simultaneous oath by God: “as surely as God lives and as surely as your soul lives”; only *ḥē-<sup>a</sup>dōnî* (2 Sam 15:21) and *ḥē-par<sup>c</sup>ōh* (Gen 42:15f.) occur without *nepeš*. *ḥay* is adj. in *ḥay-<sup>a</sup>nî* “as surely as I live” (texts in *HAL* 295).

(d) The fem. adj. *ḥayyâ* “living” in the sg. as well as the pl. designates the “living being” in general, i.e., esp. “animals” (cf. Gk. *zōon*). The word usually means free-living, untamed animals in distinction from domesticated animals (*b<sup>e</sup>hēmâ*; Gen 8:1; Ezek 14:15; 33:27; Zeph 2:15; Psa 148:10; Job 37:8). A further limitation is occasionally made: land animals in contrast to birds and fishes (Gen 1:28; 8:19; Lev 11:2). In exceptional cases, *ḥayyâ* can also indicate domesticated animals (Num 35:3) or beasts of burden (Isa 46:1).

*ḥayyâ* also has the abstract meaning “life,” chiefly in Psa and Job (5x in the speeches of Elihu), where it is a synonym for → *nepeš*.

(e) The pl. *ḥayyîm* serves as a comprehensive term for “life.” Like the verb, its semantic field is determined primarily in contrast to “dying/death.” This contrast comes to explicit expression esp. in Dtn, also e.g., in 2 Sam

1:23; 15:21; Jer 8:3; Jonah 4:3, 8; Prov 18:21.

A reduction of the meaning to “lifetime” results when *ḥayyîm* is used in temporal designations, esp. in the expressions *y<sup>e</sup>mêḥayyîm* “days of life” (Gen 3:14, 17, etc., about 30x), (*y<sup>e</sup>m’*) *š<sup>e</sup>nêḥayyîm* “years of life” (Gen 23:1; 25:7, 17, etc., about 15x). *ḥayyîm* may also be almost a temporal term apart from these expressions, e.g., Gen 7:11; Lev 18:18; Judg 16:30; Eccl 3:12; 6:12.

Without accentuating duration, *ḥayyîm* can have a generalized sense and almost mean mere “existence,” e.g., Gen 27:46; Exod 1:14; Eccl 2:17; 9:9; 10:19.

In some passages, *ḥayyîm* and → *nepesš* appear almost as interchangeable terms. “Everything alive” can be *kōl-hannepesš* as easily as *kōl-ḥay*, e.g., Josh 10:28, 30, 32, 35, 37; cf. also Psa 21:5; 64:2 (*ḥayyîm*) with Job 31:39; Esth 7:7 (*nepesš*). Nevertheless, the difference is usually clear; it seems to lie primarily in the higher degree of objectivization that seems inherent in the term *ḥayyîm*. In contrast to *nepesš*, *ḥayyîm* is not considered an inherent, life-related principle, but a possession or, more properly, a good gift (see 4b).

(f) The verbal abstract *miḥyâ* has a rather specific sphere of usage and mirrors variously the action or the process of the verb, either of the qal: “becoming alive” (Lev 13:10, 24 as a sacro-medicinal term for the growth of the flesh of a wound; 2 Chron 14:12; Ezra 9:8f. of the revival, resuscitation of the enslaved), or of the causative: “sustenance of life” (Gen 45:5; cf. Sir 38:14). *miḥyâ* can also have a concrete reference: “provisions” (Judg 6:4; 17:10). Prov 27:27 has *ḥayyîm* in the same meaning.

4. (a) OT references to the “living God” belong, primarily and predominantly, to the oath formula “by the life of Yahweh/God” (cf. M. R. Lehmann, ZAW 81 [1969]: 83–86, with ancient Near Eastern pars.). The most frequent form is *ḥay yhw* (41x, 30x in Judg–2 Kgs; also *ḥay <sup>2</sup>dōnāy yhw* Jer 44:26; *ḥay hā<sup>e</sup>lōhîm* 2 Sam 2:27; *ḥay-<sup>2</sup>ēl* Job 27:2). The formula also appears in Lachish Letters III, VI (“as Yahweh liveth” ANET 322; KAI no. 193.9 *ḥyhwh*; no. 196.12 *ḥyyhwh*). The oath *ḥay-<sup>2</sup>ānî* (*ḥay <sup>2</sup>ānōkî* Deut 32:40) “as surely as I live” occurs 23x as a divine self-declaration (Num 14:21, 28; Deut 32:40; Isa 49:18; Jer 22:24; 46:18; Zeph 2:9; and 16x in Ezek).

Aside from the oath formula, only 14 passages describe God as *ḥay: <sup>e</sup>lōhîm ḥayyîm* Deut 5:26; 1 Sam 17:26, 36; Jer 10:10; 23:36; *ēl ḥay* Josh 3:10; Hos 2:1; Psa 42:3; *<sup>e</sup>lōhîm ḥay* 2 Kgs 19:4, 16 = Isa 37:4, 17; *ḥay yhw* “Yahweh lives” 2 Sam 22:47 = Psa 18:47. Remarkably, several of these passages are related in content, esp. texts from 1 Sam and 2 Kgs, which contain invectives against a foreign opponent who has slandered Israel’s

God. Jer 10:10, too, is reminiscent of these passages because it expresses a polemic against foreign gods. The contrast to foreign gods governs Josh 3:10: the living God of Israel will expel the Canaanites, Hittites, etc. These passages evidently involve conventional diction. Polemical statements against foreign nations and foreign gods prefer to mention the “living God.”

L. Delekat (*VT* 14 [1964]: 27f.) has suggested that *ḥay* in the phrase *ʿēlḥay* may have originally meant “kin” (cf. 1 Sam 18:18) and that from the very beginning the *ʿēlḥay* stood in opposition to foreign gods.

The impression that the “living God” is discussed only with reservation is strengthened if one also considers the *ḥayyîm* passages. The OT never mentions life or vitality as a divine attribute, but often as a result of God’s saving activity. With God as the subj., “life” serves as the obj. of the following verbs: *nṭn* “to give” (Deut 30:15, 19; Mal 2:5; Job 3:20), *gʾl* “to redeem” (Psa 103:4; Lam 3:58), *nṣr* “to preserve” (Psa 64:2), *ṣwh* pi. “to order” (Psa 133:3), *śh* “to make” (Job 10:12). God is the “source of life” (Psa 36:10); the fear of God brings life (Prov 19:23). One can ask him to grant life (Psa 21:5) and not to take away the life of the supplicant (Psa 26:9). Quite consistently, the factitive and causative verbal stems are used in statements about God. Of the 56 pi. passages, 26 have God as subj. (19x in Psa). Of the 23 hi. passages, God stands as subj. in 9 (never in Psa).

The lexical evidence suggests that the OT lays no great weight on a presentation of the living God. Life and vitality are almost never viewed as Yahweh’s attributes. Every emphasis lies on the fact that Yahweh gives life and has power over life, but not that he himself participates in it. OT diction is distinguished from that of the other nations of the ancient Near East, which quite unabashedly speak of the life and vitality of their deities (Chr. Barth, *Die Errettung vom Tode in den individuellen Klage- und Dankliedern des AT* [1947], 36–41; cf. also L. Dürr, *Die Wertung des Lebens im AT und im antiken Orient* [1926]). The various idioms express the various notions of god: on the one hand, the deification of the vital force, which actually signifies the identity of God and life; on the other hand, a clear distance between the creator and creaturely vital forces.

(b) In contrast to *nepes̄*, *ḥayyîm* “life” is not an obvious human characteristic, but a gift of God.

This point is expressed with particular clarity in the “Psalm of Hezekiah,” Isa 38:9–20, which describes the newly granted life of the convalescent as life in relation to God, as life in praise: v 19, “Life, life, which praises you, as I do today.” This statement, in contrast to v 18, “death does not praise you,” shows that *ḥayyîm* is understood as healthy life, as life bestowed by God (cf. Westermann, *PLP* 155, 158–61; Chr. Barth,

op. cit. 151 comments here: “One should note, however, that the praise of Yahweh functions at the same time as a characteristic of vitality.”)

Life is God’s gift because the human being is created for life, i.e., as *nepeš ḥayyâ* (Gen 2:7). One’s life is identical with one’s creatureliness; one recognizes oneself as God’s creature through one’s existence. Because life is continually threatened, however, it can be promised anew, esp. in the concluding speech of Deut 30:15–20, in the face of these dangers and threats, in the face of every diminishment of life. In this context, the promise of life is closely related to the proclamation of commandment. The commandments promise Israel life. This promise takes place primarily in the cult (Lev 18:5; Deut 30:15, 19). G. von Rad (“‘Righteousness’ and ‘Life’ in the Cultic Language of the Psalms,” *PHOE* 243–66) sees this coupling of proclamation of commandment and promise of life as a constitutive element of Yahwistic faith (p. 254). Obedience to God’s commandments is linked to life in Deut, in particular, but elsewhere as well (Deut 4:1; 5:33; 8:1; 11:8f.; 16:20; 22:7; 25:15; cf. Exod 20:12; Job 36:11; on Ezek 20 and 33, cf. W. Zimmerli, *TZ* 13 [1957]: 494–508 = *GO* 178–91).

In wisdom, too, life is offered as a gift of salvation, and, indeed, is linked to attention to the exhortations of the wisdom teacher or to the call to follow personified wisdom (Prov 3:1f.; 4:10, 13, 22f.; 7:2; 8:35; 9:6; cf. Ch. Kayatz, *Studien zu Proverbien 1–9* [1966], 102–7, on the Eg. pars.). The offer of life has been detached here from the cult and is not directed to Israel as a whole but to individuals (von Rad, *Theol.* 1:441ff.).

(c) The question as to whether the OT knows of a life after death receives highly varied responses. The answer depends, above all, upon the understanding of a few Psa that speak of a preservation from death and a redemption from Sheol, esp. Psa 27; 49; 73. According to Barth (op. cit. 165f.), “to redeem from death” means “to redeem from hostile, threatening, and condemning death” and does not refer to a continuation of life after death. In contrast, von Rad (*Theol.* 1:406f.) finds, esp. in Psa 49 and 73, “a strong striving after a principle which does not stop short at a single calamity,” but makes a fundamental reference to a life beyond death. Nevertheless, these hymnic statements do not deal with a widely held hope in the afterlife, but with the believer’s personal conviction that the living relationship with Yahweh must be indestructible, even beyond death.

The expectation of a general resurrection of the dead occurs first in the apocalyptic literature. The Isa apocalypse mentions a resurrection of the pious (Isa 26:19); Dan 12:1–3 expects a general resurrection, some “to eternal contempt” and others “to eternal life.”

5. Both the verbal and the nom. forms are attested in the Qumran texts. The subst. *ḥayyîm* appears frequently as the governing noun in some rather bold metaphorical cs. phrases, e.g., “insight, light, source, trees,

stylus of life.”

On the LXX and the continuation of the tradition in the NT, cf. G. von Rad, G. Bertram, and R. Bultmann, “ζάω,” *TDNT* 2:832–75; H.-J. Kraus, “Der lebendige Gott,” *EvT* 27 (1967): 169–200.

G. Gerleman

הַיִל *hayil* **power** → כֹּהַל *kōah*

## חכּם *hkm* to be wise

S 2449; BDB 314a; *HALOT* 1:314a; *TDOT* 4:364–85; *TWOT* 647; *NIDOTTE* 2681

1. The root *hkm* is attested in most Sem. languages (in addition to GB 229b, see esp. *HAL* 301a; Ug.: *WUS* no. 924; *UT* no. 859; H.-P. Müller, *UF* 1 [1969]: 89n.81; Phoen.: *KAI* no. 26A.I.13; Aram.: *DISO* 87f.; KBL 1075b), although the originality of Akk. *hakāmu* “to understand, comprehend” has long been discussed (*HAL* 301a with bibliog.; *CAD* H:32f.; *AHW* 309a; cf. also A. Finet, *AIPHOS* 14 [1954/57]: 132; *CAD* A/2:345a).

In addition to the verb *hkm* “to be/become wise” (qal, pi., pu., hi., hitp.), Hebr. also has the noun *hākām* “clever, cunning; wise” and the abstracts *hokmā* “wisdom” (only sg., but see below) and *hokmôt* “wisdom,” which is understood either as an abstract pl. of *hokmā* (*GVG* 2:59; Joüon §§88Mk, 96Ab, 136d; G. Fohrer, *TDNT* 7:476n.85) or as a late sg. formation (GKC §86l; BL 506; W. F. Albright, *SVT* 3 [1955]: 8; cf. *HAL* 302a).

Bibl. Aram. has the person designation *hakkîm* “wise ones” (only pl.) and the abstract *hokmā* “wisdom.”

2. The concentration of occurrences in wisdom literature is apparent in the following table:

	verb	<i>hākām</i>	<i>hokmā</i>	<i>hokmôt</i>	total
Gen	–	3	–	–	3
Exod 1		9	8	–	18

Deut 1	5	2	–	8	
Judg –	1	–	–	1	
2 Sam	–	4	2	–	6
1 Kgs1	3	17	–	21	
Isa –	9	5	–	14	
Jer –	11	6	–	17	
Ezek –	3	5	–	8	
Hos –	2	–	–	2	
Obad–	1	–	–	1	
Zech 1	–	–	–	1	
Psa 4	2	6	1	13	
Job 2	8	18	–	28	
Prov 13	47	39	3	102	
Eccl 4	21	28	–	53	
Esth –	2	–	–	2	
Dan –	–	3	–	3	
1 Chron	–	1	1	–	2
2 Chron	–	6	9	–	15
OT 27	138	149	4	318	

The verb appears 19x in the qal (Prov 12x), 3x in the pi., 2x in the pu., 2x in the hitp., and 1x in the hi.

The examples in Exod all belong to P, those in Ezek are in Ezek 27f., those in Dan concentrated in Dan 1.

Aram. *ḥakkîm* occurs 14x (in Dan), *ḥokmâ* 8x (Ezra 7:25 and 7x in Dan). Thus the root is represented in the entire OT 340x.

3. The chief meaning of *ḥkm*, depending upon the grammatical form, is traditionally “to be wise; wise one; wisdom.” This understanding expresses the special character shared by terms in the word field (cf. H.-J. Hermisson, *Studien zur israelitischen Spruchweisheit* [1968], 11f., 187–192, contra G. Fohrer, *TDNT* 7:476; see also H. H. Schmid, *Wesen und Geschichte der Weisheit* [1966], 196–201, and esp. G. von Rad, *Wisdom in Israel* [1972], 7ff.); nevertheless, semasiological analysis must first examine differences in word usage and the semantic range of the words categorized by grammatical form.

(a) The verb in the basic stem refers, first of all, to the state of “being wise,” indeed, as something objectively determinable, whose effectual (even if only imagined; cf. Deut 32:29; Prov 9:12[bis]) presence makes other activities possible, and whose absence prohibits other actions (cf. *HP* 27ff.): in addition to the passages already mentioned, Zech 9:2 (ironic-concessive); Prov 23:15; Eccl 2:15, 19 (all in the pf.), as well as 1 Kgs 5:11

(impf. cons., resumptive); cf. Job 32:9 (with an impf. in the so-called compounded nom. clause). By contrast, the remaining 9 Prov passages (see *HAL* 301a, where all Prov passages are incorrectly listed in one category) use an impf. (9:9; 13:20 Q; 19:20; 20:1; 21:11) or an impv. (6:6; 8:33; 23:19; 27:11) as the predicate (cf. also Eccl 7:23 with a cohortative), and the verb acquires an ingressive meaning: “to become wise,” a reference to “being wise” as a future, resultant event, often as the result of another phenomenon; this “other phenomenon” refers to the various means of becoming wise, through either experience (Prov 6:6; 13:20) or instruction (cf. 9:9; 21:11), but esp. through an obedient “listening” that leads to behavior (8:33; 23:19; esp. 19:20: “give heed to counsel [*‘ēšā*] and receive instruction [*mûsār*, → *ysr*]”). “Becoming wise” means training; the impvs. are pleading warning cries to that end.

The production of wisdom is expressed by the factitive reduplicated pi. stem: “to make wise” (Psa 105:22; 119:98; Job 35:11; the subjs. are, resp., Joseph, the commandments of God, God). The related pu. ptcp. gives the result (“to be made wise”), particularly in some technical sense: to be (in some way) “skilled” (Psa 58:6; Prov 30:24; cf. *HAL* 301a; *HP* 162f.). The self-actualization of wisdom comes to expression in the hitp. (Exod 1:10; Eccl 7:16) and once the cause in the hi. ptcp. (Psa 19:8; cf. *HP* 73f., 85).

The following may be mentioned as synonymous or, at least, par. verbs: → *bîn* “to understand” (Job 32:9), yet *bîn* in Deut 32:29 (par. *śkl* “to understand”) is more the result of (admittedly lacking) “wisdom”; also *lqḥ da‘at* “to receive insight” (Prov 21:11), *ysp* hi. *leqaḥ* “to increase in learning” (Prov 9:9; cf. 1:5); *‘ml* “to toil” is characteristic of Eccl (Eccl 2:19); *‘lp* pi. “to teach” parallels *ḥkm* pi. (Job 35:11). The par. in the hitp. in Eccl 7:16 to the vetitive “be not too righteous” is remarkable. Antonyms include: *lîš* “to mock” (Prov 9:12; cf. 20:1; 21:11) and *r<sup>cc</sup>* ni. “to go badly (for someone)” (Prov 13:20).

(b) Being wise is expressed nom. by *ḥākām* (masc. sg. 78x, fem. sg. 3x, masc. pl. 54x, fem. pl. 3x), often used adj. (cf. *‘iš ḥākām* “wise man,” e.g., 2 Sam 13:3; 1 Kgs 2:9; Prov 16:14; *bēn ḥākām* “wise son,” Prov 10:1; 13:1; 15:20; *melek ḥākām* “wise king” Prov 20:26), as well as 15x predicatively (*HP* 26 lists passages), but most often functioning as a subst. (“wise one”). Apart from Prov 30:24, where it is predicated to animals, and Isa 31:2, where it is used of God (cf. Job 9:4; as well as Jer 10:7 and 2 Sam 14:20), the noun describes people in various ways.

Human “cunning and skill” is realized in a broad range of ways; in general, *ḥākām* means “someone who has a masterful understanding of something” (Fohrer, *TDNT* 7:483ff.). This mastery sometimes concerns some technical capability like the artisanship of women (Exod 35:25), but

esp. of men (Jer 10:9; cf. *BH* 3 on Isa 3:3; associated in later texts esp. with the construction of the temple, Exod 28:3; 31:6; chs. 35–36; 1 Chron 22:15; 2 Chron 2:6, 12f.; in Isa 40:20 *ḥārāš ḥākām* “skilled master” of the production of idol images). An abstract subject can also be a skilled activity, then, e.g., the mourning of women (Jer 9:16f.), the many forms of magic (Isa 3:3; cf. Psa 58:6, pu. ptcp.), esp. associated with foreigners (esp. in the pl.; see e.g., Exod 7:11; Isa 44:25; Esth 1:13; as well as most passages in the Aram. of Dan; cf. KBL 1075b; see also Fohrer, op. cit. 483f.; also extensive, with a treatment of the Ug. material: H.-P. Müller, “Magisch-mantische Weisheit und die Gestalt Daniels,” *UF* 1 [1969]: 79–94), as well as the political advising of the king in the courtly sphere (→ *yš*; cf. P. A. H. de Boer, *SVT* 3 [1955]: 42–71; W. McKane, *Prophets and Wise Men* [1965], 15ff.; in reference to the neighboring nations, see e.g., Gen 41:8; Isa 19:11f.; Jer 50:35; 51:57; Ezek 27:8f.; Esth 6:13; Dan 2:27), where a woman’s crafty cunning can also be used (2 Sam 14:2; 20:16ff.). Royal counsel is an element of wise and just government, incumbent esp. upon the king himself (cf. Prov 20:26; Eccl 4:13), in respect to which Solomon, in particular, as *ḥākām* (1 Kgs 2:9) and David’s “wise son” (1 Kgs 5:21; 2 Chron 2:11), became the prototype of the wise king, whose gift of wisdom was beyond all measure (1 Kgs 3:12; 5:11ff.; cf. also Prov 1:1; 10:1; Eccl 1:1, 16; 2:3ff.; Alt, *KS* [1964], 2:90–99; Noth, *GS* [1969], 2:99–112; R. B. Y. Scott, *SVT* 3 [1955]: 262–79; and N. W. Porteous, *SVT* 3:247ff.). All of these cases deal with individuals and groups who are knowledgeable in a special, professional manner; this characterization is also true of Joseph (Gen 41:33, 39; cf. G. von Rad, “Joseph Narrative and Ancient Wisdom,” *PHOE* 281–91) and of the mythically portrayed “prince of Tyre” who is “wiser than Daniel” (Ezek 28:3; cf. Zimmerli, *Ezek*, Herm, 2:72ff., and Dan 1:4, 17, 20; see 3c).

At the same time, the texts—esp. those in wisdom books—describe an independent type of *ḥākām/ḥ<sup>a</sup>kāmîm* who is not related directly to any other profession, but who as a “wise one” executes his own office alongside priests and prophets (Jer 18:18, where, however, a political and courtly aspect may not be overlooked; cf. McKane, op. cit. 42, 128n.1). The “wise one” is primarily a man of the word who gives counsel (Jer 18:18) and crafts and assembles sayings (Prov 22:17; 24:23; Eccl 12:9–11; cf. Prov 1:6; Eccl 9:17), whose words win favor (Eccl 10:12), but who can also reprimand and discipline (Eccl 7:5; cf. Prov 15:12, 31), whose tongue (Prov 15:2) and lips bring insight (Prov 15:7) and healing (Prov 12:18), and whose speech issues from a “wise heart” (Prov 16:21, 23; cf. 1 Kgs 3:12). In addition to the authority of his own “wise heart,” in addition to his own experience—for he is an “investigator” who seeks to “find out” and “to understand the significance of things” (cf. Eccl 8:1, 5, 17; 12:9; see

Hertzberg, KAT 17/4, 215ff., and Job 15:7ff.)—he draws upon the received traditions of his predecessors (cf. Job 8:8–10; 15:18; see Fohrer, op. cit. 492f.); he receives instruction (Prov 9:9; 12:15; 21:11) and administers his own instruction (tôrâ), which is a “source of life” (Prov 13:14). Thus the “wise one” is not just a counselor but equally a teacher and instructor (see e.g., Prov 11:30; 15:31; 18:15; 22:17; Eccl 12:9; W. Zimmerli, “Concerning the Structure of OT Wisdom,” *Studies in Ancient Israelite Wisdom* [1976], 177ff.; W. Richter, *Recht und Ethos* [1966], 147ff.; Hermisson, op. cit. 113ff.).

If this usage, which signifies *the* “wise one” in the proper (and somehow status-bound) sense, may be described as the more limited usage, there is also a broader usage that—as already demonstrated above—could characterize other circles as “wise,” although the boundaries are fluid. Above all, one is “wise” who heeds “counsel” (Prov 12:15) and loves “instruction” (Prov 13:1 [cf. comms.]; 19:20; 29:15). He pleases his father (10:1; 15:20; 23:24). He is a strong (cf. Prov 21:22; Eccl 7:19) and even-tempered person who quiets anger (Prov 29:8, 11); he is humble and not wise in his own eyes (Prov 3:7; 26:12; Isa 5:21; Jer 9:22). With a wise heart he heeds commandments (Prov 10:8), and so fears and avoids evil (14:16).

A religioethical component is perceptible in Prov 14:16 (see 4); such is also the case where *šaddîq* “righteous” appears in Prov as a synonym for *ḥākām* (Prov 9:9; 11:30; 23:24; cf. Eccl 9:1). The more frequent synonym, however, is *nābôn* “insightful” (→ *bîn*; Gen 41:33, 39; Deut 4:6; 1 Kgs 3:12; Isa 3:3; 5:21; 29:14; Hos 14:10; Prov 1:5; 18:15; 16:21, definitively: “one who is wise of heart is called insightful”; cf. 28:11b). Other synonyms are: *ʾiš daʿat* “man of understanding” (Prov 24:5), *ʾanšē lēbāb* “men of understanding” (Job 34:34), *yōdʿīm* “insightful ones” (Job 34:2; cf. Eccl 8:1), *niptālîm* “crafty ones” (Job 5:13). The picture of the “wise” is completed, finally, by the special dialectic of opposition: his opposite is, above all, the “fool” (thus esp. → *kʿsîl*, 21x, predominantly in Prov and Eccl; otherwise → *ʿwîl*, 7x; → *nābāl* Deut 32:6; *sākāl* Eccl 2:19), but also the “mocker” (*lēs*, Prov 9:8; 13:1; 15:12; 21:11; *ʾanšē lāšôn* Prov 29:8) and the “lazy” (*ʿāšēl* Prov 26:16).

The line of demarcation expressed by the antonyms refers not only to the “wise” in the limited sense, but equally to the “wise” in the broader sense. In accord with the expanded usage, the people are described as foolish (Deut 32:6), or Ephraim is scoldingly called an “unwise son” by Hosea (Hos 13:13).

The question of the setting of the “wise” in the more limited sense has not yet been sufficiently explained; but one should apparently think of both the court and the school in some form (cf. e.g., L. Dürr, *Das Erziehungswesen im AT und im antiken Orient* [1932], 104ff.; McKane, op. cit. 36ff.; Hermisson, op. cit. 97ff.; von Rad, *Wisdom* 15ff.; in contrast, E.

Gerstenberger, *Wesen und Herkunft des "apodiktischen Rechts"* [1965], 128–30; and H. W. Wolff, *Amos the Prophet* [1973], 85–89, emphasize clan instruction and wisdom). See 4 on the rising critique of the thought and doctrine of the wise.

(c) The usage of the abstracts *ḥokmâ* and *ḥokmôt* corresponds largely to that of the personal terms *ḥākām/ḥākāmîm*. Thus *ḥokmâ* can mean technical expertise and other professional capabilities of various types (of temple construction: Exod 28–36, see 3b; 1 Kgs 7:14; cf. 1 Chron 28:21; in war: Isa 10:13; nautical skill: Psa 107:27), particularly of the courtly skill of political advising (among the neighboring peoples: Isa 47:10; Jer 49:7; Dan 1:4, 20; in Israel: cf. 2 Sam 20:22; Isa 29:14; also Jer 8:9), and the special gifts of the regent. The historical works occasionally discuss the wisdom of Joshua and David (Deut 34:9; 2 Sam 14:20), although most passages refer to Solomon (1 Kgs 2:6; 3:28; 5:9f., 14, 26; 10:4ff.; 11:41; 2 Chron 1:10–12; 9:3ff., 22f.). Ezek 28:4f., 7, 12, 17 deal with the great wisdom of the Tyrian kings.

With the concentration of occurrences in Prov and Eccl, as well as in Job (see 2), however, *ḥokmâ/ḥokmôt* means esp. the "wisdom" of the "wise" in the more limited sense, whereby—as in the courtly sphere—it may concern first of all an educational wisdom (cf. Fohrer, *op. cit.* 485; also von Rad, *Wisdom* 155n.12), although a broadened usage is also found here; "wisdom" aims at education, among other things. Thus on the one hand "wisdom," which is "too high" for the foolish (Prov 24:7) and is sought to no avail by the mocker (14:6), is often praised: it is better than corals and finery (Prov 8:11; Job 28:18), the pursuit of it better than gold (Prov 16:16); it is better than might and weapons of war (Eccl 9:15f., 18), it is as good as an inheritance (Prov 7:11); through it a house is built (Prov 24:3); it illuminates a person's countenance (Eccl 8:1); through it the wise recognizes their way (Prov 14:8), have a future and hope (24:14), and will obtain life (Eccl 7:12; see 4). On the other hand, because wisdom is such a precious thing, a "pleasure" for the "man of understanding" (Prov 10:23), various exhortations are issued to pursue it, to purchase it (Prov 4:5, 7; 23:23), to pay it attention (5:1), to lend it one's ear (2:2; 5:1), to love and "embrace" it (4:7f.; cf. comms.), to consider it a sister (7:4); it is to be acknowledged (Eccl 1:17; 8:16; cf. Prov 24:14) and sought (Eccl 7:25). It is to be obtained through "rod and reproof" (Prov 29:15), i.e., through education, and to be found with those "who receive counsel" (Prov 13:10). It is an "ability to navigate" (LXX *kybernēsis* for *taḥbūlôt*, Prov 1:5) for the practical conduct of life; it is valuable "to apply (it) properly" (Eccl 10:10b; cf. Zimmerli, *ATD* 16/1, 235). Wisdom "rests in the heart of one with understanding" (Prov 14:33; also 2:10; Psa 51:8; 90:12), in the center of the person, which can only mean total control over the person, so that he

proves to be a *ḥākām* in all of his life and thought; this does not occur in a religiously neutral manner, but in the company of religioethical elements (see 4).

Although the practical orientation of the word dominates, esp. in the older wisdom sayings (cf. e.g., von Rad, *Theol.* 1:418–41), an interest in organizing perception is also unmistakable in the abstract (cf. von Rad, *ibid.* and 441ff., and esp. *id.*, *Wisdom* passim), which is of the greatest theological consequence (see 4). The abstract *ḥokmâ* seems to have formed a chief and central concept of wisdom thought, in contrast to the rich wisdom literature of Israel's neighbors, with which OT wisdom literature is associated in many ways (reference may be made e.g., to the Eg. *maṣat*, cf., among others, H. Brunner, *HO* 1/2 [1952]: 93–95; H. Gese, *Lehre und Wirklichkeit in der alten Weisheit* [1958], 11ff.; this background cannot be further investigated here; cf., however, Fohrer, *op. cit.* 477ff.; Schmid, *op. cit.*; H. D. Preuss, *EvT* 30 [1970], 393–417, with comprehensive references to text editions and secondary literature).

Yet one may not overlook at this point that *ḥokmâ* is often supported by or can be interchanged with synonyms (cf. von Rad, *Wisdom* 12ff.), esp. the “perception root” → *bîn: bînâ* “insight” (16x, 7x in Prov, 5x in Job, also Deut 4:6; Isa 11:2; 29:14; Dan 1:20 [*ḥokmat bînâ*], but not in Eccl), *tʿbûnâ* “insight” (11x, 7x in Prov, also Job 12:12f.; Jer 10:12; Ezek 28:4), as well as *tʿbûnôt* “cleverness” (Psa 49:4 par. *ḥokmôt*); then *daṣat* “knowledge, perception” (→ *yd*<sup>ᶜ</sup>, 14x: 6x in Eccl, 4x in Prov, also Isa 11:2; 33:6; 47:10; Dan 1:4; not in Job), *maddâṣ* “understanding” (2 Chron 1:10–12; Dan 1:4; cf. 1:17, as well as Aram. *mandaṣ* “understanding” Dan 2:21); *sēkel* “insight” (Psa 111:10). The following may also be mentioned: *ʿeṣâ* “counsel” (Isa 11:2; Jer 49:7; Job 12:13; Prov 21:30); *mûsâr* “instruction” (Prov 1:2, 7; 23:23) *ʿmet* “truth” (Psa 51:8) *mišpāṭ* “justice” (Psa 37:30); *tôrat-ḥesed* “loving instruction” (Prov 31:26; cf. Gemser, HAT 16, 110). Notably, the usage of synonyms or pars. occurs least in the Dtr history (only Deut 4:6) and most in the latest portion of Prov (chs. 1–9); cf. also the series in Aram., Dan 5:11, 14. Antonyms are few and occur most frequently in Eccl: *hōlēlôt* “folly, delusion” (1:17; 2:12; 7:25), *siklût* “folly” (2:12f.; 7:25; = *siklût* 1:17); *kesel* “folly” (7:25); finally, *ʾiwwelet* “folly” (Prov 14:8, 33 txt em).

4. (a) Religioethical implications of the root *ḥkm* find expression in the older portions of Prov (chs. 10ff.), esp. in the pars. of *ḥākām* and *šaddîq* “righteous” as well as in the contrast “wise-fool,” regularly parallel to “righteous-evil-doer.” These usages are not accidental polarizations, but recognize behaviors in accordance with or contrary to established order (cf. U. Skladny, *Die ältesten Spruchsammlungen in Israel* [1962], 7ff., etc.; H. H. Schmid, *Gerechtigkeit als Weltordnung* [1968], 157ff.; as well as Hermisson, *op. cit.* 73ff.). Folly results in evil and ruin for fools (→ *ʿwîl* 4; cf. von Rad, *Theol.* 1:428f.), but wisdom leads one in “right paths” (Prov 4:11);

it is a “source of life” (cf. 13:14; 16:22; also 14:27), and it serves to manage and assure human life (16:17; 28:26); through it one avoids “the evil” (14:16) and “the snares of death” (13:14). Thus one with wisdom benefits from the relationship between deed and consequence (cf. K. Koch, *ZTK* 52 [1955]: 1–42; also Schmid, *Gerechtigkeit* 175ff.; von Rad, *Wisdom* 124ff.).

Wisdom derives its beneficial power and function, however, from God; the religioethical significance of the root *hkm* lies primarily in relationship to Yahweh, the God of Israel. He himself is “wise” (Isa 31:2; Job 9:4) and has wisdom “with him” (Job 12:13); only he—not people—knows “its place” and “the way to it” (Job 28:23, cf. vv 7, 12, 20). It is associated primarily with his creative acts (Jer 10:12 = 51:15; Psa 104:24; Job 28 and 38; Prov 3:19; see below on 8:22ff.). He can, however, declare the “secret of wisdom” to people (Job 11:6), a reference to the “hidden wise action of God” (Fohrer, *KAT* 16, 226). He can also “give” wisdom (to Solomon: 1 Kgs 5:9, 26; 2 Chron 9:23; also Exod 31:6; 36:1f. P; Prov 2:6; Eccl 2:26; Aram. Dan 2:21), “fill with the spirit of wisdom” (Exod 28:3; cf. 31:3 P; also Deut 34:9 of Joshua’s charisma), or “teach” it (*ydc* hi., Psa 51:8; cf. 90:12).

(b) The relationship of wisdom to God has further, first of all, positive consequences: As the “fear of Yahweh” (*yirʿat yhw̄h*, → *yrʿ*) is a “source of life” (Prov 14:27; see above), so is it the “beginning” (or “sum,” *rēʿšit*) of wisdom (cf. 1:7; 9:10; 15:33; Psa 111:10). In addition, wisdom experienced a salvation-historical (cf. Psa 107:43; Deut 32:6, 29) and a prophetic application, even in the proclamation of judgment (Hos 13:13; Isa 5:21; 29:14; Jer 8:8f.; 18:18; also Isa 10:13; 19:11f.; 47:10; Jer 49:7; 50:35; 51:57; Ezek 28:4ff.; Obad 8; Zech 9:2; cf. Hos 14:10; Jer 9:11, 22), as well as salvation-eschatological (Isa 33:6) and messianic (Isa 11:2; cf. Deut 34:9; 1 Kgs 3:28; 5:26) applications. Then, too, one may recognize a negative-critical manifestation: when Isaiah and Jeremiah inveigh against the hybrid wisdom of both Israelite (cf. Isa 29:14; Jer 18:18) and foreign wisemen or rulers in order to contrast the wondrous action of Yahweh (Isa 29:14), his wisdom (Isa 31:2), or his word (Jer 8:9), the reference may primarily be to wisdom as the art of governing or as the art of political counsel that is unsuccessful if directed against Yahweh (cf. also Prov 21:30f.).

Otherwise, the disputations in the book of Job and the critique of Qohelet undertake an inner-wisdom corrective; in this manner, the principle of order is guarded from the danger of a “dogmatization” in the sense of an “independent law of the created orders,” while the boundaries between wisdom and the sovereign freedom of God can be simultaneously preserved (see with extensive references, Zimmerli, “Place and Limit of the Wisdom in the Framework of the OT Theology,” *Studies in Ancient Israelite*

*Wisdom* [1976], 314–26; Schmid, *Wesen* 173ff.; Fohrer, *TDNT* 7:495f.; and esp. von Rad, *Wisdom* 97ff.).

(c) Finally, two manifestations of the religioethical affinities of wisdom, pertinent primarily to the latest phase of the OT, are noteworthy. On the one hand, wisdom gradually comes to be related to Yahweh's commandments and law (cf. already Deut 4:6; see J. Malfroy, *VT* 15 [1965]: 49–65; also perhaps Psa 19:8; 119:98; cf. J. Fichtner, *Die altorientalische Weisheit in ihrer israelitisch-jüdischen Ausprägung* [1933], 81ff., with references to pertinent passages). On the other hand, it achieves independence in relation to God and is personified to a degree (the extent to which one must reckon with a hypostasis here continues to be disputed; cf. H. Ringgren, *Word and Wisdom* [1947], 89ff.; R. Marcus, *HUCA* 23/1 [1950/51]: 157–71; Fohrer, op. cit. 490f.), thus esp. in Prov 1–9 (cf. also Job 28; see C. Kayatz, *Studien zu Proverbien 1–9* [1966]; also R. N. Whybray, *Wisdom in Proverbs* [1965]; otherwise, von Rad, *Wisdom* 144ff., with bibliog.). Thus the figurative personified *ḥokmâ* appears here as “the mediator of revelation in the sense that in her proclamation she is like a prophet and can claim supreme authority, revealing God's will to man, offering man life, and understanding acceptance as that of the divine will” (Fohrer, op. cit. 494).

5. Both the nomistic and the personifying tendencies are continued in post-OT literature (above all in Sir; cf. E. G. Bauckmann, *ZAW* 72 [1960]: 33–63; J. C. H. Lebram, “Nachbiblische Weisheitstraditionen,” *VT* 15 [1965]: 167–237; von Rad, *Wisdom* 240ff.).

On Qumran literature (according to Kuhn, *Konk.* 72, *ḥākām* 5x and *ḥokmâ* 13x), which otherwise readily uses → *śkl* (cf. J. A. Sanders, *ZAW* 76 [1964]: 66), as well as on the LXX, where the rendition of *ḥkm* is dominated by *sophos/sophia*, as well as for the wealth of early Jewish, Gnostic, and NT materials, see U. Wilckens and G. Fohrer, “σοφία,” *TDNT* 7:465–528; cf. further, e.g. U. Wilckens, *Weisheit und Torheit* (1959); F. Christ, *Jesus Sophia: Die Sophia-Christologie bei den Synoptikern* (1970).

M. Sæbø

חלה *ḥlh* **to be sick**

S 2470; BDB 317b; *HALOT* 1:316b; *TDOT* 4:399–409; *TWOT* 648; *NIDOTTE* 2703

1. Hebr. *ḥlh* “to be weak, sick” (by-form *ḥlʔ*) has no direct counterparts in the other Sem. languages (SSem. etymologies have been suggested by HAL 302a, 303b, among others; cf. also D. R. Ap-Thomas, VT 6 [1956]: 239f.).

Akk. *ḥalû* occurs at Mari as a Can. loanword (CAD H:54a; AHW 314b).

G. R. Driver (JTS 29 [1928]: 392; id., FS Kahle 98–101; cf. CPT 326) finds a new root *ḥlh* in 1 Sam 22:8 in the sense of “to be concerned” (cf. Eth. *ḥly* “to ponder, to be agitated in spirit,” etc.; Dillmann 577f.). This root may also be postulated for Jer 5:3 (“to take to heart,” par. *lqḥ mûsâr* “to receive instruction”) and in the ni. in Amos 6:6 (“to be concerned for”).

Zorell 242b attributes the expression *ḥlh* pi. *pānîm* “to appease” not to *ḥlh* I but to *ḥlh* II “to be sweet, pleasant” (“to make someone’s countenance pleasant”); Ap-Thomas (op. cit.) discusses other possibilities.

*ḥlh* is the only intrans. that occurs in the OT in all seven stems (cf. → *glh* 1). Nom. derivatives with the meaning “illness” are *ḥʕlî*, *maḥʕleh*, *maḥʕlâ*, *maḥalūyîm*, and, from the root *ḥlʔ*, *taḥʕlūʕîm*. Regarding the (artificial?) PN *maḥlôn* (alongside *kilyôn*) in Ruth 1:2, 5; 4:9f.; cf. IP 10 (contrast, however, Rudolph, KAT 17/1, 38).

2. Incl. *ḥlʔ* (2 Chron 16:12 qal; Isa 53:10 hi.) and the passages discussed above that may not contain forms of *ḥlh* I, the verb occurs 74x, 36x in the qal (contrary to Mandl., one should attribute 1 Sam 31:3; Jer 5:3; 1 Chron 10:3 with Lis. to *ḥîl* I “to quake”), 10x in the ni., 17x in the pi. (according to Lis., Psa 77:11 belongs to *ḥll* II qal “to pierce”), 1x in the pu., 4x in the hi., and 3x each in the ho. and the hitp.

The statistics for the subst. are: *ḥʕlî* 24x (2 Chron 6x, 2 Kgs and Isa 4x each), *maḥʕleh* 2x, *maḥʕlâ* 4x, *maḥʕlūyîm* 1x, *taḥʕlūʕîm* 5x.

Of the total of 110 instances of the root, 16 occur in 2 Chron (qal, pi., ho., and all 5 noms.), 12 in Isa, 11 in 2 Kgs, 9 each in 1 Kgs and Jer. The distribution exhibits no peculiarities; the root is—probably by accident—only rarely attested in the Pentateuch.

3. (a) Apart from the expression *ḥlh* pi. *pānîm* (see b), the root always describes a situation of bodily weakness (cf. J. Scharbert, *Der Schmerz im AT* [1955], 36–40; J. Hempel, “Heilung als Symbol und Wirklichkeit im biblischen Schrifttum,” NAWG 3 [1958]: 237–314, esp. 238n.1).

Synonyms include esp. the roots *\*dwy* “to be weak, sick” and *\*mrq* “to be sick, feel pain” (P. Fronzaroli, AANLR 8/19 [1964]: 250, 263f.), which unlike *ḥlh* are common Sem.; derivatives of the former are the adjs. *dāweh* and *dawwāy* “sick” (Lam 1:13; 5:17;

and Isa 1:5; Jer 8:18; Lam 1:22, resp.) and the substs. *deway* “illness” (Psa 41:4; Job 6:7) and *madweh* “illness, pestilence” (Deut 7:15; 28:60); *dwh* qal “to be ill” (just like *dāwā* “ill” in Lev 15:33; 20:18; Isa 30:22) is used euphemistically for menstruation in Lev 12:2; derivatives of \**mrđ* are *mrš* ni. “to be in pain” (1 Kgs 2:8; Mic 2:10; Job 6:25) and hi. “to vex” (Job 16:3).

The qal of the verb signifies, first of all, “to be/become weak” (Gen 48:1 probably means the weakness of age; Judg 16:7, 11, 17, weakness as the normal human state in comparison to the strength of the charismatic Samson; Isa 57:10 txt?, sexual weakness). But usually the verb means weakness in the sense of “to be ill” (1 Sam 19:14; 30:13; 1 Kgs 14:1, 5; 17:17; 2 Kgs 8:7; 20:12 = Isa 39:1; Isa 38:9; Psa 35:13, without further characterization of the illness). Illness can also consist of an injury (2 Kgs 1:2; injury in battle, 2 Kgs 8:29 = 2 Chron 22:6; blows, Prov 23:35). Sometimes the illness is described more precisely: it can involve a foot condition (1 Kgs 15:23) or a mortal illness (2 Kgs 13:14; 20:1 = Isa 38:1 = 2 Chron 32:24). The verb can also be used of animals (Mal 1:8 par. *pissēah* “lame”; such sick animals—external blemishes must be intended—are cultically unacceptable; cf. also Mal 1:13). The fig. language of Ezek 34 (cf. esp. vv 4, 16) shows that the responsibilities of the shepherd include special care for the “weak and ill” in the herd. This image illustrates Israel’s guidance by its leaders or by Yahweh.

The verb is also used of emotional suffering, as of “love sickness” (Song Sol 2:5; 5:8) and to translate into the expression *rāʿâ ḥôlâ* “a terrible evil” (Eccl 5:12, 15; 6:1 txt em).

The ni. has approximately the same meaning as the qal: “to be/become weak” (Jer 12:13 par. *bôš* “to be/become ashamed,” opposite *yʾl* hi. “to have success”) and “to become sick” (Dan 8:27). The substantivized ptcp. indicates “the sick” (Ezek 34:4, 21; see above); the expression *yôm nahʿlâ* “day of illness” (Isa 17:11 par. *keʿēb ʾānūš* “unrelievable pain”) probably takes up curse terminology and uses it to describe the coming judgment of Yahweh. *makkâ nahlâ* “ruinous blow” (Jer 10:19; 14:17; 30:12; Nah 3:19) is a fixed formulation; it apparently belongs to the vocabulary of the lament in the description of distress (formal elements can be recognized in Jer 10:19; 14:17; cf. also Psa 41:4) and was then transferred by prophecy into other contexts.

In Deut 29:21 the pi. signifies “to allow to become sick” (with *taḥʿlūʾim*, in conjunction with curse threats; the usage of *ḥʿlî* in Deut 28:59, 61 is similar). The pu. means “to be made weak” (Isa 14:10 of the transition into the realm of the dead), the hitp. “to feel sick” (2 Sam 13:2, the cares of love; 13:5f. “to feign illness”).

The hi. has the meaning “to make sick” (Prov 13:12; with the obj.

“heart” it can also describe emotional suffering; the text is uncertain in Isa 53:10; Hos 7:5; Mic 6:13), the ho., “to be drained of strength” (1 Kgs 22:34 = 2 Chron 18:33; 2 Chron 35:23, always of injuries).

Thus it is apparent that *hllh* in the various stems describes conditions of bodily as well as emotional weakness; the same conclusion results from a review of the derivatives (*h<sup>o</sup>li* is used in reference to an emotional condition in e.g., Eccl 5:16; 6:2; and probably also Isa 1:5). Religious practices (which often seem to have manifested a struggle between Israelite and Can. religion; cf. 2 Kgs 1:1ff.) and medicinal means (cf. P. Humbert, “Maladie et médecine dans l’AT,” *RHPR* 44 [1964]: 1–29; J. Hempel, “Ich bin der Herr, dein Arzt,” *TLZ* 82 [1967]: 809–26) were used to treat illnesses.

(b) In the pi. the root *hllh* acquired another possible meaning in a fixed expression (see 1): *hllh* pi. *pānîm* means “to appease”; the obj. can be either a person (Psa 45:13; Job 11:19; Prov 19:6 “to flatter”) or God (this usage is a technical cultic term). It can refer to sacrifice (1 Sam 13:12; Mal 1:9), prayer (Exod 32:11; 1 Kgs 13:6; 2 Kgs 13:4; Jer 26:19; Zech 7:2; 8:21f. par. *bqš* pi. *yhwh* “to seek Yahweh”; Psa 119:58; 2 Chron 33:12), or reform of conduct (Dan 9:13).

4. In summary, illness has special significance for the OT in that it is either experienced as distress that leads to lament (cf. in various contexts, e.g., Isa 38:9; 1 Kgs 8:37 = 2 Chron 6:28; 2 Chron 16:12) or is understood as the effect of God’s curse (cf. Deut 28:59, 61; 29:11; Isa 1:5; Jer 10:19; 12:13; 2 Chron 21:15, 18f.; pity: Exod 15:26; 23:25; Deut 7:15; *h<sup>o</sup>li* is a key term, then, in Isa 53:3f., 10). In later times, OT voices hope for a future without illness established by Yahweh (Isa 33:24; cf. 1 QH 11:22).

5. In the NT, the aspect of illness just mentioned is particularly essential in that Jesus actualizes that future without illness (cf. esp. Matt 11:2ff.); on the whole NT, cf. G. Stählin, “ἀσθενής,” *TDNT* 1:490–93; A. Oepke, “νόσος (μαλακία),” *TDNT* 4:1091–98.

F. Stolz

## ללל *hll* pi. **to desecrate**

S 2490; BDB 320a; *HALOT* 1:319b; *TDOT* 4:409–17; *TWOT* 661; *NIDOTTE* 2725

1. Hebr. *hll* pi. “to desecrate,” the other stems with corresponding meanings (hi. “to desecrate” only in Num 30:3 and Ezek 39:7; ni. and pu.

“to be profaned”; on the forms, cf. BL 436), and the noms. (*ḥôl* “profane” and, in the event that it should not be considered, following HAL 307b, with *ḥll* II “to pierce through,” *ḥālāl* “profane, desecrated” in Lev 21:7, 14; Ezek 21:30; also *ḥalîlâ* “may it not be so”) belong to a root represented in the whole Sem. linguistic realm with the original meaning “to loose, set free” (cf. SNHL 31f.); the meaning dominant later is “to desecrate, profane” (in late and postbibl. Hebr. an unambiguously definable term, a characteristic notion for the thought of the era; cf. WTM 2:58f.; Ben-Yehuda 2:1580–83). In the hi. the meaning “to begin” dominates alongside “to desecrate” (in addition to ho. “to be begun” and *t<sup>e</sup>ḥillâ* “beginning”); the connection between the two groups is clarified by the use of *ḥll* pi. in the sense of “to place in profane use” (Deut 20:6[bis]; 28:30; Jer 31:5, of the beginning of the use of a vineyard at the end of a period of consecration in which the harvest was forbidden for one’s own use; cf. Lev 19:23–25; see ILC 3–4:271).

The Akk. *clēlu* in the basic (G) stem means “to be clear” or “to be cultically pure” (persons, lips, incantations) and “to be free” (of promises), in the reduplicated (D) stem “to purify” (oneself, mouth and hands, the bodies of the gods), “to consecrate through cleansing” (the daughter), and “to set free” (slaves); cf. AHW 197f. Arab. also attests the broadly distributed root *ḥll* in the meaning “to free, be permitted” (Lane 1/2:619ff.). An original relationship to *ḥll* (\**ḥll*) “to pierce (through), wound” may not be assumed despite a few points of contact (esp. in Arab.). The older NWSem. texts do not attest the verb with certainty (cf. WUS no. 928; DISO 89). In the later Sem. languages and dialects the post-exilic OT usage became dominant under the influence of Judaism and also gained even broader formal influence (cf. further LS 231; Dillmann 66; Littmann-Höfner 52f.; Drower-Macuch 148b).

2. The verb occurs 134x in the OT, 66x in the pi. (Ezek 22x, Lev 14x, Isa and Psa 5x each), and 56x in the hi. (“to desecrate” only 2x, otherwise “to begin”: 2 Chron 11x, Judg 8x, Deut 7x, Gen 6x, Num and 1 Sam 4x each); in addition, the ni. is attested 10x (Ezek 7x) and the pu. and ho. 1x each. Only 2 of the 75 passages that use the verb in the sense of “to desecrate” (pi. 62x, hi. 2x, ni., and pu.) are unobjectionably pre-exilic: Gen 49:4 and Exod 20:25 (on Amos 2:7, cf. Wolff, *Amos*, Herm, 133f.; on Zeph 3:4 cf. Sellin-Fohrer 457). Almost 2/3 of all occurrences of “to desecrate” are contained in Ezek (31x) and in H (16x). Otherwise, the term occurs in isolated passages in P, Deutero-Isa (and Isa 23:9; 56:2, 6), Jer, Mal, Psa, Lam, Dan, and Chron.

*ḥôl* occurs 7x (1 Sam 21:5f. and—always in explicit opposition to *qōdeš*—Lev 10:10; Ezek 22:26; 42:20; 44:23; correspondingly 48:15 “profane residential area”), *ḥālāl* 3x (see 1), *ḥalîlâ* 21x (1 Sam 8x, Gen 4x, 2 Sam 3x, Josh and Job 2x, 1 Kgs and 1 Chron 1x, twice in 2 Sam 20:20), and

*t<sup>e</sup>hillâ* 22x (Gen 4x, Judg, 2 Sam, and Dan 3x each).

3./4. (a) In H, concepts connected to the term *hill* pi. “to desecrate” may be adduced with greatest assurance. The holiness (→ *qdš*) of Yahweh and of that which pertains to him, esp. the priesthood, should be ensured against desecration. Commandments to this end almost always have the form *lōʾ* + impf. and represent professional priestly knowledge (J. Begrich, “Die priesterliche Tora,” BZAW 66 [1936], 85–87 = GS [1964], 256–58; R. Kilian, *Literarkritische und formgeschichtliche Untersuchung des Heiligkeitsgesetzes* [1963], 84–103 on Lev 21f., attributes the *hill* regulations to his layer II of the Ur-Holiness Code). The priest becomes desecrated through engagement in particular mourning rites (Lev 21:20), through the harlotry of his daughter (21:9; cf. 18:29), through contact with the corpse of a married sister (21:4); he becomes merely unclean through contact with the corpse of an *un* married sister and other near relations (→ *tm*ʿ, Elliger, HAT 4, 288f.). The high priest may not approach any corpse whatsoever, lest he desecrate the sanctuary (21:12); such would also be the case if one afflicted with deformities were to exercise the priestly office (21:23). The descendants of the high priest would be desecrated by his marriage to a widow, divorcée, rape victim, or prostitute (21:15). The pericope Lev 22:1–16 commands the priests to handle the sacrificial offerings with greatest reverence so that Yahweh’s name or the offering itself may not be desecrated (22:2, 9, 15; cf. H. Reventlow, *Das Heiligkeitsgesetz formgeschichtlich untersucht* [1961], 92–103; C. Feucht, *Untersuchungen zum Heiligkeitsgesetz* [1964], 44f.); P has a corresponding instruction (Num 18:32). All other Israelites are also warned against the desecration of Yahweh’s name; it would result from child sacrifice (Lev 18:21; 20:3), the enjoyment of the flesh of the sacrifice as late as the third day after the sacrifice (19:8), false oaths (19:12), and general inattention and disobedience of the commandments (22:32).

Concepts associated with the fear of desecrating Yahweh’s name may not be deduced with confidence. Noteworthy is the general explanation that this fear referred to a desanctification and thereby a debilitation of the name (H. A. Brongers, ZAW 77 [1965]: 11). Yet such a consequence is hardly a real possibility for Yahwism. The facts of the case of a severely punishable and fatal offense are presented for the witness in every instance.

(b) In contrast to the self-contained conceptual world of H, the term spans a broader area in Ezek. The discussion here most often concerns the (mostly already transpired) desecration of God or of his name (11x), of the Sabbath (7x), and of the temple (7x). The guilty parties are always the Israelites, but the essence of the guilt and desecration is not always discernible. It is explicitly stated that Yahweh is desecrated by magical rites

among the deportees in Babylon (13:19; Zimmerli, *Ezek*, Herm, 1:297). Five times Ezek 36:20–23 denounces the desecration of God’s name. The profanation of the name results from the fact that—in view of the separation of Israel from the promised land—he is slandered among the heathen as powerless. Even if one may distinguish this desecration by the situation from that resulting from Israel’s behavior, the guilt lies with Israel because it must finally be punished with rejection on account of its apostasy (Fohrer, HAT 13, 109f.; Zimmerli, *Ezek*, Herm, 1:409, 416; 2:246–48), although formerly Yahweh had foregone the deserved punishment in order to avoid a desecration of his name (20:9, 14). Yet he will take care that in the future his name is not desecrated again (20:39; 39:7). The “history of sin” of the exodus esp. emphasizes the desecration of the Sabbath, in addition to charges of idol worship and transgression of the commandments (Ezek 20:13, 16, 21, 24; cf. 22:8; 23:38). Exod 31:14 P; Isa 56:2, 6; and Neh 13:17f. agree with this characterization. The desecration by Israel and its priests of the temple and of that which is holy to Yahweh (Ezek 22:26, by blurring the distinction between holy and profane; 23:39, by child sacrifice; 44:7, by allowing foreigners access to the temple) means the desecration of the holy God himself (22:26) and is requited through the destruction of the temple and the sanctuaries; thus the catastrophe of 587 is also a desecration (7:21f., 24; 25:3), and one can say that God himself has desecrated his sanctuary (24:21). This usage supports a more general understanding of the word, as indicated in the Tyre section: the punishment of Tyre by violent enemies is also desecration (28:7), as is the fall to hell of its hybrid king (28:16; cf. Isa 23:9), who had desecrated his sanctuaries (Fohrer, HAT 13, 163: “my sanctuary”; 28:18).

(c) Isa 43:28; 47:6; Psa 74:7; and Lam 2:2 also depict the collapse of 587 as desecration, but in contrast to Psa 74:7, Deutero-Isa attributes the event to God alone. Psa 89:40 likewise acknowledges the desecration of Judah’s king as God’s act. A new occurrence of *ḥll* is conjectured for Deutero-Isa in Isa 52:5 (*y<sup>e</sup>ḥull<sup>e</sup>lû* instead of *y<sup>e</sup>ḥéllîlû*; cf. S. H. Blank, “Is 52,5 and the Profanation of the Name,” *HUCA* 25 [1954]: 1–8). Later, the author of Dan regarded the ravaging of the temple by Antiochus Epiphanes as desecration (Dan 11:31).

(d) The word does not occur in the 8th-cent. prophets, if Amos 2:7 is to be regarded as an addition (Wolff, *Amos*, Herm, 133f.); here the name of Yahweh is seen as desecrated by the fact that son and father go (together) to a prostitute. For Jeremiah, the land is desecrated by idol worship (Jer 16:18) and the name of Yahweh by the return of debt slaves to slavery (34:16); Zephaniah brands the egoistic usage of holy things by the priests as desecration (Zeph 3:4); Malachi finds it in cultic as well as in moral transgressions (Mal 1:12, sacrifices of poor quality; 2:10, infidelity

with one another as desecration of the covenant of the fathers; 2:11, marriage with foreigners). Twice the breach of word or covenant is called “desecration” (Psa 55:21; Num 30:3 P); and God does not want to desecrate his → *b<sup>c</sup>ri<sup>t</sup>* through the breach of his promises (Psa 89:35).

(e) Only the two occurrences of *hll* pi. in the blessing of Jacob and the Covenant Code are transmitted from the first five hundred years of Israelite literary history: Reuben desecrated his father’s couch through intercourse with Bilhah (Gen 49:4, cited in 1 Chron 5:1), and the altar stones are desecrated by being dressed with an iron implement (Exod 20:25). Reuben’s deed is a matter of forbidden involvement in the father’s intimate sphere and an endangerment of the peace of the extended family (de Vaux 1:117; W. Elliger, *ZAW* 67 [1955]: 8–12 = *KS* [1966], 239–44; id., *HAT* 4, 238–40). The prohibition against dressing the altar stones used to be frequently explained in terms of avoiding the displacement of the numen dwelling in the stone (K. Marti, *Geschichte der israelitischen Religion* [19034], 100; Baentsch, *Exodus–Leviticus–Numeri*, *HKAT*, 188; Beer, *Exodus*, *HAT*, 106). Nomadic traditions and norms averse to everything civilized—specifically regarding cultic arrangements—offer a more likely explanation (de Vaux 2:408).

(f) *hól* and *hālāl* occur only in Lev and Ezek except for the 2x *hól* appears in the old narrative 1 Sam 21: the priest Ahimelek has no bread designated for profane consumption (*lehem hól*), only bread for holy use; David certifies that his people’s “vessels” were holy even on ordinary journeys (*derek hól*) and that they are certainly holy today (1 Sam 21:5f.). Already in this early witness, then, *hól* is the opposite of *qādōš* (→ *qdš*), “holy,” as in Lev 10:10 and in Ezek. The Sam texts, as well as the occurrence in old texts of the interjection *hālilā* “may it not be so,” lit. “for the profane,” show that the word group must be understood in relationship to the OT → *qdš* concept (BL 654; see also M. Held, *JCS* 15 [1961]: 21; M. R. Lehmann, *ZAW* 81 [1969]: 82f.; cf. *BHH* 1:415; *BLex* 2 398f.).

5. The paramount significance of the term in Mid. Hebr. is illuminated by the numerous examples in *WTM* and Ben-Yehuda (see 1). The elaborate delineation of the “profane” is the urgent concern of rabbinic literature; the mishnaic and talmudic tractate V/3 bears the name *Hullin*.

At Qumran and in the related literature, *hll* occurs in the Damascus document in connection to the Sabbath commandment (CD 11:15; 12:4; cf. Kuhn, *Konk.* 72).

The NT surmounts the customary understanding of the profane and revokes the boundaries drawn in contemporary Judaism between holy and profane (F. Hauck, “βέβηλος,” *TDNT* 1:604f.; id., “κοινός,” *TDNT* 3:789–809; id., “μιαίνω,” *TDNT* 4:644–47).

## חלק *hlq* to divide

S 2505; BDB 323b; HALOT 1:322b; TDOT 4:447–51; TWOT 669; NIDOTTE 2745

1. The root *hlq* occurs in the meaning “to divide, distribute” only in Hebr. and Aram. (*DISO* 89f.; *KBL* 1076a). Linguists generally associate it with Arab. *halaqa* “to measure off, form” and other SSem. verbs (*HAL* 309b under *hlq* II). It is unclear whether and how, on the one hand, the group incl. Ug. *hlq* “to be destroyed,” Akk. *halāqu* “to go forth, be destroyed,” and Eth. *halqa* “to disappear” (*HAL* 310 under *hlq* III; → *’bd* 3), and, on the other hand, the group comprising Hebr. *hlq* “to be smooth” (*hālāq* “smooth”), Arab. *halaqa* “to smooth” etc. (*HAL* 309b under *hlq* I) belongs with *hlq* “to divide.”

The Hebr. verb occurs in all verbal stems except the ho.; there are also the nom. derivatives *hēleq* “portion,” *helqâ* “parcel of land,” *h<sup>a</sup>luqqâ* “division,” and *maḥ<sup>a</sup>lōqet* “portion, division.” *h<sup>a</sup>lāq* “portion” and *maḥl<sup>c</sup>qâ* “division” are attested in Bibl. Aram.

2. The OT attests the word group (excl. proper names) 188x in Hebr. and 4x in Aram.: verb 56x (Josh 7x, Isa and 1 Chron 5x each), specifically, qal 17x, ni. 8x (1 Chron 23:6 and 24:3 should apparently be understood as qals; cf. Rudolph, *HAT* 21, 154; *HAL* 309b), pi. 26x, pu. 3x, hitp. 1x, and hi. 1x; *hēleq* 66x (Josh 9x, Deut and Eccl 8x each, Psa 6x, Job 5x); *helqâ* 23x (2 Kgs 6x, 2 Sam 5x, excl. the place designation in 2 Sam 2:16; cf. *HAL* 311b), *h<sup>a</sup>luqqâ* 1x (2 Chron 35:5), and *maḥ<sup>a</sup>lōqet* 42x (1 Chron 26x, 2 Chron 11x, Josh 3x, Ezek and Neh 1x); Aram. *h<sup>a</sup>lāq* 3x and *maḥl<sup>c</sup>qâ* 1x.

3. (a) The qal means “to divide, distribute,” whereby the weight often lies less on the dividing procedure as such and more on the distribution. It can thus refer to the division/distribution of plunder (Josh 22:8; 1 Sam 30:24), a field (2 Sam 19:30), silver (Job 27:17), inheritance (Prov 17:2), supplies (Neh 13:13), division with the thief (Prov 29:24), division of people into different groups (1 Chron 24:4f.; 2 Chron 23:18; this specifically Chr usage includes the usage of *maḥ<sup>a</sup>lōqet* and *h<sup>a</sup>luqqâ* as “division,” similarly attested only in the Chr history), and, in the context of the conquest narrative, the division and distribution of the land or the inheritance (Josh 14:5; 18:2; cf. Neh 9:22 with God as subj.; corresponding to the the pass. ni. in Num 26:53, 55f.).

2 Chron 28:21, where the verb must be translated “to plunder,” etc. (cf. LXX and 2 Kgs 16:8), should probably be read *hillēš* instead of *hālaq* (cf. Rudolph, HAT 21, 292).

On Deut 4:19; 29:25; Job 39:17, see 4.

(b) The *ni.* (except in the passages already discussed, Num 26:53, 55f.) is reflexive: “to divide/distribute among themselves” (Gen 14:15, Abraham and his colleagues; 1 Kgs 16:21, the people Israel; Job 38:24 txt?, the light or the wind; cf. Fohrer, KAT 16, 492).

The *pi.* can be rendered almost exclusively “to divide/distribute” (on the distinction from the *qal*, cf. *HP* 126–30). Objs. of the division/distribution are things (plunder, Gen 49:27; Exod 15:9; Judg 5:30; Isa 9:2; 53:12b; Psa 68:13; Prov 16:19; *pu. pass.*, Zech 14:1 = 1 Chron 16:3; clothing, Psa 22:19; cf. Mark 15:24 par.) or land (Josh 13:7; 18:10; 19:51; 1 Kgs 18:6; Ezek 47:21; Joel 4:2; Mic 2:4 txt?; Psa 60:8 = 108:8; Dan 11:39; *hitp.* “to divide among themselves,” Josh 18:5), with a divine subj., objs. also include fate, etc. (Isa 34:17; 53:12a; Job 21:17). Gen 49:7 and Lam 4:16 should be translated “to scatter.”

The *hi.* in Jer 37:12 means “to divide an estate” (cf. Rudolph, HAT 12, 238).

(c) The usage of the noun *hēleq* “portion” (of plunder: Num 31:36; 1 Sam 30:24; cf. Gen 14:24; of sacrifice: Lev 6:10; cf. Deut 18:8) corresponds to the usage of the verb.

Semantically related terms are *mānâ* (12x) and *m<sup>o</sup>nāt* (9x, Aram. loanword; cf. Wagner no. 175) from the root *mnh* “to count,” and *mišhâ* (Lev 7:35) and *mošhâ* (Num 18:8) from the root *mšh* II “to measure.”

As a *par.* term for → *naḥ<sup>a</sup>lâ*, → *gôrāl*, *ḥebel* “line (for measuring) > (allotted) parcel of ground,” etc., *hēleq* often stands for the “portion of the land” (Josh 15:13; 19:9; Ezek 45:7; 48:8, 21, etc.; cf. Zech 2:16; see J. Dreyfus, RSPT 42 [1958]: 3–49; F. Horst, FS Rudolph 135–56). In a narrower sense, *hēleq* is the land or field coming to the individual (Amos 7:4; Hos 5:7); the term *ḥelqâ* also has the same meaning (2 Sam 23:11f.; Ruth 2:3; 4:4, etc.) and finally comes to mean simply “tract of land” (Gen 33:19; Josh 24:32, etc.).

BL 567, etc., assume that *hēleq* “portion” has been fused here with a word \**ḥeleq* (or \**ḥeqel*) “field” (cf. Akk. *eqlu*, Aram. *ḥaqlā*?, Arab. and Eth. *ḥaql*); cf., to the contrary, GVG 1:277.

Discussion of the fact that Aaron or the Levites should receive no

portion of the land, but that Yahweh will be their “portion” (Num 18:20; Deut 10:9; 12:12; 14:27, 29; 18:1; Josh 14:4; 18:7; see 4), prepares the way for the fig. use of *ḥēleq* (par. *naḥ<sup>a</sup>lâ*). This fig. meaning of *ḥēleq* in the sense of that which comes to one, where one belongs, is rather frequent in various forms. The noun occasionally depicts “fate” (Isa 17:14 par. *gôrāl*, a play on words with the double entendre “portion of the plunder/fate”; cf. Isa 57:6; Job 20:29; 27:13; 31:2, etc.), otherwise e.g., participation in the paternal estate (Gen 31:14), with Yahweh (Josh 22:25, 27), with David (2 Sam 20:1; 1 Kgs 12:16 = 2 Chron 10:16).

The usage of *ḥēleq* in Eccl requires special mention here. Qohelet’s thoughts revolve repeatedly around the question concerning what his “part,” his “reward,” will be, what will be left (*yitrôn*) for him (*ḥēleq*: Eccl 2:10, 21; 3:22; 5:17f.; 9:6, 9; cf. 11:2). He is less concerned here with the complaint that a person can have only a part, never the whole (W. Zimmerli, *Die Weisheit des Predigers Salomo* [1936], 37; id., ATD 16/1, 138, etc.), than with the question of the “portion,” the place of the person in the world (H. H. Schmid, *Wesen und Geschichte der Weisheit* [1966], 187f.).

4. The concept behind Deut 32:8, that Israel was allotted to Yahweh by (*ʿēl*) *ʿelyôn* (v 9, *ḥēleq*), is very ancient. Analogously, Deut 29:25 discusses the gods to whom Yahweh did not allot Israel, and Deut 4:19, according to which Yahweh allotted the stars to all nations, probably belongs in the same arena (cf. further Job 39:17, the apportionment of insight).

The word group acquires a specifically theological meaning where Yahweh appears as the “portion” of a group or of an individual. Passages that depict Yahweh as the “portion” of Aaron or the Levites have already been mentioned (3c). In Jer 10:16 = 51:19 Yahweh is “Jacob’s portion,” and laments acknowledge in context of the terms → *gôrāl*, → *naḥ<sup>a</sup>lâ*, *ḥebel*, etc.: “Yahweh is my portion,” etc. (Psa 16:5; 73:26; 142:6; Lam 3:24; cf. H.-J. Hermisson, *Sprache und Ritus im altisraelitischen Kult* [1965], 107–13). In addition, cf. the PNs *ḥilqîyâ(hû)* “Yahweh is my portion” and its abbreviated forms *ḥēleq* and *ḥelqāy* (IP 163f.).

Finally, that the poet’s “portion” in Psa 119:57 is keeping the commandments is as self-evident as the viewpoint represented in the poetry of Job that “the portion” of the wicked will come from God (Job 20:29; 27:13; cf. 31:2).

5. No particularly significant postbibl. role can be traced for this word group. The pair of occurrences at Qumran conform to OT usage. Gk. knows no precise equivalent; the LXX prefers to render *ḥlq* with *merizein* and composites or *klēronomia* or *klēros*. On the NT usage of *klēros*, see W.

Foerster and J. Herrmann, “κλῆρος,” *TDNT* 3:758–85.

H. H. Schmid

## חָמַד *ḥmd* to desire

S 2530; BDB 326a; *HALOT* 1:325a; *TDOT* 4:452–61; *TWOT* 673; *NIDOTTE* 2773

1. The root \**ḥmd* “to desire” is widely distributed in the WSem. languages (SSem. in the meaning “to praise”; cf. Muḥammad, “the praised”).

Older examples stem from Ug. (cf. *WUS* no. 936; *UT* no. 872), Can. (EA 138:126, pass. ptc. *ḥa-mu-du* “desirable”; cf. *CAD* H:73b), Phoen. (*KAI* no. 26A.III.14f. *yḥmd ḥyt ḥqrt z* “he would like to have this city” [cf. *ANET* 654b “even if he has good intentions toward this city”]; l. 17 *bḥmdt* “with covetousness” [cf. *ANET* 654b “with good intentions”]) and Eg. Aram. (*BMAP* no. 7.19, *ḥmdyh*, perhaps *ḥ<sup>a</sup>mîdîn* “valuables”); cf. also Huffmon 196.

In addition to qal “to desire” and pi. “to consider desirable” (*HP* 220f.), Hebr. has the qal pass. ptc. and the ni. ptc., as well as various nom. forms (segholate forms: *ḥemed* and *ḥemdâ*; with *m*-preformative: *maḥmād* and *maḥmōd*, abstract pl. *ḥ<sup>a</sup>mūdôt*), predominantly to indicate the desired obj. *ḥemdān* occurs as a PN (Gen 36:26).

2. The verb occurs rather rarely in the OT, perhaps because Hebr. has many options to express emotion and volition (modes, tenses, particles, etc.). In its three stems, *ḥmd* is represented a total of only 21x (qal 16x, ni. 4x, pi. 1x). The narrative literature is represented by Gen 2:9; 3:6; Josh 7:21; otherwise, wisdom, legal, liturgical, and prophetic texts exhibit the verb *ḥmd*. The nom. forms (*ḥemed* 5x, *ḥemdâ* 16x, *ḥ<sup>a</sup>mūdôt* 9x, *maḥmād* 13x, *maḥmōd* 1x) seem to have come into prominence only in exilic and post-exilic literature; for *maḥmād*, see Lam 1:10f.; 2:4; Ezek 24:16, 21, 25; for *ḥ<sup>a</sup>mūdôt*, see Dan 9:23; 10:3, 11, 19; 11:38, 43.

3. One may distinguish between two functions for *ḥmd*. (a) a usage describing the act., acting subj., and (b) a usage describing the pass., sought-after obj.; the nom. meanings fall into the latter category.

(a) As an active behavior, *ḥmd* (qal and pi.; causative hi., only Sir 40:22) is the goal-oriented intention toward something, the pressing desire for possession (cf. J. Herrmann, *FS Sellin* 69–82; J. J. Stamm, *TRu* 27 [1961]: 301–3). Just as this desire can vary with respect to motivation and

intensity (“to desire,” “to be eager,” “to long for”), so, in each case, is the actor’s need and an external stimulus presupposed; sexual desire is also present in the word field, as is true also for → *wh*. Enemies want to take possession of the land (cf. Exod 34:24); Yahweh wanted to have the mountain of God and now occupies it (Psa 68:17); the fool desires the seductive, married woman (Prov 6:25). Legitimate desire can and may be fulfilled (cf. Song Sol 2:3 pi.), illicit desire is banned by commandment (Exod 20:17; 34:24; Deut 5:21; 7:25; Prov 6:25) because it results in destruction (Job 20:20) and injures neighbors as well as the entire society (cf. Josh 7:21; Mic 2:2).

(b) Unattractiveness is undesirable (Isa 53:2); the ni. ptcp. can describe that which elicits desire or covetousness (Gen 2:9; 3:6; Psa 19:11; Prov 21:20). Such objs. are naturally valuable for the participant (Isa 44:9: the implement of the sculptor, qal pass. ptcp.; cf. Job 20:20 and the adj. and then also subjectival usage of *h<sup>a</sup>mūdôt* “costly,” “treasure”). The stimulating effect of the obj. is expressed clearly in the phrase *maḥmad ʿēnayim* “desire of the eyes” (1 Kgs 20:6; Ezek 24:16, 21, 25; Lam 2:4; cf. Eng. “feast for the eyes,” “welcome sight”); the lover sings: *kullô maḥ<sup>a</sup>maddîm* “everything about him is delight” (Song Sol 5:16; cf. further Isa 64:10; Hos 9:6, 16; Joel 4:5; Lam 1:10f.; 2 Chron 36:19). *ḥemed*, always in a cs. relationship, describes the beauty of a field (Isa 32:12; cf. Amos 5:11), and the stateliness of human figures (Ezek 23:6, 12, 23). In the same way *ḥemdâ* is a collective term for “beauty, worth, charm, significance” (cf. 1 Sam 9:20, Israel’s greatness; Hag 2:7, the treasures of all nations; Dan 11:37, the idol of the woman, apparently Tammuz; 2 Chron 21:20, Jehoram died worthlessly = without being mourned?); *ḥemdâ* is also predominantly used as a governing noun: Isa 2:16; Jer 3:19; 12:10; 25:34; Ezek 26:12; Hos 13:15; Nah 2:10; Zech 7:14; Psa 106:24; Dan 11:8; 2 Chron 32:27; 36:10.

4./5. A specifically theological meaning cannot yet be identified for the OT. As with → *wh* and in contrast to expressions with clearly fixed ethical significance (cf. e.g., → *śn* “to hate,” *gnb* “to steal”), *ḥmd* embraces the entire complex concept of “desire”; no single aspect had yet achieved status as an independent theological technical expression. Only in early Judaism is desire, esp. of sexual desire, denigrated and made taboo. Pursuant to the prohibitions of the Decalogue (the prohibition of theft in Exod 20:15 suggested the false conclusion that v 17 must intend a “thought crime”), every material, externally stimulated desire is marked a temptation and a rebellion against God (cf. *epithymia*, concupiscentia; Matt 5:28; Rom 7:7; further, StrB 3:234ff.; 4/1:466ff.; J. J. Stamm, *Der Dekalog im Lichte der neueren Forschung* [1962], 55–59, translated and expanded in M. E.

Andrew, *Ten Commandments in Recent Research* [1967], 101–7); → *wh*.

E. Gerstenberger

## הַמָּאָה *ḥēmâ* excitement

S 2534; BDB 404a; HALOT 1:326a; TDOT 4:462–65; TWOT 860a; NIDOTTE 2779

1. The subst. *ḥēmâ* (\**ḥim-at-*, BL 450) derives from the root *yḥm* (\**wḥm*; Barth 94), which, in turn, is associated with *ḥmm* (Arab. also *ḥmw/y*) “to be hot.” The subst. is common Sem. in the meaning “venom, poison” (Berg., *Intro.* 216; P. Fronzaroli, *AANLR* 8/19 [1964]: 250, 264, 276): Akk. *imtu* “venom, poison” (*AHW* 379b; *CAD* I/J:139–41), Ug. *ḥmt* “poison” (now frequently attested in *KTU* 1.100, 107; cf. *Ugaritica* 5:599a), Hebr. *ḥēmâ* (Deut 32:24, 33; Psa 58:5[bis]; 140:4; Job 6:4), Aram. *ḥimtā* / *ḥēmṯā* (attested only in the later dialects), Arab. *ḥumat* “(insect) poison” (*i* > *u* preceding a labial, *GVG* 1:199), Eth. *ḥamōt* “gall” (Dillmann 77f.). The meaning “excitement, wrath” (< “venom, foam” or derived directly from the root “to be hot, excited”) is attested outside Hebr. esp. in Aram. (Hadad inscription, *KAI* no. 214.33 *ḥm*?, Aḥ. 140 *ḥmt*[?]); Bibl. Aram. *ḥ<sup>a</sup>mâ*, Dan 3:13, 19; Syr., etc.).

2. Although the verb *yḥm* qal/pi., “to be in heat” occurs only 6x in the OT (qal: Gen 30:38f.; pi.: Gen 30:41[bis]; 31:10; Psa 51:7), the subst. *ḥēmâ* is represented 125x (incl. passages mentioned with the meaning “poison”; in the meaning “excitement, wrath” 119x, 2x in the pl. *ḥēmōt*, Psa 76:11 [txt?] and Prov 22:24, as an abstract formation, “wrath,” *GVG* 2:59), most frequently in Ezek (33x), Jer (17x), Psa (15x), and Isa (13x).

Like → *ap*, *ḥēmâ* is less often used of human wrath (28x) than of divine wrath (89x, excl. Psa 76:11b txt em and Job 19:29 txt em): of human emotions, Prov 9x, Esth 6x, Psa, Isa, and Dan 2x each, Gen, 2 Sam, 2 Kgs, Ezek, Hos, Hab, and Job 1x each; of divine wrath, Ezek 32x, Jer 17x, Isa 11x, Psa 9x, 2 Chron 5x, Deut 3x, 2 Kgs, Nah, and Lam 2x, Lev, Num, Mic, Zech, Job, and Dan 1x each.

3. In view of the meaning of the root, the basic meaning of *ḥēmâ* may indicate “being hot (from excitement),” thus e.g., “boiling,” then “wrath”; cf. Hos 7:5, which mentions the effect of wine. The distinction from → *ap* would then be seen in the fact that *ap* describes more the physically visible state of excitement of an individual breathing heavily as a

consequence of anger, while *ḥēmâ* emphasizes more the inner emotion, the inner fire of anger. Nevertheless, one may hardly recognize an essential distinction in meaning or in usage between *ʾap* and *ḥēmâ*, as demonstrated by the fact that *ḥēmâ* appears in conjunction with *ʾap* about 40x (in series: Deut 9:19; 29:22, 27; Isa 42:25; 66:15; Jer 7:20; 21:5; 32:31, 37; 33:5; 36:7; 42:18; 44:6; Ezek 5:15; 22:20; 25:14; 38:18; Mic 5:14; Dan 9:16; in par. expressions: Gen 27:44f.; Isa 63:3, 6; Ezek 5:13; 7:8; 13:13; 20:8, 21; Nah 1:6; Hab 2:15 [cf. HAL 313a]; Psa 6:2; 37:8; 78:38; 90:7; Prov 15:1; 21:14; 22:24; 27:4; 29:22; Lam 4:11).

Other phrases are: with derivatives from the stem → *qsp*, Deut 9:19; 29:27; Isa 34:2; Jer 21:5; 32:37; Psa 38:2; with *g<sup>c</sup>ārâ* “scolding,” Isa 51:20; 66:15; with *tôkaḥat* “reprimand,” Ezek 5:15; 25:17; with the root → *qn?*, Ezek 16:38, 42; 36:6; Nah 1:2; Zech 8:2; Prov 6:34; with → *nqm*, Nah 1:2; with *za<sup>c</sup>am* “cursing,” Nah 1:6.

Wrath can burn out (*yšt* ni., 2 Kgs 22:13, 17) or intensify (*ʾlh*, 2 Sam 11:20; Ezek 38:18; 2 Chron 36:16); it can abate (*škk*, Esth 7:10); one can forsake it (*ʾzb*, Psa 37:8) or turn it aside (*sûb* hi., Num 25:11; Isa 66:15; Jer 18:20; Psa 106:23; Prov 15:1).

*ḥēmâ* “excitement, agitation” overcomes the king on hearing bad news (2 Sam 11:20; Esth 1:12; 2:1; 7:7); a person can feel it against his brother (Gen 27:44) or against a rival (Esth 3:5; 5:9). Proverbial wisdom expresses in many images how detrimental this excitement can be (Prov 6:34; 15:1; 19:19; 22:24; 27:4; 29:22). Patience (Prov 15:18) and wisdom (Prov 16:14) protect against it, as well as a timely gift (Prov 21:14). Other examples of human *ḥēmâ* are 2 Kgs 5:12; Isa 51:13(bis); Hos 7:5; Psa 37:8; 76:11(bis); Esth 7:10; Dan 8:6; 11:44. A (holy) excitement can also overcome a prophet enraptured by Yahweh’s spirit.

On the text and translation of Isa 27:4; Hab 2:15; Job 36:18 (and Jer 25:15), cf., in addition to HAL 313, G. R. Driver, “On *ḥēmāh* ‘hot anger, fury’ and also ‘fiery wine,’” TZ 14 (1958): 133–35.

4. God’s *ḥēmâ* “wrath” is directed at individuals (Psa 6:2 = 38:2; 88:8; 90:7; Job 21:20), but esp. against his own people in conjunction with punitive judgment (Jer 4:4, etc.; Ezek 5:15, etc.; Lev 26:28; Deut 9:19; 29:27; 2 Kgs 22:13, 17; Psa 78:38; 89:47; 106:23; Lam 2:4; 4:11; Dan 9:16). The other nations also stand under divine wrath, thus e.g., Sodom and Gomorrah (Deut 29:22), Edom (Isa 63:3, 5f.; Ezek 25:14), the Philistines (Ezek 25:17), Egypt (Ezek 30:15), and all foreign nations (Isa 34:2) and enemies of Yahweh (Psa 59:14; 79:6).

A distinctive concept underlies the picture of the cup of wrath that Yahweh gives his enemies to drink (Isa 51:17, 22; Jer 25:15; cf. Rudolph, KAT 17/3, 255, on Lam 4:21).

5. *ḥēmā* occurs occasionally in the Qumran literature (cf. Kuhn, *Konk.* 73), once in conjunction with *rgz* “excitement” (1Q20 1:2) and once in the phrase “to pour out wrath” (*špk*, 6Q10 2:4, cf. Ezek 20:8, etc.).

On the NT, cf. G. Stählin, “ὀργή,” *TDNT* 5:419–47; R. Hentschke, *BHH* 3:2246–48 (bibliog.); H. Reinelt, *BLex* 2 1934–36 (bibliog.).

G. Sauer

לַחַמְלָה *ml* to have compassion → חַמְלָה *hm*

### חַמְלָה *āmās* violence

S 2554; BDB 329a; *HALOT* 1:329a; *TDOT* 4:478–87; *TWOT* 678; *NIDOTTE* 2803

1. The word group *ḥms* qal “to act violently,” ni. “to suffer violence,” and *ḥāmās* “violence” seems to have few direct counterparts outside texts dependent upon the OT; worthy of mention are Yaudi *ḥms* “abominable act” (*KAI* no. 214.26 in a fragmentary context) and Imp. Aram. *šhd ḥms* “witness who exercises injustice” (Aḥ. 140 [*ANET* 429b “false witness”] = Hebr. *šd ḥāmās*). In the event that *ḥms* should be associated with the root *ḥmš* II (Hebr. *ḥmš* qal “to oppress,” Psa 71:4; subst. *ḥāmôš* “oppressor,” Isa 1:17 txt?, read *ḥāmûš* “oppressed”; cf. Wildberger, *Isa 1–12*, CC, 36), then Aram., Akk., and Eth. equivalents may be included.

*HAL* 316a distinguishes the verb in Job 21:27 as *ḥms* II “to devise.”

2. The qal occurs 6x (Jer 22:3; Ezek 22:26; Zeph 3:4; Prov 8:36; Lam 2:6; in Job 15:33 of dropping fruits; excl. Job 21:27), the ni. 1x (Jer 13:22). The noun is more frequent: 60x (excl. Ezek 9:9, where some MSS have *ḥāmās* instead of *dāmîm*; Psa 14x, Prov 7x, Ezek and Hab 6x each, Gen and Jer 4x each).

3. (a) *ḥamas* is usually sg.; the pl. forms in 2 Sam 22:49 (Psa 18:49 sg.), Psa 140:2, 5 (v 12 sg.), and Prov 4:17 form attributive descriptions (“*ḥāmās* -full” man or wine) as an extension of the sg. form (*š ḥāmās*, etc.; cf. Prov 3:31; 16:29). As a rule, gens. accompanying nouns indicate the obj. of the violence (Judg 9:24; Joel 4:19; Obad 10; Hab 2:8, 17; with pron. suf., Gen 16:5; Jer 51:35), rarely the actor (Ezek 12:19; with pron. suf., Psa

7:17).

Prophetic diction often uses *šōd* “misdeed, destruction” as a synonym for *ḥāmās* (Isa 60:18; Jer 6:7; 20:8; Ezek 45:9; Amos 3:10; Hab 1:3; 2:17; *šōd* occurs a total of 25x in the OT, with the exceptions of Psa 12:6; Job 5:21f.; Prov 21:7; and 24:2 only in prophetic books; in addition, *šdd* qal “to destroy, rape” occurs 32x, ni. 1x, pi. 2x, pu. 20x, po. 1x, and ho. 2x, likewise almost exclusively in the Prophets, rarely in Psa, Job, and Prov, elsewhere only in Judg 5:27). The difference may lie in the fact that *šōd* emphasizes the active doing, *ḥāmās* the nature or consequence of the deed.

(b) Religious and a profane usage may not be strictly distinguished because *ḥāmās*, even if interpersonal, violates an order established or guaranteed by God (von Rad, *Theol.* 1:157n.34). Nevertheless, various aspects of the concept may be noted.

The word is anchored first in the legal sphere (R. Knierim, “*Cht* und *Chms*. Zwei Begriffe für Sünde in Israel und ihr Sitz im Leben” [diss., Heidelberg, 1957], 125ff.), but already had various usages there.

In the independent *ḥāmās* cry (Hab 1:2; Job 19:7; on Jer 20:8, see 4), von Rad (*Theol.* 1:157n.34), Knierim (op. cit. 129ff.), and H. J. Boecker (*Redeformen des Rechtslebens im AT* [1964], 60f.) see a cry of the legal community for legal protection (the opening of a hearing). Because Yahweh is addressed in both cases, however, these passages more likely deal with a direct cry for help (similarly, *šm*<sup>c</sup> ni. in Isa 60:18 and Jer 6:7 should also be understood as “to be heard by” [contra Knierim, op. cit. 131], because *ḥāmās* in Jer 6:7 is combined with *šōd* and Isa 60:18 speaks of foreign oppression).

The expression *‘ēdḥāmās* (Exod 23:1; Deut 19:16) probably indicated originally the plaintiff in a case of *ḥāmās* (not the witness who perverts justice; Deut 19:18 indicates explicitly after subsequent investigation that the accusation is false by *šeqer* “deceit”), but then in a shift of meaning generally the “violent, law-breaking witness.” *ḥāmās* may indeed have originally meant the misdeed that objectively burdens the land and disturbs its relationship and its inhabitants’ relationship to God, so that anyone who knows of it must appear as plaintiff before the legal community in order to divert the consequences (cf. H. J. Stoebe, *WD* 3 [1952]: 121ff.; on → *‘ēd* as “plaintiff” see also B. Gemser, *SVT* 3 [1955]: 130; contra Knierim, op. cit. 127f., although he emphasizes correctly the term’s connotation of a concept of an independent sphere of action, op. cit. 135). The law in Deut 19:15–19 also lies on the level of regulations concerning murder committed by an unknown hand (Deut 21:1–9), and the series of curses (Deut 27:15–26; cf. Lev 5:1) gives evidence of an advanced legal praxis concerned for legal certainty (Deut 19:15).

This element is also active where *ḥāmās* is combined with *ml*<sup>ʔ</sup> “to be

full” (land, city, and secondarily the temple; Gen 6:11, 13; Ezek 7:23; 8:17; 28:16; Mic 6:12; Zeph 1:9). If the land is full of *ḥāmās*, then the consequence for its inhabitants is punishment and destruction. This understanding is esp. clear in Gen 6:13; despite later testimony (P), it is not a late theologoumenon (contra Knierim, op. cit. 134), but the direct consequence of the original meaning.

A similar situation pertains where the *ḥāmās* procedure itself overtakes the perpetrator (Judg 9:24 with *bôʾ* “to come”; Psa 7:17 with *yrd* “to descend”), or *ḥāmās* is otherwise bound to *ʿal* “on” (Gen 16:5 J; Jer 51:35; Mal 2:16; Gen 16:5 seems ancient: the consequence of the *ḥāmās* that lies upon Sarai is barrenness; she lays it on Abram as cosufferer and thus characterizes the gravity of Hagar’s deed; cf. Knierim, op. cit. 134; von Rad, *Gen*, OTL [1972], 192).

4. The substance of such a *ḥāmās*, even in the Prophets, is the spilling of blood (Gen 49:5f.; Judg 9:24; Isa 59:6; Jer 51:35; Ezek 7:23; Joel 4:19; in Jer 22:3 *ḥms qal*) and presumably moral crimes (reference to this only in Jer 13:22 ni.) that pollute the land in the same way (Lev 18:28; 20:22) and also stand under the verdict of capital punishment in the law (e.g., Lev 20:11–18).

According to a promising suggestion by J. Berridge, *Prophet, People, and the Word of Yahweh* (1970), 152–54 (cf. also S. Marrow, *VD* 43 [1965]: 241–55), Jer 20:8 could be influenced by the preceding rape metaphor; *ḥāmās* would be the maiden’s cry for help (cf. Deut 22:24), not the cry for legal protection. Whether Prov 26:6 also belongs in this context (cf. Gemser, *HAT* 16, 94) may not be decided given the uncertainty of the text.

Now, independent spheres of action in the OT are to be delineated theoretically and not precisely, because the concept behind them is a borrowed form that does not itself demonstrate the essence of OT thought but is given new content (cf. N. H. Ridderbos, *GTT* 64 [1964]: 226ff.). The revelation unique to the OT focuses attention upon human responsibility in the relationship between Yahweh and his people. Thus the emphasis of the word lies on the perpetrator and his individual guilt. This analysis results less from the formulations (Isa 59:6; Ezek 12:19; Jonah 3:8; Mic 6:12; Mal 2:16; Job 16:17; 1 Chron 12:18, often with *yād/kap* “hand” in which there is *ḥāmās*; these texts could—even if with reservations—be included with the passages discussed earlier) than from the sphere of the acts so categorized. Combined with *bgd* “to act deceitfully” (Zeph 3:4; Mal 2:16; Prov 13:2; similarly 16:29 with *pṯh pi* “to delude”) *ḥāmās* characterizes the diminution of another’s rights and living space as violation of duty to the neighbor and encompasses the entire range of antisocial behavior (Amos

3:10) in opposition to justice and righteousness (Jer 22:3; Ezek 45:9). Arrogance (Psa 73:6), deceit (Zeph 1:9) in speech (Mic 6:12; cf. Prov 10:6, 11 and, conversely, the description of the servant's virtue in Isa 53:9), and, finally, improper legal proceedings (Psa 55:10; Hab 1:3 txt?) are named. Ezek 22:26 and Zeph 3:4 mention attacks on Yahweh's Torah (*ḥms* qal, subj., the priests). Yahweh himself turns against the *ḥāmās* that he hates (Psa 11:5), from which he delivers (2 Sam 22:3, 49 = Psa 18:3, 49; Psa 140:2, 5; cf. Psa 72:14, the king under Yahweh's commission), because of which one calls to him (Hab 1:2; Psa 25:19), and which he avenges (Ezek 7:23; 8:17f.; 12:19; 28:16; Zeph 1:9). If, paradoxically, *ḥāmās* comes from Yahweh himself (Job 19:7), there is no remedy for it.

Thus *ḥāmās* becomes an encompassing term for sin per se (Ezek 7:11; Jonah 3:8; cf. also the phrase *יֵשׁ ḥāmās/ḥ<sup>a</sup>māsîm*; see 3a). Characteristically, too, *ḥāmās* is practiced not only in Israel but also by foreign nations against Israel (Joel 4:19; Obad 10; Hab 1:9; 2:8, 17). This development is the context in which psalmic diction equates *עֵד שֶׁגֶר* "lying witness" and *עֵד ḥāmās* (Psa 35:11; cf. 27:12, → *kzb* 3a), an equation that was not original (see 3b).

5. In the Qumran texts *ḥāmās* finds little usage (Kuhn, *Konk.* 73c; also *GCDS* 256). On the LXX and the NT, cf. G. Schrenk, "ᾄδικος," *TDNT* 1:149–63; W. Gutbrod, "ἄνομία," *TDNT* 4:1085–87.

H. J. Stoebe

## חנן *ḥnn* to be gracious

S 2603; BDB 335b; *HALOT* 1:334b; *TDOT* 5:22–36; *TWOT* 694; *NIDOTTE* 2838

1. The root *ḥnn* "to be gracious (to someone), demonstrate goodwill," etc., is common Sem. (lacking in Eth.); it occurs verbally and in various nom. derivatives with meanings similar to the Hebr., e.g., in Akk. (*enēnu*, *AHW* 217, 219; *CAD* E:162–64), Amor. in PNs (Buccellati 134; Huffmon 200), Ug. (*WUS* no. 947; *UT* no. 882; Gröndahl 135f.), as a WSemitism in the Amarna Letters (EA 137:81; 253:24; cf. *CAD* E:164f.), in Phoen.-Pun. (*DISO* 91f.; PNs like Hanno, Hannibal, etc.: Harris 102f.), in Aram. (*DISO* 91f.; *KBL* 1076b), and in Arab. (Wehr 209).

Etymologically, *ḥnn* may be related to *ḥnh* "to bow oneself, lie down" (e.g., GB 243b; on *ḥannôt* in Psa 77:10 cf. GKC §67r and Nyberg 142: qal inf. from *ḥnn*; contra

HAL 319b: pi. inf. from *ḥnh* II) or to an older biradical root *ḥn* (D. R. Ap-Thomas, *JSS* 2 [1957]: 128).

The hapax legomenon *ḥnn* II “to stink” (Job 19:17) goes back to a root attested in Syr. and Arab. with an original *ḥ* as the first radical.

Apart from cases in which *ḥnn* is a name component (e.g., *ʿelḥānān*, *ḥannîʿēl*, *ḥʾnanyâ[hû]*, *ḥannâ*, etc., cf. *IP* 187), the root occurs verbally in the OT in the qal, pi., hitp., and po. stems, as a nom. in the subst. *ḥēn* “goodwill, grace” and *ḥʾnîḥâ* “mercy” (only Jer 16:13), as well as in the abstracts *tʿḥinnâ* and *taḥʾnûnîm/ôt* “pleading” derived from the reflexive stem (BL 495, 497), as an adj. in *ḥannûn* “gracious, friendly,” and as an adv. in *ḥinnām* “undeservedly, without reason, uselessly.”

The apparent ni. form *nēḥantî* in Jer 22:23 is a miswritten form of *ʾnh* “to sigh”; cf. BL 351; the apparent ho. forms *yūḥan* in Isa 26:10 and Prov 21:10 should be viewed as qal pass.; cf. BL 286 and the PN *ḥānûn*.

The ending *-ām* in *ḥinnām* should not be explained as mimation of an adv. acc. (as *GVG* 1:474; Meyer 2:39; cf. *UT* §11.4), but represents a fossilized 3d masc. pl. suf. (BL 529; cf. also H. J. Stoebe, *VT* 2 [1952]: 245).

2. The verb *ḥnn* occurs 78x in the Hebr. OT, specifically, 55x in qal (30x alone in Psa, incl. 77:10; Isa 5x, Gen, Job, and Prov 3x each), in the hitp. 17x, po. and ho. 2x, ni. and pi. 1x. The most frequent subst. is *ḥēn*, 69x (Gen 14x, Prov 13x, Exod 9x, 1 Sam and Esth 6x each; the concentration is in the narrative books [47x] and in wisdom [15x]; the word is rare in the Psa [2x] and the Prophets [5x]); then follow *tʿḥinnâ* (25x, 9x in 1 Kgs and 5x each in Jer and 2 Chron), *taḥʾnûnîm/ôt* (18x, 8x in Psa), and *ḥʾnîḥâ* (1x). *ḥannûn* occurs 13x (6x in Psa), *ḥinnām* 32x (Psa and Prov 6x each, Job 4x).

Bibl. Aram. pe. and hitp. occur once each (Dan 4:24 and 6:12, resp.).

3. Nontheological usages will be classified according to parts of speech: *ḥēn* (a-c), *ḥannûn* (d), verb (e-f), *tʿḥinnâ* and *taḥʾnûnîm* (g). For the whole group, see W. F. Lofthouse, “œen and œesed in the OT,” *ZAW* 51 (1933): 29–35; W. L. Reed, “Some Implications of œen for OT Religion,” *JBL* 73 (1954): 36–41; D. R. Ap-Thomas, “Some Aspects of the Root œNN in the OT,” *JSS* 2 (1957): 128–48; K. W. Neubauer, “Der Stamm CHNN im Sprachgebrauch des AT” (diss., Berlin, 1964).

(a) The noun *ḥēn* occurs exclusively in the sg. An esp. frequent formula in narrative texts is *mšʾḥēn bʿēnē* . . . “to find favor in the eyes of . . .

.” This phrase makes it clear that the prerequisite for such favor is not discrete acts but an attitude.

The noun therefore is also only rarely definite (determined): in Prov 31:30 by the article (there, however, *ḥēn* signifies “graciousness”), in Gen 39:21 by a pron. suf., in Exod 3:21; 11:3; 12:36 by a governing noun (here the formula is *ntn ḥēn b<sup>c</sup>ēnē* . . . “to create goodwill in the eyes of . . .,” in which Yahweh is the subj. of the verb, but the “*ḥēn* -attitude” is taken with the people, the prison guard, and the Egyptians). The expression *nś<sup>ʔ</sup>ḥēn b<sup>c</sup>ēnē* (Esth 2:15, 17; 5:2) represents a confusion of original linguistic boundaries (see also “before him” in Esth 2:17).

The formula under discussion (cf. Lande 95–97) expresses chiefly an interpersonal relationship, even in Gen 18:3; 19:19; Judg 6:17, where a conversation takes place with God or an angel, but which does not abandon the style of legendary narrative. More rarely, Yahweh is explicitly the subj. of *ḥēn*; these passages are for the most part limited to a characterization of Moses’ relationship with Yahweh (Exod 33–34; Num 11).

The one in whose eyes one finds *ḥēn* is always the superior, never vice versa (the king: 1 Sam 16:22; 27:5; 2 Sam 14:22; 16:4; 1 Kgs 11:19; Esth 5:2, 8; 7:3; the crown prince: 1 Sam 20:3, 29; the royal vizier: Gen 47:25). The formula presumably has roots in the style of court speech, but can then be applied in the course of a process of democratization to anyone who faces a weaker party as the superior (officer: Gen 39:4, 21; the stronger brother: Gen 32:6; the rich landowner: Ruth 2:2, 10, 13). Finally, the word merely signifies that the addressee can grant something that the supplicant desires quite independently (Gen 34:11; Num 32:5; 1 Sam 25:8). Even though, owing to the nature of the concept, boundaries are fluid here too, the formula still never becomes attenuated to a mere polite expression.

In Gen 50:4 Joseph could request the mediation of the court officials because he himself, unclean because of his father’s death, cannot go to Pharaoh (thus H. Holzinger, HSAT 1, 96). In Gen 47:29 the formulation of Jacob’s request in formal style is required by the high status of the son.

The origins of the expression in the sphere of courtly speech shine through the attestations of loyalty in address and self-presentation associated with it (cf. *ʾādôn* “lord,” Gen 18:3; 32:6; 33:8, 15; 47:25; 2 Sam 14:22; 16:4; *ʿebed* “servant,” Gen 19:19; Num 32:5; *šiphâ* “maiden,” 1 Sam 1:18; Ruth 2:13). To have found *ḥēn* is the prerequisite for stating a request (Gen 18:3; 47:29; 50:4; Exod 33:13; Judg 6:17; 1 Sam 20:29; 27:5), just as, conversely, a fulfilled request or an unexpected gift evidences the giver’s *ḥēn* (2 Sam 14:22; 16:4; Ruth 2:13).

As the behavior of a superior, *ḥēn* doubtlessly implies an element of condescension or partiality (N. H. Snaith, *Distinctive Ideas of the OT* [1964] 127–30). Still, it should be noted the phrase *mš<sup>ʔ</sup>ḥēn b<sup>°</sup>ēnāyw* accents “in his eyes” and not “find” (contra Lofthouse, *op. cit.*, who sees the chief characteristic of the phrase in the finding). This emphasis makes clear that the demonstration of *ḥēn* includes an evaluation of the other so that both, subj. and obj., are considered and both participate, even if in different roles, in the event (cf. H. J. Stoebe, *VT* 2 [1952]: 245). This participation is underscored when the formula is supplemented, admittedly in loose association, by an expression of perception (Ruth 2:10 *nkr hi.*; Esth 2:15 *r<sup>ʔ</sup>h.*; Zech 12:10 *nb<sup>ʔ</sup> hi.*).

This assessment can determine one suited for a given task. It becomes clear to Potiphar that the blessing that rests upon Joseph makes him suited for service (Gen 39:4); Saul keeps David at court because he recognizes his capabilities (1 Sam 16:22; the spontaneous attraction is expressed in v 21 by *ḥb* “to love”; cf. also 18:1); Nabal should recognize the helpful kindness of David’s people (1 Sam 25:8). This aspect becomes most clear in the marriage law in Deut 24:1: the marriage can be dissolved if the husband discovers “something undesirable” in his wife, i.e., he becomes aware of something that makes it impossible for her to find *ḥēn* with him and that is, in his judgment, a hindrance to marriage.

Nevertheless, weakness and pitifulness should be considered (care of the helpless is also a royal duty); the appearance of Jacob’s wives and children should change Esau’s mind (Gen 33:8). Zech 12:10 should also be seen in this context. The passage is difficult because the presupposed events are unknown. Juxtaposition with *taḥ<sup>ʔ</sup>nûnîm* does not signify that it is the human counterpart to God’s *ḥēn*. *ḥēn* is the emotion, the shock, at the sight of a martyr that leads one to *taḥ<sup>ʔ</sup>nûnîm* “pleading.”

In the original semantic range of the word, *ḥēn* is exercised by a king, whose obligations also included the protection of the unfortunate but whose interest in the qualifications of a subordinate can be quite varied. Thus there are always overtones of gracious condescension, although precise distinctions are impossible. One can no more say that *ḥēn* signifies a spontaneous demonstration of grace (Lofthouse, *op. cit.*, with a one-sided emphasis on the relationship of superiority and subordination; contra, rightly, Reed, *op. cit.* 39) than one can speak of a socially appropriate behavior in the sense of a legal right, arising from the good conduct of the partner (Neubauer, *op. cit.*). From the outset, “socially appropriate” is too imprecise, because everything that takes place between persons involves community in some way; the phrase is extremely nonspecific.

In the usage discussed to this point, *ḥēn* could be rendered “favor,” or even better, “consideration,” as well as “partiality.” These three terms encompass the semantic range of the word, the idea of a subordinate, who,

whether by the recognition of an accomplishment or by an unmotivated act of goodwill on the part of the lord, is elevated from the faceless masses and taken into consideration personally by the lord (cf. “I know you” Exod 33:12, → *yd<sup>c</sup>*).

(b) In the course of a development encountered esp. in wisdom diction, the association with the *b<sup>e</sup>ênê* “in the eyes of” a concrete other is lost; thus the expression’s focal point is shifted one-sidedly to the recipient, who becomes the possessor. The term acquires a more general meaning and simultaneously becomes static.

Even when, as in Prov 3:4, the formula still occurs, it loses concrete reference because of the breadth of the qualifier “before God and the people”; the softening of the form is also demonstrated by the coordination of the expression *šēkel tōb* with *hēn*, which should be understood, both here and elsewhere, as “success-bringing prudence” and not ad hoc as “approval.” More clearly, *hēn* without further qualification in Prov 13:15 is the result of such *šēkel tōb*; in 22:1 *hēn tōb* is a desirable good alongside a good name; in Psa 84:12 the par. is *kābôd* “honor.” Thus *hēn* becomes the objective reputation that one no longer “finds” but enjoys. This development is already apparent in Exod 3:21; 11:3; 12:36. The significance of *ʿeben hēn*, the talisman in Prov 17:8 which is otherwise difficult to categorize, seems also to lie in the direction of something readily available. The verbal form *yūhan* in Isa 26:10 probably also belongs here; the context should be understood (without textual emendation) as an abbreviated conditional clause (GKC §159c). It cannot mean that the godless find grace with Yahweh (that would be blasphemy); rather, it envisions the reputation that a godless individual enjoys and because of which one could doubt God’s righteousness.

(c) This shift of accent reaches a logical conclusion when *hēn* assumes the meaning “attractiveness, loveliness” as a visually perceptible personal or objective characteristic that can also involve the notions of success and fortune. Even if not exclusively (cf. Prov 11:16), this understanding occurs predominantly in the later collection, Prov 1–9 (1:9; 3:22; 4:9).

*hēn šēpātāyw* “attractiveness of his lips,” Prov 22:11, should be understood as the eloquence of the wise. Nah 3:4 and Zech 4:7 are related. Here the translations “lovely, lovely” (W. Nowack, *Die kleinen Propheten* [18971], 330) or “bravo, bravo” (E. Sellin, *Das Zwölfprophetenbuch* [1930], 501) seem appropriate (cf. also Stoebe, op. cit. 245), although “*Heil, Heil*” (Elliger, ATD 25, 117) seems too objective, and “grace, grace” (Sellin, op. cit. 504) too formal. In the event that *hyn* (*hîn*) in Job 41:4 is *hēn* with a *plene* spelling (König 107a), it also belongs here; but it is probably an unknown word.

(d) The adj. *hannûn* “gracious” refers to people only in Psa 112:4, and even there not unequivocally (cf. Kraus, *Psa*, CC, 2:362); in any case, it should be understood against the background of sacral usage (see 4b).

(e) The verb *hnn* qal “to show someone *hēn*” is not very common in

everyday usage. Although the traditional translation “to be gracious” better fits cases with God as the subj. of the demonstration of *ḥēn* (see 4c), the entire semantic range of *ḥēn* “goodwill, consideration, partiality” may be observed in profane diction, although the weak and suffering are generally the recipients of *ḥēn* (Lam 4:16, the aged, par. *nś’ pānîm* “to regard someone”; Deut 28:50, a boy; Psa 109:12, orphans).

In Job 19:21, Job does not expect grace or mercy from his friends, for they cannot alter his ill-fortune, but they could at least show consideration for it and cease their talk.

Deut 7:2 involves a more positive assessment. Here *ḥnn* does not indicate the consequence and content of the previously forbidden covenant making (as argued by Neubauer, op. cit., who finds confirmation here of his understanding of *ḥnn* as socially appropriate behavior); rather, one should neither make a covenant with the inhabitants of the land nor pay them any recognition whatsoever because they are great and mighty (v 1).

On the difficult passage Judg 21:22, cf. W. Rudolph, FS Eissfeldt (1947), 212 (read *ḥannônû ’ôtām* “we are sorry for them”); G. R. Driver, *ALUOS* 4 (1962/63): 22.

In Psa 37:21, 26 and 112:5, the qal ptcp. *ḥônēn* (par. *ntn* “to give” and *lwh* hi. “to lend,” resp.) was already correctly rendered by older scholarship as “to give.” One should not think here of mercifulness in the strict sense (as does e.g., Tholuck), but of generosity as a virtue (cf. Psa 112:4).

Prov 14:31 and 19:17 (indirectly also 28:8) bases the behavior required toward the neighbor on obligation to God. Thus the concept approaches the sacral use of *ḥēn*. The poor are named here as the objs. (*’ebyôn* 14:31; *dal* 19:17; 28:8; cf. *’ānî* 14:21 po.).

(f) Among the derived verb stems, *ḥnn* pi. “to make pleasant” and the po., similar to the qal in meaning, have only profane usages; in contrast, *ḥnn* hitp. “to request consideration, grace” occurs mostly in theological contexts.

Prov 26:25 pi. “to make (his voice) pleasant,” is reminiscent of the usage of *ḥēn* “attractiveness, loveliness” in Prov 1:9; 3:22; 4:9; 22:11. Thus the verb also participates in the noun’s full range of meaning (*HP* 269 understands the passage somewhat differently).

The po. in Psa 102:15 concerns not people but the ruins of Jerusalem that the servants of Yahweh mourn (par. *ršh* “to love”). As already in passages with the qal ptcp., the development of the term through which *ḥnn* becomes a moral good and an ideal for life may also be ascertained in Prov 14:21, “Blessed be he who has mercy on those who suffer.”

That *ḥēn/ḥnn* is not unilaterally oriented toward the one who demonstrates goodwill is underscored by the fact that the reflexive stem never means “to demonstrate oneself to be gracious” (cf. *ḥsd hitp.*). It expresses, first very generally, a request for attention, consideration, and then, in a broader sense, for grace. The specific content is determined by the specific situation, the position and the capacities of the one called upon.

In Esth 4:8 and 8:3, a demonstration of goodwill—i.e., grace—in opposition to the attacks of an anti-Jewish vizier is sought from the king. Gen 42:21 expects liberation from fear. In 2 Kgs 1:13, Obadiah pleads for consideration for his life and the lives of his people. In Job 19:16, the choice of the expression characterizes the reversal of the relationships; the lord accustomed to commanding must now plead. Job 9:15 complains about the same reversal, now in a legal procedure; the note of grace can already be heard quite loudly here, particularly because the opponent in the proceeding is God himself.

(g) Accordingly, noms. derived from the reflexive stem, *t<sup>e</sup>ḥinnâ* and *taḥ<sup>a</sup>nûnîm*, have the basic meaning “petition”; they occur mostly in the sacral area, rarely for interpersonal relationships.

In Prov 18:23 *taḥ<sup>a</sup>nûnîm* acquires meaning in opposition to *ṣazzôt* (→ *ṣzz*): the poor person pleads modestly. The same circumstance applies in Job 40:27 (synonymous parallelism). The precise understanding of *t<sup>e</sup>ḥinnâ* in Josh 11:20 is difficult. By consensus it is translated “mercifulness,” explained by Neubauer (op. cit. 53) against the background of covenant obligation. This understanding would actually be a departure from the norm (cf. Ap-Thomas, op. cit. 130, who consequently suggests an emendation to *ḥ<sup>a</sup>nîâ* “mercy”). One must ask whether the connotation “petition” may not be heard here too. The contrast is battle/attack–petition. Yahweh has arranged it such that they must immediately go forth to battle with no room for negotiations (petitions). The theological background of the concept strongly underscores grace in the word’s conceptual scope; but the context of Ezra 9:8, to which reference is frequently made, has another effect. In Jer 37:20; 38:26; and 42:9 *t<sup>e</sup>ḥinnâ* is an urgent petition to someone who can grant it.

4. Because the difference between God and people is immeasurable, the nuance of free grace assumes prominence when God is the counterpart. The believer’s concept of God is not determined by what one thinks about *ḥēn*; to the contrary, what one believes about and hopes and expects from God determines the content of (a) *ḥēn*, (b) *ḥannûn*, (c) *ḥnn qal*, (d) *ḥnn hitp.*, and (e) *t<sup>e</sup>ḥinnâ* and *taḥ<sup>a</sup>nûnîm*.

(a) *ḥēn* does not occur very frequently in theological speech. With the exception of Jer, it is entirely absent from the Prophets (on Nah 3:4 and Zech 4:7, see 3c; on Zech 12:10, see 3a). Perhaps the term did not appear to have a sufficiently theological profile.

From the outset, Gen 6:8 emphasizes the giver by stating no reason for the grace Noah finds (v 9 P is not a basis for v 8 J). Gen 19:19 accentuates the → *hesed*, the magnitude of which Lot experiences in undeserved deliverance and in which he recognizes that he has found the *hēn* that allows him to voice an additional request. 2 Sam 15:25 further underscores the freedom of the decision to grant grace by the contrary statement, “I am not pleased with you” (v 26). Exod 33:12ff. acquires its characteristic feature as a consequence of the fact that God himself, his presence on the journey, is requested, so that *hēn* signifies the full communication of his grace. The oscillation in the meaning of *hēn* in Exod 3:21; 11:3; 12:36 (see 3a) may also be understood on this basis. Jer 31:2 is textually difficult, but *hēn* is too profiled to be altered (Rudolph, HAT 12, 193). Most exegetes identify a conceptual relationship to Exod 33; assuming the correctness of this view, it still does not mean that *hēn* may be understood as a behavior within an established community (thus Neubauer, op. cit. 69). It is, rather, a promise of grace without prerequisite or limit. In addition to differences with respect to Exod 33, there are also points of contact, at least conceptually, with Gen 19:19 (cf. *hesed* in v 3). Correspondingly, the word *h<sup>a</sup>nînâ*, which occurs only once in the OT (Jer 16:13), approaches → *hesed*, or at least *rah<sup>a</sup>mîm* “mercy,” in content.

(b) Isolated *hannûn* “gracious” (Exod 22:26) is a constitutive characteristic of the king, who must have an ear open to the complaints of his subjects. This concept also echoes when *hannûn* is complemented by *saddîq* “righteous” (Psa 116:5); Psa 112:4 is uncertain with reference both to text and content, but it belongs, if only very generally, to this category. Otherwise, the combination with *rahûm* “merciful” is stereotypical; it is an established liturgical formula first encountered in the predication in Exod 34:6 (prepositive *hannûn*: Joel 2:13; Jonah 4:2; Psa 111:4; 112:4 txt?; 145:8; Neh 9:17, 31; 2 Chron 30:9; cf. Psa 116:5; postpositive: Psa 86:15; 103:8). It represents God’s presence for people in analogy to the actions of a lord (kings) as well as of a father (→ *rîm*), both from the standpoint of its polarity and from that of the promise inherent in it.

Reference should also be made to Mal 1:9 for this concept; the statement made here differs from the predication in that it more strongly accents the requirement under which it places people (cf. also Psa 103:12).

(c) The same notion occurs in Exod 33:19, where, in finite qal verbs, the name Yahweh is interpreted both with respect to content and to the sovereignty of divine action. The concept is also active in 2 Kgs 13:23 and Isa 30:18 (v 19 *hnn* alone in response to a cry of lament) and occurs, finally, in a reduced form in Isa 27:11, where the subjs. “his creation” and “who formed it” shatter the original bounds of the concept (cf. also Psa 102:14).

The impv. with suf. finds frequent usage in the liturgical diction of the

Psa as a cry of petition. Understandably, the meaning becomes more general here and loses its marked profile, yet here too the context is often informative. If a specific request follows *ḥonnēnî* “be gracious unto me” (Psa 4:2; 6:3; 9:14; 27:7; 30:11; 41:5, 11; 51:3f.; 86:16), the notion of inclination as a prerequisite for the petition can be heard more strongly. In addition, overlapping constructions in which the impv. follows such a specific request often occur so that *ḥnn* is understood more abs. (25:16; 26:11; 27:7; 30:11; 86:16). In the same way one must understand passages in which the cry for *ḥēn* stands alone (31:10; 56:2; 57:2; 86:3; cf. 123:2f. pl.). The development present here is marked in Psa 119:29.

The expression *w<sup>ē</sup>tôrāt<sup>ē</sup>kā ḥonnēnî* may hardly be understood as presentation of the Torah (so A. Deissler, *Psalm 119 und seine Theologie* [1955], 124f.; 123: “favor me”); this would be wisdom language, which should not be so understood with respect to God. Here the Torah is the substance of self-communication and favor. Vv 58 and 132 are also to be understood from this viewpoint.

In summary, the blessing formula in Num 6:25, “may he be gracious to you,” exemplifies the wish for Yahweh’s favor (Psa 67:2 is dependent). Characteristically, a justification for the request, a reference to the character of the supplicant, is frequently stated, either introduced with *kî* “for” (Psa 25:16; 31:10; 41:5; 57:2; 86:3; 123:3) or asyndetically (Psa 4:2; 9:14; 26:11; 27:7; 56:2; cf. Isa 33:2). A reference to the distress (Psa 4:2; 6:3; 9:14; 25:16; 56:2; probably also 102:14, “it is time”), less often to the personal piety, of the supplicant (Psa 26:11; 27:7?; 57:2; 86:3; 119:58; cf. Isa 33:2 and Mal 1:9) constitutes the content of this justification. Psa 41:5 “I have sinned against you” should be emphasized; the ultimate conclusion is drawn here: God is inclined to forgive.

Emendations (see *BH* 3, omitted in *BHS* ) are unnecessary because the same notion occurs in Psa 51:6 (cf. also Psa 103:3). Here the compass of the formula *ḥannûn w<sup>ē</sup>rahûm* (see 4b) receives clearest expression.

Outside this liturgical usage, the contexts become somewhat clearer.

In 2 Sam 12:22 the hope for the preservation of the child stands in relationship to David’s penitence (contra Hertzberg, *Sam*, OTL, 316). The same cautious “perhaps” occurs in Amos 5:15, where the “being gracious” of v 14 corresponds to “Yahweh will be with you”; in any case the sovereignty of the divine decision is preserved. In Gen 33:11 *ḥnn* is not merely “to give”; here too unexpected riches characterize the special attention of Yahweh. Job 33:24 diverges only formally, not substantively. Because of the guiding intervention of a mediator (*mal’āk mēlîš* v 23), the divine judge reaches a positive decision; the translation “has mercy” is not entirely correct.

The verb occurs in Gen 43:29, diminished to a greeting corresponding to Eng. “God be with you!” (cf. *ḥesed we<sup>c</sup>met*, 2 Sam 15:20).

(d) As in the profane realm, the content of the request is determined by the power of the one to whom it is addressed when *ḥnn* is used (cf. Deut 3:23, the reference to the prior demonstrations of Yahweh’s might). Often *ḥnn* hitp., together with *pll* hitp. “to pray” (cf. also Psa 30:9 with *qr<sup>v</sup>* “to call”; 142:2 with *z<sup>c</sup>q* “to cry”), becomes a general term for requests addressed to God (“to you” 1 Kgs 8:33; “before you” 9:3), while the accent lies here on the forgiveness sought. Occasionally, the possibility for such petition seems tied to particular prerequisites (1 Kgs 8:33, 47; 2 Chron 6:24, 37, repentance, return).

This requirement also stands in the background of Bildad’s orthodox reprimand in Job 8:5, where sincere seeking and petitioning go together and uprightness and integrity are requirements for being heard. Hos 12:5 remains unclear to some degree. Regardless of the question whether Hosea gives evidence here of a tradition other than Gen 32 (cf. Th. C. Vriezen, *OTS* 1 [1942]: 64–78), *ḥnn* hitp. is qualified, at least in the usual translation “he prevailed, he cried and pled” (contra Wolff, *Hos*, Herm, 212f.), by the contrast. Crying and pleading are the actions not of the victor but of the vanquished.

(e) Only once does *t<sup>e</sup>ḥinnâ* characterize an answered prayer (Ezra 9:8; cf. Ap-Thomas, op. cit. 131; see 3g). Otherwise it is generally the request that God hears (1 Kgs 8:30, 45, etc.; 2 Chron 6:35, 39; Psa 6:10), to which he turns (1 Kgs 8:28; 9:3), which he does not shut out (Psa 55:2), or which comes before him (Psa 119:170). Phrases involving the root → *pll* are common here too (1 Kgs 8:28, 30; Psa 6:10; 55:2, etc.).

Baruch’s diction in Jer 36:7; 37:20; 38:26; 42:2, 9 (see 3g) is characteristic; cf. also Dan 9:20 (v 18 *taḥ<sup>a</sup>nûnîm*). Phrases with *npl* hi. “to let fall” are meant to characterize particularly urgent pleading; one may ask whether an external association with *t<sup>e</sup>pillâ* may be involved here.

The same is true of *taḥ<sup>a</sup>nûnîm*; it also occasionally parallels *t<sup>e</sup>pillâ* (Psa 86:6; 143:1; Dan 9:3, 17; 2 Chron 6:21). In the Psa, it accompanies *qôl* “voice,” usually with suf., as a gen. and is dependent upon a term for hearing (Psa 28:2, 6; 31:23; 86:6; 116:1; 130:2; 140:7; 143:1). This combination probably expresses the urgency and bitterness of this pleading, as Jer 3:21 does through combination with *b<sup>e</sup>kî* “crying.”

Nonetheless, one should probably read Jer 31:9 with LXX *b<sup>e</sup>tanḥûmîm* (cf. Rudolph, HAT 12, 195); on Zech 12:10, see 3a.

5. The LXX usually, although not exclusively, translates *ḥēn* by *charis*,

*hnn* by *eleein* and rarely by *oiktirein*. This is not a strictly precise translation; it indicates the manner in which the content of the individual pronouncements of grace have assimilated to one another. Using these terms, NT proclamation unfolds the fullness of God's grace in Jesus Christ (see esp. R. Bultmann, "ἔλεος," *TDNT* 2:477–87).

## הָנַפַּ הַנִּפּ **to be perverted**

S 2610; BDB 337b; *HALOT* 1:335b; *TDOT* 5:36–44; *TWOT* 696; *NIDOTTE* 2856

1. The root is common in WSem. languages (Ug. *hnp* "impious," *WUS* no. 1053; *UT* no. 981; subst. and verb as Canaanisms in EA 288:8 "the villainy that they did," and 162:74 "who knows villainy"; cf. *AHw* 320a, 321a; *CAD* H:76b, 80f.; on later languages, see 3; cf. *HAL* 322).

The Hebr. root occurs in the intrans. qal and in causative hi., as a verbal adj. *hānēp*, and in two nom. abstract forms, the segholate noun *hōnep* and the fem. form *h<sup>a</sup>nuppâ* (BL 467).

2. All 26 occurrences appear exclusively in poetic or elevated language: qal 7x (Isa 24:5; Jer 3:1[bis], 9; 23:11; Mic 4:11; Psa 106:38), hi. 4x (Num 35:33[bis]; Jer 3:2; Dan 11:32), *hānēp* 13x (8x in Job, 3x in Isa, as well as Psa 35:16; Prov 11:9), *hōnep* 1x (Isa 32:6), and *h<sup>a</sup>nuppâ* 1x (Jer 23:15).

3. A specific basic meaning "to be twisted, crooked" can be inferred from the Arab. *hanifa* "to have a twisted foot" and *hanafa* "to turn to the side" (conjectured by G. R. Driver, *TZ* 9 [1953]: 468f. for Psa 35:16 *b<sup>c</sup>hanpî* "at my limp"; cf. *HAL* 322b and *BHS*; perhaps still evident in Mic 4:11 "[Zion] wil be turned [profaned]"); nevertheless, the fig. meaning, qal "to be perverted," hi. "to pervert," dominates otherwise (cf. Mid. Hebr. and Jew. Aram. "to dissemble," Syr. *hanpā* "godless person, heathen," Eth. *hōnāfī* "heathen, heretic," etc.).

The meaning "to be perverted" (hi. "to pervert") is recognizable in all occurrences of the verb (Dan 11:32, seduction to apostasy; Jer 23:11, prophet and priest; Mic 4:11, Zion; in the remaining cases the land is either the subj. or the obj. in typical expressions of priestly theology). Perversion is either legal in nature (bloodguilt, Psa 106:38; Num 35:33; violation of the commandments, Isa 24:5; cf. the context vv 3f., according to which the dissolution of the world order is a consequence of the perversion of the

land), or it is complex (legal-social-moral-cultic), as in Jer 3:1f., 9, where *ḥnp* refers to the perversion of a—legally definable—social relationship:

the land belongs to strange gods instead of to Yahweh, as the wife belongs to another husband instead of to her original husband. Num 35:33 similarly describes the way in which the land is perverted if bloodguilt remains unatoned.

The substs. also give evidence of the basic meaning “perversion”: Jer 23:15b cites *ḥōnep* as the reason for judgment reflecting the character of the announcement; Isa 32:6 parallels “to do *ḥ<sup>a</sup>nuppā*” with “to speak perversion (*tô<sup>‘</sup>â*). “

Adjs. in Isa imply the meaning “perverted” (Isa 9:16; 10:6; 33:14; cf. also Prov 11:9), while Psa 35:16 txt? and esp. Job (Job 8:13; 13:16; 15:34; 17:8; 20:5; 27:8; 34:30; 36:13) use the word in the parameters of poetic language in contexts broadened beyond the original situation (cf., nevertheless, 15:34 *ḥānēp* together with “tent of corruption”). The adj. in particular, then, merely presupposes the root’s backgrounds and uses it as a general repudiation. Of the usual translations, “wicked, wickedness” (hardly “godless, evildoer”) commends itself to the degree that the basic meaning “perverted, to be perverted” no longer corresponds to the semantic referent.

4. In all occurrences, the word more or less signifies a theological judgment. Whether perversion occurs in the legal (see 3), social (Prov 11:9), cultic (Isa 24:5), moral, or political (Job 34:30) realms, whether it consists of deeds (Isa 9:16; 32:6) or words (Psa 35:16; Prov 11:9), it always distorts given orders of existence. This ontological dimension of the straight, healthy, and true that perversion implies lends it the heavy weight of the basic distortion of the world order. The formula of the “perversion of the land,” which takes place in individual deeds, may also be understood against this background. But because God is understood in ancient and biblical thought in relation to the maintenance of the world order, any “perversion” signifies the dissolution of the world order in the ultimate sense, i.e., God’s significant presence in it. This notion explains the fact that God himself turns the world around in judgment after it has been thoroughly perverted by people (Isa 24:5). The designation of such a phenomenon by the root *ḥnp* is, in every case, the condemnation of a profound transgression against God.

5. The usage of *ḥōnep* in 1QS 4:10 in the list of the characteristics of the “spirit of evil” is more reminiscent of psychological “perversion” than of “godlessness.”

The LXX did not know how to handle the Hebr. concept. This confusion is shown not only by the thoroughly inadequate translation, but in particular also by the multitude of substitute terms.

R. Knierim

## חֶסֶד *ḥesed* kindness

S 2617; BDB 338b; HALOT 1:336b; TDOT 5:44–64; TWOT 698a; NIDOTTE 287b

I. 1. The root occurs only in Hebr. and Aram. Although the positive meaning (“kindness, grace”) dominates in Hebr. and the negative (“shame”) occurs only in Lev 20:17 and Prov 14:34 (cf. also Sir 41:22, margin; 1QM 3:6; *ḥsd* pi. “to abuse” Prov 25:10; Sir 14:2; on Psa 52:3, cf. C. Schedl, *BZ* 5 [1961]: 259), this negative sense dominates in Syr. (*LS* 245; understandably both options are available in Christ. Pal. Aram.; cf. F. Schulthess, *Lexicon Syro-palaestinum* [1903], 67f.). The question remains open as to whether this duality is the result of reciprocal linguistic influence (Hebraisms or Aramaisms; so e.g., F. Schulthess, *Homonyme Wurzeln im Syrischen* [1900], 31; Nöldeke, *NB* 93; Wagner nos. 105f.), whether Hebr. and Aram. had both meanings from the beginning (U. Masing, “Der Begriff œESED im atl. Sprachgebrauch,” *FS Kopp* 32), whether there were divergent developments of (antithetical) meanings of a single root (e.g., *NB* 93; cf. also R. Gordis, *JQR* 27 [1936/37]: 58), or whether two different roots, which happened to be antonyms, have coalesced (Schulthess, *op. cit.* 32).

The etymology is obscure. A relationship to Arab. *ḥašada* “to gather to give aid” is possible (Schulthess, *op. cit.* 32; N. Glueck, *Das Wort ḥesed...* [1927], 67f. = *id.*, *Hesed in the Bible* [1967], 106f.; *HAL* 323a), but not so certain that one may draw semantic conclusions from it (cf. the deliberations of Schulthess, Nöldeke, Masing, and the reference to the fact that a uniform conversion of *š* [corresponding to Arab. *š*] to *s* would be remarkable).

2. In addition to the subst. *ḥesed*, the OT has the adj. *ḥāsîd* (also attested once in Pun.: *KAI* no. 145.7; *DISO* 93; on the nom. form see IV/6b), as well as *ḥ<sup>a</sup>sîdâ* (Lev 11:19; Deut 14:18 in a list of unclean animals; Jer 8:7; Zech 5:9; Psa 104:17; Job 39:13), customarily translated “stork,” probably because of the qualities generally attributed to this animal (cf. F. S. Bodenheimer, *Animal and Man in Bible Lands* [1960], 61; and G. R. Driver, *PEQ* 87 [1955]: 17); further, the denominative verb *ḥsd* hitp. “to behave as a *ḥāsîd*” (2 Sam 22:26 = Psa 18:26).

PNs are *ḥesed* (1 Kgs 4:10), an abbreviation of *ḥ<sup>a</sup>sadyâ* (1 Chron

3:20; cf. *IP* 183; *HAL* 323b); on *yûšab-ḥesed* (“may grace be returned”), cf. Rudolph, *HAT* 21, 29f. (contra *IP* 245).

II. 1. *ḥesed* occurs 245x in the OT in the following distribution: Psa 127x, 2 Sam 12x, Gen 11x, Prov and 2 Chron 10x, Isa 8x, Jer and Hos 6x; further 5x in 1 Kgs, Neh, 1 Chron; 4x in Exod, 1 Sam; 3x in Deut, Josh, Mic, Job, Ruth, Ezra; 2x in Num, Judg, Jonah, Lam, Esth, Dan; 1x in Joel and Zech.

Four of eight occurrences in Isa fall to Deutero-Isa and three to Trito-Isa. Isa 16:5 is hardly authentically Isaianic and, in addition, it bears a wisdom character (cf. Prov 20:28) in its formulation, despite a messianic intention (cf. Isa 9:6).

Exod 20:6; 34:6f.; and Deut 5:9f. contain a marked formula, also echoed in Num 14:18f.; Joel 2:13; Jonah 4:2; Mic 7:18; Neh 9:17; and with variations in Dan 9:4; Neh 13:22 (probably also echoed in very abbreviated form in Mic 7:20).

1 Chron 17:13; 19:2(bis); 2 Chron 1:8; 6:14; 24:22 correspond to their originals (Sam– Kgs). 1 Chron 16:34, 41; 2 Chron 5:13; 6:42 (cf. Isa 55:3); 7:3; 20:21 bear a hymnic character (Ezra 3:11 too).

Thus the word is at home in the narrative literature and in wisdom, but esp. in the diction of the Psa. This distribution coincides to a degree, but not entirely, with its profane and religious usages, resp. It is absent from P and subsides to a surprising degree in the Prophets. It is theologically constitutive only in Hos, Jer, and, with altered connotations, in Deutero-Isa too.

2. The usage of *ḥāsîd* corresponds to this division with even clearer boundaries (32x, 25x in Psa; *ḥsd* hitp. 2x).

This term occurs 28x in psalmic prayers (incl. 1 Sam 2:9; 2 Sam 22:26 = Psa 18:26; 2 Chron 6:41). Closely related is the Levitical saying in the Mosaic blessing, Deut 33:8. The term occurs once in wisdom (Prov 2:8) and only twice in the Prophets (Jer 3:12 and Mic 7:2, used of God only here).

III. The word *ḥesed* (on *ḥāsîd* see IV/6) is only insufficiently rendered by the Eng. term “kindness.” This insufficiency (summarized in III/8) is demonstrated both by observations—beginning with phrases involving *ḥesed* (III/1), in the context of the literature on the subject (III/2), concerning grammar and semantics (III/3), and the history of the meaning of *ḥesed* within its semantic field (III/4)—and by the examination of its profane (narrative literature, III/5; wisdom and Psa, III/6; Chron and related works, III/7) and theological usages (IV/1–5).

1. (a) *ḥesed* often accompanies <sup>ᶜ</sup>*met* “faithfulness” (→ <sup>ᶜ</sup>*mn* E.III/2, 4; IV/2) in the phrase *ḥesed we<sup>ᶜ</sup>met*, or the like (Gen 24:27, 49; 32:11; 47:29;

Exod 34:6; Josh 2:14; 2 Sam 2:6; 15:20; Psa 25:10; 40:11f.; 57:4; 61:8; 85:11; 86:15; 89:15; 115:1; 138:2; Prov 3:3; 14:22; 16:6; 20:28). But both words also occur in marked distinction from one another (Hos 4:1; Mic 7:20; Psa 26:3; 57:11; 69:14; 108:5; 117:2), so much so that they apply to different subjects (1 Kgs 3:6; Isa 16:5), and often, also usually in loose association, the cognate <sup>ע</sup>*mûnâ* takes the place of <sup>ע</sup>*met* (for texts → <sup>ע</sup>*mn* D.III/8). With few exceptions (Hos 4:1; Mic 7:20, justified by the content; Psa 89:25), the sequence of the expressions is maintained.

Combination with → *b<sup>ע</sup>rit* is not so common and is limited to a narrower selection of OT literature. It occurs in Deut 7:9, 12 and texts dependent upon it, 1 Kgs 8:23; Neh 1:5; 9:32; 2 Chron 6:14; and Dan 9:4. There is no fixed expression to serve as a model, so the sequence of the terms can vary (Psa 89:29; cf. also Isa 55:3).

(b) Another aspect of *hesed*'s semantic range is underscored when it is used in a more limited (Jer 16:5; Hos 2:21; Zech 7:9; Psa 25:6; 40:12; 103:4; Dan 1:9) or loose manner (Psa 69:17; Lam 3:22 txt?; cf. v 32 *rhm* pi.) with *rah<sup>א</sup>mîm* "mercy" (→ *rhm*). This phenomenon is characteristically limited to a narrow sample; it is absent from both the wisdom and narrative literatures. Despite pars. in content with *rah<sup>א</sup>mîm* (see III/4), *hesed* is distinct from it in that *hesed* is not only unilateral (an act of the superior toward the weaker/child/sinner) but also bilateral, so that even in some theological statements, admittedly very limited, the human being can demonstrate *hesed* toward God (see IV/3; fundamentally different, A. Jepsen, *KerD* 7 [1961]: 269).

(c) In contrast to → *hēn* "goodwill," *hesed* occurs with pron. as well as (less frequent) nom. complements in the gen. (e.g., 1 Sam 20:14; Psa 21:8; 52:10), always indicating the one doing *hesed* (the text of Psa 59:11, 18 is to be emended [cf., however, J. Weingreen, *VT* 4 (1954): 55], as is Psa 144:2). Thus the two words are not used synonymously; when the two occur together, a distinction should be made (contra Masing, op. cit. 50) between the style of address (*hēn*) and the content of the request (*hesed*).

The single exception is Esth 2:17, "She (Esther) gained his favor and affection"; however, this is a later, leveled usage of *hesed*, already perceptible in v 9, where *hesed* appears alone in an expression using the verb *nś* "to carry away, gain."

2. (a) Constructions with <sup>ע</sup>*met*, <sup>ע</sup>*mûnâ*, and *rah<sup>א</sup>mîm*, as well as the pronounced demarcation of texts in which they, as well as the word *hesed* alone, appear, underscore the theological weight of the term. Accordingly, the literature concerning *hesed*, its history, and the development of its meaning is extensive. The discussion since N. Glueck (op. cit. [Ger. original 1927]) has been presented in the Eng. ed. (1967), with extensive

references, by G. A. Larue (“Recent Studies in *Hesed*,” 1–32).

According to Glueck, *hesed* does not refer to a spontaneous, ultimately unmotivated kindness, but to a mode of behavior that arises from a relationship defined by rights and obligations (husband-wife, parent-child, prince-subjects). When *hesed* is attributed to God, it concerns the realization of the promises inherent in the covenant. When *hesed* does assume connotations of kindness, it is the result of a secondary assimilation to *rah<sup>a</sup>mîm* ([1967], 83f.). Furthermore, this view means that the formulation *hesed we<sup>e</sup>met* should be construed as a hendiadys (p. 102).

(b) This position, in which Glueck was preceded by I. Elbogen (“*hsd*, Verpflichtung, Verheissung, Bekräftigung,” FS Haupt 43–46), was very influential, esp. owing to its emphasis on the covenant idea (cf. e.g., K. Galling, *TLZ* 53 [1928]: 561f.; W. F. Lofthouse, “œen and œesed in the OT,” *ZAW* 51 [1933]: 29–35; Eichrodt 1:232–39; R. Bultmann, *TDNT* 2:479–82; Köhler, *Theol.*, 183, 250n.148; KBL 318; J. A. Montgomery, “Hebrew *Hesed* and Greek *Charis*,” *HTR* 32 [1939]: 97–102; N. H. Snaith, *Distinctive Ideas of the OT* [1944], 94–130; A. Neher, *Prophetic Existence* [1969], 262–73; A. R. Johnson, FS Mowinckel 100–112; E. E. Flack, “Concept of Grace in Biblical Thought,” FS Alleman 137–54; K. Koch, “Wesen und Ursprung der ‘Gemeinschaftstreue’ im Israel der Königszeit,” *ZEE* 5 [1961]: 72–90; cf. the exegeses of individual texts too). It did not go uncontested, however (cf. e.g., F. Asensio, *Misericordia et Veritas, el Hesed y’Emet divinos, su influjo religioso-social en la historia de Israel* [1949]; independently, H. J. Stoebe, “Gottes hingebende Güte und Treue: Bedeutung und Geschichte des Begriffes *Hesed*” [diss., Münster, 1950]; id., “Die Bedeutung des Wortes *hsd* im AT,” *VT* 2 [1952]: 244–54; R. J. Kahn, *Religion in Life* 25 [1955–56]: 574–81; A. Jepsen, “Gnade und Barmherzigkeit im AT,” *KerD* 7 [1961]: 261–71; finally, U. Masing, “Der Begriff œESED im atl. Sprachgebrauch,” FS Kopp 27–63).

(c) Now it is certainly true that *hesed* necessarily involves community to the extent that it is interpersonal. This observation, however, does not yet contribute to an understanding of the requirements for the origination of or the essence of *hesed* itself. It seems that the term “community” has been formalistically overvalued here—a danger that exists elsewhere as well—and thus ultimately becomes rigid.

One must always remember that the undisputed necessity for establishing structures for life and law, which distinguish between past and present, occupy only a very broad framework that must be filled by the human element, which does not so clearly distinguish between past and present (cf. Jepsen, op. cit. 267; Masing, op. cit. 45). The universal human conviction that the distinctive features of modern life formerly would have been simply unthinkable seems here, indeed, unconsciously, to stand in the

background.

This assessment means that individual texts may be polyvalent according to the formal presupposition one uses in exegesis. Consequently, in view of the term's shades of meaning, one must attempt a few sufficiently objective semasiological observations at the outset (on this question, cf. esp. Stoebe, diss. 6ff.). Naturally, one may expect no assured results from this effort, but only aids and criteria for exegesis.

3. (a) The noun occurs in the sg. and the pl. To the extent that one can arrange the passages chronologically, the pl. forms are of exilic and post-exilic origin (Isa 55:3; 63:7[bis]; Psa 17:7; 25:6; 89:2, 50; 106:7, 45; 107:43; 119:41; Lam 3:22, 32; Neh 13:14; 2 Chron 6:42; 32:32).

Gen 32:11 J, "I am too insignificant for all the mercy (pl. of *hesed* with art.) and all the faithfulness (*emet*) that you have done for your servant," constitutes an exception. In this passage, *hesed* does not appear in a formula, yet it is closely tied to *emet*. This combination is indeed unusual, but it is qualified here by *kōl* "all." The suggestion that the phrase results from dittography of the following *umikkōl* (O. Procksch, *Gen*, KAT [19243], 191; as well as Stoebe, diss. 139) does not seem convincing. More likely, one must reckon with the possibility that these statements have been transformed in harmony with a later understanding and in accord with their confessional character.

This phenomenon may be construed as an indication that *hesed* is a more comprehensive concept manifest in individual ways. It must be observed in this regard that sg. and pl. can parallel one another even in the Psa (e.g., Psa 106:1, 7, 45). This comprehensiveness does not mean, however, that *hesed* is a characteristic or even an attitude. Even the sg. can be determined with the art., a phenomenon that indicates specific content, the prerequisite for the pl. forms.

Of the passages with the art., Gen 21:23; 2 Sam 2:5; 1 Kgs 3:6; and 2 Chron 24:22 refer to a previously demonstrated *hesed*, in Jer 16:5 the art. replaces the poss. pron.; Psa 130:7; Prov 20:28; and Isa 16:5 remain undetermined. It may be particularly characteristic that the art. occurs when *hesed* appears with *brît* (Deut 7:9, 12, etc.).

(b) The noun is often constructed with the verb *śh* "to do." This construction occurs primarily in the older narrative literature, but is not entirely absent from the Prophets and the Psa, even though it abates (Gen 19:19; 20:13; 21:23; 24:12, 14, 49; 32:11; 40:14; 47:29; Exod 20:6; Deut 5:10; Josh 2:12[bis], 14; Judg 1:24; 8:35; 1 Sam 15:6; 20:8, 14; 2 Sam 2:5f.; 3:8; 9:1, 3, 7; 10:2[bis] = 1 Chron 19:2[bis]; 1 Kgs 2:7; 3:6 = 2 Chron 1:8; Jer 9:23; 32:18; Zech 7:9; Psa 18:51 = 2 Sam 22:51; Psa 119:124; Job 10:12; Ruth 1:8). This distribution indicates the concreteness of the concept associated with *hesed*, but it transcends the individual deed through the

regularly accompanying *ʿim* “to, with.” Thus the semantic range of the word reaches beyond this specificity. The expression “to keep (*nšr*) *ḥesed*” (Exod 34:7; formulated negatively in 2 Sam 7:15) shifts the weight more heavily to the side of the promise inherent in an attitude.

The phrase with *ʿmet* characteristic of this context elsewhere is absent from Exod 34:7. Passages with *šmr* “to keep” may also be mentioned here (Deut 7:9, 12; 1 Kgs 8:23 = 2 Chron 6:14; Hos 12:7; Psa 89:29 [*šmr* par. *ʿmn* ni.]; Neh 1:5; 9:32).

(c) *ḥesed* as an attitude is expressed with special clarity by means of a prep. designating it as the criterion of a hope or expectation (with *ke* “according to”: Gen 21:23; Psa 25:7; 51:3; 109:26; 119:88, 124, 149, 159; cf. Num 14:19 “according to your great goodness”; with *lʿmaʿan* “for the sake of”: Psa 6:5; 44:27; with *ʿal* “on account of”: Psa 138:2; finally, the *be* “in” of Exod 15:13; Psa 31:17; 143:12 belongs here too).

In reality, of course, the two aspects should not be as keenly distinguished as they have been here for the sake of illustration. An attitude that is not demonstrated remains theoretical; any pronouncement that does not characterize the essence of that which it expresses remains a contingency that does not affect the human sphere. The Eng. “kindness” offers an analogy. This word also encompasses both the demonstration and its precondition (cf. Stoebe, diss. 49; Jepsen, op. cit. 266).

4. (a) This special nuance explains the juxtaposition of *ḥesed* with *rahʾamîm* “mercy” (cf. III/1b), with *ḥesed* as the initial term (Psa 40:12 is the only apparent exception), and the whole phrase should be read as an indication that the *rahʾamîm* acts are the manifestation of a *ḥesed* attitude, as the par. *šedeq ūmišpāt* “right and justice” makes apparent. In this meaning of *rahʾamîm*, then, the pl. form *hʾsādîm* itself appears, apparently in later times (see III/3a). When it is associated with *rahʾamîm* (Psa 25:6; Isa 63:7), *rahʾamîm* assumes the leading position. Even though this basis is relatively limited, one may still recognize that *rahʾamîm* is now perceived as the stronger, governing term.

(b) To the extent, then, that one can speak of a blurring of the linguistic boundaries between *ḥesed* and *rahʾamîm*, it seems to have resulted in more of a limitation than an expansion of meaning. This limitation may also explain why *ḥesed* is often augmented and underscored by *tûb* “goodness” or → *tôb* “good” only in the later texts (cf. Exod 33:19 with 34:6; Isa 63:7; Psa 69:17 read *kʿtûb* for *kî tûb*; cf. Kraus, Psa, CC, 2:58f). The two expressions accompany each other in Psa 25:7 too, although *tûb* as good gift does not seem to limit the essential meaning of *ḥesed* here. By contrast, *ḥesed* becomes one of the expressions of

Yahweh's being, describing his goodness in the regularly recurring liturgical formula "for he is good (*tôb*), his kindness (*hesed*) endures forever," etc. (Psa 100:5; 106:1; 107:1; 118:1–4, 29; 136:1–26; Ezra 3:11; 1 Chron 16:34, 41; 2 Chron 5:13; 7:3, 6; 20:21). This usage is further characterized by the fact that *l'ôlām hasdô* "his *hesed* endures forever" apparently represents <sup>e</sup>*met*, both formally as well as substantively, in the formula *hesed we<sup>e</sup>met*.

Although the Tg. and the Syr. consistently render *rah<sup>a</sup>mîm* with the same root, the Tg. retains the *hesed* of its original in only about 50 cases (Syr. only some 12x). The translation *rah<sup>a</sup>mîn* plays some role (Tg. less frequently, Syr. 36x); but in most cases *hesed* is rendered by a derivative of *tāb* (about 130x each), for which, however, no governing principles can be identified. Here, too, there is a coincidence of sg. and pl. forms; version and original, however, do not always agree as to number (Stoebe, diss. 54ff.).

5. (a) The observations offered to this point concerning the occurrence of the term, its development and delimitation, and elucidating supplementations of it allow the conclusion, for the present still indefinite, that *hesed* means some special reciprocal behavior, something that exceeds the matter of course. This conclusion may be demonstrated and substantively illustrated in detail by a survey of passages, esp. in narrative literature, in which *hesed* is exercised in the interpersonal realm.

In this regard, one must first ask whether *hesed* has such a "profane" usage in the proper sense. The word is already used in the oldest texts for God's attitude toward humans, so that alternating influences are altogether possible. This reciprocity does not mean, however, that what at first could be said exclusively of God was extended to the purely human realm (so, apparently, Jepsen, op. cit. 269), because the so-called profane usage dominates in older narrative historiography itself (Stoebe, VT 2 [1952]: 248).

Of the 11 occurrences in Gen, 6 characterize a human action (Gen 20:13; 21:23; 24:49; 39:21; 40:14; 47:29), 5 a divine action (19:19?; 24:12, 14, 27; 32:11). One may say with a degree of confidence that the latter passages are exclusively Yahwistic.

(b) 1 Kgs 20:31 seems to be relatively free of such influence. Here *hesed* is indisputably the unexpected, which one may not properly count on. Indeed, it permits the realization of a treaty but is not itself a provision or condition of this treaty. 2 Sam 2:5, an old, unreflected tradition, points in the same direction. The determination of *hesed* already characterizes the Jabeshites' action as something extraordinary that exceeds "repayment" (so Glueck, op. cit. 53f.) and that, in terms of the difficulty and danger

involved, expresses a deep humanity (as Neher, op. cit. 263, correctly observes); it is certainly rooted in thankfulness but is something entirely distinct.

Similarly, the burial of one's father is self-evidently a filial duty (L. J. Kuypers, *Int* 18 [1964]: 4); in Gen 47:29, however, Jacob asks for a kindness that exceeds this duty. Saul does not call his warning to the Kenites *hesed* (1 Sam 15:6); the *hesed* to which he refers was a kindness directed to him, not a duty. Likewise in 2 Sam 10:2, where the word is even used of both sides, it can mean nothing other than to repay kindness with kindness; that David's behavior can be misunderstood shows how unexpected it was. In 2 Sam 3:8, Abner represents his care for the weak Ishbaal as pure kindness that would be difficult to justify under the circumstances. One can naturally ask whether 2 Sam 16:17 refers to sacrificial kindness or loyalty. But even here, Absalom's charge should be understood as biting irony: You are a fine friend! David has his special friendship with Barzillai in mind in 1 Kgs 2:7 when he demands *hesed* for his sons. His gratitude to the father is so great that it results in kindness to the sons.

Gen 39:21 is instructive. Yahweh directs *hesed* to Joseph—not Yahweh's own *hesed*, of course (it would not be expressed by *nth* hi.), but that of other people; their hearts fall to Joseph, he finds goodwill. The special consideration (*hēn*, → *hnn* 3a) of the jailer is separate from this *hesed*. Similarly, no duty exists in Gen 40:14 for the cupbearer to mention Joseph, for Joseph did him no actual service by interpreting his dream (thus, correctly, Neher, op. cit. 263). The tenor of Gen 20:13 is precisely that by asking for *hesed*, Abraham requests something that exceeds a wife's duty. If he reminded Sarah only of her duty, the entire statement would be superfluous (see the analogy in Gen 24:49).

In Josh 2:12, Rahab describes her assistance to the spies as *hesed*, if one thinks here of the duties of hospitality, then a severe tension results, for Rahab violates the vital interests of the city, whose toleration and protection she enjoys. She justifies her actions theologically too, then (vv 9–11). Here *hesed* is a helpful kindness in the hope that it will be reciprocated (the situation in Judg 1:24 is similar, where *hesed* is promised as a reward). An obligation arises only (subsequently!) through the oath. Likewise, Abimelech's freely exhibited *hesed* in Gen 21:23 is a prerequisite for the oath demanded of Abraham, not vice versa (so too Jepsen, op. cit. 265).

1 Sam 20:8, which indeed relates *hesed* to a Yahweh *b<sup>e</sup>rît*, is indisputably difficult (cf. also v 14 *hesed yhw*). 2 Sam 9:1, 3, 7, where v 3 speaks directly of a *hesed <sup>o</sup>lōhîm*, refers to this covenant again. The danger is particularly imminent of overvaluing this instance formalistically (Glueck, op. cit. 46f.). Finally, *hesed* describes here, too, the spontaneous demonstration of a sincerely friendly attitude. The addition of the divine name (1 Sam 20:14; 2 Sam 9:3) should be understood in terms of the scope of the means involved that actually exceed human capability (cf. D. W. Thomas, *VT* 3 [1953]: 209ff.).

The combination of *ḥesed* with *gd/ hi*. “to cause to become great” in Gen 19:19 is unusual. Glueck’s explanation (op. cit. 43f.), that Lot calls his action self-evidently “great” because he recognized his guests to be angels, is insufficient. Rather, in this way *ḥesed* is distanced from any resemblance to human behavior. The story presupposes the duties of hospitality. The guests were certainly also obligated to protect the host if possible; this protection took the form of blinding the Sodomites. Deliverance from imminent destruction is grace and lies on another plane.

Judg 8:35 does not permit one to say whether an aspect of obligation is included in unexercised gratitude. Ruth 3:10 is generally, even if not universally (Kuyper, op. cit. 5), interpreted as an act of devoted love. It is also noteworthy that *ʾemet* joins *ḥesed* in three passages (Gen 24:49; 47:29; Josh 2:14), namely where the demonstration is expected in the future or at least includes the future.

6. (a) *ḥesed* is also used mostly of interpersonal relations in wisdom. The difficulty lies in the fact that the gnomic statements reflect no realizable situation.

It is clear to some extent, when Prov 31:26 even praises the clever wife for it, that *tôrat-ḥesed* is on her lips (par. “in wisdom”). One must see this as a self-denying generosity of speech. The translation “lovely speech” (assimilation of *ḥesed* to *ḥēn*) in a relatively late text is improbable from the outset in view of v 30; the interpretation “loving” remains the sole possibility.

Likewise, the *ʾiṣ ḥesed* in Prov 11:17 opposes the *ʾakzārî*, the “cruel”; he is the one who can show consideration and take interest in others, who does not pursue his own advantage. 20:6 places *ḥesed* beside *ʾiṣ ʾemûnîm*, “faithful person”; many people speak of their kindness, but the trustworthy person who has kindness is truly rare (apparently the intention is to paraphrase *ḥesed we ʾemet*).

In Prov 19:22 *ḥesed* must mean uprightness of heart and true humanity. This is the characteristic that one seeks in a person, and a poor person who has it is therefore better than a liar, who certainly does not have it. It cannot be directly shown that an understanding of egocentricity as the root of lies is developing here. In 21:12 *ṣ<sup>e</sup>dāqâ* accompanies *ḥesed*, yet the statement generalizes. Even more general are 3:3 and 14:22; it is nevertheless clear that *ḥesed we ʾemet* refers to a human behavior (likewise 16:6, where “guilt is atoned through goodness and faithfulness” does not conform to any schema). In 20:28 (cf. Isa 16:5), the king’s *ḥesed* is certainly more than his righteousness, more likely his geniality, which is an additional support for his throne. The first half of the verse could deal with a divine activity, but it more likely deals here too with a hypostatized independent activity.

(b) In later proverbial wisdom (Sir), *ḥesed* almost exclusively characterizes religious circumstances. Sir 7:33 and 37:11 are the only exceptions.

(c) In the Psa, *ḥesed* is likewise rarely used for human behavior and is then similarly shaped by wisdom; hence Psa 141:5, where a blow

delivered by a righteous individual is no offense but a kindness.

Psa 109:12 certainly does not speak of grace beyond death, but of a reprieve, even of a propitious credit, in antithetical parallelism to “usurer” (v 11). Because the curse corresponds to the omission of a duty or the commission of a crime, *ḥesed* in v 16 is to be understood in the same way.

Finally, Job 6:14 should be mentioned in this context despite several ambiguities. Here too *ḥesed* seems to be a common human attitude (kindness, sympathy, readiness to listen to someone) that exceeds the customary requirements of ordered social life (fear of God).

7. The few passages to be considered in Chron and related texts offer nothing new. 2 Chron 24:22 is reminiscent of Judg 8:35, and Ezra 7:28 and 9:9 of Gen 39:21. Noteworthy are the pl. forms in 2 Chron 32:32 and 35:26, which approve of the reigns of Hezekiah and Josiah (similarly, Neh 13:14).

Of course, a blurring of the semantic boundaries of *ḥesed* is evident. With respect to construction, it resembles *ḥēn* in Esth 2:9, 17 and *raḥ<sup>a</sup>mîm* in Dan 1:9.

8. It is not possible to convey precisely *ḥesed* 's semantic range as encountered in profane usage with one Eng. word. *ḥesed* is not “grace,” and the often suggested “favor” is insufficient. First, *ḥesed* occurs tangibly in concrete situations and at the same time transcends the individual demonstration and envisions the actor. In this regard, the term exhibits affinities with Eng. “kindness,” and with “goodness” as well (see 3c). *ḥesed* does occur in relation to particular social forms; its configuration may even be governed by them, but it is never the obvious, the obligatory. It is a human demeanor that alone can fill a form with life and is in some cases (not always) the very requirement for the birth of a community. Jepsen (op. cit. 269) attempted to describe the intention as good will that becomes good deed. This notion is certainly included but is alone insufficient. I suggest an expression for magnanimity, for a sacrificial, humane willingness to be there for the other (Stoebe, diss. 67; id., VT 2 [1952]: 248). It is a given that *ḥesed* always has to do in some way with the life of the other, and that one expects and hopes from the recipient of such *ḥesed* a similar willingness that in turn surpasses the obligatory.

IV. The religious usage of *ḥesed* will be examined in the narrative literature (IV/1), in the divine predication of Exod 34:6 (IV/2), in the Prophets (IV/3), in Deut and dependent literature (IV/4), and finally in the Psa (IV/5). A treatment of the adj. *ḥāsîd* follows (IV/6).

1. (a) Narrative literature rarely employs the word to describe God's

behavior toward people (see III/5a). The basis is unfortunately too limited to permit one to decide whether this usage may be a constitutive concept for the theology of the Yahwist (so Stoebe, diss. 135). It certainly expresses a vital experience of faith, although it is also theologically risky, for none of the almost metaphysical concepts associated with  $\rightarrow hnn$  or with  $\rightarrow rhm$  is appropriate to this term, so that it represents an anthropomorphism in the proper sense; nonetheless, it also permits the most condensed theological statement.

(b) This risk, at the same time an endeavor to secure the concept of God, is found in the combination of *hesed* with  $\text{ }^c\text{met}$ . It is not entirely absent from profane usage (see III/5b on Gen 24:49; 47:29; Josh 2:14), but subsides in comparison to the religious usage. Its central usage is in the divine predication in Exod 34:6 (see IV/2), although it occurs not only in liturgical diction but also as a common term in colloquial speech. Here too it is very early.

2 Sam 15:20, surely an old tradition, uses *hesed we $\text{ }^c\text{met}$*  as a greeting, which may correspond to the Eng. "God be with you"; it suggests that this expression came to indicate an essential characteristic of God quite early. The brevity of this expression (LXX supplements accordingly) is determined by the situation. 2 Sam 2:6 has the fuller form. At any rate, Yahweh should be regarded as the subj., not David (so A. B. Ehrlich, *Randglossen zur hebräischen Bibel* [1910], 3:313, who wants to see this as a "farewell"). These two passages also confirm that  $\text{ }^c\text{met}$  is not a wish for a willingness on God's part that will be exhausted in a brief moment, which would certainly be a very pronounced anthropomorphism.

In Gen 24, Abraham's servant expects God's cordial assistance in the immediate situation (vv 12, 14, *hesed*); in the manifestation of this aid he perceives that Yahweh has not neglected (*zb*; cf. *nšr* "to keep" Exod 34:7) his willingness, also demonstrated earlier, to aid Abraham (v 27 *hesed we $\text{ }^c\text{met}$* ). That he solicits *hesed* from the God of his master Abraham does not mean that he is laying claim to this *hesed*. The household slave turns to the God of the fathers because this God is responsible for demonstrations of kindness toward his master.

Jacob's prayer in Gen 32:11 (on the pl. see III/3a) expresses more than his humility. It is a confession to Yahweh, who was there for him during the entire period of his sojourn despite his sin and did not withhold his help. Vv 9–11 are properly regarded as the Yahwist's own conception (W. Elliger, *ZTK* 48 [1951]: 18; H. J. Stoebe, *EvT* 14 [1954]: 470). Here he expresses his theological conviction that Yahweh secretly accompanies even the sinful world and brings it to its destination. The term *hesed* appears as an appropriate medium for the expression of this conviction. *hesed* is plainly a summary of what is expressed in Gen 50:20 (E?): "You intended it for evil, but God intended it for good."

2. (a) The divine predication in Exod 34:6, "a merciful and gracious God, patient and rich in *hesed we $\text{ }^c\text{met}$* ," is a liturgical formula (cf. J.

Scharbert, *Bib* 38 [1957]: 130–50), which may certainly have been expanded under Yahwistic influence (Stoebe, *VT* 2 [1952]: 250; still, the warning of W. Beyerlin, *Origin and History of the Oldest Sinaitic Traditions* [1965], 138n.603, should be noted). We will first follow the analysis of Scharbert and will for the present regard v 6aβ,b as an independent prayer formula (echoed in whole or in part in Num 14:18; Joel 2:13; Jonah 4:2; Psa 86:15; 103:8; 145:8; Neh 9:17).

To some degree, *raḥûm w'eḥannûn* “merciful and gracious” makes a static statement concerning Yahweh’s relationship to his people; it does not take into account that this relationship can be imperiled by human conduct. Consequently, the succeeding expansions establish that Yahweh’s accessibility to his people continues even beyond their failure. In this respect, *ʿerek ʿappayim* means the “patience” that does not react impulsively but waits (on this theme cf. the picturesque speech of Isa 42:14). This more negative definition is positively explicated through *rab ḥesed weʿemet*, the promise of the dependable, lasting willingness to act in the interest of the people (on this passage, esp. regarding the centrality of *ḥesed* here, cf. Asensio, op. cit. 77f.).

V 7 continues the thought, surprisingly, with “who keeps grace to the thousandth generation,” which produces a tautology with *ʿemet* (cf. Psa 40:12 and 61:8 with a characteristic modification of the notion; *ḥesed weʿemet*, which preserve the supplicant, have almost become hypostases of God). This continuation could signal the presence of an older, independent formula (Scharbert, op. cit. 137), yet sharp distinctions are impossible. One should probably reckon with an expansion of the basic tradition that seeks to formulate thoroughly a tenet of faith. The *ḥesed* promised here cannot ignore human sinfulness; rather it presupposes and consists in the willingness to forgive sins. It seeks to express a truth that surpasses human conception. God’s comprehensive goodness does not exclude his sovereignty. The conceptual tension is seen in the parenthetical remark, “who does not, however, leave totally unpunished” (v 7b), which almost invalidates the previous statement.

(b) Individual elements of the formula occur in Exod 20:5f. and Deut 5:9f., significantly in reverse order. These texts make it clear that confidence in God’s grace and generosity dominated in Israelite faith; moreover, that *ḥesed* refers to something included in common conceptions of rights and duties.

The relationship of *ḥesed* and forgiveness (cf. Exod 34:7a) finds varied expression in later piety, esp. when → *slḥ* “to forgive” is added to the predication (Psa 86:5; Neh 9:17; cf. Psa 130:7; in a broken form in Psa 6:5; 25:10f.; 85:8; 103:3f.). In 2 Sam 7:14f. *ḥesed* includes punishment in the sphere of human experience. The notion here is influenced by the father-son analogy (→ *rḥm*).

At first, no thought is given to human response to God's *hesed*, it is implied in the general demand for obedience. In a way, however, the statement "those who love me" (Exod 20:6; Deut 5:10) already surpasses this general demand. But this statement is a secondary assurance, not a basic clarification.

3. (a) The preaching of Hosea fills this gap. Hos 2:21 concerns Yahweh's covenant with his people, presented under the figure of marriage, not as a natural relationship but as a volitionally defined association: "I will betroth you to me in righteousness and justice, in goodness and mercy, . . . in faithfulness." The behaviors mentioned are the husband's bride-price, his gift to the wife, because they directly benefit her. The sequence of the terms represents an inner logic: behavior in accordance with the norm; justice and morals form the framework filled with *hesed w<sup>c</sup>rah<sup>a</sup>mîm*, the operation of affection and mercy that exceeds the norm; *ʾmûnâ* "faithfulness" underscores the constancy and dependability already implicit in "forever." These gifts characterize a free inclination of the heart and, as such, are foundations of community from various perspectives. Consequently, God expects people to have the same willingness to act for him (*hesed*), not as repayment but as thankful recognition of what God has already done, as confirmation and realization of the covenant given by him.

Jepsen (op. cit. 269) denies this possibility and relates every prophetic demand for *hesed* to the purely human realm. Yet one can see here esp. that an understanding of *hesed* simply as readiness to help is too constricted.

Concerning the question of the reciprocity of *hesed*, one should first of all refer to Hos 10:12: "Sow righteousness and harvest *hesed*." *š<sup>c</sup>dāqâ* and *hesed* will be given by God, on the one hand, and are, on the other, to be actualized by people, so that God's *hesed* is both requirement and example of the proper human attitude toward him; cf. also C. Wiéner, *Recherches sur l'amour pour Dieu dans l'AT* (1957), 20.

Hos 12:7 belongs here too. The demand "practice *hesed* and justice" is included in a call to return to God and should be understood in this context. Although the emphasis here seems to lie more pronouncedly on the behavior of people toward each other, the two are still not to be strictly distinguished. Hos 6:6 also demonstrates this duality in its juxtaposition of *hesed* and sacrifice (cf. 1 Sam 15:22). The alternative of *hesed* toward God or only among people is falsely posed because, for the OT, both belong together. That *hesed* and the sacrificial cult are so juxtaposed should be understood against the background of the fact that sacrifice need not exclude human devotion, but that it can also be understood as a duty with necessary consequences for behavior toward others too (cf. Amos 8:4–6).

Esp. interesting in this respect is Hos 4:1. The reversal of the sequence in which the terms from 2:21f. appear in the demand directed at people is intentional: they form a descending climax. Yahweh contends on his own behalf: if the people have no constancy, they should at least have *ḥesed* devotion; if this, too, is lacking, they should at least have an awareness of what Yahweh has done and given. Hos 6:4 illustrates that these thoughts are not otherwise unknown to Hosea. The influence of God's punitive act engenders something like a *ḥesed* attitude (contra Jepsen, op. cit. 269). One at least takes him into account. But this attitude has as little duration as dew or morning fog.

(b) The same notion occurs in a slight modification very much later in Isa 40:6 (cf. H. J. Stoebe, *WD* 2 [1950]: 122–28; the translation of *ḥasdô* with “his majesty, might” analogous to Psa 103:15f. envisions an amalgamation of *ḥesed* and *ḥēn* that is unlikely for this period; see III/1c; cf., however, Elliger, *BK* 11, 23f.): such a message would have seemed senseless, because the people had lost the willingness to hear God, but the word of God victoriously overcame this deep resignation.

In 2 Chron 32:32 and 35:26, the pl. of the word also refers to the piety that these kings have demonstrated in their reform efforts; the same is true of Neh 13:14 and probably also of 2 Chron 6:42. This reorientation to the cultic realm is certainly a forceful limitation in contrast to Hosea's intention.

(c) Finally, Mic 6:8 may be classified here despite a few ambiguities (cf. → *šn<sup>c</sup>* hi. and H. J. Stoebe, *WD* 6 [1959]: 180–94). A precise demarcation of the sphere in which *ḥesed* is applicable is not possible, perhaps not even intended. In contrast to “to exercise justice,” which, like “to exercise *ḥesed*” in Zech 7:9, points to an act in human society, “to love *ḥesed*” (obj. gen., not an adv. acc.) refers to God's *ḥesed* toward people, with the implied notion of love as a human response to this *ḥesed*.

Mic 7:18 (not authentic) paraphrases and expands the known predication and contains nothing essentially new. V 20 exhibits a formally strange allocation of *ḥesed* and *šemet* to the patriarchs (one could certainly consider this intentional, for this *ḥesed* was first promised to Abraham, and it then preserved Jacob despite everything).

(d) Similarities between Jer and Hos are also evident in the use of the *ḥesed* concept. Esp. impressive is Jer 2:2, where the *ḥesed* of youth parallels the love of the bridal period. Consequently, *ḥesed* here cannot be rendered “faithfulness” (so, following Glueck, Rudolph, HAT 12, 14f.; Weiser, ATD 20, 17); rather, it signifies the limitless trust, the devotion, with which the young Israel followed Yahweh in the wilderness. Here too *ḥesed* is not the prerequisite for special relationship, but the response to God's declaration.

Jer 31:3 more clearly expresses that God's *ḥesed* precedes the people's *ḥesed*.

Here too *ʾah<sup>a</sup>bâ* and *ḥesed* parallel each other. There is no basis for the covenant preserved through apostasy except God's love.

Jer 9:23 is reminiscent of Hos 2:21. Here too the issue is knowledge of God, yet the sequence of terms varies. The juxtaposition of human self-awareness (v 22) underscores the gift character. Those who are aware of this gift are expected to reciprocate.

Jer 16:5 consolidates *ḥesed* and *raḥ<sup>a</sup>mîm* in the controlling term *šālôm* "peace, well-being." God's removal of it means death. The asceticism commanded of Jeremiah is a symbolic act; thus the note of participatory willingness resounds even in this perspective.

4. (a) The relationship between covenant and grace is consciously reflected in Deut, although without achieving uniform terminological definition. The word *ḥesed* occurs, outside 5:10 (see IV/2b), only in 7:9, 12, where 5:10 and Exod 34:6 are paraphrased such that *ḥesed* preceded by *b<sup>c</sup>ṛît* depends upon *šmr* (see III/3b). The contention that *ḥesed* is consequently a behavior resulting from the covenant (Glueck, op. cit. 73) is formally correct but too narrow. Even the older portions of Deut subordinate *b<sup>c</sup>ṛît* to the promise to the patriarchs, thus anchoring it in Yahweh's free decision and lending it a promissory character (von Rad, *Gottesvolk* 69).

Deut 7:8 also presupposes God's love; indeed, in distinction from Hos, *ḥb* "to love" seems to have become an equivalent for *ḥesed*, even in reference to human love for God. One could ask whether the formula "to love with all your heart, etc." (e.g., Deut 6:5; 10:12; 11:13; 13:4; 30:6) means to express the unreserved devotion implied by *ḥesed*.

(b) These concepts continue to be active with several variations and limitations in literature influenced by Deut.

The prayer dedicating the temple in 1 Kgs 8:23 departs from the norm in that *b<sup>c</sup>ṛît* in v 21 is the proclamation of the duties of a historical covenant, which naturally also limits the statement of v 23. The replacement of *ne<sup>c</sup>mān* "faithful" in Deut 7:9 with *nôrā<sup>c</sup>* "frightful" in Neh 1:5; 9:32; Dan 9:4 also lies along these lines.

The Davidic promise in Psa 89:29 should be classified here. "My covenant with him shall continue" is an independent clause, but it is still logically subordinate to "I will always maintain my *ḥesed* for him." The promised covenant exists on the basis of *ḥesed*, the enactment of the covenant in v 4 follows this promise in v 3. Vv 25, 34, 40 also elucidate the character of the promise.

Isa 55:3b consigns the *ḥ<sup>a</sup>sādîm* promised to David, which have not been invalidated by events, to the whole people as an eternal covenant (an unconditional promise). The relationship between eternal *ḥesed* and the covenant of peace, which shall not become invalid, is similar (Isa 54:8, 10). On the pl. forms and their relationship

to *rah<sup>a</sup>mîm*, see III/3a, 4a; cf. → *rîm*. In Isa 57:1, *ʔanšê ḥesed* are tantamount to *ḥ<sup>a</sup>sîdîm* (see IV/6).

5. (a) In the Psa, *ḥesed* usually, but certainly not exclusively (see III/6c), characterizes an attitude of God. From the outset, the liturgically formulaic mode of expression allows for no sharp distinction of concepts. The living use of the Psa in prayer stimulated further abridgment and development of ideas. Characteristic of this evolution is the use of the formula *ḥesed we<sup>e</sup>met*, which can occur intact (Psa 25:10; 40:11f.; 57:4; 61:8; 86:15; 115:1; 138:2; with *ʔmûnâ*: 89:25; 98:3; in a clear formula, yet without *ʔmet*, 145:8), but is just as often reduced (26:3; 36:6; 57:11; 85:11; 89:34; 92:3; 100:5; cf. also Mic 7:20). Both usages occur occasionally together (Psa 57; 89), hence this difference is hardly fundamental. The choice of verbs indicates quite clearly that *ḥesed* and *ḥesed we<sup>e</sup>met* are no longer understood so much as God's attitude of openness and attentiveness to people manifested in actions, but more as one of his characteristics.

*ḥesed* fills the earth (33:5; 119:64), is as high as the heavens (36:6; 57:11; 108:5), comes upon a person or becomes great toward a person (33:22; 86:13; 89:25; 117:2; 119:41), surrounds the God-fearing (32:10), follows a person (23:6), satisfies a person (90:14), and is precious (36:8); God offers it (42:9), lets it be heard (143:8), and takes it away (66:20; 77:9). 2 Sam 22:51 = Psa 18:51 still exhibits the old conventional form with *šh*, "to demonstrate" *ḥesed*.

(b) The development results in the hypostatization of *ḥesed* (so perhaps in Psa 40:12; 57:4, an addition; 61:8; 85:11; 89:15). This development is indeed grounded in the old use of *ḥesed*, but it surpasses it and signifies a restriction of the original intention. This development is also expressed in the use of the pl. forms of *ḥesed* (see III/3a), and, finally, the related increased significance of *tûb* in conjunction with *ḥesed* (see III/4b).

In a broader sense see Psa 25:7; 86:5; 109:21; 145:8f., but esp. the fixed liturgical formula, "For he is benevolent, his goodness endures forever." The extreme fluidity of this development is illustrated by the fact that similar cases do not have *tôb* (25:6; 89:2f., 29; 103:17; 138:8).

(c) A strict distinction cannot be enforced, however; other statements are better understood as a gift of God, as when one trusts in *ḥesed* (Psa 13:6; 52:10), as one trusts in Yahweh himself or his name (e.g., 9:11; 33:21), when one awaits it (33:18; 52:10), rejoices in it (31:8), lauds, ponders, or praises it (48:10; 59:17; 88:12; 92:3; 101:1; 107:8, 15, 21, 31).

This concept is also esp. clear when—usually, if not exclusively, in the laments—the prayer is that God will act because of or in accordance with his *ḥesed* (see III/3c). In a broader sense, Psa 21:8; 31:17; and 143:12, as well as the combination “in/according to the fullness of your *ḥesed*” (5:8; 69:14; 106:45; cf. Isa 63:7; Lam 3:32) also belong in this category.

The request in the call for *ḥesed* is always for something essential: deliverance and assistance, life itself in the broadest sense. Also of special importance in this context is the combination of *ḥesed* with *slḥ* “to forgive” (see IV/2b).

Finally, reference may be made to the relationship between *ḥesed* and God’s wonders; the two terms can also occur at some distance from one another (Psa 4:4 txt em; 17:7 txt em; 26:3, 7; 31:22; 77:9, 12; 86:5, 10; 88:12f.; 89:3f., 6; 98:1, 3; 106:7; 107:8, 15, 21; 136:1–3, 4).

(d) Passages that do not fit these categories and in which *ḥesed* is anchored more strongly in the behavior of the recipient are rare and, furthermore, somewhat ambiguous.

The juxtaposition in Psa 62:13, “For you requite according to all their work,” could be based in the nature of the numerical saying. Although *ḥesed* relates to the fear of God in Psa 33:18; 103:11, 17; 147:11, the context indicates that it is not a prerequisite but a general expression of piety and is almost identical with the knowledge of God (cf. 36:11). 144:2 remains an exception. If it is not to be emended (cf. e.g., Kraus, *Psa*, CC, 2:539f.: *ḥosnî* “my strength”), it could refer to the human attitude of faith (similarly, Elbogen, op. cit. 46: “my promise, my trust”).

6. (a) The adj. *ḥāsîd*, usually translated “faithful, pious,” describes practitioners of *ḥesed* (on frequency, primarily in the Psa, see II/2). The form without a succeeding gen. (sg.: Jer 3:12; Mic 7:2; Psa 4:4 txt?; 12:2 txt?; 18:26 = 2 Sam 22:26; Psa 32:6; 43:1; 86:2; 145:17; pl.: Psa 149:1, 5) decreases significantly in contrast to other expressions for pious speech (e.g., *yāšār*, *tāmîm*), where it is the rule (contra H. A. Brongers, *NedTT* 8 [1954]: 282). Pron. sufs. (1st, 2d, or 3d per.) refer without exception to Yahweh; the prayer character of the texts make it clear that they do not refer to Yahweh’s *ḥāsîd*.

(b) The adj. can be either an act. or a pass. formation in accordance with the nom. form (BL 470; on the weight of the pass. aspect, cf. A. Jepsen, *Nabi* [1934], 5), for which an exact distinction is presumably not even possible. Jer 3:12 is unmistakably act.: God himself is *ḥāsîd* (similarly Psa 145:17 par. *šaddîq* “righteous”; cf. the expression *rab ḥesed*, see IV/2a).

(c) Otherwise, *ḥāsîd* exclusively characterizes a pious human attitude. L. Gulkowitsch (*Die Entwicklung des Begriffes ḥāsîd im AT* [1934], 22) concluded from the usage of the term that *ḥāsîd* may have originally been

an explicitly collective term and may have signified membership in the community of Yahweh. This conclusion is certainly correct, although not in such a way that *ḥāsîd* was originally entirely neutral and must be more nearly defined by modifiers (op. cit. 28). The *ḥāsîdîm* are indeed entirely conscious of their special relationship to Yahweh (Brongers, op. cit. 291), yet this consciousness is true, in principle, of the whole nation and does not permit the inference of a separate group of the militantly pious in existence from the 8th/7th cent. into the Maccabean period (so B. D. Eerdmans, *OTS* 1 [1942]: 176–257).

Close relationship to Yahweh is expressed in various ways: Yahweh is near them (Psa 145:17) or they are near him (148:14); they pray to him (32:6), trust in him (86:2), love him (31:24); they rejoice in him and praise him (Psa 30:5; 52:11; 132:9, 16; 145:10; 148:14; 149:5; 2 Chron 6:41). Yahweh speaks to them in visions (89:20), forgives them (32:5), protects them (1 Sam 2:9; Psa 37:28; 86:2; 97:10; Prov 2:8), delivers them from death (Psa 16:10; 116:15; negatively in the lament, 79:2); they constitute his community (149:1), his people (85:9), and are his servants (79:2; 86:2; cf. 116:15f.).

Apart from the more generally used expressions of piety paralleled with *ḥāsîd* (“upright” Psa 97:10; Prov 2:8; “just” Psa 97:10; “faithful” Psa 31:24; antithetically, “godless” 1 Sam 2:9; Psa 37:28; cf. 43:1), one may well maintain that the term intends no specifically ethical description of the *ḥāsîd* (Gulkowitsch, op. cit. 22). The *ḥāsîdîm* belong to the community, i.e., they live in the sphere of God’s devoted grace (the pass. aspect of the nom. form); cf. *ḥāsîd* alongside the *ḥesed* of God in Psa 31:8, 17, 22, 24; 32:6, 10; 52:10f.; 85:8f., 11; 86:2, 5, 13, 15; 89:15, 20, 25, 29; 2 Chron 6:41f. The meaning of *ḥāsîd* seems well conveyed in the translation “companion in grace” (“Gunstgenosse,” Brongers, op. cit. 294).

(d) Nuances that one may see in the term are also to be explained from this perspective. Mic 7:2 must be interpreted in terms of 6:8. God’s willingness (*ḥesed*) creates the foundation for trust and life that permits and necessitates human *ḥesed* as a similar openness to God and people. Thus the *ḥāsîd* becomes the pious one who himself practices *ḥesed*. It is unnecessary to see an exceptional ethicization of the term (Gulkowitsch, op. cit. 22) marked by the adj. without suf. (see 6a). On the one hand, these forms are not associated with any distinctive characteristics; on the other hand, they are governed at least partly by their respective contexts.

(e) This more pronouncedly act. aspect is expressed in Psa 18:26 = 2 Sam 22:26, the only passage that uses *ḥsđ* hitp. “to prove oneself to be *ḥāsîd*”: “To the pious, you (Yahweh) prove yourself pious.” Here the attitude of a *ḥāsîd* can be assumed as the requirement for God’s *ḥesed*.

(f) Understandably, such a religiously loaded term underwent a limitation of

meaning in the course of history and finally indicated a group, the “quiet in the land,” which led to the *Asidaioi* of 1 Macc 2:42; 7:13; 2 Macc 14:6, who combined piety and readiness for battle (cf. H. W. Huppenbauer, *BHH* 1:298). The appropriation of the Hebr. word in transcription indicates that it has become the designation for a group.

V. 1. Kuhn (*Konk.* 74f.) counts 58 occurrences of *ḥesed* in the published nonbibl. texts from Qumran and in CD, 15 in 1QS, 31 in 1QH, and 7 in 1QM (see also *GCDS* 257). Attention will be given here only to those passages in which one may note a use of *ḥesed* that further develops elements already present in the OT. In comparison to the OT, the pl. forms have become more frequent in relation to the sg. forms (32x pl., 26x sg.), although they do not consistently refer to “demonstrations of grace,” but occasionally seem to represent pl. abstracts (i.e., 1QH 2:23; 4:37; 6:9; 9:7; 11:18).

That *ḥesed* has become distant from its original meaning and has lost independence is demonstrated by the fact that it accompanies other substs. as an attributive gen.

Characteristic of this usage is *ḥbt ḥsd*, 1QS 2:24; 5:4, 25; 8:2; 10:26 (also CD 13:18; cf. P. Hyatt, *ATR* 24 [1952]: 232), which, despite the same terminology, is substantially distinct from Mic 6:8 in syntax (P. Wernberg-Møller, *Manual of Discipline* [1957], 57). The phrase refers to the attitude that the members of the community assume toward one another.

One may also explain *bryt ḥsd* in 1QS 1:8 (cf. also 1Q35 7:7) in these terms; the community per se is also intended here. Thus the meaning of *ḥesed* is in flux, but the meaning of *ḥesed* as an act of God has priority, as the formula *ḥšwmr ḥsd lbrytw* in

1QM 14:4 (based upon Deut 7:9; cf. also CD 19:1) indicates. The formulation *bny ḥsd* in 1QH 7:20 points in the same direction, and perhaps even more instructively, *ḥbywny ḥsd* in 1QH 5:22, which is surely meant to characterize the members of the covenant as favored poor (contra M. Mansoor, *Thanksgiving Hymns* [1961], 135).

2. The LXX predominantly translates *ḥesed* by *eleos*, *ḥāsîd* by *hosios*. On the impact of the term in the NT, see R. Bultmann, “ἔλεος,” *TDNT* 2:477–87; F. Hauck, “ὁσιος,” *TDNT* 5:489–93.

H. J. Stoebe

## חֲסֵד *ḥsh* to take shelter

S 2620; BDB 340a; *HALOT* 1:337a; *TDOT* 5:64–75; *TWOT* 700; *NIDOTTE* 2879

1. Hebr. *ḥsh* “to take shelter,” with the basic meaning “to hide oneself,” belongs to a root used only moderately; it means “to cover, conceal” in Akk. (*ḥesû*, cf. *AHW* 342a; *CAD* H:176f.) and “to cover, hide” in Eth. (*ḥasawa*; Dillmann 93). On conjectural Arab. and Aram. pars., see L. Delekat, *VT* 14 (1964): 28f. (on Arab. *ḥašīya* “to be afraid,” cf. also L. Kopf, *VT* 8 [1958]: 173).

Syr. *ḥasyā* “pious” and derivatives indicate possibilities for theological usage (*LS* 245; cf. also *DISO* 93: Palm. *ḥsy* pa., “to consecrate”).

The word group has only two full-fledged members in the OT: the verb, which occurs only in the qal; and the noun *maḥseh* “refuge,” formed with the *m*-preformative. The abstract form *ḥāsūt* appears only in Isa 30:3, par. to *māʿōz* “refuge,” thus synonymous with *maḥseh*. The PNs *ḥōsā* (1 Chron 16:38; 26:10f., 16) and *maḥsēyā* (“Yahweh is a refuge,” Jer 32:12; 51:59; cf. *IP* 57, 62, 158) contribute nothing essential to the semantic history of the root.

2. The verb and the noun are attested primarily in the liturgical literature; the distribution thus indicates a strong concentration of occurrences in the Psa: *ḥsh* qal 37x (Psa 25x, Isa 3x), *ḥāsūt* 1x (see 1), *maḥseh* 20x (Psa 12x, Isa 4x)—in all, 37 of 58 occurrences in the Psa.

3. With Delekat (op. cit. 28–31), “to hide in/with” should be seen as the fundamental meaning of the verb (cf. Judg 9:15; Isa 14:32). The OT knows a multitude of vivid par. expressions, e.g., → *ʿūz b<sup>e</sup>* “to take refuge with” (Isa 30:2), → *str* ni. *be* “to hide in” (1 Sam 20:5; Isa 28:15), *mlṭ* ni. or → *nūs ʿel* (or with a suffixed *he* locale) “to flee to” (Gen 9:17–22; Exod 21:13; Num 35:6, 32; 1 Sam 22:1), *brḥ ʿel/ʿe* “to flee to” (1 Kgs 2:39; Neh 13:10), *pqd* hi. *nepcš b<sup>e</sup>yād* “to entrust oneself to someone” (Psa 31:6), → *dbq b<sup>e</sup>/ʿim* “to cling to” (Ruth 1:14; 2:8; Deut 10:20), *yšb b<sup>e</sup>* or *lîn* hitpo. *be* “to lodge with” (Psa 91:1). *ḥsh* can often be found in the immediate vicinity of these expressions and thus means, either lit. or fig., the search for a secure place. Apart from two exceptions (Psa 62:8; 73:28) that indicate the transition to a subjectivized understanding (contra L. Delekat, *Asylie und Schutzorakel* [1967], 211), *maḥseh* indicates, directly or symbolically, the hiding place or that which gives security (cf. Isa 4:6; Psa 91:1f., 9; 104:18); synonyms are *ʿōz/māʿōz* “refuge” (→ *ʿūz*), *sēter/mistôr/mistār* “hiding place” (→ *str*), *mišgāb* “fortress, refuge,” and *miqlāt* “refuge, asylum.”

4. Cultic texts prefer (a) the verb and the noun in confessional pronouncements of confidence, which simultaneously claim Yahweh’s protection, and (b), the verb, esp. an act. ptc., to describe the cultic

community.

(a) A formula of trust in the songs of lament or confidence takes the form: *b<sup>e</sup>kāḥāsītī* (*yhw*h), “I hide myself in you (Yahweh),” “I (en)trust (myself to) you,” thus in Psa 7:2; 11:1; 16:1; 25:20; 31:2; 57:2; 71:1; 141:8; cf. *b<sup>e</sup>kā bāḥātī* “I trust in you” (→ *bḥ*). Reflecting the style of its hymnic context, it is: “I trust in him, Yahweh” (Psa 18:3; 144:2). Impf. forms of the verb with the same function occur in Psa 57:2; 61:5; the nom. expression reads: “you are (he is) my (our) *maḥseh*” (Psa 46:2; 61:4; 62:8f.; 71:7; 91:2, 9; 94:22; 142:6; cf. Isa 25:4; Jer 17:17). Echoes of the formula of trust are recognizable in Isa 28:15 and Joel 4:16.

(b) In the descriptive use, the verb highlights less the individual supplicant (as is predominantly the case in the formula of trust) than the community in need of protection. Psa 64:11 and Isa 57:13 relate *ḥsh b<sup>e</sup>* to the individual; Prov 14:32 knows that the just can depend upon his irreproachability (read with LXX *ḥōseh b<sup>e</sup>tūmmō*). In the other cases, the *ḥōsīm* as a group—par. to “those who fear Yahweh” (Psa 31:20), who “love his name” (5:12), who are “his servants” (34:23)—are described in fixed formulae, often in beatitudes (Psa 2:12; 5:12; 17:7; 18:31; 31:20; 34:23; Nah 1:7; Prov 30:5; cf. the usage of the finite verb form in Psa 34:9; 36:8; 37:40; Zeph 3:12).

*ḥsh* can thus mean the search for protected space (the sanctuary); the more precise statement “to hide under Yahweh’s wings” (Ruth 2:12) or “in the shadow of your wings” (Psa 36:8; 57:2) refers to the cultic site (→ *kānāp*). Delekat (op. cit. 209ff.) is correct on this point. The expression of confidence, however, does not solely mean the actual search for asylum (in order to so argue, one must abandon the liturgical character of the Psa in favor of an inscription theory!), but also the inner attitude of the praying community. Whoever hides with Yahweh (Psa 61:5; 91:1f.) appropriates the experience of prior generations in worship.

Apparently, the Syr. adj. *ḥasyā* has attained the same significance. The Gk. *Essaioi* (*Essēnoi*) “Essenes,” borrowed from the Aram., also continues the community usage (cf. K. G. Kuhn, *RGG* 2:701–3).

5. The LXX and the NT incorporate the substance of *ḥsh* in several words, but tend toward the spiritual understanding: *pepoithenai* “to trust,” *elpizein* “to hope,” *skepazesthai* “to seek refuge” (cf. R. Bultmann and K. H. Rengstorf, “ἐλπίζω,” *TDNT* 2:517–35; R. Bultmann, “πείθω,” *TDNT* 6:1–11; see p. 5: “Thus *ḥsh* [‘to seek refuge’] can include in content the secondary sense of confidence”). LXXB emphasizes the local sense in Judg 9:15. The exclusive claim of the pious community is manifest in the names (an external designation?!) and the ideology of the Essenes.

## חָפַץ *ḥpṣ* to be pleased

S 2654; BDB 342b; HALOT 1:339b; TDOT 5:92–107; TWOT 712; NIDOTTE 2911

1. The root *ḥpṣ* is attested only in WSem. (Phoen.: *mḥpṣ* [?], *KI* no. 38; *ḥpṣbʿl* as a PN; cf. Harris 104; Old Aram.: Sef. III.8 *kl ḥpṣy*, cf. *DISO* 94 “all that I desire”; Fitzmyer, *Sef.* 97, 112 “any of my business”; Syr.: *ḥpṭ* “to be concerned for,” *LS* 249f.; Arab. *ḥafīza* “to keep”; cf. *HAL* 326a) and only in the Hebr. of the OT. With regard to etymology, L. Kopf (*VT* 8 [1958]: 173) refers to Arab. *ḥafīza* “to keep, protect.”

Two nom. forms derive from the verb, which appears only in the qal: *ḥāpēṣ* “delighted,” which serves as a ptcp. or as a verbal adj., and the verbal abstract *ḥēpeṣ* “delight, wish; opportunity.”

A second root *ḥpṣ* is attested in Job 40:17: “to let hang(?)”; cf. Arab. *ḥafaḍa* “to debase” (*HAL* 326b).

2. The verb occurs 86x in the OT, if one includes, with Mandl., passages with the ptcp. *ḥāpēṣ* (according to Lis. 12x; Psa 18x plus ptcp. 6x, incl. 111:2 with Lis. and *HAL* 326b, although Mandl. lists it under *ḥēpeṣ*; Isa 12x, other prophets 8x plus ptcp. 1x, Esth 7x); the verbal abstract *ḥēpeṣ* occurs 39x, in addition to 2x as an element in the fem. PN *ḥepṣî-bāh* (“I am pleased with her,” 2 Kgs 21:1 and, as a symbolic name, Isa 62:4; cf. *IP* 223).

3. (a) In the realm of profane usage, the verb with a per. obj. (always with *be*) expresses one person’s affection for another (Gen 34:19; 1 Sam 19:1; 2 Sam 20:11), esp. the favor of a legally or socially superior to a dependent (Deut 21:14; 1 Sam 18:22; Esth 2:14).

The obj. of the thing can be introduced with *be* or can stand as an acc. obj. In the first case, both concrete objs. (Isa 13:17; Psa 73:25) and abstract objs. (Isa 66:3; Psa 109:17; Prov 18:2; Esth 6:6f., 9[bis], 11) occur. Only abstract objs. occur as acc. (Hos 6:6; Psa 68:31; Job 21:14).

The proper sense becomes apparent with great clarity in comparison to similar terms, esp. → *rṣh* and → *ḥb*. The boundaries between *ḥpṣ* and *rṣh* are not always sharp. The two roots are used synonymously to a great extent (Psa 147:10 par.). But they have each undergone unique

developments in varied directions. While the cult adopts *rsh* as a technical expression to declare the sacrifice as “well-pleasing” (R. Rendtorff, *Die Gesetze in der Priesterschrift* [1954], 74f.; E. Würthwein, *TLZ* 72 [1947]: 147f.), the sense of *hps* shifts in the direction of “to want, have interest” through a mitigation of the emotional element (Isa 55:11; Jonah 1:14; Psa 115:3; Song Sol 2:7; Eccl 8:3). Not infrequently, an inf. accompanies *hps*, which is thus used as a mere auxiliary verb (Deut 25:8; Judg 13:23; 1 Sam 2:25). Correspondingly, the subst. *hēpeš* occurs in the tempered sense of “opportunity, business” (Isa 58:3, 13; Eccl 3:1, 17; 5:7; and frequently in the Qumran texts); on the use of *hēpeš* in Eccl, see W. E. Staples, *JNES* 24 (1965): 113–15: “business or facts” of life; cf. also G. Rinaldi, *BeO* 9 (1967): 48; Wagner no. 109.

*hps* is distinguished from *ʔhb* primarily by means of the fact that “to be pleased” expresses a particular class distinction between subj. and obj.—it deals mostly with affection on the part of the superior—that is entirely absent from “to love”; cf. e.g., the narrative of David at Saul’s court, where Saul’s goodness toward David is expressed by *hps* (1 Sam 18:22), while *ʔhb* stands for Jonathan’s (v 1), the people’s (v 16), and Michal’s (v 20) affection for David.

(b) A similar picture results from a comparison of the semantically related substs. *hēpeš* and *hēn* (→ *hnn*). The latter has the pass. sense “belovedness” and appears mostly as an obj., particularly in verbal constructions denoting favor from external sources, primarily as the obj. of *msʔ* “to find.” Alternately, *hēpeš* is primarily an act., outwardly directed display. *hēpeš* appears as an obj. only rarely, and only with verbs of action and giving (1 Kgs 5:22f.; 10:13 = 2 Chron 9:12; Isa 46:10; 48:14).

First of all, *hēpeš* indicates a subjective feeling: delight as a psychic attitude. This sense always applies to *hēpeš* accompanied by a prep. (*be* or *le*). If no prep. follows, however, the sense is almost always objectified, by means of an exchange of the feeling element for the pertinent obj. itself. Instead of an intention to express a favorable disposition, *hēpeš* indicates the obj. of favor, “that which pleases someone, that which is desired” (2 Sam 23:5; 1 Kgs 5:24; 9:11; 10:13; Psa 107:30; Job 31:16); cf. Akk. *migru* “accommodation, favor” > “object of favor, favored one” (for further examples, see W. Eilers, “Zur Funktion von Nominalformen,” *WO* 3/2 [1964]: 126).

Prov 3:15; 8:11, where *hēpeš* (pl., par. *p<sup>e</sup>nîm* “corals”) apparently describes a piece of jewelry, contains a special objectification and concretization. The expression is apparently a shortened form of *ʔabnéhēpeš* “precious gems” (thus Isa 54:12; Sir 45:11; 1QM 5:6, 9, 14; 12:13); cf. the similar expressions *ʔeres/dibrê hēpeš* “land/words that bring joy” (Mal 3:12;

Eccl 12:10) and *k'li 'ên hēpeç bô* “vessel that pleases no one” (Jer 22:28; 48:38; Hos 8:8).

4. Because “pleasure” mostly means the superior’s display toward the inferior, it is natural that the term appears frequently in theological usage, esp. in statements with God as the subj. Nevertheless, neither the verb nor the nom. forms are used as established theological terms. The following objects and abstractions occur as direct objs. of divine pleasure: blood, sacrifice, love, the way of the pious, truth; objs. introduced with *be*: the pious, Israel, Zion, life, death, the strength of the stallion. The only persons named as the objs. of divine pleasure are Solomon (1 Kgs 10:9 = 2 Chron 9:8) and David (2 Sam 15:26).

Human “pleasure” (in contrast to *ḥb*) never has God/Yahweh as an obj., but rather the “word of Yahweh” (Jer 6:10), his “commandments” (Psa 112:1; 119:35), also “knowledge of his ways” (Isa 58:2; Job 21:14), “insight” (Prov 18:2), “blessing” (Psa 109:17), and “nearness to God” (Isa 58:2).

5. Both the verb and the subst. appear in the Qumran documents (5 and 13x, resp., according to Kuhn, *Konk.* 75), but recede behind the much more frequent *ršh/rāšôn*. The NT *eudokein* is connected primarily with *ršh* (cf. G. Schrenk, “εὐδοκέω,” *TDNT* 2:738–51).

G. Gerleman

## 𐤒𐤒𐤓 *ḥqq* to inscribe, prescribe

S 2710; BDB 349a; *HALOT* 1:347b; *TDOT* 5:139–47; *TWOT* 728; *NIDOTTE* 2980

1. The root *ḥqq* also occurs beyond the OT in the Old Aram. inscription on the Hadad statue from Zinjirli (8th cent. BCE; *KAI* no. 214.34 “you will write[?]”; cf. Friedrich 158), in Phoen. (*DISO* 95), and in Mid. Hebr., Jew. Aram., Syr., Arab., and Eth. (*HAL* 333b; R. Hentschke, *Satzung und Setzender* [1963], 21f.).

In addition to *ḥqq* qal, the by-form *ḥqh* (pu. 1 Kgs 6:35; Ezek 8:10; 23:14; hitp. Job 13:27) appears in the OT (and Mid. Hebr.). The po. (replacing the pi.) ptcp. (*m'ḥōqēq*) has become an independent subst. (“one who inscribes” or “something that inscribes”). The masc. subst. *ḥōq* is a substantivized inf. of *ḥqq* qal (BL 455); the derived fem. *ḥuqqâ* is probably a relatively late formation in analogy to the fem. *tôrâ* and *mišwâ* (K. Albrecht, *ZAW* 16 [1896]: 98; G. Liedke, *Gestalt und Bezeichnung atl. Rechtssätze* [1971], 176).

2. The verb *ḥqq* occurs in the OT 12x (qal 9x, pu., ho. and po. 1x each), the by-form *ḥqh* 4x (see 1). The substs. occur as follows: *m<sup>h</sup>ḥōqēq* 7x, *ḥōq* 129x (Psa 30x, 21x in Psa 119; Deut 21x, Lev 11x), and *ḥuqqâ* 104x (Lev 26x, 23x in H; Ezek 22x, Num 14x; cf. Hentschke, op. cit. 113n.3; Elliger, HAT 4, 223n.15, 236f.).

For conjectural emendations, see *HAL* 333; Judg 5:15; Zeph 2:2; Psa 74:11; and Job 23:12 should definitely be emended.

3. (a) The verb *ḥqq* (*ḥqh*) develops from its basic graphic meaning “carve out, inscribe, dig” to “sketch, write” on the one hand, and to “prescribe, determine” on the other (→ *y<sup>c</sup>d* 3d).

On this point and on the root as a whole see the following literature: Hentschke, op. cit., the most thorough investigation; J. van der Ploeg, “Studies in Hebrew Law,” *CBQ* 12 (1950): 250–52; S. Mowinckel, “Hebrew Equivalent of Taxo in Ass. Mos. IX,” *SVT* 1 (1953): 88–96; Z. W. Falk, “Hebrew Legal Terms,” *JSS* 5 (1960): 350–54; P. Victor, “Note on *ḥōq* in the O.T.,” *VT* 16 (1966): 358–61; Liedke, op. cit. 154ff.

The graphic meaning is still perceptible in the following passages: Isa 22:16 describes the excavation of a grave in a rock with *ḥqq* (par. to *ḥsb*); Ezek 4:1, the inscribing of the plan for Jerusalem on a brick (cf. A. Jeremias, *OT in the Light of the Ancient Orient* [1911], 2:287, 298, the plan of a city scratched in clay); Isa 49:16, the tattooing of the name of the beloved in the hand of the lover (Volz, *Jesaja*, KAT, 2:102); in 1 Kgs 6:35b; Ezek 8:10; 23:14 the pu. ptcp. *m<sup>h</sup>ḥuqqeh* indicates “inscriptions, engravings”; in Job 13:27 confinement in stocks is described as drawing the outlines of Job’s feet (Horst, BK 16, 205). *ḥqq* parallels *ktb* “to write” in Isa 10:1; 30:8; Job 19:23 (ho.). Although in Job 19:23 it describes the engraving of an inscription in the rock (with Fohrer, KAT 16, 317), and thus the more technical aspect of writing, *ḥqq* is probably synonymous with *ktb* in Isa 30:8 “to record in a → *sēper* (perhaps a leather scroll).” In Isa 10:1 “writing evil statutes” already shifts to the meaning “to prescribe, determine.”

The qal ptcp. *ḥōqēq* should hardly be understood here and in Judg 5:9 as an amphictyonic office (contra Hentschke, op. cit. 11ff.).

Prov 8:15 (po.) and 31:5 (pu.) point, as does Isa 10:1, to the legal realm; here *ḥqq* means “to establish justice, govern.” One may also best translate *ḥqq* in Judg 5:9 “to have authority (over Israel).” Isa 10:1; Prov 8:15; Judg 5:9; and Job 13:27 show that the subjs. of *ḥqq* are authorities; *ḥqq* can thus indicate a lord’s sovereign legislation regarding his

subordinates.

(b) *m<sup>e</sup>ḥōqēq* occurs mostly in old poetical texts, at first objectively as “staff, scepter” in Num 21:18 (Song of the Well) and Gen 49:10 (Blessing of Jacob). These staffs of the “princes” (*śārîm, n<sup>e</sup>dîbîm*) or the king symbolize authority and honor; they play a role in the pronouncement of justice (cf. *Iliad* 18.503ff.; a portrayal of such a staff on an Eg. mural in L. H. Grollenberg, *Atlas of the Bible* [1956], 38 fig. 121). The designation for the staff of command becomes (pars pro toto) a designation for the “prince, commander”: Judg 5:14 (Song of Deborah); Deut 33:21 (Blessing of Moses).

The possibility that *m<sup>e</sup>ḥōqēq* may have been understood in a particular period or tradition in the OT as the title of an office in the “self-government of the local alliances” may not be completely dismissed, but is still a rather weak option (contra Hentschke, op. cit. 11ff.). In Deut 33:21 the pu. ptcp. *m<sup>e</sup>ḥuqqāq* “prescribed, determined” can also be read (cf. Prov 31:5; HAL 334a).

It is certain that *m<sup>e</sup>ḥōqēq* is a word from the sphere of reigning and ruling, designating either the instrument or the person of the ruler.

(c) The most vivid meaning of *ḥōq* occurs where *ḥōq* should be understood as “inscribed = boundary line.” In Jer 5:22; Job 38:10; and Prov 8:29a, *ḥōq* is the boundary of the sea that may not be trespassed (*br*); in Psa 148:6 it is the boundary of the heavenly ocean. Mic 7:11b promises Zion the enlargement of its territory with the words “your boundaries (*ḥōq*) will be removed.” Isa 5:14 says that the Sheol monster opens its jaws without *ḥōq*, i.e., one can no longer see an outline, it is boundless.

*ḥōq* is distinguished from *g<sup>e</sup>bûl* by the fact that *g<sup>e</sup>bûl* (originally “mountain crest”) indicates the natural boundaries, while *ḥōq* as an inscribed line is the artificially established boundary.

The discussion of the reduction (*gr<sup>9</sup>*) of Jerusalem’s *ḥōq* in Ezek 16:27, a reference to the decrease of its territory (cf. O. Eissfeldt, *PJB* 27 [1931]: 58ff.), demonstrates that as a term for the boundary, *ḥōq* can be applied to the area demarcated by the boundary (so also *g<sup>e</sup>bûl*, Lat. *finis*, Gk. *horion*, and Ger. *Mark*). The usage of *ḥōq* in Ezek 45:14 for a “measured quantity of oil,” in Gen 47:22 for “a particular quantity of grain” (Liedke, op. cit. 165f.), and in Exod 5:14 and Prov 31:15 for the “work quota” (Noth, *Exod*, OTL, 53) lies along the same lines. In Job 14:5, 13; 23:14; and Prov 30:8 *ḥōq* may be best related to the human “life span established and bounded (by God).”

In Psa 148:6, *ḥōq* refers not only to the heavenly ocean but to the

highest heaven (v 4), the stars (v 3), and Yahweh's messengers and host (v 2). This series indicates the way in which *ḥōq* diverges from its graphic meaning and assumes the meaning "established order" (cf. also Job 28:26). *ḥōq* also should probably be understood as "order" in Gen 47:26; certainly so in Judg 11:39b and 2 Chron 35:25b.

If one considers who establishes *ḥōq* (Pharaoh, Pharaoh's driver, the lady of the house, Joseph as vizier, Yahweh) and whom the *ḥōq* effects (the Eg. priests, the overseer of the Israelites, the maids, the Egyptians, Job, Jerusalem, the sea, etc.), then the following picture emerges: *ḥōq* is the boundary line that the ruler draws for his subordinates and to which the subordinate may dare approach or to which the subordinate should come but may not overstep.

Verbs characteristically found in conjunction with *ḥōq* are: *śîm* (Jer 5:22; Prov 8:29), → *ntn* (Psa 148:6; Prov 31:15), → *śh* (Job 28:26), always in the meaning "to set, give." Gens. following *ḥōq* usually indicate the establishing of authority.

Just as *mišpāt* (→ *špt*) indicates the "casuistic statement of law" (Alt, "Origins of Israelite Law," *EOTHR* 79–132), one can expect that *ḥōq* indicates a specific genre, for in many cases boundaries and regulations must be established in a specific linguistic form. An investigation of the laws in the OT demonstrates that the "apodictic statement of law" (R. Hentschke, "Erwägungen zur isr. Rechtsgeschichte," *Theologia Viatorum* 10 [1966]: 108–33; Liedke, op. cit. 101ff.; Alt assigns this form to "apodictic law" but does not distinguish it from the "commandments"; example: Exod 21:12) has precisely the same social context (ruler-subject; cf. Gen 26:11). The conclusion is apparent that *ḥōq* may have been the original designation for this type of law (J. Morgenstern, *HUCA* 7 [1930]: 27; Liedke, op. cit. 177ff.). The OT laws were fixed, however, in a phase in which the various terms *ḥōq*, *mišpāt*, *tôrâ*, and *mišwâ* had become fully synonymous designations of Yahweh's law (see 4d; only Lev 18:3, 30; 20:23 discuss the *ḥuqqôt* of the Egyptians, Canaanites, and the nations).

(d) *ḥuqqâ* occurs only in a fig. meaning; in Jer 5:24b; 33:25; Job 38:33 as "regulation(s)," otherwise as a designation for laws and commandments (cf. 1 Kgs 3:3, David's *ḥuqqôt*, Mic 6:16, Omri's *ḥuqqôt*, 2 Kgs 17:8, the nations' *ḥuqqôt*).

4. (a) *ḥqq* or *ḥōq/ḥuqqâ* occurs in theological usage first in a series of descriptions of God's creative activity in the OT. In Prov 8:27, Wisdom boasts that she was present when God "inscribed (*ḥqq*) the circle of the surface of the deep." Job 26:10 also discusses the divine inscription of this circle, the horizon (*ḥāqāq* should be read with the comms.). In Jer 5:22; Job 38:10; and Prov 8:29a, *ḥōq* is the boundary that God establishes for the sea. These descriptions of creation should be categorized with a specific kind of creation language: creation through separation and division

(Westermann, *Gen*, CC, 1:33–35). The *ḥōq* engraved by God divides the heavenly waters and the earth (Prov 8:27; Job 26:10; Psa 148:6; cf. Gen 1:6f.), the sea from the dry ground (Prov 8:27; Jer 5:22; Job 38:10; cf. Gen 1:9f.). In Jer 31:35 (*ḥōqēq* is to be read with the comms.) *ḥqq* also occurs in a fig. meaning describing creation: “(he who) fixes the moon and stars to illuminate the night.” In Jer 31:36 and Job 28:26 *ḥuqqîm* or *ḥōq*, resp., means “regulation(s)”; in Jer 5:24b; 33:25; Job 38:33, *ḥuqqôt* also indicates orders (of nature) fixed by God.

In Psa 60:9 = 108:9, *m<sup>e</sup>ḥōqēq* is Yahweh’s (royal) staff, in Isa 33:22, Yahweh’s title in addition to *melek* “king” and *šōpēt* “judge.”

(b) Job 14:5, 13; 23:14; Prov 30:8 speak of the *ḥōq* that God establishes for people. Although the graphic meaning “limited span” is still active in these passages, *ḥōq* occurs in Psa 2:7; 94:20; 105:10f.; Isa 24:5b as “Yahweh’s order” in a totally fig. sense. These passages demonstrate that *ḥōq* as decree can not only indicate the obligation of the subordinate, resulting from an order established by God (Isa 24:5b; cf. Jer 31:36; Job 28:26), but can also include God’s promise and obligation; see Psa 105:10f. = 1 Chron 16:17f., where the promise of the land to the patriarchs is called → *b<sup>e</sup>rît* and *ḥōq*. The disputed text Psa 2:7 (see G. H. Jones, “Decree of Yahweh,” *VT* 15 [1965]: 336–44) should be understood in this way: according to G. von Rad (“Royal Ritual in Judah,” *PHOE* 222–31), *ḥōq* here means the content of the royal protocol that Yahweh delivers to the king of Judah at the coronation; the “decree” that Yahweh establishes thereby is the adoption of the king as Yahweh’s son; it is promise (Psa 2:7b–9; 2 Sam 7) and obligation for the king.

(c) In the priestly formula *ḥoq-‘ōlām* (usually with the addition “for Aaron and his sons”), *ḥōq* is a technical term indicating the priestly portion of the sacrifice (Exod 29:28; 30:21; Lev 6:11; 7:34; 10:15; Num 18:8, 11, 19; cf. Lev 6:15; 10:13f.; and 24:9 [H]; Hentschke, op. cit. 33ff.). This still graphic usage of *ḥōq* should be compared with *ḥōq* in Gen 47:22.

The corresponding formula encountered in P and H *ḥuqqat-‘ōlām* (mostly with the addition “for your generations”) is simply an introductory and concluding formula following or preceding cultic regulations (P: Exod 12:14, 17; 27:21; 28:43; 29:9; Lev 3:17; 7:36; 10:9; 16:29, 31, 34; Num 10:8; 15:15; 18:23; 19:10, 21; H: Lev 17:7; 23:14, 21, 31, 41; 24:3; cf. Ezek 46:14; Hentschke, op. cit. 42ff., 64f.); the formula establishes the unconditional, eternal validity of the regulation in question; *ḥuqqâ* means “cultic regulation, law” in this formula as it does in “*ḥuqqâ* of the Passover” (Exod 12:43; Num 9:12, 14) and in Num 9:3, 14; 15:15.

In the expression *ḥuqqat mišpāt* (Num 27:11; 35:29), *ḥuqqâ* characterizes the

divine authority, *mišpāt* the realm (civil law) in which the regulation applies (Hentschke, op. cit. 46ff.). The expression *ḥuqqat hattôrâ* (Num 19:2; 31:21) is a pleonasm, which documents the rivalry between *tôrâ* and *ḥuqqâ* in the P texts. *ḥuqqâ* has “essentially the same sphere of application” as → *tôrâ* in P (R. Rendtorff, *Die Gesetze in der Priesterschrift* [19632], 73f.); the two terms are substantially synonymous.

(d) *ḥōq* and *ḥuqqâ* occur in Deut, Dtr, Chr, H, and Ezek mostly in the pl. in series with other terms for commandment and law. All terms are fully equalized and indicate synonymously the whole or parts of Yahweh’s regulations and commandments. The combination of *ḥuqqîm* and *mišpāîm* is characteristic for Deut (Deut 4:1, 5, 8, 14, 45; 5:1, 31; 6:1, 20; 7:11; 11:32; 12:1; 26:16f.; cf. N. Lohfink, *Das Hauptgebot* [1963], 54–58); it may also mirror the confluence of a Yahweh-bound and a non-Yahwistic legal tradition (F. Horst, *Das Privilegrecht Jahwes* [1930], 120 = *Gottes Recht* [1961], 150). The series *ḥuqqōt . . . mišwōt* (Deut 6:2; 8:11; 10:13; 11:1; 28:15, 45; 30:16; cf. Gen 26:5) is also characteristic for the framework of Dtn. The terms *ḥuqqîm/ḥuqqōt*, *mišpāîm*, and *mišwōt* occur in Dtr in almost every possible combination (Deut 30:10; 1 Kgs 2:3; 3:14; 6:12; 8:58; 9:4, 6; 11:33f., 38; 2 Kgs 17:13, 15, 19, 34, 37; 23:3). The Chr, who tends strongly toward Deut descriptions for the law (G. von Rad, *Das Geschichtsbild des chronistischen Werkes* [1930], 41ff.), prefers *ḥuqqîm* and *mišpāîm* once again (Neh 1:7; 9:13; 10:30; 1 Chron 22:13; 2 Chron 7:17; 19:10; 33:8). The pair *ḥuqqōt* and *mišpāîm* is typical for H and Ezek (H: Lev 18:4f., 26; 19:37; 20:22; 25:18; 26:14f., 43; Ezek: Ezek 5:6f.; 11:20; 18:9, 17; 20:11, 13, 16, 19; 37:24; 44:24; Zimmerli, *Ezek*, Herm, 1:175). *ḥuqqîm* is one of the alternate terms for “law” or “word of God” in Psa 119 (Kraus, *Psa*, CC, 2:411).

The singulars *ḥōq* and *mišpāt* occur together in Exod 15:25b; Josh 24:25b; 1 Sam 30:25b; Psa 81:5f.; Ezra 7:10b. Although Ezra 7:10b imitates Josh 24:25b and no precise sense for the two terms may be elicited from Psa 81:5f., a notion of “a delimiting regulation (*ḥōq*) and a legal claim (*mišpāt*, → *špî*)” may be considered for 1 Sam 30:25b; Josh 24:25b; and Exod 15:25b (Liedke, op. cit. 180ff.).

5. The Qumran texts use *ḥōq* and *ḥuqqâ* in the sense of 4d (M. Delcor, “Contribution l’étude de la législation des sectaires de Damas et de Qumran,” *RB* 61 [1954]: 539–41; W. Nauck, “Lex insculpta in der Sektenschrift,” *ZNW* 46 [1955]: 138–40; K. Baltzer, *Covenant Formulary* [1971], 111, 118n.93); CD 6:3ff. uses the dual significance of *m<sup>h</sup>ḥōqēq* for an allegorical exegesis of Num 21:18 in reference to a person (“he who studies the law”); cf. Mowinckel, op. cit. 92f.; O. Eissfeldt, *The Old Testament, An Introduction* (1965), 651; M. Delcor, *RB* 62 (1955): 60–66.

Regarding the translation of *ḥōq/ḥuqqâ* in the LXX and on the NT, cf.

Hentschke, op. cit. 103ff.; and G. Quell and G. Schrenk, “δίκη,” *TDNT* 2:174–225, esp. 219–21; G. Delling, “τάσσω,” *TDNT* 8:27–48, esp. 37–39 (προστάσσω); H. Kleinknecht and W. Gutbrod, “νόμος,” *TDNT* 4:1022–91, esp. 1088f.

G. Liedke

## הרה *hrh* to be inflamed

S 2734; BDB 354a; *HALOT* 1:351a; *TDOT* 5:171–76; *TWOT* 736; *NIDOTTE* 3013

1. The root *hrh* can be considered alongside *hrr* “to be hot, to burn”; in contrast to *hrr*, it is not common Sem. (cf. *AHw* 238b; *WUS* no. 973) but is strongly developed outside Hebr. only in Aram. (Arab. *ḥarwat* “burning; wrath, rage,” *Wehr* 172).

The oldest Aram. examples are *KAI* no. 214.23 “and Hadad shall pour out wrath (*hrʾ*)” (par. *rgz* “wrath”) and *KAI* no. 223B.12 “on a day of wrath (*hrn*)” (*Fitzmyer, Sef.* 82f., 89; cf. further *HAL* 337).

The verb occurs in the qal, ni. (ptcp. in *Isa* 41:11 and 45:24; *Song Sol* 1:6 belongs here, according to *GKC* §75x; *Berg. HG* 2:111; *BL* 424; according to G. R. Driver, *JTS* 34 [1937]: 380f., and *KBL* 609b it belongs to *nhr* pi. “to pant”), hi. (*Job* 19:11 and *Neh* 3:20 in a disputed text), hitp., and twice in forms with a *t*-preformative (in the meaning “to compete,” *Jer* 12:5; 22:15; according to *GKC* §55h a tip<sup>el</sup>; according to J. Blau, *VT* 7 [1957]: 385–88, a hitap<sup>el</sup>; according to *Barth* 279; *Meyer* 2:127; *HAL* 337b: denominative from *taḥ<sup>a</sup>râ* “conflict,” *Sir* 40:5). In addition, there are the substs. *h<sup>o</sup>ri* “inflammation (of wrath)” and *ḥārôn* “heat (of wrath)” (on the nom. form, see *BL* 460f., 499, resp.).

2. The verb occurs 93x in the OT, specifically 82x in the qal (*Gen* and *Num* 11x each, 2 *Sam* 8x, *Judg* and 1 *Sam* 7x each, *Exod* 6x, *Deut* and *Job* 5x each, *Jonah* 4x, etc., predominantly in narrative texts), 4x in the hitp. (*Psa* 37:1, 7f.; *Prov* 24:19), 3x in the ni. (see 1), 2x each in the hi. and tip<sup>el</sup> (see 1). *ḥārôn* occurs 41x (*Jer* 9x, *Psa* 6x, 2 *Chron* 4x, otherwise less than 3x), *h<sup>o</sup>ri* 6x (*Exod* 11:8; *Deut* 29:23; 1 *Sam* 20:34; *Isa* 7:4; *Lam* 2:3; 2 *Chron* 25:10).

The qal passages are divided rather equally between human and divine wrath; the other verb forms concern human wrath, except for *Job* 19:11 hi.; *ḥārôn* always

refers to divine wrath; *h<sup>o</sup>ri*, except for Deut 29:23 and Lam 2:3, always refers to human wrath.

3. Both the verb and the subst. of the root *hrh* are used only fig. in the psychological realm. Two-thirds of all occurrences of the qal have *ʔap* “wrath” as subj. (in Hab 3:8 “Yahweh” is not the subj. but a vocative; cf. W. F. Albright, FS Robinson 12); here *hrh* means “to become inflamed” (e.g., Gen 44:18, “Do not let your wrath become inflamed toward your servant”) in such a way that it is not necessary to trace the two terms back to their basic meanings (KBL 331b = HAL 337b: his nose becomes hot). In the remaining cases, the verb is constructed without the subj. *ʔap*. Thus the abbreviated form “it (wrath) inflames him” = “he is enraged” (e.g., Gen 4:5f.) develops. Instead of the prep. *I<sup>c</sup>, b<sup>e</sup>ʕnāyw* stands in Gen 31:35 and 45:5. The obj. of or the reason for the wrath is usually introduced with *be*, rarely with *ʔel* (Num 24:10) or *ʕal* (2 Sam 3:8; Zech 10:3).

On the hi. “to cause to become inflamed,” ni. “to be wrathful,” hitp. “to get heated up,” and tip<sup>c</sup>el “to compete” see HAL 337b.

*h<sup>o</sup>ri* regularly appears, and *hārôn* in by far most cases, in a cs. combination with *ʔap* as nomen rectum so that the basic meaning “burning, flame” survives, even if in a fig. application. *hārôn* is an independent word for “wrath” only in Exod 15:7; Jer 25:38ba txt em; Ezek 7:12, 14; Psa 2:5; 58:10 txt em; 88:17 (the only passage with pl.); and Neh 13:18.

4. Just as a human being’s wrath can become inflamed, so can Yahweh’s (e.g., against Moses, Exod 4:14; a total of 37x *hrh* qal with *ʔap* as subj., in addition to Job 19:11, hi., where a qal form is usually conjectured; also Gen 18:30, 32; 2 Sam 22:8 = Psa 18:8 without *ʔap*, but with *le* ). Objs. of divine wrath, as of → *ʔap*, → *hēmâ*, and other synonyms, are either individuals (e.g., Abraham, Gen 18:30, 32) or esp. the people Israel (Num 11:1, 10, 33, etc.).

*hārôn* is used in all cases (39x apart from Jer 25:38ba and Psa 58:10 txt?) of God’s wrath, *h<sup>o</sup>ri* in Deut 29:23 and Lam 2:3. The heat of wrath pertains typically to the people Israel (Exod 32:12, etc.; both passages with *h<sup>o</sup>ri* ), but also e.g., to Babel (Isa 13:9), or to Amalek (1 Sam 28:18). Isa 13:13 and Lam 1:12 speak of the “day of his burning wrath.”

This usage also occurs in the Sef. inscriptions (*KAI* no. 223B.12, 8th cent.; see 1). The fragmentary context suggests that the gods move against usurpers and covenant violators “on a day of wrath” (Fitzmyer, *Sef.* 82f., 89; cf. *KAI* 2:261). See also the passage in the roughly contemporary Hadad inscription (*KAI* no. 214.23; see 1), according to which Hadad should pour out his wrath upon those who wish to conquer the royal throne of Panammuwa I of Sam’al (Zinjirli).

5. *ḥrh*, *ḥārôn* (Kuhn, *Konk.* 77), and *ḥ<sup>o</sup>rî* (4Q171 1–2 l:14) occur in the Qumran literature (see also *GCDS* 259).

On the NT, cf. → *ʿap* 5 and → *ḥēmâ* 5.

## חָרַם *ḥērem* **ban**

S 2764; BDB 356a; *HALOT* 1:354a; *TDOT* 5:180–99; *TWOT* 744a; *NIDOTTE* 3051

1. The root *ḥrm*, “to consecrate,” etc., occurs in almost all Sem. languages (P. Fronzaroli, *AANLR* 8/20 [1965]: 249f., 262, 267: distinguished in ESem. (*ḥ*)*arāmu/erēmu* “to cover” and WSem. *ḥrm* “to forbid”).

It is unclear whether Akk. *ḥarimtu* “prostitute” derives from *ḥarāmu* II “to set apart” (only in a lexical list) and whether or how *ḥarāmu* II, for its part, relates to the common Sem. *ḥrm* (cf. *AHW* 323a, 325b and *CAD* H:89f., 101f.). So far, only PNs based on the root *ḥrm* are known from Ugarit (Gröndahl 136; see also Huffmon 204).

The OT also knows a root *ḥrm* II (\**ḥrm*) “to divide, pierce” (qal pass. ptcp. “with a divided nose,” Lev 21:18; hi. “to cut off,” Isa 11:15 txt?, according to G. R. Driver, *JTS* 32 [1931]: 251; *HAL* 340a; cf., however, *CPT* 119; further, perhaps, *ḥērem* II, “dragnet”). Driver later attempted to derive additional examples of *ḥrm* hi. from this root (FS Baumgartner 56–59).

In the OT the noun *ḥērem* “ban” is primary. The qal form of the verb is not attested; *ḥyh* (*l<sup>c</sup>*)*ḥērem* “to come under the ban” occurs in its place (Josh 6:17; 7:12). The hi. and ho. verb forms derive from the noun. *šîm l<sup>c</sup>ḥērem* (Josh 6:18), *nkh* hi. *ḥērem* (Mal 3:24), or *ntn laḥērem* (Isa 43:28) also represent the hi.

Related geographical names include *ḥermôn* (cf. *HAL* 341a), *ḥormâ*, and *ḥ<sup>o</sup>rēm* (according to Noth, *HAT* 7, 146, however, the last two are from *ḥrm* II: “cleft rock”). On the PN *ḥārim*, cf. *IP* 136f., 216.

2. The noun *ḥērem* occurs 29x in the OT (only in the sg.: Josh 13x, Lev 4x), *ḥrm* hi. 48x (Josh 14x, Deut 8x, 1 Sam 7x; incl. Isa 11:15), and ho. 3x.

3. The root *ḥrm* referred originally to that which is forbidden, either because it is accursed and should be destroyed (*res exsecranda*), or because it is very holy (*res sacrosancta*) (in general, see C. H. W. Brekelmans, *De ḥerem in het Oude Testament* [1959]). The root has undergone unique developments in the various Sem. languages (cf. e.g., J. Chelhod, “La notion ambiguë du sacré chez les Arabes et dans l’Islam,” *RHR* 159 [1961]: 67–79), of which only the OT development will be examined here.

(a) Like *qōdeš* (→ *qdš*) and *ḥól* (→ *ḥll*), the subst. *ḥērem* in the OT means, first of all, a quality inherent to a person or a thing (Lev 27:21; Deut 7:26; Josh 6:17f.; 7:12). But that which is subj. to this quality is also called *ḥērem*; one could translate “banned” or “contraband material” (Deut 13:18; Josh 6:18; 7:1, 12f.; 1 Sam 15:21), if it does not concern people, as in Lev 27:29. Furthermore, *ḥērem* is a technical expression for a particular dedicated gift (“ban gift”) as in Lev 27:28; Num 18:14; Ezek 44:29. Only in Zech 14:11 has *ḥērem* become an action noun (“banning”).

*HAL* 340b still assumes that *ḥērem* is an action noun. One should not, however, translate *יֵשׁ ḥermî* in 1 Kgs 20:42 and *עַם ḥermî* in Isa 34:5 as “the person/people who I have banned” (taking Yahweh as the subj.), but “the person/people who belong to me as *ḥērem*.”

(b) Israel, one or more of its tribes, or even its military leaders (Joshua, Saul) appear as the subj. of about 2/3 of the passages with *ḥrm* hi. In other cases, subjs. are the foreign nations (Assyrians, 2 Kgs 19:11 = Isa 37:11; 2 Chron 32:14; Ammonites and Moabites, 2 Chron 20:23; the nations who bring about the fall of Babel, Jer 50:21, 26; 51:3; Antiochus IV, Dan 11:44). Yahweh appears as subj. in three prophetic texts (Isa 11:15 txt?; 34:2; Jer 25:9).

In all these cases, *ḥrm* hi. is used in the context of war. It occurs in relation to vows only in Lev 27:28. The war *ḥērem* is prescribed by law (Deut 7:2; 13:16; 20:17), proclaimed by prophets (Isa 34:2; Jer 25:9; 50:12, 26; 51:3), or encountered in narratives (remaining texts). Israel executes the war *ḥērem* against the Canaanite population (Num 21:2f.; Josh 6:21; 8:26; 10:1, 28, etc.), Sihon and Og (Deut 2:34; 3:6; Josh 2:10), the Amalekites (1 Sam 15), or portions of Israel (Deut 13:16; Judg 21:11). Non-Israelites execute the ban against Babel (Jer 50:21, 26; 51:3), Seir (2 Chron 20:23), or more generally lands, nations, or many objs. (2 Kgs 19:11 = Isa 37:11; Dan 11:44). In some texts, not only people but also the cattle or all the plunder are the objs. (Deut 13:16f.; Josh 6:21ff.). One cannot prove that this radical form was original.

(c) *ḥrm* ho. occurs only in juridical texts (Exod 22:19; Lev 27:29; Ezra 10:8). A type of capital punishment was originally indicated in this way. The verb designates the sentencing by which this punishment was fixed (Lev

27:29; the execution of the sentence itself is indicated by *môt yûmat*, “he must be killed”), but also the execution of the punishment itself (Exod 22:19). Later, this term indicates a type of confiscation of goods (Ezra 10:8).

4. From the outset, the root *ḥrm* had various meanings in Israel.

(a) In the holy war, *ḥrm* is a religious act which dedicates the enemies (occasionally even the booty) to God (cf. W. E. Müller, *Die Vorstellung vom Rest im AT* [1939], 4–21; G. von Rad, *Holy War in Ancient Israel* [1991]; F. Horst, “Bann,” *RGG* 1:860f.; Brekelmans, op. cit.; D. Merli, “Le ‘guerre di sterminio’ nell’antichità orientale e biblica,” *BeO* 9 [1967]: 53–67). It removes them from any human use and assigns them to destruction. In the Mesha stele (*KAI* no. 181.17), the religious character becomes clear from the combination of *ḥrm* hi. with *Ištr kmš* “for I had devoted them to destruction for (the god) Ashtar-Chemosh” (*ANET* 320b). In the OT, one can point to Num 21:2f., where the execution of the *ḥērem* is the object of a vow; also to the expression *kālîl I<sup>e</sup>yhwh* “a whole sacrifice to Yahweh” in Deut 13:17, and to *hyh ḥērem I<sup>e</sup>yhwh* “to come under the ban for Yahweh” in Josh 6:17. One cannot prove that the *ḥērem* was a permanent element of the holy war. It was apparently promised and executed only in particular crises in order to assure God’s aid (cf. Num 21:2f.; Judg 1:17).

Two passages focus upon conflict concerning the ban: Josh 7 (Achan’s theft) and 1 Sam 15 (Samuel and Saul). Samuel contends with King Saul because the ban order against Amalek was not completely executed; this passage offers insight into the historical process of the cessation of the war ban from the royal period onward, while the representatives of the old traditions (Samuel here) held firmly to the unconditional validity of the ban order. An earlier phase can be seen in Josh 7, in which the ban order still stood as unconditionally valid: here an individual misappropriates the banned (= contraband goods) and thereby cripples Israel’s power. He must be killed so that this handicap may be set aside (Josh 6:17f.; 7:1, 11–13, 15).

*ḳr qal* “to bring misfortune upon” appears in Josh 6:18 as a par. expression for *šîm I<sup>e</sup>ḥērem*, influenced by the place and name etiology of the Valley of Achor (*‘ākôr*) in 7:25f. (*ḳr qal* “to deceive, confuse, bring misfortune upon,” 12x in the OT, Gen 34:30; Judg 11:35; 1 Sam 14:29; 1 Kgs 18:17f.; ni. Psa 39:3; Prov 15:6, etc.).

Both passages, but more clearly Josh 7, indicate that the cultic usage of *ḥrm* (see 4bc) and the usage in relation to war originally belonged together; both concern the fact that the banned, the *ḥērem*, belongs to Yahweh and that any violation of Yahweh’s property rights with respect to the *ḥērem* brings misfortune upon the community. The roots of this

unconditional validity of the *ḥērem* may still be traced back into a phase beyond the division into cultic and historical phenomena.

Following the advent of the Israelite monarchy, the war *ḥērem* seems to have rapidly disappeared. Prophetic circles held firmly to it (cf. 1 Kgs 20:42 in addition to 1 Sam 15), but in the course of time it was no longer executed in order to dedicate enemies to God but to protect Yahwism from syncretism. In the numerous Dtn-Dtr texts (particularly in the tendentious, summary presentations of the events of the conquest in Josh 10–11), the war *ḥērem* signifies nothing more than the destruction of the enemies with this religious purpose. Elsewhere, even this religious motif can no longer be found; here *ḥrm* hi. has become a profane expression for “to annihilate (totally)” (in some of the prophetic passages, elsewhere in 2 Kgs 19:11 = Isa 37:11; Dan 11:44). Only then are non-Israelites or Yahweh subjs. of the verb.

(b) *ḥrm* ho. describes capital punishment applied esp. in cases of infidelity to Yahwism. If this punishment is imposed, no redemption is permitted (Lev 27:29). The guilty party has fallen into God’s hands and, as *res exsecranda*, must be exterminated. Several have thought that this punishment involved a unique form of execution (death by fire). It may be better to think only of a ritual execution of this punishment or of a type of curse.

(c) One can also dedicate an object as *ḥērem* to Yahweh. These vows are distinct from other vows in their effects: no redemption is possible (Lev 27:21–28) because everything vowed is supremely holy (*qōdeš q’dāšîm*, Lev 27:28); it belongs to the priests (Lev 27:21; Num 18:14; Ezek 44:29). Mic 4:13 maintains that the plunder of war is also dedicated to Yahweh in this manner.

5. In the Qumran literature (1QM 9:7; 18:5; CD 6:15; 9:1), the use of *ḥrm* resembles late OT usages. On the rendering of *ḥērem* by *anathema* and of *ḥrm* hi. by *anathematizein* and on the NT, see J. Behm, “ἀνατίθημι,” *TDNT* 1:353–56.

C. Brekelmans

### שׁרשׁ *ḥrš* to be silent

S 2790; BDB 361b; *HALOT* 1:357b; *TDOT* 5:220–23; *TWOT* 761; *NIDOTTE* 3087

1. The root \**ḥrš* “to be deaf, dumb” should be distinguished from the

two common Sem. roots with *ḥ* as the first radical: \**ḥrš* “to produce (with craftsmanship)” (Ug.: *WUS* no. 976; *UT* no. 903; Akk. *eršu* “wise”; Heb. *ḥārāš* “artisan”) and \**ḥrt* “to plow” (Ug.: *WUS* no. 980; *UT* no. 905; Akk. *erēšur*, Hebr. *ḥrš* I; cf. S. E. Loewenstamm, *JJS* 10 [1959]: 63–65; H.-P. Müller, *UF* 1 [1969]: 80). It is absent from Ug. and occurs only rarely during the OT era in NWSem. texts (*DISO* 97; Sznycer 144 on *Poen.* 1027), but is well attested in later Aram. (cf. *LS* 259) and in Arab. (*ḥarisa* “to be dumb, mute,” Wehr 234).

F. Delitzsch (*Prolegomena eines neuen hebräisch-aramäischen Wörterbuchs zum AT* [1886], 100) assumes a relationship to Akk. *ḥarāšu* “to bind” (“restrain,” KBL 337b; contra *AHW* 324b); Akk. *ḥarāšu* “to be dumb” is now attested in a Mari letter (G. Dossin, *RA* 62 [1968]: 75f.).

The verb occurs in qal, hi., and hitp.; in addition, there are the adj. *ḥērēš* “deaf” (BL 477) and the subst. *ḥereš* “silence,” which is used adv. (“secretly”) once in Josh 2:1. The PNs *ḥereš* (1 Chron 9:15 txt?) and *ḥaršā* (Ezra 2:52; Neh 7:54) should be mentioned (*IP* 228).

2. The verb occurs 47x in the OT: qal 7x (Psa 6x and Mic 7:16), hi. 39x (Job 9x, Num 6x), and hitp. 1x (Judg 16:2); *ḥērēš* appears 9x (Isa 5x), *ḥereš* 1x.

3. (a) The affliction of deafness is often associated with speechlessness (deaf and dumb), hence the same root expresses both concepts. The adj. *ḥērēš*, however, occurs only in the meaning “deaf,” both lit. and fig. (alongside *ʾillēm* “mute” in Exod 4:11; Isa 35:5f.; Psa 38:14, in an individual prayer of lament, “But I am like a deaf person, who does not hear, and like a mute person, who does not open his mouth”). In the proper sense, Lev 19:14 forbids the cursing of the deaf or the obstruction of the way of the blind (see also Psa 58:5 “deaf adder that closes its ear”). Israel is described fig. as deaf and blind in its lack of understanding (Isa 42:18f.; 43:8; cf. Westermann, *Isa 40–66*, OTL, 109f., 121); deafness is abolished in the eschatological promise (Isa 29:18; 35:5).

(b) In the qal, the meaning “to be deaf” is limited to Mic 7:16, “Their ears will be deaf.” The other passages in the Psa use *ḥrš* fig. and negated of God in the petition “Do not keep silent!” (individual laments: Psa 28:1, used suggestively with *min*: “Do not stay away from me in silence,” par. *ḥšh* “to keep silent”; 35:22; 39:13; 109:1; communal lament: Psa 83:2) and in the statement “Our God comes and does not keep silent” (Psa 50:3). Thus “to keep silent” in response to a petition comes to mean “to be inactive, unconcerned” (cf. Hab 1:13 hi.), underscored by par. expressions with *d<sup>o</sup>mī* “rest,” *šqt* qal “to rest, be inactive” in Psa 83:2, and *rhq* qal “to be distant” in 35:22.

(c) The hi. causative meaning “to silence” occurs in Job 11:3 (41:4 txt?), but it usually has the intrans. (inner-causative) meaning “to be silent” (e.g., Gen 34:5). It can also mean “to be patient” (Isa 42:14, alongside *ʔpq* hitp. “to keep to oneself”) and easily becomes “to be still, behave calmly” (e.g., Exod 14:14; cf. *hrš* hitp. in Judg 16:2). With the prep. *ʔel* it means “to listen to someone silently” (Isa 41:1), with *le* “to allow tacitly” (Num 30:5, 8, 12, 15; cf. CD 9:6 instead of brotherly instruction, *ykh* hi.). The text of 1 Sam 10:27, “he was inactive,” should be emended following LXX to “after the course of about one month” (S. R. Driver, *Notes on the Hebrew Text of the Books of Samuel* [19132], 85).

(d) Synonyms for *hrš* include:

(1) *hšh* qal “to be silent, behave calmly” (Isa 62:1, 6; 64:11 to be compared to Hab 1:13; 65:6; Psa 28:1; 107:29; Eccl 3:7 with the antonym *dbr* pi. “to speak”), hi. “to call for silence” (Neh 8:11) and “to be silent” (2 Kgs 2:3, 5; Isa 42:14; 57:11; Psa 39:3), “to hesitate” (Judg 18:9; 1 Kgs 22:3; 2 Kgs 7:9);

(2) *dmh* qal “to be still” (Jer 6:2; 14:17; Lam 3:49; Hos 4:5 txt?), ni. “to have to be silent” or “to be destroyed” (12x; cf. Wildberger, *Isa 1–12*, CC, 249f. on Isa 6:5; on *dmm* “to be motionless, still” see N. Lohfink, *VT* 12 [1962]: 275f., with bibliog.);

(3) *smt* qal “to bring to silence” (Lam 3:53; likewise hi. 2 Sam 22:41 = Psa 18:41 and a further 8x in Psa; pi. Psa 88:17 txt em; 119:139; ni. pass. Job 6:17; 23:17);

(4) *skt* hi. “to keep still” (Deut 27:9);

(5) *hsh* hi. “to pacify” (Num 13:30), denominative from *has* “be still!” (Judg 3:19; Amos 6:10; 8:3; Hab 2:20; Zeph 1:7; Zech 2:17; the last three passages refer to silence in the cult in Yahweh’s presence; pl. Neh 8:11 *hassû*).

4. The theological usage of *hrš* “to be silent” conforms to the derived meaning “to be inactive, unconcerned.” The psalmist asks God to “be silent” no longer (Psa 28:1; 35:22; 39:13; 83:2; 109:1; cf. Hab 1:13 and Isa 64:11, *hšh*). According to the psalms of lament, God “is silent” when he does not heed the petition of the petitioner. Similarly, some psalms speak of Yahweh “sleeping” when he remains inactive (cf. Psa 44:24; 78:65; 121:4). In the framework of Psa 50:3–21, “no longer keeping silent” means that Yahweh will enter into a lawsuit with his people; he calls heaven and earth as witnesses (v 4). God’s patience with his people can be demonstrated in his silence (Psa 50:21; the text of Zeph 3:17 should be emended; see Horst, *HAT* 14, 198). God’s silence, however, can also signify punishment for his people (Isa 64:11, *hšh*); when he breaks silence, he will intervene on behalf of his people (Isa 42:14; 62:1, *hšh*).

Silence is the opposite of confession of sin for the sinful psalmists (Psa 32:3; cf. v 5). In wisdom language, “silence” is the mark of the wise, who refrain from making unreflected judgments (Prov 11:12; 17:28; cf. H.-J. Hermisson, *Studien zur isr. Spruchweisheit* [1968], 72f.; on the Egyptian ideal of the “silent,” cf. H. Gese, *Lehre und Wirklichkeit in der alten Weisheit* [1958], 15f.).

5. The LXX translates *ḥrš* mostly with *sigan*, *siōpan*, and *parasiōpan*. The last verb is absent from the NT; the other two exhibit no specifically theological usage, so they are not treated in *TDNT*; cf. W. Schmithals, “Schweigen,” *BHH* 3:1748; W. Herrmann, *Das Wunder in der evangelischen Botschaft: Zur Interpretation der Begriffe blind und taub im Alten und Neuen Testament* (1961).

M. Delcor

## חשב *ḥšb* to think

S 2803; BDB 362b; *HALOT* 1:359b; *TDOT* 5:228–45; *TWOT* 767; *NIDOTTE* 3108

1. Outside Hebr., the root *ḥšb* is attested in NWSem. in Ug. (*ḥtbn*: *UT* no. 917; M. Dahood, *Bib* 45 [1964]: 409; *UHP* 58f.), Phoen.-Pun. (with the same vocalization as in Hebr.), and Aram. (*DISO* 97f.); furthermore, in Ssem. in Arab. and Eth. in the form *ḥsb*.

*ḥšb* “to (ac)count” occurs in Eg. as a Semitism from the time of the Pyramid Texts (Erman-Grapow 3:166f.; W. Vycichl, *MDAI* (Cairo) 16 [1958]: 375).

No etymological relationship to Akk. *epēšu* “to make, do” may be substantiated (< *ḥšb*, according to GB 265a; KBL 339b; *AHw* 223b relates this Akk. verb to Arab., Eth. *ḥfš* “to gather together”).

“To join together, weave” is postulated as the basic meaning of the root *ḥšb* (M. D. Goldman, *ABR* 1 [1951]: 135–37; G. R. Driver, *WO* 2/3 [1956]: 258).

One may base this fundamental meaning on the substantivized qal act. ptcp. *ḥōšēb*, used as a professional designation “weaver” (“embroiderer”? so Dalman, *AuS* 5:126; Driver, op. cit. 255–58) and perhaps also on *ḥēšeb* “band, belt” (Driver, op. cit. 255, 258f.; cf. Eg. *ḥsb* “wrapper,” Erman-Grapow 3:166). Yet *ḥēšeb* is probably better explained as a derivative of *ḥbš* “to bind” arisen through metathesis of fricative and bilabial (cf. *GVG* 1:275; GB 265b; *HAL* 346b).

In addition to the qal (Aram. pe. too) and the pi. “to reckon, plan, devise” of *ḥšb*, the OT attests the ni. pass. or tolerative of the qal “to be counted, valid,” and the reflexive hitp. “to reckon oneself to.” Nom. formations of the root are: (a) the substantivized qal act. ptcp. *ḥōšēb* “weaver” (P in Exod 25–31, 35–40) or “technician” (2 Chron 26:15); cf. the Phoen.-Pun. use of the qal act. ptcp. *ḥšb* (CIS 1:74.4) and the pi. ptcp. *mḥšbm* (Harris 104; DISO 97) as an official title, “treasurer,” divergent in meaning, but formally analogous; (b) the abstract formation with (-ān >) -ōn: *ḥešbôn* “account statement, result of an accounting” (Eccl 7:25, 27; 9:10), which corresponds to Ug. *ḥtbn* (UT texts 1127.2; 2101.1), Eg. Aram. (Cowley no. 81.1) and Palm. (CIS 2:3913 2.75, 115) *ḥšbn* “account (statement)” (cf. also J. Starcky, *Inventaire des inscriptions de Palmyre* 10 [1949], no. 127.2 *ḥšbn* “in assessment of”) and \**ḥiššābôn* “invention” (Eccl 7:29), specifically “catapult” (2 Chron 26:15; so BRL 95; Rudolph, HAT 21, 286; contra de Vaux 1:237); (c) *mah<sup>a</sup>šābā* “plan, invention”; (d) *ḥēšeb* (see above).

2. Forms of the root *ḥšb* occur a total of 186x (incl. *ḥēšeb* 194x) in the OT: qal 65x (Jer 12x, Psa 11x), ni. 30x (Isa 7x), pi. 16x, and hitp. 1x; *ḥōšēb* 12x, *ḥešbôn* 3x, *ḥiššābôn* 2x, *mah<sup>a</sup>šābā* 56x (Jer 12x, Isa 9x, Prov 8x), *ḥēšeb* 8x; Bibl. Aram., pe. 1x. Forms of *ḥšb* are absent from Judg, Joel, Obad, Hab, Zeph, Hag, Ruth, Song Sol, and Ezra (a few MSS have *ḥāšabtā* instead of *ḥāšaktā* in 9:13).

3. Apart from *ḥōšēb* “weaver” (and perhaps *ḥēšeb* “band, belt”), which presumably still preserves the concrete basic meaning of the root, *ḥšb* in the OT always expresses an intellectual act that occurs “in the heart” (Isa 10:7; 32:6 LXX; Zech 7:10; 8:17; Psa 140:3; cf. also Gen 6:5; Ezek 38:10; Prov 6:18; 19:21; 1 Chron 29:18) or “within” (Jer 4:14), but also, to the extent that it leads to articulation, with the “tongue” (Psa 52:4). In contrast to other verbs and expressions of thinking, like → *dmh* pi. “to imagine, think” (Isa 10:7), → *zkr* “to remember” (2 Sam 19:20; Psa 77:6), → *yd<sup>c</sup>* “to recognize” (Psa 144:3), → *ḥal-lēb* “to come to mind” (Ezek 38:10), which occasionally parallel *ḥšb* (cf. also perhaps → *mr b<sup>e</sup>libbō* “to consider,” *hgh* “to ponder,” *zmm* “to reflect, plan,” Bibl. Aram. *št* “to plan”), the evaluation inherent in the act of thought indicated by this verb is characteristic (H.-W. Heidland, *Die Anrechnung des Glaubens zur Gerechtigkeit* [1936], esp. 10–13, 15f., 36f.): in contrast to *mnh* and *spr*, *ḥšb* means “to reckon” not in the sense of counting numerically but of evaluative assessment.

Characteristic in this regard is the parallelism of *ḥšb* and → *ḥps* (Isa 13:17) or → *ršh* (Lev 7:18), “to be pleased with” and the contrast between

*ḥšb* and *bzh* “to denigrate, despise” (Isa 53:3), *mʾs* “to reject” (Isa 33:8; Psa 36:5), *nšʾpešaʿ* or *ksh* pi. *ʿāwōn* “to forgive sins” (Psa 32:1f.).

The specialized commercial and (fiscal, etc.) accounting use of *ḥšb* in the Sem. languages and in Eg. is attested in Hebr. for the pi. “to account, calculate” (Lev 25:27, 50, 52; 27:18, 23; 2 Kgs 12:16) and the ni. “to be audited” (2 Kgs 22:7) (cf. Phoen. [*ḥ*]/*šb* “it works out,” *KAI* no. 160.5; Palm. “the butcher’s payment should be calculated (itp. inf.) to the denar” *CIS* 2:3913 2.102f.; Hatra: *ḥšbnʾ dbyt bʿšmn* “accountant of Beʿelšamen’s temple,” A. Caquot, *Syria* 32 [1955]: 54 no. 49.3).

*ḥšb* generally denotes the evaluative categorization of persons and things, as does the *qal* in the construction with the acc. and *le* “to consider someone/something to be” (Gen 38:15; 50:20; 1 Sam 1:13, etc.; with a double acc.: Isa 53:4; with an acc. and *ke*: Job 19:11), the ni. in constructions with *Iʿ*, *ʿal*, *ʿim* “to be reckoned with, among” (Lev 25:31; Josh 13:3; Psa 88:5, etc.), with *ke* “to be regarded as” (Deut 2:11; Isa 5:28; 29:16, etc.; with *be* ? Isa 2:22, yet see *BH* 3; cf. Nab. *klʾnḥšb bynylbynyk* “is regarded as nothing between you and me,” J. Starcky, *RB* 61 [1954]: 164, frg. A.13; J. J. Rabinowitz, *BASOR* 139 [1955]: 13; and see 1 Kgs 10:21 = 2 Chron 9:20; Dan 4:32), and with a predicate acc. “to count as” (Gen 31:15; Deut 2:20, etc.), and moreover, the hitp. in the construction with *be* “to count oneself among” (Num 23:9).

Used in an abs. sense without any indication of the criterion for evaluation, *ḥšb* means “to treasure, consider valuable, regard” (*qal*, Isa 13:17; 33:8; 53:3; Mal 3:16; pi., Psa 144:3); then, in a further development of the meaning, “to reflect, meditate, think, plan” (*qal*, Isa 10:7; cf. Pun. *ḥšb nʿm* “well-meaning,” *KAI* no. 161.2; pi., Psa 77:6; 119:59). In analogy to *ʾmr/zkr Iʿ* with inf., “to remember to do something,” *ḥšb Iʿ* with inf., “to plan, have in mind to do something” (*qal*, 1 Sam 18:25; Jer 18:8; 23:27, etc.; pi., Jonah 1:4; Psa 73:16; Prov 24:8) expresses the intention to act.

In association with objs. (cf. esp. the fixed combination *ḥšb maḥʾšābâ/maḥʾšābôt*, “to conceive a plan/plans (resp.),” *qal*, 2 Sam 14:14; Jer 11:19; 18:11, 18, etc.; pi., Dan 11:24; also *ḥšb rāʿâ* “to conceive evil,” *qal*, Gen 50:20; Jer 48:2; Mic 2:3, etc.; cf. pi., Hos 7:15; *ḥšb ʾāwen* “to plan evil,” *qal*, Ezek 11:2; Mic 2:1; Psa 36:5; and similar expressions), *ḥšb* competes with → *yʿš* “(to advise), plan, think of something” (Jer 49:20, 30; 50:45; Ezek 11:2; Nah 1:11); the same competitive relationship exists between *maḥʾšābâ* “plan” and *ʿēšâ* “(advice), plan” (cf. the frequent parallelism of these two noms.: Jer 49:20, 30; 50:45; Mic 4:12, etc.). The largely negative intention of such “planning” already expressed in the objs. of *ḥšb* in this usage (yet see e.g., Jer 29:11 *maḥšʿbôt šālôm* “plans for good”; also Psa 33:10f.; 40:6;

92:6; Prov 12:5; 16:3; 20:18; 21:5) is also expressed by the frequent subsequent prep. phrase: one plans “against” someone (*ʿel, lʿ, ʿal*).

Finally, without these negative undertones, *ḥšb* means “to devise, invent” in the sense of a creative and technical facility (Exod 31:4; 33:32, 35; Amos 6:5; 2 Chron 2:13; 26:15).

4. (a) In theological usage, *ḥšb* qal with (a double) acc. of the thing and *le* of the person, “to reckon something to someone (as . . .)” (Gen 15:6; Psa 32:2; cf. 2 Sam 19:20; Ezra 9:13 LXX) and *ḥšb* ni. in a corresponding construction “to be reckoned to someone (as . . .)” (Lev 7:18; 17:4; Num 18:27, 30; Psa 106:31; cf. also Prov 27:14), together with → *ršh* (Lev 7:18) and *ḥps* “to be pleased with” (and possibly also → *zkr* “to remember”), are technical terms of priestly cultic theology.

*ḥšb* and the other terms mentioned that occur in analogous usage refer to the qualification of a sacrifice as properly executed or to its disqualification through priestly declaratory formulae (E. Würthwein, *TLZ* 72 [1947]: 143–52; id., *Tradition und Situation* [1963], 115–31; von Rad, “Faith Reckoned as Righteousness,” *PHOE* 125–30; id., *Theol.* 1:260ff.; R. Rendtorff, *TLZ* 81 [1956]: 339–42; id., *Studien zur Geschichte des Opfers im alten Israel* [1967], 253–60; id., *Die Gesetze in der Priesterschrift* [1954], 74–76), as well as the cultic “accounting” of righteousness (for life) or of its opposite, specifically in the gate liturgy through the declaratory *šaddîq* predication pronounced by the priests (von Rad, “‘Righteousness’ and ‘Life’ in the Cultic Language of the Psalms,” *PHOE* 243–53; id., *Theol.* 1:377–80; W. Zimmerli, *GO* 178–91; H. Reventlow, *Wächter über Israel* [1962], 95–134; K. Koch, *FS von Rad* 45–60, esp. 57f.).

Among the passages mentioned, Gen 15:6 (E) acquires special significance as testimony to the spiritualization of preexistent cultic terminology: cultic mediation here is designed to avoid God’s immanence, and faith in the promise takes the place of human actions as the object of reckoning (von Rad, “Faith Reckoned as Righteousness,” *PHOE* 125–30; H.-J. Hermisson, *Sprache und Ritus im altisraelitischen Kult* [1965], 58f.).

Regarding related Israelite PNs formed with *ḥšb*, such as *ḥ<sup>a</sup>šabyâ(hû)*, see *IP* 188f.

(b) Although wisdom mentions that human plans succeed if they correspond to wise behavior (Prov 12:5; 15:22; 16:3; 19:21; 20:18; 21:5), but fail if they contradict such behavior (Prov 6:18; 15:26; Job 5:12), and only Eccl casts doubt upon the result of wisdom’s efforts (Eccl 7:23–8:1; 9:10), theological assessments of human “thinking, planning” in the OT rarely view it positively (so only in 1 Chron 29:18; cf. also the divine

endowment of the craftsmen in P in Exod 31:2–5; 35:30–35).

The motivation for the flood given by J in Gen 6:5, that the “aspiration” of the human heart was continually only evil, represents an assessment that is also characteristic of the prophetic use of the root *ḥšb* in relation to human “thinking, endeavoring, planning” (Isa 55:7; 59:7; 65:2; Jer 4:14; 18:12; Ezek 11:2; 38:10; Mic 2:1; Zech 7:10; 8:17). In the Psa, the notion that the enemies “conceive evil” against the worshiper is a theme of the description of the enemies in the lament (Psa 10:2; 35:4, 20; 36:5; 41:8; 52:4; 56:6; 140:3; cf. Jer 11:19; 18:18; Lam 3:60f.). Only Nah 1:11 and Psa 21:12 declare that people “conceive evil against God,” and Psa 21:12 immediately characterizes this act as ineffective. Although people may not be able to see through Yahweh’s “thoughts, plans” (Isa 55:8f.; Mic 4:12; cf. Psa 92:6f.), Yahweh knows people’s “thoughts” (Isa 66:18; Psa 94:11; 1 Chron 28:9) and is able to frustrate their “plans” (Psa 33:10; Job 5:12).

Characteristically, the prophets oppose the evil “aspirations” of people with Yahweh’s plan of disaster (cf. Mic 2:3 with v 1 and see Jer 18:11; 49:20; 50:45; 51:29). The prophetic literature discusses Yahweh’s plan to save in terms of *ḥšb* only in Jer 29:11. In contrast, the hymn praises the constancy of Yahweh’s (saving) plan (Psa 33:11 “thoughts of his heart”) and parallels it with Yahweh’s wondrous acts (→ *pl*?, Psa 40:6; cf. 92:6).

5. For Judaism and the NT, cf. H.-W. Heidland, *Die Anrechnung des Glaubens zur Gerechtigkeit* (1936); id., “λογίζομαι,” *TDNT* 4:284–92. For the Qumran literature not treated in this work, cf. F. Nötscher, *Zur theologischen Terminologie der Qumran-Texte* (1956), 52f.

W. Schottroff

## טהר *thr* to be pure

S 2891; BDB 372a; *HALOT* 2:369b; *TDOT* 5:287–96; *TWOT* 792; *NIDOTTE* 3197

1. The WSem. root *thr* “to be pure” may not be identified in the oldest Sem. texts (except for Ug.) and is used in the OT almost exclusively in books with late origins.

So far, the root has appeared in Ug. only in the pl. of a subst. that designates a “(brilliant) gemstone” (*KTU* 1.4.V.19, 34; *WUS* no. 1115; *UT* no. 1032). On Pun. examples see *DISO* 100.

On the basis of an assumed relationship to the roots *zhr/šhr* (Hebr. *šohʿrayim*

“midday,” *šōhar* in Gen 6:16 is “opening for light” according to some; Arab. *zhr* “to become visible”) and *zhr* “to shine” (Aram., Arab., Hebr. hi. and *zōhar* “brilliance”), “light, brilliance” is often accepted as the original meaning of the root (SNHL 35f.; J. A. Emerton, *ZAW* 79 [1967]: 236; J. H. Eaton, *JTS* 19 [1968]: 604f.). But Hebr. *šoh<sup>o</sup>rayim* “apex (of the sun)” and *šōhar* “roof (of the ark)” (cf. J. F. Armstrong, *VT* 10 [1960]: 328–33) belong to the common Sem. \**zahr-* “back” (P. Fronzaroli, *AANLR* 8/19 [1964]: 257, 271, 278).

The qal and the reduplicated stems of the verb are represented in the OT. The adj. *ṭāhōr* is just as frequent as the verb; the substs. *ṭōhar* “purity, purification,” *ṭoh<sup>o</sup>râ* “purity,” and *ṭ<sup>e</sup>hār* “brilliance” (Psa 89:45 txt?) are more rare.

2. The verb occurs 94x: qal 34x (Lev 18x, Num 5x), pi. 39x (Lev 13x, Ezek 8x, 2 Chron 6x), pu. 1x (Ezek 22:24) and hitp. 20x (Lev 12x, Neh 2x); *ṭāhōr* appears 95x (Exod 28x, Lev 21x, Num 8x, Gen and Deut 6x), *ṭōhar* 3x (Exod 24:10; Lev 12:4, 6), *ṭoh<sup>o</sup>râ* 13x (Lev 8x, Num, Ezek, Neh, and 1/2 Chron 1x each), and *ṭ<sup>e</sup>har* 1x (see 1).

Of the 94 instances of the verb, only Gen 35:2 and 2 Kgs 5 can be attributed with any certainty to the pre-exilic era, and all the others are in exilic and post-exilic texts. But the following phenomena make clear the dubiousness of drawing conclusions regarding intellectual history from lexical statistics: passages from the Naaman narrative in 2 Kgs 5:13f. are closely related formally to those in Lev 14:8f., etc.; and the cultic purification demanded in Gen 35:2 requires rites common in the post-exilic period. Nevertheless, it should be noted that the prophetic books prior to Jer do not know the root.

The same picture results for *ṭāhōr*. Of 95 examples in the OT, P (incl. H) alone contains approximately two-thirds. The dual occurrence in the Saul-David narrative in 1 Sam 20:26 is certainly ancient. Indeed, Deut, which has no examples of the verb, is also represented among the *ṭāhōr* texts (Deut 12:15, 22; 14:11, 20; 15:22; 23:11).

3. (a) In the OT, *ṭhr* refers to physical, ethical, and religious (cultic) purity (cf. H.-J. Hermisson, *Sprache und Ritus im altisraelitischen Kult* [1965], 84–99). Despite the sparsity of early occurrences, one can assume that ancient concepts of religious purity and impurity known in all cultures already found expression in earliest Israel with the aid of the roots *ṭhr* and *ṭm<sup>o</sup>* (cf. Akk. *ebēbu*, *elēlu*, and *zakû* “to be pure,” which indicate both physical and cultic purity, *AHW* 180f., 197f.; *CAD* Z:23–32).

The nearest synonyms for *ṭhr* refer almost exclusively to the fig. sense of moral purity: *brr* ni. “to be pure, keep oneself pure” (2 Sam 22:27 = Psa 18:27; cf. J. Blau, *VT* 7 [1957]: 387; Isa 52:11; *bar* “undefiled,” Psa 19:9; 24:4; 73:1; Job 11:4; Song Sol 6:9f.; *bārûr* “pure, undefiled,” Zeph 3:9; Job 33:3; *bōr* “purity,” 2 Sam 22:21, 25 = Psa 18:21, 25; Job 22:30), *zkh* qal “to be pure” (Mic 6:11; Psa 51:6; Job 15:14; 25:4; pi. “to keep

pure,” Psa 73:13; 119:9; Prov 20:9; hitp. “to purify oneself,” Isa 1:16; cf. A. M. Honeyman, *VT* 1 [1951]: 63–65; by-form *zkk qal* “to be pure, clear,” Job 15:15; 25:5; Lam 4:7; hi. “to make pure,” Job 9:30; *zak* “pure, undefiled,” Exod 27:20; 30:34; Lev 24:2, 7; Job 8:6; 11:4; 16:17; 33:9; Prov 16:2; 20:11; 21:8; cf. the PN *zakkay* Ezra 2:9; Neh 3:20 Q; 7:14), as well as *hap* “(morally) clean” (Job 33:9; cf. Wagner no. 108).\*

The pi. is mostly declarative (“to declare pure”; termed “delocutive” by D. R. Hillers, *JBL* 86 [1967]: 320–24), but often factitive (“to purify,” Lev 16:19, 30; Num 8:6f., 15, 21; Jer 33:8; Ezek 24:13; 36:25, 33; 37:23; 39:12; 43:26; Mal 3:3[bis]; Psa 51:4); cf. *HP* 34–41, 83. The hitp. means “to purify oneself,” the hitp. ptcp. describes the one who subjects oneself to purification (12x in Lev 14).

(b) Only P (incl. H) gives specific information concerning the necessity and execution of purification. Childbearing (Lev 12:7), leprosy (Lev 13; 14; 22:4), sexual emissions (Lev 15; 22:4; cf. Deut 23:11), contact with or consumption of unclean animals (Lev 11:32; 17:15), and proximity to or contact with corpses (Lev 21:1–4; 22:4; Num 6:6–9; 19:11, 14–16; cf. Ezek 22:24 txt?; 39:12) necessitate purification. Prior to dedication both the priests (Num 8:6f., 15) and the altar (Lev 16:19; Ezek 43:26) must be purified. According to Ezra 6:20, the Levites purify themselves before the Passover sacrifice. But P also speaks explicitly of the necessity for purification from disaster-bringing guilt (Josh 22:17). Although no fault may be determined in some cases of personal defilement (infection with leprosy, menstruation, Lev 15:28), an aspect of guilt seems always to be envisioned: because of a sudden death in his vicinity, the Nazirite has become defiled and has “sinned because of the corpse” (Num 6:9–11); even the altar, the sanctuary, and the tent of meeting must be purified (sanctified and atoned) “from (or because of) the impurities of the Israelites” (Lev 16:18–20). Although halakic *thr* evidence betrays no emotive content whatsoever, pertinent Ezek texts are associated with weighty accusations against indecency, impurity, and idolatry (Ezek 22:24 txt?; 24:13; 36:25, 33). The Chr’s history is concerned almost exclusively with purification from foreign abuses (Neh 13:9, 30; 2 Chron 29:15f., 18; 34:3, 5, 8).

Only clean animals may be sacrificed and eaten (Deut 14:7–20; Lev 11:4–47; Gen 7:2; 8:20 J; W. Kornfeld, “Reine und unreine Tiere im AT,” *Kairos* 7 [1965]: 134–47); the consumption of sacrificial meat was permitted only to the pure (Lev 22:4). Concurrent concepts and practices are very ancient: Saul explains David’s absence from the celebration of the new moon festival by supposing that David must have encountered something (*miqreh*, perhaps a pollutant) and he has become impure as a result (1 Sam 20:26). Idolaters also “sanctify and purify themselves” for their sacrificial meal (Isa 66:17). The need to be concerned with whether the consumer is clean or unclean is alleviated by Deut’s arrangements for

profane slaughter (Deut 12:15, 22; 15:22).

(c) The ceremonies of purification are: washing; sacrifice; blood, oil, and salt rites; cutting the hair; penance; cessation of work; and, for metal, “passing through the fire.” Both persons and things must be cleansed with water (Lev 11:32; 14:8f.; 15:13, 28; 17:15; 22:7; Num 8:7; 19:19; 31:23; Ezek 36:25). Persons must also usually wash or change clothing (Lev 13:6, 58; 14:8f.; 15:28; 17:15; Num 8:7; 19:19; 31:24); prior to the journey to Bethel, Jacob commands his people to remove foreign idols, to purify themselves, and to change clothes (Gen 35:2 E).

Sacrifice is mentioned only as an explicit means of purification: following childbirth (Lev 12:6, 8), after recovery from leprosy (Lev 14:4–7, 10–20, 21–32), and at the dedication of the altar (Ezek 43:26). Sacrifice effects not just purification, however, but also atonement (→ *kpr pi.*; Lev 12:8; 14:18–20, 21, 29, 31; Ezek 43:26); the two are often inseparable (Lev 14:19f., 29, 31). The purifying blood ritual also presumes a sacrifice (Lev 14; 16:19; Ezek 43:26). The blood ritual for the purification of leprosy is esp. complicated: one of two birds must be slaughtered and the other dipped in the blood together with cedar wood, crimson root, and hyssop; then the one to be purified is sprinkled seven times with the blood and the live bird is set free (Lev 14:4–7, 49–53). Cedar wood, crimson root, and hyssop are burned together with the red cow and the ashes preserved for the preparation of the water of purification (Num 19:1–10). The text gives no indication that the post-exilic community was aware of the original magic of these rites. Blood and oil should be placed upon the right earlobe, the right thumb, and the right big toe (Lev 14:15, 17, 26, 28), and the rest of the oil on the head of the one to be purified (14:18, 29). An application of salt appears among the atonement and purification rituals for the consecration of the altar in Ezek 43:24.

The leprosy ritual (Lev 13:33; 14:8f.) and the consecration of the Levites (Num 8:7; cf. Num 6:9) require cutting the hair. Prerequisites for atonement and purification on the day of Atonement include penance and cessation of work (Lev 16:29f.). The plundered metal implements of the Midianites must be subjected to fire for the purposes of purification (Num 31:23); *zāhāb tāhōr* means gold free from dross (24x in Exod 25–39 and otherwise only in 1 Chron 28:17; 2 Chron 3:4; 9:17).

(d) OT *thr* texts not yet mentioned understand purification openly as the expiation of guilt. Jeremiah doubts whether Jerusalem can ever be or wishes to be purified from the abominations of “harlotry” (Jer 13:27); yet God will one day initiate that which now seems impossible (33:8). Malachi too expects the purification of the priest only as a result of a process of purification on the day of Yahweh (Mal 3:3). According to Psa 51, purification is the expiation of sin solely on the basis of God’s mercifulness

(vv 3f.), although there are allusions to cultic purification ceremonies (v 9; cf. Kraus, *Psa*, CC, 1:504). Witnesses to common human sinfulness in the wisdom literature pose the rhetorical question whether any person can be pure (Job 4:17; Prov 20:9).

4. All religions exhibit analogies to OT concepts of purity (cf., among others, van der Leeuw 2:343–49; R. Hink and R. Rendtorff, *RGG* 5:939–44). The relationship to the Polynesian taboo has often been emphasized (quite effectively by Baentsch, *Exod–Lev*, HKAT, 354–56). The OT evidence, however, does not justify the interpretation of purification as essentially a liberation from demonic powers or an act of respect for a taboo. The hypothetical character of explanations offered in this sense is evident. On the one hand, rudiments of the rabbinic coupling of holy and unclean (see 5) are present (Num 19:7f., 10); on the other hand, it is said that purification occurs simultaneously with sanctification (Lev 16:19; cf. Ezek 36:23–25) or atonement (Ezek 43:26). It is apparent that pure and holy (→ *qdš*) are closely related in the OT witnesses, but pure and impure (→ *tmʿ*) are diametrically opposed.

Purity laws grow out of the post-exilic community's excessive demands for purity that also used archaic rites (de Vaux 2:463f.). The purification rites regulated in P do not offer a well-rounded picture of this remarkable apparatus, but it is a vivid picture. For the most part, one cannot demonstrate an inner-logical relationship between cultic practices and the goal, purification. Purification clearly does not involve a transferral mechanism, as K. Koch (*EvT* 26 [1966]: 225–31) suggests to explain the process of atonement. The “experiential content” of the ceremonies may not be discerned (von Rad, *Theol.* 1:279).

Nevertheless, one may infer from the texts that the post-exilic community's refined and controlling awareness of sin stands behind the purity laws. This promulgation of law was conditioned by the struggle against the danger of a new apostasy of God's people and by the endeavor to maintain distance from the pagan-impure. One should not undervalue the naive faith in the efficacy of the mere formal execution of the rite. The knowledge that purification (just like forgiveness) is exclusively God's decision and is a wonder effected and bestowed by God permeates both the eschatological witnesses (Jer 33:8; Ezek 36:25, 33; 37:23; Mal 3:3) and this legalism. The later discussion tends toward this evaluation of the *thr* texts (cf. W. H. Gispen, “Distinction between Clean and Unclean,” *OTS* 5 [1948]: 190–96; J. K. Zink, “Uncleanness and Sin,” *VT* 17 [1967]: 354–61, esp. 361).

5. In the Qumran literature (cf. H. Huppenbauer, “*thr* und *thrh* in der Sektenregel von Qumran,” *TZ* 13 [1957]: 350f.), the root is particularly important in 1QS and 1QH. The members of the community live in “purity”

(1QS 5:13; 6:16, 22, 25; 7:3, 16, 19, 25; cf. CD 9:21, 23; 10:10, 12); whoever does not join the community is impure and cannot be purified by any water of purification (1QS 3:4–8; cf. 4:21; 11:14). In 1QH “to purify” consistently refers to the expiation of sin (1QH 1:32; 3:21; 4:37; 5:16; 6:8; 7:30; 11:10, 30; 16:12). Cultic purity is one of the major themes of the Temple Scroll (according to the report of Y. Yadin, *BA* 30 [1967]: 135–39).

The rabbinic doctrine of purity develops a calculated casuistry with various degrees of purity (G. Lisowski, *Mischna: Jadajim* [1956], 2–4; id., *Tebul Jom* [1964], 4f.; id., *Uḳṣim* [1967], 2f.; on the equation of impure and holy, cf. id., *Jadajim* 49–51).

The revocation of rabbinic formalism in the determination of clean and unclean is among the revolutionary innovations of early Christianity (Mark 7:1–23; Matt 15:1–20; cf. R. Meyer and F. Hauck, “καθαρός,” *TDNT* 3:413–31).

F. Maass

### טוֹב *tôb* good

S 2896; BDB 373b; *HALOT* 2:370b; *TDOT* 5:296–317; *TWOT* 793a; *NIDOTTE* 3202

### יָטֵב *yṭb* to be good

S 3190; BDB 405b; *HALOT* 2:408a; *TDOT* 5:296–317; *TWOT* 863; *NIDOTTE* 3512

### יָפָה *yāpḥ* pretty

S 3303; BDB 421b; *HALOT* 2:423b; *TDOT* 6:218–20; *TWOT* 890a; *NIDOTTE* 3637

1. The root underlying Hebr. *tôb* is common Sem. (Berg., *Intro.* 220); it occurs frequently (sometimes with by-forms like *yṭb* and *tʿb*) verbally and in various nom. formations in Akk., Aram., and Arab., but is absent in Eth. (cf. also Ug.: *WUS* no. 1110; *UT* no. 1028; Lachish Letters: *DISO* 99, 106f.; Aram.: *KBL* 1078; *DISO* 98f., 106f.; Old Sarab.: Conti Rossini 159b).

The denominative Hebr. verb *tôb* (BL 392; Meyer 2:151) may be identified with certainty in the qal pf. pl. (Num 24:5; Song Sol 4:10) and inf. forms (abs. Judg 11:25; cs. Judg 16:25 Q; 2 Sam 13:28; Esth 1:10; on 1

Sam 2:26, cf. GKC §113u). Otherwise, the distinction between qal pf. (and ptcp.) and the adj. *ṭôb* is not always clear (cf. the varied categorizations in Mandl. and Lis.). *ṭôb* hi. occurs in 1 Kgs 8:18 = 2 Chron 6:8; 2 Kgs 10:30. The stem *yṭb* replaces *ṭôb* in the qal impf. and usually in the hi. (cf. the subst. *mêṭāb* “best”).

In addition to the adj. *ṭôb* “good” (often substantivized and used as an abstract *ṭôb* or fem. *ṭôbâ* “the good”), related terms are the subst. *ṭôb* II “fragrance” (2 Kgs 20:13 in contrast to Isa 39:2; Jer 6:20; Song Sol 7:10; cf. KBL 349f.; J. Gray, *Kgs*, OTL [19702], 702) and the abstract *ṭûb* “goodness, well-being,” etc. The form ending in *-ût* is completely missing from Hebr. (cf. Aram., *DISO* 99; Akk.).

The adj. *ṭāb* (Dan 2:32; Ezra 5:17) and the pe. pf. *ṭ<sup>ע</sup>ēb* (Dan 6:24; BLA 141) occur in Bibl. Aram.

PNs with *ṭôb* or *ṭûb* (cf., however, H. Bauer, *ZAW* 48 [1930]: 75) are <sup>א</sup>*bîṭûb*, <sup>א</sup>*ḥîṭûb*, and *ṭôbîyâ(hû)* (cf. *IP* 153; on the double name *ṭôb* <sup>א</sup>*dônîyâ* arisen through dittography in 2 Chron 17:8 see Rudolph, *HAT* 21, 250), in the Aram. realm *ṭabrimmōn*, *ṭāb<sup>ע</sup>ēl/ṭāb<sup>ע</sup>al* (cf. Wildberger, *Isa* 1–12, CC, 284, 294); cf. also Huffmon 207; Stamm, *AN* 234–36, 294f. On *ṭôb* as the name of a region in the northern Transjordan, cf. A. Jirku, *ZAW* 62 (1950): 319; E. Höhne, *BHH* 3:1996.

2. The word family *ṭôb/yṭb* (excl. proper names) is attested in the OT 741x (738x Hebr., 3x Aram.). According to Lis. *ṭôb* occurs in the qal 18x, hi. 3x; *yṭb* qal 44x, hi. 73x. Alongside *ṭôb* II (3x, see 1), *ṭûb* (32x), and *mêṭāb* (6x), the adj. *ṭôb* dominates with 559 occurrences: Psa 68x, Prov 62x, Eccl 52x, Gen 41x, 1 Sam 37x, Jer 36x, Deut 28x, 1 Kgs 24x, 2 Chron 23x, Esth 22x, 2 Sam 21x, Isa 13x, 2 Kgs, Job, and Neh 12x each, Judg 11x, Ezek 9x, Josh and 1 Chron 8x, Num and Lam 7x, Ezra 6x, Exod, Lev, and Hos 5x, Amos, Mic, and Zech 4x, Ruth 3x, Jonah, Nah, Song Sol, and Dan 2x, Joel and Mal 1x; it does not occur in Obad, Hab, Zeph, and Hag.

3. The scope of *ṭôb* is very broad. Consequently, Eng. translation requires many adjs. in addition to “good,” according to the various contexts: “agreeable, pleasant, satisfying, satisfactory, favorable, useful, purposeful, right, beneficial, ample, pretty, well-formed, fragrant, friendly, benevolent, joyous, worthy, valiant, true,” etc. (cf. the lexicons). Without rigidly or completely systematizing, one may categorize the most important spheres in which *ṭôb* (or the verb) appears as: (a) suitability for a purpose, (b) an indication of quality, (c) characterization of people, (d) evaluations of decisions, esp. in wisdom literature, and (e) *ṭôb* in contrast to *ra<sup>ע</sup>*. Section 4 will then treat: (a) *ṭôb* as a designation for the ethically good in the religious sense, (b) statements concerning God, and (c) the abstract

concept.

(a) *tôb* frequently implies a judgment concerning the suitability of an obj. or a criterion for a person or a purpose (e.g., Gen 3:6 “good for food”). If the subj. of such a statement is a person, no ethical judgment is intended, but the effect of a behavior (e.g., 1 Sam 19:4, David’s deeds are advantageous for Saul; 25:15, people helpful/beneficial to us; Prov 31:18, the activity of the housewife on behalf of the family; with a stronger emphasis on feeling, 1 Sam 1:8 “worth more than ten sons”; cf. Ruth 4:15; cf. also *tôb* in conjunction with “word,” etc.: 1 Kgs 12:7 = 2 Chron 10:7, not just amiable but also beneficial words; 1 Kgs 22:13 = 2 Chron 18:12, words of the prophet beneficial to the king; Psa 45:2, graceful speech; Prov 15:30, a good message; 25:25, good news). References to Yahweh’s speech envision words that promise life during oppression and uncertainty: Josh 21:45; 23:14f.; 1 Kgs 8:56; Jer 29:10; 33:14; Zech 1:13 (the weakened “friendly words” is rare: Jer 12:6 *tôbôt*, cf. Prov 12:25).

The subj. of *tôb* is frequently a declarative clause or an inf. construction. Often these constructions imply an evaluation or a decision concerning the necessary requirements for deliverance and well-being (Exod 14:12; Num 14:3; 1 Sam 27:1; 2 Sam 14:32; Gen 2:18 is esp. impressive as God’s evaluation of human existence, “it is not good that the man should be alone”). In the broader sense, deliberations more gnomic in nature belong here too (Job 10:3; Eccl 2:24 *tôb* substantivized; 6:12; 11:7; Lam 3:26f.; see 3d). Otherwise, this usage refers to well-being itself as an existential possibility (impersonal: Num 11:18; Deut 5:33 and 15:16 *tôb qal*; 1 Sam 16:16, 23; Hos 2:9; Psa 128:2; personal: Isa 3:10; Jer 44:17; Psa 112:5; in a weakened sense in 1 Sam 20:12, “it is good for David”; in the regulation concerning the escaped slave in Deut 23:17, *battôb lô* should not be understood as “where it pleases him” but as “where he has an opportunity to live”).

*ytb qal le* “to go well for someone” expresses the same idea (the statement of a situation: Gen 40:14; Psa 49:19 txt em; the goal of a required or planned behavior: Gen 12:13; Deut 4:40; 5:16, 29; 6:3, 18; 12:25, 28; 22:7; 2 Kgs 25:24; Jer 7:23; 38:20; 40:9; 42:6; Ruth 3:1). The fact that “to go well” means life is expressly stated in Gen 12:13; Deut 4:40; 5:16, 33 (*tôb qal*); 22:7 (cf. Deut 6:3, 18 with similar promise content).

If people (Gen 12:6; Num 10:29) or (usually) God produce the situation of well-being, *ytb hi.* is used (with *le*, likely the older form: Gen 12:16; Exod 1:20; Num 10:29; Josh 24:20; Judg 17:13; 1 Sam 25:31; Ezek 36:11 txt em; Psa 125:4; with an acc.; Deut 8:16; 28:63; 30:5; 1 Sam 2:32; Jer 18:10; 32:40f.; Zech 8:15; Psa 51:20; Job 24:21; with *im.* Gen 32:10, 13; Num 10:32; Mic 2:7 txt?). The translation “to benefit, prove oneself friendly” (GB 298b) is formally correct; but the content seems to have less to do with the deed itself (perhaps Psa 119:68; see 4b) than with the consequence of the deed.

(b) *tôb* designates quality, esp. in conjunction with “land” and agricultural terms. Exod 3:8; Num 13:19; 14:7; and Judg 18:9 speak of a “good land.” Information concerning its fertility indicates that the potential to sustain life is of primary concern (cf. Deut 23:17). But the conspicuously Dtn-Dtr formulation “the good/beautiful land” no longer emphasizes objective usefulness (see esp. Deut 3:25; with <sup>ʿ</sup>*ereṣ*: Deut 1:35; 3:25; 4:21f.; 6:18; 8:7, 10; 9:6; 11:17; Josh 23:16; 1 Chron 28:8; with <sup>ʾ</sup>*dāmâ*: Josh 23:13, 15; 1 Kgs 14:15). By virtue of the fact that God has sworn (Deut 8:10; 9:6; Josh 23:13, 15f.) that Israel will possess it (Deut 6:18; 9:6) as an inheritance (4:21), the land becomes a benefit of salvation, and the term *tôb* itself becomes static (cf. Gen 49:15; in a broader sense, Deut 28:12 too). But when agricultural designations are not related to salvation, the notions of usefulness and convenience remain dominant (e.g., 1 Sam 8:14; 1 Kgs 21:2; 2 Kgs 3:19, 25; Ezek 17:8; 34:14, 18; 1 Chron 4:40; the parable of the fig basket explicates the antithetical *raʿ* “bad” as “unsuited for consumption”; finally, 2 Kgs 2:19 and in a way Judg 9:11; Hos 4:13 also belong here).

<sup>ʿ</sup>*ēṣtôb* (2 Kgs 3:19, 25) is the “fruit tree” in contrast to the shade tree. What was once an evaluation has become a fixed term. In the course of this development *tôb* can become an abs. designation of quality and can indicate that a thing has an essential characteristic in a particular degree (of oil: Isa 39:2, but see 1 on 2 Kgs 20:13; Psa 133:2; of gold: *zāhāb*, Gen 2:12; 2 Chron 3:5, 8; Aram. *dehab* Dan 2:32; *ketem* Lam 4:1; cf. also Ezra 8:27 and already Ug. *ṭb* of *yn* “wine” and *ksp* “silver,” WUS no. 1110; UT no. 1028).

(c) Texts in which *tôb* characterizes people form their own group. The older texts refer to a suitability for particular, mostly military, tasks. An ethical understanding (“good person”) is lacking at first (see, however, 4a). Reference can be made e.g., to an elite (1 Sam 8:16; 9:2; 1 Kgs 20:3; Amos 6:2; so also probably 2 Kgs 10:3). In 2 Sam 18:27 Ahimaaz is a “happy man” because he brings good news (of victory). But *tôb* is understood ethically in 1 Sam 15:28 (influence of prophetic thought?); 1 Kgs 2:32 (par. *ṣaddîq* “righteous”; according to Noth, BK 9/1, 11, perhaps an insertion); Mic 7:4 (par. *yāšār* “upright”; txt?); 2 Chron 21:13.

Passages in which a gen. characterizing the figure, the appearance, depends upon *tôb* point toward a more external evaluation (“pretty,” etc.: Gen 24:16; 26:7; 1 Sam 16:12; 2 Sam 11:2; 1 Kgs 1:6; Esth 1:11; 2:2f., 7; Dan 1:4; cf. Nah 3:4; Dan 1:15; in an abs. usage, but in the same vein, Gen 6:2; Exod 2:2; Judg 15:2).

In this meaning *tôb* competes with more specialized terms for “pretty” like *yāpeh*

(42x, in addition to Jer 46:20, *y<sup>c</sup>pēh-pîyâ*, *yph* qal “to be pretty” 6x, pi. “to adorn” 1x, hitp. “to beautify oneself” 1x, *y<sup>o</sup>pî* “beauty” 19x; the root occurs most frequently in Song Sol 16x, Ezek 15x, and Gen 9x), *nā<sup>o</sup>wēh* (9x, from the root *n<sup>o</sup>h* “to be pretty, comely,” qal 3x), and Aram. *šappîr* (Dan 4:9, 18; Aram. *špr* pe. “to be pleased” 3x; Hebr. *špr* qal 1x in Psa 16:6, cf. Wagner no. 316). Cf. also W. Grundmann, *TDNT* 3:543f.; von Rad, *Theol.* 1:364f.

*tôb* is frequently associated with → *lēb* “heart” in various ways (e.g., 1 Kgs 8:66 = 2 Chron 7:10; Prov 15:15; Eccl 9:7; Esth 5:9; *tôb* qal: Judg 16:25; 1 Sam 25:36; 2 Sam 13:28; Esth 1:10; *y<sup>t</sup>b* qal: Judg 18:20; 19:6, 9; 1 Kgs 21:7; Ruth 3:7; *y<sup>t</sup>b* hi.: Judg 19:22; Eccl 11:9; *tûb*: Isa 65:14; similar in substance, Prov 17:22). This usage treats *lēb* as the seat of emotions to indicate the person’s well-being, not moral quality. The pars. *šāmēah* “happy” and *šimhâ* “joy” underscore this meaning (1 Kgs 8:66 = 2 Chron 7:10; Eccl 9:7; Esth 5:9). *y<sup>t</sup>b* qal/hi. expresses the onset of this condition as an intention or consequence (Eccl 7:3 diverges and accents ethics more strongly, but the *y<sup>t</sup>b<sup>ec</sup>ēnē* in Judg 18:20 approaches “to be pleased”).

In conjunction with this usage, the combination *yôm tôb* is the day that, apart from any magical concept, is good for people because one causes it to be good (1 Sam 25:8; Esth 8:17; 9:19, 22; cf. Zech 8:19). Cf. also *šēbâ tôbâ* “high/beautiful age” (Gen 15:15; 25:8; Judg 8:32; 1 Chron 29:28); age is neither good nor morally valuable per se, but it is joyous when one may die fulfilled and satisfied with life (Gen 25:8; 1 Chron 29:28; slightly different, Eccl 7:10).

(d) Every adj. per se implies a judgment. The life orientation of *tôb* results in the fact that it frequently indicates quite generally a positive, subjective attitude toward a situation, although it is often unspecified whether this evaluation is correct. A message, advice, a word, etc., is good if it seems favorable (e.g., Gen 40:16; 1 Sam 9:10; 2 Sam 17:7, 14; 18:27; 1 Kgs 2:38, 42; 2 Kgs 20:19 = Isa 39:8; Isa 52:7); a deed or a matter (*dābār*) is good if it is beneficial (Exod 18:17; Deut 1:14; 1 Sam 26:16). This characterization can occasionally imply an ethical judgment (Neh 5:9; 2 Chron 12:12 “there was still something good in Judah,” cf. Rudolph, *HAT* 21, 234; 19:3; 2 Sam 15:3 “your matter is good” = “you must receive justice” is in between these senses).

As in Deut, *tôb* can become a particle of agreement (Gen 24:50; 1 Sam 20:7; 2 Sam 3:13; Ruth 2:22; 3:13; cf. also Isa 41:7).

Various figures of speech confirm the evaluative nature of the term: (1) Something is *tôb* (more ingressively *y<sup>t</sup>b* qal) in the judgment (*b<sup>ec</sup>ēnē* “in the eyes”) of those who expect benefit, assistance from it. The subj. is usually impersonal, a thing (exceptions: Num 36:6; 1 Sam 29:6, 9, not “dear” but “helpful/salvific like an angel”; Esth 2:4, 9; 8:5; Neh 2:5). The

gen. dependent on *b<sup>e</sup>c<sup>h</sup>n<sup>e</sup>* is a person able to assess suitability for a goal and to decide (an action that can be thoroughly indifferent ethically; cf. Gen 19:8; Judg 19:24; 1 Sam 11:10; Jer 26:14; Mal 2:17). This person can be a ruler (Gen 41:37; 45:16; 1 Sam 14:36, 40; 24:5; 29:6, 9; 2 Sam 19:19, 28, 38; 2 Kgs 10:5; Esth 1:21; 2:4, 9), a patriarch or an individual (Gen 16:6; 20:15; Lev 10:20; Deut 1:23; Josh 9:25; 1 Sam 1:23; 2 Sam 19:39; 24:22 = 1 Chron 21:23; 1 Kgs 21:2; Jer 40:4; Esth 3:11), or a people or a group (Gen 34:18; Num 36:6; Josh 22:30, 33; 1 Sam 18:5; 2 Sam 3:19, 36; 18:4; Esth 8:8; Zech 11:12). In later texts *al* can replace *b<sup>e</sup>c<sup>h</sup>n<sup>e</sup>* (Esth 3:9; 5:4, 8; 7:3; 9:13; Neh 2:5, 7; 1 Chron 13:2; to be distinguished from this usage are Esth 7:9 [cf. also G. R. Driver, *VT* 4 (1954): 236]; 1 Sam 20:13 txt?), as can *lipn'* (Eccl 2:26; 7:26; Esth 5:14; Neh 2:5f.). If "God" is dependent upon *b<sup>e</sup>c<sup>h</sup>n<sup>e</sup>* as a gen., the reference is to that which corresponds to his will (Num 24:1; Judg 10:15; 1 Sam 3:18; 2 Sam 10:12; cf. 1 Chron 19:13; 2 Sam 15:26; 1 Kgs 3:10; 2 Kgs 20:3 = Isa 38:3), to his cultic (Lev 10:19; 2 Chron 31:20 with *lipn'*) or ethical (Deut 6:18; 12:28; 2 Chron 14:1) norm. God can gain no assistance from human action (cf. Psa 50:12f.).

(2) *tôb* appears more frequently than other adjs. with *min* of comparison ("better than"), so that two options are given for choice. The decision itself is not emphasized, to the extent that it involves assessment (Gen 29:19; Judg 15:2; 1 Sam 9:2; 1 Kgs 21:2), promise (Isa 56:5), or wish (1 Kgs 1:47, *y<sup>t</sup>b* hi.). Decisions on the basis of prior deliberation are apparent, however, already in Judg 8:2 (the gleaning of Ephraim); 11:25 (the self-assessment of the Ammonites); 1 Kgs 19:4 (Elijah's suitability for office); Esth 1:19 (cf. 3c on 1 Sam 15:28). This element becomes esp. clear in questions (Judg 9:2; 18:19; 2 Kgs 5:12) or in dubious assessments (Jonah 4:3, 8; Lam 4:9).

This phenomenon occurs particularly often in wisdom literature, which was relevant to life because of its desire to aid correct decision making and accurate evaluation and rating of life's values. The scope of this interest reaches from platitudes (the enjoyment of honey, Prov 24:13; 25:27; suffering because of a shrewish wife, Prov 21:9, 19; 25:24) to decision making, incl. insights into the true values that were not a priori unequivocal: thus what "is good" (Psa 111:10; 119:71f.; Prov 15:23; 17:5, 26; 18:5; Eccl 5:17) and what "is better" (Prov 3:14; 8:11, 19; 12:9; 15:16f.; 16:8, 16, 19, 32; 17:1; 19:1f., 22; 22:1; 25:7; 27:10; 28:6; similarly Job 13:9). In this respect, Qohelet must also be mentioned (Eccl 4:3, 6, 9, 13; 5:4; 6:3, 9; 7:1–3, 10, 18; 9:4), although his relevance to life is characteristically colored by his unique concept of fortune (3:22).

Because wisdom sayings express a fixed order, they are not exhausted by pragmatism but spill over into the realm of ethics (Prov 17:26; 18:5; 24:23; cf. also 2:20). The same *tôb* occurs accented by prophetic

piety in 1 Sam 15:22 and Mic 6:8, and in a broader sense probably also in Jonah 4:4. On the influence of Israelite piety on the shape of wisdom, see J. Fichtner, *Die altorientalische Weisheit in ihrer israelitisch-jüdischen Ausprägung* (1933); on the relation of wisdom and ethics elsewhere, see W. Richter, *Recht und Ethos* (1966).

The use of *yṯb* hi. in the profane sense of “to do something according to the regulations (i.e., carefully)” lies on this plane of wisdom thought (Exod 30:7; Deut 5:28; 18:17; 1 Sam 16:17; 2 Kgs 9:30; Isa 23:16; Jer 1:12; Ezek 33:32; Hos 10:1; Mic 7:3 txt em; Psa 33:3; Prov 15:13; 17:22). In this context, the inf. abs. can become a simple adv. (GKC §113k), characterizing an orderly execution (Deut 13:15; 17:4; 19:18, of regulations for legal proceedings; also Deut 9:21; 27:8; 2 Kgs 11:18; Jonah 4:4, 9).

(e) *ṯôb* is frequently associated with its antonym *raʿ* “evil, bad” (→ *rʿ*). The following examples should be mentioned: the merism “from the good to the evil” or “good or evil” in the meaning “whatever” (Gen 31:24, 29; 2 Sam 13:22; cf. Lev 5:4 with *yṯb* hi. and *rʿ* hi.; see H. A. Brongers, *OTS* 14 [1965]: 100–114); moreover, statements related to “action” and “consequence” (e.g., 1 Sam 24:18; 25:21; Jer 18:10; Psa 35:12; Prov 31:12), indications of quality (Lev 27:10, 12, 14, 33), and statements concerning God’s acts of judgment or salvation (see 4b).

One may still occasionally recognize how this opposition of the two options requires or spares a conscious decision (cf. e.g., Num 13:19; 24:13; 2 Sam 14:17; 19:36; 1 Kgs 3:9; Isa 41:23; Jer 10:5; 40:4 [see 3d]; 42:6; Zeph 1:12; the pair of terms is used formulaically as yes-no in Gen 24:50).

In all these passages, the decision is basically made in terms of what benefits life and what harms it, without resulting in a primarily moral judgment (on Isa 5:20, see 4a). One should also understand “knowledge of good and evil” in Gen 2:9, 17; 3:5, 22 against this background (→ *ydʿ* III/1c; meaning no. 2 listed there is represented here; that the fall narrative has no counterpart in the myths of Israel’s neighbors argues from the outset against an interpretation in terms of the realization of sexuality [no. 3]; the desire for the capacity of moral judgment could not be objectionable [no. 1]; von Rad, *Gen*, OTL, 81, and Brongers, op. cit. 105, assume a merism [*ṯôb wārāʿ* = “everything,” no. 4], yet the desire for comprehensive divine wisdom would surely have to be expressed otherwise). The emphasis placed upon this decision can be seen e.g., in the fact that the mention of the tree of knowledge does not fit smoothly in the context (H. J. Stoebe, *TZ* 18 [1962]: 387–90). The interpretation that with the knowledge of good and evil the human being lays claim to the capacity to decide concerning what benefits life and what harms it, thus to full autonomy (H. J. Stoebe, *ZAW* 65 [1953]: 188–204), does not therefore introduce a notion foreign to the

OT but unfolds and deepens implications of the word *tôb* itself.

Isa 7:15f. describes the capacity to choose between good and evil, a stage of maturity not yet attained by the newborn; because the promise is understood as one that will soon be realized, it cannot refer to physical maturity or an age of twenty years (G. W. Buchanan, *JBL* 75 [1956]: 114–20), but only to the consciousness of an independent will. The same is true of Deut 1:39 (cf. Num 14:31).

The sanction formula of P's creation account (Gen 1:4, 10, 12, 18, 21, 25, 31) probably stands in a conscious relationship to the theme of the fall. Regardless of the origin and syntactic significance of the formula (W. F. Albright, FS Robert 22–26), it maintains that the world desired by God is in order (W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* [19672], 59–63), that it suits its purpose.

4. (a) The meaning of *tôb* as “good” in a religioethical sense is not the result of a late spiritualization. The impetus is given by *tôb*'s direct relationship to life. In the background stands the knowledge that life is possible only through the order to which the *tôb* declaration simultaneously relates because there is no life outside it.

Wisdom too wishes to teach the way of life (cf. Prov 2:19; 5:6; 6:23; 12:28; 15:24; 16:17). It is the “way of the good” (Prov 2:9, 20; cf. 2:12 “way of the evil”). Wisdom too seeks morality and recognizes the good person (Prov 2:20; 12:2; 13:2; 14:14, 19). The norms of this way are “justice” and “righteousness” (Prov 2:9; cf. 12:28; 16:31), the aids “wisdom” and “insight” (Job 34:4; Eccl 7:11; cf. Prov 4:7; 9:6). Indeed, these contexts do not lack expressions that point beyond actual wisdom thought (Prov 2:9; 14:22; 15:3). Consequently, one may not construe an exclusive contrast between piety and wisdom (on the influences, see 3d), nor may one see this piety as merely a form of wisdom thought, for it is oriented beyond norms to God himself.

This impetus is deepened in the prophetic proclamation (e.g., 1 Sam 15:22; Mic 6:8; cf. Hos 6:6); it can share individual formulations with wisdom. Particularly informative is the proclamation of Amos (Amos 5:4, 14f.). The notion of life occupies a decisive position; granting life is a matter for the living God. One can find it in community with him only if one observes his directives. Thus “to seek God” and “to seek the good” become nearly identical concepts.

Here too one must make a decision. One must recognize and acknowledge something as good in order to love or to hate it, in order to be able to do it or not to do it (cf. e.g., Isa 5:20; Jer 13:23; Amos 5:15; Mic 3:2; Psa 14:1, 3; 34:15; 37:3, 27; 38:21; but also Prov 11:27; 14:22; Job 34:4), but the final decision is God's (cf. Eccl 12:14; in an ironic reversal, Mal 2:17; cf. also the → *ûlay* “perhaps” in Amos 5:15).

Thus pious speech, like wisdom (see above), can call a person's way

“good” (e.g., 1 Sam 12:23; 1 Kgs 8:36 = 2 Chron 6:27), suggesting a dual conception: that the way is good, proper, per se and that it leads to a good end (profane in 1 Sam 24:20; on the roots of this concept in OT faith, cf. A. Kuschke, *ST* 5 [1952]: 106–18; F. Nötscher, *Gotteswege und Menschenwege in der Bibel und in Qumran* [1958]; → *derek*).

The combination of *yṭb* hi. with *derek* “way” or *ma<sup>ʿ</sup>ālīm* “deeds,” particularly characteristic of Jer, belongs here (Jer 7:3, 5; 18:11; 26:13; 35:15). The translation “to improve” does not completely convey the sense. The intention is more “to make right, bring into order” (cf. Jer 2:33: “to make right” for a particular purpose). The obj. can be implied, so that *yṭb* hi. used abs. means “to behave correctly, well” (Jer 4:22; 10:5; 13:23; Isa 1:17 too). This usage is lacking in wisdom literature. Gen 4:7 is also usually understood similarly; in view of the difficulty of the text it is probable that it is already a later interpretation of a no longer correctly understood tradition. This text also certainly contains an ellipsis (cf. G. R. Castellino, *VT* 10 [1960]: 442–45).

In this vein, *tôb* appears as a nom. obj. of *ʿśh* “to do” or related expressions (Ezek 18:18; 36:31; Psa 14:1, 3; 34:15; 37:3, 27; 38:21; 53:2, 4; Prov 14:22 *ḥrš* “to prepare”); passages that treat simple willingness to be of assistance in interpersonal realms should not be included here (e.g., Gen 26:29; 1 Sam 24:18; Prov 31:12). Judging from their contexts, one would also place passages with *tôb* hi. here (1 Kgs 8:18 = 2 Chron 6:8; 2 Kgs 10:30).

Thus the person can also be called “good” (beyond the narrow reference “to be suitable for,” “elite”) and thereby be characterized religioethically (e.g., 1 Sam 2:26 [cf. v 24]; 15:28; 1 Kgs 2:32; Psa 125:4; Prov 13:22; Eccl 9:2; Esth 1:19; 2 Chron 21:13; with *yṭb* qal, Nah 3:8; on wisdom see 4a).

(b) Finally, orientation of the term *tôb* to God results in the designation of God himself as *tôb* in later texts, esp. in the Psa (Psa 25:8; 34:9; 73:1; 86:5; 119:68; 135:3; 145:9; Lam 3:25; 2 Chron 30:18; cf. Nah 1:7). Yahweh is represented here by the name (Psa 52:11; 54:8), the spirit (Psa 143:10; Neh 9:20, an extensive allusion to Num 11:17, 23ff.), or reference is made to his mediated (Psa 119:39; Neh 9:13) or direct activity (*yād* “hand”: Ezra 7:9; 8:18; Neh 2:8). One may add the “good word” as “promise” (Josh 21:45; 23:14f.; see 3a).

The predicate applied to God occurs with particular frequency in the introductory formula of the liturgical declaration of praise (Jer 33:11; Psa 100:5; 106:1; 107:1; 118:1, 29; 136:1; Ezra 3:11; 1 Chron 16:34; 2 Chron 5:13; 7:3); characteristically, the formula is often supplemented by “for his → *ḥesed* endures forever.”

Even when a text does not expressly state for whom God is good (cf. Nah 1:7; Psa 73:1; 86:5; 145:9; Lam 3:25), *tôb* does not signify an

abstraction, for God's *hesed* includes a priori his willingness to aid people. Consequently, the root *tôb* can supplement or replace *hesed* in later texts and esp. in the versions (H. J. Stoebe, *VT* 2 [1952]: 248). But it points beyond the concept that God causes it to go well for someone and does someone good (*yṯb* hi.; cf. the abs. hi. ptcp. *mēṯṯb*, Psa 119:68) and shifts the view from the gift to the giver. Because God himself is *tôb*, one can receive both good and evil, love and pain, from his hand (Job 2:10; Lam 3:38).

Hymnic references to the praise of God itself as *tôb* (Psa 92:2; 147:1; similarly, Psa 118:8f.; Lam 3:26) do not signify pragmatism, but are grounded in the *tôb*-ness of God and in his acts of grace prior to the hymn of praise (see also Psa 73:28).

The juxtaposition of *tôb*, *hesed*, and *ḥayyîm* "life" in Psa 63:4 is instructive. The customary translation of Psa 69:17 and 109:21, "Your steadfast love is good," is too static; a hendiadys is more likely: "Your kindness is gracious" (cf. Kraus, *Psa*, CC, 2:58f., 336f.).

(c) Abstract terms were already applied to some extent to clarify individual complexes of terms; they are appended here only in summary.

The most straightforward term is *mēṯāb* "the best"; this designation of quality accompanies only "land" (Gen 47:6, 11), "field, vineyard" (Exod 22:4[bis]), and "herd" (1 Sam 15:9, 15).

The original meaning of *ṯûb* is "proceeds, what comes to someone" (Gen 45:18, 20, 23; Isa 1:19; Jer 2:7; Ezra 9:12; Neh 9:25, 36; accompanying terms are "to eat," "to satiate oneself," "fruit") and, more generally, "fortune, property, goods, chattel" (Gen 24:10; Deut 6:11; 2 Kgs 8:9; Job 20:21; Neh 9:25). *tôb* can also represent *ṯûb* here with essentially the same meaning, although one must naturally be aware of uncertainties as to vocalization (1 Sam 15:9; 1 Kgs 10:7; Isa 55:2; Jer 5:25; Zech 1:17; Psa 34:11, 13; 85:13; 104:28; Job 22:18; *tôbâ*: Job 22:21; Eccl 6:3). With the intention to emphasize that God causes the good, *ṯûb* acquires the meaning "blessing, salvation" (Psa 27:13; 65:5; 128:5; Neh 9:25, 35; more generally "well-being," Job 21:16; Prov 11:10; somewhere in between, perhaps, in Jer 31:12, 14; cf. also Psa 65:12 *tôbâ* ). As a final result, *ṯûb* comes to mean "goodness" and thereby closely approximates *hesed* (Exod 33:19; Isa 63:7; Hos 3:5; Psa 25:7; 31:20; 119:66 txt?; 145:7; cf. *tôb* in Psa 23:6; *tôbâ* in Psa 68:11). *ṯûb lēb* as "joy of the heart" occurs in Deut 28:47 and Isa 65:14; *ṯûb* as "beauty" in Hos 10:11 and Zech 9:17.

It is difficult to find a clear distinction between *tôb* and *tôbâ*. One may argue with some reservation that *tôbâ* speaks more neutrally of the act of goodness per se, while the given context provides the necessary nuance

(cf. e.g., Judg 8:35; 1 Sam 24:19). This neutrality is esp. perceptible in phrases with *šh* “to do” and similar verbs (Gen 44:4; Num 24:13, to act at one’s own discretion; Judg 9:16; 1 Sam 24:18f.; 25:21, but v 30, clearly “blessing”; 2 Sam 2:6 [cf., however, G. Buccellati, *BeO* 4 (1962): 233; W. L. Moran, *JNES* 22 (1963): 173–76; D. R. Hillers, *BASOR* 176 (1964): 46f.; J. S. Croatto, *AION* 18 (1968): 385–89]; Jer 18:20a; Psa 35:12; 38:21a, but in v 21b *tôb* is moral goodness; 109:5; Prov 17:13; contrasts to *rā‘ā* refer to a behavior not justified by one’s own action). This general sense is also shown in 2 Chron 24:16 (“to make oneself deserving,” Rudolph, *HAT* 21, 276); Jer 18:20b (“to speak for the good,” similarly Jer 15:11, with *tôb*); 2 Kgs 25:28 = Jer 52:32 (“to speak cordially”); Neh 5:19 and 13:31 (“to remember for the good”). By contrast, *šh tôb* accents more strongly the moral aspect of an action (Ezek 18:18; Psa 14:1, 3; 34:15; 37:3, 27; similarly Isa 5:20[bis]; Amos 5:14f.; Mic 3:2; Psa 38:21b; Prov 11:27; likely also Prov 11:23; 14:22; on the decisional character of the term, see 4a).

This more general meaning evolves into the more definite concept “fortune, success, well-being.” In contrast to *tôbâ*, if *tôb* intends to be concrete it is usually no longer clearly apparent (*tôbâ*: Deut 23:7; Psa 16:2; 106:5; Job 9:25; 21:25; Eccl 4:8; 5:17; 6:6; 7:14 alongside *tôb*, this is probably an illustrative application; 9:18; Lam 3:17; Ezra 9:12; Neh 2:10; *tôb* is more frequent: Num 10:29; Jer 8:15; 14:19; 17:6; Hos 8:3 accents “fortune”; Mic 1:12; Psa 4:7; 25:13; 34:13; 39:3; 103:5; 107:9; Job 7:7; 21:13; 30:26; 36:11; Prov 13:21; 16:20; 17:20; 18:22; 19:8; 28:10 txt?; Eccl 2:1, 3; 3:12[bis], 13, 22; 5:17; 8:12f., 15).

If God grants this fortunate circumstance, *tôbâ* means “blessing, salvation” (Exod 18:9; 1 Sam 25:30; 2 Sam 7:28 = 1 Chron 17:26; 1 Kgs 8:66 = 2 Chron 7:10; Jer 18:10; 32:42; 33:9). *tôb* can occur in the same meaning here too, while the notion of the concrete form of the circumstance is also involved (Num 10:32, cf. v 29; Isa 52:7; Jer 29:32; Psa 21:4; 34:11; 84:12; 119:65; 122:9; Prov 24:25; 2 Chron 6:41; 10:7).

This content of the term *tôb* is characteristically elaborated when *tôb/tôbâ* is constructed with *l’l’tôbâ* occurs in a more general meaning, “to good effect,” in Neh 2:18; but it is usually Yahweh who, as Lord, creates this status of blessing and salvation (*tôbâ*: Deut 28:11; 30:9; Jer 14:11; 24:5; Psa 86:17; Ezra 8:22; *tôb*: Deut 6:24; 10:13; Jer 32:39). One should also apply this interpretation in Gen 50:20 (the translation “to make the best of” is not entirely satisfactory—God had caused the evil plan to become salvation; cf. Psa 199:122). Prophetic proclamation underscores the individual’s responsibility by the juxtaposition of *tôbâ* and *rā‘ā*. Yahweh need not act to bless; he can also act to judge. This notion occurs already

in Amos 9:4; it characterizes Jeremiah's message to a special degree (Jer 21:10; 24:6; 39:16; 44:27).

5. The LXX renders *ṭôb* mostly with *agathos*, also with *kalos* and *chrēstos*. On post-OT usage, cf. W. Grundmann, "ἄγαθός," *TDNT* 1:10–18; E. Beyreuther, "Good," *DNTT* 2:98–107.

H. J. Stoebe

## טָמַא *ṭm*<sup>ʔ</sup> to be unclean

S 2930; BDB 379a; *HALOT* 2:375b; *TDOT* 5:330–42; *TWOT* 809; *NIDOTTE* 3237

1. The verb *ṭm*<sup>ʔ</sup> is known beyond Hebr. in Aram. and Arab. (cf. *LS* 279f.); it does not occur in Akk., in Ug., or in inscriptions contemporary with the OT.

In addition to the verb (qal, ni., pi., pu., hitp., and hotpa<sup>ʕ</sup>el, GKC §54h; BL 285), the adj. *ṭāmē*<sup>ʔ</sup> "impure" and the subst. *ṭum*<sup>ʔ</sup> "impurity" occur in the OT (Mic 2:10 txt? *ṭom*<sup>ʔ</sup>, or qal inf.?).

2. The verb occurs 160x in the OT. Exilic and post-exilic texts have an impressive concentration: Lev, Num (P), and Ezek contain over 85% of the occurrences (Lev 85x, Ezek 30x, Num 23x). The qal occurs 75x (Lev 58x, Num 10x, Ezek 4x, additionally, Hag 2:13[bis] and Psa 106:39), ni. 18x (Num 7x, Ezek 6x, Lev and Hos 2x, Jer 1x), pi. 50x (Lev 17x, 12x in Lev 13:3–59 and 20:25 in the meaning "to declare unclean"; Ezek 14x, Num 5x, 2 Kgs 23:8–16 4x, Gen 34 and Jer 3x each; also Deut 21:23; Isa 30:22; Psa 79:1; 2 Chron 36:14), pu. 1x, (Ezek 4:14), hitp. 15x (Lev 8x; Ezek 5x; Num 6:7; Hos 9:4), and hotpa<sup>ʕ</sup>el 1x (Deut 24:4).

*ṭāmē*<sup>ʔ</sup> occurs 89x (Lev 47x, twice in 13:45; incl. 5:2b, which is usually emended to *yāda*<sup>ʕ</sup> in accordance with vv 3f.; cf. Elliger, HAT 4, 55f.; Num 12x, Deut 8x, Ezek 5x, as well as Josh 22:19 P; Judg 13:4; Isa 6:5[bis]; 35:8; 52:1, 11; 64:5; Jer 19:13; Hos 9:3; Amos 7:17; Hag 2:13f.; Job 14:4; Eccl 9:2; Lam 4:15; 2 Chron 23:19), *ṭum*<sup>ʔ</sup> 37x (Lev 18x, Ezek 8x, as well as Num 5:19; 19:13; Judg 13:7, 14; 2 Sam 11:4; Zech 13:2; Lam 1:9; Ezra 6:21; 9:11; 2 Chron 29:16).

3./4. Regarding the term and concepts of impurity, see → *ṭhr*: pollution and impurity require purification.

Transitive "to pollute" is also expressed by *g*<sup>ʔ</sup> II pi. (Mal 1:7) and hi. (Isa 63:3), "to become unclean" by *g*<sup>ʔ</sup> ni. (Isa 59:3, form?; Zeph 3:1; Lam 4:14) and pu. (Mal 1:7,

12; Ezra 2:62; Neh 7:64), and “to make oneself unclean” by *gʾl hitp.* (Dan 1:8[bis]); cf. *gōʾal* “defilement,” Neh 13:29.

Gen 34:5, 13, 27 describe the rape of Dinah as “defilement.” Bathsheba sanctified herself after her period by the washing “of her impurity” (2 Sam 11:2, 4). Samson’s mother, at the announcement of his birth, received the command not to eat anything unclean (Judg 13:4, 7, 14); this command is consistently associated with the prohibition against wine and intoxicating drink. For Hosea, Israel is defiled by harlotry (Hos 5:3; 6:10); consequently, it must eat unclean food in Assyria (9:3) and will become impure, as by the consumption of “bread of mourning” (9:4; cf. Wolff, *Hos*, Herm, 155; Rudolph, KAT 13/1, 172, 176). Amos warns Amaziah that he will die in a strange, unclean land (Amos 7:17), and Isaiah fears that he is lost (contra Wildberger, *Isa 1–12*, CC, 249f.) because, as a man of unclean lips living among a people of unclean lips, he has seen the King, Yahweh Sabaoth (Isa 6:5). Jeremiah denounces the pollution of land and temple (Jer 2:7; 7:30; 32:34) and Israel’s self-defilement (2:23; cf. Psa 106:39). In contrast, Psa 79:1 speaks of the nations’ profanation of the temple. According to the Dtn law, the land becomes polluted if one hanged is not taken down by nightfall (Deut 21:23), and a woman has defiled herself through remarriage after her divorce (24:4). Josiah defiled the sites of idol worship (2 Kgs 23:8, 10, 13, 16; cf. Isa 30:22; Jer 19:13).

Deutero-Isaiah promises that unclean persons will no longer come to Jerusalem (Isa 52:1; cf. 35:8); the returnees should not touch anything unclean (52:11). Such notions were practiced according to the Chr’s history (Ezra 6:21; 9:11; 2 Chron 23:19; 29:16; the opposite occurs in 36:14). Haggai testifies to the contagious effect of impurity: If one who has become unclean through contact with a corpse touches anything consumable, it too becomes unclean; likewise, sacrifices brought by the unclean become unclean (2:13f.). Zech 13:2 announces exile for the prophets and the “unclean spirit.”

According to the testimony of Ezekiel, defilement results esp. from idolatry (Ezek 20:7, 18, 30f., 43; 22:3f.; 23:7, 13, 17, 30; 36:18; 37:23, mostly in combination with the word *gillûlîm* “idols”; cf. Zimmerli, *Ezek*, Herm, 1:186f.) and adultery (18:6, 11, 15; 22:11; 33:26). Disregard for the sanctuary excites the prophet’s fiercest indignation (5:11; 23:38). He predicts the punishment of the radical defilement of the temple at Yahweh’s command (9:7) and declares that Yahweh himself has made Israel impure through the sacrifice of the firstborn and wishes to fill it with horrors (20:26; cf. Fohrer, HAT 13, 112–14; Zimmerli, *Ezek*, Herm, 1:384f.).

In P and in H, the use of the root is concentrated in Lev 11 (verb 20x, adj. 14x), Lev 13 (verb 13x, 11x declarative, adj. 8x), Lev 15 (verb 25x, adj. 4x, subst. 7x), and Num 5; 9; 19. Various fixed formulae are frequently

used: “it shall be unclean for you,” only in Lev 11 and Deut 14, without “for you,” esp. in Lev 13; “he is unclean until evening,” in Lev 11 and 15; “so that he becomes unclean thereby,” only in Lev 15:32; 18:20, 23; 19:31; 22:8 (cf. Elliger, HAT 4, 150ff.nn.4, 14, 18; 240n.18).

5. On the process of defilement and the types of impurity according to the priestly literature, as well as on the development in the rabbinic era, see → *thr*. On the LXX and the NT, see F. Hauck, “μιαίνω,” *TDNT* 4:644–47.

F. Maass

## 𐤆𐤃 *yād* hand

S 3027; BDB 388b; *HALOT* 2:386b; *TDOT* 5:393–426; *TWOT* 844; *NIDOTTE* 3338

1. The biradical root \**yad-* underlying Hebr. *yād* is common Sem. (Berg., *Intro.* 212; P. Fronzaroli, *AANLR* 8/19 [1964]: 259, 273, 279) and originally meant both “arm” (→ *z<sup>ʿ</sup>rôa<sup>ʿ</sup>*) as well as “hand” (thus in Akk.; cf. H. Holma, *Die Namen der Körperteile im Assyrisch-Babylonischen* [1911], 116f.; in the latter meaning, however, *idu* was displaced by *qātu* “hand”; cf. Dhorme 138f.). In NWSem., *yd* still sometimes means “arm” too (cf. Hebr. *bên yādayim*, Zech 13:6; and Ug. *bn ydm* “shoulders,” *UT* no. 1072; Gen 49:24, *z<sup>ʿ</sup>rô<sup>ʿ</sup>ê yādāyw* ?; Song Sol 5:14, which compares *yādāyw* to “golden cylinders”).

The Amarna correspondence still exhibits the alternation in meaning mentioned in that *ina qātīšu* “in his hand” has been glossed by *badiu* (EA 245:35) and *qātu* by *zuruḥ* (= *z<sup>ʿ</sup>rôa<sup>ʿ</sup>*) (EA 287:27; 288:34). The double meaning is also present in Arab. (cf. e.g., Wehr 1105).

The depiction of the *d* phoneme in the form of the hand in the Old Eg. script implies a prehistoric usage of the same word *yd* in the Eg. realm.

The short form *bd* with the prep. *b* occurs in Ug. (cf. also Syr. *bad* for *beyad*). The elision of the *y* also occurs in *šb<sup>ʿ</sup>d* or *šb<sup>ʿ</sup>id* “sevenfold” (*UT* no. 1072). The confusion of *beyad* and *b<sup>ʿ</sup>ad* in the OT can consequently be attributed to either phonetic or orthographic grounds (*byd* instead of *b<sup>ʿ</sup>d*: Isa 64:6; *b<sup>ʿ</sup>d* instead of *byd*: 1 Sam 4:18; Joel 2:8; R. Gordis, *JBL* 62 [1943]: 341–44).

On possible denominatives from *yād*, see *SNHL* 38.

2. With over 1,600 occurrences, *yād* is one of the most frequently

represented words in the OT:

*beyad* in Hag 2:10 is not counted (*BHS: ʔel*); Lis. overlooks Hos 12:11. In Exod 32:19; Lev 9:22; 16:21; Job 5:18; Prov 3:27 and 2 Chron 18:33 (cf. 1 Kgs 22:34) Q is preferred; Deut 32:27 is counted as a sg., Hab 3:10 txt? as a pl.

The word occurs most frequently in 1 Sam and Jer (here over 50x in combination with *be*), followed by Exod and Ezek.

3. (a) In the proper sense *yād* means the hand of a person (Gen 38:28; 1 Kgs 13:4–6) or of an angel (Dan 10:10).

Objects one may grasp by hand are often more closely characterized as such by the addition of *yād* (Num 35:17, stone; 35:18, wooden implement; Ezek 39:9, staff). *yād* is used exclusively of the *human* hand in Deut 8:25 and Job 34:20. The lex talionis threatens the amputation of the hand (Exod 21:24; cf. Lev 24:19; Alt, *KS* [19643], 1:343; Noth, *Lev*, OTL, 182; D. Daube, *Studies in Biblical Law* [1947], 128) for the woman who touches the genitals of a man other than her husband during a fight between men (Deut 25:11f.) and, under some conditions, for the lying witness (Deut 19:16–21). Concerning the Menetekel inscription written on the wall of Belshazzar’s palace by a mysterious human hand (Dan 5:5), cf. Eissfeldt, *KS* [1966], 3:210–17.

More or less synonymous with *yād* in this meaning are → *zʿrôa* “arm,” *yāmîn* “right hand,” *šʿmōʾl* “left hand,” *kap* “hollow of the hand, palm” (192x, excl. Lev 23:40; Psa 21x, Num 20x, Lev, Isa and Job 13x each, Ezek 12x; sg. 106x, du. 63x, pl. 23x; of God’s protecting hand, Exod 33:22f.), and *ḥopnayim* “the hollows of both hands” (6x). See also *ʔegrōp* “fist” (Exod 21:18; Isa 58:4; *HAL* 11).

(b) An expanded use of *yād* is common Sem. and results from the position of the hand (or the arm) on the body and from its usage:

(1) Like Akk. *idu* (cf. *ana idi* “beside”), *yād* means “side” (of a city, Josh 15:46; of a path, 1 Sam 4:13; 2 Sam 15:2; of a gate, 1 Sam 4:18; of a country, Gen 34:21; of a people, 2 Chron 21:16) or “bank” (of a river, Exod 2:5; Num 13:29; Deut 2:37). The meaning “that which is set aside” also belongs in this context (Deut 23:13 “toilet”).

(2) The giving and receiving hand leads to the meaning “portion, segment” in Gen 35:4; Jer 6:3; 2 Kgs 11:7; etc. (cf. P. Joüon, *Bib* 14 [1933]: 453; cf. Akk. *manû ina/ana qātā* “to distribute as a portion”; fem. pl.

Hebr. *yādôt*, Akk. *qātātī*; Ug. *yd*, *KTU* 1.14.III.23?; cf. *UT* no. 1072).

(3) Pegs serve like hands to connect panels (Exod 26:17; 36:22), the handles on the bronze sea (1 Kgs 7:35f.; cf. Ug. *ydt*, *KTU* 4.158.9), and the armrests on the Solomonic throne (1 Kgs 10:19, fem. pl. *yādôt*).

(4) The use of the hand to point may be the basis for the meaning “memorial” (1 Sam 15:12; 2 Sam 18:18; Isa 56:5) or “path marker” (Ezek 21:24). In contrast to *nēs* “banner,” this usage may concern inscribed stones (Zimmerli, *Ezek*, Herm, 1:442). M. Delcor (*JSS* 12 [1967]: 230–34) is inclined to explain the designation of such steles on the basis of the hands represented on them and compares Pun. and Can. steles with hands in relief (cf. K. Galling, *ZDPV* 75 [1959]: 7).

(5) In this context the meaning of *yād* as “phallus” may also be mentioned (Isa 57:8, 10?; 1QS 7:13; cf. Ug. *yd* and Mand., see *UT* no. 1072). Attempts have been made (M. Delcor, op. cit. 234–40) to explain this use of *yād* archaeologically from stelae represented as phalluses, stylistically as a euphemism (cf. Isa 6:2; 7:20), and philologically from the root *wdd/ydd* “to love” (Ug., Arab.). In the last case, *yād* “phallus” would then have nothing to do with *yād* “hand” (cf. A. Fitzgerald, *CBQ* 29 [1967]: 368–74).

(c) The fig. sense of “power,” etc., often coincides with the analogously used → *z<sup>ē</sup>rôa<sup>ç</sup>* “arm.” Thus *yād* often stands for a person’s power or capacity to rule over others (1 Chron 18:3), to exercise force (1 Sam 23:7), to punish (Psa 21:9), to save oneself from a dangerous situation (Josh 8:20), to grant gifts in abundance (only of the king: 1 Kgs 10:13; Esth 1:7; 2:18), to act zealously (Prov 10:4; 12:24), etc.

This power is made concrete in property (Lev 25:28) and wealth (Lev 5:7; 25:47; 27:8; cf. G. Rinaldi, *BeO* 6 [1964]: 246); cf. *ḥayil* “power, wealth, army” and → *kōaḥ*.

(d) Literal, expanded, and fig. meanings may not always be clearly distinguished in the various combinations of words involving *yād* with a verb or a prep.:

(1) The following belong to the daily realm: to lay the hand on the mouth in the sense of “to keep silent” (Mic 7:16; Job 21:5, etc.); to swing the hand in the meaning “to threaten” (Isa 10:32; 11:15; 19:16; Zech 2:13; Job 31:21); cf. with *kap*: to clap hands, for joy (Isa 55:12), in anger (Num 24:10), to do homage to a king (2 Kgs 11:12), in malicious glee (Nah 3:19; Lam 2:15). One lays one’s hands upon one’s head as an expression of sorrow (2 Sam 13:19; Jer 2:37; *AOB* nos. 195, 198, 665; *ANEP* no. 459; *BHH* 3:2022).

(2) Expressions arising from hand gestures belong to the legal sphere of life: in an oath one raises one’s hand or hands (*rûm* hi., *nš<sup>ç</sup>*; cf. Akk. *našû*

*qāta/qātā*, Gen 14:22; Dan 12:7) to God in heaven, or the oath taker places a hand under the thigh of the one whose wish one pledges to fulfill (only attested in the patriarchal era: Gen 24:2; 47:29). Contact with the sexual organ may indicate sterility or the annihilation of the descendants in the event of the failure to fulfill the vow (Speiser, *Gen*, ABC, 178). *ntn yād taḥat* “to subject oneself to someone by an oath” is comparable (1 Chron 29:24).

One shakes hands when one gives a pledge (Prov 6:1 with *kap*), confirms an agreement (Ezra 10:19) or a statement (2 Kgs 10:15). The expression *yād l’yād* is the formula and gesture of affirmation, specifically for giving a pledge (Prov 11:21; 16:5).

In contrast to *bišgāgā* “unintentionally” (→ *šgg*; Lev 4:2, 22, 27, etc.; Num 15:27–29), *b’yād rāmā* “with a high hand” refers to a deliberate transgression in Num 15:30 (Exod 14:8 and Num 33:3 refer to Yahweh’s hand).

(3) Although Akk. *mullû ana qāt* “to fill the hand” means the transfer of a person, a population, a realm, etc., into the hands of a particular individual (*AHW* 598), Hebr. *ml’ pi. yād* is restricted to the cultic realm and means the investiture of priests and Levites (Exod 28:41; 29:29; cf. 32:29; Lev 8:33; Judg 17:5, 12; 1 Kgs 13:33; 2 Chron 13:9, etc.).

(4) In numerous other usages, employed in manifold areas of life, *yād* is more or less weakened in combination with a prep. (most frequently *be* and *min*).

In association with *mîyad* “from the hand of,” → *nsl* hi. signifies deliverance from the power of an adversary (Exod 3:8; Isa 47:14) and occurs esp. in the language of prayer (Psa 22:21; 31:16, etc.), in the legal sphere (in regard to blood vengeance, Num 35:25), in the politicomilitary realm (Josh 9:26; 1 Sam 7:14), and in the description of Yahweh’s saving might, esp. from political enemies (Deut 32:39; Judg 8:34; Isa 43:13, etc.). The use of → *yš<sup>c</sup>* hi. “to deliver” with *mîyad* resembles the use of *nsl* hi.; by contrast, → *pdh* “to ransom” (Hos 13:14; Psa 49:16) and → *g’l* “to redeem” (Jer 31:11; Psa 106:10) are used solely with Yahweh as subj.

In combination with *mîyad*, → *qnh* “to gain” signifies the transfer of purchased property from the hand of the one into the hand of the other (Gen 33:19; Lev 25:14; Ruth 4:5, 9, etc.), → *šp* “to gather,” the gathering of donations (only 2 Chron 34:9), → *lqh* “to take,” the taking of a pledge or offering (Gen 38:20; Num 5:25; of atonement, Isa 40:2; sacrifice, Judg 13:23), but esp. the military capture of particular regions (Gen 48:22; Deut 3:8; 1 Kgs 11:35; 1 Chron 18:1, etc.).

In association with *mîyad*, → *plṭ* pi. “to deliver” (Psa 71:4) belongs to the language of prayer; → *drš* “to seek, demand” (Gen 9:5; Ezek 33:6), → *bqš* “to seek, require” (1 Sam 20:16), → *nqm* “to avenge” (2 Kgs 9:7), and → *špṭ* “to obtain justice for” (2 Sam 18:19, 31) belong to the legal sphere.

With *beyad*, → *ntn* means “to make available, give, make subject to,” etc. (Gen 27:17; 2 Sam 10:10; 16:8), but esp. in the military and legal realms, delivery into the hands of the enemy or the adversary (generally, 1 Kgs 18:9; Jer 26:24, etc.; regarding blood vengeance, Deut 19:12). On account of his power, Yahweh is the one who hands over the enemies. Consequently, the expression characterizes the diction associated with seeking oracles before battle (2 Sam 5:19; 1 Kgs 22:6) or with the war oath (Num 21:2; Judg 11:30); in the ephod oracle cf. *sgr hi*. “to deliver” (1 Sam 23:20) and *mkr* “to sell” (Judg 2:14; 10:7; 1 Sam 12:9; Joel 4:8, etc.).

→ *dbr pi. beyad* “to speak through (subj.: God)” in the Dtr and post-exilic literature under its influence characterizes esp. the prophet sent by Yahweh as his messenger to the people (1 Kgs 16:12; 17:16; 2 Kgs 9:36; 10:10; 14:25; Jer 37:2; Hag 1:1, 3; 2:1, 10 [MSS]; Mal 1:1; but Moses in Exod 9:35; Num 17:5; 27:23; cf. also Isa 20:2 and Hos 12:11; furthermore, the expression *qabû ina qātî* “to speak through someone” in the Amarna Letters, EA 263:20f.). In contrast, *šwh pi. beyad* refers to the commandments God announced to his people through Moses’ mediation (Exod 35:29; Lev 8:36; Num 15:23; Josh 14:2; 21:8; Neh 8:14, etc.). The expression refers to the prophets only in the later literature (Ezra 9:11, but in the context of the conquest; 2 Chron 29:25, regulations for the Levites). *ntn beyad* “to give through” also occurs in this meaning in an isolated text (Lev 26:46, Moses). → *šlh b<sup>c</sup>yad* indicates the delivery of a gift (Gen 38:20; 1 Sam 16:20), an animal (Lev 16:21 pi.), or the execution of a commission (1 Kgs 2:25; cf. Exod 4:13) through an agent.

For combinations with other preps., see the lexicons.

4. The OT discusses the hand of God anthropomorphically over 200x (either in the expression *yad yhwh* or with a suffixed or an abs. *yād*).

(a) First, *yād* designates the irresistible might of Yahweh (Deut 32:39) and the acts of God that result from it. It is prefigured in other Sem. expressions (Akk. *qāt ilī, qāt ištar*, although only in reference to illnesses afflicting a person; cf. Dhorme 145, as well as Psa 32:4; 39:11; 1 Sam 5:6; 6:3, 5; Ug. *byd btl[t [nt] KTU 1.18.1.14*: “[help] from the hand of the virgin [Anat]”). Consequently, it is questionable whether the strong emphasis of language concerning Yahweh’s hand (and arm) derived impetus from the exodus narratives. God’s omnipotence is manifest in the creation (Isa 45:12; 48:13; Psa 8:7; Job 26:13) and maintenance of the world (Job 12:9), in the aid he renders (Isa 51:16; Psa 119:173), in the salvation he bestows (cf. the later pious discussion of God’s gracious hand, Ezra 7:6, 9; Neh 2:8, 18), and in the punishment he exercises (Psa 32:4; 39:11; Job 12:9), but esp. also in the saving act of the people’s liberation from Egypt (“with a strong hand,” Exod 13:9; cf. 3:19; 6:1; Deut 6:21; 7:8; 9:26; Dan 9:15; “with a strong hand and an outstretched arm,” Deut 4:34; 5:15; 7:19; 11:2; 26:8; Jer 32:21; Psa 136:12; in 1 Kgs 8:42 = 2 Chron 6:32 not directly related to Egypt; → *z<sup>c</sup>rôa<sup>c</sup>*, → *h<sup>c</sup>zq*).

(b) The discussion of Yahweh’s hand being (1 Kgs 18:46; Ezek 3:22;

33:22) or falling (Ezek 8:1) upon the prophets is substantially different. It is not simply intended as a prophetic formula for the reception of the word (F. Häussermann, *Wortempfang und Symbol in der alttestamentlichen Prophetie* [1932], 22ff.) perceived as a burden and a restraint, but also as visionary ecstasy (P. Volz, *Der Geist Gottes* [1910], 70). By virtue of Yahweh's hand, Elijah runs before Ahab's chariot from Carmel to Jezreel (1 Kgs 18:46). The state of ecstasy is consciously pursued through music (2 Kgs 3:15). The grasp of God's hand had compelling impact on the writing prophets Isaiah (8:11), Jeremiah (15:17), and Ezekiel, who exhibits the formula in seven passages associated with vision reports (Ezek 1:3; 3:14, 22; 8:1; 33:22; 37:1; 40:1; cf. Zimmerli, *Ezek*, Herm, 1:117f.; → *h̄zq*).

(c) According to P. Humbert ("Etendre la main," *VT* 12 [1962]: 383–95, 388), *šlh̄ yad* "to extend the hand" means "a banal and rapid hand gesture, perhaps in a purely natural and physical sense of acting in order to seize an object, perhaps with the moral connotation of an undertaking or a hand movement chiefly hostile in nature, but, very rarely, pacific. A fundamental human gesture." By contrast, *n̄th yādô ʿal* "to extend his hand against" refers only to God or to his representative (as in Exod). The gesture indicated by this expression relates to the task of executing divine punishment or refers directly to those under punishment. It never has a beneficial significance (in contrast to *šlh̄ yad*, for which such is possible: Gen 48:14; Prov 31:20).

(d) *ntn yad leyhwh* "to submit to Yahweh" (R. Kraetzschmar, *Die Bundesvorstellung im AT* [1896], 47; cf. J. Wellhausen, *Reste arabischen Heidentums* [1897], 186; profane: 2 Kgs 10:15; Ezek 17:18).

(e) In prayer one raises the hand (hands) to God in heaven (Deut 32:40) or extends it (Isa 1:15, *kap*), in accordance with ancient Near Eastern custom (Akk. *nišqāti* "raising the hand").

5. Qumran literature largely perpetuates the OT use of *yād*, except that it does not mention deliverance from Egypt. The usage in the NT is similar; cf. BAGD 879f. s.v. *χείρ*.

A. S. van der Woude

**יָדָהּ *ydh* hi. to praise**

S 3034; BDB 392a; *HALOT* 2:389a; *TDOT* 5:427–43; *TWOT* 847; *NIDOTTE* 3344

1. *ydh* hi. "to praise, confess" (*hitp*. "to confess") has counterparts in

Bibl. Aram. (*ydh* ha. “to praise” Dan 2:23; 6:11), Palm. (*DISO* 104), and later Aram. (KBL 1080f.), as well as more distantly in Arab. and Eth. (KBL 363f.).

A relationship to *ydh* /*ydd* I “to throw, shoot” (Mandl. 457) can be discounted.

In addition to the verb (hi., hitp.), the subst. *tôdâ* “song of thanks, thanksgiving offering” is in use. The noun *huyy<sup>e</sup>dôt* “song of thanks” in Neh 12:8 is uncertain (cf. Rudolph, HAT 20, 190). Cf. also the PNs *hôdawyâ*, *hôdawyâhû* (*IP* 32, 194f., 219).

2. The verb occurs 100x in the hi. (as well as 2x in Aram. ha.) and 11x in the hitp. The noun *tôdâ* is attested 32x (Psa 12x, Lev 5x, Neh 4x), *huyy<sup>e</sup>dôt* 1x (see 1).

*ydh* hi. occurs in the Psa 67x (doubled in Psa 67:4, 6; 75:2); there exists thus a very characteristic accumulation (besides 20x in Ezra–2 Chron).

3. Nontheological usage is rare: Gen 49:8, “Judah, your brothers praise you” (folk-etymological explanation of the name *y<sup>e</sup>hûdâ*; cf. Gen 29:35); Psa 45:18 (obj. king); 49:19 txt em, a rich man praises his soul, that it does itself good; Job 40:14, “Then I (Yahweh) will also acknowledge that your right hand helps you.”

There is no fixed use, but the few passages with the nontheological usage still permit several conclusions: (a) A clearly perceptible difference from → *hll* pi. is demonstrated. *hll* pi. in a nontheological usage praises the beauty of a person or the glory of a city; the obj. of *hll* pi. is an essence. The few passages with the nontheological usage of *ydh* hi. offer reactions to an act or a behavior: Gen 49:8, the ascension of the tribe of Judah; Psa 45:18, the rule of the king; Psa 49:19, the acquisition and enjoyment of wealth; Job 40:14, “that your right hand helps you.” The profane usage of the two verbs indicates, then, that *hll* pi. is the reaction to an essence, *ydh* hi. the response to an action or a behavior. The original relationship in theological usage of *ydh* hi. to narrative and *hll* pi. to descriptive praise of God (song of thanks or hymn, resp.; cf. Westermann, *PLP*; otherwise, F. Crüsemann, *Studien zur Formgeschichte von Hymnus und Danklied in Israel* [1969], 9f.) corresponds to the characteristics of the nontheological usage of the terms. (b) The few passages do not permit a sure determination of the basic meaning; it may be established, however, that *ydh* hi. does not mean, and should not be translated, “to thank” in any of these passages. The basic meaning “to thank” for *ydh* hi. should be excluded from the outset (see 4e).

4. In theological usage, verb and noun have two meanings: the more

frequent and fixed in established forms is “to laud, praise, thank” (4a-g); it also means “to confess (sins)” (hi. 6x, hitp. 11x, *tôdâ* 2x; see 4h). The concept that binds the two meanings could be rendered “to acknowledge” or “to confess”; we could speak of a “confession of praise.” Both meanings acknowledge either the delivering activity of God or one’s own trespasses, one’s own failures. When one confesses one’s own failure, one acknowledges God, against whom one has sinned (Josh 7:19; somewhat differently, H. Grimme, *ZAW* 58 [1940/41]: 234–40).

(a) By far the most frequent semantic category is the voluntative, “I will praise Yahweh.” This form occurs 29x in the sg. (in addition to 2x with *tôdâ*, in the pl. 5x: Psa 44:9; 75:2(bis); 79:13; 1 Chron 29:13; with *tôdâ*, Psa 95:2). It constitutes the vow of praise at the end of the individual lament and recurs as the pronouncement of praise or the decision to praise at the beginning of the individual psalm of praise (psalm of thanksgiving), although it also occurs in other passages. Informative for the sense of the verb in this form is the only passage in which it occurs outside the diction of the Psa: Gen 29:35, Leah’s statement at the birth of her son Judah explaining his name: “Now I will praise Yahweh!” The situation clarifies the statement: the birth of the child fills the long-neglected mother with joy and allows her to state a vow or promise. “I will praise” is therefore a joyous reaction to an experience that elicits a spontaneous promise. This statement of the joyous mother does not intend, at least not exclusively, that expressed by the Eng. “to thank.” The *happa’am* “now” indicates that the birth of the child has brought about a reversal of her suffering, and *from now on* she will praise Yahweh, i.e., joyous attention to Yahweh shall characterize the period following this experience. The passages in the Psa refer to the same process, e.g., Psa 28:7, “Then I was helped and my heart rejoiced; I will praise him with my song!” Here too *ydh* hi. is a reaction to an experience; the vow to praise God grows out of the joy of this experience. Other passages are: Isa 12:1; 25:1; Psa 7:18; 9:2; 18:50 = 2 Sam 22:50; Psa 30:13; 35:18; 42:6, 12; 43:4f.; 52:11; 54:8; 57:10; 71:22; 86:12; 108:4; 109:30; 111:1; 118:19, 21, 28; 119:7; 138:1f.; 139:14; with *tôdâ*, Psa 56:13; 69:31.

The phrase “I will praise” always relates to God’s act on behalf of the one who speaks it. The act can be named or alluded to in the same phrase, e.g., Psa 118:21, “I will praise you, for you have heard me!” or Isa 12:1; 25:1; Psa 18:50, “because . . .”; 52:11; 139:14. The conclusion of the lament psalm presupposes the requested act of God in the promise to praise (Psa 35:18; 54:8; 71:22; 109:30, etc.). Or the assurance is expressed that the hour for God’s praise will come (Psa 42:6, 12; 43:4f.). That the same phrase in the same linguistic form can be pronounced in such varied situations indicates the existential significance of this laudatory

response to God's saving, hearing, liberating activity. All these situations share the spontaneous impulse or decision of this laudatory response. This commonality is also demonstrated by the intensifying accompanying phrases "with the whole heart" (Psa 9:2; 86:12; 111:1; 119:7; 138:1) and "forever" (Psa 30:13; 52:11; pl. 44:9; 79:13). The accompanying phrases "before the nations" (Psa 18:50; 57:10; 108:4) and "in the great assembly" (Psa 35:18) demonstrate the rhetorical character of the act of praise; cf. the accompaniment with musical instruments in 43:4; 71:22. The latter two additions occur more frequently with *hll pi.*, the former two are typical of *ydh hi.*

The dominance of the impv. call to praise involving *hll pi.* and the declaration of the intention to praise involving *ydh hi.* once again reveals a significant semantic distinction: whereas *hll pi.* indicates primarily the praise of God through the festive rejoicing of the community in worship, *ydh hi.* means primarily the participation of the individual in God's praise, based on a decision arising from the individual's own experience. Even though *ydh hi.* occurs in the pl. form throughout (see 4a), the distinctive of this stem is that an individual chooses to praise as a result of his/her own decision. In whatever form, *ydh hi.* always suggests overtones of an "I will"; the relationship to the other meaning "to confess (sin)" can be understood only in this manner. The usage in the 1st per. sg., therefore, expresses the sense of the verb most clearly.

(b) *ydh hi.* parallels *hll pi.* in the impv. call to praise, but it also occurs independently. This independence apparently results from assimilation; in this genre *hôdû* "praise!" is more or less equivalent to *hal'û* "laud!" (Psa 30:5; 97:12; 100:4b; 105:1 = 1 Chron 16:8; Isa 12:4; Jer 33:11; with *tôdâ*, Psa 100:4a; 147:7). This equivalence is true also for the impv. clause, "Praise Yahweh for he is good, indeed, his goodness endures forever!" (Psa 106:1 = 1 Chron 16:34; Psa 107:1; 118:1, 29; 136:1; cf. 136:2f., 26; 2 Chron 20:21). This clause, which occurs more often than all other impv. clauses combined and which appears even more frequently in the Chr work in formulaic abbreviations, still permits the recognition of the unique significance of *ydh hi.*: it broadens the praise of God beyond a specific act to the praise of God's mercy, which motivates this act. The one-sidedness of this call to praise—the fact that God is lauded not in his majesty and goodness (as otherwise in descriptive praise) but only in his goodness, as is also the case in several passages with the 1st per. sg. (Psa 42:6; 54:8; 71:22; 118:28; 138:2)—is grounded in this expansive character. The praise of God for deliverance, being heard, or liberation broadens to include the praise of God's goodness. Even in this most frequent impv. call to praise with *ydh hi.*, the specific significance of the verb is thus still perceptible.

(c) In a few passages, *ydh* hi. also occurs in the juss. and voluntative forms. The function of the juss. “let them praise” is demonstrated in the clause that recurs at the end of each of the four sections of Psa 107: “Let them praise Yahweh for his goodness and for his wonders to humanity” (Psa 107:8, 15, 21, 31). The four sections of this psalm, a “liturgy of thanksgiving,” assemble narrative praise from four typical situations (wandering in the desert, imprisonment, illness, ship in distress) and combine them into a cultic psalm of praise that encompasses the four narratives in one summary, descriptive psalm of praise (107:1, 33–43). Also evident is the transformation of the “I will praise” (which would have introduced each of the four narratives) into the “let them praise,” necessitated by the combination of the individual experiences of God’s aid into the common praise of the community in worship. An organic and meaningful relationship of the form “let them praise” to the form “I will praise” is demonstrated. The juss. occurs elsewhere in Psa 67:4(bis), 6(bis); 89:6; 99:3; 138:4; 140:14; 145:10. The passages 76:11 txt?; 106:47 = 1 Chron 16:35; Psa 142:8 express the relationship between God’s deliverance and the praise it elicits in a purpose clause.

(d) Like *hll* pi., *ydh* hi. almost never occurs outside the Chr work in declarative and narrative forms; both verbs function almost exclusively to motivate praise and consequently occur mostly in address forms. The small group that makes statements concerning praise, that contemplates it, is all the more significant. The four passages Psa 6:6; 30:10; 88:11; Isa 38:18f. make only one statement: the dead do not praise Yahweh (Psa 6:6, “Who praises you in Sheol?”; cf. Isa 38:18; Psa 30:10, “Does the dust praise you, does it proclaim your faithfulness?”; 88:11, “Can shades rise to praise you?”). Isa 38:19 adds the positive supplement: “Life, life, it praises you!” This statement is a motif in the structure of the psalm intended to motivate God to intervene, a motif tied to the request for deliverance (Psa 6; 30; 88). It is reflected in the narrative praise of the individual (Isa 38). Just as death is characterized here by the fact that it does not permit the praise of God, so the praise of God belongs to life (Isa 38:19)—it is an element of fulfilled, complete, and healthy existence. Here one may most clearly see that, in the OT, life without an existential openness to God signified by the praise of God is actually not worth living. But one can understand this viewpoint only if one sees the verb in its full OT meaning, e.g., in the reflective introduction to Psa 92: “It is good (*tób*) to praise Yahweh” (v 2).

(e) *ydh* hi. is widely translated “to thank,” esp. in the well-known “Thank the Lord for he is good. . . .” This translation is not incorrect, but it cannot render the breadth of meaning of *ydh* hi. (see the comprehensive treatment of *PLP* 25–30). The interrelationship of words for “to praise” and “to thank” is reflected by the fact that all the world’s languages develop

special terms for “to thank” only very late; the vocabulary of no early language has a special word for “to thank” (the same circumstance accounts for the fact that small children must be taught to be thankful; they do not need to learn to praise or rejoice). A special word for thanksgiving arose only in the course of cultural development in relation to growing individuation.

To the degree that *ydh hi.* is a reaction to a beneficial, liberating act of God, it includes what we call “thanksgiving.” That it cannot, however, be synonymous with “thanksgiving” is already evident in that it never occurs as “thanksgiving” between persons. The difference lies in the following points: (1) Praise includes having been heard; *ydh hi.* also implies therefore what we call “admiration” (for which Hebr. has no specific term); our “thanksgiving” does not involve “admiration.” (2) Praise necessarily involves spontaneity; it can never become an obligation as can our “thanksgiving.” (3) Praise includes a rhetorical component; it always occurs publicly and the verb itself requires that it be joyous. (4) Thanksgiving can use language with the one giving thanks as the subj. (“I thank you for . . . “); praise uses language in which the one praised is the subj. (“you have done . . . “). This orientation implies a decisive difference between our prayers of thanksgiving and the psalms of praise in the Psalter. These differences are so essential that, wherever possible, the translation “to laud” or “to praise” for *ydh hi.* is preferable (contra Crüsemann, op. cit. 279–82), even though the translation “to thank” is possible in some contexts.

(f) The subst. *tôdâ* occurs 13x in the more specialized meaning “praise offering,” 8x in the meaning “song of praise.” On the praise offering, see R. Rendtorff, *Studien zur Geschichte des Opfers im alten Israel* (1967), esp. 65. The laws in Lev 7 describe the praise offering (vv 12[bis], 13, 15; 22:29). It occurs in the prophetic critique of sacrifice in Amos 4:5 and in the announcement of salvation in Jer 17:26; 33:11. It is mentioned in the Chr work in 2 Chron 29:31(bis) and 33:16. The superscription defines Psa 100 as a “psalm for the praise offering” (v 1). Psa 116:17 is important because it demonstrates the correlation of praise offering and song of praise: “I will offer a *tôdâ* offering to you and I will call upon the name of Yahweh” (see also Psa 66:13f.). The vow offering (*neder*, → *ndr*) is closely related to the praise offering, if not even identical (so Rendtorff, op. cit.).

*tôdâ* in the meaning “praise, song of praise” occurs in Isa 51:3; Jer 30:19; Jonah 2:10; Psa 26:7; 42:5; 50:14, 23; 107:22; most of these passages may be classified with one of the passages treated above (announcement of praise: Jonah 2:10, “I will sacrifice to you with the sound of the song of praise”; Psa 26:7, “so that I may loudly join in the song of praise”; in the confession of confidence: Psa 42:5; with juss.: Psa 107:22; in a prophetic announcement of salvation: Isa 51:3; Jer 30:19). One passage exhibits the

two meanings of *tôdâ* in an intentional contrast with one another. Psa 50:14, 23 recommend *tôdâ* as praise in contrast to sacrifice as the response to his deeds that corresponds to the will of God. Comparing these phrases in Psa 50 with those in 116:17 (and 66:13f.), one perceives a religiohistorical transformation of *tôdâ*: although praise offering and song of praise (word and deed) coexisted naturally in the early period, they could be contrasted with one another in a later period in such a way that *tôdâ* corresponds to God's will as word and song, but not as sacrifice.

On *zbh* with *tôdâ* as obj. and on the topic as a whole, cf. H.-J. Hermisson, *Sprache und Ritus im altisraelitischen Kult* (1965), 29–64. With the exception of Psa 50:14, 23, where *zbh* assumes the improper meaning “to offer as (a substitute for a) sacrifice,” the verb always has the concrete meaning “to slaughter, sacrifice” (qal 112x, in addition to Aram. pe. 1x; pi. 22x; derivatives of the common Sem. root \**dbh* are: *zebah* “[slaughtered] sacrifice” [162x, 35x in Lev, 20x in Num] and *mizbēah* “altar” [400x, 87x in Lev, 59x in Exod, 39x in 2 Chron, 34x in 1 Kgs, 29x in Num, 28x in 2 Kgs]; also Bibl. Aram. *dbh* pe. “to sacrifice” [Ezra 6:3], *d'bah* “sacrifice” [Ezra 6:3], and *madbah* “altar” [Ezra 7:17]).\*

(g) Of the 20 passages with *ydh* hi. in the Chr work, the verb parallels *hll* pi. or *tehilla*® 11x (1 Chron 6:4, 35; 23:30; 25:3; 29:13; 2 Chron 5:13; 31:2; Ezra 3:11; Neh 11:17 txt em; 12:24, 46). These passages are treated under → *hll* pi., where the peculiarities of the usage of the verbs of praise in the Chr work are depicted in context. Here *ydh* hi. has become practically synonymous with *hll* pi.; the unique significance of the respective terms no longer appears. *ydh* hi. appears alone when its content is indicated by the refrain, “For he is good, indeed, his goodness endures forever” (1 Chron 16:41; 2 Chron 7:3, 6; cf. 1 Chron 16:7). *tôdâ* has a technical meaning in Neh 12:31, 38, 40, where it indicates the festival choir (likewise *huyy<sup>c</sup>dôt* in Neh 12:8 txt?), and in Neh 12:27, where as in Psa 100:1, it indicates a song genre. This technical meaning is already suggested in Psa 119:62, where a fixed prayer time is given for *ydh* hi., and 122:4, where praise is described as a law for Israel.

(h) *ydh* in the meaning “to confess (sins)” constitutes an independent group. The hi. has this meaning in only six passages (1 Kgs 8:33, 35 = 2 Chron 6:24, 26; Psa 32:5; Prov 28:13); in most cases the hitp. represents this idea (Lev 5:5; 16:21; 26:40; Num 5:7; Dan 9:4, 20; Ezra 10:1; Neh 1:6; 9:2f.; 2 Chron 30:22; thus only in P, Dan, and in the Chr work); *tôdâ* also occurs in this meaning in Josh 7:19 and Ezra 10:11.

The interrelationship of the two meanings can best be seen in the passages in Solomon's prayer dedicating the temple in 1 Kgs 8:33, 35. V 35 reads: “And confess your name and repent of their sins.” *ydh* hi. could also be translated here “to praise”; acknowledgment of Yahweh is

equivalent to the admission of one's errors, but the two aspects of the process are indicated with two verbs, just as in Josh 7:19 in the narrative of Achan's theft: "Give Yahweh *kābôd* (honor) and give him *tôdâ!*" (cf. F. Horst, *ZAW* 47 [1929]: 50f.). By contrast, *ydh* hi. in Psa 32:5, "I will confess my transgressions to Yahweh," and in Prov 28:13, "whoever confesses them (sins) and forsakes them finds mercy," means "to admit, confess," and the hitp. only occurs in this meaning. The hitp. is apparently a liturgical term, for all passages in the hitp. occur in worship contexts. The passages indicate that the confession of sin had great significance in late post-exilic worship.

5. The LXX usually translates *ydh* hi. with *exomologeîn*, also with *aineîn*, *ydh* hitp. with *exagoreueîn* and *exomologeisthai*. These translations make it clear, on the one hand, that the confession of sin assumed greater significance in Judaism, but, on the other hand, that the LXX lent the Gk. word *homologeîn* a nuance ("to laud, praise") markedly divergent from its basic meaning "to promise" (cf. *homologeîn* for → *ndr* and → *šb<sup>c</sup>* ni.); O. Michel (*TDNT* 5:205) speaks appropriately of a "lexical Hebraism." The translation maintains the terminological distinction between *ydh* hi. and *hll* pi., in my view; there are points of contact esp. with respect to *aineîn* and *hymneîn*.

The major group of OT occurrences in the voluntative finds a broad continuation in the *Hodayot* (thanksgiving hymns) from Qumran. Most frequent is the introductory formula, *ʾôd<sup>e</sup>kâ ʾadônay kî* (1QH 2:20, 31; 3:19, 37; 4:5; 5:5, 20; 7:6, 26, 34; 8:4), which may be translated: "I will praise you, Lord, for . . ." (contra J. M. Robinson, *BZNW* 30 [1964], 194–235); similarly with *ʾēlî* "my God," 1QH 11:3, 15. The meaning "to confess (one's own guilt, or general sin)" also occurs (hitp. CD 9:13; 15:4; 20:28; hi. 1QS 1:24).

On NT usage, see O. Michel, "GreekSpicq"o[mologe/w,<F255%0>" *TDNT* 5:199–220.

C. Westermann

## יָדַע *yd<sup>c</sup>* to perceive, know

S 3045; BDB 393a; *HALOT* 2:390a; *TDOT* 5:448–81; *TWOT* 848; *NIDOTTE* 3359

## דַּעַת *da<sup>c</sup>at* knowledge

S 1847; BDB 395b; HALOT 1:228a; TDOT 5:448–81; TWOT 848c; NIDOTTE 1981

I. 1. The root *yd<sup>c</sup>* “to perceive, know” is common Sem.

Only traces of it occur in Arab., however, where its meaning is represented by *ʿarafa* “to perceive, know” and *ʿalima* “to know” (Th. Nöldeke, *ZDMG* 40 [1886]: 725; *NB* 202f.; contra P. Haupt, *JBL* 34 [1915]: 72).

Eg. *rh* “to perceive, know” apparently represents the old, phonetically appropriate version of the Afroasiatic (formerly Semito-Hamitic) word *yd<sup>c</sup>* (O. Rössler, *Neue Afrikanistische Studien* [1966], 218–29, esp. 228). In contrast, the word *yd<sup>c</sup>* “clever” attested in *Papyrus Anastasi* 1.17.8 (A. H. Gardiner, *Egyptian in Hieratic Texts* [1911], 1/1:19\*, 58) should probably be considered a Neo-Eg. borrowing of the WSem. *qal* act. ptc. of *yd<sup>c</sup>* (Erman-Grapow 1:153).

The Akk. *edû(m)/idû(m)* “to know, understand” (*GAG* §103e; *AHW* 187f.; *CAD* I/J:20–34; contra P. Jensen, *ZA* 35 [1924]: 124–32) and esp. the Eth. causative *ʾaydeʿa* “to make known” give evidence that *yd<sup>c</sup>* involves an initial-*yod* root (*GVG* 1:604; Meyer 2:138; yet contrast *NB* 202f.; *GKC* §69), which nevertheless came under the strong analogy-forming influence of the initial-*waw* roots, as indicated by the Hebr. inflected forms of *yd<sup>c</sup>* (Berg., *HG* 2:124–31; *BL* 376–85; Meyer 2:138–42), but also e.g., by the Assy. *wadû(m)* variants of the Akk. *edû(m)/idû(m)* “to know, understand” (*GAG* §106q).

2. One may not trace the etymology back beyond the meaning “to perceive, know” (yet see F. Gaboriau, *Angelicum* 45 [1968]: 3–43, esp. 6–17). “To be fragrant, smell” (Haupt, op. cit. 72) is as difficult to establish as a possible basic meaning as is a derivation of the root from *yād* “hand” (J. Hänel, *Das Erkennen Gottes bei den Schriftpropheten* [1923], 225n.2, following O. Procksch) or an etymological relationship to Arab. *wadaʿa* “to lay down, be/become calm” (G. M. Redslob, *ZDMG* 25 [1871]: 506–8; F. Schwally, *TLZ* 24 [1899]: 357; G. J. Botterweck, ‘*Gott erkennen*’ im *Sprachgebrauch des AT* [1951], 11; see, in contrast, D. W. Thomas, *JTS* 35 [1934]: 298–301).

At most one may ask whether such other roots do not really lie behind forms of *yd<sup>c</sup>* “to perceive, know” transmitted in MT in a series of semantically difficult or textually disputed passages. Suggestions of this kind have been made anew following the precedent of older Hebr. lexicographers (cf. D. W. Thomas, *JTS* 35 [1934]: 298–301; 38 [1937]: 404f.; 42 [1941]: 64f.; *JQR* NS 37 [1946/47]: 177f.; yet cf. L. J. Liebreich, *ibid.* 337f.; J. A. Emerton, *ZAW* 81 [1969]: 188–91) with reference to:

(a) Arab. *wadaʿa* “(to lay down), be/become calm” > Hebr. *yd<sup>c</sup>* “to be conquered,

humiliated,” e.g., for Judg 8:16; 16:9; Isa 9:8; 53:3, 11; Jer 31:19; Hos 9:7; Psa 138:6; Job 20:20; 21:19; Prov 10:9; 14:33; Dan 12:4 (D. W. Thomas, *JTS* 35 [1934]: 298–306; 36 [1935]: 409–12, and his other contributions listed in FS Thomas 217–28; furthermore, e.g., G. R. Driver, *JTS* 38 [1937]: 48f.; T. H. Robinson, *ZAW* 73 [1961]: 267f.; L. C. Allen, *Vox Evangelica* 1 [1962]: 24–28; P. R. Ackroyd, FS Thomas 10–14; yet contrast J. Reider, *JBL* 66 [1947]: 315–17);

(b) Arab. *daʿā* “to seek, ask after, call (to), invite,” e.g., for Gen 18:19; Exod 33:12; Hos 6:3; Prov 10:32; 24:14; 29:7 (here: *daʿat* “demand, claim”; D. W. Thomas, *JTS* 38 [1937]: 401f.; id., *SVT* 3 [1955]: 284f.; E. Zolli, *Sefarad* 16 [1956]: 23–31);

(c) Arab. *daʿā* “to knock down, destroy” for Ezek 19:7; Psa 74:5 (G. R. Driver, *JBL* 68 [1949]: 57–59);

(d) Arab. *wadaʿa* “to flow,” Ug. (*w/y*)*dʿ* “to sweat,” Akk. *zūtu*, Ug. *dʿt*, Hebr. *zēʿā* “sweat” for Hebr. *ydʿ* “to sweat” and *daʿat* “sweat” (as dialectal variants of \**yzʿ*, *zēʿā*) in Isa 53:11; Prov 10:9, 32; 14:7, 33 (M. Dahood, *Gregorianum* 43 [1962]: 63f.; id., *PNSP* 21; id., *Bib* 46 [1965]: 316f.).

Indeed, one must remain open as to whether the philological basis of these suggestions is really so secure that on them can be constructed solid attempts at a solution.

3. All seven stems of the verb occur in the OT (→ *glh* 1): besides the qal “to perceive, know” (also Bibl. Aram. pe.), the ni. reflexive (tolerative) and pass. of the basic stem “to make oneself known, become known, be known,” the hi. causative “to let know, inform” (on the delineation of the synonymous, neutral Aram. ha. from Aram. *ḥwh* pa./ha. “to inform,” see *HP* 112–19), the ho. pass. of the hi. “to become known” (on the form see Meyer 2:141), and the hitp. reflexive “to make oneself known.”

The pi. “to make knowledgeable” attested only in Job 38:12 is presumably a denominative from the adj. *yādūaʿ* “knowledgeable, well-versed” (*HP* 235). The related pu. pass. occurs only as the substantivized ptp. *mʿyuddāʿ*, fem. *mʿyuddaʿat* “known.” The po. in 1 Sam 21:3b should be emended to accord with LXX (see *BH* 3).

Nom. formations and other derivatives of the root *ydʿ* in Hebr. are:

(a) forms of the qal inf. cs. used substantivally with abstract meanings (GKC §69m), *dēaʿ* (masc.), *dēʿā* (fem.) “knowledge,” and *daʿat* “perception, knowledge.” They have counterparts in the Akk. noun *dīʿ(a)tum/daʿatum* “knowledge, information,” attested in the expression *dīʿatam šālum* “to seek knowledge of something, inquire after” (B. Landsberger, *ZDMG* 69 [1915]: 513f.; *AHW* 168b) and the Ug. noun *dʿt* “knowledge, acquaintance” (*WUS* no. 1148; *UT* no. 1080), whose concrete meaning “colleague, friend” (attested in *KTU* 1.6.VI.49f. par. to the synonymous *ḥbr*) should also be mentioned, perhaps, in relation to Prov 8:12; 22:12 (M. Dahood, *Bib* 45 [1964]: 103; id.,

UHP 61). But Akk. abstract nouns based on the root, such as *e/idûtu* “knowledge” (AHw 189a), *mudûtu* “knowledge, perception” (AHw 667a), etc., are without counterpart in Hebr.

(b) *maddā* “understanding,” which has a counterpart in *manda* “understanding” attested in Eg. Aram. (Aḥ. 53 *kmnd* “as is well-known,” H. Torczyner, *OLZ* 15 [1912]: 398; contra Cowley 232; see also *DISO* 158) and Bibl. Aram. (F. Rosenthal, *Grammar of Biblical Aramaic* [1961], 16f.).

(c) *mōdā*, fem. *mōda* “acquaintance, distant relative.” The masc. form has an equivalent in Akk. *mōdû(m)* “knowledgeable, clever; acquaintance(?)” (AHw 666f.; cf. also Jensen, op. cit. 124–32), which occurs in the texts from Ugarit (*PRU* 3:234) alongside Ug. *md* (*UT* no. 1080; M. Dahood, *Bib* 46 [1965]: 210–12) as a court title, “friend (of the king/queen)” (like Hebr. *rē<sup>c</sup>eh*, → *rēa* “friend of the king”; see A. van Selms, *JNES* 16 [1957]: 118–23; de Vaux I:123; H. Donner, *ZAW* 73 [1961]: 269–77; and cf. in this context 2 Kgs 10:11 *m<sup>c</sup>yuddā<sup>c</sup>āyw* “his (Ahab’s) confidant”).

(d) the regular companion of *ṣōb* “spirit of the dead” in the OT, the designation *yidd<sup>c</sup>ōnī* “spirit of soothsaying,” which, like Arab. *šā<sup>c</sup>īr*, may mean “the knowledgeable one” (GB 289a; H. Ringgren, *Israelite Religion* [1963], 221f.).

(e) the adj. *yādūa* “knowledgeable, well-versed” (for the paradigm, see Meyer 2:28).

(f) the interrogative particle *maddūa* “why?” which introduces questions seeking information in contrast to *lāmmā/lāmā* “why?” the particle for rhetorical questions (A. Jepsen, *FS Rost* 106–13) and which is presumably composed from *māyādūa* (contra K. Ahrens, *ZDMG* 64 [1910]: 179), “what do you know about it?” (BrSynt 131), or “what is known?” (GKC §99e; Meyer 2:174). Cf. also *mīyōdēa* “perhaps” (2 Sam 12:22; Joel 2:14; Jonah 3:9; → *ūlay* 1) as another example of the fossilization of an interrogative clause as an adv. expression; further, *bib<sup>c</sup>lī-da<sup>c</sup>at* “unintentionally” (Deut 4:42; 19:4; Josh 20:3, 5; cf. *CAD* I/J:29f.) and *mibb<sup>c</sup>lī-da<sup>c</sup>at* “accidentally” (Isa 5:13).

For the PNs formed with *yd*, see IV/1a; cf. *IP* 181.

II. Disregarding the 72 occurrences of the interrogative particle *maddūa* “why?,” forms of the root *yd* are attested in the OT a total of 1,119x (Hebr. 1,068x, Aram. 51x). The verb occurs 994x: Hebr. qal 822x (Ezek 86x, Jer 72x, Psa 66x, Isa 64x, Job 60x, Gen 53x, 1 Sam 49x, Deut 43x, Exod 36x, Eccl 34x, 1 Kgs 33x, 2 Sam 28x, Prov 27x), ni. 41x, pi. 1x (Job 38:12), pu. 6x (Psa 4x), po. 1x (see I/3), hi. 71x (Psa 16x, Ezek and Job 8x each, Isa 7x), ho. 3x (Lev 4:23, 28; Isa 12:5), hitp. 2x (Gen 45:1; Num 12:6); Aram. pe. 22x (Dan 16x, Ezra 6x), ha. 25x (Dan 20x, Ezra 5x). Nom. forms of the root exhibit the following distribution: *dēa* 5x (only in the speeches of Elihu, Job 32–37), *dē<sup>c</sup>ā* 6x, *da<sup>c</sup>at* 90x (Prov 40x, Job 11x, Isa

9x, Eccl 8x, Hos and Psa 4x), *mōdā<sup>c</sup>* 2x (Prov 7:4; Ruth 2:1), *mōda<sup>c</sup>at* 1x (Ruth 3:2), *maddā<sup>c</sup>* 6x (only post-exilic: Eccl 10:20 txt?; cf. Hertzberg, KAT 17/4, 197f.; M. Dahood, *Bib* 46 [1965]: 210–12; Dan 1:4, 17; 2 Chron 1:10–12), *yidd<sup>e</sup>ōnî* 11x; *yādūa<sup>c</sup>* (Deut 1:13, 15; Isa 53:3) is counted with *yd<sup>c</sup>* qal. Forms of the root do not appear in Obad, Hag, and Lam.

The categorization above follows not Mandl.'s distinction between *da<sup>c</sup>at* as a qal inf. and as a subst. but Lis.'s (Exod 31:13 and Job 10:7, subst.; Jer 10:14 = 51:17 and 22:16, qal inf.). Lis. 579b assigns Exod 25:22 to *y<sup>c</sup>d* ni.

III. 1. The verb *yd<sup>c</sup>* “to perceive, know” manifests a rather broad semantic scope in its OT usage, although one cannot attribute this breadth to a semantic development that can still be traced either outside or within the OT (Gaboriau, op. cit. 3f.) nor can one understand “to perceive, know” as a reduction, at least from a logical viewpoint, of an originally more pregnant meaning, such as may be suitable in the usage of the verb in reference to the relationship between persons, esp. between marital partners (E. Baumann, *ZAW* 28 [1908]: 22–41, 110–43; cf. also Botterweck, op. cit. esp. 11–17). Rather, *yd<sup>c</sup>* in the OT indicates:

(a) primarily the sensory awareness of objects and circumstances in one's environment attained through involvement with them and through the information of others (qal “to become conscious of, become aware of, observe, perceive, realize, experience,” Gen 8:11; 9:24; Exod 2:4; Lev 5:1; 1 Sam 22:3; Jer 38:24; 50:24; Ezek 25:14; Hos 7:9; Psa 35:8; Job 5:24; 9:5; 21:19; Prov 5:6; 23:35; Ruth 3:4; Esth 2:11; Neh 13:10; to be resolved impersonally in the reflexive-tolerative ni. or in the qal in e.g., Gen 41:21, 31; 1 Sam 22:6; 2 Sam 17:19; Psa 77:20; Ruth 3:3).

The texts state that the prerequisite for perception is the accessibility of the object of perception, i.e., that it be located “opposite” (*neged* Psa 51:5; 69:20) or “with” one (*ʿēt* Isa 59:12; *ʿim* Job 15:9; *ʿimmād* Psa 50:11), but not “inaccessible” (*bāšûr* Jer 33:3), “in darkness” (*b<sup>e</sup>maḥšāk* Isa 29:15; Aram. *baḥ<sup>a</sup>šôkâ<sup>a</sup>* Dan 2:22; cf. also Psa 88:13), or “hidden (from . . .)” (*kḥd* ni. *min* Hos 5:3; Psa 69:6; 139:15; *ʿIm* ni. *min* Lev 5:3f.; cf. *n<sup>e</sup>šûrôt* “hidden” Isa 48:6 and *ʿmq* hi. *lastîr* “to hide deeply” Isa 29:15, and *bassēter* “secretly” Jer 40:15); furthermore, that the organs of perception, eyes and ears, not be “gummed up” (*thḥ* Isa 44:18), but “open” (*pqh* Gen 3:7; *glh* Num 24:16; cf. 1 Sam 3:7; *pth* Isa 48:8; see also Deut 29:3; Isa 6:9; 32:3f.) or that the capacity to perceive not be impeded by sleep (1 Sam 26:12) or intoxication (Gen 19:33, 35), so that perception is possible. See *yd<sup>c</sup>* par. to → *šm<sup>c</sup>* “to hear” (Exod 3:7; Deut 9:2; 29:3; Isa 6:9; 33:13; 40:21, 28; 48:6–8; Jer 5:15; Psa 78:3; Job 5:27; Dan 5:23; Neh 6:16) and → *r<sup>a</sup>h* “to see” (Gen 18:21; Exod 2:25 txt em; 3:7; 6:3; Lev 5:1; Deut 4:35; 11:2; 29:3; 33:9; 1 Sam 6:9; 18:28; 26:12; Isa 5:19; 6:9; 29:15; 41:20; 44:9; 58:3; 61:9; Jer 2:23; 5:1; 11:18; 12:3; Psa 31:8; 138:6 txt? [cf. J. Reider, *JBL* 66 [1947]: 317]; Job 11:11; Eccl 6:5; Neh 4:5; cf. esp. the standard expression *da<sup>c</sup>ûr<sup>e</sup>eh* “perceive and see” [also pl.]: 1 Sam 12:17;

14:38; 23:22; 24:12; 25:17; 2 Sam 24:13; 1 Kgs 20:7, 22; 2 Kgs 5:7; Jer 2:19; further, *šzp* “to catch sight of” Job 28:7; *š’h* hitp. “to regard” Gen 24:21; and Aram. *hzh* “to see” Dan 5:23).

(b) Closely related to this use of *yd<sup>c</sup>* is its usage to describe the recognition that results from the deliberate application of the senses, from investigation and testing, from consideration and reflection (qal “to perceive, comprehend, understand, gain insight,” e.g., Gen 42:33; Judg 18:14; 2 Sam 24:2; Isa 41:22; Jer 2:23; 26:15; Zech 11:11; Job 9:28; 34:4; 36:26; 42:2; ni. “to be perceived,” e.g., Exod 33:16; Lev 4:14; Judg 16:9; 1 Kgs 18:36; Jer 28:9).

Characteristic of this usage of *yd<sup>c</sup>* is the role that the “heart” plays as an organ of perception (→ *lēb/lēbāb*, Deut 8:5; 29:3; Josh 23:14; 1 Kgs 2:44; Isa 32:4; 51:7; Jer 24:7; 31:33f.; Eccl 1:17; 7:22; 8:5; Dan 2:30; see also *yd<sup>c</sup>* par. *šim* [‘al-] *lēb* Isa 41:22; 42:25, paraphrased in Isa 41:20; *šūb* hi. *ʿellēb* “to take to heart” Deut 4:39; further, *šit lēb l<sup>c</sup>* “to set one’s heart to” Prov 27:23; cf. Prov 22:17). By contrast, perception is impeded by “confusion of heart” (*tō<sup>c</sup>ē lēbāb* Psa 95:10) or “confusion of spirit” (*tō<sup>c</sup>ē-rūaḥ* Isa 29:24), but esp. by uncomprehending stubbornness, which impairs the function of the organs of sense and perception (cf. Deut 29:4; Isa 6:6f.; 29:9–12; 32:3f.; 42:18–25; 44:18; 48:8; Jer 5:3–5; 10:14; 51:17; Psa 95:8–10; cf. F. Hesse, *Das Verstockungsproblem im AT* [1955]).

Perception is achieved by “seeking” (*bqš* pi. Jer 5:1; Eccl 7:25; 8:17; *drš* Psa 9:11; cf. also *tūr*, “to explore, investigate” Eccl 7:25 and *š’l bē’lōhīm* “to inquire of God” Judg 18:5) and “finding” (*ms<sup>ʾ</sup>* Job 28:13; Eccl 8:17; cf. Prov 8:9), by “examining” (*bḥn* Jer 6:27; 12:3; Psa 139:23; Job 23:10; *bḥr* Job 34:4; *ḥqr* Psa 139:1, 23; *nsh* pi. Deut 8:2; 13:4; Judg 3:4; 2 Chron 32:31), by “pondering” (*zkr* Psa 103:14; *ḥšb* Psa 144:3), and by “understanding, gaining insight” (*bîn* Isa 1:3; 6:9; 40:21; 43:10; 44:18f.; Jer 4:22; Hos 14:10; Mic 4:12; Psa 82:5; 92:7; 119:125; 139:2; Job 14:21; 15:9; 23:5; 28:23; 42:3; Prov 1:2; 2:6; 8:9; 17:27; 29:7; Dan 1:4; Neh 10:29; *skl* hi. Isa 41:20; Jer 9:23; Job 34:35; Dan 1:4; 9:25).

Lastly, perception is sparked by a “sign” (*ʾōt* Exod 7:3–5; 8:18f.; 10:2; 31:13; Deut 4:34f.; 11:2f.; Jer 44:29; Ezek 14:8; 20:12; cf. C. A. Keller, *Das Wort OTH als ‘Offenbarungszeichen Gottes’* [1946], 58), “by” which something is perceived (*yd<sup>c</sup> b<sup>c</sup>* Gen 15:8; 24:14; 42:33; Exod 7:17; 33:16; Jer 28:9; Psa 41:12; see also the occurrences of *yd<sup>c</sup>* in this sense in the dependent clause of a conditional construction, Num 16:30; Judg 6:37; 1 Sam 6:9; 20:7; and the purposeful direction of a phenomenon toward “perception,” e.g., Gen 24:21; 1 Sam 12:17; 1 Kgs 18:37; 20:13).

(c) Finally, *yd<sup>c</sup>* indicates the knowledge that results from realization, experience, and perception and that one can learn and transmit (qal “to know,” e.g., Gen 4:9; 12:11; 15:13; 20:7; 21:26; 27:2; 28:16; 30:26; 31:6, 32, etc.; ni. “to be known,” e.g., Exod 2:14; 21:36; Deut 21:1; Isa 61:9; Nah 3:17; Zech 14:7; Eccl 6:10; forms such as *yāda<sup>c</sup>tī* “I know” may not,

however, be taken as resultative pfs., but should be understood in analogy to the corresponding Akk. preterites of *e'idû(m)* “to know,” which are stative in meaning; cf. BrSynt 40n.2; GAG §§78b, 106q; contra GKC §106g).

In addition to pars. with *nkr* hi. “to know” (Deut 33:9; Isa 63:16) and *šr* “to know of” (Deut 32:17), particularly characteristic of this usage of *yd<sup>c</sup>* are passages in which knowledge is mediated through “teaching, instruction” (*lmd* pi. with obj. *dē<sup>c</sup>â/da<sup>c</sup>at*, Isa 40:14; Psa 94:10; 119:66; Job 21:22; Eccl 12:9; see also Deut 31:12f.; Isa 29:24; Prov 30:3; *yrh* hi. with obj. *dē<sup>c</sup>â* Isa 28:9; see also Ezra 7:25), or passages in which knowledge is attributed to a prior informative announcement (cf. Isa 41:22f., 26; Jonah 1:10; Psa 78:2–6; Eccl 8:7; cf. in this context the Aram. expression *y<sup>c</sup>dā<sup>c</sup>leh<sup>c</sup>wē<sup>c</sup>l<sup>c</sup>* “may it be known to,” Dan 3:18; Ezra 4:12f.; 5:8 with its Imp. Aram. counterpart in Driver, *AD* no. 4.3 and no. 7.8; on the possible Pers. background of this expression, cf. E. Benveniste, *JA* 242 [1954]: 305).

Also falling into this category are passages in which *yd<sup>c</sup>* refers to the capacity for appropriate discriminating judgment (Jonah 4:11; 2 Chron 12:8), which is not yet possible for dependent children (Deut 1:39; 1 Kgs 3:7; Isa 7:15f.; Jer 4:22) but is characteristic of the mature adult (1QSa 1:10f.), then lost once again to the aged (2 Sam 19:36). This capacity is expressed formulaically by *bîn* hi. *bên-ṭôb l<sup>c</sup>rā<sup>c</sup>* (1 Kgs 3:9) and *šm<sup>c</sup> haṭṭôb w<sup>c</sup>hārā<sup>c</sup>* (2 Sam 14:17), in addition to *yd<sup>c</sup> bên-ṭôb wārā<sup>c</sup>* (Deut 1:39; 1QS 4:26; 1QSa 1:10f.) or *yd<sup>c</sup> bên-ṭôb l<sup>c</sup>rā<sup>c</sup>* (2 Sam 19:36; see also Isa 7:15f.; Jer 4:22) “to know good and evil” or “to decide between good and evil,” which is ambiguous owing to the polyvalence of the opposites *ṭôb wārā<sup>c</sup>* “good and evil” (→ *ṭôb*). The knowledge acquired through the consumption of the paradisiacal “tree of the knowledge of good and evil” (Gen 2:9, 17 *ēš hadda<sup>c</sup>at ṭôb wārā<sup>c</sup>*) was originally reserved for God (Gen 3:5, 22). Here *hadda<sup>c</sup>at* should be construed as a verbal noun (inf. cs.) whose verbal nature has been functionally maintained as the *nomen rectum* in a cs. relationship (see GKC §115d; BrSynt 91; J. A. Soggin, *Bib* 44 [1963]: 521–23; cf. also H. J. Stoebe, *ZAW* 65 [1953]: 195; W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* [19672], 223f.). Scholars have offered four primary positions on this “knowledge of good and evil”:

(1) a capacity for ethical decision (*ṭôb wārā<sup>c</sup>* “good and evil” in the moral sense: K. Budde, *Die Biblische Urgeschichte* [1883], 65–72; see also Köhler, *Theol.*, 168f.);

(2) the capacity to shape life based upon the freedom for autonomous decision (*ṭôb wārā<sup>c</sup>*, “what enhances or detracts from life”: H. J. Stoebe, *ZAW* 65 [1953]: 188–204; see also E. Albert, *ZAW* 33 [1913]: 161–91; R. de Vaux, *RB* 56 [1949]: 300–308; M. Buber, “Tree of Knowledge,” *On the Bible* [1982], 14–21; G. W. Buchanan, *JBL* 75 [1956]: 114–20; H. S. Stern,

VT 8 [1958]: 405–18; and see also W. M. Clark, *JBL* 88 [1969]: 266–78);

(3) sexual experience (*tôb wārā<sup>c</sup>* “pleasurable and painful”: H. Schmidt, *Die Erzählung von Paradies und Sündenfall* [1931], 13–31, or as a designation for normal and abnormal or legitimate and illegitimate manifestations of sexuality: R. Gordis, *JBL* 76 [1957]: 123–38; see also I. Engnell, *SVT* 3 [1955]: 103–19; L. F. Hartmann, *CBQ* 20 [1958]: 26–40; and in a tradition-critical perspective, see Gilg. I.iii.49–iv.43, esp. iv.29, 34 = *ANET* 75);

(4) comprehensive knowledge and practical wisdom through which human culture was initiated (*tôb wārā<sup>c</sup>* “all”: J. Wellhausen, *Prolegomena to the History of Ancient Israel* [1957], 301–3; see also P. Humbert, *Etudes sur le récit du Paradis et de la Chute dans la Genèse* [1940], 82–116; H. A. Brongers, *OTS* 14 [1965]: 100–14, esp. 105, and in combination with meaning 3: J. Coppens, *La Connaissance du Bien et du Mal et le Péché du Paradis* [1948], esp. 13–46; B. Reicke, *JSS* 1 [1956]: 193–201: *ra<sup>c</sup>* = the illegitimate sexuality of the orgiastic vegetation cult).

As a rule, the verb *yd<sup>c</sup>* occurs, both in the indicated usages and in an abs. usage, with an acc. obj. or a dependent clause either appended asyndetically (e.g., Psa 9:21; Job 19:25; 30:23) or introduced with *ʔēt ʔašer* “which,” *kî, še-, ʔašer*, Aram. *dî* “that,” or as an indirect interrogative with *mî* “who,” *mâ* “what,” *h<sup>a</sup> . . . ʔim* “whether . . . or,” and other interrogative particles.

2. As E. Baumann first emphasized (op. cit. 22–41, 110–43; see also *ILC* 1–2:426–31; Botterweck, op. cit. 11–17; H. W. Wolff, *EvT* 15 [1955]: 426–31; Gaboriau, op. cit. 3–43), the meaning of *yd<sup>c</sup>* in Hebr. would be insufficiently stated if one were to limit it strictly to the cognitive aspect delineated to this point without simultaneously taking into account the contactual aspect of the meaning, e.g., the fact that *yd<sup>c</sup>* does not merely indicate a theoretical relation, a pure act of thought, but that knowledge, as *yd<sup>c</sup>* intends it, is realized through practical involvement with the obj. of knowledge.

Indicative for this circumstance are terms paralleled with *yd<sup>c</sup>*, e.g., *pqd* “to be concerned with” (Job 5:24; 35:15), *šmr* “to protect, keep, attend to” (Jer 8:7; Job 39:1), *mš<sup>ʔ</sup>hēn* “to find grace, favor” (Exod 33:12, 17), *ʔmn* hi. “to believe” (Isa 43:10), *yr<sup>ʔ</sup>* “to fear” (1 Kgs 8:43; Isa 11:2; Psa 119:79; Prov 1:7; 2:5; 2 Chron 6:33), *ʕbd* “to serve” (1 Chron 28:9); moreover, occurrences of *da<sup>c</sup>at* alongside *ʔmet* “dependability, faithfulness” (Hos 4:1) and *ḥesed* “community, mutual faithfulness” (Hos 4:1; 6:6), and terms contrasted with *yd<sup>c</sup>* like *m<sup>ʔ</sup>s* “to deny, reject” (Job 9:21), *sûr* “to distance oneself from” (Psa 101:4), *pš<sup>c</sup>b<sup>c</sup>* “to rebel against” (Jer 2:8), and *rš<sup>c</sup>* hi. “to commit an outrage against” (Dan 11:32; see also Jer 9:2, 5; Job 18:21).

(a) This practical aspect becomes esp. evident when *yd<sup>c</sup>* refers to professional acquaintance with particular skills, to technical capability (“to be skilled in, be well-acquainted with”).

Characteristic of this usage of *yd<sup>c</sup>* are objs. such as *šayid* “hunt” (Gen 25:27), *yām* “sea” (1 Kgs 9:27 = 2 Chron 8:18), *sēper* “document” (Isa 29:11f.), *n<sup>h</sup>hî* “funeral lament” (Amos 5:16), *pēšer dābār* “the interpretation of a word” (Eccl 8:1; see also Dan 2:3), *ḡittîm* “times” (Esth 1:13; cf. 1 Chron 12:33, and see Rudolph, HAT 21, 109, who interprets the term in reference to astrological capabilities), *dāt wādîn* “law and decree” (Esth 1:13; cf. further Job 37:15f.).

Here too belongs the usage of the verb followed by an inf. construction in Exod 36:1; 2 Chron 2:6f., 13 (in the characterization of the artisans); in 1 Sam 16:16, 18 (of one who masters the lyre); in 1 Kgs 5:20 (of the woodcutter); in Isa 50:4; Jer 1:6; cf. also Isa 8:4 (of one skilled in rhetoric); see further Jer 6:15; 8:12; Amos 3:10; Eccl 4:13, 17; 10:15.

In this usage *yd<sup>c</sup>* has a counterpart in the corresponding usage of Akk. *e/idû(m)* “to know” in passages like Gilg. XI.175f., which alludes to the function of the god Ea as the god of manufacture: “Who produces anything, then, other than Ea? Indeed, Ea knows every craft!” (Schott 93; cf. ANET 95a; CAD I/J:27b).

(b) In other passages, *yd<sup>c</sup>* refers to an intensive involvement with an obj. that exceeds a simple cognitive relationship in the sense of “to be concerned with” (Gen 39:6, 8; Psa 31:8; Job 9:21; 35:15; Prov 27:23). This meaning should also be attributed to *yd<sup>c</sup>* with a per. obj. (“to be concerned with,” Deut 33:9; Isa 63:16; cf. Isa 1:3) when *yd<sup>c</sup>* does not merely refer to information concerning a person’s past and merits (Exod 1:8), personal acquaintance with a living person (Gen 29:5; Deut 22:2; Ezek 28:19; Job 19:13; 29:16; 42:11; cf. also the routine expression “a people whom you do not know” [etc.], Deut 28:33, 36; 2 Sam 22:44; Jer 9:15; Zech 7:14; Psa 18:44; Ruth 2:11; see also Isa 55:5; similarly, “a land which you do not know” [etc.], Jer 15:14; 16:13; 17:4; 22:28; Ezek 32:9), or familiarity with a person’s character, so that one understands the person and his/her behavior (1 Sam 10:11; 2 Sam 3:25; 17:8; 1 Kgs 5:17; 18:37; 2 Kgs 9:11; Psa 139:1f.; Prov 12:10; Song Sol 6:12).

This usage corresponds to the usage of Akk. *e/idû(m)* with a view to things and persons identifiable in the Amarna Letters in the construction *idû ana* “to be concerned with, care for” (cf. J. A. Knudtson, *Die El-Amarna-Tafeln* [1915], 2:1420f.; CAD I/J:28a).

(c) Finally, in some passages *yd<sup>c</sup>* describes sexual intercourse: man with woman (Gen 4:1, 17, 25; 24:16; 38:26; Judg 19:25; 1 Sam 1:19; 1 Kgs 1:4), woman with man (Gen 19:8; Judg 11:39; otherwise *yd<sup>c</sup> [I<sup>e</sup>] miškab zākār*

“to know sleeping with a man,” Num 31:17f., 35; Judg 21:11f.), and homosexual intercourse (Gen 19:5; Judg 19:22).

The claim that the basic meaning of the verb is still apparent in this usage (Baumann, op. cit. 30–32) is as unlikely as the suggestion (traceable to A. Socin; cf. GB 287b) that this usage can be explained in terms of the unveiling of the bride on the wedding night (because the husband first beheld the face of his bride then) or that it refers properly to the confirmation of virginity on the occasion of the initial consummation of the marriage (F. Schwally, *ZDMG* 52 [1898]: 136). Rather, this usage of *yd<sup>c</sup>* “to know (sexually)” is a euphemism, like the analogous usage of Arab. *ʿarafa* “to know (sexually)” and Akk. *e/idû(m)* “to know (sexually)” (*AHw* 188) or *lamādu(m)* “to come to know (sexually)” (*AHw* 531b; on sexual euphemisms in Akk., see B. Landsberger, *MAOG* 4 [1928/29]: 321, §15.3; but for the Hebr. cf. Gaboriau, op. cit. 37–40, as well).

IV. 1. (a) *yd<sup>c</sup>* occurs already in pre-Israelite usage as a religious term describing the divine care experienced by a particular person. This usage is apparent in theophoric sentence names, esp. thanksgiving names that relate *yd<sup>c</sup>* pf. to the deity in the sense of “to be concerned for, look after.”

At issue are names that correspond to Hebr. *ʿlyādā<sup>c</sup>* “El has known,” *y<sup>(h)</sup>ôyādā<sup>c</sup>*, *y<sup>c</sup>daʿyâ(hû)* “Yahweh has known,” etc. (cf. *IP* 181) and that are attested in Amor. (Huffmon 209), in Ug. (Gröndahl 39, 142), in Phoen. (Harris 106; *KAI* 3:48), and in Old SArab. (G. Ryckmans, *Les noms propres sudsémitiques* [1934], 2:69). Akk. names of confidence like *dnabû-îdanni* “Nabu knows me,” *Ī-lî-ki-nam-i-di* “My God knows the righteous,” are also comparable (cf. Stamm, *AN* 198, 239f.).

The usage observed in these PNs also predominates in the OT in isolated statements of religious lyric poetry (Nah 1:7f.; Psa 31:8f.; 144:3; cf. Psa 37:18) and within the Pentateuch, perhaps in Exod 2:25 P (yet see *BHS*: read with LXX *wayyiwwāda<sup>c</sup>*), where *yd<sup>c</sup>* refers to the concrete attention of Yahweh in specific situations of distress or to his constant, helpful companionship.

OT occurrences of *yd<sup>c</sup>* as a description of the special relationship between Yahweh and Israel or individual Israelites should be seen in close relation to this usage of the verb, but probably not as descended from the usage of the Hitt. *šek-/šak- (-za)*, Akk. *e/idû(m)* (*ana*), Ug. *yd<sup>c</sup>* “to acknowledge (legally)” in Near Eastern treaties and in passages outside treaties that discuss covenantally regulated relationships (H. B. Huffmon, *BASOR* 181 [1966]: 31–37; H. B. Huffmon and S. B. Parker, *BASOR* 184 [1966]: 36–38; contra A. Goetze, *JCS* 22 [1968]: 7f.).

In reference to the relationship between Yahweh and Israel, esp. in Amos 3:2 (cf. also Deut 9:24 and see Hos 13:5 [but cf. *BHS* on the passage]), *yd<sup>c</sup>* approximates *bhr* “to choose” without becoming a

terminologically distinct alternative to this verb: instead, *yd<sup>c</sup>* here refers only to an intimate knowledge (see Botterweck, op. cit. 18–22; Th. C. Vriezen, *Die Erwählung Israels nach dem AT* [1953], 36f.; H. Wildberger, *Jahwes Eigentumsvolk* [1960], 108; R. Smend, *EvT* 23 [1963]: 409f.; P. Altmann, *Erwählungstheologie und Universalismus im AT* [1964], 2f., 23f.).

Secondary passages in the Pentateuch not attributed to one of the documentary sources (Gen 18:19; Exod 33:12, 17; Deut 34:10; further, Jer 1:5, perhaps also 2 Sam 7:20 = 1 Chron 17:18) in which *yd<sup>c</sup>* describes Yahweh's special relationship with particular individuals (Abraham, Moses, Jeremiah, David) and the beneficial relationship to Yahweh (Exod 33:12, 17 *yd<sup>c</sup>b<sup>c</sup>šēm* “to know by name” par. to *mš<sup>c</sup>ḥēn* “to find favor”) stress a special authority (esp. Jer 1:5 where *yd<sup>c</sup>*, par. to *qdš* hi. “to consecrate,” refers to demarcating selection; cf. the analogous usage of Eg. *rh* “to know” on a stele of Pharaoh Piankhi, 25th Dyn.: G. A. Reisner, *ZÄS* 66 [1931]: 91, l. 4; M. Gilula, *VT* 17 [1967]: 114). But in Amos 3:2 one should not overlook the detrimental consequence—surprising for the people—which is linked here to the intimate, exclusive relationship (contested altogether in Amos 9:7) between Yahweh and Israel in which the people imagines itself secure: Israel will also be held accountable in an exceptional manner for its guilt (*pqd<sup>c</sup>āwōn<sup>c</sup>al*).

In addition, *yd<sup>c</sup>* refers to Yahweh's judging knowledge (cf. Botterweck, op. cit. 23). The speaker of lament psalms returns to this aspect as the motivation for Yahweh's intervention (Jer 15:15; 18:23; Psa 69:20; cf. also Psa 103:14; Neh 9:10), in the confession of innocence (Jer 12:3; Psa 40:10; 44:22; cf. Job 31:6) and guilt (Exod 32:22 E; Psa 69:6), and in the confession of confidence (Psa 139:1f., 4, 23; 142:4). God's statements by which Yahweh himself documents his judging and examining knowledge (Gen 20:6 E; 22:12 E; 2 Kgs 19:27 = Isa 37:28; Isa 48:4; Jer 48:30; Ezek 11:5; Amos 5:12), and historical retrospectives, which attribute to a particular event the character of a test arranged by Yahweh for the purpose of gaining knowledge, correspond to these confessions (see *nsh* pi. as a par. term: Deut 8:2; 13:4; Judg 3:4; 2 Chron 32:31).

This knowledge forms the content of the wisdom theologoumenon that predicates Yahweh generally as *ʿēldēʿōt... w<sup>c</sup>ʿēltōkēn* [txt em, see BH 3] *ʿāḥlōt* “God of knowledge . . . and God who weighs actions” (1 Sam 2:3; cf. Psa 94:11; Job 23:10; 31:6; Prov 24:12; further, Psa 1:6; Job 11:11; refuted by the evildoers in Psa 73:11; Job 22:13f.).

(b) The ni. (“to make oneself known, announce oneself”) and hi. (“to inform”) of *yd<sup>c</sup>* are used as terms for revelation (Botterweck, op. cit. 23–33; R. Rendtorff, “Concept of Revelation in Ancient Israel,” *Revelation as History* [1968], 23–53; W. Zimmerli, *EvT* 22 [1962]: 15–31; R. Rendtorff,

*EvT* 22 [1962]: 621–49). In a conscious, theologically considered distinction, P in Exod 6:3 juxtaposes the ni. of *yd<sup>c</sup>* to the ni. of *r<sup>h</sup>*, characteristic for the old cult etiologies and divine promises, and thereby assigns the discussion of the “appearance of Yahweh” to the preliminary stage of patriarchal religion, whereas, since Moses, Yahweh has made himself known as himself, i.e., in his own being contained in his name.

A second usage of *yd<sup>c</sup>* ni./hi. as a revelatory term, attested primarily in hymnic statements, relates Yahweh’s self-declaration to historical demonstrations of his power (Psa 9:17; 48:4; 77:15, 20; 79:10; 88:13; 98:2; 103:7), incl. the occasional, markedly anthropomorphic discussion of the “revelation of Yahweh’s hand” (Isa 66:14; Jer 16:21; cf. Psa 109:27).

Passages like Isa 64:1; Psa 76:2, which mention the “publication” of Yahweh’s name in historical demonstrations of his power, indicate the close relationship between the two types of statements.

The ni. and hi. also indicate some substantive proclamations of Yahweh, such as the communication of the commandments to Moses (Exod 25:22 P) or directly to the Israelites (Ezek 20:11), of the Sabbath to Israel (Neh 9:14), of the promise of the duration of the dynasty to David (2 Sam 7:21 = 1 Chron 17:19), of the interpretation of Pharaoh’s dreams to Joseph (Gen 41:39 E), and of a secret conspiracy of his enemies to Jeremiah (Jer 11:18). Requests (Psa 25:4; 39:5; 51:8; 90:12; 143:8; cf. Exod 33:13 J; Job 13:23; and see *da<sup>c</sup>at* in Psa 94:10; 119:66) and expressions of confidence (Psa 16:11; 25:14) in the laments speak of such a revelation of Yahweh in the sense of individual instruction that the supplicants seek or acknowledge (cf. Gunkel-Begrich 224), which one should perhaps relate to the salvation oracle and the associated Torah instruction as the locale of this instruction (cf. Kraus, *Psa*, CC, 2:413f.).

2. (a) When *yd<sup>c</sup>* refers positively (cf. Baumann, op. cit. 39–41, 110–41; Botterweck, op. cit. 42–98; R. C. Dentan, *Knowledge of God in Ancient Israel* [1968], 34–41; with specific reference to prophecy: Hänel, op. cit. esp. 223–39; S. Mowinckel, *Die Erkenntnis Gottes bei den atl. Propheten* [1941]) or negatively (see W. Reiss, *ZAW* 58 [1940/41]: 70–98) to people with Yahweh (or foreign gods) as the obj., the verb indicates without exception not a merely intellectual knowledge or ignorance but a relationship to the deity that includes practical behavior: “to know Yahweh” in the sense of “to be acquainted with,” “to be concerned with,” “to acknowledge.”

The significance is particularly clear in passages in which *yd<sup>c</sup>* expresses non-Israelites’ prior lack of relation to Yahweh (Exod 5:2 J; Isa 45:4f.; Ezek 38:16; Dan 11:38) or the Israelites’ relation to foreign gods (thus in the formula “other gods that you do not know,” Deut 11:28; 13:3, 7, 14; 28:64; 29:25; Jer 7:9; 19:4; 44:3; cf. Deut 32:17; Hos 13:4), religious

inexperience (1 Sam 3:7; cf. Jer 4:22), or inadequate familiarity with some religious realities (Gen 28:16 J; Judg 2:10; 13:16; 2 Kgs 17:26; cf. Jer 31:34) manifest in inappropriate behavior toward the deity.

In a positive sense, “to know Yahweh” refers to proper behavior toward him (par. to *yr*<sup>ʔ</sup> “to fear” 1 Kgs 8:43; Isa 11:2; Psa 119:79; Prov 1:7; 2:5; 2 Chron 6:33; *ʿbd* “to serve” 1 Chron 28:9; *ʾmn* hi. “to believe” Isa 43:10; *drš* “to seek” Psa 9:11; *ḥšq b<sup>e</sup>* “to cling to” Psa 91:14; *qr<sup>ʔ</sup> b<sup>e</sup>šēm* “to call by name” Jer 10:25; Psa 79:6; cf. further Psa 36:11; 87:4; Job 24:1; Prov 3:6); conversely, “not knowing Yahweh” signifies apostasy from him in violation of his demands (1 Sam 2:12f.; Job 18:21).

The relationship of *yd<sup>ʿ</sup>* hi. “to announce” to the imperative hymn should also be mentioned in this context (Isa 12:4–6; Psa 105:1–5 = 1 Chron 16:8–12; cf. Isa 38:18f.; Psa 89:2; 145:10–12; see also verbs such as *ydh* hi. “to praise thankfully,” *qr<sup>ʔ</sup> b<sup>e</sup>šēm* “to call by name,” *zkr* hi. “to proclaim,” etc., in hymnic calls to praise; see Gunkel-Begrich 33–40; H. Zirker, *Die kultische Vergegenwärtigung der Vergangenheit in den Psalmen* [1964], 7–21; F. Crüsemann, *Studien zur Formgeschichte von Hymnus und Danklied in Israel* [1969] on these passages).

*yd<sup>ʿ</sup>* with Yahweh or the expression *da<sup>ʿ</sup>at* (<sup>ʿ</sup>*lōhîm/yhwh*) “knowledge (of God/Yahweh)” as obj. attains a prominence as a key term in the prophetic message of Hosea and of Jeremiah. Occurrences are distributed in rebukes (Hos 4:1, 6; 5:4; 8:2; Jer 2:8; 4:22; 9:2, 5; cf. Hos 2:10), salvation oracles (Hos 2:22; Jer 31:34; cf. Isa 11:2, 9; 33:6), and other genres (Hos 6:3, 6; 13:4; Jer 22:16; Mal 2:7; cf. Isa 28:9; Dan 11:32), with par. terms like <sup>ʿ</sup>*met* “dependability, faithfulness” (Hos 4:1) and *ḥesed* “community, mutual faithfulness” (Hos 4:1; 6:6), contrasting terms like *pš<sup>ʿ</sup> b<sup>e</sup>* “to rebel against” (Jer 2:8), *rš<sup>ʿ</sup>* hi. “to commit evil (against)” (Dan 11:32), and statements concerning righteous judgment (Jer 22:16) or acts of force (Jer 9:2, 5; Hos 4:1; 8:2) are characteristic of the semantic field.

The term *b<sup>e</sup>ʾît* “covenant” appears sometimes in the semantic field of the passages mentioned (Jer 31:31–34; Hos 2:18–22; 6:5–7; 8:1–3; Mal 2:4–8; Dan 11:32), and within this framework the knowledge of Yahweh is assigned to the relationship between Yahweh and Israel expressed in marital terms (Hos 2:22 *yd<sup>ʿ</sup>* par. to *ʾrś* “to betroth”; Hos 5:4 negated *yd<sup>ʿ</sup>* par. to *rûaḥ z<sup>e</sup>nûnîm* “spirit of harlotry”; see also Jer 9:1f.). One should probably explain the contours of this usage of *yd<sup>ʿ</sup>*, and esp. of the expression *da<sup>ʿ</sup>at* <sup>ʿ</sup>*lōhîm*, neither from the diction of Near Eastern treaties (H. B. Huffmon, *BASOR* 181 [1966]: 35–37) nor from the realm of marital experience (E. Baumann, op. cit. 111–25; id., *EvT* 15 [1955]: 416–25; G. Fohrer, *Studien zur atl. Prophetie* [1967], 228n.16, 275; W. Eichrodt, *Int* 15 [1961]: 259–73, esp. 264), but from the use of the expression as a

preestablished technical term for professional priestly knowledge (Begrich, *GS* [1964], 258; Wolff, *GS* [1964], 182–205; id., *EvT* 15 [1955]: 426–31; see also J. L. McKenzie, *JBL* 74 [1955]: 22–27). This background presupposes that only this current knowledge makes behavior acceptable to Yahweh possible at all (cf. the contrary term *škh* “to forget,” Hos 4:6; 13:4–6; and 2:15 in allusion to 2:10).

This understanding of the expression is esp. supported by Jer 2:8; 28:9; Hos 4:6; Mal 2:7, which attribute *daʿat ʿlōhîm* specifically to the priests; by Num 24:16, which attributes *daʿat ʿelyôn* “knowledge of the highest,” in addition to the capability to hear God’s words and to see visions, to the seer Balaam; and under wisdom influence, by Exod 31:3 P; 35:31 P; 1 Kgs 7:14 (cf. 2 Chron 2:12), which parallel *daʿat* with *rûaḥ ʿlōhîm* “God’s spirit,” *ḥokmâ* “wisdom,” *tʿbûnâ* “insight,” *mʿlāʾkâ* “craftsmanship” and attribute them to the artisan; and by Isa 11:2; 53:11 (cf. Jer 3:15), which parallel *daʿat* (Isa 53:11) or *rûaḥ yhw̄h* “Yahweh’s spirit” with *rûaḥ ḥokmâ ûbînâ* “spirit of truth and insight” and *rûaḥ ʿešâ ûgʿbûrâ* “spirit of counsel and strength” (see B. Reicke, *FS Rost* 186–92; W. H. Schmidt, *KerD* 15 [1969]: 18–34), and refer to the specific (divine) endowments of the future messianic king or God’s suffering servant.

In comparison with the priestly *tôrâ* (Jer 18:18; Ezek 7:26), the priestly *daʿat ʿlōhîm* involves not only esoteric professional knowledge concerning ritual matters (Begrich, op. cit. 232–58, esp. 251–58), but also matters concerning instruction of the laity (R. Rendtorff, *Die Gesetze in der Priesterschrift* [1954]; cf. Ezek 22:26; 44:23; Mal 2:7). In any event, the *daʿat ʿlōhîm* that Hosea (and Jeremiah) has in mind encompasses the statutes of Yahweh’s law and the traditions of Israel’s salvation history (Wolff, *GS* [1964], 193–202).

The fundamental significance of the instructional transmission of such knowledge concerning Yahweh as a prerequisite for proper relationship with Yahweh is also indicated by passages in which *ydʿ hi.* denotes the father’s instruction of the sons (Deut 4:9; Josh 4:22; Psa 78:5f.) or the instruction of the people by Moses (Exod 18:16, 20 E; cf. R. Knierim, *ZAW* 73 [1961]: 146–71), by Ezekiel (43:11), and by Ezra and the Levites (Neh 8:12; cf. Ezra 7:25).

Isa 11:9; 33:6; Jer 31:34 (cf. Jer 24:7) broaden the possession of *daʿat (ʿlōhîm)* in the future era of salvation to an (interiorized) universal possession of the people, which will make such instruction superfluous (Jer 31:34; cf. S. Herrmann, *Die prophetischen Heilserwartungen im AT* [1965], 179–85).

(b) The usage of *ydʿ* in the “recognition formula,” which describes human knowledge as the goal of divine self-revelation in historical acts (cf.

Zimmerli, "Knowledge of God According to the Book of Ezekiel," *I Am Yahweh* [1982], 29–98; Rendtorff, *Revelation as History* [1968], 41–48; cf. also H. Haag, *Was lehrt die literarische Untersuchung des Ezechiel-Textes* [1943], 25–37), corresponds strictly to the use of the ni. and hi. to describe Yahweh's self-revelation.

The recognition formula consistently combines the "statement of recognition"  $y d^{\zeta} k \hat{i}$  "know that" ("you will know that . . ."), usually appended as a result clause to a preceding announcement or mention of a particular divine activity, with some type of description of the content recognized. In addition to free formulations concerning Yahweh's unique nature to be recognized in Yahweh's historical declarations, the formula  $\text{ʾ}n\hat{i}y h w h$  "I am Yahweh" (see IV/1b) occurs particularly as a strict statement of recognition, sometimes further expanded by appended statements.

The statement of recognition is rooted in the nebulous realm of signs in which decisions are reached and unclarified situations are illuminated through symbolic acts (Zimmerli, op. cit. 72–79; see III/1b). This background is esp. clear for the recognition formulae that appear with particular frequency in the plague narratives associated with the exodus tradition (in J, strict statements of recognition alongside freer formulations: Exod 7:17; 8:6, 18; 9:14, 29; 10:2; 11:7; in P strict statements dominate: Exod 6:7; 7:5; 14:4, 18; 16:6, 12; 29:46; 31:13; Lev 23:43; Num 14:34). For the most part, occurrences in Deut also still permit one to observe this relationship to the exodus tradition (Deut 4:35, 39; 7:9; 11:2; 29:5; cf. also Deut 9:3, 6). Otherwise, the parenetic usage of the formula and the formulation "know that Yahweh is God" (1 Kgs 8:60; 18:37; 2 Kgs 19:19; cf. Isa 37:20; Psa 46:11; 100:3; 2 Chron 6:33; 33:13) characterize Deut and the Dtr circle.

The recognition formula occurs elsewhere, primarily in prophecy, with a view to impending events as a final element of the "proof saying," so called because of the occurrence of the recognition formula (Zimmerli, op. cit. 99–110). Examples include 1 Kgs 20:13, 28, in connection with the promise of victory stemming from the Yahweh-war tradition, and esp. Ezek (Ezek 5:13; 6:7, 10, 13f.; 7:4, 9, 27, etc., a total of 78x, mostly strict recognition formulae, over against 8 passages that exhibit the usage of  $y d^{\zeta}$  outside the formula), predominantly in connection with judgment sayings against Ezekiel's own people, but also sayings that supersede announcements of judgment, such as Ezek 37:13; 39:28.

In addition to the combination of the recognition formula with judgment sayings that also occurs elsewhere in the prophetic realm (Jer 16:21; Mal 2:4; cf. also Isa 41:23, 26), the priestly salvation oracle emerges from Deutero-Isa as an additional sphere of usage (Isa 41:20; 45:3, 6; 49:23, 26; cf. Isa 60:16; Joel 2:27; 4:17; see J. Begrich, *Studien zu*

*Deuterocesaja* [1938], 217–31; Zimmerli, op. cit. 53–56, 65f., 78f.); see also Psa 20:7; 41:12; 56:10; 135:5; 140:13; further, Josh 22:31; Judg 17:13; 2 Sam 5:12 = 1 Chron 14:2; 2 Kgs 5:15; Neh 6:16.

From the very beginning, non-Israelites are also included in the knowledge of Yahweh (in the exodus tradition, Pharaoh and the Egyptians; cf. also Isa 19:21; 45:3f.; Ezek 25:7, 11, 17, etc.; Dan 4:22f., 29; 5:21). Ezek (Ezek 21:10; cf. v 4), Deutero-Isa (43:10; 45:6; 49:26), and some other passages (1 Sam 17:46f.; 1 Kgs 8:43, 60; 2 Kgs 19:19 = Isa 37:20; Psa 83:19 [cf. Psa 9:21; 59:14]; Dan 4:14) testify to the universal expansion of the knowledge of Yahweh gained from his imminent act to all the peoples of the world.

Within the realm of Dtr history-theology, the truth of Yahweh's word, demonstrated through its historical realization, is also the content of the statement of recognition (Josh 23:14; 2 Kgs 10:10; Jer 32:8; 44:28f.; Ezek 6:10; 17:21; 37:14). Esp. where the Dtn criterion of true prophecy (Deut 18:21f.; cf. Jer 28:9) exerts influence, the usage of the recognition formula stands in close thematic relationship with the usage of the formula just mentioned as an expression of the legitimacy of the prophet sent by Yahweh (1 Sam 3:20; 1 Kgs 18:36f.; Ezek 2:5; 33:33; Zech 2:13, 15; 4:9; 6:15; 11:11; cf. Num 16:28 J; 1 Kgs 17:24; 2 Kgs 4:9; 5:8; moreover, Judg 13:21; see K. Marti, FS Wellhausen 281–97; Zimmerli, op. cit. 61–63, 90).

(c) The great significance of the stem *yd<sup>c</sup>* in Israelite wisdom (U. Skladny, *Die ältesten Spruchsammlungen in Israel* [1962], esp. 10f., 32–36, 60; J. Conrad, *ZAW* 79 [1967]: 67–76, esp. 71) corresponds to that which perception and knowledge acquire in Egyptian wisdom (S. Morenz, *Egyptian Religion* [1973], 121–25).

Thus the student in the wisdom book of Ani (9.14) expresses the wish to the teacher: “Ah, would that I were just as (you), that I were knowledgeable (*rh*) as you, then I would do your teaching” (A. Volten, *Studien zum Weisheitsbuch des Anii* [1937], 137, 139), and, in conclusion, Amenemope (27.7–10) recommends his teaching: “Regard these thirty chapters; they delight and instruct, they are above all books, they make the ignorant (*hm*) knowledgeable (*rh*)” (H. O. Lange, *Das Weisheitsbuch des Amenemope* [1925], 134f.; cf. *ANET* 424b).

Quite similarly, Israelite wisdom refers to the wise one (*ḥākām*) as the “the one knowing, understanding” (*yōdēa<sup>c</sup>* Job 34:2; Eccl 9:11; cf. *yādūa<sup>c</sup>* Deut 1:13, 15; *ʾiš-da<sup>c</sup>at* “man of insight” Prov 24:5; *yōdēa<sup>c</sup> da<sup>c</sup>at* “who has insight” Prov 17:27; Dan 1:4). He “understands wisdom” (*yd<sup>c</sup> ḥokmâ* Eccl 1:17; 7:12, 25) or “insight” (*yd<sup>c</sup> bînâ* Isa 29:24; Job 38:4; Prov 4:1; Dan 2:21; 1 Chron 12:33; 2 Chron 1:12[bis]; *bîn da<sup>c</sup>at* Prov 19:25; 29:7; cf. Dan 1:4), his words are “prudent words” (*ʾimrê-da<sup>c</sup>at* Job 33:3 txt em; Prov 19:27; 23:12), his “lips” are prudent (*šiptê-da<sup>c</sup>at* Prov 14:7; 20:15; cf. 5:2;

10:14; 12:23; 15:2, 7). *daʿat* “insight, understanding, knowledge” is generally attributed to him (Isa 44:25; Job 36:4; Prov 8:9; 11:9; 14:18; cf. Job 13:2; 15:9), but the fool or evildoer “hates” *daʿat* (*śnʿ*, Prov 1:22, 29), speaks and acts “without insight, understanding, knowledge” (*bʿlî-daʿat* Job 35:16; 38:2; 42:3; *bʿlōʿ-daʿat* Prov 19:2; cf. Job 34:35), or displays “windy knowledge” (*daʿat-rûah* Job 15:2).

Thus in addition to paralleling *mezimma*® “prudence” (Prov 1:4; 2:10f.; 8:12), *ʿormâ* “cleverness” (Prov 1:4; 8:12), and *tʿbûnâ* “insight” (Prov 2:6, 10f.; 17:27; 24:3f.; cf. Exod 31:3 P; 35:31 P; 1 Kgs 7:14; Isa 44:19; *bînâ* Prov 9:10; see further *śkl* hi. “to have insight” Job 34:35; Dan 1:4), *daʿat* “insight, understanding, knowledge” parallels *ḥokmâ* “wisdom” in characterizations of the essence of wisdom (Prov 2:6, 10f.; 14:6; 24:3f.; Eccl 1:18; 2:21, 26; 9:10; cf. Exod 31:3 P; 35:31 P; 1 Kgs 7:14; Isa 47:10).

One can “seek” (*bqš* pi.) wisdom *daʿat* (Prov 15:14; 18:15; cf. Eccl 7:25); it is “found” (*mśʿ* Prov 8:9) or “gained” (*qnh* Prov 18:15) through the acceptance of “instruction” (*lmd* pi., Job 21:22; Prov 30:3; Eccl 12:9; cf. *mûsâr* “correction” Prov 8:10; 12:1; *śkl* hi., “instruction” Prov 21:11), and esp. by “hearing” (*šmʿ* Prov 18:15; 22:17).

In accord with the theologization of wisdom, expressed in its qualification as *daʿat qʿdōšîm* “knowledge of the holy” (Prov 9:10; 30:3; cf. H. S. Gehman, *VT* 4 [1954]: 340), *yirʿat yhw* “fear of Yahweh” can be described as the beginning of wisdom (Prov 1:7; 9:10; cf. Prov 1:29). Wisdom is attributed particularly to Yahweh, who is characterized as *tʿmîm dēʿîm* “perfect in knowledge” (Job 37:16; see also 21:22 and, in contrast, 22:13; cf. the application of this predication to Elihu as one instructed by Yahweh, 36:3f.; cf. Eccl 2:26) and who set his characteristics *ḥokmâ*, *tʿbûnâ*, and *daʿat* into action in creation (Prov 3:19f., not hypostases; G. Pfeiffer, *Ursprung und Wesen der Hypostasenvorstellungen im Judentum* [1967], 26). In contrast to animals and people (Job 28:7, 13), Yahweh knows the place of independent wisdom (Job 28:23; cf. Pfeiffer, op. cit. 24). Although wisdom is primarily perceptible as Yahweh’s activity evident in the works of creation (Psa 92:7; Job 37:7), Job becomes aware of the limits of the perception (Job 38:18; 42:3; cf. 11:8; 36:26; 37:5); cf. the skepticism of Eccl (Eccl 9:12; 11:5; cf. also Prov 30:18).

W. Schottroff

## יהוה *yhwh* **Yahweh**

S 3068; BDB 217b; *HALOT* 2:394b; *TDOT* 5:500–521; *TWOT* 484a; *NIDOTTE* 3378

1. (a) The OT divine name occurs predominantly in the OT—and always in the pre-exilic extrabibl. examples (9th-cent. Mesha inscription, *KAI* no. 181.18, “And I took from there the [vessels?] of Yahweh, dragging them before Chemosh” [*ANET* 320b]; late 7th-cent. ostraca from Tell Arad; just before 587 BCE in the Lachish Letters II:2, 5; III:3, 9; IV:1; V:1, 8; VI:1, 12; IX:1 [*KAI* nos. 192–97; *ANET* 322] in wish formulae and assertions)—in the full form of the tetragrammaton *yhwh*, less often in independent or bound shortened forms like *yhw* (the normal form in the 5th-cent. Elephantine Papyri; cf. Cowley 290 and *BMAP* 306a; isolated in Cowley no. 13.14, and on an ostrakon [A. Dupont-Sommer, *Semit* 2 (1949): 31, 34, ll. 3, 7] *yhh*; *BMAP* no. 1.2: *yh*), and *yāh/yâ* (Exod 15:2 as well as in later parts of Isa and in later Psa; Exod 17:2 and Psa 68:5, 19 are textually difficult; cf. Noth, *Exod*, OTL, 138f.; Kraus, *Psa*, CC, 2:46f.; on Song Sol 8:6, see Gerleman, BK 18, 217). In theophoric Yahweh names *y<sup>h</sup>ô-/yô-* (dissimilated *yē-*) or *-yāhû/-yâ* occur (*IP* 103–7; on the Samaria ostraca and on seals also *-yw* = *-yaw*, cf. *KAI* 2:183). Judging from the sources and on grounds of philological probability, one must give priority to the full form (*IP* 101f.; G. Fohrer, *History of Israelite Religion* [1972], 75f.; R. de Vaux, FS Davies 49–51).

On the basis of philological considerations and Gk. transcriptions in the church fathers, scholars have concluded that the original pronunciation of the tetragrammaton was *yahweh* (O. Eissfeldt, *RGG* 3:515f. with bibliog.; Fohrer, op. cit. 75 with bibliog.; contra W. Vischer, “Eher Jahwo als Jahwe,” *TZ* 16 [1960]: 259–67). The Qere perpetuum of the Masoretic tradition יהוה (falsely read as *y<sup>h</sup>ōwâ* in the Middle Ages) or יהוה results from a combination of the consonants *yhwh* with the vowel signs of the post-exilic substitutes for the divine name, <sup>a</sup>*dōnāy* “the Lord” (→ <sup>a</sup>*dōn*) or, if

*yhwh* accompanies <sup>ʾ</sup>*dōnāy*, <sup>ʿ</sup>*lōhîm* “God” (GB 290f.; KBL 368; Zorell 298f.; the later spelling יהוה in *BH* 3 and *BHS* is based upon a reading of the Aram. <sup>š</sup>*mā*’ “the name”; cf. Meyer 1:81; contra P. Katz, *TZ* 4 [1948]: 467–69).

(b) No certain etymology of the divine name can be offered. Surveys of the abundant attempts at derivation and interpretation can be found in the available lexicons, with extensive bibliog. in Fohrer, *op. cit.* 76f., and de Vaux, *op. cit.* 56–63.

Independent of the resolution of the etymological issue, one must consider whether and to what extent Yahwism was conscious of a particular meaning for the name, whether the original, which would probably point to the pre-Israelite sphere, or a secondarily motivated Israelite meaning. Concerning the original nature of Yahweh, inferences based upon the meaning of the word can be made only with great reservation. Only the famous passage Exod 3:14 (→ *hyh* 4c) uses a meaning of the name “Yahweh” in a relatively complicated theological interpretation; even if it were to approach the correct etymology, it may have been definitive for only a particular circle in Israel (cf. von Rad, *Theol.* 1:180f.; W. H. Schmidt, *Atl. Glaube und seine Umwelt* [1968], 57–61; de Vaux, *op. cit.* 63–75).

L. Köhler’s interpretation of the name as a nom. form (“Jod als hebr. Nominalpräfix,” *WO* 1/5 [1950]: 404f.) is contradicted by the explanation of the name as an impf. form of the verb, which is more likely for Sem. proper names. In association with particular religiohistorical conceptions, earlier derivations from Arab. roots resulted in interpretations such as “the blowing one,” “the lightning hurler,” “the one raging in the storm,” “the one raining,” etc. (cf. Köhler, *Theol.*, 42f.; KBL 368f.). More appropriate than Arab. for the Sinai region in the second half of the 2d millennium would be an early form of a NWSem. verb with the meaning “to be, become, show oneself, act,” etc., like Hebr. → *hyh* and Aram. *hwh*. Since a causative hi. of this verb, which would render an etymology “the one creating, the one keeping in existence,” does not seem to be attested, only the qal “he is, he shows himself to be active” can be practically considered (the vocalic prefix does not argue against this since later Hebr./Aram. *yi-* derives from *ya-*; cf. Meyer 2:99). The etymology of the name Yahweh widely held today thus approaches the interpretation of Exod 3:14 rather closely (cf. W. von Soden, *WO* 3/3 [1966]: 177–87; Schmidt, *op. cit.* 59–61; Fohrer, *op. cit.* 77; S. Herrmann, *Israel in Egypt* [1973], 51–54); the proper understanding of the meaning of → *hyh*, which one must distance from the static understanding (cf. LXX in Exod 3:14 *ho ōn*) in favor of a dynamic activity, is decisive.

2. How often does the name Yahweh occur in the OT? The

information in BDB 217 is most accurate: 6,823x, accepted by L. Köhler, *Atl. Wortforschung* (1930), 3 (id., *Theol.*, 41: “More than 6,700 times”; KBL 368a: “about 6823x,” although the figures concerning the individual books [adapted from P. Vetter, *TQ* 85 (1903): 12–47] are altogether too low, since they deal only with free-standing *yhwh*, not <sup>ʾ</sup>*dōnāy-yhwh*, etc.; G. Quell, *TDNT* 3:1067, is also remarkable: 5,321x). A precise comparison and listing of passages in Mandl. (91–96, 982f., 1416–33, 1534a, 1541f. with numerous redundancies) and Lis. (1612–19) results in the figure of 6,828 occurrences (Mandl. omits Isa 60:20 [1424a] and Hab 2:17 [1426a or 1542a]; in Psa 68:27 many MSS have <sup>ʾ</sup>*dōnāy*, but *BHS* has *yhwh* ). Lis. omits Judg 7:2; 1 Sam 20:22; 2 Sam 15:21; Mal 3:23 (*yôm yhwh*) and indications of doubled occurrences in 2 Sam 5:19; Exod 20:3 and of tripled occurrences in Jer 7:4.

The lists of passages in Vetter (op. cit. 15–47) contain numerous, apparently inadvertent omissions, duplicate citations, and incorrect totals, esp. for 1 Sam–Ezek, Psa, and Chron; in Gen–Judg and the Minor Prophets, Lev 8:9; Deut 2:37; Josh 6:24; 13:8; Amos 5:15, 27; Mic 4:5; Zeph 1:17; Hag 1:13; Zech 8:14 are to be added, one occurrence in Exod 23:17 is to be omitted, and Mal 1:12 should be omitted entirely. The figures for the individual books are:

Gen	165	Isa	450	Psa	695		
Exod	398	Jer	726	Job	32		
Lev	311	Ezek	434	Prov	87		
Num	396	Hos	46	Ruth	18		
Deut	550	Joel	33	Song Sol	–		
TORAH		Amos	81	Eccl	–		
		Obad	7	Lam	32		
Josh	224	Jonah	26	Esth	–		
Judg	175	Mic	40	Dan	8		
1 Sam	320	Nah	13	Ezra	37		
2 Sam	153	Hab	13	Neh	17		
1 Kgs	257	Zeph	34	1 Chron	175		
2 Kgs	277	Hag	35	2 Chron	384		
(Isa 1–39	241)	Zech	133	KETUBIM	1,485		
(Isa 40–55	126)	Mal	46				
(Isa 56–66	83)	PROPHETS	3,523	OT TOTAL	6,828		

The short form *yāh* is listed 50x by Lis. (Exod 15:2; 17:16; Isa 12:2; 26:4; 38:11[bis]; Song Sol 8:6 *šalhebetyā* and 43x in Psa, 27x with → *hll* pi., 24x *hal'û(-)yāh* “hallelujah,” in one or two words with or without *maqeph* ).

3. The question of the origin of the name of Moses’ God is closely entwined with the problem of the historical inception of Yahwism, which will not be treated here (cf. the OT theologies and the histories of Israelite religion). OT traditions (apart from Gen 4:26 J; cf. F. Horst, “Die Notiz vom Anfang des Jahwekultes in Gen 4:26,” *FS Delekat* 68–74) associate the name Yahweh with Sinai and with Moses in Midianite territory; this association lends substantial significance to the Midianite or Kenite hypothesis,

according to which Israelite tribes adopted Yahwism in some form from the Midianites or Kenites (W. Vischer, *Jahwe, der Gott Kains* [1929]; K.-H. Bernhardt, *Gott und Bild* [1956], 116ff.; A. H. J. Gunneweg, "Mose in Midian," *ZTK* 61 [1964]: 1–9; K. Heyde, *Kain, der erste Jahwe-Verehrer* [1965]; M. Weippert, *Settlement of the Israelite Tribes in Palestine* [1971], 105f.; W. H. Schmidt, op. cit. 61–68). Although this hypothesis admittedly cannot be proved with certainty, it can lay claim to a degree of probability.

No unambiguous demonstration of the use of the name Yahweh outside Israel and prior to Moses has yet been identified (cf. de Vaux, op. cit. 52–56). The significance of a description in Eg. sources of some bedouin in the region of the Sinai peninsula, "Shasu of/from Yahweh," may not yet be evaluated with certainty (S. Herrmann, "Der atl. Gottesname," *EvT* 26 [1966]: 281–93; id., *Israel in Egypt* [1973], 25: "It is unfortunately still insufficiently clear whether this name 'Yahweh' apparently attested in Egyptian can really have anything to do with the Yahweh of the Old Testament. But it will none the less be permissible to talk, however cautiously, about an interesting name-formation which could also have been constitutive for the genesis of the divine name Yahweh"; cf. Weippert, op. cit. 106n.14).

Apart from these Egyptian texts, the name Yahweh cannot yet be identified in any passage independent of Israelite Yahwism (cf., however, the older works of G. R. Driver, *ZAW* 46 [1928]: 7–25; A. Murtonen, *Appearance of the Name YHWH outside Israel* [1951]). Old Bab. names with the element *yāʾu(m)*, which has long been recognized as an independent possessive "my," should be excluded; the element *yawi-/yahwi-* in names from Mari (18th cent. BCE), some of which betray WSem. origins, may belong to the same root as the divine name Yahweh, yet *ya-ah-wi-AN*, for example, does not mean "Yahweh is god" but probably "god is" (W. von Soden, *WO* 3/3 [1966]: 177–87; with reservations, Huffmon 70–73). The Ug. god *yw*, son of the god *El*, should not be identified with Yahweh either (J. Gray, *JNES* 12 [1953]: 278–85; id., *Legacy* 180–84; H. Gese, M. Höfner, and K. Rudolph, *Die Religionen Altsyriens, Altarabiens und der Mandäer* [1970], 55f.).

4. The scope of this dictionary permits only a few suggestions concerning both the history of the usage of the name Yahweh and the significance of the divine name for Israel's faith. It is the task of the OT theologies to explicate how the name ( $\rightarrow \check{s}em$ ) functioned in divine self-revelation ( $\rightarrow \text{ʾ}n\hat{t}$ ) and in the personal relationship between God and his people (cf. e.g., von Rad, *Theol.* 1:179–87; a survey of the topic with bibliog. in H. D. Preuss, *Jahweglaube und Zukunftserwartung* [1968], 14–28; more popular or theological presentations in e.g., H. W. Wolff, *Wegweisung* [1965], 59–71; F. Mildenberger, *Gottes Tat im Wort* [1964], 137–40).

The prayer address in the vocative stands apart from the other textual usages of the divine name. The address occurs approximately 380x, often repeated within a prayer or a psalm, most frequently in the corresponding genre of the Psalter (about 210x), otherwise irregularly distributed according to the occurrence of prayers and the usage of the name Yahweh in the individual books on the whole; it does not appear, e.g., in the laws and in the wisdom literature, nor for the most part in prophecy (Gen 15:2, 8; 24:12, 42; 32:10; 49:18; Exod 5:22; 15:6[bis], 11, 16f.; 32:11; Num 10:35f.; 14:14[bis]; Deut 3:24; 9:26; 21:8; 26:10; 33:7, 11; Josh 7:7; Judg 5:4, 31; 6:22; 16:28; 21:3; 1 Sam 1:11; 3:9; 23:10f.; 2 Sam 7:18, 19[bis], 20, 22, 24f., 27–29; 15:31; 22:29; 50; 24:10; 1 Kgs 3:7; 8:23, 25, 28, 53; 17:20f.; 18:36, 37[bis]; 19:4; 2 Kgs 6:17, 20; 19:15, 16[bis], 17, 19[bis]; 20:3; Isa 12:1; 26:8, 11–13, 15–17; 33:2; 37:16, 17[bis], 18, 20[bis]; 38:3, 20; 63:16f.; 64:7f., 11; Jer 1:6; 4:10; 5:3; 10:23f.; 11:5; 12:1, 3; 14:7, 9, 13, 20, 22; 15:15f.; 16:19; 17:13f.; 18:19, 23; 20:7; 32:17, 25; 51:62; Ezek 4:14; 9:8; 11:13;

21:5; Hos 9:14; Joel 1:19; 2:17; 4:11; Amos 7:2, 5; Jonah 1:14[bis]; 2:7; 4:2f.; Hab 1:2, 12[bis]; 3:2[bis], 8; Zech 1:12; Psa 3:2, 4, 8, etc.; Lam 1:9, 11, 20; 2:20; 3:55, 59, 61, 64; 5:1, 19, 21; Dan 9:8; Ezra 9:15; Neh 1:5; 9:6f.; 1 Chron 17:16f., 19f., 22f., 26f.; 21:17; 29:10, 11[bis], 16, 18; 2 Chron 1:9; 6:14, 16f., 19, 41[bis], 42; 14:10[3x]; 20:6; → <sup>ʾ</sup>hāh ).

The usage of the name Yahweh in formulaic or particularly remarkable statements (in about 1/3 of the occurrences *yhwh* appears as the second element of a cs. relationship; → <sup>ʾ</sup>ap, → <sup>b</sup>rīt, → <sup>d</sup>ābār, etc.) is discussed in other articles in this dictionary and cannot be explicated in detail here (→ <sup>ʾ</sup>mr, → <sup>br</sup>ʾ, → <sup>brk</sup>, etc.). The same is true of divine designations, originally appellative in nature, which compete with *yhwh* (→ <sup>ʾ</sup>ādôn, → ʿēl [<sup>ʿ</sup>elyôn], → <sup>ʾ</sup>lōhîm, <sup>š</sup>bāʾôt [→ <sup>š</sup>ābāʾ], → <sup>š</sup>adday) and Yahweh's numerous epithets, from the ancient *zeh sînay* "the one of Sinai(?)" (Judg 5:5; Psa 68:9; bibliog. in W. Richter, *Traditionsgeschichtliche Untersuchungen zum Richterbuch* [19662], 69n.35) to the "God of heaven" favored in the late period (→ <sup>š</sup>amayim) and the suggestive circumlocution "from another quarter" (→ <sup>ʾ</sup>hr 3) in Esth 4:14 (→ <sup>ʾ</sup>ab, → <sup>ba</sup>ʿal, → <sup>melek</sup>, etc.).

On the usage of the divine name in theophoric PNs (from Joshua onward with the greatest frequency in the monarchic era, overshadowed somewhat in the 7th cent. by the resurgence of names containing ʿēl), see *IP* 101–14.

5. In post-exilic Judaism, the divine name *yhwh* receded even more for various reasons and in varying degrees in different circles, until it totally disappeared in early Judaism or was replaced by <sup>ʾ</sup>dōnāy and *kyrios* (→ <sup>ʾ</sup>ādôn IV/5). The name's original function of elevating its bearer from the presupposed world of polytheistic powers (cf. e.g., Mic 4:5, "For all peoples walk each in the name of its god, but we, we walk in the name of Yahweh, our God, always and forever") became obsolete with the development of monotheistic faith. But the name's associated function of describing the personal otherness of the God who interacts with people (e.g., John 17:6, "I have revealed your name to people"; cf. v 26) did not become obsolete; rather, it was manifest by other linguistic means in Judaism and in early Christianity.

E. Jenni

## 𐤎𐤓 *yôm* day

S 3117; BDB 398a; *HALOT* 2:399b; *TDOT* 6:7–32; *TWOT* 852; *NIDOTTE* 3427

1. The common Sem. subst. *\*yawm-* "day" (Berg., *Intro.* 214; P. Fronzaroli, *AANLR* 8/20 [1965]: 140f., 147) is frequently attested throughout the linguistic region (Akk. *ūmu*, also "storm"; cf. G. R. Driver,

JSS 13 [1968]: 46; Ug.: WUS no. 1171; UT no. 1100; NWSem. inscriptions: DISO 107f.; Eth. only *yōm* “today,” otherwise *mō<sup>c</sup>alt* for “day”), as is its counterpart \**laylay-(at-)* “night.”

In addition to Hebr. (and Bibl. Aram.) *yôm* “day” (on the form, cf. BL 618f.; Meyer 2:83), the adv. *yômām* “by day, during the day” (BL 529; Meyer 2:39) also occurs.

2. The inventory of the occurrences of the fifth most frequent subst. in the OT results in the following figures, which diverge markedly from KBL 372a and 374a (incl. Isa 54:9 *kîmêBH3*, for which *BHS* offers *kî-mê*):

	sg.	dual	pl.	total	<i>yômām</i>

3. Despite some overlap, separate treatments of the sg. (3a-e) and the pl. (3f-j) usages of *yôm/yāmîm* are advisable. As with other temporal terms (→ *‘ēt*, → *‘ôlām*), the adv. usages play a much greater role than statements with *yôm* as subj. or obj.

(a) The basic meaning of *yôm* is “day (from sunrise to sundown)” in contrast to *laylâ* (*layil*, *Īl* “night” (233x, in addition to 5x Aram. *lêlê/lêl‘yā*?, Psa 28x, Gen 25x, Ezek and Isa 18x each, Job 17x); consequently, contrasts and series of “day” and “night,” esp. adv. “during the day . . . at night” are frequent (e.g., Gen 1:14, 18; 8:22; 31:39f.; Exod 10:13; 13:21; Isa 28:19; 38:12f.; Jer 36:30; Amos 5:8; Psa 19:3; 22:3; 32:4; 88:2; 136:8f.; Job 3:3–7; Eccl 8:16, etc., with *yômām*, also in reverse order: Deut 28:66; 1 Sam 25:16; 1 Kgs 8:29 [cf. the par. passage 2 Chron 6:20]; Isa 27:3; 34:10; Jer 14:17; Job 17:12; Esth 4:16; Neh 4:16).

A further semantic field consists of designations for the divisions of the day. The most important terms here are: *bōqer* “morning” (214x, Exod 36x, Gen 19x, 1 Sam and Psa 18x, Num 12x; cf. J. Ziegler, “Die Hilfe Gottes ‘am Morgen,” FS Nötscher 281–88; L. Delekat, VT 14 [1964]: 7–9), *‘ereb* “evening” (134x, Lev 33x, Gen, Exod, and Num 13x each; on *bên hā‘arbayim* “in the twilight” see Exod 12:6 and a further 10x in P; cf. BL 518), and *ṣoh<sup>o</sup>rayim* “midday” (23x; cf. P. Fronzaroli, AANLR 8/19 [1964]: 170, 257, 271, 278). On *ṣaḥar* “dawn” → *šemeš*.

Otherwise, *yôm* refers to the individual segments or to the course of the day rather rarely. Noteworthy are: *r<sup>e</sup>bī‘îṯ hayyôm* “one-fourth of a day long” (Neh 9:3; the OT does not yet divide the day into hours; cf. de Vaux 1:182f.; the night is divided into three night watches [*‘ašmûrâ* → *šmr*], see esp. Exod 14:24; Judg 7:19; 1 Sam 11:11), *‘adn<sup>e</sup>kôn hayyôm* “until the full day” (Prov 4:18), *mah<sup>o</sup>šîṯ hayyôm* lit. “half of the day” = “midday”

(Neh 8:3), *ḥôm hayyôm* “the hot time of the day” (Gen 18:1; 1 Sam 11:11; 2 Sam 4:5), *rûah hayyôm* lit. “day’s breeze” = “afternoon breeze from the west” (Gen 3:8; cf. Song Sol 2:17 = 4:6 “when the day blows”; cf. Gerleman, BK 18, 128), *b<sup>c</sup>yôm ʾôr* “in broad daylight” (Amos 8:9), *b<sup>c</sup>ôdhayyôm* “as it was yet day” (2 Sam 3:35), *ôdhayyôm gādôl* “it is still early in the day” (Gen 29:7), *b<sup>c</sup>erebyôm* “in the waning of the day” (Prov 7:9), as well as the various verbs meaning “to wane” for the disappearance of daylight: *nṯh, rph, ḥnh* (Judg 19:8f.), *yrd* (Judg 19:11 txt em), *pnh* (Jer 6:4; cf. also *br* “to depart,” Zeph 2:2 txt?).

(b) As in most languages, this basic meaning broadens to “day (of 24 hours)” in the sense of the astronomical or calendrical unit (on the possibility of forming this concept with the expression for “night” in other languages, see Fronzaroli, op. cit. 141, following G. Devoto, *Origini indoeuropee* [1962], 216f.). In contrast to Syr., Hebr. has no terminological distinction between the day as daytime (Syr. *îmāmā*) and the day as a calendrical unit (Syr. *yawmā*), although the semantic distinction is apparent throughout. Thus e.g., in P’s creation account, the older creation narrative with its distinction between “day” and “night” (Gen 1:5a, “God called the light day,” the preliminary description with → *ʾôr* “light” is replaced with the normal designation; further vv 14, 16, 18) is overlaid by the later seven-day pattern that enumerates the days of the week (1:5b, 8, 13, 19, 23, 31; 2:2[bis], 3).

On the question of the beginning of the day (in explicitly post-exilic texts like Exod 12:18; Lev 23:32, etc., the day lasts from evening until the next evening; in Dan 8:14 “day” is paraphrased *ereb bōqer* “evening-morning”); cf. W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* (19672), 68; H. R. Stroes, *VT* 16 (1966): 460–75 (contra de Vaux 1:180–82).

Further series of enumerated days occur in Num 7:12–78 (1st–12th day) and 29:17–35 (2d–8th day). In total, *yôm* occurs about 150x in combination with an ordinal number. That “the 7th day” occurs most often (about 50x, mostly in legal texts: Gen 2:2[bis], 3; Exod 12:15f.; 13:6; 16:26f., 29f.; 20:10f.; 23:12; 24:16; 31:15, 17; 34:21; 35:2; Lev 13:5, etc.; outside the Pentateuch, Josh 6:4, 15; Judg 14:17f.; 2 Sam 12:18; 1 Kgs 20:29; Esth 1:10; dependent on this, also “the 6th day” Exod 16:5, 22, 29 and “the 8th day,” 16x) is related to the significance of the seven-day week (Hebr. *šābūa*<sup>c</sup> “seventh, week,” 20x) for the Israelite festival calendar; there follow with diminishing frequency “the 3d day” (32x), “the 1st day” (13x), “the 2d day” (12x); quite rare are “the 4th day” (Judg 14:15 txt em; 19:5; Ezra 8:33; 2 Chron 20:26), “the 5th day” (Judg 19:8), and “the last day” (Neh 8:18).

The dating by months and days used since the exilic period (cf. Ezek

24:2 *šēm hayyôm* “name [= date] of the day”) consistently employs *yôm* alongside the cardinal number (about 40x, Aram. Ezra 6:15), although *yôm* is often omitted (e.g., Hag 2:1, 10; Esth 9:17b alongside Hag 1:1, 15; 2:18; Esth 9:17a with *yôm*; regularly in the date of the reception of revelation in Ezek 1:1–40:1). The dates refer mostly to festival days (Exod 12:6, 18[bis], etc., in Exod–Num; Josh 5:10; 1 Kgs 12:32f.; Ezek 45:21, 25; Esth 3:12; 9:1, 15, 17, 19, 21[bis]; Ezra 3:6; Neh 8:2; 9:1; 2 Chron 7:10; 29:17[bis]; consequently, the 14th and 15th days of the month are named most often), less often to prophetic reception of revelation (Hag 1:1, 15; 2:18; Zech 1:7; Dan 10:4) or to other experiences (Gen 7:11; 8:4, 14; Exod 16:1 in the P narrative).

The various numerals indicate duration in days: *yôm ʿehād* “one day long” (Gen 33:13; Num 11:19; 1 Sam 9:15; Jonah 3:4; Ezra 10:13; cf. a simple *yôm* in Exod 21:21; *derek yôm* “a day’s journey across” Num 11:31[bis]; 1 Kgs 19:4; *kʿyôm tāmîm* “almost an entire day” Josh 10:13), *yômayim* “two days long” (Exod 21:21; Num 9:22; 11:19; cf. Exod 16:29 “two days’ bread”; Hos 6:2 “after two days”), *šʿlōšet yāmîm* “three days long,” etc., with numbers ranging from three to ten (see 3f); *yôm* (sg.) indicates larger numbers (except for Dan 12:11f.), in all 36x.

(c) In many cases *yôm* loses the specific meaning “day” and becomes a rather general and somewhat vague word for “time, moment,” competing with → *ʿēt*. The construction *bʿyôm* + inf. “on the day when” = “at the time when” = “as/when” is relatively frequent; *min* “since” or *ʿad* “until” can replace *be*, just as a rare pf. or impf. can replace the inf. (e.g., Gen 2:4 “at the time when the Lord God made the earth and heaven” with inf.; 2 Sam 22:1 = Psa 18:1 “at the time when Yahweh had delivered him from the hand of all his enemies” with pf.; Psa 102:3 “when I call” with impf.). Often one may be able to translate “day” here too, because usages of *yôm* may not be sharply distinguished from one another and the basic meaning shines through to a greater or lesser degree in many cases.

*bʿyôm* + inf. occurs over 60x, most frequently in Num and Ezek (Gen 2:4, 17; 3:5; 5:1f.; 21:8; Exod 10:28; 32:34; Lev 6:13; 7:16, 36, 38; 13:14; 23:12; Num 3:13; 6:13; 7:1, 10, 84; 8:17; 9:15; 30:6, 8f., 13, 15; Deut 21:16; Josh 9:12; 10:12; 14:11; 1 Sam 21:7; 2 Sam 21:12; 1 Kgs 2:8, 37, 42; Isa 11:16; 14:3; 17:11; 30:26; Jer 7:22; 11:4, 7; 31:32; 34:13; Ezek 20:5; 24:25; 28:13; 31:15; 33:12[bis]; 34:12; 36:33; 38:18; 43:18; 44:27; Amos 3:14; Obad 11[bis], 12; Nah 2:4; Zech 8:9; Psa 20:10; Ruth 4:5; Neh 13:15). There are also corresponding usages with *min* “since” (Exod 9:18; 10:6; Lev 23:15; Deut 9:24; Judg 19:30; 1 Sam 7:2; 8:8; 29:3, 6; 2 Sam 7:6; 13:32; 19:25 txt?; Isa 7:17; Ezek 28:15), *ʿad* “until” (Exod 40:37; Lev 8:33; Josh 6:10; Judg 18:30; 2 Sam 20:3; 1 Kgs 17:14; Jer 27:22); after *ke* “like” *be* is omitted (Hos 2:5, 17; Zech 14:3); cf. further Zeph 3:8 with *le*; Ezek 39:13 with a simple adv. acc.

*b<sup>c</sup>yôm* + pf. occurs in Exod 6:28; Lev 7:35; Num 3:1; Deut 4:15; 2 Sam 22:1 = Psa 18:1; Psa 59:17; 102:3a; 138:3; with *min*: 2 Kgs 8:6; Jer 36:2; cf. further Jer 31:6. *b<sup>c</sup>yôm* + impf. occurs only with *qr<sup>ʔ</sup>* “to call”: Psa 56:10 (cf. v 4, txt?); 102:3b; Lam 3:57.

*yôm* is farthest removed from the meaning “day” in Lev 14:57, *b<sup>c</sup>yôm haṭṭāmē<sup>ʔ</sup>ûb<sup>c</sup>yôm haṭṭāhōr* “(to instruct) when something is clean and when it is unclean.”

(d) The examples treated indicate the frequent usages of *yôm* in the meaning “day” or more generally “(point in) time” modified more precisely by a succeeding relative clause with <sup>a</sup>*šer* (or *še-*), by a gen., or by an adj.

*yôm* + <sup>a</sup>*šer* (over 20x) describes primarily some important events in salvation history (creation, Deut 4:32; exodus, Deut 9:7; 1 Kgs 8:16 = 2 Chron 6:5; 2 Kgs 21:15; Jer 7:25; 1 Chron 17:5; cf. Psa 78:42; the giving of the commandments, Num 15:23; Deut 4:10; conquest, Deut 27:2; the appointment of judges, 2 Sam 7:11; the construction or capture of Jerusalem, Jer 32:31; 38:28; laying the foundation of the temple, Hag 2:18; eschatological intervention of Yahweh, Mal 3:17, 21; cf. further 1 Sam 29:8; 2 Sam 19:20, 25; Esth 9:1; Neh 5:14; with *še-*: Song Sol 8:8; Eccl 12:3; Lam 2:16).

The days modified by gens. or adjs. vary widely: fixed combinations for special days of the calendar (*yôm haššabbat* “Sabbath day,” Exod 20:8, 11; 31:15; 35:3; Lev 24:8[bis]; Num 15:32; 28:9; Deut 5:12, 15; Jer 17:21–27, 7x; Ezek 46:1, 4, 12; Psa 92:1; Neh 10:32; 13:15, 17, 19, 22; cf. Isa 58:13, “my holy day”; Imp. Aram. *ywm šbh*, *DISO* 108, l. 29, → *šbt*, *yôm haḥōdeš* “new moon day” Exod 40:2; 1 Sam 20:34; Ezek 46:1, 6; *yôm hakkese<sup>ʔ</sup>* “full moon day” Prov 7:20; *yôm hakkippūrîm* “day of Atonement” Lev 23:27f.; 25:9), or special days of human life (e.g., *yôm hulledet* “birthday” Gen 40:20; Ezek 16:4f.; cf. the freer depictions in Jer 20:14[bis]; Job 3:1 [“his day” = “his birthday”], 3f.; Eccl 7:1; *yôm hammāwet* “day of death” Eccl 7:1; 8:8; with sufs., Gen 27:2; Judg 13:7; 1 Sam 15:35; 2 Sam 6:23; 20:3; 2 Kgs 15:5; Jer 52:11, 34; 2 Chron 26:21). Other less colloquial or occasional phrases characterize a day in terms of natural phenomena or human activities (1 Sam 20:19 “on the day of the deed” is unclear; cf. Hertzberg, *Sam*, OTL, 174). The following meteorological phenomena occur: rain (Ezek 1:28; Prov 27:15), snow (2 Sam 23:20 = 1 Chron 11:22), east wind (Isa 27:8; cf. Imp. Aram. *ywm rwh* “stormy day” Ah. 168), and cold (Nah 3:17; Prov 25:20). Days named for human activities include *yôm qāšîr* “harvest day” (Prov 25:13), *yôm milḥāmâ* “day of battle” (Hos 10:14; Amos 1:14; Prov 21:31; cf. 1 Sam 13:22; Zech 14:3; Psa 78:9; 140:8; Job 38:23), and an entire series of cultic and noncultic festival occasions and celebrations: *yôm tōb* “feast day” (1 Sam 25:8; Esth 8:17; 9:19, 22; “day of

our king”: Hos 7:5; cf. “day of his might” Psa 110:3; *yôm mō<sup>c</sup>ēd* Hos 9:5; Lam 2:7, 22; Yahweh’s feast day, Hos 9:5; Psa 81:4; cf. 84:11 “a day in your courts”; 118:24 “the day that Yahweh has made”; Neh 10:32 “holy day”; day of rejoicing, Num 10:10; day for blowing the trumpet, Num 29:1), *yôm b<sup>c</sup>śōrâ* “a day of good news” (2 Kgs 7:9), wedding day and day of gladness of heart (Song Sol 3:11[bis]), revelry (Esth 9:17f.), day for presenting various sacrifices (Lev 5:24; 7:15; 14:2; 19:6; Num 6:9; 28:26), *yôm šûm* “fast day” (Isa 58:3; Jer 36:6; cf. Isa 58:5 “day when one does penance . . . which pleases Yahweh”).

Finally, special historical events may be mentioned: *yôm-hammaggēpâ* “day of the plague” (Num 25:18), *yôm haqqāhāl* “day of assembly” (for the revelation at Sinai, Deut 9:10; 10:4; 18:16), *yôm šē<sup>t</sup>kā* “day of your exodus” (from Egypt, Deut 16:3), *yôm q<sup>c</sup>tannôt* “day of small beginnings” (of the temple reconstruction, Zech 4:10); here too belong days characterized by special proper names: *yôm midyān* (Isa 9:3, probably an allusion to the deliverance reported in Judg 7:9ff.), *yôm yizr<sup>e</sup>c<sup>l</sup>* (Hos 2:2, antithetical to Hos 1:4f. and thereby probably to Jehu’s revolution, 2 Kgs 9–10), *yôm massâ* (Psa 95:8; cf. the tradition in Exod 17 and Num 20), *yôm y<sup>c</sup>rûšālēm* (Psa 137:7, related to Jerusalem’s catastrophe in 587 BCE).

Designations for fortunate days are outnumbered by those for a wide variety of disastrous days (good and bad days are juxtaposed terminologically in Eccl 7:14[bis] as *yôm tōbâ/rā<sup>c</sup>â* ). Expressions for the eschatological intervention of God formed with *yôm* will be treated under 4b. Uses not directly classifiable as eschatological proclamation (but not always strictly distinguishable from it), esp. in the diction of the Psa (less often in wisdom and prophetic literature), may be summarized here, although disaster is also understood as God’s judgment and punishment here. Characteristic substs. are *šārâ* “distress” (Gen 35:3; 2 Kgs 19:3 = Isa 37:3; Jer 16:19; Obad 12, 14; Nah 1:7; Hab 3:16; Psa 20:2; 50:15; 77:3; 86:7; Prov 24:10; 25:19), → *ʔēd* “misfortune” (Deut 32:35; 2 Sam 22:19 = Psa 18:19; Jer 18:17; 46:21; Obad 13, 3x; Prov 27:10), *rā<sup>c</sup>â* “evil” (Jer 17:17f., a lament, in contrast to 51:2, an eschatological text; Psa 27:5; 41:2; Prov 16:4), also “day of vengeance” (Prov 6:34) and “day of wrath” (Prov 11:4); in addition, there are the adjs. *ra<sup>c</sup>* “evil” (Amos 6:3), *mar* “bitter” (Amos 8:10), and *ʔānûš* “unhealthful” (Jer 17:16).

In some of these passages, the translation “day” is almost too specific (e.g., Hos 10:14 “in war time”; Nah 3:17 “when it is cold”; see also Ezek 16:56 “in the time of your arrogance”; Ezek 33:12 “when he sins”). The same is probably also true for the expression “this is the day,” etc., in reference to a special occasion (Judg 4:14; 1 Sam 24:5; 1 Kgs 14:14 txt?).

*yômô* “his day” without any further qualification than the pron. suf. can designate the birthday (Job 3:1), the day of death (1 Sam 26:10; Psa 37:13; Job 15:32; 18:20), the day on which it is someone’s turn (Job 1:4; cf. Deut 24:16 *b<sup>c</sup>yômô*), or also something like “daily life” in general (of a wage earner, Job 14:6; cf. Job 30:25 *q<sup>c</sup>šēh-yôm* “one who has a hard life”; similarly Old Aram., *KAI* no. 222C.15f. “may the gods keep away [all evil] from his life [*mn ywmh*] and from his house”; cf. J. A. Fitzmyer, *JAOS* 81 [1961]: 207; id., *Sef.* 75).

(e) Adv. expressions formed with *yôm* in combination with a prep., a demonstrative pron., or a numeral occur often.

*hayyôm* (with the art. in a deictic function) or, synonymously, *hayyôm hazzeh* “this day” in the meaning “today” occurs about 350x, or in almost 1/4 of all passages with *yôm* in the sg. (otherwise Gen 7:11; 17:23; Exod 12:14, 17; 13:3; 19:1; Lev 16:30; 2 Kgs 19:3 = Isa 37:3; Esth 3:14; 8:13, where “this day” refers to a specific day, also intensified by *‘ešem* “even, precisely” in Gen 7:13; 17:26; Exod 12:17, 41, 51; Lev 23:14, 21, 28–30; Deut 32:48; Josh 5:11; Ezek 40:1).

The prep. most often associated with *hayyôm (hazzeh)* is *‘ad* “until” (in 25% of occurrences; “until today”), less frequent are *k<sup>c</sup>* (*k<sup>c</sup>hayyôm* or *kayyôm hazzeh* “as today” = “as is the case today,” etc., esp. in Dtn-Dtr and Chr diction: Gen 50:20; Deut 2:30; 4:20, 38; 6:24; 8:18; 10:15; 29:27; 1 Sam 22:8, 13; 1 Kgs 3:6; 8:24, 61; Jer 11:5; 25:18; 32:20; 44:6, 22f.; Dan 9:7, 15; Ezra 9:7, 15; Neh 9:10; 1 Chron 28:7; 2 Chron 6:15; cf. Neh 5:11 “yet today”), *be* (Lev 8:34; Josh 7:25; 1 Sam 11:13; 1 Kgs 2:26; Neh 3:34 “already today”), and *min* (“from today on,” Hag 2:15, 18f.); intensification through *‘ešem* occurs in Josh 10:27; Ezek 2:3; 24:2(bis).

In narrative texts, this usage of “today” refers mostly to the speaker’s context. In about 1/6 of the cases, however, the narrator refers to his own present situation (*‘ad hayyôm*: Gen 19:37f.; 35:20; 2 Kgs 10:27; 2 Chron 20:26; 35:25; *‘ad hayyôm hazzeh*: Gen 26:33; 32:33; 47:26; Josh 4:9; 5:9; 6:25; 7:26[bis]; 8:28f.; 9:27; 13:13; 14:14; 15:63; 16:10; Judg 1:21, 26; 6:24; 10:4; 15:19; 18:12; 1 Sam 5:5; 6:18; 27:6; 30:25; 2 Sam 18:18; 1 Kgs 8:8; 9:13, 21; 10:12; 12:19; 2 Kgs 2:22; 8:22; 14:7; 16:6; 17:23, 34, 41; Ezek 20:29; 1 Chron 4:41, 43; 5:26; 13:11; 2 Chron 5:9; 8:8; 10:19; 21:10; *‘ad ‘ešem hayyôm hazzeh*: Josh 10:27; cf. *hayyôm* Gen 22:14; 1 Sam 9:9); often the narrator concludes an etiology, the development of a current fact from a past event, with the formula “until the present day” (cf. Alt, *KS* [1964], 1:182f.; M. Noth, *SVT* 7 [1960]: 279f.; B. S. Childs, “A Study of the Formula, ‘Until this Day,’” *JBL* 82 [1963]: 279–92: “formula of a personal testimony added to, and confirming, a received tradition,” op. cit. 292; C. Westermann, *Promises to the Fathers* [1980], 40–44; B. O. Long, *Problem of Etiological Narrative in the OT* [1968]).

Although adv. “this day” indicates contemporaneity with the speaker,

*hayyôm hahûʿ* “that day” expresses a distant moment either in the past (about 90x) or in the future (about 120x). The usual expression is *bayyôm hahûʿ*, in reference to the past, one can translate it “on that day,” “on the same day,” or, less vividly, “then” (Gen 15:18; 26:32; 30:35; 33:16; 48:20; Exod 5:6; 14:30; 32:28; Num 9:6[bis]; 32:10; Deut 27:11; 31:22; Josh 4:14–2 Kgs 3:6, about 60x; Jer 39:10; Ezek 20:6; 23:38f.; Esth 5:9; 8:1; 9:11; Neh 12:43f.; 13:1; 1 Chron 13:12; 16:7; 29:22; 2 Chron 15:11; 18:34; 35:16; with *min*, “since that day” = “from then on” Neh 4:10; in 1 Sam 16:13 and 30:25 *min* combined with *wāmāʿlā* “and henceforth,” in 1 Sam 18:9 with the synonymous *wāhālʿā*, with *ʿad* “until that day” Neh 8:17; cf. also Josh 10:14 “like that day” with *ke*; Judg 13:10 *bayyôm* with *hahûʿ* “then, recently”). In reference to the future, one can translate *bayyôm hahûʿ* as “on the same day” or “then” (Exod 8:18; 13:8; Lev 22:30; 27:23; Num 6:11; Deut 21:23; 31:17[bis], 18; 1 Sam 3:12; 8:18[bis]; 1 Kgs 22:25 = 2 Chron 18:24; about 105x in Isa 2:11–Zech 14:21; with *min* and *wāhālʿā* “from that day onward and in all the future,” Ezek 39:22). On this expression and eschatology, see 4b.

In the less vivid meaning “at that time” or “then,” the usage is synonymous with the adv. *ʿāz*, which can refer both to the past and (less often) to the future (138x, in addition to 3x in the form *ʿāzay*, cf. also *šām* “there,” which can have temporal significance in a few cases; see GB 839b; KBL 983a).

Further adv. usages are:

(1) *kol-hayyôm* “the whole day” or “always, ever” (Gen 6:5; Exod 10:13; Num 11:32; Deut 28:32; 33:12; Judg 9:45 with *hahûʿ*, 1 Sam 19:24; 28:20; Isa 28:24; 51:13; 52:5; 62:6; 65:2, 5; Jer 20:7f.; Hos 12:2; Psa 25:5; 32:3; 35:28; 37:26; 38:7, 13; 42:4, 11; 44:9, 16, 23; 52:3 txt?; 56:2f., 6; 71:8, 15, 24; 72:15; 73:14; 74:22; 86:3; 88:18; 89:17; 102:9; 119:97; Prov 21:26; 23:17; Lam 1:13; 3:3, 14, 62; *kol-yôm* Psa 140:3; *b<sup>c</sup>kol-yôm* Psa 7:12; 88:10; 145:2); these passages indicate that the expression is esp. favored in the lament and the vow of praise;

(2) (*b<sup>c</sup>*)*yôm ʿehād* “in one day, in the same day, simultaneously” (Gen 27:45; Lev 22:28; 1 Sam 2:34; 1 Kgs 20:29; Isa 9:13; 10:17; 47:9; 66:8; Zech 3:9; Esth 3:13; 8:12; 2 Chron 28:6); but in 1 Sam 27:1 *yôm-ʿehād* “one day”;

(3) *b<sup>c</sup>yôm ʿahēr* “some other time” (2 Sam 18:20); *bayyôm hāʿahēr* “on the following day” (2 Kgs 6:29); *yôm ʿahʿrôn* “a future day” (Isa 30:8; Prov 31:25); *yôm māhār* “tomorrow” (Gen 30:33 in the meaning “future”; Isa 56:12), “tomorrow” (Prov 27:1); cf. *yôm hammoḥʿrat* (Num 11:32) and *moḥʿrat hayyôm* (1 Chron 29:21) “following day”; *yôm ʿetmôl* “yesterday”

(Psa 90:4);

(4) *yôm yôm* “daily, day by day” (Gen 39:10; Exod 16:5; Isa 58:2; Jer 7:25 txt em; Psa 61:9; 68:20; Prov 8:30, 34) and similar distributive expressions with *yôm* repeated (*yôm wāyôm* Esth 2:11; 3:4; with various preps.: Num 30:15; 1 Sam 18:10; Psa 96:2; Esth 3:7; Ezra 3:4; Neh 8:18; 1 Chron 12:23; 16:23; 2 Chron 24:11; 30:21; Aram. Ezra 6:9; *d<sup>e</sup>baryôm b<sup>e</sup>yômô* “daily ration” or the like: Exod 5:13, 19; Lev 23:37; 1 Kgs 8:59; 2 Kgs 25:30 = Jer 52:34; Dan 1:5; Ezra 3:4; Neh 11:23; 12:47; 1 Chron 16:37; 2 Chron 8:14; 31:16; without suf., 2 Chron 8:13; cf. also Num 14:34; Ezek 4:6), also attested in Phoen. and Aram. (DISO 108, nos. 9, 11);

(5) *layyôm* “daily, per day” (Exod 29:36, 38; Num 7:11[bis]; 28:3, 24; Jer 37:21; Ezek 4:10; 43:25; 45:23[bis]; 46:13; 1 Chron 26:17a [txt em], 17b[bis]; *l<sup>e</sup>yôm ʿehād* 1 Kgs 5:2; Neh 5:18); Aram. *b<sup>e</sup>yômā* Dan 6:11, 14;

(6) *way<sup>e</sup>hīhayyôm* “once upon a time (there was)” (1 Sam 14:1; 2 Kgs 4:8, 11, 18; Job 1:6, 13; 2:1; “now when the day came” 1 Sam 1:4); *k<sup>e</sup>hayyôm hazzeh* “one day” (Gen 39:11);

(7) *k<sup>(e)h</sup>ayyôm* “now” (1 Sam 9:13, 27; Isa 58:4; cf. *ʿtkym* “now, in this moment,” Lachish Letters 2:3; 4:1) or “at first” (Gen 25:31, 33; 1 Sam 2:16; 1 Kgs 1:51; 22:5 = 2 Chron 18:4);

(8) *hayyôm* “on this day” (1 Kgs 13:11; “by day” Hos 4:5 txt?; cf. Neh 4:16 txt?); *adhayyôm* “until then” (Judg 18:1); *bayyôm (hahûʿ)* “immediately” (Psa 146:4; Prov 12:16); *šeba<sup>c</sup>bayyôm* “seven times a day” (Psa 119:164); *lipnê yôm* “previously” (Isa 48:7); *mîyôm* “henceforth” (Isa 43:13; Ezek 48:35).

(f) The pl. *yāmîm* indicates, first of all, a particular number (cf. Num 14:34; Ezek 4:4f., 9) of (calendar) days (cf. Gen 1:14; Job 3:6 “days of the year”). The number seven plays a significant role here, as it did in the sg. with ordinals (see 3b); a seven-day period is discussed over 90x in various contexts (Gen 7:4, 10; 8:10, 12; 31:23; 50:10; Exod 7:25–Deut 16:15 over 50x in laws; Judg 14:12, 17; 1 Sam 10:8; 11:3; 13:8; 31:13; 1 Kgs 8:65[bis]; 16:15; 20:29; 2 Kgs 3:9; Ezek 3:15f.; 43:25f.; 44:26; 45:21 [txt em], 23[bis], 25; Job 2:13; Esth 1:5; Ezra 6:22; Neh 8:18; 1 Chron 9:25; 10:12; 2 Chron 7:8, 9[bis]; 30:21f., 23[bis]; 35:17; contrast Isa 30:26 “the light of the sun will be sevenfold, like the light of seven days”). With decreasing frequency follow references to three days (42x), six days (15x, except for Exod 24:16; Deut 16:8; and Josh 6:3, 14 always in direct relation to the Sabbath: Exod 16:26; 20:9, 11; 23:12; 31:15, 17; 34:21; 35:2; Lev 23:3; Deut 5:13; Ezek 46:1), ten days (Num 11:19; 1 Sam 25:38; Jer 42:7; Dan 1:12, 14f.; Neh 5:18; 2 Chron 36:9; cf. Gen 24:55 *ʿāsôr* “decade”), eight days (Gen 17:12; 21:4; 2 Chron 29:17), two days (2 Sam 1:1; Esth 9:27; on the dual in references to duration, see 3b), four days (Judg 11:40), and five days (Num

11:19); cf. also the larger numbers in Lev 12:4f. and Dan 12:11f.; Aram. Dan 6:8, 13.

In association with unspecific enumerations, “days” easily acquires the closely related meaning “time” in the sense of “duration, period”: in addition to *yāmîm* <sup>ʾ</sup>*ḥādîm* “some days, some time” (Gen 27:44; 29:20; Dan 11:20; cf. *yāmîm mispār* “a few days” Num 9:20), *yāmîm* also appears alone in the same meaning (Gen 24:55; 40:4; Lev 25:29; Num 9:22; Judg 19:2; 1 Kgs 17:15 txt?; Isa 65:20; Dan 8:27; 11:33; Neh 1:4; also *mîyāmîm* “after some time” Judg 11:4; 14:8; 15:1; *miqqēš yāmîm* “after the course of some days” Gen 4:3; 1 Kgs 17:7; *I<sup>c</sup>qēš yāmîm* “some time afterward” Neh 13:6); also frequent are the adv. usages *yāmîm rabbîm* “many days, a long time” (Gen 21:34; 37:34 and an additional 25x, with art., Exod 2:23; cf. also *mērōb yāmîm* “after many days” Isa 24:22; *b<sup>c</sup>rōb hayyāmîm* Eccl 11:1) and *kol-hayyāmîm* “everyday, always, ever” (Gen 43:9; 44:32; Deut 4:10, 40; 5:29 and an additional 40x; this usage is esp. favored in Dtn-Dtr diction).

(g) “Days” modified by a subsequent gen. of a person refer, in most cases, to the “days of (one’s) life” or to one’s “lifetime” (cf. Job 10:5 “a person’s days” par. “a man’s days”), for kings, appropriately, to the “period of reign” (cf. Isa 23:15 “as long as the king lives”). *ḥayyîm* “life” can be added as a further modifier (frequently in the expression “all the days of my/your/his life”: Gen 3:14, 17; Deut 4:9; 6:2; 16:3; 17:19; Josh 1:5; 4:14; 1 Sam 1:11; 7:15; 1 Kgs 5:1; 11:34; 15:5f.; 2 Kgs 25:29f. = Jer 52:33f.; Isa 38:20; Psa 23:6; 27:4; 128:5; Prov 31:12; cf. Eccl 2:3; 5:17, 19; 6:12; 8:15; 9:9; “days of the years of life”: Gen 25:7; 47:8, 9[bis]; cf. v 28) or be omitted (about 200x); in many cases here too one may translate “time” instead of “days.” Common expressions are: *bîmê* lit. “in the days of” = “at the time of” (Gen 14:1; 26:1, 15, 18; Judg 5:6[bis]; 8:28; 15:20 and a further 40x; Aram. Dan 2:44; 5:11; with *min* “since,” 2 Kgs 23:22; Jer 36:2; Nah 2:9 txt?; Mal 3:7; Ezra 4:2; 9:7; Neh 8:17; 9:32; 2 Chron 30:26; 35:18; with *ʿad* “until,” Neh 12:23; with *ke*, Isa 54:9 txt? “as in the days of Noah”), “in my/your/his, etc., days” (“during his life,” “during his reign,” etc.; Gen 10:25 = 1 Chron 1:19; 1 Kgs 11:12; 16:34; 21:29; 2 Kgs 8:20 = 2 Chron 21:8; 2 Kgs 20:19 = Isa 39:8; 2 Kgs 23:29; 24:1; Jer 16:9; 22:30; 23:6; Ezek 12:25; Joel 1:2; Hab 1:5; Psa 44:2; 72:7; 116:2; cf. *mîyāmeykā* “as long as you live” 1 Sam 25:28; Job 38:12; *mîyāmāyw* “as long as he may live” 1 Kgs 1:6), *kol y<sup>c</sup>m* “all the days of” (“as long as X lives”; Gen 5:5–31, 9x; 9:29; Josh 24:31[bis]; Judg 2:7[bis], 18; 1 Sam 7:13; 14:52; 1 Kgs 5:5; 11:25; 2 Kgs 13:22; 23:22; Ezra 4:5; 2 Chron 24:2, 14), “all my/your, etc., days” (Deut 12:19; 22:19, 29; 1 Kgs 3:13; 15:14, 16, 32; 2 Kgs 12:3; 15:18; Jer 35:7f.; Psa 90:9, 14; cf. v 10; 139:16 txt em; Eccl 5:16; 2 Chron 15:17; 18:7; 34:33); cf. also Gen 5:4; 6:3; 11:32; 29:21; 35:28; 47:28f.; Exod 23:26; Deut

33:25; 2 Sam 7:12 = 1 Chron 17:11; 2 Kgs 20:6 = Isa 38:5; Isa 38:10; 65:20; Jer 17:11; 20:18; Joel 1:2; Psa 34:13; 37:18; 39:5f.; 55:24; 61:7[bis]; 78:33; 90:10, 12; 102:4, 12, 24f.; 103:15; 109:8; 119:84; 144:4; Job 7:1, 6, 16; 8:9; 9:25; 10:5, 20; 14:5; 15:20; 17:1, 11; 21:13; 27:6; 30:1; 32:4, 6; 36:11; 38:21; Prov 10:27; 15:15; Eccl 2:23; 6:3; Lam 4:18; 5:21.

*yāmîm* also occurs in this meaning “lifetime” as a modifier of adjs. (ptcps.) in various expressions that describe advanced age: *m<sup>l</sup>ē<sup>ʔ</sup>yāmîm* “aged” (Jer 6:11; cf. *q<sup>l</sup>šar yāmîm* “short life” Job 14:1), *š<sup>l</sup>ba<sup>l</sup>yāmîm* “full of days” (par. *zāqēn* “old”: Gen 35:29; Job 42:17; without *zāqēn* 1 Chron 29:28; verbally: 1 Chron 23:1; 2 Chron 24:15), *kabbîr yāmîm* “rich in days” (Job 15:10), *bā<sup>ʔ</sup>bayyāmîm* “aged” (Gen 24:1; Josh 13:1[bis]; 23:1f.; 1 Kgs 1:1); cf. Aram. *ʿattîq yômîn* “aged” (Dan 7:9, 13, 22). At least some of the constructions with *ʔk* and *rbh* also belong here: with *ʔk* hi. lit. “to lengthen days” = “to live long” (Deut 4:26, 40; 5:33; 11:9; 17:20; 22:7; 30:18; 32:47; Josh 24:31; Judg 2:7; Isa 53:10; Prov 28:16; Eccl 8:13), “to let someone live long” (1 Kgs 3:14), with “days” as subj. “to be long” (Exod 20:12 = Deut 5:16; Deut 6:2; 25:15), with the subst. *ʔrek* “length” Deut 30:20; Psa 21:5; 23:6; 91:16; Job 12:12; Prov 3:2, 16; with *rbh* qal “to be many” Deut 11:21(bis); Prov 9:11; with *rbh* hi. “to make numerous,” Job 29:18; cf. *yāmîmrabbîm* lit. “many days” = “long life” 1 Kgs 3:11 = 2 Chron 1:11.

Job 32:7 uses *yāmîm* “days” in the fig. meaning “old age” in reference to older people.

*y<sup>l</sup>m<sup>l</sup>* lit. “days of” = “lifespan of” also occurs with an impersonal gen. to designate (hyperbolically) a particularly long life: Gen 8:22 “as long as the earth stands”; Deut 11:21 “as long as the heavens are above the earth”; Isa 65:22 “the age of my people shall be like the age of the tree”; Psa 89:30 “as long as the heavens exist.”

(h) Aside from describing the lifetime of persons in the sense of “time, period, indeterminate point in time,” in comparison to the sg., “days” occurs less often and more rarely in fixed expressions. “Days” is further specified by an inf. in Gen 25:24; Lev 26:34f.; Num 6:6; Deut 31:14; Judg 18:31; 1 Sam 22:4; 25:7, 16; 1 Kgs 2:1; Mic 7:15; Ruth 1:1; 2 Chron 26:5; 36:21; by a relative clause with *ʔšer* in Lev 13:46; Num 6:5; 9:18; Deut 1:46; 2:14; 1 Sam 1:28; 1 Kgs 2:11; 11:42; 14:20; 2 Kgs 10:36; Isa 7:17; Ezek 22:14; Esth 9:22; 1 Chron 17:10; 29:27; without *ʔšer* in Lev 14:46; 1 Sam 25:15; Psa 90:15; Job 29:2.

Noteworthy cs. relationships are: “time of harvest” (Gen 30:14; Josh 3:15; Judg 15:1; 2 Sam 21:9; cf. also Num 13:20[bis] “time of the first grapes”), “days of youth” (Ezek 16:22, 43, 60; 23:19; Hos 2:17; Psa 89:46; Job 33:25; Eccl 11:9; 12:1; cf. Job 29:4 “my autumn days”), “feast days” (Job 1:5; Esth 9:22), “time of mourning” (Gen 27:41; 50:4; Deut 34:8), “time of service,” etc. (Lev 25:50; Job 7:1; 14:14), and all manner of expressions for periods of misfortune (Isa 60:20; Ezek 4:8; 5:2; Psa 37:19; 49:6; 94:13; Job 30:16, 27; Eccl 11:8; 12:1; Lam 1:7; cf. also Gen 47:9[bis] “time of

sojourn”), for extraordinary activities (Gen 50:3, embalming; Esth 2:12, massage), and for cultically sanctioned times (Lev 8:33; 12:2, 4, 6; 15:25 [bis], 26; Num 6:4f., 8, 12f.; Esth 9:28, 31). Hos 9:9 and 10:9, “the days of Gibeah” (cf. Judg 19–21), allude to a historical event, while Hos 2:15 “days of the Baals” and 12:10 “days of the feast” probably refer to cultic celebrations (cf. Rudolph, KAT 13/1, 71, 234). Circumlocutions for eschatological judgment are rare: Hos 9:7(bis) “days of retribution/punishment”; cf. Ezek 22:4 “your (judgment) days”; Job 24:1 “his days (of God’s judgment)”; see 4b.

(i) In a series of adv. usages and combinations of *yāmîm* with other temporal terms, the general meaning “time” assumes particular prominence.

As with the sg. (see 3e), adv. phrases with demonstrative prons. should be mentioned here first. A pl. of *hayyôm hazzeh* “today” occurs in *hayyāmîm hāʿēlleh* lit. “in these (present) days” = “currently” (Zech 8:9, 15; otherwise “these (specified) days” Exod 1:5; 9:26, 28; cf. Ezek 43:27 without “these”); the pl. of *bayyôm hahûʿ*, *bayyāmîm hāhēm(mâ)* is more frequent and refers similarly to either the past (“at that time”) or to the future (“then”; of a time in the past: Gen 6:4; Exod 2:11; Judg 17:6; 18:1[bis]; 19:1; 20:27f.; 21:25; 1 Sam 3:1; 28:1; 2 Sam 16:23; 2 Kgs 10:32; 15:37; 20:1 = Isa 38:1 = 2 Chron 32:24; Ezek 38:17; Esth 1:2; 2:21; Dan 10:2; Neh 6:17; 13:15, 23; with *ʿad* “until”: 1 Kgs 3:2; 2 Kgs 18:4; with *lipnî* “before”: Zech 8:10; of the future: Deut 17:9; 19:17; 26:3; Josh 20:6; Jer 3:16, 18; 5:18; 31:29; 33:15f.; 50:4, 20; Joel 3:2; 4:1; Zech 8:6, 23; with *ʿahʿrê* “after”: Jer 31:33).

*yāmîm* also often indicates duration (Lev 25:8 “the time of the seven Sabbath years”; 1 Sam 27:7 with *mispar hayyāmîm* lit. “the number of days” = “the time that David dwelt in the land of the Philistines”; similarly, 2 Sam 2:11; *yāmîm ʿên mispār* “endless time” Jer 2:32), often pleonastically after a unit of time of longer duration: *šʿnāyîm yāmîm* lit. “two years of days” = “two years long” (Gen 41:1; 2 Sam 13:23; 14:28; Jer 28:3, 11), also following *hōdeš* or *yeraḥ* “month” (Gen 29:14; Num 11:20f. or Deut 21:13; 2 Kgs 15:13, resp.), and following *šābūʿîm* “weeks” (Dan 10:2f.); cf. also the less definite references *yāmîm ʿal-yāmîm* and *lʿyāmîm mîyāmîm* “in the course of time” (2 Chron 21:15, 19; on *lʿyāmîm šʿnayîm* in v 19 txt?, see Rudolph, HAT 21, 266), as well as *yāmîm ʿal-šānâ* “over a year and a day” (Isa 32:10).

The definite pl. meaning “time” occurs in usages with verbs such as *rbh* qal “to become many” (Gen 38:12 and 1 Sam 7:2 “a long time passed”), *ʿrk* qal “to become long” (Gen 26:8 “when he had already dwelt there a long time”; Ezek 12:22 “the days stretch on”; cf. v 23 *qrb* qal “to be

near”), *mš̄k* ni. “to stretch out, delay” (Isa 13:22 “their days do not linger”), *mlʿ* qal “to become full” (1 Sam 18:26 “the time was not yet complete”; Jer 25:34 “your time is fulfilled”), and in expressions like *lʿmôʿēd hayyāmîm* “at a particular time” (1 Sam 13:11), *lʿmiqšāt hayyāmîm* “after the passing of time” (Dan 1:18), and Aram. *liqšāt yômāyyâ* “after the passing of this time” (Dan 4:31).

Finally, numerous expressions with *yāmîm* are formed with terms for “past” and “future.” The distant past is indicated by *yʿmʾ* → *qedem* “the days of old” (2 Kgs 19:25 = Isa 37:26; Isa 23:7; 51:9; Jer 46:26; Mic 7:20; Psa 44:2; Lam 1:7; 2:17; cf. *yāmîm miqqedem* Psa 77:6; 143:5; *yāmîm qadmônîm* “former days” Ezek 38:17), *yʿmʾ* → *ʿôlām* “days of old” (Isa 63:9, 11; Amos 9:11; Mic 5:1; 7:14; Mal 3:4; *yʿmôt ʿôlām* Deut 32:7; Aram. *yômāt ʿālʿmāʿ* Ezra 4:15, 19), the past in general by *yāmîm rîʾšônîm* “former days” (Deut 4:32; Zech 8:11; Eccl 7:10; cf. Num 6:12 “the earlier time”; Deut 10:10 “like the beginning”). Expressions that refer to the future (*hayyāmîm habbāʾîm* “the coming days” Eccl 2:16) are *bʿʾaḥʾrît hayyāmîm* “in the course of days” (for passages and interpretation → *ḥr* 4b), *hinnēh yāmîm bāʾîm* “behold, days are coming” (1 Sam 2:31; 2 Kgs 20:17 = Isa 39:6; Jer 7:32; 9:24; 16:14; 19:6; 23:5, 7; 30:3; 31:27, 31, 38; 33:14; 48:12; 49:2; 51:47, 52; Amos 4:2; 8:11; 9:13) and *lʿōrek yāmîm* “forever” (Psa 93:5; Lam 5:20); *lʿqēš hayyāmîn* “at the end of days” is more markedly eschatological (Dan 12:13; cf. *layyāmîm* Dan 10:14).

In the expression *sēper dibrē hayyāmîm* lit. “book of daily affairs” = “chronicle,” *hayyāmîm* combined with *dibr* approximates the meaning “history” (cf. Eissfeldt, *Intro.* 285; 1 Kgs 14:19–2 Kgs 24:5, 33x; Esth 2:23; 6:1; 10:2; Neh 12:23; 1 Chron 27:24 txt em).

(j) An idiomatic usage of *yāmîm* in the meaning “year” occurs in the older narrative literature (otherwise only *šānâ* “year” in this meaning, 876x [excl. Psa 77:11; Lis. omits Gen 11:10b], 161x in Gen, 104x in 2 Kgs, 92x in Num, 78x in 2 Chron, 59x in Lev, 58x in 1 Kgs, and 44x in Jer), a usage that may have originated in the notion of the return of the individual days of a year in the following year, so that “the days (of the year)” could represent the “year” itself (contra F. S. North, “Four-Month Seasons of the Hebrew Bible,” *VT* 11 [1961]: 446–48). Except for references to a period of time in 1 Sam 27:7 (“a year and four months”) and 1 Sam 29:3 txt em (“one or two years”), *yāmîm* occurs in this meaning only as a designation for annually recurring phenomena: *zebaḥ hayyāmîm* “annual sacrifice” (1 Sam 1:21; 2:19; 20:6), *tʿqūpôt hayyāmîm* “turning-point of the year” (1 Sam 1:20; cf. *tʿqūpat haššānâ* Exod 34:22; 2 Chron 24:23), *mîyāmîm yāmîmâ* “annually” (Exod

13:10; Judg 11:40; 21:19; 1 Sam 1:3; 2:19), *layyāmîm* “per year” (Judg 17:10), and *miqqēš yāmîm layyāmîm* “at the end of each year” or “annually” (2 Sam 14:26).

4. (a) As indicated by the abundant usages of *yôm/yāmîm*, the term not only indicates an actual unit of time but develops further into the most important temporal term in the OT for expressing both moments and periods of time. Like → *‘et* and → *‘ôlām*, the term occurs almost exclusively in concrete temporal designations, i.e., in close association with the respective temporal content, but not in abstract statements concerning time as such. This characteristic is not evidence of a peculiar Hebraic understanding of time; non-Hebrew analogies can also be adduced for all usages of *yôm/yāmîm*.

Accordingly, specific OT statements with *yôm* in a general meaning encompass a very small area. Like all earthly phenomena, day and night are also subject to God’s reign because they were created by him (Gen 1:5, 14; Psa 74:16 “the day is yours, yours, the night, too; you have established stars and sun”; cf. v 16 “summer and winter, you have created them”). In an eschatological context, a series of texts even mention that the inviolable alternation of night and day (Gen 8:22) will be suspended by Yahweh (Zech 14:7 “and there will be a single day . . . not alternation of night and day, even in the evening there will be light”). This suspension is not the deification familiar in the region of northern Syria and Asia Minor (cf. W. L. Moran, *Bib* 43 [1962]: 319; in the 8th-cent. BCE Aram. treaty from Sef. *ywm* “day” and *lylh* “night” appear as a pair in the list of divine witnesses to the oath, *KAI* no. 222A.12; cf. Fitzmyer, *Sef.* 38f.). Furthermore, expressions that more or less personify a day are relatively rare (cf., perhaps, Prov 27:1 “for you do not know what a day will bring,” with the verb *yld* “to bear, bring forth”; Jer 20:14 and Job 3:1ff. curse the day of birth).

(b) One can recognize a specifically theological usage in the notion of the *yôm yhw̄h*, the “day of Yahweh,” and associated concepts. Only a few works can be mentioned from the extensive literature on this subject. The linguistic aspect of the expressions used is investigated in broad scope by L. Černý, *Day of Yahweh and Some Relevant Problems* (1948); later surveys of the problem with additional bibliog. include: K.-D. Schunck, “Strukturlinien in der Entwicklung der Vorstellung vom ‘Tag Yahwes,’” *VT* 14 (1964): 319–30; H. D. Preuss, *Jahweglaube und Zukunftserwartung* (1968), 170–79; G. Fohrer, *History of Israelite Religion* (1972), 270f.

The expression *yôm yhw̄h* “the day of Yahweh” occurs in this form only 16x (Isa 13:6, 9; Ezek 13:5; Joel 1:15; 2:1, 11; 3:4; 4:14; Amos 5:18[bis], 20; Obad 15; Zeph 1:7, 14[bis]; Mal 3:23). But other linguistic alternatives describe the judgment of Yahweh indicated by this phrase: *yôm*

*l'yhwh* is used indeterminately in Isa 2:12 and Ezek 30:3; terms further specifying the content of the phrase can occur between *yôm* and *(le)yhwh* (*nāqām* “vengeance” Isa 34:8; *‘ebrâ* “wrath” Ezek 7:19; Zeph 1:18; *‘ap* “wrath,” Zeph 2:2f.; Lam 2:22; *zebaḥ* “sacrifice” Zeph 1:8), terms that can also occur apart from the divine name in similar contexts and to characterize the expected (or experienced) day of judgment in regard to its peculiarity (wrath, vengeance, punishment, etc.: Isa 10:3; 13:13; 34:8; 61:2; 63:4; Jer 46:10; Ezek 22:24; Hos 5:9; Zeph 1:15; Lam 1:12; 2:1, 21; cf. Zeph 3:8; darkness, clouds, storm, etc.: Ezek 30:3; 34:12; Joel 2:2; Amos 1:14; Zeph 1:15; cf. Ezek 30:18; Mic 3:6; battle, destruction, downfall, confusion: Isa 22:5; 30:25; Jer 12:3; Ezek 26:18; 27:27; 32:10; Amos 1:14; Zeph 1:16; cf. Mic 7:4; misfortune, ruin, distress, etc.: Isa 17:11; Jer 18:17; 46:21; 51:2; Obad 12; Zeph 1:15). Moreover, demonstrative prons. and interjections refer to the “day” (“that day” Jer 30:7; 46:10; Zeph 1:15; cf. Ezek 39:8; with → *hinnēh* “behold” Ezek 7:10; with → *‘hāh* or *hāh* “Ah” Ezek 30:2; Joel 1:15); its coming and imminence are discussed (Jer 47:4; Ezek 7:7, 12; 30:3[bis]; Zech 14:1; Mal 3:2, 19[bis]); it can also be described, however, as the “day” of the one affected (“your/his/their day” Jer 50:27, 31; Ezek 21:30, 34; 22:4 txt em; “the day of your brother” Obad 12). In the corresponding contexts of eschatological judgment, the specific concept of the “day of Yahweh” also probably echoes in the essentially purely adv. expression *bayyôm hahû’* lit. “on that day” = “then” (see 3e; cf. e.g., Isa 2:11, 17 with v 12), yet this notion is not inherent in the expression itself (cf. the comprehensive investigation by P. A. Munch, *The Expression bayyôm hāhū’? Is It an Eschatological Terminus Technicus?* [1936], contra H. Gressmann, *Der Messias* [1929], 75, 83, etc.; Preuss, op. cit. 174, follows Munch). The expression often serves as a linking formula in promises, although specialized usages of *yôm* are otherwise rare in promises of salvation, and no relationship to “day of Yahweh” can be recognized (cf. Isa 49:8; Jer 31:6; Mic 7:11, 12).

Considerations of the significance of the expression *yôm yhwh* should pose the question of the meaning of the word *yôm* in this phrase before posing the question of the origin and development of the concept appropriate to tradition-critical examination. Formally, *yôm yhwh* belongs to a series of gen. combinations in which *yôm* is qualified by a proper name (see 3d on *yôm midyān*, etc.; cf. also 3h *y<sup>c</sup>mēgib‘ā*) and thus, in a pregnant, terse idiom refers to a significant event identified by the proper name, emphasizing the experiential character above the pure, rather indeterminate temporal designation (cf. S. Herrmann, *Die prophetischen Heilserwartungen im AT* [1965], 120f.). The qualitative determinacy of an act of Yahweh can be seen here both in the past (Ezek 13:5; 34:12; Lam

2:22; cf. Ezek 22:24; Lam 1:12; 2:1, 21) and in the future (thus most passages); one may have also originally thought of various “days of Yahweh” (cf. perhaps Job 24:1). “In the context of Israel’s generally future-oriented and preliminary historical thought and its faith in God’s guidance, which was shaped by its God and the nature of his activity in history, this term was increasingly and predominantly shifted to the future and thus only gradually became ‘the’ day of Yahweh that we encounter most and with which we are most familiar” (Preuss, op. cit. 172).

With reference to the concept of a comprehensive day of Yahweh’s judgment, tradition-critical investigation has revealed that the point of departure is not a cultic day of Yahweh, such as the hypothesized enthronement festival of Yahweh (so, among others, S. Mowinckel, *Psalmenstudien* 2 [1922]; id., *NTT* 59 [1958]: 1–56, 209–29; J. Lindblom, *Prophecy in Ancient Israel* [1962], 316ff.), but, in accordance with accompanying concepts, the experience of a historical act of Yahweh on behalf of his people consisting of a victory over God’s enemies. In particular, the traditions of the Yahweh war (→ *šābāʾ*?, → *hmm*) appropriated by the prophets would have influenced the development of expectations for the future (cf. G. von Rad, “Origin of the Concept of the Day of Yahweh,” *JSS* 4 [1959]: 97–108; id., *Theol.* 2:119–25; Schunck, op. cit. 320f., 330; with modifications, Preuss, op. cit. 173, 179, who places greater emphasis on the exodus; and H.-M. Lutz, *Jahwe, Jerusalem und die Völker* [1968], 130–46: “The day of Yahweh is *also* war, but *not only* war” [op. cit. 146]; on the relationship between the descriptions of theophany and the day of Yahweh, cf. J. Jeremias, *Theophanie* [1965], 97–100; according to M. Weiss, “The Origin of the ‘Day of the Lord’—Reconsidered,” *HUCA* 37 [1966]: 29–60, the expression was reshaped by Amos).

For the history of the concept, one can refer to the presentations in these studies. The oldest passage is Amos 5:18–20 (cf. Wolff, *Joel and Amos*, Herm, 33f., 255–57: “Woe to you who seek the day of Yahweh? It is darkness and not light!” Amos contested the contemporary expectation of salvation: since Israel is positioned with Yahweh’s enemies, it cannot consider itself to be the “remnant” (→ *šṛ*) who will receive salvation on the day of Yahweh; rather, it must experience the extraordinary consequences of the inescapable intervention of Yahweh. This passage, like Isa 2:12–17 (Wildberger, *Isa 1–12*, CC, 112f.), focuses on only a few individual elements of the concept—in Amos the darkness, in Isaiah, Yahweh’s majesty above all the proud and arrogant. The presentations in Zeph 1:7ff. and Ezek 7 (Zimmerli, *Ezek*, Herm, 1:201f.), where the day of Yahweh is directed exclusively at Israel, are more extensive; following the catastrophe of 587 (in Ezek 13:5; 34:12; Lam 1:12; 2:1, 21f., characterized retrospectively as “Yahweh’s day,” etc.), the judgment of Yahweh is

predominantly but not exclusively (cf. Joel 1:15; 2:1, 11; Zech 14:1; Mal 3:23) directed at the foreign nations (esp. at Babylon in Isa 13:6, 9; at Egypt, Ezek 30:3; at Edom, Obad 15; cf. further Isa 34:8; 61:2; Jer 46:10; Joel 3:4; 4:14). The transferal of the concept from judgment prophecy to salvation prophecy and vice versa is facilitated by the essentially ambivalent nature of the day of Yahweh; it brings judgment upon the enemies of Yahweh and salvation for his people. The deciding factor depends upon the side to which Israel or the addressees belong. The concept of the day of Yahweh thus constitutes an essential point of contact between the prophetic proclamation of judgment and of salvation and demonstrates their inner unity.

5. The Qumran literature uses *yôm* without significant change from OT usage. In the LXX *hēmera* acquires the meaning “time” more pronouncedly than elsewhere in Gk. under the influence of OT usage. On the further history of the concept of the “day of Yahweh” with new terminology (“day of God,” “day of the Lord,” etc.) in early Judaism and in the NT, cf. e.g., P. Volz, *Die Eschatologie der jüdischen Gemeinde im ntl. Zeitalter* (1934), 163–65; G. von Rad and G. Dellling, “ἡμέρα,” *TDNT* 2:943–53.

יָחַל *yḥl* pi./hi. **to wait**

S 3176; BDB 403b; *HALOT* 2:407a; *TDOT* 6:40–48; *TWOT* 859; *NIDOTTE* 3498

1. *yḥl* pi./hi. “to wait, await” is attested only in Hebr.; the reference to Sarab. *wḥl* “to be undecided” (GB 297b; KBL 377b) is of little help.

Occurrences of a by-form *ḥîl* (III) are uncertain (in Gen 8:10 and Mic 1:12 *yḥl* pi. should be read; in Judg 3:25; Psa 37:7; and Job 35:14 *yḥl* hi.; cf. Berg., *HG* 2:173; contra L. Kopf, *VT* 8 [1958]: 176f.).

The verb is attested in the pi. and hi. (on the distinction in meaning between pi. “to wait” and hi. “to be in a state of waiting” cf. KBL 377f.; *HP* 249f., 257f.); ni. forms in Gen 8:12 (probably to be pointed as a pi. as in v 10) and Ezek 19:5 txt? (cf. Zimmerli, *Ezek*, Herm, 1:389) are uncertain. Forms that occur in addition to the verb are the adj. *yāḥîl* “expectant” (Lam 3:26, but probably to be emended to *yḥl* hi.) and the subst. *tôḥelet* “expectation, hope” (on the nom. form, see GKC §85p).

The PN *yahl<sup>e</sup>el* (Gen 46:14; Num 26:26) does not derive from this root (as KBL 378a has it) but from Aram./Arab. *hlw/y* “to be sweet, pleasant,” according to *IP* 204.

2. According to Lis. *yhl* pi. occurs 24x (Psa 14x, Job 6x, Deutero-Isa 2x, Ezek and Mic 1x each), hi. 15x (Psa 5x; 1 Sam 13:8 classified as a hi.), ni. 2x (see 1), *yāhîl* 1x (see 1), *tôhelet* 6x (Psa 39:8; Job 41:1; Prov 10:28; 11:7; 13:12; Lam 3:18), the entire root a total of 48x (excl. *hîl* III; see 1), 20x in Psa, 9x in Job, 4x in Lam, and 3x in Prov.

3. The verb belongs to the semantic field of verbs of waiting and hoping, which can be understood only collectively. The most important of the par. verbs is → *qwh* pi. “to hope” (under which see also *hkh* pi., *šbr* pi., and the derived noms. *tiqwâ*, *miqweh*, *šēber*). On the entire semantic field, cf. C. Westermann, “Das Hoffen im AT,” *Theologia Viatorum* 4 (1952/53): 19–70 = *Forschung am AT* (1964), 219–65.

Approximately 1/3 of the passages are nontheological. The verb corresponds precisely to Eng. “to wait” in Gen 8:10, 12 txt em: Noah waits for the flood to abate; similarly in 1 Sam 10:8; 13:8; Job 32:11, 16 (2 Sam 18:14 is textually uncertain). The particular nuance of this waiting varies considerably according to the situation. In Job 29:21 and 32:11, 16, it is the respectful waiting of the younger when the elder speaks; in 29:23 it is intensified to an expectation: “They waited upon me as on the rain.” In the laments of Job it is, in accord with his situation, an endurance or perseverance (Job 6:11; 13:15; 14:14; 30:26). The breadth of meaning of this waiting may be demonstrated where several possibilities for interpretation present themselves; Job 13:15 can be translated: “See, he slays me, I cannot endure!” but it can also mean: “See, he slays me, I cannot wait!” The contextual ambivalence of waiting is also demonstrated in Prov 13:12: “Delayed expectation (*tôhelet*) brings heartache,” for the expectation can be disappointed (Ezek 19:5). Ezek 13:6 stands on the boundary between theological and nontheological usage: the false prophets expect God to fulfill the word they preach.

4. The remaining passages use *yhl* in reference to God. It is one of the verbs whose meaning coincides with its function in a particular speech form, from which all other usages and variations in meaning are to be explained. This speech form is (as with the other verbs of waiting and hoping in reference to God) the confession of confidence in the individual lament. Most instances of the theological usage belong to this form and its variants.

(a) *yhl* in the confession of confidence: In Psa 130 the plea from the depth (vv 1f.), combined with two motifs (vv 3f.), is followed by the confession of confidence in vv 5f. (txt em): “I hope (*qwh* pi.), Yahweh, in

you; my soul waits (*qwh* hi.) on your word. My soul waits (*yhl* hi.) on the Lord more than the watchman on the morning.” The comparison, which belongs to nontheological usage, makes the intention of the confession of confidence very clear. Hoping or waiting upon Yahweh refers to awaiting an *experience*, which corresponds to the arrival of the dawn in the comparison. Waiting on Yahweh refers to waiting on his saving intervention. Thus it becomes clear that waiting upon God refers to precisely the same process meant by the profane word “to wait” not in reference to God; the only distinction is the identification of that which the expectant individual awaits as God’s intervention. Thus the verb in reference to God retains the entire range of meaning that it has in nontheological usage; the aspect of endurance involved in waiting can be emphasized as in Psa 71:14, “I, however, I will always wait,” or the goal of waiting in Mic 7:7, “I will await the God of my salvation,” or the agony of waiting in Psa 69:4, “My eyes waste away in waiting upon my God.” Waiting is founded, however, upon the fact that it is waiting upon *God*: Psa 39:8, “And now, what do I await, Yahweh? My hope rests in you!” (similarly, Psa 38:16; 130:5; Lam 3:24). Lam 3:21–26 resembles a fugue on the theme of waiting upon God, a considered development of the confession of confidence. The first sentences declare explicitly that waiting on God means waiting on this liberating intervention: “I will take this to heart, I will wait upon it: the demonstrations of Yahweh’s grace are not at an end, his mercies are not exhausted.” V 23 extends this line of thought and in vv 24f. offer additional motivations for waiting on Yahweh.

(b) This “waiting on God” in the confession of confidence is obviously very characteristic of people’s approach to God in Israel; the relatively few passages in which the word occurs contain a series of expansions and variations of the motif: (1) Resembling the 1st per. sg. confession of confidence, although no longer in the same function, now denoting the attitude of the pious more generally, it is frequently a final clause in Psa 119: “I wait on your word” (vv 81, 114, 147; cf. v 74; slightly varied in vv 43 and 49). Pious wisdom contrasts the waiting of the evildoer and of the pious (Prov 10:28; 11:7). (2) A series of texts call for this waiting on Yahweh; the confession of confidence has been transformed into parenthesis. The origin of the exhortation in the confession of confidence is demonstrated by Psa 130:5–7, where the confession culminates in the exhortation, “Wait, Israel, on Yahweh!” (v 7; so also 131:3). The exhortation occurs elsewhere in Psa 42:6, 12; 43:5; or a promise is made to the expectant one; Psa 31:25; 33:18; 147:11; cf. Prov 10:28. (3) The significance of waiting on God is demonstrated in the lament in which the abandonment of waiting signifies the low point; thus Lam 3:18, “My hope in Yahweh is gone” and 2 Kgs 6:33, where the king laments: “The misfortune

that Yahweh has laid on us is so great, why should I then continue to wait on Yahweh?”

(c) A few passages incorporate waiting on God into prophetic salvation preaching; in the universalistic expansion of the salvation message of Deutero-Isaiah, the far regions of the earth, the islands, wait on Yahweh (Isa 42:4; 51:5); Mic 5:6 says that the remnant will not wait on people (but only on God).

5. → *qwh* pi.

C. Westermann

יָטַב *yṭb* **to be good** → טוֹב *tōb*

יָכַח *ykh* hi. **to determine what is right**

S 3198; BDB 406b; *HALOT* 2:410a; *TDOT* 6:64–71; *TWOT* 865; *NIDOTTE* 3519

1. The root *ykh* occurs only in Hebr. and Jew. Aram. (KBL 380a). The two fem. substs. *tōkaḥat* and *tōkēḥâ* derive from the hi. of the verb with the prefix *ta-* (BL 495).

Related terms are the noms. *nākōaḥ* “straight, the straight” (8x) and *nōkaḥ* “before,” used mostly as a prep. (24x; on the exchange of initial *n* and *w*, see *NB* 190f.).

2. In the OT, the verb is attested 59x (hi. 54x, 15x in Job, 10x in Prov, 7x in Psa; ni. 3x, ho. 1x [as well as Psa 73:14 txt em], hitp. 1x), the subst. *tōkaḥat* 24x, the subst. *tōkēḥâ* 4x. Occurrences cluster in Prov and Job (resp., 26 and 19 of the total of 87x).

3. (a) The root probably belonged in the sphere of judicial proceedings (cf. Isa 29:21; Amos 5:10 “in the gate”). The basic meaning of *ykh* hi. is “to determine what is right” (thus with H. J. Boecker, *Redeformen des Rechtslebens im AT* [1964], 45–47; occurrences: Gen 31:37; Job 9:33; 16:21; 13:3, 15; Lev 19:17; with F. Horst, *Gottes Recht* [1961], 289; id., BK 16/1, 86, “[legal] procedural establishment of right”; contra V. Maag, *Text, Wortschatz und Begriffswelt des Buches Amos* [1951], 152–54, who postulates “to reprimand” as a basic meaning and considers the [legal] procedural meaning secondary). The subj. of *ykh* hi. is originally the court

hearing the case (e.g., Gen 31:37 E; Job 9:33; cf. Wolff, *Hos*, Herm, 76); *ykh* hi. occurs at the end of the proceedings. Job 13:3 and 15:3 (cf. Hab 2:1 *tôkaḥat*) demonstrate that it is with *ykh* hi. a question of the spoken word. 1 Kgs 3:27b *hî' immô* “she is his mother” could be an example of such a “judicial determination” (Boecker, op. cit. 142f.; cf. Exod 22:8 *hû' zeh*). In Isa 2:4 = Mic 4:3; Isa 11:3f.; Hab 1:12; Job 22:4; 23:4, *ykh* occurs with → *špt* “to judge”; in Hos 4:4; Mic 6:2; Job 13:6; 40:2 with → *rîb* “to conduct a lawsuit”; and in Job 32:12 with → *ʿnh* “to answer.” When litigants are the subj. of *ykh*, their “determination of what is right” tends toward “proving, disproving, justifying,” etc.: e.g., Job’s friends in Job 6:25f.; 19:5; 32:12 and Job in Job 13:3, 6, 15; 15:3; 23:4; 40:2 (cf. Gen 21:25; Psa 38:15; Hab 2:1). On the preps. that follow *ykh* hi., see KBL 380b.

(b) When *ykh* refers to someone in the wrong, it acquires the meaning “to reprimand,” “to call to account” (Boecker, op. cit. 47). *ykh* occurs in this meaning esp. in Prov: *ykh* hi. in 9:7f.; 10:10 txt em; 15:12; 19:25; 24:25; 28:23; *tôkaḥat* always in the sg. and usually par. to *mûsâr* “correction” (→ *ysr*) in 5:12; 6:23; 10:17; 12:1; 13:18; 15:5, 10, 32; par. to *ʿešâ* “counsel” (→ *yʿš*) in 1:25, 30 (cf. von Rad, *Theol.* 1:431n.32). Scoffers and evildoers scorn the edifying reprimand of parents and the wise (1:30; 5:12, etc.); they hate correction (15:10; 12:1); the perceptive, however, heed it (15:31f.) and bear it in mind (13:18; 15:5).

Antonyms worthy of note are *qrš ayin* “to wink” (10:10) and *ḥlq lāšôn* “to have a smooth tongue” (28:23); the consequence of *ykh* hi. for those involved is “to stand as a liar” (*kzb ni.*, 30:6).

The related *nākōaḥ* “the straight” is also a characteristic of wisdom language (Prov 8:9; 24:26; 26:28 txt em; Sir 11:21; cf. H. W. Wolff, *Amos the Prophet* [1973], 56–59).

#### 4. Theological usage reflects both meanings:

(a) (legal) procedural: God as judge is subj. of *ykh* hi. in Gen 31:42b E; 2 Kgs 19:4 = Isa 37:4; Isa 2:4 = Mic 4:3; Psa 50:8, 21; Job 22:4; 1 Chron 12:18; hitp. Mic 6:2. The ni. in Isa 1:18 demonstrates that both litigants, Yahweh and the people, can execute *ykh* (Wildberger, *Isa 1–12*, CC, 55). In Ezek 5:15; 25:17 Yahweh’s means of punishment is expressed by the formula *bʿtôkʿhôt ḥēmâ* “with furious punishment.” The expression *yôm tôkēḥâ* “day of punishment” (Hos 5:9; 2 Kgs 19:3 = Isa 37:3; contra Wolff, *Hos*, Herm, 113) could also be formulaic. In Job 13:3, 15; 40:2; Hab 2:1; Job 23:4, God is the obj. of *ykh*.

(b) instructional: God reprimands the supplicant (Psa 6:2; 38:2;

39:12), kings (Psa 105:14 = 1 Chron 16:21; 2 Sam 7:14), evildoers (Psa 94:10), the biased friends of Job (Job 13:10), those who add to God's words (Prov 30:6). Such reprimands are issued primarily to those whom God loves (Prov 3:11f.); consequently, the person whom God reprimands is blessed (Job 5:17).

The usage of *ykh* hi. in Gen 24:14, 44 is unusual ("to make a decision," "to determine"; cf. Procksch, *Gen*, KAT [19243], 324).

5. Qumran uses *ykh* hi. and *tôkaḥat* as in the OT; Lev 19:17 is cited in CD 7:2; 9:7f. and 1QS 5:26. Prov 3:11f. plays a great role in Judaism (O. Michel, *Der Brief an die Hebräer* [1964] 12, 439f., an excursus concerning suffering as God's correction); cf. Heb 12:5ff. in the NT. The LXX usually renders *ykh* with *elenchein* (cf. F. Büchsel, "ἐλέγχω," *TDNT* 2:473–76).

G. Liedke

## יָלַד *yld* to bear

S 3205; BDB 408a; *HALOT* 2:411b; *TDOT* 6:76–81; *TWOT* 867; *NIDOTTE* 3528

1. The root \**wld* (NWSem. > *yld*; but cf. Gen 11:30 *wālād* "child"; Meyer 1:97) "to bear" is common Sem. (Berg., *Intro.* 210; P. Fronzaroli, *AANLR* 8/19 [1964]: 246, 262) and well attested in the ancient Near East in the OT period: Akk. (*w*)*alādu* (*CAD* A/1:287–94), Ug. *yld* (*WUS* no. 1166), Phoen. and Aram. inscriptions *yld* (*DISO* 107; not attested in *Bibl. Aram.*).

All seven stems of the verb are attested (qal "to bear, beget," ni. "to be born," pi. "to act as midwife"; cf. *HP* 210f.; pu. "to be born" (probably a qal pass.), hi. "to beget, cause to be born," ho. "to be born," hitp. "to make one's lineage known," Num 1:18). The most important subst. of the root is *yeled* "boy, child"; other substs. are *yaldâ* "girl," *yālîd* "son," *yaldût* "childhood," *yillôd* "(new)born," *wālād* "child," as well as *lêdâ* "birth" (BL 450), *môledet* "descendants, relatives" (BL 490), *tôlêdôt* "families, genealogy" (BL 495); in addition, related proper names are the PN *môlîd* (1 Chron 2:29; *IP* 144) and the places-names *môlādâ* (Josh 15:26; 19:2; Neh 11:26; 1 Chron 4:28), *tôlād* (1 Chron 4:29) = *ʿeltôlad* (Josh 15:30; 19:4; cf. *HAL* 58).

2. Of the total of 492 occurrences of the verb, most fall to Gen (170x)

and 2 Chron (117x); there follow Isa 23x, Jer 22x, Exod and Job 15x, Ruth 14x. Of these, 237 are qal (Gen 90x, 1 Chron 26x, Jer 17x, Isa 15x), 38 ni. (1 Chron 10x, Gen 7x), 10 pi. (Exod 8x, Gen 2x), 27 pu. (Gen 11x), 176 hi. (1 Chron 80x, Gen 59x, Ruth 9x, Isa 6x), 3 ho. (Gen 40:20; Ezek 16:4f.), and 1 hitp. (Num 1:18).

Statistics for the noms. are: *yeled* 89x (incl. 2 Sam 6:23 Q; Gen 19x, Exod and 2 Sam 12x, 1 Kgs 9x), *yaldâ* 3x, *yaldût* 3x, *yillôd* 5x, *yâlîd* 13x, *wâlâd* 1x, *lêdâ* 4x, *môledet* 22x (Gen 9x), *tôlêdôt* 39x (Gen and Num 13x each, 1 Chron 9x, Exod 3x, Ruth 1x). Thus the noms. total 179x (the root, apart from proper names, 671x).

Concentrations in Gen and 1 Chron are due to the use of the verb in the genealogies; almost all the occurrences in the Chr history belong to the family trees, as well as most of the occurrences in Ruth (Ruth 4:18–22).

3. (a) In its basic meaning, *yld* qal may be translated “to bear” (Gen 4:1f.) or “to beget” (Gen 4:18) depending upon whether a woman or a man is subj. The construction with *ʔet* and the successive specification of the name of the one born or begotten is common. The simple acc., however, is often found, esp. in the expression “she bore a son.” The name of the father to whom the child is born is introduced with *le*.

(b) The semantic field of *yld* is biologically determined: → *ʔiššâ* “woman” (Judg 13:24) or → *ʔem* “mother” (Jer 15:10), as well as *ʔâmâ* “maid” or *pîlegeš* “concubine” (Gen 22:24) denote the subjs. and usually → *bēn* “son” (1 Sam 1:20; pl. *bānîm* “sons, children,” Gen 10:1) or *bat* “daughter” (Gen 30:21) the objs. of birth (cf. *zākār* “male” in Lev 12:2; *n<sup>c</sup>qēbâ* “female” in Lev 12:5; *na<sup>c</sup>ar* “boy” in Judg 13:8); cf. also → *ʔab* “father” (Isa 45:10) in relation to the meaning “to beget.”

The most frequent verbs in the semantic field of *yld* are: *hrh* “to become/be pregnant” (43x, adj. *hāreh* “pregnant” 15x), *hîl* “to have pain, be in labor” (qal 30x according to Lis.) and → *gdI* pi. “to rear” (Isa 1:2 [cf. Wildberger, *Isa 1–12*, CC, 12f.]; 49:21; 51:18, etc.); cf. too the roots *ʕqr* (*<sup>c</sup>qārâ* “barren”) and *škl* (pi. “to make childless, have a miscarriage”; *š<sup>c</sup>kôl/šakkûl* “robbed of children”).

(c) The segholate form *yeled* “boy” is frequently used in a manner similar to → *bēn* “son,” except that *bēn* describes the relationship to the father or mother more exactly than the neutral *yeled* (thus *yeled* accompanies *bēn* in 1 Kgs 3:25; Jer 31:20, etc.; in contrast, *yeled* occurs alone in Exod 1f. and Dan 1, e.g., where the relationship with the parents plays no role; on Gen 4:23 see P. D. Miller, *JBL* 85 [1966]: 477f.). *yeled* as a masc. term contrasts directly with the fem. *yaldâ* “girl” (Joel 4:3; Zech 8:5), but is also used more generally in the meaning “child” (Ezra 10:1).

*y<sup>e</sup>lādîm* are the “youths,” particularly in contrast to the “elders” (*z<sup>e</sup>qēnîm*; 1 Kgs 12:8, 10, 14 = 2 Chron 10:8, 10, 14; cf. A. Malamat, *JNES* 22 [1963]: 247–53).

*yālîd* “son” is often combined with → *bayit* “house” in the expression *y<sup>e</sup>lîd(ê) bayit* (Gen 14:14; 17:12f., 23, 27; Lev 22:11; Jer 2:14); the expression refers to slaves born in the household in contrast to those who have been purchased (*miqnat-kesep* Gen 17:12, etc.).

(d) *yld* also applies to animals with some frequency (*yld qal*, Gen 30:39; 31:8; Jer 14:5; 17:11, etc.; *yeled*, Isa 11:7 of bear cubs, Job 39:3 of young deer, Job 38:41 of young ravens).

(e) It can refer to Moses in a fig. sense: “Did I conceive this whole people or did I bear them?” (Num 11:12), as it can refer to the “Rock” (Deut 32:18), the sea (Isa 23:4), the stone (Jer 2:27), the day (Prov 27:1), as well as to Israel (Isa 33:11), Zion (Isa 66:8), or the enemy (Psa 7:15); cf. further the picturesque usage in Isa 55:10; 59:4; Job 38:28 hi.; Psa 90:2 pu.; Prov 17:17 ni.

4. (a) One of the oldest narrative motifs in the patriarchal accounts is the report of the barrenness of the matriarch (Gen 16:1f. “she had born him no child”; cf. 17:17; 18:13). God (or his messenger) promises this barren woman a son: Gen 16:11, 15; 17:19–21 (“you/she will bear a son”). The motif is taken up in Judg 13:3, 5, 7; 1 Kgs 13:2; Isa 7:14; 9:5; cf. Isa 54:1 (see C. Westermann, *Promises to the Fathers* [1980], 12ff.).

(b) The root *yld* has theological significance in three prophetic contexts: (1) Occasionally, the picture of the “pains of the woman in childbirth” describes the judgment announced: Mic 4:9f.; Jer 22:23; cf. Isa 13:8; 21:3; Jer 6:24 (the same picture also occurs in other contexts: Isa 23:4; 26:17f.; Song Sol 8:5); the picture serves to emphasize the frightfulness of judgment. (2) *yld* also refers to the actual children born to the prophets: Hosea is to take a wife of harlotry (1:2) and beget children of harlotry (*yaldê z<sup>e</sup>nûnîm*). This description also implies an accusation against Israel: The Israelites are children of harlotry because they have turned away from Yahweh and have participated in the Canaanite fertility rites in honor of Baal. The names of the children born (*yld* in Hos 1:3, 6, 8) to him by this wife of harlotry refer quite unequivocally to the coming judgment. The children (or their names) born to Isaiah (*yld* in Isa 8:3; *y<sup>e</sup>lādîm* in 8:18) have the same prefigurative significance. On Isa 7:14 see H. W. Wolff, *Immanuel* [1959]; cf. further Isa 9:5. In these two passages the promise of the child to be born is associated with discussion of the coming salvation. (3) The laments of the prophet Jeremiah climax in the cursing of his own birth; the verb *yld* occurs in each case: 15:10, “Woe is me, Mother, that you bore me!” and 20:14, “Cursed be the day in which I was born, the day my mother bore me be not blessed.” This lament is taken up, also in

conjunction with *yld*, in Job 3:3.

(c) In a few passages *yld* describes the relationship between Yahweh and people as a father-son relationship (→ *ʿāb* IV/3, → *bēn* IV/3). Thus Yahweh's adoption of the kings at the enthronement is understood as a "begetting" (Psa 2:7, "You are my son, today I have begotten you"), but, in contrast to Eg. royal ideology, not in the mythical and physical sense (cf. G. von Rad, "Royal Ritual in Judah," *PHOE* 222–31; Kraus, *Psa*, CC, 1:130f.; K.-H. Bernhardt, *Das Problem der altorientalischen Königsideologie im AT* [1961]). *yld* describes, then (but only in late texts), the relationship between Yahweh and his people (→ *bēn* IV/3b). The discussion of Yahweh as the one who begot his people (or to whom Israel was born) has a metaphorical character (cf. on this topic, P. Humbert, "Yahvé Dieu Géniteur?" *Asiatische Studien* 18/19 [1965]; 247–51), clearly e.g., in Deut 32:18, "You did not think of the rock that begot (*yld* qal) you and you forgot the God who bore you (*hîl* po.)"; cf. Jer 31:20. Ezekiel's statement, e.g., that the foundling (16:20) or Oholah and Oholibah (23:4, 37) have born children to Yahweh is also metaphorical; it concerns the image of Israel as the adulterous wife of Yahweh first attested in Hos. All these images point to Yahweh's original relationship of love and care for his people, which only makes Israel's current apostasy all the more painful. Job 38:28f. describes Yahweh's creative activity indirectly with the aid of the verb *yld* qal/hi.

5. The root *yld* finds no unified counterpart in Gk. usage. The LXX translates the verb in the qal "to bear" with *tiktein*, otherwise with a form of *gennan* (cf. F. Büchsel and K. H. Rengstorf, "γεννάω," *TDNT* 1:665–75). The LXX also renders *yeled* variously: *paidion* (Gen 21:16, etc.), *teknon* (Gen 33:7, etc.), *paidarion* (2 Sam 12:18, etc.), *neaniskos* (Dan 1:10, etc.); see A. Oepke, "παῖς," *TDNT* 5:636–54.

J. Kühlewein

ים *yām* **sea** → תהום *t'hôm*

יָסַד *ysd* **to found**

S 3245; BDB 413b; *HALOT* 2:417a; *TDOT* 6:109–21; *TWOT* 875; *NIDOTTE* 3569

1. The root *ysd* occurs in Hebr., Ug., and Jew. Aram., and with

limited meanings in other Sem. languages (Syr. *sattā* “vine cutting,” < *sadtā*, *LS* 502a; Arab. *wisād* “pillow,” Wehr 1066); the relationship to Akk. *išdu* “foundation” is disputed (KBL 386a; cf., however, *AHw* 393b).

The verb occurs chiefly in the qal and pi. (without distinction? cf. Ezra 3:10 with 3:12; otherwise, *HP* 211f.), as well as in the pu., hi., and ho. A series of substs., e.g., *y<sup>e</sup>sôd* and *môsād* (see 2), has developed from the stem, all with the meaning “foundation, establishment.”

2. The verb (41x: qal 20x, Psa 7x, Isa 5x, pi. 10x, pu. 6x, ho. 3x, ni. 2x) belongs, apart from its architectural usage (esp. in the historiographical books), primarily to creation terminology (Psa, Deutero-Isa, etc.). Of the substs., *y<sup>e</sup>sôd* occurs 19x (Lev 8x), *môsād* 13x, *mûsād* and *mûsādâ* 2x each, *y<sup>e</sup>sûd*, *y<sup>e</sup>sûdâ*, and *massad* 1x each (with Lis., counting 2 Chron 24:27 as qal and Ezek 41:8 Q as a subst., excl. Psa 2:2 and 31:14 *ysd* II ni. “to combine”). Cf. the lists in P. Humbert, “Note sur *yāsad* et ses dérivés,” *FS Baumgartner* 135–42.

3. *ysd* denotes the laying of the foundation (not of an individual foundation stone, which is invisible after the erection of the building; cf. Isa 28:16), the construction of the foundation walls (1 Kgs 5:31; cf. 7:10f.; K. Galling, *Studien zur Geschichte Israels im persischen Zeitalter* [1964], 129ff.). Yet this precise sense can be devalued to “to lay the lowest level” (2 Chron 31:7) or expanded to the more general meaning “to restore, renovate” (cf. 2 Chron 24:27 with 24:4 and 2 Kgs 12:13; A. Gelston, *VT* 16 [1966]: 232–35). In addition to the “foundation” of buildings, e.g., temple (1 Kgs 5:31, etc.) or palace (7:10), *ysd* can refer to cities (Josh 6:26; 1 Kgs 16:34; Isa 54:11) or countries (Exod 9:18; Isa 23:13); indeed, it can become a figure for the dependability of faith (Isa 28:16). Because *ysd* in its basic meaning also includes “to fortify” and “to initiate, begin” (Zech 4:9; cf. Exod 9:18), it may finally assume the sense “to determine, command” (Esth 1:8) or “to install” (1 Chron 9:22; cf. Hab 1:12), or express the notion of durability (Psa 119:152, of Yahweh’s testimonies or commandments; cf. Prov 10:25).

The interpretation of Psa 8:3 “to found might” (or concretely: “fortress, bulwark”?; not “praise”; cf. Matt 21:16) is much disputed.

4. As an architectural expression, *ysd* seems to have been originally at home in artisan’s wisdom (cf. Prov 3:19; Job 38:4) and to have found its way into the creation terminology of cultic speech (cf. also Humbert, op. cit. 137f., 140f.). In this use, the former basic meaning applies when creation is regarded as the work of the “hand” (cf. e.g., Isa 48:13 with Zech 4:9). Yet cosmogonic concepts vary in the details. The dual expression “founding the earth and extending (or the like) heaven” (Isa 48:13; 51:13, 16; Zech 12:1;

cf. Psa 78:69; 102:26) offers no information concerning the origins of the two components of the world or the foundation upon which this establishment took place. In contrast, Psa 24:2 incorporates the sea as the locale (*ysd ʿal* “to found upon”), and Psa 104:5 speaks of “foundations” (*mākôn*) under the earth (cf. Job 38:4ff.). Whether the one concept of the world resting upon columns in the sea underlies all statements is, however, questionable; the OT worldview is hardly unified.

The Gen 1 creation account rests upon other concepts, i.e., the notion of the division of heaven and earth or of water and land should be distinguished from the “foundation of the earth.” Thus Psa 89:10ff. (esp. v 12) mixes divergent concepts, or Isa 48:13 (cf. 51:16) can explain manual activity as creation through the word (*qrʾ* “to call”).

Amos 9:6 (cf. Psa 78:69) also mentions a foundation of the heavenly “arches (?) upon the earth.” Correspondingly, the “foundations” of the earth (Psa 82:5; Mic 6:2, etc.; cf. *KTU* 1.4.I.40, *msdt arš*), of the mountains (Deut 32:22; Psa 18:8), of the dry land (Psa 18:16; cf. 89:12), and of the heavens (2 Sam 22:8) are mentioned.

5. In the Qumran community, *yswd*—perhaps under the influence of Isa 28:16—becomes a designation for the community itself (J. Maier, *Die Texte vom Toten Meer* [1960], 2:93f.; S. H. Siedl, *Qumran: Eine Mönchsgemeinde im Alten Bund* [1963], 54ff.).

In one sense the Gk. equivalent *ktizein* undergoes a comparable development from “to construct, found” to “to create” (see W. Foerster, “κτίζω,” *TDNT* 3:1000–1035).

W. H. Schmidt

## יָסַר *ysr* to chastise

S 3256; BDB 415b; *HALOT* 2:418b; *TDOT* 6:127–34; *TWOT* 877; *NIDOTTE* 3579

1. The root *\*wsr*, whose basic meaning may not be ascertained, occurs outside Hebr. only in Ug. (*wsr* D “to rebuke, scold”; *WUS* no. 870; *UT* nos. 807, 1120).

Jew. Aram. *yissûrāʾ* II (or *ʾisûrāʾ* II) “chastisement” may be influenced by Hebr. (cf. Mid. Hebr. *yissûr*), if a *ysr* II (in addition to *ysr* “to bind”) should not be considered (see Dalman 185a; contrast e.g., Jastrow 582f.); otherwise, “to rebuke, reprove” in Aram. is *ksʾ* II/*ksn*/*kss* (Syr. is comparable). Regarding the questionable Eg. Aram. *ytsr* in Aḥ. 80, see Cowley 234. In addition, cf. *AHw* 79a on Akk. *ašāru* (with reference to Landsberger).

In addition to the verb *ysr*, the Hebr. OT has the important subst. *mûsâr* “chastisement, discipline” (BL 490); *yissôr* “faultfinder” (BL 479) is a hapax legomenon (Job 40:2). The verb, attested esp. in the pi. in addition to the qal and the ni., also exhibits the rare reflexive-pass. nitp. (Ezek 23:48; cf. BL 283) as well as several divergent forms, such as the unique hi. form *ʔaysîrēm* (Hos 7:12 txt?; cf. BL 383).

2. The word family, which occurs a total of 93x in the OT, has its greatest concentration in the 42 occurrences of the verb; the lesser concentration of the 50 occurrences of the noun *mûsâr* evidences a clearer wisdom influence.

*mûsâr* occurs 30x in Prov (60%), predominantly (with 13x each) in the collections chs. 1–9 and 10:1–22:16, otherwise 4x in Job (in addition to *yissôr* Job 40:2), 14x in the Prophets (8x in Jer), and 1x each in Deut 11:2 and Psa 50:17. The verb, which occurs 4x in the qal, 5x in the ni., and 31x in the pi. (on the hi. and nitp., see 1), occurs 3x in Lev 26, 5x in Deut, 6x in 1 Kgs 12:11, 14 = 2 Chron 10:11, 14, 13x in the Prophets (7x in Jer), 9x in Psa, 1x in Job 4:3, and 5x in Prov. The root is totally absent from Gen, Exod, Num, Eccl, etc.

3. The chief meaning of the verb is “to chastise,” that of the subst. *mûsâr* “chastisement”; the reference can be either to corporal (*ysr* pi.: Prov 19:18; 29:17; also Deut 22:18; cf. Prov 19:19 ni.; *mûsâr*, combined with *šebet* “rod”: Prov 13:24; 22:15; 23:13; cf. Jer 2:30; 30:14) or—indeed, more often—verbal “chastisement” in the sense of “instruction” (cf. *HP* 217f.; Jenni categorizes *ysr* among the “verbs of speech”); “rod” and “words” should not be contrasted as means, for both were rearing techniques in the family context (in addition to the texts cited, cf. Deut 21:18) and in the wisdom school (cf. H. Brunner, *Altägyptische Erziehung* [1957], 56ff., 131ff.; also L. Dürr, *Das Erziehungswesen im AT und im antiken Orient* [1932], 114ff.). In the context of oral chastisement, often an expanded usage occurs, sometimes exhibiting a negative character (see e.g., Job 20:3; cf. *yissôr* “faultfinder” Job 40:2), and sometimes a positive character (i.e., in the sense of “warning” or “to warn, instruct”; see the lexicons and G. Bertram, *TDNT* 5:603ff.; on the similar Eg. *šbʔy.t* “instruction,” cf. Gemser, *HAT* 16, 19; H. H. Schmid, *Wesen und Geschichte der Weisheit* [1966], 9ff.), as well as in a fig. sense, primarily of God’s “chastisement/training” (see 4; cf. also, however, Prov 16:22 “chastisement is folly to the fool”).

The (logical) subjects of “chastisement” are, first of all, parents and wisdom teachers (but also others like the king in his government, 1 Kgs 12:11, 14), then in a fig. sense esp. God (cf. Deut 8:5; see 4). The interest seems, however, to lie particularly on the objs., who are always persons, and on whom the edifying “chastisement” and “instruction” is to have effect

(of the various effects, see 4); they could also, then, become grammatical subjs. The noun's shift in meaning is semasiologically significant in this regard: *mûsâr* occasionally means not "chastisement (i.e., the act), but already its effect (i.e., 'discipline')" (von Rad, *Theol.* 1:431n.32; see G. Gerleman, FS Vriezen 112f.), which reflects the resultative character of the pi., most often used in this context (see *HP* 218).

Synonyms of the verb and of the noun, and verbs used with the noun, are instructive with reference to this circumstance. Verbs paralleled with *ysr* are: *lmd* pi. "to teach" (Psa 94:10, 12; cf. Jer 31:18; 32:33), *ykh* hi. "to rebuke" (Jer 2:19; Psa 6:2; Prov 9:7); cf. also *yrh* hi. "to teach" (Isa 28:26), and *šûb* "to turn around" (Jer 5:3; cf. 31:18). *khh* pi. "to rebuke" also occurs as a semantically related verb (1 Sam 3:13). The most important synonym for *mûsâr* in Prov is the subst. *tôkaḥat* (→ *ykh*) "rebuke, warning, reproof" (3:11; 5:12; 10:17; 12:1; 13:18; 15:5, 10, 32; cf. 6:23 txt?); the following also occur in Prov: *g<sup>c</sup>ārâ* "scolding" (13:1), *bînâ* "insight" (1:2; 4:1; and esp. 23:23), *da<sup>c</sup>at* "knowledge" (8:10; 23:12), *ḥokmâ* "wisdom" (1:2, 7), *ḥešâ* "counsel" (19:20), *tôrâ* "instruction" (1:8; cf. 6:23), and *yir<sup>λ</sup>at yhw* "fear of Yahweh" (1:7; cf. Zeph 3:7); cf. also *d<sup>b</sup>āray* "my words" (Psa 50:17; cf. Jer 35:13) and *qôl* "voice" (Jer 7:28; Zeph 3:2), both in reference to Yahweh.

Of verbs associated with *mûsâr*, *šm<sup>c</sup>* "to hear" is esp. noteworthy (Prov 1:8; 4:1; 13:1; 19:27; cf. 5:12f.; 15:32; 23:12; Job 20:3; 36:10; also Jer 7:28; 17:23; 32:33; 35:13; Zeph 3:2; Psa 50:17). Other verbs, particularly in a positive sense, are: → *lqh* "to take, acquire" (Prov 1:3; 8:10; 24:32; in addition to Jer 7:28; 17:23; 32:33; 35:13; Zeph 3:2), *qbl* pi. "to accept" (Prov 19:20), *qnh* "to purchase" (23:23), *ḥb* "to love" (12:1; cf. 13:1 txt em), *ḥzq* hi. "to hold firm" (4:13), *šmr* "to keep" (10:17), *yd<sup>c</sup>* "to know" (1:2); in the negative sense: *bzh* (Prov 1:7), *m<sup>λ</sup>s* (3:11), *n<sup>λ</sup>s* (15:5) "to despise," *pr<sup>c</sup>* "to ignore" (8:33; 13:18; 15:32; cf. 1:25), *sn<sup>λ</sup>* "to hate" (5:12; cf. 12:1; Psa 50:17).

4. In the first instance, parents and teachers, as well as God, are the actual subjs. of *ysr* (see 3); thus the "chastisement/education" is exercised by an authority, which presupposes a definite regulation. It is not selfishly motivated, but aims at a positive effect on the chastised (see 3), unless it intends e.g., punishment in the legal sense (cf. Deut 22:18 and prophetic judgment speech; see below).

In the wisdom arena, the effect is largely edification and discipline of the individual. "Chastisement" removes "folly" in the young man (Prov 22:15; cf., however, 19:27) and "makes wise," so that in terms of its effect *mûsâr* becomes an alternative for "wisdom" and "insight" (Prov 1:2f.; 8:33; 15:32f.; 19:20; 23:23; cf. 12:1; G. von Rad, *Wisdom in Israel* [1972], 53), which should not be seen in strictly intellectual terms but in the framework of a religiously grounded concept of life. The young chastised person still

has “hope” (19:18), he shall “not die” (23:13), for *mûsâr* is a “way of life” (6:23; cf. 10:17 txt em); but the evildoer (*rāšāʿ*) dies “from lack of discipline” (5:23; cf. 15:10, 32). Thus *mûsâr* is a good deed that effects fate, that results in “life,” that brings “honor” (cf. 13:18; 15:33) and “joy” (29:17; cf. Gemser, HAT 16, 27).

More specifically, the religious character of *mûsâr* involves an association with “fear of Yahweh” (*yirʿat yhw̄h*) and with “humility” (*ʿnāwâ*, Prov 15:33; cf. 1:7); as a “way of life” it also connects with the “light” of “commandment and law” (6:23; cf. Gemser, HAT 16, 41; 1:7; Psa 94:12); thus it approximates pious obedience (cf. also Lev 26:18ff.). The theological abstraction of the expression “Yahweh’s chastisement” (*mûsar yhw̄h* Deut 11:2; Prov 3:11) in reference to individuals (Prov 3:11f.) means suffering as “God’s means of education” (cf. Gemser, HAT 16, 28f.; J. A. Sanders, *Suffering as Divine Discipline in the OT and Post-Biblical Judaism* [1955]; Fohrer, KAT 16, 152, on Job 5:17; additionally, Psa 6:2; 38:2; 39:12; 118:18; also Jer 10:24). It often emphasizes God’s love, and, with regard to the people of God, Deut 11:2 refers to his direction of history as “discipline”; the comparison in Deut 8:5 is noteworthy.

This salvation-historical viewpoint is esp. characteristic of the prophetic message, which can still correlate *mûsâr* with Yahweh’s “word” and “voice” (see 3). In the context of the prophetic message of judgment, however, *ysr/mûsâr* consistently means God’s punitive act of judgment against his people, sometimes retrospectively (Jer 2:30; 5:3; 17:23; 30:14; 32:33; 35:13; cf. 31:18, as well as Isa 26:16; Zeph 3:2) and sometimes prospectively (Hos 5:2; 7:12; 10:10; cf. Wolff, *Hos*, Herm, 99; in addition to Jer 2:19); but warnings (Jer 6:8; cf. Ezek 5:15; 23:48) and conditional promises (Jer 30:11; 46:28) also occur. Isa 53:5 assumes a special position: *mûsar šʿlômēnû ʿālāyw* “the punishment/suffering of our salvation on him” is an eschatological expression of vicarious (expiatory) suffering.

The theological profile of the word family *ysr/mûsâr/yissôr* varies with spheres and types of usage; its basic pattern, however, is of the nature of an order theology: it refers primarily to integration in God’s order of life.

5. The word family does not seem to be prominent in Qumran literature. The LXX renders *ysr* primarily by *paideuein*, *mûsâr* primarily by *paideia*. On the shift in meaning and on the Hebr. influence on the NT concept of *paideia*, see G. Bertram, “παίδεῦω,” *TDNT* 5:596–625; H.-J. Kraus, “Paedagogia Dei als theologischer Geschichtsbegriff,” *EvT* 8 (1948/49): 515–27.

## יָעַד *yʿd* to appoint

S 3259; BDB 416b; HALOT 2:419a; TDOT 6:135–44; TWOT 878; NIDOTTE 3585

1. The root \**wʿd*, known in all branches of the Sem. languages, means “to appoint, arrange.” It acquired various nuances in verbal and nom. forms, e.g., Akk. *adannu* “term, time limit” (< \**ʿad-ān-*, *AHw* 10b; *CAD* A/1:97–101, 184f.); Ug. *ʿdt, mʿd* “assembly (of the gods)” (*WUS* no. 1195); Bibl. Aram. (according to BLA 196, the etymology is not entirely clear) *ʿiddān* “time, year” (KBL 1106b; *DISO* 204; *LS* 511a); Syr. *waʿdā* “appointment, time limit” (*LS* 185b, denominative pa. “to invite”); Mid. Hebr. pi. and Jew. Aram. pa. “to designate as wife” (KBL 388a); Arab. *wʿd* “to promise,” *mawʿid* “(place/time of an) appointment” (Wehr 1081); Eth. *mōʿalt* “(a particular) day” (< \**mawʿadt*, *GVG* 1:237).

The relationship of this root to Old Aram. *ʿdn* (pl.) “(provisions of a) contract” is uncertain (*DISO* 203f.; Fitzmyer, *Sef.* 23f.; contrast *KAI* 2:242; cf. Akk. *adû* “oath,” *AHw* 14a; *CAD* A/1:131–34).

The Hebr. verb occurs in the qal “to appoint, arrange,” ni. “to make an appointment, appear,” hi. “to summon (before the court),” and ho. “to be summoned, be under orders.” Subst. forms are *môʿēd* “established place, established time,” *môʿād* “gathering place” (so Procksch, *Jesaja 1–39*, KAT, 206, on Isa 14:31; L. Rost, *Die Vorstufen von Kirche und Synagoge im AT* [1938], 7), *mûʿādâ* “arrangement” (only in Josh 20:9 of the cities of refuge established for the killer; cf. also Rost, op. cit. 7), and *ʿēdâ* “community” (BL 450; on Eg. Aram. *ʿdh* cf. *DISO* 39; A. Verger, *AANLR* 8/19 [1964]: 77f.; id., *Ricerche giuridiche sui papiri aramaici di Elefantina* [1965], 116–18).

The association of → *ʿēt* “time” with *yʿd* (BL 450: < \**ʿid-tu*) is uncertain. G. R. Driver (*WO* 1/5 [1950]: 412) mentions additional root relationships.

*nôʿadyâ* (Ezra 8:33, a Levite; Neh 6:14, a prophetess; *IP* 184: “Yahweh has revealed himself, proclaimed”; cf. J. J. Stamm, FS Baumgartner 312).

2. The verb occurs in the qal 5x (Exod 21:8 txt em? [cf., among others, Rost, op. cit. 33; contra Noth, ATD 5, 136]; Exod 21:9; 2 Sam 20:5; Jer 47:7; Mic 6:9), in the ni. 19x (Ezek 25:22; 29:42f.; 30:6, 36; Num 10:3f.; 14:35; 16:11; 17:19; 27:3; Josh 11:5; 1 Kgs 8:5 = 2 Chron 5:6; Amos 3:3;

Psa 48:5; Job 2:11; Neh 6:2, 10), in the hi. 3x (Jer 49:19 = 50:44; Job 9:19), in the ho. 2x (Jer 24:1; Ezek 21:21), a total of 29x.

*mô'ēd* occurs a total of 223x (25x masc. pl., 1x in 2 Chron 8:13 fem. pl.; Num 65x, Lev 49x, Exod 38x, 2 Chron 8x), 146x in the expression *ʾōhel mô'ēd* (Num 56x, Lev 43x, Exod 34x, 2 Chron 4x, 1 Chron 3x, Deut and Josh 2x, 1 Sam and 1 Kgs 1x); *mô'ād* and *mû'ādâ* occur 1x each (see 1), *ēdâ* 149x (Num 83x, Exod and Josh 15x, Lev 12x, Psa 10x, Judg 5x, 1 Kgs, Jer, and Job 2x, Hos, Prov, and 2 Chron 1x), predominantly in P and in diction dependent on it (cf. the presentation in Rost, op. cit. 76 [add Lev 8:4], 85).

3. (a) The basic meaning of the verb is clearly delimited. It can be defined as “the announcement of a decree or a decision, whose execution is tied to a particular place or a fixed time, so that deviation from these conditions . . . equals noncompliance with the order” (Rost, op. cit. 6). David establishes a time and place for Amasa (2 Sam 20:5); a master selects his slave as a wife for himself (Exod 21:8 txt em) or for his son (v 9); the text of Mic 6:9 is corrupt. Several people make an appointment (ni.), then assemble and meet: kings (Josh 11:5; Psa 48:5), two people on the path (Amos 3:3), Job’s friends (Job 2:11), leader and people (Num 10:3f.), etc. (1 Kgs 8:5 = 2 Chron 5:6; Neh 6:2, 10). The hi. does not seem to have remained totally unaffected by the root *ʿūd* “to testify” (→ *ēd*, Rost, op. cit. 6); it was used exclusively to designate the scheduling and arrangement of a judicial occasion and the act of summoning before the court (Jer 49:19 = 50:44; Job 9:19, in each case with God as obj.). The two ho. passages attest only the ptcp. and could be rendered as qal pass., “to be commanded, ordered” (Jer 24:1 txt? Rudolph, HAT 12, 156; Ezek 21:21).

(b) The subst. *mô'ēd* indicates the place (Josh 8:14), the time of the meeting (1 Sam 9:24; 13:8, 11; 2 Sam 20:5 with *yʿd* [see 3a]; 24:15), or both (1 Sam 20:35). *mô'ēd* usually means “established time, the correspondence of different periods,” etc.: stars (Gen 1:14; Psa 104:19), the time of the exodus from Egypt (Deut 16:6), the moment of an attack (Judg 20:38), and the time of the storks’ migration (Jer 8:7). The expression “next year at this time” occurs in the context of the promises of a son (*lammô'ēd [hazzeh]*) (Gen 17:21; 18:14; 2 Kgs 4:16f.; cf. Gen 21:2; → *hyh* 3c). The place established for every living thing is death (Job 30:23).

(c) *ēdâ* is used once to designate the swarm of bees Samson finds in the carcass of the lion (Judg 14:8); otherwise, the word is used exclusively in the religious sense (see 4c).

(d) Jer 47:7 parallels *yʿd* qal and → *šwh* pi. “to appoint, order”; *yʿd* is more limited in meaning than *šwh* pi. because of the indication of a specific time or place (Rost, op. cit. 6n.2).

The meaning “to appoint, arrange” for semantically related verbs derives from the basic meaning of engraving or of fastening and laying down; thus e.g., for → *ḥqq* (3a; Isa 10:1), *ḥrṣ* (Job 14:5, days), *nqb* (basic meaning “to pierce”; Gen 30:28, wages; Isa 62:2, name), *tʕh* (Num 34:7f., boundaries), → *ysd* (qal Psa 104:8, place) → *kûn* hi. (3c; Exod 23:20, etc., place; Nah 2:4, day), *šîm* (“to place, lay,” Exod 21:13, place; Exod 9:5 *môʕed* “moment”; cf. Job 34:23 txt em), *šît* “to place, lay,” Exod 23:31, boundary). *zmn* (pu. ptcp., Ezra 10:14; Neh 10:35; 13:31), a denominative from *zʕmān* “definite time, hour” (Eccl 3:1; Esth 9:27, 31; Neh 2:6; an Aram. loan word; cf. Wagner nos. 77f.), has only the temporal meaning.\*

4. (a) The verb is rarely used in theological contexts. Yahweh determines time and place for the sword drawn against Ashkelon (Jer 47:7). If Yahweh himself attends a meeting (at the ark or the holy tent), *yʕd* ni. assumes the meaning “to reveal oneself” (Exod 25:22; 29:42f.; 30:6, 36; Num 17:19). People can gather to oppose God as does the “band of Korah” (Num 14:35; 16:11; 27:3).

(b) In religious usage, the subst. *môʕed* “fixed time” indicates festival dates (Lev 23:2, 4; Isa 1:14; Ezek 36:38; Hos 2:13), esp. the feast of Passover/Unleavened Bread (Exod 13:10; 23:15, etc.). The location of the feast can also be indicated (Psa 74:4, 8). The end of time is firmly established in advance (Dan 8:19; 11:27, etc.). The “mount of assembly (*har-môʕed*) in the extreme north” is the mountain on which the gods assemble (Isa 14:13).

*ʕhel môʕed* “tent of meeting” (between God and Moses or between God and the people = “holy tent”) is a mobile sanctuary distinct from the ark (G. von Rad, “The Tent and the Ark,” *PHOE* 103–24; see also Eichrodt 1:109f.) and the location of revelation during the wandering period; cf. Rost, op. cit. 35–38; von Rad, *Theol.* 1:235f.; bibliog. in G. Fohrer, *History of Israelite Religion* [1972], 83n.37.

(c) *ʕdâ* almost exclusively indicates the community defined in religious terms (sometimes with a dependent gen.; <sup>c</sup>*dat* [*b<sup>c</sup>nê*] *yîsrâʕêl*, <sup>c</sup>*dat yhw*, usually without further modification; cf. Rost, op. cit. 76), esp. in P (Rost, op. cit. 32), who replaces the otherwise common → *ʕam* “people” in the exilic period under the influence of the name *ʕhel môʕed* (Rost, op. cit. 39f.). The rebellious “band of Korah” is also included in this term (Num 16:5, etc.), as well as, outside P, the “band of evildoers” (Psa 22:17; cf. also 68:31; 86:14) and the “assembly of the gods” over whom Yahweh rules (Psa 82:1; cf. Kraus, *Psa*, CC, 2:155f., with Ug. pars.).

One can compare → *qāhāl* “assembly” with *ʕdâ* (cf. Rost, op. cit. esp. 87–91).

5. (a) The LXX equivalents have all noticeably expanded the

meanings of the Hebr. terms (Rost, op. cit. 107–38, with tables). *y<sup>c</sup>d* is translated by *synagein*, among others, *‘ēdâ* usually with *synagōgē* (cf. W. Schrage, “συναγωγή,” *TDNT* 7:798–852), *mô‘ēd* usually with *kairos* (cf. G. Delling, “καίρος,” *TDNT* 3:455–64) or *heortē*, *’ōhel mô‘ēd* with *hē skēnē tou martyriou* (*mô‘ēd* thus derived from *‘ūd* “to testify”; see Rost, op. cit. 132).

(b) Judaism consistently substitutes Aram. *zmn* for *y<sup>c</sup>d*, thus placing special emphasis upon the temporal element. Aram. *k<sup>c</sup>nīštā’* is used for *‘ēdâ* (Judg 14:8, the “nest” of the bees; Rost, op. cit. 97–101; Schrage, op. cit. 808f.).

The Qumran community differed. In a conscious reversion to the usage of the Hebr. OT, it preferred the expression *‘ēdâ* for the community of God (Schrage, op. cit. 809f.) and assigned it various attributes: “community of Israel” (1QSa 1:1, 20; 2:12, etc.), “holy community” (1QSa 1:12; 2:16), “community of the men of perfect holiness” (CD 20:2), “community of the godly” (1QM 1:10), “community of God” (1QM 4:9), etc. But the “community of Belial” (1QH 2:22) and the “community of evil” (1QM 15:9) could be so designated. *mô‘ēd* primarily signifies “time” (numerous occurrences, e.g., 1QS 1:9 “times of testimonies”; usually in the pl., but also in the sg.; “time of his visitation” 1QS 3:18), also “festival time, feast” (likewise numerous occurrences, e.g., 1QpHab 11:6; usually in the masc. pl., in CD 6:18 and 12:4 in the fem. pl.). Here too, then, as with the verb in Jewish usage, the original significance of the establishment of a specific location has faded (cf. F. Nötscher, *Zur theologischen Terminologie der Qumran-Texte* [1956], 169; J. Carmignac, *VT* 5 [1955]: 354). The assembly itself (1QM 2:7; 1QSa 2:2 with *y<sup>c</sup>d*, etc.) and the “house of assembly” (*bēt mô‘ēd* 1QM 3:4) could also be described with *mô‘ēd*. By contrast, the verb *y<sup>c</sup>d* expresses the designation of a day for battle (1QM 1:10), as well as the establishment of an assembly at a specific place (1QSa 2:2 with *mô‘ēd*, 2:22, the ten men who assemble in a legitimate cultic unit, etc.).

(c) The NT chooses *ekklēsia* to designate the early Christian community (cf. K. L. Schmidt, “καλέω,” *TDNT* 3:487–536, esp. 501–36 concerning *ekklēsia*, whose meaning is explained in terms of the Aram. *k<sup>c</sup>nīštā’*) and seems thereby to seek to continue the OT concept of the → *qāhāl* (Rost, op. cit. 151–56). According to W. Schrage, *ZTK* 60 (1963): 178–202, the choice of *ekklēsia* reflects a desire for discontinuity with the Jewish synagogue, which was centered around the law and which one therefore wished to abandon.

## יֵעִל *yʿl* hi. **to be of use**

S 3276; BDB 418b; *HALOT* 2:420b; *TDOT* 6:144–47; *TWOT* 882; *NIDOTTE* 3603

1. The Hebr. verb *yʿl*, whose etymological derivation is uncertain, occurs only in the hi.

Those who associate the word with the Arab. verb *waʿala* “to seek protection on a knoll” (thus e.g., GB 307a; König 154b; KBL 389a; Zorell 318; but not BDB 418b) usually consider *yāʿēl* “ram” (1 Sam 24:3; Psa 104:18; Job 39:1) and *yaʿlâ* “ewe” (Prov 5:19) as derivatives (thus GB, König, and Zorell, but not KBL). But *yaʿlâ* is common Sem. (P. Fronzaroli, *AANLR* 8/23 [1968]: 283, 294; Ug. *yʿl WUS* no. 1197; *UT* no. 1124; Arab. *waʿl, waʿil*, is *waʿala* a denominative?) and should probably be separated from the verb *yʿl*, with BDB and KBL.

A few also understand *bʿlîyaʿal* “uselessness, harmful” ( $\rightarrow ršʿ$ ) as a derivative of *yʿl*, presuming a noun *\*yaʿal* “use” or the like. The etymological explanation of *bʿlîyaʿal* is still controversial, however (cf. V. Maag, “Bʿlîjaʿal im AT,” *TZ* 21 [1965]: 287–99; *HAL* 128 with bibliog.); yet the OT usage of *bʿlîyaʿal* (27x, 17x in Deut–1 Kgs) seems to correspond at least functionally to the thoroughly negative usage of *yʿl* hi. (see 3).

2. *yʿl* hi. is attested 16x in prophetic texts (Isa 30:5[bis], 6; 44:9f.; 47:12; 48:17; 57:12; Jer 2:8, 11; 7:8; 12:13; 16:19; 23:32[bis]; Hab 2:18), 6x in wisdom texts (Job 15:3; 21:15; 30:13; 35:3; Prov 10:2; 11:4), and once in the Dtr history (1 Sam 12:21), for a total of 23x.

3. The usage of the word, whose chief meaning is “to help, be of use,” may be classified in two major groups: (a) prophetic, incl. the unique Dtr passage, and (b) wisdom (Job and Prov).

Common to both groups are the predominantly negative usages expressed primarily through particles of negation (usually *lōʿ* + impf.; Isa 30:5b + inf.; Isa 44:9 *bal* + impf.; Isa 44:10 and Jer 7:8 *lʿbiltî* + inf.; Jer 16:19 *ʿēn* + ptcp.), but also in indirect ways sometimes mockingly ironic (Isa 47:12 with *ʿūlay* “perhaps”), sometimes through critical questions expecting a negative response (Hab 2:18; Job 21:15; 35:3); Job 30:13 also has a negative connotation. The only full-fledged exception is Isa 48:17.

(a) Isa 48:17 assumes a unique place semantically in prophetic usage because Yahweh here declares to Israel positively that he “teaches what helps (him).” Otherwise the verb refers to that which does not “benefit” or “help,” esp. in reference to idols (1 Sam 12:21; Jer 2:8, 11, a nearly

substantivized usage; then Jer 1Jer 6:19; Isa 44:9; cf. also 57:12), to images (Hab 2:18), or to Babylon's curses and sorceries (Isa 47:12). An early occurrence, characteristic of Isaiah, designates Egypt as "a people who cannot benefit (Israel)" (Isa 30:5f.); reference to the false prophets and their lies is similarly characteristic of Jeremiah (Jer 23:32; 7:8; cf. 2:8).

Parallels in the negative usage are in 1 Sam 12:21 "cannot save" (→ *nšl* hi.), in Isa 30:5 "no help" (*ʿēzer*, → *ʿzt*) and "shame (*bōšet*) and also derision (*ḥerpâ*)," in Isa 44:9 "naught" (*tōhû*; cf. also Isa 47:12; Jer 12:13), while in Jer 2:11 *kābôd* "glory" (a unique usage in reference to Yahweh) functions as an antonym. A positive parallel is "to lead in the way (*drk* hi.)," in Isa 48:17.

(b) In one of the older collections of proverbs, the negative usage of the verb refers to "treasures gained through injustice" (Prov 10:2) and "riches" that "are of no use in the day of wrath" (11:4); in both cases the opposite is "but righteousness saves (*nšl* hi.) from death." Job has a negated *skn* qal "to bring benefit" twice as a synonym (Job 15:3; 35:3; it also occurs in Job 22:2[bis]; 34:9); this usage concerns the "usefulness" of Job's wise words (15:2f.) or, even more basically, of his "righteousness before God" (35:2f.); elsewhere, the negated verb refers to his opponents (21:15; 30:13), who are identical with the "godless" (*ršāʿîm*; cf. 21:7ff.).

4. Both in wisdom and esp. in prophetic usage, then, the verb is thoroughly theological. Here the verb does not refer to a neutral, profane, or even eudaemonistic "usefulness" (cf. further W. Zimmerli, "Concerning the Structure of OT Wisdom," *Studies in Ancient Israelite Wisdom* [1976], 204n.27). Rather, in a wisdom contrast between righteousness and foolish behavior, between a rich life and death, *yʿl* refers to individuals' options, and in prophetic judgment and struggle against foreign allies, it refers to false prophets and idolatry of various types, to the well-being of Israel, God's people. Only Yahweh can positively instruct in deed and word concerning what "is helpful" and "of benefit" for Israel's well-being and proper worship.

5. *yʿl* hi. occurs 1x in the available literature from Qumran (1QH 6:20). The LXX translates the verb with few exceptions by *ōphelein* and derivatives. The theological usage continues in the NT (cf. e.g., the questions and negated statements in 1 Cor 15:32 with *ophelos* "benefit"; in Matt 16:26; John 6:63; 1 Cor 13:3; 14:6; Gal 5:2, etc., with *ōphelein* "to be of benefit").

M. Sæbø

## יָצַח *yʿṣ* to advise

S 3289; BDB 419b; HALOT 2:421b; TDOT 6:156–85; TWOT 887; NIDOTTE 3619

1. In WSem. the root underlying Hebr. *yʿṣ* “to advise” occurs in Pun. (*yʿṣ* “advisor” RES 906.1; DISO 110), Aram. (Imp. Aram.: pe. ptcp. *yʿṣ* “advisor” Ah. 12; *ṣṣh* “counsel” Ah. 28, etc.; Bibl. Aram.: *yʿṣ* pe. ptcp. “advisor” Ezra 7:14f.; itpa. “to confer” Dan 6:8; *ṣṣā* “counsel” Dan 2:14; Jew. Aram.: *yʿṣ* and *yʿṣ*, KBL 1082b), and Arab. (*wʿṣ* “to warn,” Wehr 1082); cf. Eth. *mʿd* (Dillmann 210).

The semantic range of *yʿṣ* coincides with Akk. *malāku* “to advise, confer” (AHw 593f.), represented by *mlk* II ni. “to deliberate” in Neh 5:7 (cf. Wagner no. 170; contra L. Kopf, VT 9 [1959]: 261f.); cf. also Bibl. Aram. *melak* “counsel” (Dan 4:24; → *melek* 1).

Besides *yʿṣ* qal “to advise, decide,” OT forms of the root include the ni. (tolerative “to be advised,” reciprocal “to confer”), the hitp. “to confer,” and the verbal nouns *ṣṣā* “counsel, decision, plan,” and *mōṣṣā*. *ṣṣ* occurs twice as a by-form of *yʿṣ* (Judg 19:30; Isa 8:10).

On the suggestion of G. R. Driver (ET 57 [1946]: 192f.), KBL 726f. derives *ṣṣā* in Psa 13:3 and 106:43 from *ṣṣh* II and translates “disobedience, rebellion, reluctance” (see further G. R. Driver, JSS 13 [1968]: 45).

2. In the Hebr. OT the qal occurs 57x (excl. the two forms of *ṣṣ*, see 1; Isa 15x, 2 Sam 7x), the ni. 22x (2 Chron 9x, 1 Kgs 5x), the hitp. 1x (Psa 83:4), the verb a total of 80x; *ṣṣā* 88x (incl. Psa 13:3; 106:43; Isa 18x, Psa 11x, 2 Sam and Prov 10x, Job 9x, Jer 8x), and *mōṣṣā* 7x, the subst. a total of 95x. The root occurs (175 passages) most frequently in Isa (35x); then follow Psa and 2 Chron 19x each, 2 Sam and Prov 17x each, Jer 13x, 1 Kgs and Job 12x each, Ezra 6x, 1 Chron 5x, Mic 4x, Ezek 3x, 2 Kgs, Hos, and Neh 2x each, Exod, Num, Deut, Judg, Nah, Hab, and Zech 1x each.

3. (a) The qal in the basic meaning “to advise” exhibits various constructions: *yʿṣ* introducing direct address (2 Sam 17:11), *yʿṣ* I<sup>e</sup> “to advise someone” (Job 26:3), with an acc. of person “to advise someone, confer with someone” (Exod 18:19; 2 Sam 17:15; Jer 38:15), *yʿṣ* *ṣṣā* “to give advice” (internal acc. or figura etymologica; cf. GKC §117p; 2 Sam 6:23; 17:7), with *ṣṣā* and an acc. “to advise someone, give advice” (1 Kgs 1:12; 12:8, 13), with a double acc. “to advise someone, something” (Num 24:14).

In view of an upcoming conference, the translation “to announce, disclose information” is possible for a few texts (Num 24:14; perhaps also Jer 38:15; cf. in addition *ngd* hi.).

The meaning “to advise” also results in “to decide, plan,” which, according to context, may have either a positive (rare, see Isa 32:8) or a negative connotation, e.g., *yʿṣrāʿal* “to plan evil, decide against” (Isa 7:5; cf. also Isa 32:7; Nah 1:11; Hab 2:10; Psa 62:5, etc.); *yʿṣr ʿēṣāʿal* “to reach a decision against, plan against” (Jer 49:30); *yʿṣr ʿaṣat-rāʿ* “to plan evil” (Ezek 11:2).

Options for the ni. result from the meaning of the qal: tolerative, “to receive advice” (Prov 13:10, textual emendation is unnecessary; cf. *BHS*); reciprocal, “to confer with one another” (with *yaḥdāw* “together” Isa 45:21; Psa 71:10; 83:6; Neh 6:7), “to confer/counsel with someone” (with *ʿim*, 1 Chron 13:1; 2 Chron 32:3; with *ʿet*, 1 Kgs 12:6, 8; with *ʿel*, 2 Kgs 6:8; 2 Chron 20:21), and on the basis of a consultation “to be advised, decide” (1 Kgs 12:28; 2 Chron 25:17; 30:2, 23), “to recommend” (1 Kgs 12:6, 9 = 2 Chron 10:6, 9).

(b) The qal ptcp. *yôʿēṣ* (Aram. *yāʿēṭ*) is used in various ways as a technical term for “counselor, advisor.” As a confidant of the king, the advisor belongs to his inner circle (2 Sam 15:12; cf. 16:20, 23; 1 Chron 27:32f.; 2 Chron 25:16; Isa 1:26; 3:3) and may have been recruited from wisdom circles (cf. Isa 19:9; see Wildberger, *Isa 1–12*, CC, 70f., 130; Prov 11:14; 24:5f.; see also Aḥ. 12,[27,]28, 42, etc.; Cowley 212ff.). Distinctions between counselor and other court officials waver, however (cf. H. Reventlow, *BHH* 3:1551; de Vaux 1:121). The title should be understood as a proper, official title only in later texts (Ezra 4:5; 7:14, 28; 8:25; cf. Esth 1:14).

(c) In analogy to the meaning of *yʿṣr*, *ʿēṣā* means the “advice” that one gives (2 Sam 15:31, 34; 16:23; 17:14; 1 Kgs 12:14; cf. *yʿṣr ʿēṣā*, see 3a; *yhb ʿēṣā* “to give counsel” Judg 20:7; 2 Sam 16:20; *bôʾ* hi. *ʿēṣā* “to bring counsel” Isa 16:3), or the advice that one receives, to which one hearkens (*šmʿ* Prov 12:15; 19:20), which is executed (*šh* ni. 2 Sam 17:23), which one does not follow (*zb*, 1 Kgs 12:8, 13 = 2 Chron 10:8, 13). *ʾiṣ ʿēṣā* (Isa 40:13) should be understood on this basis as “advisor.” Prov 1:25, 30 (par. *tôkaḥat*, → *ykh*) and 19:20 (par. *mûsār*, → *ysr*) may be interpreted in a somewhat specialized sense as “warning.”

In a second usage, *ʿēṣā* indicates the result of counsel: “decision, resolution” (Ezra 10:8), “plan” (Psa 14:6; 20:5; cf. also 1 Chron 12:20 *bʿēṣā* lit. “by plan” = “intentionally”), e.g., in political contexts (Isa 29:15; 30:1 *šh ʿēṣā* “to execute a plan” [M. Dahood’s suggestion (*Bib* 50 [1969]: 57f.) that *ʿēṣ* should be understood as “wood” in the sense of idol, with an archaic

acc. ending *-â*, is unnecessary]; Ezra 4:5; Neh 4:9), and can occasionally even be rendered “plot” (Isa 8:10 *‘ûš ‘ēšâ*, Jer 18:23 “murder plot”).

Furthermore, in some texts *‘ēšâ* “counsel” should be understood as “wisdom, capacity to find the right means” (GB 610b; Isa 19:3; Jer 19:7; 49:7; Prov 21:30).

Psa 13:3 and perhaps also Prov 27:9 suggest a special meaning “concern” (cf. the par. term *yāgôn* in Psa 13:3; the text hardly requires emendation; cf. Kraus, *Psa*, CC, 1:212; cf., however, 1).

The simple meaning “cultic worship” is displayed in Isa 29:13 (Duhm, *Jesaia*, HKAT [19224], 186; Fohrer, *Jesaja*, ZBK, 2:77), and Jonah 1:9 exhibits the limited technical meaning “cultic, religious membership.”

Following R. Bergmeier (*ZAW* 79 [1967]: 229–32), one may also identify already in the post-exilic period the meaning “community,” developed from the meaning “counsel assembly” as in Isa 19:11; Psa 1:1 (par. *môšāb*; contra e.g., GB 610b; Kraus, *Psa*, CC, 1:116, who suggest “maxims, principles of life”); Job 10:3; 21:16; 22:18. *‘ēšâ* occurs at Qumran frequently in this meaning as a designation for the Qumran community (as an organizational entity; 1QS 5:7; 6:3; 7:2, 24 etc.; cf. J. Maier, *Die Texte vom Toten Meer* [1960], 2:204, 206, see index under “Gemeinschaft der Einung” und “Gemeinschaft”; see also J. Worrell, “*‘šh*: ‘Counsel’ or ‘Council’ at Qumran?” *VT* 20 [1970]: 65–74).

(d) Except for Job 29:21, which should probably be emended (cf. *BHS*), *mô‘ēšâ* occurs in the pl. only in the meanings “advice” (Job 29:21; Prov 22:20) and “plan” (consistently with a negative connotation: Jer 7:24; Psa 81:13 par. “stubbornness”; Psa 5:11 suggests the translation “insidious schemes,” as noted by Kraus, *Psa*, CC, 1:157).

(e) The roots  $\rightarrow hkm$ ,  $\rightarrow bîn$ ,  $\rightarrow škl$  and their derivatives, which often occur in the word field of *y‘š/‘ēšâ* (cf. e.g., Deut 32:28f.; Isa 19:11; Jer 49:7; Psa 32:8; Job 12:13; 26:3; Prov 8:14; 12:15; 13:10; 21:30; Dan 2:13f.; Aḥ. 12, etc.), demonstrate that the root *y‘š* belongs to the wisdom realm. Jer 18:18 “instruction will never depart from the priest, nor counsel from the wise, nor the word from the prophet” illustrates the close relationship of *‘ēšâ* and *ḥākām*.

Ezek 7:26 is related to Jer 18:18, although here the elders (*z<sup>c</sup>qēnîm*) are mentioned instead of the *ḥākām*. One may ask with J. Fichtner (“Isaiah among the Wise,” *Studies in Ancient Israelite Wisdom* [1976], 432): “Have the ‘wise,’ who were so influential and diplomatically important in the preexilic period, played out and left the field to the elders?”

Terms used in proximity to *y‘š* (2 Kgs 18:20 = Isa 36:5 *‘ēšâ ūg<sup>e</sup>bûrâ* “a powerful decision” [with *HAL* 165b] as opposed to *d<sup>e</sup>bar š<sup>e</sup>pātayim* “mere

words” (cf. Isa 11:2; Job 12:13); Isa 29:15 *ma<sup>a</sup>šeh* “deed”; Prov 8:14 *tûšîyâ* “success”) and the larger context in which the root occurs indicate that *y<sup>ç</sup>s* “includes . . . both the decision and its carrying out” (Kaiser, *Isa 1–12*, OTL [1972], 129n.b; cf. *ILC 1–2:129*: “Counsel and action are identical”; on this sense and on the term in general, see P. A. H. de Boer, “The Counsellor,” *SVT 3* [1955]: 42–71).

4. (a) Isaiah employs the wisdom root *y<sup>ç</sup>s* in the theological sphere for the first time (cf. J. Fichtner, “Jahves Plan in der Botschaft des Jesaja,” *ZAW 63* [1951]: 16–33 = *Gottes Weisheit* [1965], 27–43). On the one hand, he addresses human *y<sup>ç</sup>s* apart from God, which is frustrated (Isa 7:7 *lô<sup>ç</sup>tâqûm* “it shall not come to pass”; 8:10 *pr<sup>r</sup>* ho. “will be shattered”; cf. Psa 33:10 *pr<sup>r</sup>* hi. “to shatter”); on the other hand, he stands in the wisdom tradition (cf. Isa 28:23–29) and speaks of Yahweh’s *y<sup>ç</sup>s* or *‘ešâ* (Isa 5:19 par. *ma<sup>a</sup>šeh* “deed”; 14:24–27; 28:29), although the realm of human experience is transcended (Isa 28:29 “his counsel is wondrous,” → *pl<sup>ç</sup>*; cf. also Isa 25:1). Wildberger (*Isa 1–12*, CC, 202f.) shows how the word adapted from the wisdom sphere becomes a term of divine judgment. It refers to “Yahweh’s complete control of history, even up to the point of bringing his judgment upon the people” (op. cit. 207).

Isaiah also exhibits affinities with wisdom tradition when he describes the messianic king in 11:2 as equipped with *rûah ‘ešâ* “the spirit of counsel” as Yahweh’s gift (cf. the other terms in addition to *‘ešâ*; see Prov 8:14f.). Isa 9:5 mentions *pele<sup>ç</sup>yô‘eš* as one of the throne names of the Messiah (cf. Mic 4:9, where the earthly king is called *yô‘eš* “counselor” or, even better, “one who carries out plans”; cf. also Psa 20:5), which may be translated (with H. Wildberger, “Die Thronnamen des Messias, Jes. 9:5b,” *TZ 16* [1960]: 316) as “who plans wonders” (so too Kaiser, *Isa 1–12*, OTL [1983], 204; on the other suggested translations cf. Wildberger, op. cit. 316).

In this context one should certainly view *‘ešâ* in the theological sense mentioned above but now further developed by Isaiah; moreover, one must remember that → *pl<sup>ç</sup>* “in Isaiah is strictly classed with the divine acts which far transcend human acts” (Wildberger, op. cit. 316). On religiohistorical origins in Eg. royal titles, see Wildberger, op. cit. 319ff.

At the same time, human *‘ešâ* is characterized theologically as autonomous (political) planning (Isa 29:15; 30:1 “who execute a plan that does not come from me”).

(b) Following Isaiah, *y<sup>ç</sup>s/‘ešâ* occurs both (1) in reference to God’s counsel: Job 12:3 (in the hymn to the wisdom and might of God, vv 12–25; cf. Prov 8:14 in a statement concerning wisdom); Psa 16:7; 32:8; 119:24,

“your decrees . . . are my counselor”; and (2) in reference to his plan and his decision: appropriated as a designation for Yahweh’s fateful decision in Psa 33:11; 106:13 (here as God’s saving plan and action); Isa 44:26; 46:10f.; Jer 49:20 (cf. 50:45); Isa 23:8f. (as judgmental activity), as well as the “will and activity of God in the creation of the world” (Job 38:2; Fohrer, KAT 16, 500).

5. The LXX renders the root chiefly with *(sym)bouleucin, boulē*. Qumran and the NT adopt the OT usage, in accordance with which the NT *boulē* means the divine decision for the most part (cf. G. Schrenk, “βουλή,” TDNT 1:633–37).

H.-P. Stähli

יָפֶה *yāpeh* pretty → טוֹב *tôb*

יָפַע *yp<sup>c</sup>* hi. **to radiate**

S 3313; BDB 422a; HALOT 2:424b; TDOT 6:220–25; TWOT 892; NIDOTTE 3649

1. Hebr. *yp<sup>c</sup>* hi. (root \**wp<sup>c</sup>*) “to radiate, glitter, shine brilliantly,” etc. (also Mid. and Targumic Hebr. “to appear”; in Ezek 28:7–17 also the subst. *yip<sup>c</sup>â* “brilliance”; cf. Zimmerli, *Ezek*, Herm, 2:75, 86) has counterparts in Akk. *(w)apû* G “to be visible,” Š “to make visible” (GAG §§103b, 106o; CAD A/2:201–4), but the root \**yp<sup>c</sup>* (Arab. “to climb, grow up,” Old Sarab. “to stand upright”), to which Ug. *yp<sup>c</sup>* may also belong (*WUS* no. 1215: *KTU* 1.2.1.33, “to be lofty[?]”; *UT* no. 1133 “arise[?]”; cf., however, F. L. Moriarty, *CBQ* 14 [1952]: 62; on PNs see Gröndahl 144f.) should probably be distinguished (Huffmon 212f.).

2. *yp<sup>c</sup>* hi. occurs 8x (Deut 33:2; Psa 50:2; 80:2; 94:1; Job 3:4; 10:3, 22; 37:15), *yip<sup>c</sup>â* 2x (Ezek 28:7, 17).

3. The verb *yp<sup>c</sup>* hi. has the inner-causative (inwardly trans.) meaning “to become brilliantly visible” (the normal causative meaning “to let shine” would also be possible for Job 37:15; see e.g., ZB: “as he causes the light of his clouds to flash”; cf. NRSV). Three passages in Job (lament and hymn) offer the light as subj.: Job 3:4 “may no ray of light shine on it (*n<sup>c</sup>hārâ*)”; 10:22 txt em, to be interpreted according to Fohrer, KAT 16, 201, as a paradoxical hyperbole; “(where) it (only) shines as darkness” (cf.

Horst, BK 16/1, 139: “where in the day, (darkness) shines dimly”; 37:15 “as God directs it that the light (*ʿôr*) of his clouds become brilliantly visible” (so Fohrer, op. cit. 483). A fourth passage, Job 10:3, has God as subj.; according to Horst (op. cit. 138, 154f.: “when you . . . become clearly visible to the counsel of the evildoer”), the usage of the cultic term (see 4) underscores the paradox of God’s activity in Job’s accusation.

4. In the other passages in cultic poetry, *yp<sup>ç</sup> hi.* is a typical expression in descriptions of theophany, alongside other verbs such as → *bô<sup>ç</sup>* “to come,” → *ys<sup>ç</sup>* “to go out,” *yrd* “to descend” (→ *ʿh*), and → *qûm* “to arise” (F. Schnutenhaus, “Das Kommen und Erscheinen Gottes im AT,” ZAW 76 [1964]: 1–21, esp. 8f.; J. Jeremias, *Theophanie* [1965], esp. 8–10, 62–64, 77f.). It already occurs in a hymnic text, Deut 33:2, “Yahweh came (*bô<sup>ç</sup>*) from Sinai and shined on them (*zrh*) from Seir; he shined (*yp<sup>ç</sup> hi.*) from the mountains of Paran and approached (*ʿth*) from Meribat-Kadesh”; then in Psa 50:2, “From Zion, the crown of beauty, God shined forth.” Moreover, the introduction of the communal lament requests such an appearance of God against the enemies: Psa 80:2f., “You who are enthroned on cherubim, shine before Ephraim”; 94:1 txt em, “God of vengeance, appear!” Thus together with the semantically related verbs *zrh* “to arise, shine” (Deut 33:2; cf. Isa 60:1f.) and *ngh* (with a consonantal *h* as the 3d radical) *hi.* “to let shine” (2 Sam 22:29 = Psa 18:29; *nōgah* “brilliance” 2 Sam 22:13 = Psa 18:13; Hab 3:4, 11; cf. Isa 60:3; 62:1), it introduces the motif of the appearance of the deity in (frightful) brilliance, widely attested in the surrounding cultures (cf. Sum. *me-l-m*, Akk. *melammu*), into the theophany tradition based upon indigenous, specifically Israelite roots. In the parlance of ancient Near Eastern mythology, God’s theophany in radiant light as praised in hymns or requested in laments refers to Yahweh’s intervention in the history of his people.

Just as the Sum.-Bab. concept of dreadful brilliance pertained not only to deities but also to monarchs (*AHW* 643; Seux 257, 291), Ezek 28:7, 17 discuss the “brilliance” (*yip<sup>ç</sup>â*) of the prince of Tyre, who presumes to be a god (vv 2, 6, 9).

5. At Qumran *yp<sup>ç</sup> hi.* in the meaning “to illuminate,” etc., occurs quite often (Kuhn, *Konk.* 91); in 1QpHab 11:7 the verb refers to the “godless priests” who persecuted the “teacher of righteousness” (cf. K. Elliger, *Studien zum Habakuk-Kommentar vom Toten Meer* [1953], 214f.; A. S. van der Woude, *Die messianischen Vorstellungen der Gemeinde von Qumran* [1957], 162–64).

The LXX translates each passage uniquely, in Psa 80:2 with *emphainein* (Psa 50:2 *emphanōs*). In the NT, OT usage may be perceptible

in Luke 1:79 (*epiphainein*). Cf. R. Bultmann and D. Lührmann, “φαίνω,” *TDNT* 9:1–10.

E. Jenni

## שׁוּׁ *yšׁ* to go out

S 3318; BDB 422a; *HALOT* 2:425a; *TDOT* 6:225–50; *TWOT* 893; *NIDOTTE* 3655

1. The root is common Sem. (Berg., *Intro.* 218; Akk. [*w*]ašû, *CAD* A/2:356–85; Ug.: *WUS* no. 1222; *UT* no. 1138; NWSem. inscriptions: *DISO* 110, 164; Aram.: *KBL* 1082b; *LS* 304f.) in the meaning “to go out,” but replaced in Aram. by *npq* and in Arab. by *ḥrj*.

Following Arab. *waḍuʿa* “to shine,” a few authors (particularly M. Dahood, *PNSP* 52; id., *Bib* 46 [1965]: 321; 47 [1966]: 416) hypothesize the meaning “to shine” for *yšׁ* also in the OT (e.g., in Prov 25:4).

The verb *yšׁ* (like its antonym *bôׁ*) occurs in the qal, hi., and ho. Nom. derivatives are: the substantivized fem. ptc. *yôšēׁt* “miscarriage” (Psa 144:14; cf. Exod 21:22), the noms. *yāšîׁ* “descendant” (2 Chron 32:21 Q) and *šeׁšāׁîm* “shoot, offspring” (cf. Gen 15:4; 17:6; 25:25f. etc., *yšׁ* “to come out” in the sense of “to be born,” and 1 Kgs 5:13; Isa 11:1 “to come out” = “to shoot up, to grow”; Syr. *yׁ* “to grow”), and the multivalent abstract forms *môšāׁ* “exit,” etc. (see 3a), *môšāׁʾā* “origin” (Mic 5:1) or “toilet” (2 Kgs 10:27 Q), and *tôšāׁʾôt* “exits,” etc. (see 3a). Bibl. Aram. knows only the šap<sup>c</sup>el form *šēšîׁ* (Ezra 6:15) as an Akkadian loan word in the meaning “to finish” (*KBL* 1082b, 1129f.) and uses *npq* qal for “to go out” (6x; ha. “to bring out,” 5x).

The relationship of *šōׁn* (< \*šāׁn) “livestock” to *yšׁ* is uncertain (cf. e.g., *KBL* 790a); the PN *môšāׁ* is also unclear (1 Chron 2:46, etc.; *KBL* 505a refers to Psa 19:7).

2. The verb is represented most frequently in the qal (excl. Psa 144:14) and the hi. (incl. 2 Sam 18:22) in the narrative literature:

	qal	hi.	ho.	total
Gen 61	17	1	79	
Exod 62	32	–	94	

Lev	22	16	–	38	
Num	56	14	–	70	
Deut	34	32	–	66	
Josh	44	9	–	53	
Judg	46	8	–	54	
1 Sam	45	1	–	46	46
2 Sam	39	9	–	48	48
1 Kgs	32	10	–	42	
2 Kgs	42	10	–	52	
Isa	31	10	–	41	
Jer	51	18	1	70	
Ezek	43	28	3	74	
Hos	1	1	–	2	
Joel	2	–	–	2	
Amos	3	1	–	4	
Obad	–	–	–	–	
Jonah	1	–	–	–	1
Mic	7	1	–	8	
Nah	1	–	–	1	
Hab	5	–	–	5	
Zeph	–	–	–	–	
Hag	1	1	–	2	
Zech	20	2	–	22	
Mal	1	–	–	1	
Psa	17	17	–	34	
Job	22	6	–	28	
Prov	6	5	–	11	
Ruth	3	1	–	4	
Song Sol	4	–	–	–	4
Eccl	4	1	–	5	
Lam	3	–	–	3	
Esth	9	–	–	9	
Dan	6	1	–	7	
Ezra	–	5	–	5	
Neh	7	3	–	10	
1 Chron	19	5	–	24	24
2 Chron	35	14	–	49	49
OT	785	278	5	1,068	

Noms. occur as follows: *yôṣēʾt* 1x, *yāšîʾ* 1x, *šeʾṣāʾîm* 11x (Isa 7x, Job 4x), *môṣāʾ* 27x (Psa 6x, Ezek 4x), *môṣāʾâ* 2x, and *tôṣāʾôt* 23x (Josh 14x, Num 5x).

3. (a) The manifold usages of *yš*ʔ qal are never far removed from the chief meaning “to go out” (for the details of the usages see the lexicons). Because Hebr. does not indicate the standpoint of the speaker in general, verbs of motion such as → *ʾlh* “to go up” and *yrd* “to go down,” or → *bô*ʔ, the counterpart of *yš*ʔ, as e.g., Ger. does by an additional oppositional pair of morphemes (“hence” from the speaker’s viewpoint, “hither” in the speaker’s direction) or as Akk. does through specialized ventive endings (GAG §82), but at most by different verbs (*hlk* “to go,” *bô*ʔ “to come”), it is inappropriate to distinguish lexically between usages of *yš*ʔ as “to go out” or “to come out” (as in KBL 393). A better classification would be achieved through an investigation of personal and impersonal subjs. (cf. GB 310f.; Zorell 321f.).

The various nuances of the verb correspond largely to the specialized meanings that the abstracts *môšā*ʔ (*môšā*ʔâ) and *tôšā*ʔôt can assume: for per. subjs. one may compare the usual “to go out” of a house, a city, etc. (usually with *min* “out,” but occasionally also with the acc. of place, Gen 44:4; Exod 9:29, 33; Num 35:26; Job 31:34; on Gen 34:24 see E. A. Speiser, *BASOR* 144 [1956]: 20–23; G. Evans, *ibid.* 28–33) with *môšā*ʔ “exit” (Ezek 42:11; 43:11; 44:5; cf. *tôšā*ʔôt Ezek 48:30), “to set out, emigrate” from a place, a country, etc. (Gen 10:11; 11:31; 12:4f.; 15:14, etc.); with *môšā*ʔ “departure” (Ezek 12:4) and “point of departure” (Num 33:2[bis]), “to undertake something” (Judg 2:15; 2 Kgs 18:7, etc.; “to appear” 1 Sam 17:4; Zech 5:5, etc.; cf. L. Köhler, *TZ* 3 [1947]: 471; G. Ch. Aalders, *TZ* 4 [1948]: 234; often “to go out to war” Gen 14:8; Num 1:3, 20ff.; Deut 20:1; 23:10; 1 Sam 8:20; 18:30; 2 Sam 18:2–4, 6; Amos 5:3, etc.); with *môšā*ʔ “purpose, departure” (2 Sam 3:25 alongside *mābô*ʔ, cf. the usage “to go in and out” to describe the entire action, at first in the military sphere [Josh 14:11; 1 Sam 18:13, 16; 29:6], but then also cultically [Exod 28:35; Lev 16:17] and very generally [→ *bô*ʔ 3; cf. P. Boccaccio, *Bib* 33 [1952]: 173–90]), “to come away unwounded” (Judg 16:20; 1 Sam 14:41; 2 Kgs 13:5; Ezek 15:7; Eccl 7:18; cf. “to become free,” Exod 21:2–11; Lev 25:28ff.; 27:21; Isa 49:9); with *tôšā*ʔôt “escape” (Psa 68:21 from death), and “to originate from” (see 1, “to be born”); with *môšā*ʔâ “origin” (Mic 5:1).

The same distinction is true of usages with imper. subjs.; the meaning “to rise” (sun: Gen 19:23; Judg 5:31; Isa 13:10; Psa 19:6; stars: Neh 4:15) is comparable with *môšā*ʔ “rise” (Psa 19:7; 75:7 “east”; cf. Hos 6:3; Psa 65:9), “to be led out” (1 Kgs 10:29 qal and hi. “to lead out”; cf. Noth, BK 9, 234) and *môšā*ʔ “export” (1 Kgs 10:28), “to stream forth” of water, etc. (Gen 2:10; Exod 17:6, etc.) with *môšā*ʔ “well” (2 Kgs 2:21; Isa 41:18; 58:11; Psa 107:33, 35; 2 Chron 32:30), “to grow” (see 1) with Job 38:27 “ground where the grass grows” (txt?; cf. also Job 28:1, silver “mine”), “to tower up” (the

arms of the lampstand: Exod 25:32f., 35; 37:18f., 21; a spear: 2 Sam 2:23); with *tôšāʾôt* “foothills” (of a mountain, 1 Chron 5:16), “to extend” (border: Num 34:4, 9; Josh 15:3f., 9, 11, etc.); with *tôšāʾôt* “extension, extremity” (of the border: Num 34:4f., 8f., 12; Josh 15:4, 7, 11, etc.), “to be pronounced” (words, etc.: Num 30:3; 32:24; Josh 6:10, etc.); with *môšāʾ* “statement” (Num 30:13; Deut 8:3; 23:24; Jer 17:16; Psa 89:35; Dan 9:25), “to come into being” (fire: Exod 22:5; Lev 9:24; 10:2, etc.; cf. also S. Esh, VT 4 [1954]: 305–7; folly: 1 Sam 24:14; “to come about” Gen 24:50; Isa 28:29; cf. Eccl 10:5); with *tôšāʾôt* “point of departure, origin” (Prov 4:23 of life; cf. Josh 17:18, “what results,” Noth, HAT 7, 102); cf. further “to cease, be finished” (Prov 22:10; Dan 10:20) and *šēʾt haššānâ* “end of the year” (Exod 23:16; cf. E. Kutsch, ZAW 83 [1971]: 15–21) and “to vanish” (wine: 1 Sam 25:37; vitality: Gen 35:18; Psa 146:4; Song Sol 5:6; courage: Gen 42:28); with *šēʾtēk* “your departure (= end)” (Ezek 26:18).

(b) The hi. of the verb represents most of the usages of the qal in the corresponding causative meaning (“to lead out, bring out, cause to come out,” etc.). Relatively rare are the causative meanings that correspond to “to come out” in the sense of “to grow” or “to be born,” e.g., “to bring forth (plants, etc.)” (earth, ground: Gen 1:12, 24; Isa 61:11; Hag 1:11; branch: Num 17:23) or “to bring forth (progeny)” (Isa 65:9, from Jacob). On the usage that is more markedly theological than the qal, see 4b.

4. (a) *yšʾ* qal with Yahweh as subj. (16x) accents not so much departure from a specific place in order to abandon it (most likely Mic 7:15 “as at the time you departed from Egypt”; cf. otherwise Ezek 10:18, where Yahweh’s glory departs from the temple), but, as is often the case in colloquial speech, departure to undertake something, e.g., to fight against the enemies. In this meaning the verb is a typical element of descriptions of theophany and their derivatives (Judg 5:4; Isa 26:21; 42:13; Mic 1:3; Hab 3:13; Zech 14:3; Psa 68:8; cf. also Judg 4:14; 2 Sam 5:24 = 1 Chron 14:15 in reports concerning Yahweh wars; in the context of the exodus tradition, the verb occurs not only in Mic 7:15 but also in Exod 11:4 and Psa 81:6; cf. F. Schnutenhaus, “Das Kommen und Erscheinen Gottes im AT,” ZAW 76 [1964]: 2–5; J. Jeremias, *Theophanie* [1965], 7, 10f. etc.; → *bôʾ* 4). Points of departure are Seir (Judg 5:4), “his place” (Mic 1:3 and Isa 26:21; probably the heavenly abode); yet the context does not emphasize the point of departure but the goal: battle against and judgment upon the enemies or assistance for his people. Correspondingly, the communal lament declares: “You do not go out with our armies” (Psa 44:10; 60:12 = 108:12).

*yšʾ* also occurs in the same meaning when the “messenger of Yahweh” (→ *malʾāk*) starts out on a mission (Num 22:32; 2 Kgs 19:35 = Isa 37:36; cf. also Dan 9:22 of Gabriel). The case is somewhat different when Yahweh’s

activity is described as the origin (“to come from”) of a circumstance from Yahweh (a providential dispensation, Gen 24:50; Isa 28:29) or as the origin (“to be sent out”) of an abstract theological entity from Yahweh (Yahweh’s wrath, Num 17:11; Jer 4:4; 21:12, etc.; Yahweh’s hand, Ruth 1:13; “my word that proceeds from my mouth” Isa 55:11; “my salvation” Isa 51:5; righteousness, Isa 45:23; cf. 62:1; instruction, Isa 51:4; from Zion, Isa 2:3 = Mic 4:2).

(b) Almost half of all passages with *yšׁ* hi. express a divine activity. P. Humbert (“Dieu fait sortir,” *TZ* 18 [1962]: 357–61 [supplemented in *ibid.* 433–36]) offers a good summary of the verb’s spheres of application in theological usage.

The verb does not refer to the creative activity of God in the sense of an initial bringing into being (Humbert, *op. cit.* 359), but only to a current activity in nature (Psa 104:14 “bread from the earth”; Jer 10:13 = 51:16 and Psa 135:7 “wind from his chambers”; water from the rock, Deut 8:15; Psa 78:16; Neh 9:15; stars, Isa 40:26; cf. Job 38:32). *yšׁ* hi. designates not only a change in locale (Gen 15:5, etc.; also being carried away in the spirit: Ezek 37:1; cf. 42:1, 15; 46:21; 47:2) but also means esp. “to lead out” = “to liberate, deliver” and thus becomes an important verb of deliverance and redemption (cf. J. J. Stamm, *Erlösen und Vergeben im AT* [1940], 18, 97, 103; C. Barth, *Die Errettung vom Tode in den individuellen Klage- und Dankliedern des AT* [1947], 126f.; → *gׁl*, → *yšׁ*, → *nsl*, → *pdh*, → *pl̄t*). A series of texts in the psalms of lament and thanksgiving that petition or praise God for deliverance from all sorts of distress and danger should also be mentioned (2 Sam 22:49, deliverance from enemies [the par. passage Psa 18:49 uses *pl̄t* pi.]; guidance into an open place: 2 Sam 22:20 = Psa 18:20; Psa 66:12; out of the net, out of affliction: Psa 25:15, 17; 31:5; 107:28; 143:11; from imprisonment, etc.: Psa 68:7; 107:14; 142:8; cf. Mic 7:9, to the light), as well as the majority of passages that speak of the deliverance from Egypt (76x; tables in Humbert, *op. cit.* 358; and J. Wijngaards, *VT* 15 [1965]: 92) or, influenced thereby, from dispersion among the nations (Ezek 20:34, 38, 41; 34:13).

The formula “Yahweh, who led Israel out of Egypt” refers to Yahweh’s fundamental saving act for his people and constitutes “Israel’s primary confession” (M. Noth, *History of Pentateuchal Traditions* [1972], 47–51; von Rad, *Theol.* 1:175–77). It occurs already in a number of variants in the old narratives (Exod 13:3, 9, 14, 16; 18:1; 20:2; 32:11f.; Num 20:16; 23:22; 24:8; Josh 24:5f.), then primarily in Deut (Deut 5:6, 15; 6:12, 21, 23; 7:8, 19; 8:14; 9:26, 28[bis], 29; 13:6, 11; 16:1; 26:8; 29:24), in the Dtr history (Deut 1:27; 4:20, 37; Judg 2:12; 6:8; 1 Kgs 8:16, 21, 51, 53; 9:9), and in P (Exod 6:6f.; 7:4f.; 12:17, 42, 51; 14:11; 16:6, 32; 29:46; Num 15:41; in H: Lev 19:36; 22:33; 23:43; 25:38, 42, 55; 26:13, 45); it appears in the

Prophets only since Jeremiah (Jer 7:22; 11:4; 31:32; 32:21; 34:13; Ezek 20:6, 9f., 14, 22); finally, late passages are Psa 105:37, 43; 136:11; Dan 9:15; 2 Chron 6:5 (= 1 Kgs 8:16); 7:22 (= 1 Kgs 9:9); *yšʾ* hi. occurs with Moses and Aaron as subjs. in Exod 3:10–12; 6:13, 26f.; Deut 9:12; 1 Sam 12:8 (Wijngaards, op. cit. 91n.3).

Some investigations of the formula emphasize the concept of liberation that resonates in the exodus (cf. the addition “out of the house of bondage,” Exod 13:3, 14; 20:2; Deut 5:6; 6:12; 7:8; 8:14; 13:6, 11; Judg 6:8; Jer 34:13; also Exod 6:6f.; Lev 26:13) and are particularly concerned with the function and history of the formula, esp. with its relationship to the exodus formula with *ʾlh* hi. “to lead out” (about 40x), which occurs already in the older prophets and beginning with Deut was largely replaced by the exodus formula (→ *ʾlh*; see P. Humbert, *TZ* 18 [1962]: 357–61, 433–36; H. Lubsczyk, *Der Auszug Israels aus Ägypten* [1963]; J. Wijngaards, *VT* 15 [1965]: 91–102; W. Richter, *FS Schmaus* 175–212; B. S. Childs, *FS Baumgartner* 30–39; H. J. Boecker, *Die Beurteilung der Anfänge des Königtums in den deuteronomistischen Abschnitten des 1. Samuelbuches* [1969], 39–43).

*yšʾ* qal “to depart” is used less frequently in reference to Israel’s exodus from Egypt, mostly in the sense of a citation of a salvation-historical datum (cf. e.g., Exod 12:41; 13:3f., 8; 16:1; 19:1; 23:15; 34:18; Num 1:1; 9:1; 33:38; Deut 9:7; 16:3, 6; 1 Kgs 6:1; 8:9 = 2 Chron 5:10; Jer 7:25; Hag 2:5; Psa 114:1); Deutero-Isaiah refers frequently to the new exodus (Isa 48:20; 52:11[bis], 12; 55:12).

5. *yšʾ* occurs frequently in the Qumran literature as a technical military term among other uses (1QM 1:13; 2:8; 3:1, 7, etc.); *yšʾ* also occurs in the self-description of the religious group as those “who have emigrated from the land of Judah” (CD 4:3; 6:5; cf. 20:22; cf. the Islamic “Kharijites” = “Separatists,” from Arab. *ḫrj* “to move out”).

Heb 11:8 esteems Abraham’s migration as an act of faith. The chief equivalents of *yšʾ* qal and the noms. are *exerchomai* (see J. Schneider, *TDNT* 2:678–80), *ekporeuomai* (see F. Hauck and S. Schulz, *TDNT* 6:578f.), and *exodos* (see W. Michaelis, *TDNT* 5:103–9); of *yšʾ* hi., *exagō*.

E. Jenni

## יָצָא *yšr* to form

S 3335; BDB 427b; *HALOT* 2:428b; *TDOT* 6:257–65; *TWOT* 898; *NIDOTTE* 3670

1. The stem *yšr* occurs primarily in Can. and Akk.: the Ug. (*WUS* no. 1229; *UT* no. 1142) and Phoen. (*DISO* 110) subst. *yšr* “potter” (cf. also the PNs in Gröndahl 146; Huffmon 89, 214); Akk. *ešēru* “to draw, form, determine” and derivatives (*AHW* 252f., here and KBL 396a with reference to Arab. *wišr* “arrangement”).

In addition to the verb (qal. ni., pu., and ho. [or qal pass.]), the OT knows the subst. *yēšer* “form, notion” (in the Mid. Hebr. meaning “impulse” also in Jew. Aram. and Syr. *yašrā*; cf. Th. Nöldeke, *ZDMG* 40 [1886]: 722), *yēšūrîm* “members (of the body)” (only in Job 17:7), and the PNs *yēšer/yišrî* (Gen 46:24; Num 26:49; 1 Chron 7:13; 25:11 txt?; *IP* 172, 247).

2. The root is well represented in the pre-exilic era in the Yahwistic creation account (Gen 2:7f., 19; also Amos 7:1, etc.). It frequently occurs later in Deutero-Isa (20x), but is absent from Deut (and largely from Dtr), P, and wisdom literature (Prov, Eccl, Job). The verb occurs 60x in the qal (incl. Isa 49:8 and Jer 1:5; cf. BL 379; Lis. derives from *nšr*), Isa has 26x, Jer 13x, Psa 7x, very often in the ptcp. (substantivized “potter,” 17x), and only 1x each in the ni. (Isa 43:10), pu. (Psa 139:16), and ho. (Isa 54:17). *yēšer* occurs 9x, *yēšūrîm* 1x. Cf. P. Humbert, “Emploi et portée bibliques du verbe *yāšar* et de ses dérivés substantifs,” *FS Eissfeldt* (1958), 82–88.

3. *yšr* indicates (a) the work of the potter; Jer 18:2ff. (cf. Wis 15:7) describes his activity (at the pottery foot wheel). The fact that handiwork involves clay influences fig. language (Isa 64:7; Lam 4:2; Psa 95:5, etc.). As already in Ug. and Phoen., the ptcp. *yôšēr* serves as a professional designation (1 Chron 4:23, etc.), and in various combinations “potter’s vessel” (= earthenware) has become a fixed expression (2 Sam 17:28; Isa 30:14; Jer 19:1, 11; Psa 2:9; cf. Lam 4:2).

Yet *yšr* also refers (b) to the “formation or casting” of a figure (of metal with the “hammer,” Isa 44:12; cf. 44:9f.; Hab 2:18 in a similar idol polemic from a later period) or to the production of weapons (Isa 54:17). Correspondingly, the ptcp. once means “caster, smelter” (Zech 11:13; see C. C. Torrey, *JBL* 55 [1936]: 247–60; Eissfeldt, *KS* [1963], 2:107–9). This activity could be described with the same verb as the work of the potter because both professions bring pliable (moist or fluid) material to a fixed form.

Whereas the concrete, basic meaning increasingly lost prominence, *yšr* acquired the general sense “to form, create” and thus achieved numerous uses (see 4). Because the verb was already capable of encompassing both act and thought (cf. Jer 18:11 par. → *ḥšb*), the subst. *yēšer* was the preferred designation for “the constructions (= notions, aspirations) of the heart” (Gen 6:5; 8:21; cf. 1 Chron 28:9; 29:18; Deut

31:21; similarly Isa 26:3 “firm, unshakable mind”).

Humbert (op. cit. 85) catalogs verbal pars. of *yšr*.

4. On the one hand, *yšr* is an important term (a) in the theology of creation, as well as (b) of history, and, on the other hand, (c) it describes metaphorically the relationship between God and human.

(a) The usage of *yšr* to represent the creation of the mountains (Amos 4:13), the earth or the dry land (Isa 45:18; Jer 33:2; Psa 95:5), but not of the sea, continues to reflect the basic meaning of “forming.” In addition, *yšr* (in distinction from  $\rightarrow br^{\text{c}}$  in P) need not indicate that the final form has been reached; rather, a second act of stabilization can be required (Jer 33:2; Isa 45:18). But the concept of “formation” becomes so broad that *yšr* can also express the creation of the universe (Jer 10:16 = 51:19). In the same way the contrast “summer and winter” (Psa 74:17) encompasses the whole. The formula in Isa 45:7, unusually abrupt for the OT, “I form the light and create the darkness,” by which Yahweh declares himself the creator of salvation and misfortune in history, need not be viewed as directed against Pers. dualism (cf. the similar question of Zarathustra to Ahura Mazda: “which master created light and darkness?” Yasna 44:5).

Psa 104:26 demythologizes the sea dragon Leviathan into a creature, even into Yahweh’s toy. Amos 7:1 and Gen 2:19 also speak of a creation (*yšr*) of the animals. In accordance with an anthropological notion dispersed through the ancient Near East and beyond, Gen 2:7f. states that God also “formed” humankind from the earth. Yet only humanity (not the animals) received the “breath of life,” which alone makes the person a “living soul,” i.e., an individual, and which establishes the person’s unique position between God and world as a combination of earthly and divine. Furthermore, Gen 2:7 inconsistently follows the received image: for the material of the potter is not “dust” (*‘āpār*). This addition is meant to prefigure the curse (3:19b); the person will once against become “dust” (cf. 18:27 J; Psa 103:14, etc.).

Similarly, Zech 12:1 refers to life itself, the “spirit” formed by God within the person. Because God forms the heart (Psa 33:15), he knows people’s hidden thoughts and aspirations (cf. also Psa 94:9 of the eye). Finally, God’s mercy can be motivated by the confession that the person is only a “product,” i.e., a creature (Psa 103:14).

(b) Esp. in prophecy *yšr* also describes God’s historical activity and can therefore refer to the future (Jer 18:11 of misfortune; cf. Psa 94:20). His historical activity is thus described as a creative act. He forms “from the womb” individuals, prophets (Jer 1:5), and the servant of Yahweh (Isa 49:5;

cf. 49:8), as well as Israel (frequently in the preaching of Deutero-Isa, who conceives of election and redemption as a unity: 44:2, 24; cf. 43:1, 7, 21, etc.; also 27:11). Election or selection for a mission occurs, accordingly, without one's involvement. Similarly, "formation" has priority over events of which God had foreknowledge and which he brought about (2 Kgs 19:25 = Isa 37:26; Isa 22:11; 46:11). Psa 139:16 seems to apply this confession to the life span of the individual: God's omniscience encompasses not only the hidden (vv 13ff.) but also the future.

(c) In comparison, the activity of the potter or his work becomes an image for relationship to God. This usage maintains the difference between divine and human behavior more consistently than do statements concerning creation that conceive of divine activity in analogy to human "forming." Corresponding to the potter's superiority over his material, the image represents (1) God's might and freedom in his involvement with the nations (Jer 18, esp. v 6; cf. Isa 41:25, of Cyrus; also Sir 33[36]:13ff.). The fragility of the clay vessel—in contrast to moist clay, which can be newly formed after an unsuccessful attempt (Jer 18:4)—becomes (2) a symbol for frailty, emptiness (Lam 4:2; cf. Jer 22:28), or powerlessness (Psa 2:9; cf. Job 4:19; 10:9; 33:6). In a more general usage, the image indicates the difference between creator and creature in order to preclude any claim or prerogative on the part of the creature (Isa 29:16; 45:9, 11; cf. 64:7).

5. Paul takes up the OT image in a similar sense in order to present the impossibility of human contradiction of or resistance to God, who has the freedom to exercise mercy as well as to harden (Rom 9:19ff.; cf. H. Braun, "πλάσσω," *TDNT* 6:254–62).

On *yqr* in the intertestamental literature and at Qumran, see R. E. Murphy, *Bib* 39 (1958): 334–44.

W. H. Schmidt

יָקָר *yqr* **to be heavy, costly** → כָּבֵד *kbd*

יָרָא *yrʾ* **to fear**

S 3372; BDB 431a; *HALOT* 2:432b; *TDOT* 6:290–315; *TWOT* 907; *NIDOTTE* 3707

I. 1. The root *yrʾ* "to fear" occurs in Hebr. and Ug. (*KTU* 1.6.VI.30,

*yru bn il mt* “El’s son Mot is afraid”; 1.5.II.6, *yraun aliyn bʿl* “the mighty Baal frightened him”; *WUS* no. 1234; as a Can. gloss perhaps in EA 155:33).

Various Arab. roots adduced as evidence of an original meaning (cf. GB 315a; J. Becker, *Gottesfurcht im AT* [1965], 1f.) “may hardly be in any way semantically related any longer” (Becker, *op. cit.* 2).

M. Dahood (*PNSP* 23f.; *id.*, *Bib* 46 [1965]: 321f.) postulates a root *yrʿ* II “to be fat” for Prov 22:4.

With reference to content, the Hebr. *yrʿ* corresponds to the Akk. *palāḫū*, Aram. *dḥl* (KBL 1064a; *Bibl. Aram. pe.* Dan 5:19; 6:27; pa. “to frighten” Dan 4:2; *dḥl* “frightful” Dan 2:31; 7:7, 19; cf. Hebr. *zḥl* “to have fear” Job 32:6; *HAL* 257a).

2. In addition to qal “to fear, be afraid (of),” the root *yrʿ* occurs in the pi. “to make afraid, frighten,” the ni. “to be frightened” (with the ptc. *nôrāʿ* “frightened, frightful,” which was no longer perceived as a ptc. but as an adj.; see III/2), the verbal adj. *yārēʿ* (often in the combination *yʿrēʿ yḥwh/ʿlōhîm*, pl. *yirʿê yḥwh*), the substantivized fem. inf. *yirʿâ* “fright” (cf. GKC §45d; Joüon §49d; the normal inf. form *yʿrōʿ* is attested only in Josh 22:25; 1 Sam 18:29), and the noun *môrāʿ* “fright, horror” formed on the *maqṭal* pattern.

A few consider the place-name *yirʿôn* (Josh 19:38) and the PN *tîrʿyāʿ* (1 Chron 4:16) to be proper names derived from *yrʿ* (so GB 315b; Becker, *op. cit.* 4; contra *IP* 163).

II. The following statistical summary exhibits a concentration of occurrences of *yrʿ* qal in Deut and Psa, of ni. (*nôrāʿ*) and *yārēʿ* in Psa, and of *yirʿâ* in Prov:

	qal	ni. + <i>nôrāʿ</i>	pi.	<i>yārēʿ</i>	<i>yirʿâ</i>	<i>môrāʿ</i>	total

III. Of the two extensive investigations of the root *yr* (S. Plath, *Furcht Gottes: Der Begriff jr im AT* [1963]; Becker, op. cit.), the former treats not only the fear of God (see IV/1–6) but also fear of people or things (see below III/1 *yr* qal, III/2 *nôrā*, III/3 *môrā*).

1. (a) *yr* qal yields the relatively uniform translation “to be afraid, fear someone/something, be afraid of someone/something, be afraid to do something” with some syntactic variation. Its original meaning, now obscure in the OT, seems to some to have been “to shiver, shake” (see Becker, op. cit. 1).

Passages with *yr* caused by things or people exhibit the following syntactical structures:

(1) an abs. usage wherein the obj. of fear or the cause of fear is often to be taken from the context (cf. esp. Gen 31:31; 32:8; 43:18; Exod 2:14; 14:10; Deut 13:12; 17:13; 19:20; 20:3; Josh 10:2; 1 Sam 17:11, 24; 28:5; 2 Kgs 10:4; Jer 26:21; Amos 3:8; Neh 2:2; 6:13; 2 Chron 20:3);

(2) constructions with the acc. (relatively rare; cf. Gen 32:12; Lev 19:3; Num 14:9[bis]; 21:34; Deut 3:2, 22; Judg 6:27; 1 Sam 14:26; 15:24; 1

Kgs 1:51; Ezek 3:9; 11:8; Dan 1:10);

(3) constructions with the preps. *min* (cf. Deut 1:29; 2:4; 7:18; 20:1; Josh 10:8) and *mippēn* (cf. Deut 5:5; 7:19; Josh 9:24; 11:6; 1 Sam 7:7; 21:13; 1 Kgs 1:50; 2 Kgs 25:26; Jer 41:18; 42:11[bis]);

(4) in a few passages *yr* occurs with *le* + inf. (cf. Gen 19:30; Num 12:8; Judg 7:10; 2 Sam 1:14; 10:19; 12:18).

(b) The following are the primary realms in which *yr* is used as a (psychic) reaction to threats:

(1) fear of animals and things: Amos 3:8; Jer 42:16; Ezek 11:8; Job 5:22; Prov 31:21; Eccl 12:5;

(2) fear of death: Gen 26:7; 32:12; Deut 13:12; 17:13; 19:20; 1 Kgs 1:50f.; Jer 26:21; Jonah 1:5; Dan 1:10; Neh 6:13;

(3) according to Plath (op. cit. 19), Exod 2:14 and 2 Sam 12:18 may refer more to “uncontrollable feelings of anxiety,” incl. fear of death as the final consequence;

(4) fear of enemies (in combat): Exod 14:10; Deut 2:4; Josh 10:2; 1 Sam 7:7; 17:11, 24; 28:5; 2 Sam 10:19; 2 Kgs 10:4 (amplified by *m<sup>e</sup>ōd m<sup>e</sup>ōd*).

Passages with the formula *ʾal-tîrā* “do not be afraid” in the so-called pre-battle address, which will be treated under IV/2, may also be mentioned here. Deut 20:8 and Judg 7:3 sound a tone of cowardice or at least lack of courage in *yārē* (cf. G. von Rad, *Holy War in Ancient Israel* [1991], 121).

(5) In a few passages *yr* expresses anxiety in the face of the unknown, even the sinister, e.g., Gen 18:15; 19:30; 42:35 (esp. if, with M. Noth, *History of Pentateuchal Traditions* [1972], 36, v 28b is to be placed after v 35); Psa 91:5 (cf. Kraus, *Psa*, CC, 2:223).

(c) A few passages exhibit an ethical transformation. In Job 32:6 *yr* expresses the honor of youth before age (cf. in addition *zhl* [see I/1], customarily “glide away, creep,” KBL 254a). The translation “to shy away” suggests itself here. The formulation in the commandment to love mother and father in Lev 19:3 signifies “to maintain a reverent humility” or somewhat weakened “to hold in esteem” (on the background of the commandment, see Noth, *Lev*, OTL, 140; cf. also Exod 20:12 *kbd pi*. “to honor”).

(d) Finally, Prov 14:16 exhibits a thoroughly banal meaning, where *yr* is best rendered “to be careful” (so Becker, op. cit. 235f.; Plath, op. cit. 64; similarly also Ringgren, ATD 16, 62).

\*(e) Becker (op. cit. 6–18) enumerates a large number of terms denoting fright, more or less closely related in meaning, some used par. to *yr*. Only the closest synonyms are mentioned here:

(1) *gûr* qal “to be afraid” (10x; *māgôr*, *m<sup>e</sup>gôrâ* “dread,” 8 and 3x, resp.);  
(2) *ḥrd* qal “to shake” (23x; hi. “to startle” 16x; *ḥārēd* “anxious” 6x;  
*ḥ<sup>a</sup>rādâ* “shaking, anxiety” 9x);

(3) *ḥtt* qal/ni. “to be terrified” (17x and 30x, resp.; pi. “to terrify,” etc., Job 7:14; *ḥat* “terror-filled” 2x; subst. in the meaning “terror”: *ḥat* 2x; *ḥittâ* Gen 35:5; *ḥathattîm* Eccl 12:5; *ḥ<sup>a</sup>tat* Job 6:21; *ḥittîṭ*, 8x, only in Ezek; *m<sup>e</sup>ḥittâ*, 11x);

(4) *ygr* qal “to be afraid” (5x; *yāgôr* “fearful” 2x);

(5) *ʿrṣ* qal “to scare/be afraid” (11x; ni. ptcp. “frightening” Psa 89:8; hi. “to fear” 2x; *ma<sup>a</sup>rîṣ* “fright” Isa 8:13; *ma<sup>a</sup>rāṣâ* “terror” Isa 10:33);

(6) → *pḥd* qal “to be afraid, shake” (22x; pi. “to shake” 2x; hi. “to make shake” Job 4:14; *paḥad* “shaking, terror” 49x; *paḥdâ* “terror” Jer 2:19 txt?);

(7) a newly recognized cognate of Ug. *tt<sup>c</sup>* (*UT* no. 2763) and Phoen. *št<sup>c</sup>* (*DISO* 322) in Isa 41:10, 23 is *št<sup>c</sup>* qal “to be afraid” (cf. Meyer 2:123).

2. The ni. ptcp. *nôrâ<sup>ʔ</sup>*, in use as an independent adj., belongs in the realm of numinous fear and means “frightful, frightening.” Only in Isa 18:2, 7 and Hab 1:7, where it refers to a people, may the translation “feared” be recommended (cf. KBL 400a). *nôrâ<sup>ʔ</sup>* characterizes the wilderness (Isa 21:1; Deut 1:19; 8:15), the ice (Ezek 1:22), the martial deeds of the kings (Psa 45:5), although it could already have the hackneyed meaning “astonishing, wonderful, majestic” in the last case (cf. Becker, op. cit. 47; Plath, op. cit. 23; LXX *thaumastōs*).

3. The subst. *môrâ<sup>ʔ</sup>* (with *BHS*, Psa 9:21 should be read -<sup>ʔ</sup> instead of -*h*) signifies “fear, terror,” “that which causes terror” and is exclusively a term for numinous fear. It characterizes the animals’ fear of people (Gen 9:2 par. *ḥat*) and the fear of Israel (Deut 11:25 par. *paḥad*).

IV. The vast majority of *yr<sup>ʔ</sup>* passages (about 4/5) exhibit a theological usage. The following characteristic usages will be treated: IV/1 the numinous character of *yr<sup>ʔ</sup>*, 1V/2 the formula *ʔal-tîrâ<sup>ʔ</sup>* “do not fear!”; IV/3 *yr<sup>ʔ</sup>* in the Dtn-Dtr literature; IV/4 *yir<sup>ʔ</sup>ê yhw<sup>h</sup>* “Yahweh fearers” in the Psa; IV/5 *yr<sup>ʔ</sup>* as “cultic reverence”; IV/6 *yr<sup>ʔ</sup>* in wisdom texts; IV/7 the legal concept of the fear of God.

1. In various passages the original numinous character of the “fear (of God)” is still clear: (a) for the adj. *nôrâ<sup>ʔ</sup>*, (b) for the subst. *môrâ<sup>ʔ</sup>*, and (c) for the verb *yr<sup>ʔ</sup>*.

(a) *nôrâ<sup>ʔ</sup>* “frightful” is used over 30x as an attribute of Yahweh (Exod 15:11; Deut 7:21; 10:17; Zeph 2:11; Psa 47:3; 68:36; 76:8, 13; 89:8; 96:4 = 1 Chron 16:25; Job 37:22; Dan 9:4; Neh 1:5; 4:8; 9:32), of his name (Deut 28:58; Mal 1:14; Psa 99:3; 111:9), of his deeds (Exod 34:10; Deut 10:21; 2 Sam 7:23 = 1 Chron 17:21; Isa 64:2; Psa 65:6; 66:3; 106:22; 145:6), and of

his eschatological day of judgment (Joel 2:11; 3:4; Mal 3:23); the term hardly occurs in pre-exilic texts (it would admittedly be improper to infer from this a relatively late semantic development). *nôṛāʾ* parallels other terms expressing God's numinous character: *qādôš* (→ *qdš*) "holy" (Psa 99:3; 111:9; Exod 15:11), *gādôl* (→ *gdł*) "great" (Deut 7:21; 10:17, 21; 2 Sam 7:23 = 1 Chron 17:21; Psa 96:4 = 1 Chron 16:25; Psa 99:3; 106:21f.; 145:6; Dan 9:4; Neh 1:5; 4:8; 9:32), *na<sup>c</sup>ārš* "frightful" (Psa 89:8; see III/1e).

As an attribute of Yahweh, *nôṛāʾ* belongs to the typical vocabulary of the Zion and Yahweh-is-king psalms (see Psa 47:3; 76:8, 13; 96:4; 99:3; also 68:36; 89:8). "This justifies seeing *nôṛāʾ* as a cultic term" (Becker, op. cit. 48, with reference to J. Hempel, *Gott und Mensch im AT* [1926], 30; from here *nôṛāʾ* has entered the Dtn framework; cf. Deut 7:21; 10:17, 21; 28:58). It occurs in the fixed formula *hāʾēl haggādôl w<sup>e</sup>hannôṛāʾ* "great and frightful God" in Dan 9:4; Neh 1:5; 4:8; 9:32; this statement refers to the gracious God.

*nôṛāʾ* as a characterization of the "frightful" deeds of God usually refers to occurrences that benefit Israel, whether alluding to the exodus from Egypt (Deut 10:21; Psa 66:3, cf. v 6; 106:22; 2 Sam 7:23 = 1 Chron 17:21) or to Yahweh's mighty acts in history and creation in general (Psa 145:6; 65:6).

A curtailment of the numinous content may occur in the adv. use of *nôṛāʾôt* (cf. GKC §118p) in the meaning "wonderfully, majestically" in Psa 139:14 (cf. Kraus, *Psa*, CC, 2:510; Becker, op. cit. 34n.91). According to Judg 13:6 the appearance of God's messenger, as well as the sites of God's revelation (Gen 28:17), are *nôṛāʾ* "terrible, sinister" (so Plath, op. cit. 111n.330).

(b) *môṛāʾ* in quasi-confessional Dtn formulations that refer to the exodus from Egypt describes the "frightening acts" of God (Deut 4:34; 26:8; 34:12; cf. Jer 32:21; von Rad, *Deut*, OTL, 47, 156, 209: "terror[s]," "great and terrible deeds"). Becker (op. cit. 31n.73) would like to see a distinction between the pl. *môṛāʾîm* in Deut 4:34 and the sg. in the other passages, in that he relates the former to the deeds per se and the latter to the terror that accompanied Yahweh's deed.

If *môṛāʾ* is retained in Psa 76:12 (cf., however, *BHS*), then Yahweh himself is called "terror."

(c) The verb *yrʾ* "to fear" is sometimes used abs. (e.g., Gen 28:17; 1 Sam 4:7; Isa 41:5; Psa 40:4; 52:8); in most cases it is constructed with an acc. obj. (Exod 14:31; Lev 19:30; 26:2; 1 Sam 12:18; 2 Sam 6:9; Isa 25:3; 59:19; Psa 67:8), in various passages with the preps. *min* or *mipp<sup>e</sup>n* (cf. Exod 34:30; Deut 28:10; Mic 7:17; Psa 33:8; 65:9, etc.).

The markedly numinous character of *yr*<sup>2</sup>, which can often be rendered “to quiver,” appears (1) in contexts of the experience of God’s theophanic presence (Exod 20:18 [txt em], 20; Deut 5:5; cf. Psa 76:9), of dream and visionary experiences (Gen 28:17; cf. Dan 10:12, 19), and of fear before God’s lethal appearance (Exod 3:6); (2) in the context of Yahweh’s deeds as historical activity and demonstration of power (Isa 25:3; 41:5; Jer 10:7; Hab 3:2; Zech 9:5; Psa 65:9; 76:9; Job 6:21, horror before the one smitten by God), and esp. of the exodus from Egypt (Exod 14:31; Mic 7:17; cf. 1 Sam 4:7ff.), of intervention on behalf of the individual and punishment upon the evildoer (Psa 40:4; 52:8; 64:10), and of the acts of creation (Jer 5:22, 24; Psa 33:8; 65:9; cf. 1 Sam 12:18); (3) in relation to the sanctuary (Lev 19:30; 26:2; 2 Sam 6:9 = 1 Chron 13:12), to people who stand in a special relationship with Yahweh (Exod 34:30, Moses; Josh 4:14, Moses and Joshua; 1 Sam 12:18, Samuel; 31:4 = 1 Chron 10:4; 2 Sam 1:14; cf. 1 Sam 24:7, the king as the anointed), and to the people of Yahweh, because they are called by his name (Deut 28:10).

Becker (op. cit. 38f.) demonstrates how, on the one hand, the numinous fear of God’s deeds appears as the starting point of a semantic development to “moral fear of God” and through “the notion of the acknowledgment of Yahweh and orientation toward him approximates the cultic concept (fear = honor)” (cf. e.g., Exod 14:31; Jer 10:7), so that, on the other hand, even if markedly attenuated, a basic note of numinous fear is always present in the spheres to be treated in IV/3–6 (with reference to the development in extra-Israelite pars., particularly in Akk. *palāhu*, op. cit. 78–80; cf. *AHW* 812f.; further, e.g., R. H. Pfeiffer, “Fear of God,” *IEJ* 5 [1955]: 41–48).

2. (a) The formula *ʿal-tîrāʿ* “do not fear” is first a formula of encouragement used in the profane realm (about 15x) that occurs predominantly in the sg. and abs. (only 2 Kgs 25:24 = Jer 40:9 with *min*) and that is grounded through a succeeding independent clause (Gen 43:23; 50:21; Ruth 3:11) or by a dependent clause introduced by a causal *kî* (Gen 35:17; 1 Sam 4:20; 22:23; 2 Sam 9:7; 2 Kgs 6:16). It frequently averts the fear of death (cf. Judg 4:18; 1 Sam 22:23; 23:17; 2 Sam 9:7). Gen 35:17 and 1 Sam 4:20 (of a birth) may be “a general word of encouragement that has become a fixed formula” (Plath, op. cit. 114), promising courage in time of need, and that can be rendered “be of good courage” (cf. ZB). In Psa 49:17, *ʿal-tîrāʿ* means a weakened “just wait patiently” (Becker, op. cit. 52n.219), “don’t let it bother you” (ZB).

(b) The theological usage of the formula *ʿal-tîrāʿ* (about 60x, in a few cases *lōʿ tîrāʿ*) occurs predominantly in Deutero-Isa (41:10, 13f.; 43:1, 5; 44:2; 54:4; cf. 44:8; 51:12), in Jer, and in Deut (cf. Plath, op. cit. 115–22; Becker, op. cit. 50–55); it is noteworthy in this context that it occurs only

once in wisdom literature (Prov 3:25) and that the formula is totally absent from the Psa.

As in the profane realm, the expression is a formula of comfort spoken in common situations of need or a word of encouragement; it occurs primarily (about 2/3 of the texts) as God's statement—rarely as a word of God's messenger (Gen 21:17; 2 Kgs 1:15; Dan 10:12, 19)—and as a human statement to a person under special commission of Yahweh (e.g., Moses, Joshua, Samuel, Elijah, Nehemiah, a priest; only in historical books except for Isa 35:4; Joel 2:21f.; Zeph 3:16; Prov 3:25).

As a word of God, the formula appears in the revelation formula promising salvation and comfort. It normally introduces a speech (as the conclusion, Hag 2:5; Zech 8:13, 15; Dan 10:19) and occurs in close relation to the self-predication formula of Yahweh (Gen 15:1; 26:24; 46:3; Isa 41:10, 13f.; 43:1, 5; Jer 30:10f.; 46:27f.). The formula usually precedes a justification (Gen 21:17; 26:24; Deut 3:2; Josh 8:1; 11:6; Isa 10:24; 41:10, etc., in Deutero-Isa; cf. IV/2a). An abs. usage occurs in Gen 15:1; 21:17; 26:24; Josh 8:1; Judg 6:23 and in the Deutero-Isa passages; otherwise it occurs with the preps. *min* and *mipp<sup>e</sup>n* or the nota accusativi (cf. Num 21:34; Deut 3:2; Josh 10:8; 11:6; 2 Kgs 19:6; Isa 10:24; Jer 42:11, etc.).

The formula as a human statement displays the same characteristics. Remarkable here are expansions in series through par. terms with negative or positive connotations. Particularly noteworthy are the verbs → *ʾms* “to be strong” (Deut 31:6; Josh 10:25; 1 Chron 22:13; 28:20; 2 Chron 32:7), → *h<sup>z</sup>q* “to be firm” (Deut 31:6; Josh 10:25; Isa 35:4; 1 Chron 22:13; 28:20; 2 Chron 32:7), *h<sup>t</sup>t* ni. “to be disheartened” (Deut 1:21; 31:8; Josh 8:1; 10:25; Jer 30:10; Ezek 3:9; 1 Chron 22:13; 28:20; 2 Chron 32:7), *ʿrs* “to be afraid” (Deut 1:29; 20:3; 31:6), and *rkk* “to be fainthearted” (Deut 20:3; Isa 7:4).

After H. Gressmann had already recognized the formula *ʾal-tûrā* as an element of revelatory discourse in the literary analysis of Deutero-Isa (ZAW 34 [1914]: 254–97, esp. 287–89) and its origins in the salvation oracle of the priests, appealing to Bab. antecedents (cf. e.g., AOT 281f.; ANET 449f.), J. Begrich (“Das priesterliche Heilsorakel,” ZAW 52 [1934]: 81–92 = GS [1964], 217–31) introduced evidence of the institution of the priestly salvation oracle in the Israelite realm. A significant proof text is Lam 3:57 (cf. Begrich, op. cit. 82 [= GS 219]).

L. Köhler's derivation of the formula from the numinous experience of the theophany (“Die Offenbarungsformel ‘Fürchte dich nicht!’ im AT,” SThZ 36 [1919]: 33–39) is less probable in itself, esp. because one can adduce only Exod 20:20; Judg 6:23; Dan 10:12, 19, and perhaps Gen 26:24 in support of it.

Occurrences of the formula in the so-called battle address (cf. H. W. Wolff, *Immanuel* [1959], 15) within the tradition of the Yahweh war (von

Rad, *Holy War* 45f.) also deserve special mention: Exod 14:13; Num 21:34; Deut 1:21, 29; 3:2, 22; 20:1, 3; 31:6, 8; Josh 8:1; 10:8, 25; 11:6; Isa 7:4; Neh 4:8; 2 Chron 20:15, 17; 32:7; further also 1QM 10:3; 15:8; 17:4. Here too *ʔal-tîrāʔ* should be understood as a salvation oracle, more precisely as a war oracle, which, as corresponding extra-Israelite pars. make clear, is a common ancient Near Eastern genre.

The following references may simply be mentioned (cf. H. Wildberger, *ZTK* 65 [1968]: 135 and → *ʔmn* B.IV/2; also H. Cazelles, *RB* 69 [1962]: 321–49; O. Kaiser, *ZAW* 70 [1958]: 107–26): the oracle of Ishtar of Arbela to Esarhaddon (*ANET* 450a; *AOT* 282, III:38–IV:10): “Fear not (*lā tapallah*), O king, I said to you, ‘I have not abandoned you.’ . . . I shall not let you be disgraced. . . . with my own hands, your foes shall I crush”; from the Aram. realm the ZKR inscription (*KAI* no. 202A.12–14; *ANET* 655b): “Be’elshamayn [said to me]: ‘Do not fear (*ʔltzhl*), for I made you king, and I shall . . . deliver you from all [these kings]”; cf. also the letter of Šuppiluliuma to Niqmadu of Ugarit (RS 17:132.3–5): “Even if Nuhaš and Mukiš are at war with me, you do not fear, Niqmadu” (*PRU* 4:35f.).

Supplementary mention may be made in this context of the form *lōʔ ʔirāʔ* (only Psa 46:3 pl.) “I am not afraid” (as freedom from any fear of people, in particular, and of natural catastrophes), characteristic of some Psa, which occurs in songs of confidence (Psa 23:4; 27:1, here as a question) and in declarations of confidence in the songs of thanksgiving (Psa 118:6). Some relationship with the salvation oracle seems likely (cf. Kraus, *Psa*, CC, 2:397, who wants to understand the confession “Yahweh is for me, I am not afraid” in Psa 118:6 as “an echo to . . . an oracle of salvation”).

3. “Fear of God” passages in the Dtn-Dtr literature are uniform with reference both to meaning and to linguistic form (Deut 4:10; 5:29; 6:2, 13, 24; 8:6; 10:12, 20; 13:5; 14:23; 17:19; 28:58; 31:12f.; Josh 4:24; 24:14; Judg 6:10; 1 Sam 12:14, 24; 1 Kgs 8:40, 43 = 2 Chron 6:31, 33; 2 Kgs 17:7, 25, 28, 32–39, 41; Plath, op. cit. 33–45; Becker, op. cit. 85–124).

Only verbal forms are used; the inf. cs. with *l<sup>e</sup> (l<sup>e</sup>yirʔâ)* characterizes Deut. The obj. of the verb—when expressly named—is always Yahweh or the phrase “Yahweh your/our God.” The following are important par. terms (supra-, co-, or subordinated; cf. Plath, op. cit. 33): → *ʔhb* “to love” (Deut 10:12), → *dbq* “to cling to” (Deut 10:20; 13:5), → *hlk bidrākāyw* “to walk in his ways” (Deut 8:6; 10:12), *hlk ʔaḥʔrê* “to follow” (Deut 13:5), → *ʔbd* “to serve” (Deut 6:13; 10:12, 20; 13:5; Josh 24:14; 1 Sam 12:14), → *ʔšh haḥuqqîm* “to keep the commandments” (Deut 6:24), → *ʔšb<sup>c</sup> ni. bišmô* “to swear by his name” (Deut 6:13; 10:20), → *ʔšm<sup>c</sup> b<sup>c</sup>qōlô* “to listen to his voice” (Deut 13:5; 1 Sam 12:14), and → *ʔšmr* “to keep (commandments, etc.)” (Deut 5:29; 6:2; 8:6; 13:5; 17:19; 31:12).

The close relationship of “fearing Yahweh” and observing the law is noteworthy. The interrelationship of the two can be properly defined and understood on the basis of the so-called covenant formula (cf. K. Baltzer, *Covenant Formulary* [1971], esp. 12f., 37f.), in which one of the terms is *yrʾet-yhwh* “to fear Yahweh” (cf. → *hb*, → *dbq*), which expresses the basic declaration of Israel’s relationship to Yahweh. Thus *yrʾet-yhwh* should be understood solely as “the worship of Yahweh with particular attention to the concept of faithfulness to him as the covenant God” (Becker, op. cit. 85).

In 2 Kgs 17:36, 39, *yrʾ* exhibits the same meaning of “worship” as faithfulness to Yahweh, while the other passages in the chapter display *yrʾ* as a cultic technical term describing both the worship of strange gods and an illegitimate Yahweh cult (cf. Plath, op. cit. 43; Becker, op. cit. 123).

4. A typical expression in the Psa is *yirʾé yhwh* “those who fear Yahweh” (a verbal adj. *yārēʾ* in the pl. cs. with a subst. meaning; cf. Joüon 415 §1211; Plath, op. cit. 84–103; Becker, op. cit. 125–61). In addition to *yirʾé yhwh* (Psa 15:4; 22:24; 115:11, 13; 118:4; 135:20; cf. Mal 3:16[bis]; probably also originally in 66:16 in the Elohist Psalter), the equivalent suf. forms “who fear you/him” (Psa 22:26; 25:14; 31:20; 33:18; 34:8, 10; 60:6; 85:10; 103:11, 13, 17; 111:5; 119:74, 79; 145:19; 147:11) or “who fear my/your name” (Mal 3:20; Psa 61:6), also occur 27x (perhaps also Psa 119:63 txt em).

*yirʾé yhwh* refers to the community of those who worship Yahweh in the cult, in particular: (a) originally the cultic community assembled in the temple “in actu” (Psa 22:24, 26; 31:20; 66:16); (b) broadened, the entire people of Yahweh (cf. Psa 60:6 par. *ʿam* “people” v 5; 61:6 [cf. Weiser, *Psa*, OTL, 444]; 85:10); (c) in unmistakably late psalms, the term designates those “faithful to Yahweh,” the “pious” of the community (Psa 25:14; 33:18; 34:8, 10; 103:11, 13, 17; 111:5; 119:74, 79; 147:11; cf. also Mal 3:16, 20), a usage that sometimes has moral-wisdom (Psa 25:12, 14; 34:8, 10; cf. v 12; see 6a) or nomistic connotations (cf. Psa 103:17; 119:74, 79; see 7); (d) it is questionable whether *yirʾé yhwh* in Psa 115:11, 13; 118:4; 135:20 indicates the so-called proselytes (cf. A. Bertholet, *Die Stellung der Israeliten und der Juden zu den Fremden* [1896], 182; further Kraus, *Psa*, CC, 2:378, 381; Weiser, *Psa*, OTL, 724), the more so because the usual technical term for this is *gērîm* (→ *gûr*, cf. E. Schürer, *History of the Jewish People in the Age of Jesus Christ*, rev. ed. by G. Vermes et al. [1986], 3/1:169ff.). It is more probable that *yirʾé yhwh* should be seen as the collective term for post-exilic, hierarchically structured participants in the cult (with Plath, op. cit. 102f.; Becker, op. cit. 160).

5. Beyond the Dtn-Dtr realms and the usages of *yirʾé yhwh* in the

Psalter (see 3 and 4), the meaning “to fear” in the sense of “to worship Yahweh faithfully” may occur in 1 Kgs 18:3, 12; 2 Kgs 4:1; Jer 32:39f.; Neh 1:11 (in Jer and Neh likely under direct Dtr influence). The simple meaning “cultic worship” is displayed in Isa 29:13 (Duhm, *Jesaia*, HKAT [19224], 186; Fohrer, *Jesaja*, ZBK, 2:77), and Jonah 1:9 exhibits the limited technical meaning “cultic, religious membership.”

6. (a) *yr*<sup>ʔ</sup> passages in the wisdom tradition are noteworthy for characteristic linguistic forms: (1) the adj. *yārē*<sup>ʔ</sup> in the combination *y<sup>ʔ</sup>rē*<sup>ʔ</sup> *yhwh* (according to Becker, op. cit. 126f., 188, the pl. *yir<sup>ʔ</sup>ē yhwh* in the Psa would by analogy be a gen. possessivus, the sg. *y<sup>ʔ</sup>rē*<sup>ʔ</sup> *yhwh* a gen. objectivus), e.g., Isa 50:10; Psa 25:12; 128:1, 4; Prov 14:2; *y<sup>ʔ</sup>rē*<sup>ʔ</sup> *ʔlōhîm*, e.g., Job 1:1, 8; 2:3; Eccl 7:18; notably—in contrast to the Psa—no suf. forms and only two pl. forms occur (Exod 18:21; Eccl 8:12); (2) the subst. *yir<sup>ʔ</sup>â*, esp. in the dominant phrase *yir<sup>ʔ</sup>at yhwh* “fear of Yahweh” (Prov 1:7, 29; 2:5; 8:13; 9:10; 10:27; 14:26f.; 15:16, 33; 16:6; 19:23; 22:4; 23:17; cf. Isa 11:2f.; 33:6; Psa 34:12; 111:10; 2 Chron 19:9), and in *yir<sup>ʔ</sup>at šadday* (Job 6:14), *yir<sup>ʔ</sup>at ʔadōnāy* (Job 28:28), and the abs. *yir<sup>ʔ</sup>â* (Job 4:6; 15:4; 22:4), which, however, may represent *yir<sup>ʔ</sup>at ʔlōhîm* (Plath, op. cit. 55; Fohrer, KAT 16, 138, 267, 355); (3) the verb *yr*<sup>ʔ</sup> with the obj. “God” (Job 1:9; Eccl 5:6; 12:13; with *millipn*<sup>ʔ</sup> “before”: Eccl 3:14; 8:12f.) or “Yahweh” (Prov 3:7; 24:21).

(b) The following characteristics demonstrate a close relationship to wisdom: (1) *yir<sup>ʔ</sup>at yhwh* parallels wisdom terms closely, esp. in the collection of sayings in Prov 1–9, and can also be used as a synonym for *da<sup>ʔ</sup>at* → *yd<sup>ʔ</sup>* “knowledge” (cf. Prov 1:7, 29; 2:5; 9:10; 15:33; also Isa 11:2; 33:6; Job 28:28; cf. Gemser, HAT 16, 25; Ringgren, ATD 16/1, 43; Becker, op. cit. 217ff.); (2) *yir<sup>ʔ</sup>at yhwh* appears in the deed-consequence pattern of wisdom literature (Prov 10:27; 14:26; 15:16; 16:6; 19:23; 22:4).

(c) Expressions for “fear of God” mentioned above occur in wisdom texts variously in par. to *tām* “right,” *yāšār* “upright,” *šaddîq* “righteous,” *sûr mēra<sup>ʔ</sup>* “to keep oneself from evil,” *śn<sup>ʔ</sup>ra<sup>ʔ</sup>* “to hate evil” (cf. Prov 3:7; 8:13; 10:27; Job 1:1, 8; 4:16; 28:28; also Psa 34:12, 15; 2 Sam 23:3; in opposition to *rāšā<sup>ʔ</sup>* “guilty” in Prov 10:27), so that “fear of God” should be understood here as “a fixed term for just, ethical behavior” (Becker, op. cit. 187; cf. also Plath, op. cit. 78).

(d) Although part of the wisdom tradition, Qohelet (in addition to *yr<sup>ʔ</sup>/y<sup>ʔ</sup>rē*<sup>ʔ</sup> *ʔlōhîm*, Eccl 5:6; 7:18; 12:13, here too the expression *yr<sup>ʔ</sup> millipnē* [*ʔlōhîm*], “to be afraid before God,” which does not occur elsewhere in wisdom, Eccl 3:14; 8:12f.) nevertheless goes his own way to the extent that, impressed by the distance between God and human (cf. e.g., 5:1), he reemphasizes the numinous element as fear in the face of the ineffability of

God which points to an awareness of dependency (cf. Zimmerli, ATD 16/1, 174; Becker, op. cit. 249f.; esp. E. Pfeiffer, “Die Gottesfurcht im Buche Kohelet,” FS Hertzberg 133–58).

(e) With respect to linguistic usage, the Elohist in the Pentateuch exhibits the same characteristic forms as the wisdom literature (*yrʾ ʿet-hāʿlōhîm* Gen 42:18; Exod 1:17, 21; *yʿrēʾ ʿlōhîm* Gen 22:12; *yirʾē ʿlōhîm* Exod 18:21; *yirʾat ʿlōhîm* Gen 20:11) and seems, according to Becker (op. cit. 209), “to be grounded in wisdom” (contra Plath, op. cit. 46f. etc., who explains it against the background of a “nebiistic” tradition; he too, however, with A. Jepsen, *Die Quellen des Königsbuches* [19562], 78, 98f., sees connections and reciprocal influences between Prophets and Wisdom; cf. Plath, op. cit. 72n.181). Here too the concern is with moral fear of God, in respect to which Gen 20:11 and 42:18 designate a general moral-human attitude (cf. von Rad, *Gen*, OTL [19722], 229, who characterizes *yirʾat ʿlōhîm* in Gen 20:11 as “reverence and regard of the most elementary moral norms, whose severe guardian was everywhere considered to be the divinity”; Gunkel, *Gen*, HKAT [19103], 444, sees “a certain international religious morality” in Gen 42:18).

Similarly, “God-fearing men” in Exod 18:21 may have connotations of “conscientious,” taking the par. terms into account (“able men . . . men who are trustworthy, and who hate a bribe,” Noth, *Exod*, OTL, 145; cf. Becker, op. cit. 197).

(f) Finally, in addition to Mal 3:5, the formula, “You shall fear your God, I am Yahweh,” which occurs in H in the context of commandments regulating human life generally (Lev 19:14, 32; 25:17, 36, 43), demonstrates a close relationship between fear and moral behavior. The motivational → *ʾnîyhw* as an “explication of the central self-introduction of Yahweh, the God who summons his people—or better . . . the God who sanctifies his people” (W. Zimmerli, *I Am Yahweh* [1982], 12) characterizes *yrʾ* not only as general moral behavior but as obedience to the revelation of Yahweh’s will.

7. In a few wisdom psalms, in which the law appears as “an absolute entity during the late period” (cf. M. Noth, *Laws in the Pentateuch and Other Studies* [1966], 85ff.), the concept of the “fear of God” becomes a “nomistic” concept and refers exclusively to the law. *yrʾ* designates those who have pleasure in Yahweh’s commandments (Psa 112:1), those faithful to the law (Psa 119:63) who walk in his paths (Psa 128:1). In Psa 19:10 *yirʾat yhw* signifies the law itself; cf. the par. terms (→ *tôrâ*, etc.; there is no reason to emend *yirʾat* to *ʾimrat* “word,” as Kraus, *Psa*, CC, 1:268, among others, suggests).

V. Early Judaism adopts various meanings of *yrʾ* and, in part,

develops them further (cf. J. Haspecker, *Gottesfurcht bei Jesus Sirach* [1967]). Thus e.g., rabbinic usage knows *môraʿ* and *môraʿâ* as common terms for moral fear of God (cf. *WTM* 3:57a; R. Sander, *Furcht und Liebe im palästinischen Judentum* [1935]). The rare occurrence in Qumran is noteworthy (cf. S. J. de Vries, “Note Concerning the Fear of God in the Qumran Scrolls,” *RQ* 5 [1965]: 233–37; 1QSb 5:25 as a citation of Isa 11:2; CD 20:19 as a citation of Mal 3:16; cf. the passages in the tradition of the holy war in 1QM [see IV/2b]; according to J. Maier, *Die Texte vom Toten Meer* [1960], 2:54, *yrʿ* ירע “one who fears God” in CD 10:2 means something like “cultically fit”; cf. IV/6a[3]).

The LXX renders *yrʿ* primarily with *phobein* and derivatives, less often one finds *sebesthai*, *theosebēs*, etc. On the NT cf. G. Bertram, “θεοσεβής,” *TDNT* 3:123–28; W. Foerster, “σέβομαι,” *TDNT* 7:168–91; H. R. Balz and G. Wanke, “φοβέω,” *TDNT* 9:189–219; R. Bultmann, *Theology of the NT* (1951–55), 1:320–22; 2:213f.; K. Romaniuk, *Il timore di Dio nella teologia di San Paolo* (1967).

H.-P. Stähli

ירד *yrđ* to descend → עלה *ʿlh*

ירה *yrh* hi. to instruct → תורה *tôrâ*

ירש *yrš* to inherit

S 3423; BDB 439a; *HALOT* 2:441a; *TDOT* 6:368–96; *TWOT* 920; *NIDOTTE* 3769

1. The root \**wrt*, manifest in Hebr. *yrš* “to inherit, take possession,” is well attested in WSem.; in older NWSem. cf. Ug. *yrt* (*WUS* no. 1248 “to seize”; *UT* no. 1161 “to inherit, acquire”; Gröndahl 145), Moab. *yrš* (Mesha inscription [= *KAI* no. 181], ll. 7f.: “and Omri had seized the entire region of Medeba”; cf. *ANET* 320b), Old Aram. *yrt* (Sef. [= *KAI* no. 222] 1.C.24f.: “and his descendants shall not inherit a name”; cf. Fitzmyer, *Sef.* 77; R. Degen, *Altaramäische Grammatik* [1969], 43).

A relationship to the Akk. *rašû* (Zimmern 17) should probably not be assumed (cf.

GAG §106r); in Late Bab. *jāritu* “inheritance” occurs as an Aramaism (AHw 412a).

The verb occurs in qal and hi., less often also in ni. and pi. Nom. derivatives are *y<sup>e</sup>rēšâ*, *y<sup>e</sup>ruššâ*, *môrāš*, and *môrāšâ* (cf. the place-name *môrešet gat*, Mic 1:14), all in the meaning “possession.” On the fem. name *y<sup>e</sup>rûšâ* (“the one taken into possession [by adoption]”) cf. *IP* 231f.; J. J. Stamm, FS Baumgartner 327.

*rešet* “(hunting) net” is farther removed semantically (22x, 8x in Psa; Ug. *rtt* ), although it is usually also derived from *yrš* (not in *UT* no. 2361). On *tîrôš* see 3b.

2. The word family—preferred particularly by Dtn-Dtr—is attested a total of 258x in the OT; qal 159x (excl. Num 21:32 K; Judg 14:15; Deut 63x, Josh 12x, Isa and Psa 10x, Gen and Judg 9x), ni. 4x, pi. 2x (incl. Judg 14:15; cf. *HP* 212f.), hi. 66x (incl. Num 21:32 Q; Josh and Judg 17x each, Num 8x, Deut 7x), *y<sup>e</sup>rēšâ* 2x (Num 24:18), *y<sup>e</sup>ruššâ* 14x (Deut 7x, Josh 3x), *môrāš* 2x (Isa 14:23; Obad 17; excl. Job 17:11 “wish,” root *yrš*, → *wh* 3), and *môrāšâ* 9x (Ezek 7x, also Exod 6:8; Deut 33:4).

3. (a) The qal of the verb is translated in the majority of cases with “to take into possession,” etc.; the obj. is usually “the land” (formulaically in Dtn-Dtr diction; cf. J. G. Plöger, *Literarkritische, formgeschichtliche und stilkritische Untersuchungen zum Deuteronomium* [1967], 83) or a particular land, both primarily in the context of statements concerning the conquest.

Grammatical objs. are: → *ʿereš* “land” in general (Gen 15:7f.; 28:4; Num 13:30; 33:53; Deut 1:8, 21, 39; 3:18, 20; 4:1, 5, 14, etc.; Josh 1:11, 15, etc.; Jer 32:23; Ezek 33:24–26; Psa 44:4; Ezra 9:11; Neh 9:15, 23; cf. Isa 60:21; Jer 30:3; Psa 37:9, 11, 22, 29, 34, etc. [cf. Matt 5:5]), *ʿereš* of a people or ruler (Sihon, Num 21:24; Deut 2:24, 31; 4:47, etc.; Og, Num 21:35; cf. Deut 3:12; Amorites, Josh 24:8; Amos 2:10 [Dtr? cf. W. H. Schmidt, *ZAW* 77 [1965]: 178–83; Wolff, *Amos*, Herm, 152, 169f.], etc.), → *ʾdāmâ* “land” (Lev 20:24; Deut 28:21, 63; 30:18; 31:13; 32:47; → *naḥʾlâ* “inheritance,” Num 27:11; 36:8), → *ʿîr* “city” (Judg 3:13; Obad 20; Psa 69:36), *šar* “gate” (Gen 22:17; 24:60), also “houses” (Ezek 7:24; Neh 9:25), “fortress” (Isa 57:13), and “fields” (Obad 19), etc.

The obj. is occasionally a people, in which case *yrš* is generally rendered “to expel, force out of possession”: the Rephaim (Deut 2:21), Horites (Deut 2:12, 22), Amorites (Judg 11:23), generally the peoples inhabiting the land (Deut 9:1, 5; 12:29; 18:14; 19:1), etc.

Only one passage has an obj. other than a people or its possession (land), i.e., slaves (Lev 25:46), yet the context consistently uses terms that otherwise describe real property.

In many cases the hi. (which occurs almost exclusively in the Dtr history and in Num) is almost identical in usage and meaning with the qal. In these instances many translators exaggerate the “expulsion” of peoples into “annihilation” or “extermination.”

This category of usage includes the nom. derivatives *y<sup>c</sup>rēššâ*, *y<sup>c</sup>ruššâ*, *môrāšš*, and *môrāššâ*, all of which mean “possession,” primarily in the sense of “property” (par. to <sup>ʾ</sup>*ḥuzzâ* [→ *ḥz*], → *naḥ<sup>a</sup>lâ*, *ḥēleq* [→ *ḥlq*], *ḥebel*, etc.). The ni. has the privative meaning “to be deprived of possession, become poor” (Gen 45:11; Prov 20:13; 23:21; 30:9); the hi. can be used for “to make poor” (1 Sam 2:7; Zech 9:4; cf. *rûš*, which is attested only in Hebr.; → *nh* II).

(b) The use of *yrš* for “to inherit” (Gen 15:3, 4[bis]; 21:10; Jer 49:1f.; cf. the substantivized ptcp. *yôreš* “inheritance,” 2 Sam 14:7; Jer 49:1) seems to be unconnected to the meanings treated above.

One must regard the meaning “to inherit” as original, not only because the admittedly few OT attestations of this meaning are the oldest, but because the other usages and the evidence in the other Sem. languages are most easily explained on this basis: property, esp. real property, to which reference is most often made, is basically inherited property in the OT and outside Israel (thus also the semantic proximity of *y<sup>c</sup>ruššâ*, *naḥ<sup>a</sup>lâ*, and <sup>ʾ</sup>*ḥuzzâ*). Cf. further F. Dreyfus, “Le thème de l’héritage dans l’AT,” *RSPT* 42 (1958): 3–49 (esp. 5–8).

In the Gk. realm, the phenomenon is represented by the semantic range of *klēros*, which means “portion, possession” (and “lot”) and, at the same time, “inheritance” (cf. *klēronomia* “inheritance, heritage, property” and *klēronomein* “to inherit”; cf. the Gk. lexicons and W. Foerster, “κλήρος,” *TDNT* 3:758ff.).

In a manner similar to *nḥl*, *yrš* has separated from the more limited process of inheritance in Hebr. and designates the “inherited property” or the (at times military) acquisition of property in general.

With regard to *tûrôš* “new wine, wine,” etc., it is not necessary to assume “to tread down, press” as the basic meaning of the root (as does P. Haupt, *AJSL* 26 [1909/10]: 215, 223 on Mic 6:15, followed by L. Köhler, *ZAW* 46 [1928]: 218–20; KBL 406b). *tûrôš* “wine” (cf. Ug. *trt* par. *yn* “wine” in *KTU* 1.17.VI.7 and 1.114.4, 16; Phoen. *trš* in the Karatepe inscription [= *KAI* no. 26] III.7, 9; *ANET* 654a) must derive from another root (B. Hartmann orally; cf. also Jew. Aram. *mēr<sup>c</sup>tā<sup>?</sup>*, Syr. *me<sup>r</sup>ritā* “new wine,” LS 406a; perhaps also Ug. *mrt*, *UT* no. 1558; J. C. de Moor, *UF* 1 [1969]: 170), if one accepts it as a Mediterranean agricultural term (like *yayin* “wine”) with C. Rabin (*Or* 32 [1963]: 137f.; cf. *UT* no. 2613). On Ug. *trt* as a divine title (*KTU* 1.102.9), cf. M. C. Astour, *JAOS* 86 (1966): 283; M. Dahood, *ETL* 44 (1968): 53 (on Hos 7:14); cf. earlier already

Zimmern 40; GB 877b; W. F. Albright, *BASOR* 139 (1955): 18.
